HOMALODERMATOUS, HOMALODERMOUS, adj's. Hom-a^{2}l-o-du^{5}rm'a^{2}t-u^{3}s, -du^{5}rm'u^{3}s. Gr., ὁμαλόδερμος (from ὁμαλός, smooth, and δέρμα, the skin). Lat., *homalodermus.* Fr., *homaloderme.* Ger., *ebenhäutig.* Smooth-skinned. [A, 322.]

HOMALOGONATOUS, adj. Hom-a^{2}l-o-go^{2}n'a^{2}t-u^{3}s. Lat., *homalogonatus* (from ὁμαλός, level, and γόνυ, the knee). Of birds, having the characteristic that bending of the leg causes closure of the toes, so that a perch is held on to. [L, 221.]

HOMALOGRAPHIC, adj. Hom-a^{2}l-o-gra^{2}f'i^{2}k. From ὁμαλός, level, and γράφειν, to write. Fr., *homalographique.* Delineated by level lines. 1. Said of a projection of a sphere in which the parallels are rectilinear and the meridians are elliptical. 2. Applied to a method of studying anatomy by the aid of charts and diagrams showing the organs as they appear in section. [L, 41, 49 (α, 39).]

HOMALOMETOPUS (Lat.), adj. Hom(ho^{2}m)-a^{2}l(a^{3}l)-o(o^3)-me^{2}t-op'u^{3}s(u^{4}s). From ὁμαλός, flat, and μέτωπον, the space between the eyes. Ger., *homalometop.* Of Lissauer, having a frontal angle between 130·5° to 141°. [L.]

HOMALONEMA (Lat.), n. n. Hom(ho^{2}m)-a^{2}l(a^{3}l)-o(o^3)-ne(na)'-ma^3. Gen., *-nem'atos* (*-atis*). From ὁμαλός, even, and νῆμα, a thread. Of Schott, a genus of tropical Asiatic and American herbs of the *Aroideæ*, tribe *Philodendreæ.* [B, 42 (α, 24).]—**H. aromaticum.** A Chittagong species the root of which the natives value highly as a medicine. When cut, the plant emits an agreeable aromatic odor. [B, 19, 172 (α, 24).]

HOMALOPHYLLOUS, adj. Hom-a^{2}l-o-fi^{2}l'u^{3}s. From ὁμαλός, level, and φύλλον, a leaf. Having the leaves even. [B.]

HOMALOPISTHOCRANIUS (Lat.), adj. Hom(ho^{2}m)-a^{2}l(a^{3}l)-o^{2}p-i^{2}sth-o(o^3)-kran(kra^{3}n)'i^2-u^{3}s(u^{4}s). From ὁμαλός, even, ὄπισθεν, behind, and κρανίον, the skull. Ger., *homalopisthocran.* Having an angle of between 140° and 154° formed by the union of two lines drawn from the external occipital protuberance and the punctum occipitale, at the point upon the skull highest above the horizontal plane. [Lissauer (L).] Cf. EUTHYOPISTHOCRANIUS.

HOMALOPTEROUS, adj. Hom-a^{2}l-o^{2}pt'e^{2}r-u^{3}s. From ὁμαλός, flat, and πτέρον, a wing. Fr., *homaloptère.* Having flat wings. [L, 41.]

HOMALURANUS (Lat.), adj. Hom(ho^{2}m)-a^{2}l(a^{3}l)-u^2(u)-ran-(ra^{3}n)'us(u^{4}s). From ὁμαλός, flat, and οὐρά, a tail. Fr., *homalure.* Ger., *homalur.* Having an angle of from 147·5° to 163·5° formed at a point highest above and in the same vertical plane with a line drawn from the punctum occipitale to the punctum bregmatis, the angle being formed by two lines drawn from these points respectively and meeting at the point indicated. [Lissauer (L).] Cf. CYRTURANUS and EUTHYURANUS.

HOMARUS (Lat.), n. m. Hom(ho^{2}m)'a^2(a^3)-ru^{3}s(ru^{4}s). Fr., *homard.* A genus of *Crustacea*, family of *Astacicæ*, embracing the sea lobsters. [L, 353 (α, 39).]—**H. vulgaris.** The common lobster, found in sea waters, frequenting the clearest water at the foot of overhanging rocks. In life it is of a fine bluish-black color beautifully variegated with paler spots and clouds. [L, 292 (α, 39).]

HOMATROPINE, n. Hom-a^{2}t'ro-pen. Lat., *homatropina*, *homatropinum* (from ὁμός, like, and Ἄτροπος [see ATROPA]). Fr., *h.* Ger., *Homatropin.* An alkaloid, $C_{16}H_{21}NO_3$, obtained by A. Ladenberg from atropine, amygdalic and dilute hydrochloric acid, and obtained afterward by Merck in transparent, colorless, and regular crystals, not very soluble in water, but nevertheless hygroscopic and very deliquescent. As a mydriatic, it is usually employed in the form of the hydrobromide. It paralyzes the accommodation as well as dilates the pupil, the effect on both being transient. By some it is preferred to atropine for both these purposes preparatory to determining the refraction, but as a therapeutic agent it is inferior to atropine. ["Nouv. rem.," 1880; "Proc. of the Am. Pharm. Assoc.," xxix, xxx; B, 46 (α, 14); F.]—**H. gold chloride.** A substance, $C_{16}H_{21}NO_3.HCl.AuCl$, usually precipitated as an oil, but soon crystallizing. It may be recrystallized from hot water and is thus obtained in handsome, sparingly soluble prisms. ["Proc. of the Am. Pharm. Assoc.," xxx (α, 14).]—**H. hydrobromate, H. hydrobromide.** A substance, $C_{16}H_{21}NO_3.HBr$, forming in large wart-like aggregations of crystals or rhombic prisms with irregularly developed pyramidal surfaces. The salt is not hygroscopic and dissolves in ten parts of water, and the solutions do not readily undergo changes. ["Proc. of the Am. Pharm. Assoc.," xxx (α, 14).]—**H. picrate.** A substance, $C_{16}H_{21}NO_3.C_6H_2(NO_2)_3OH$, precipitated in an oily resinous form, but soon becoming crystalline. It dissolves readily in hot water, and crystallizes therefrom in yellow, shining laminæ. ["Proc. of the Am. Pharm. Assoc.," xxx (α, 14).]

HOMATROPINUM (Lat.), n. n. Hom(ho^{2}m)-a^{2}t(a^{3}t)-rop(ro^{2}p)-i(e)'nu^{3}m(nu^{4}m). See HOMATROPINE.—**H. hydrobromicum.** See HOMATROPINE *hydrobromide.*

HOMAXONIAL [Haeckel], **HOMAXONIC** [Lankester], adj's. Hom-a^{2}x-on'i^2-a^{2}l, -o^{2}n'i^{2}k. From ὁμός, like, and ἄξων, an axis. Having the axes all equal. [B, 77.]

HOM-BI-LO-ZA (Chin.), n. A variety of *Rhamnus cathartica*, the false *Rhamnus utilis.* [B, 121; L.]

HOMBRECILLO [Mex. Ph.] (Sp.), n. Om-bra-thel'yo. Lit., a manikin; the *Humulus lupulus.* [A, 447 (α, 21); B, 121 (α, 24).]

HOMBURG (Ger.), n. Ho^{3}m'burg. A place in the Prussian province of Hesse-Nassau, situated on the slope of the Taunus and generally called *H. on the hill*, where there are four famous mineral springs, called *Ludwigsquelle*, *Kaiserquelle* or *Sprudel*, *Elisabethquelle* or *Kurbrunnen*, and *Stahlbrunnen*, of which the second is richest in free carbonic acid, the third in iron carbonate, and the fourth in sodium chloride. [L, 30, 37, 49, 135 (α, 14).]

HOMEDRIC, adj. Hom-ed'ri^{2}k. Lat., *homedricus* (from ὁμός, the same, and ἕδρα, a base). Fr., *homédrique.* Ger., *gleichflächig.* In crystallography, having equal facets. [A, 322.]

HOMEDROUS, adj. Hom-ed'ru^{3}s. Lat., *homedrus.* 1. See HOMEDRIC. 2. Of diseases, affecting the same part of the organism. [A, 322.]

HOMEOPATHY, n. Ho^{3}m-e-o^{2}p'a^{2}th-i^2. See HOMŒOPATHY.

HOMERDA (Lat.), n. f. Hom(ho^{2}m)-u^{6}rd(e^{2}rd)'a^3. From *homo*, a man, and *merda*, dung. Fr., *excrément humain.* Human fæces. [A, 322.]

HOMERIA (Lat.), n. f. Hom-e(a)'ri^2-a^3. A genus of south African bulbo-tuberous plants of the *Irideæ*, tribe *Moraceæ.* [B, 42 (a, 24).]—**H. collina.** See MORÆA *collina.*

HOMERIANA (Lat.), n. f. Hom-e(a)-ri^2-an(a^{2}n)'a^3. The *Polygonum aviculare.* [a, 35.]

HOME-SICKNESS, n. Ho^{3}m'si^{2}k-ne^{2}s. See NOSTALGIA.

HOMEWORT, n. Ho^{3}m'wu^{6}rt. The *Sempervivum tectorum.* [A, 505 (a, 21).]

HOMICIDE, n. Ho^{2}m'i^2-sid. Lat., *homicidium* (from *homo*, a human being, and *cædere*, to kill) (1st def.), *homicida* (2d def.). Fr., *h.* Ger., *unvorsätzlicher* (oder *züfalliger*) *Mord* (1st def.). 1. The act of killing a human being when done accidentally or justifiably. 2. A person who commits such an act.

HOMILIA (Lat.), n. f. Ho^{2}m-i^{2}l'i^2-a^3. Gr., ὁμιλία (from ὁμιλεῖν, to be together with). Sexual intercourse. [A, 322.]

HOMINAL, adj. Ho^{2}m'i^2-n'l. From *homo*, a human being. Fr., *h.*, *hominien.* See HUMAN.

HOMINISECTION, n. Ho^{2}m'i^{2}n-i^2-se^{2}k-shu^{3}n. From *homo*, man, and *secare*, to cut. The dissection of man. [B.]

HOMINIVOROUS, adj. Ho^{2}m-i^{2}n-i^{2}v'o-ru^{3}s. From *homo*, a human being, and *vorare*, to devour. Fr., *hominivore.* 1. Maneating; preying upon man. 2. Parasitic on or in man. [A, 385.]

HOMINY, n. Ho^{2}m'i^2-ni^2. From Indian *auhúminea*, parched corn. Maize hulled and coarsely ground. [B, 19, 116 (a, 24).]—**Wheaten h.** See GROATS.

HOMME (Fr.), n. O^{2}m. Lat., *homo.* See MAN.—**H. pendu.** See ACERAS *anthropophora.*—**H. porc-épic.** A person affected with ichthyosis hystrix. [G.]

HOMO (Lat.), n. m. Hom(ho^{2}m)'o. Gen., *hom'inis.* See MAN; as a zoological classification name, the only genus of the *Bimana*, or *Hominidæ.*—**H. alatus.** A person having scapulæ that project from the body like wings. [a, 34.]—**H. fatuus.** An idiot. [a, 34.]—**H. hirsutus, H. pilosus.** A person affected with hypertrichosis universalis. [G.]—**H. sapiens.** The species *man*, having reason, articulate speech, upright gait, hands, and broad-soled, short-toed feet. [L, 28, 353 (a, 39).]—**H. silvestris.** A wild man. [G.]

HOMOANISIC ACID, n. Hom-o-a^{2}n-i^{2}s'i^{2}k. Fr., *acide homoanisique.* An acid, $C_9H_{10}O_3$, occurring in the form of crystals which melt at 85° C. It is easily soluble in alcohol, in ether, and in boiling water, slightly soluble in cold water. [B, 46 (a, 39); B, 93 (a, 38).]

HOMOBLASTIC, adj. Hom-o-bla^{2}st'i^{2}k. Lat., *homoblastus*, *homoblasteus* (from ὁμός, common, and βλαστός, a sprout). The *Homoblastæ* of Jussieu are a subdivision of the *Perispermeæ*, comprising the families *Juncaceæ*, *Pontederiaceæ*, *Gilliesiaceæ*, *Liliaceæ*, *Smilacineæ*, *Melanthaceæ*, *Dioscoreaceæ*, *Taccaceæ*, *Irideæ*, *Amaryllideæ*, *Hypoxideæ*, *Hæmodoraceæ*, *Bromeliaceæ*, *Musciaceæ*, *Cannaceæ*, and *Zingiberaceæ.* [B, 170 (a, 24).]

HOMOBRANCHIATE, adj. Ho-mo-bra^{2}n^2'ki^2-at. Lat., *homobranchiatus* (from ὁμός, like, and βράγχιον, a gill). Fr., *homobranche.* Having gills resembling each other. [L, 41.]

HOMOBRENZCATECHIN (Ger.), n. Ho-mo-bre^{2}nts-ka^3-tach^{2}en'. See HOMOPYROCATECHIN.

HOMOCARPOUS, adj. Ho-mo-karp'u^{3}s. Lat., *homocarpus* (from ὁμός, like, and καρπός, a fruit). Fr., *homocarpe.* Having the fruits of a flower-head alike. [B, 1, 19, 36 (a, 24).]

HOMOCENTRIC, adj. Ho-mo-se^{2}nt'ri^{2}k. From ὁμός, common, and κέντρον, a centre. Fr., *homocentrique.* Having the same centre. [L, 49, 56.]

HOMOCEPHALIC, adj. Ho-mo-se^{2}f-a^{2}l'i^{2}k. From ὁμός, common, and κεφαλή, the head. On the same capitulum. [Delpino (a, 35).] See *H.* HOMOGAMY.

HOMOCERCAL, adj. Ho-mo-su^{6}r'k'l. From ὁμός, common, and κέρκος, the tail. Fr., *homocerque.* Of a fish's tail, not evidently unequal and with the back-bone apparently stopping at the middle of the base of the caudal fin. [L, 341 (a, 27).]

HOMOCEREBRIN, n. Ho-mo-se^{2}r'e^{2}b-ri^{2}n. Fr., *homocérébrine.* Ger., *H.* A substance analogous to cerebrin and differing from it chiefly in being more soluble in alcohol. It is obtained along with cerebrin and encephalin from brain tissue by boiling with a saturated solution of baryta, washing the precipitate, and again boiling with absolute alcohol. Its centesimal composition is C 10·06; H 11·595; N 2·23; O 16·115. [Parkus, "Jahr. f. prakt. Chem.," N. F., 1881, p. 310 (B).]

HOMOCHELIS (Lat.), adj. Hom(ho^{2}m)-o(o^3)-kel(ch^{2}al)'i^{2}s. From ὁμός, like, and χηλη, a claw. Fr., *homochèle.* Having the chelæ alike. [L, 41 (a, 14).]

HOMOCHININ (Ger.), n. Ho-mo-ch^{2}e-nen'. See HOMOQUININE.

HOMOCHROMOUS, adj. Ho-mo-krom'u^{3}s. Lat., *homochromeus* (from ὁμός, common, and χρῶμα, color). Fr., *homochrome.* Ger., *gleichfarbig.* Of the same color; in botany, having the male flowers, when present, ligulate and of the same color as those of the disc. The *Homochromeæ* are a subtribe of the *Asteroideæ* so characterized. [B, 42 (a, 24).]

HOMOCHROOUS, adj. Ho-mo^{2}k'ro-u^{3}s. Gr., ὁμόχροος (from ὁμός, common, and χρώς, color). See HOMOCHROMOUS.

HOMOCINCHONIA (Lat.), n. f. Hom(ho^{2}m)-o(o^3)-si^{2}n(ki^{2}n)-kon(ch^{2}on)'i^2-a^3. Of Hesse, see HOMOCINCHONINE.

HOMOCINCHONICINE, n. Ho-mo-si^{2}n-ko^{2}n'i^{2}s-en. Lat., *homocinchonicina.* An amorphous alkaloid, $C_{19}H_{22}N_2O$, obtained by heating sulphate of homocinchonidine. ["Proc. of the Am. Pharm. Assoc.," xxvi (a, 14); B, 5 (a, 38).]

HOMOCINCHONIDINE, n. Ho-mo-si^{2}n-ko^{2}n'i^{2}d-en. Lat., *homocinchonidina.* An alkaloid, $C_{19}H_{22}N_2O$, obtained from the *Cinchona rosulenta* and other species of *Cinchona*, and crystallizing from strong alcoholic solutions in compact prismatic crystals, from diluted alcohol in scales deviating the plane of polarized light to the left. It is soluble in alcohol, in ether, and in chloroform, hardly soluble in water. ["Proc. of the Am. Pharm. Assoc.," xxvi (a, 14); B, 5, 270 (a, 38).]

HOMOCINCHONINE, n. Ho-mo-si^{2}n'kon-en. From ὁμός, like, and *Cinchona* (*q. v.*). A substance, $C_{19}H_{22}N_2O$ (the *cinchonodine* of Koch), obtained from the bark of the *Cinchona rosulenta*, and crystallizing from its alcoholic solution in large prisms; probably identical with Skraup's cinchonia (1877). ["Proc. of the Am. Pharm. Assoc.," xxvi (a, 14); B, 5 (a, 38).]

HOMOCLINIC, adj. Ho-mo-kli^{2}n'i^{2}k. From ὁμός, common, and κλίνη, a couch. On the same andrœcium. [Delpino (a, 35).] See *H.* HOMOGAMY.

HOMOCOUMARIN, n. Ho-mo-ku'ma^{3}r-i^{2}n. A crystalline substance, $C_{10}H_8O_2$, obtained from the volatile oil of the tonka bean. Schoten has obtained it synthetically. [B, 46 (a, 39).]

HOMOCREATIN, n. Ho-mo-kre'a^{2}t-en. A substance, $C_9H_{11}N_5O_2$, formed by the action of chloropropionic ether on methylamine. It occurs in colorless, anhydrous, rhombic crystals, insoluble in alcohol, slightly soluble in cold water, freely soluble in boiling water. It has a very pronounced sweetish odor. When heated to 150 to 160° C., it decomposes. [B, 46 (a, 39).]

HOMOCRICIOUS, adj. Ho-mo-kri^2'shu^{3}s. Lat., *homocricius* (from ὁμός, like, and κρίκος, a ring). Fr., *homocricien.* Having all the articulations or rings alike. [L, 41.]

HOMOCUMINATE, n. Ho-mo-ku'mi^{2}n-at. From ὁμός, common, and κύμινον, cumin. A salt of homocuminic acid. [B, 38 (a, 14).]

HOMOCUMINIC ACID, n. Ho-mo-ku^2-mi^{2}n'i^{2}k. Fr., *acide homocuminique.* Ger., *Homocuminsäure.* A monobasic acid, $C_{11}H_{14}O_2 = C_6H_4 \cdot {C_3H_7 \atop C\,H_2} \cdot CO.OH$, also called parapropylphenylacetic acid, derived from propylethylbenzene and crystallizing from hot water in small needles which melt at 52° C. [B, 3, 4, 38 (a, 38).]

HOMODERMATOUS, HOMODERMOUS, adj's. Ho-mo-du^{6}rm'a^{2}t-u^{3}s, -du^{6}rm'u^{3}s. Lat., *homodermatus* (from ὁμός, like, and δέρμα, the skin). Fr., *homoderme.* Having the skin alike on all parts of the body. [L, 41.]

HOMODESMOTIC, adj. Ho-mo-de^{2}s-mo^{2}t'i^{2}k. From ὁμός, common, and δεσμός, a bond. Connecting or associating nerve centres of equal rank (said of nerve-fibres). [J, 198.]

HOMODIMETHYLPROTOCATECHUIC ACID, n. Ho-mo-di-me^{2}th-i^{2}l-pro-to-ka^{2}t-e^{2}k-u^2'i^{2}k. Fr., *acide homovératrique.* An acid, $C_{10}H_{14}O_4$. It is a fine, white, effervescing powder, fusible at 98° to 99° C., soluble in water, in alcohol, and in ether. [B, 46 (a, 39).]

HOMODROMAL, HOMODROMOUS, adj's. Ho-mo^{2}d'ro-m'l, -mu^{3}s. From ὁμός, common, and δρόμος, a course. Fr., *homodrome.* Having the spirals all turned the same way; having the spiral of a lateral organ, such as a branch, the same as those of a central organ or the stem. [B, 19, 77 (Gray) (a, 24).]

HOMODROMY, n. Ho-mo^{2}d'ro-mi^2. Fr., *homodromie.* The state of being homodromal. [B, 279.]

HOMODYNAMOUS, adj. Ho-mo-di^{2}n'a^{2}m-u^{3}s. From ὁμός, common, and δύναμις, power. Having the same power, serially homologous (said of the carpus and tarsus, metacarpus and metatarsus of mammals). [L, 153 (a, 39).]

HOMŒANTHA (Lat.), n. n. pl. Hom(ho^{2}m)-e^2(o^2-e^2)-an(a^{2}n)'-tha^3. From ὅμοιος, like, and ἄνθος, a flower. Of Schultz, the second division of homœoses; diseases arising from disordered digestion. [a, 34.]

HOMŒOBIOETHNY, n. Ho^{3}m-e^2-o-bi-o-e^{2}th'ni^2. From ὅμοιος, like, βίος, life, and ἔθνος, a people. Fr., *homœobiethnie.* The state of being of the same race. [A, 385.]

HOMŒOBIOTIC, adj. Ho^{3}m-e^2-o-bi-o^{2}t'i^{2}k. Lat., *homœobioticus* (from ὅμοιος, like, and βίος, life). Fr., *homœobiotique.* Ger., *homöobiotisch.* 1. Related as to habits of life: of diet, suitable to a certain position in life. [A, 322, 385.] 2. See HOMOLOGOUS.

HOMŒOBLASTIC, adj. Ho^{2}m-e^2-o-bla^{2}st'i^{2}k. From ὅμοιος, like, and βλαστός, a sprout. See HOMOBLASTIC.

HOMŒOCHYLA (Lat.), n. n. pl. Hom(ho^{2}m)-e^2(o^2-e^2)-o(o^3)-kil-(ch^{2}u^{6}l)'a^3. From ὅμοιος, like, and χυλός, chyle. Of C. H. Schultz, the third division of homœoses; those diseases arising from a faulty condition of the chyle. [a, 34.]

HOMŒOGENESIA (Lat.), **HOMŒOGENESIS** (Lat.), n's f. Hom(ho^{2}m)-e^2(o^2-e^2)-o(o^3)-je^{2}n(ge^{2}n)-ez(e^{2}s)'i^2-a^3, -je^{2}n(ge^{2}n)'e^2-si^{2}s. Gen., *-es'iæ*, *-es'eos* (*-genesis*). Fr., *homœogénésie.* The faculty that two germs of opposite sexes possess in different individuals of becoming reciprocally prolific, however great their zoological difference may be. [L, 150 (a, 39).]

HOMŒOETHNY, n. Ho^{3}m-e^2-o-e^{2}th'ni^2. From ὅμοιος, like, and ἔθνος, a race. See HOMŒOBIOETHNY.

HOMŒOMERES (Lat.), adj. Hom(ho^{2}m)-e^2(o^2-e^2)-o^{2}m'e^{2}r-ez-(as). Gr., ὁμοιομερής (from ὅμοιος, like, and μέρος, a part). Consisting of like parts. [A, 311.]

HOMŒOMERIA (Lat.), n. f. Hom(ho2m)-e2(o2-e2)-o(o3)-me2r-i(e)′a3. The doctrine or theory of likeness or identity of parts. [L, 56.]

HOMŒOMORPHIA (Lat.), n. f. Hom(ho2m)-e2(o2-e2)-o(o3)-mo2rf′i2-a3. From ὅμοιος, like, and μορφή, form. Similarity of coning of formation. [A, 385.]

HOMŒOMORPHOUS, adj. Ho3m-e2-o-mo2rf′u3s. Gr., ὁμοιόμορφος (from ὅμοιος, like, and μορφή, form). Lat., *homœomorphus.* Having a similar form. [L, 107.]

HOMŒOPATH, n. Ho3m′e2-o-pa2th. Fr., *homœopathe.* Ger., *Homöopath.* See HOMŒOPATHIST.

HOMŒOPATHIC, adj. Ho3m-e2-o-pa2th′i2k. Gr., ὁμοιοπαθής (from ὅμοιος, like, and πάθος, a condition). Lat., *homœopathes, homœopathicus.* Fr., *homœopathique.* Ger., *homöopathisch.* 1. Suffering from the same disease. [A, 322.] 2. Of or pertaining to homœopathy (2d def.).

HOMŒOPATHICITY, n. Ho3m-e2-o2p-a2th-i2s′i2-ti2. From ὅμοιος, like, and πάθος, a condition. An instance of the applicability of homœopathy; an explanation of the homœopathic action of a drug. ["Hahnemannian Monthly," June, 1882, p. 380.]

HOMŒOPATHIST, n. Ho3m-e2-o2p′a2th-i2st. Fr., *homœopathe.* Ger., *Homöopath.* A believer in homœopathy.

HOMŒOPATHY, n. Ho3m-e2-o2p′a2th-i2. Gr., ὁμοιοπάθεια (from ὅμοιος, like, and πάθος, a condition). Lat., *homœopathia.* Fr., *homœopathie.* Ger., *Homöopathie.* 1. A similarity of morbid conditions. [A, 322.] 2. The therapeutical doctrine that certain morbid conditions may be corrected by the use of drugs that, in health, produce similar conditions; of S. Hahnemann, a system of medical practice based on the dogma that such a doctrine is the only one to be followed in therapeutics (involving also, in most instances, the use of minute doses of "potentized" drugs and the avoidance of all doses large enough to have an appreciable effect other than that of curing the disease).

HOMŒOPLASIA (Lat.), n. f. Hom(ho2m)-e2(o2-i2)-o(o3)-plaz-(pla3s)′i2-a3. From ὅμοιος, like, and πλάσις, a conformation. Ger., *Homöoplasie.* A formation of tissues resembling the normal tissues in form and function. [A, 326 (α, 21).]

HOMŒOPLASTIC, adj. Ho3m-e2-o-pla2st′i2k. From ὅμοιος, like, and πλαστικός, plastic. Fr., *homœplastique.* Ger., *homöoplastisch.* It., *omeoplastico.* Sp., *homeoplástico.* Pertaining to homœoplasia. [D.]

HOMŒOSEMOUS, adj. Ho3m-e2-o-sem′u3s. Gr., ὁμοιόσημος (from ὅμοιος, like, and σημεῖον, a sign from the gods). Lat., *homœosemus.* Having a similar import (said of signs). [A, 322.]

HOMŒOSIS (Lat.), n. f. Hom(ho2m)-e2(o2-e2)-o′si2s. Gen., *-os′eos (-is).* Gr., ὁμοίωσις (from ὁμοιοῦν, to make or become like). 1. Assimilation. [A, 322.] 2. In the pl., *Homœoses.* See HOMOIOSIS.

HOMŒOTHERMIC, adj. Ho3m-e2-o-thu5rm′i2k. From ὅμοιος, like, and θέρμη, heat. Fr., *homœothermique.* Ger., *homöothermisch.* Having the temperature unaffected by the surroundings (said of warm-blooded animals). [K, 8.]

HOMŒOTHERMY, n. Ho3m′e2-o-thu5rm-i2. From ὅμοιος, like, and θέρμη, heat. The state of being homœothermic.

HOMŒOZOIC, adj. Ho3m-e2-o-zo′i2k. From ὅμοιος, like, and ζῷον, an animal. Pertaining to, or including, similar forms or kinds of life. [L, 56.]

HOMŒOZYGY, n. Ho3m-e2-o2z′i2-ji2. From ὅμοιος, like, and ζυγόν, a yoke. Of Serres, in teratology, the law of association or union of homologous organs in the formation of monstrosities. [Nyster (α, 34).]

HOMOETHNES (Lat.), adj. Hom(ho2m)-o(o3)-e2th′nez(nas). Gr., ὁμοεθνής (from ὅμοιος, like, and ἔθνος, a race). Fr., *homoethné.* Of the same race. [A, 322.]

HOMOETHNIA (Lat.), n. f. Hom(ho2m)-o(o3)-e2th′ni2-a3. Gr., ὁμοεθνία. 1. Descent from the same stock. 2. Of Hippocrates, the connection and sympathy of parts. [A, 311.]

HOMOFERULIC ACID, n. Ho-mo-fe2-ru2′li2k. A monobasic acid, $C_6H_3(OH)(OCH_3)CH:C(CH_3)O.OH$, crystallizing from boiling water in flat needles which melt at about 168° C. [B, 3 (α, 38).]

HOMOFLUORESCEINE, n. Ho-mo-flu2-o2r-e2s′e2-i2n. A crystalline substance, $C_{25}H_{18}O_5$, prepared by treating orcin, $C_7H_8O_2$, with chloroform and sodium chloride. It is slightly soluble in water, in alcohol, and in acetic acid, insoluble in ether and in chloroform. [B, 46 (α, 39).]

HOMOGAÏACOL (Fr.), n. O-mo-ga3-e-a3-kol. See CREASOL.

HOMOGAMOUS, adj. Ho-mo2g′a2m-u3s. Lat., *homogamus* (from ὁμός, common, and γάμος, marriage. 1. Having florets that are all hermaphrodite. [B.] 2. Bearing one sort of flowers (all male or all female). [α, 35.]

HOMOGAMY, adj. Hom-o2g′a2m-i2. Lat., *homogamia.* Fr., *homogamie.* The occurrence of fertilization when stamens and pistils mature at the same time. [B.]—**Homocephalic h.** Lat., *homogamia homocephala.* H. in which the pollen and stigma occur in the same flower-head, but not in the same andrœcium. [Delpino (α, 35).]—**Homoclinic h.** H. in which the pollen and stigma occur on the andrœcium of the same hermaphrodite flower. [α, 35.]—**Monœcious h.** Lat., *homogamia monœcia.* H. in which the pollen and stigma occur on different flowers. [Delpino (α, 35).]

HOMOGANGLIATE, adj. Ho-mo-ga2n2′gli2-at. Lat., *homogangliatus* (from ὁμός, common, and γάγγλιον, a ganglion). Having a nervous system in which the ganglia are symmetrically arranged, as in the *Annulosa.* [B, 28 (α, 27).]

HOMOGEN, n. Ho′mo-jen. From ὁμός, common, and γένος, race. Of Lankester, an organ or part having the same developmental origin as another with which it is compared. [J.] The *h's* (Fr., *homogènes*) of Lindley are a division of exogens characterized by the wood being arranged in wedges, instead of rays. [B, 19 (α, 24).]

HOMOGENEAL, adj. Ho-mo-jen′e-a2l. See HOMOGENEOUS.

HOMOGENEITY, n. Ho-mo-je2n-e′i2-ti2. Fr., *homogénéité.* Ger., *Gleichartigkeit, Homogenität.* The state of being homogeneous.

HOMOGENEOUS, adj. Ho-mo-jen′e-u3s. Gr., ὁμογενής (from ὁμός, common, and γένος, a race). Lat., *homogeneus.* Fr., *homogène.* Ger., *gleichartig, homogen.* 1. Of the same kind or nature throughout. 2. Derived from the same ancestral source. [Lankester, "Quart. Jour. of Micr. Sci.," 1877, p. 400 (L).]

HOMOGENESIS (Lat.), n. f. Hom(ho2m)-o(o3)-je2n(ge2n)′e2-si2s. Gen., *-es′eos (-ge′nesis).* From ὁμός, common, and γένεσις, generation. Fr., *homogénèse.* See *Univocal* GENERATION.

HOMOGENETIC, adj. Ho-mo-je2n-e2t′i2k. Pertaining to homogenesis.

HOMOGENIA (Lat.), n. f. Hom(ho2m)-o(o3)-jen(ge2n)′i2-a3. Fr., *homogénie.* See *Univocal* GENERATION.

HOMOGENITÄT (Ger.), n. Ho-mo-gan-e-tat′. See HOMOGENEITY.

HOMOGENY, n. Ho-mo2j′e2n-i2. Lat., *homogenia.* See *Univocal* GENERATION.

HOMOGONOUS, adj. Ho-mo2g′o-nu3s. From ὁμός, common, and γόνος, any product. Having stamens and pistils of the same length. [B.]

HOMOGONY, n. Ho-mo2g′o-ni2. From ὁμός, common, and γόνος, any product. Uniformity of the stamens and pistils in size, length, shape, etc. [Gray (α, 24).]

HOMOGYNE (Lat.), n. f. Hom(ho2m)-o2j(o2g)′i2n(u6n)-e(a). Gen., *-og′ynes.* From ὁμός, common, and γυνή, a woman. A genus of the *Senecionideæ.* [B, 42 (α, 24).]—**H. alpina.** An Alpine species, employed as an expectorant. [B, 19, 173 (α, 24).]

HOMOHYDROXYISOPHTHALIC ACID, n. Ho-mo-hi-dro2x-i2-i2s-o2f-tha2l′i2k. An acid formed by heating β-sulphoxylidic acid to 220° C. with hydrochloric acid, and crystallizing from hot water in needles which decompose as they melt at about 275° C. [B, 3 (α, 38).]

HOMOIANTHÆ (Lat.), n. f. pl. Hom(ho2m)-oi-a2n(a3n)′the-(tha3-e2). From ὅμοιος, like, and ἄνθος, a flower. Of Reichenbach, a tribe of the *Compositæ* (subsequently a division of the *Cichoraceæ*), comprising the sections *Cichorieæ, Lactuceæ, Eupatorieæ, Cynareæ,* and others. [B, 170 (α, 24).]

HOMOIDEOUS, adj. Ho-mo-i2d′e2-u3s. Lat., *homoideus* (from ὅμοιος, like, and εἶδος, resemblance). Fr., *homoïde.* Ger., *gleichgestaltet.* Having a like appearance (said of the endocarp or other outer tegument, and the organ it covers). [B, 1, 123 (α, 24).]

HOMOIOMEROUS, adj. Ho-moi-o2m′e2r-u3s. Gr., ὁμοιομερής (from ὅμοιος, like, and μέρος, a part). Lat., *homoiomerus.* Fr., *homoimère.* Having similar parts; said of lichens having the algal and fungal elements equally distributed in the thallus. [B, 293 (α, 24).]

HOMOIOPATHIA (Lat.), n. f. Hom(ho2m) oi-o(o3)-pa2th-(pa3th)-i(e)′a3. From ὅμοιος, like, and πάθος, a condition. See HOMŒOPATHY (1st def.).

HOMOIOSIS (Lat.), n. f. Hom(ho2m)-oi-o′si2s. Gen., *-os′eos (-os′is).* Gr., ὁμοίωσις (from ὅμοιος, like). Of C. H. Schultz, a class of the diseases that arise from disordered assimilation. [α, 34.]

HOMOIOTHERMAL, adj. Ho-moi-o-thu5rm′a2l. See HOMŒOTHERMAL.

HOMOIOZOIC, adj. Ho-moi-o-zo′i2k. See HOMŒOZOIC.

HOMOITACONIC ACID, n. Ho-mo-i2t-a2k-o2n′i2k. See TETRYLENE*dicarboxylic acid.*

HOMOLACTIC ACID, n. Ho-mo-la2k′ti2k. Fr., *acide homolactique.* Ger., *Homolaktinsäure.* An acid, $C_2H_4O_3$, an inferior homologue of lactic acid found by Cloëz in sea water which had been used in the manufacture of fulminate of mercury. It is a colloidal isomer of glycollic acid. [B, 46, 48 (α, 39).]

HOMOLINON (Lat.), **HOMOLINUM** (Lat.), n's n. Hom-(ho2m)-o2l-i(e)′no2n, -nu3m(nu4m). From ὁμός, common, and *linum,* flax. See CHARPIE *brute.*

HOMOLOGICAL, adj. Ho-mo-lo2j′i2k-a2l. 1. Pertaining to homology. 2. See HOMOLOGOUS.

HOMOLOGOUS, adj. Ho-mo2l′o-gu3s. Lat., *homologus* (from ὁμός, common, and λόγος, understanding). Fr., *homologue, homologique.* Ger., *homolog.* 1. Like a given standard or object; having one name or type; constructed on the same fundamental plan. 2. In botany, corresponding morphologically (said of parts). [B, 19 (α, 24).] 3. In chemistry, arranged in a series, each member of which bears to the preceding member a constant, definite relation as regards either atomic composition, molecular weight, or some other well-marked chemical property. Such a series is called an h. series and is to be found especially among the hydrocarbons and their derivatives, each member in this case differing from the preceding member by the constant increment CH_2. [B.] 4. In zoology, structurally related; having structural affinity. Opposed to *analogous,* which implies similarity of appearance, purpose, or use without corresponding affinity. [L, 343.] 5. Of neoplasms, composed of tissue resembling some normal tissue of the body, or, in a narrower sense, the normal tissue of the part affected. [D, 3.]

HOMOLOGUE, n. Ho′mo-lo2g. Fr., *h.* An organ that is homologous to another. [α, 24.]

HOMOLOGY, n. Ho-mo2l′o-ji2. Lat., *homologia.* Fr., *homologie.* Ger., *Homologie.* The state of being homologous.—

General h. H. in respect to the position which a part of an anatomical structure bears to the whole structure. [L, 14, 198 (α, 39).]—**Serial h.** The representation of the same anatomical element in different parts of the same animal. [L, 14, 158, 198 (α, 39).]—**Special h.** The representation of the same anatomical element in different animals. [L, 14, 158, 198 (α, 39).]

HOMOMALLOUS, adj. Ho-mo-ma²l'u³s. Lat., *homomallus.* Fr., *homomalle.* Ger., *gleichwendig.* Having leaves or other organs all turned in one direction. [B, 1, 123 (α, 24).]

HOMOMEROUS, adj. Ho-mo²m'e²r-u³s. From ὁμός, common, and μέρος, a part. 1. Having parts which resemble each other. 2. Of De Blainville, applied to an order of the class of *Chætepoda* in which the rings of the body resemble one another. [L, 180 (α, 39).]

HOMOMETHYLUMBELLIFERONE, n. Ho-mo-me²th-i²l-u³m-be²l-i²f'e²r-on. A substance, $CH_3.C_6H_2(OH)\langle{}^{C(CH_3):CH}_{O\,-\!-\,CO,}$ obtained from orcinol and aceto-acetic ether, and crystallizing from alcohol in needles melting at about 250° C. [B, 3 (α, 38).]

HOMOMORPHISM, n. Ho-mo-mo²rf'i²z'm. From ὁμός, common, and μορφή, form. Similarity of form along the component zooids of a colony. [L, 193.]

HOMOMORPHOUS, adj. Ho-mo-mo²rf'u³s. Lat., *homomorphus* (from ὁμος, common, and μορφή, form). Fr., *homomorphique.* Ger., *gleichförmig.* Having the same form (said of plant and animal organs). [B, 1, 123 (α, 24); B, 28 (α, 27).]

HOMONEMEA (Lat.), n. n. pl. Hom(ho²m)-o(o³)-nem(nam)'-e²-a³. From ὁμός, common, and νῆμα, a filament. Of Fries, a tribe of the *Nemei*, corresponding to the *Thallophyta* of Endlicher. [B, 170 (α, 24).]

HOMONIA (Lat.), n. f. Ho-mo'ni²-a³. The *Papaver argemone.* [B, 121 (α, 35).]

HOMONOMOUS, adj. Ho-mo²n'o-mu³s. From ὁμός, common, and νόμος, law. Fr., *homonome.* Uniformly segmented (said of the *Vermes* which have equal body segments). [L, 353 (α, 39).]

HOMONOMY, n. Ho-mo²n'o-mi². The state of being homonomous.

HOMONOPAGIA (Lat.), n. f. Hom(ho²m)-o²n-o(o³)-paj-(pa³g)'i²-a³. Headache. [L, 84.]

HOMONYM, n. Hom'o-ni²m. That which is homonymous.

HOMONYMOUS, adj. Ho-mo²n'i²-mu³s. From ὁμός, common, and ὄνυμα, a name. Fr., *homonyme.* Lit., falling under the same designation; as commonly employed, manifested on the same side of the body.

HOMÖOPATHIE (Ger.), n. Ho-mu⁶-o-pa³-te'. See HOMŒOPATHY, and for other German words in *Homöo-*, not here given, see the corresponding English or Latin words in *Homœo-* or *Homoio-*.

HOMO-ORTHOPHTHALAMIC ACID, n. Ho-mo-o²r-tho²f-tha²l-a²m'i²k. A monobasic acid, $C_6H_4\langle{}^{CH_2.CO.NH_2,}_{CO_2H}$ occurring as acicular crystals, melting at about 187° C. [B, 3 (α, 38).]

HOMO-ORTHOPHTHALIC ACID, n. Ho-mo-o²r-tho²f-tha²l'i²k. An acid, also called phenylacetorthocarboxylic acid, and the same as isuitic acid, crystallizing from water as short rhombic prisms, melting at 175° C. [B, 3 (α, 38).]

HOMO-ORTHOPHTHALONITRILE, n. Ho-mo-o²r-tho²f-tha²l-o-ni'tri²l. A substance, $C_6H_4(CN)CH_2.CN$, occurring as small colorless crystal flakes, which melt at 81° C. [B, 3 (α, 38).]

HOMOPATHY, n. Ho-mo²p'a²th-i². See HOMŒOPATHY.

HOMOPETALOUS, adj. Ho-mo-pe²t'a²l-u³s. From ὁμός, common, and πέταλον, a leaf. Fr., *homopétale.* Having the petals alike. [L, 41.]

HOMOPHAGOUS, adj. Ho-mo²f'a-gu³s. See OMOPHAGOUS.

HOMOPHYLIC, adj. Ho-mo-fi²l'i²k. From ὁμός, common, and φυλή, a race. Of or possessed of homophyly. [B.]

HOMOPHYLLOUS, adj. Ho-mo-fi²l'u³s. From ὁμός, common, and φύλλον, a leaf. Fr., *homophylle.* Having the leaves or leaflets all alike. [L, 41.]

HOMOPHYLY, n. Hom-o²f'i²l-i². Identity of origin, as distinguished from identity in structure and function. [B.]

HOMOPLAST, n. Ho'mo-pla²st. From ὁμός, common, and πλάστης, a molder. 1. Of Haeckel, one of the elements forming a simple tissue. [J, 9.] 2. Of Lankester, an organ or part of the same structure as another, but not of the same origin. ["Ann. Mag. of Nat. Hist.," vi, 1870, p. 34 (J).]

HOMOPLASTIC, adj. Ho-mo-pla²st'i²k. From ὁμός, common, and πλαστικός, plastic. 1. Of Haeckel, pertaining to homoplasts or a tissue or organ composed of homoplasts. [J, 9.] 2. Of Lankester, similarity in structure, although not necessarily in origin. ["Ann. Mag. of Nat. Hist.," vi, 1870, p. 34 (J).]

HOMOPLASTID, n. Ho-mo-pla²st'i²d. From ὁμός, common, and πλάστις, a molder. Ger., *h.* An organism in which each cell is capable of reproducing the species. ["Nature," xxxiii (J, 62).]

HOMOPLASY, n. Hom'o-plaz-i². From ὁμός, common, and πλάσις, a conformation. The state of being homoplastic. [B.]

HOMOPLATA (Lat.), n. f. Hom-o²p'la²t(la³t)-a³. See OMOPLATA.

HOMOPODE (Fr.), adj. O-mo-pod. From ὁμός, common, and πούς, the foot. Having the same number of digits on the fore and back paws. [L, 41.]

HOMOPTERA (Lat.), n. n. pl. Hom(ho²m)-o²pt'e²r-a. Of Cuvier, Latreille, Eichwald, and others, a section of the *Hemiptera*, comprising those insects which have the wing-covers of the same consistence, and are semi-membranous throughout their extent. [L, 180 (α, 39).]—**H. cicadaria.** A suborder of the *Hemiptera* having wings, usually membranous, lying obliquely on the body, head, relatively large, often prolonged into processes, rostrum three-jointed and low down, apparently between the fore legs. [L, 353 (α, 39).]

HOMOPTEROCARPIN, n. Ho-mo²p'te²r-o-ka²rp-i²n. Fr., *homoptérocarpine.* Ger., *H.* A substance, $C_{12}H_{12}O_3$, found in red sandal-wood, melting at 82° C. [B, 270 (α, 38).]

HOMOPTEROUS, adj. Ho-mo²p'te²r-u³s. Lat., *homopterus* (from ὁμός, common, and πτερόν, a wing). Fr., *homoptère.* Ger., *gleichflügelig.* Having the characteristics of the *Homoptera.* [L, 180 (α, 39).]

HOMOPYROCATECHIN, n. Ho-mo-pi-ro-ka²t'e²k-i²n. Fr., *homopyrocatéchine.* Ger., *H., Homobrenzcatechin.* A substance, $C_6H_3.(CH_3).(OH)_2$, or $C_7H_8O_2$, a homologue of pyrocatechin, and isomeric with orcin and iso-orein. It is a colorless, oily liquid, derived from beech-wood tar. [B, 4, 93.]

HOMOPYRROL, n. Ho-mo-pi²r'ro²l. A basic substance, $C_5H_7N = CH_3.C_4H_3.NH$, obtained by the dry distillation of bones in two isomeric varieties, one of which boils at about 148°, the other at about 143° C. [B, 270 (α, 38); L, 87.]

HOMOQUININE, n. Ho-mo-kwi²n'en. Fr., *h.* Ger., *Homochinin.* An alkaloid, $C_{20}H_{24}N_2O_2$, or $C_{19}H_{22}N_2O_2$, found in cuprea-bark, freely soluble in alcohol or chloroform, but only slightly soluble in ether. It crystallizes partly in flat prisms and partly in laminæ, melting at 177° C. [B, 5 (α, 38); B, 46 (α, 39); "Proc. of the Am. Pharm. Assoc.," xxx (α, 14).]

HOMORGAN, n. Hom'o²r-g'n. See HOMOPLAST (2d def.).

HOMORGANIC, HOMORGANOUS, adj's. Hom-o²rg-a²n'-i²k, -o²rg'a²n-u³s. Lat., *homorganus* (from ὁμός, common, and ὄργανον, an organ). Fr., *homorgane.* Of plants, having the same organization. [L, 116.]

HOMOROD, HOMOROD-ALMAS, n's. A place in the county of Udvarhely, Hungary, where there is a gaseous spring containing sodium sulphate. [L, 30, 49 (α, 14).]

HOMORUSIA (Lat.), n. f. Hom(ho²m)-o(o³)-ru²(ru)'si²-a³. Of Avicenna, a medicine employed as a resolvent for the liver and spleen and as a diuretic and lithontriptic. [A, 325.]

HOMORYSMIA (Lat.), n. f. Hom(ho²m)-o(o³)-ri²z(ru⁶s)'mi²-a³. Gr., ὁμορυσμία. Of Hippocrates, similarity or identity of species or appearance. [A, 325.]

HOMOS (Ar.), n. The *Cicer arietinum.* [B, 121 (α, 35).]

HOMOSPOROUS, adj. Ho-mo²s'po-ru³s. Lat., *homosporus* (from ὁμός, common, and σπόρος, a seed). Having but one kind of non-sexual spores. [B, 293 (α, 24).]

HOMOSTYLED, HOMOSTYLOUS, adj's. Ho'mo-stild, homo-stil'u³s. Lat., *homostylatus* (from ὁμός, common, and στῦλος, a pillar). Fr., *homostylé.* Having the styles of the same length in all the flowers. [α, 24.]

HOMOSTYLY, n. Ho'mo-stil-i². Of Hildebrand, the state of being homostylous. [α, 24.]

HOMOTARTARIC ACID, n. Ho-mo-ta³r-ta³r'i²k. From ὁμός, common, and Τάρταρος, Tartarus. Fr., *acide homotartrique.* Ger., *Homoweinsäure.* An acid, $C_3H_4(OH)_2\langle{}^{CO-OH}_{CO-OH} = C_5H_8O_6$, being tartaric acid with the addition of a molecule of CH_2. [B, 4, 530.]

HOMOTENOUS, adj. Ho-mo²t'e²n-us. Lat., *homotenus* (from ὁμός, common, and τείνειν, to stretch). Fr., *homotène.* Of Latreille, not changing in form or shedding the shell (said of certain *Articulata*). [L, 180 (α, 39).]

HOMOTEREPHTHALIC ACID, n. Hom-o-te²r-e²f-tha²l'-i²k. Fr., *acide homotéréphthalique.* An acid, $C_6H_4\langle{}^{CH_2.CO_2H,}_{CO_2H}$ obtained by oxidizing propylisoprophylbenzene with dilute nitric acid, and occurring as a very insoluble powder. [B, 3 (α, 38).]

HOMOTHALAME (Fr.), adj. O-mo-ta²-la²m. Lat., *homothalamus, homothalameus* (from ὁμός, common, and θάλαμος, an inner room). Resembling a thallus (said of lichens). The *Homothalameæ* of Gray are a family of lichens, comprising the divisions *Collematideæ*, *Usneadeæ*, and *Ramalinideæ.* The *Homothalami* are an order of lichens comprising the divisions *Scutellati* and *Peltati.* [B, 1, 170 (α, 24).]

HOMOTHERMAL, adj. Ho-mo-thu⁶r'm'l. From ὁμός, common, and θέρμη, heat. In physics, having the same temperature. [L, 41 (α, 14).]

HOMOTHERMIC, adj. Ho-mo-thu⁶rm'i²k. See HOMŒOTHERMIC.

HOMOTOLUIC ACID, n. Ho-mo-to²l-u'ik. See HYDROCINNAMIC ACID.

HOMOTOMIA (Lat.), n. f. Hom(ho²m)-o(o³)-tom(to²m)'i²-a³. Of Cælius Aurelianus, incision of an inflamed tonsil. [A, 322.]

HOMOTONIC, HOMOTONOUS, adj's. Hom-o-to²n'i²k, -o²t'-o²n-u³s. Gr., ὁμοτόνος (from ὁμός, equal, and τόνος, tension). Lat., *homotonicus, homotonos, homotonus.* Having the same tension; of diseases, remaining the same, or increasing and decreasing uniformly throughout their whole course. [A, 322.]

HOMOTROPAL, HOMOTROPOUS, adj's. Ho-mo²t'ro-p'l, -pu³s. Lat., *homotropus* (from ὁμός, common, and τρέπειν, to turn). Fr., *homotrope.* Ger., *gleichläufig.* 1. Curved or turned in one direction. 2. Of the embryo of an anatropous seed, having the radicle next the hilum. [B, 1, 77, 123 (α, 24).]

HOMOTROPHIC, adj. Hom-o-tro²f'i²k. From ὁμός, common, and τρέφειν, to nourish. Standing in nutritional relation to

one another (said of organs, such as eyes and ears, etc.). ["Ann. Mag. of Nat. Hist.," xi, 1870, p. 34 (J).]

HOMOTROPHY, n. Hom-o[2]t'ro-fi[2]. Correlation of nutrition and growth. ["Ann. Mag. of Nat. Hist.," xi, 1870, p. 34 (J).

HOMOTYPAL, adj. Ho-mo[2]t'i[2]-p'l. Constituting a homotype.

HOMOTYPE, n. Ho'mo-tip. From ὁμός, common, and τύπος, a type. Of Owen, see HOMOLOGUE; also a part which has a symmetrically disposed similar part on the other side of the body. [B.]

HOMOTYPIC, HOMOTYPICAL, adj's. Ho-mo-ti[2]p'i[2]k, -i[2]-k'l. Of the same type of structure. [L, 343.]

HOMOTYPY, n. Hom-o[2]t'i[2]p-i[2]. The state of being homotypical. [L, 343.]

HOMO-UMBELLIFERONE, n. Ho-mo-u[3]m-be[2]l-li[2]f'e[2]r-on. A substance, $CH_3.C_6H_2(OH)\left\langle{O - CO \atop CH : CH}\right.$, formed when equal molecules of orcinol and malic acid are heated with sulphuric acid. It is easily soluble in alcohol but insoluble in water, and crystallizes from acetone in yellowish tablets which melt at 240° C. [B, 3 (a, 38).]

HOMOVALVATE, HOMOVALVOUS, adj's. Ho-mo-va[2]lv'-at, -u[3]s. Lat., *homovalvus* (from ὁμός, common, and *valva*, the leaf of a door). Fr., *homovalve*. Of Peyre, having the valves alike (said of fruits). [L, 180.]

HOMOWEINSÄURE (Ger.), n. Ho'mo-vin-zoir-e[2]. See HOMOTARTARIC ACID.

HOMOZYGOUS, adj. Ho-mo[2]z'i[2]-gu[3]s. Lat., *homozygos, homozygus* (from ὁμός, common, and ζυγόν, a yoke). Fr., *homozygos*. In botany, conjugate. [L, 116.]

HOMOZYGY, n. Hom-o[2]z'i[2]-ji[2]. The state of being homozygous.

HOMUNCIO (Lat.), n. m. Hom(ho[2]m)-u[3]n(u[4]n[2])'si[2](ki[2])-o. Gen., *-o'nis*. Dim. of *homo*. Th human fœtus. [A, 47.]

HOMUNCULUS (Lat.), n. m. Hom(ho[2]m)-u[3]n[2](u[4]n[2])'ku[2]l-(ku[4]l)-u[3]s(u[4]s). Dim. of *homo*. Gr., ἀνθρώπισκος. A little weakly man; a manikin. [A, 312 (a, 21).]

HONAY, n. An Indian name for the *Calophyllum inophyllum*. [B, 19 (a, 24).]

HONE, n. Hon. A.-S., *hanan*. Oil-stone; a fine-grained mineral used to give a fine edge to steel blades. [L, 107.]

HONESTY, n. O[2]n'e[2]st-i[2]. 1. The *Lunaria biennis*. 2. See CLEMATIS *vitalba*.—**Annual h.** The *Lunaria annua* and *Lunaria biennis*. [B, 71 (a, 14).]—**Common h.** The *Lunaria biennis*. [B, 275 (a, 24).]—**Maiden's-h.** The *Clematis vitalba*. [B, 275 (a, 24).]—**Perennial h.** The *Lunaria rediviva*. [B, 275 (a, 24).]—**Small h.** See DIANTHUS *moschatus*.

HONEWORT, n. Hon'wu[6]rt. 1. The *Trinia vulgaris*, *Cryptotænia canadensis*, and *Petroselinum segetum*. 2. The genus *Sison*. [A, 505 (a, 21); B, 19, 275 (a, 24).]—**American h.** The *Cryptotænia canadensis*. [B, 275 (a, 24).]—**Corn-h.** The *Petroselinum segetum*. [B, 275 (a, 24).]—**Field-h.** The *Sison amomum*. [B, 121 (a, 24).]—**Fine-leaved h.** The *Sison salsum*. [B, 71 (a, 14).]—**Glabrous h.** The *Cryptotænia canadensis*. [B, 34 (a, 35).]—**Hedge-h.** The *Sison amomum*. [A, 505 (a, 21).]—**Water-h.** The *Sison inundatum*. [B, 71 (a, 14).]—**Whorl-leaved h.** The *Sison verticillatum*. [B, 71 (a, 14).]

HONEY, n. Hu[3]n'i[2]. A.-S., *hunig*. Sanscr., *madhu*. Guz., *madha*. Hind., *sentoe*. Chin., *mē*. Ar., *asla, ashama, nahala*. Pers., *shadada*. Saxon, *medio, hunig*. Gr., μέλι. Lat., *mel*. Fr., *miel*. Ger., *Honig*. It., *miele*. Sp., *miel*. 1. A saccharine secretion obtained by the wasp, the ant, and especially the bee, from the nectaries of flowers and deposited in the comb. When recently prepared, it is an amorphous substance of agreeable odor and very sweet taste, varying in color from white or yellowish-white to brown, and in consistence from a viscid liquid to a soft solid. It is readily soluble in water. In chemical structure it is a mixture of lævulose and glucose (dextrose 70 to 80 per cent.), with a varying proportion of water (20 to 30 per cent.) and traces of organic and mineral constituents. It is a detergent, pectoral, emollient, demulcent, laxative, and nutrient. Locally applied, it stimulates atonic mucous surfaces. A paste made of h. and flour is used to promote the maturation of abscesses and buboes. As an emollient it is employed as a vehicle, as a gargle to cure aphthæ, and as an application to the throat in various inflamed states, also as an application to sore nipples and to swollen mammæ for checking the secretion of milk. New h. is regarded as a laxative and demulcent; old h. as an astringent and demulcent. In India it is used with *Chuna* as an external application to the temples in headache, to the abdomen or around the navel in colic. and to bruises and sprains. [A, 479 (a, 21); B, 5, 17 (a, 24).] Cf. MEL. 2. A pharmaceutical preparation the basis of which is h. [D, 6.]—**Cerate of h. with turpentine.** A preparation made of 1 lb. of common turpentine, the yolk of 20 eggs, and 1 lb. of h. beaten together. [L, 120.]—**Clarified h.** See MEL *despumatum*.—**Clyster of h. of roses.** See *Enema mellis* ROSARUM.—**Despumated h.** See MEL *despumatum*.—**Ethiopian h.** A h.-like substance found in Ethiopia, in holes and cavities in the ground, and said to be the product or secretion of a gnat-like insect. A. Villiers found the composition of the substance to be as follows: Fermentable sugar (lævulose with ⅓ glucose, but no saccharose), 32 per cent.; mannite, 3 per cent.; dextrin, 27·9 per cent.; water, 25·5 per cent.; ash, 2·5 per cent.; other components and loss, 9·1 per cent. ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**Heraclius's h.** See MAIONOMENON.—**H.-bag.** The crop of the *Apis mellifica* where the nectar which is taken up by the proboscis undergoes a transformation into h. [L, 292 (a, 39).]—**H.-balm.** The *Melittis melissophyllum*. [B, 275 (a, 24).]—**H.-blob.** The fruit of *Ribes grossularia*. [A, 505 (a, 21).]—**H. comb.** 1. The wax framework in which h. is stored in a hive. 2. The reticulum of ruminants. [B.]—**H.-crach.** A small, very sweet plum. [A, 505 (a, 21).]—**H.-dew.** A viscid substance exuded on the leaves of the maple, lime, black-alder, and other trees, consisting of a mixture of saccharose, lævulose, and dextrin. [B, 8.]—**H. of St. John the Baptist.** Ger., *Honig Johannes des Täufers*. Of old writers, alhagi manna, an exudation of the *Hedysarum alhagi*. ["Proc. of the Am. Pharm. Assoc.," xxv (a, 14).]—**H.-plant.** The genus *Hoya*. [B, 275 (a, 24).]—**H.-stalks.** The *Trifolium repens*. [A, 505 (a, 21).]—**H.-stick.** See CLEMATIS *vitalba*.—**H.-suck.** 1. The flowers of *Trifolium pratense*. 2. The *Lonicera periclymenum*. [A, 505 (a, 21).]—**H'suckle.** See the major list.—**H.-sweet.** The *Spiræa ulmaria*. [A, 505 (a, 21).]—**H'ware.** The *Alaria esculenta* and the *Laminaria saccharina*. [B, 19, 275 (a, 24).]—**H.-water.** See HYDROMEL.—**H'wort.** See the major list.—**Italian h.** Ger., *italienischer* (oder *römischer*) *Honig, Thomaszucker*. An artificial h. used in Europe, said to be a mixture of sugar and extract of figs. [B, 180 (a, 24).]—**Mexican h.-ant.** The *Myrmecocystus mexicanus*, an insect living in the northern states of Mexico and in New Mexico, producing in an abnormally distended abdomen a large vesicle of h. which is eaten by the natives, and, diluted with water, used as an antipyretic drink. ["Proc. of the Am. Pharm. Assoc.," xxi (a, 14).]—**Pectoral balsam of h.** See *Balsamum pectorale* MELLIS.—**Tamarisk h.** See MANNA *celastrina*.—**Virgin h.** Ger., *Jungfernhonig*. It., *miele vergine*. Lat., *mel album* [Gr. Ph.] (seu *virgineum* [Gr. Ph., Belg. Ph.], seu *optimum* [Norw. Ph., Swed. Ph.]). H. which drops spontaneously from the comb. [B, 180 (a, 24); B, 95 (a, 38).]

HONEY-BERRY, n. Hu[3]n'i[2]-be[2]r-i[2]. See the subheadings.—**H.-b. of Europe, H.-b. of Greece.** The *Celtis australis*. [B, 185 (a, 24).]—**H.-b. of Guiana.** The *Melicocca bijuga*. [B, 185 (a, 24).]—**West Indian h.-b.** The *Melicocca paniculata* and the *Melicocca bijuga*. [B, 275 (a, 24).]

HONEYCOMBED, adj. Hu[3]n'i[2]-ko[3]md. Eroded so as to resemble honeycomb.

HONEY-FLOWER, n. Hu[3]n'i[2]-flu[6]-u[4]-u[5]r. Any flower containing honey; especially the *Melianthus major*, the *Protea mellifera*, and the *Ophrys opifera*. [A, 505 (a, 21); B, 185 (a, 24).]—**Cape h.-f.** The *Protea mellifera*. [B, 275 (a, 24).]—**Great h.-f.** The *Melianthus major*. [B, 275 (a, 24).]

HONEY-LOCUST TREE, n. Hu[3]n-i[2]-lo'ku[3]st. See GLEDITSCHIA.—**Common h.-l. t.** The *Gleditschia triacanthos*. [B, 275 (a, 24).]—**Curved-spined h.-l. t.** The *Gleditschia brachycarpa*. [B, 275 (a, 24).]—**Flat-spined h.-l. t.** The *Gleditschia ferox*. [B, 275 (a, 24).]—**Smooth h.-l. t.** The *Gleditschia lævis*. [B, 275 (a, 24).]—**Southwestern h.-l. t.** The *Prosopis juliflora*. [B, 275 (a, 24).]

HONEYSUCKLE, n. Hu[3]n'i[2]-su[3]k'l. 1. The *Lonicera periclymenum* and *Lonicera caprifolium*. 2. The *Lotus corniculatus*. 3. The *Cornus suecica*. 4. The *Trifolium pratense*. 5. The *Rhinanthus crista-galli*. [A, 505 (a, 21); L, 77.]—**African fly-h.** The *Halleria lucida*. [B, 275 (a, 24).]—**Alpine h.** The *Lonicera alpigena*. [B, 275 (a, 24).]—**American fly-h.** The *Lonicera ciliata*. [B, 275 (a, 24).]—**Australian h.** A name for several species of *Banksia* growing in Australia. [B, 185 (a, 24).]—**Black-berried h.** The *Lonicera nigra*. [B, 275 (a, 24).]—**Blue-berried h.** The *Lonicera cœrulea*. [B, 275 (a, 24).]—**Bush-h.** 1. The genus *Diervilla*, especially the *Diervilla canadensis*. 2. The *Weigela rosea* and its varieties. [B, 19, 275 (a, 24).]—**Cape-h. of the West Indies.** The *Tecoma capensis*. [B, 275 (a, 24).]—**Castellamare h.** The *Lonicera stabiana*. [B, 275 (a, 24).]—**Chinese h.** The *Lonicera flexuosa*. [B, 275 (a, 24).]—**Common h.** The *Lonicera periclymenum*. [B, 180, 185 (a, 24).]—**Crimson-flowered h.** The *Lonicera punicea*. [B, 275 (a, 24).]—**Downy American h.** The *Lonicera pubescens*. [B, 275 (a, 24).]—**Downy h.** The *Lonicera tormentilla*. [B, 275 (a, 24).]—**Dutch h.** The *Lonicera periclymenum belgica*. [B, 275 (a, 24).]—**Dutch red h.** The *Lonicera periclymenum rubra*. [B, 275 (a, 24).]—**Dwarf-h.** The *Cornus suecica*. [B, 19, 275 (a, 24).]—**Early-flowering h.** The *Lonicera fragrantissima* and *Lonicera Standishi*. [B, 275 (a, 24).]—**Eastern h.** The *Lonicera orientalis*. [B, 275 (a, 24).]—**Evergreen h.** The *Lonicera grata*. [B, 275 (a, 24).]—**False h.** The genus *Azalea*. [B, 275 (a, 24).]—**Fly-h.** 1. The *Lonicera xylosteum*. 2. The genus *Halleria*. [B, 19, 275 (a, 24).]—**Heath-h.** See *Australian h.*—**Himalayan h.** The *Leycesteria formosa*. [B, 275 (a, 24).]—**H.-tree.** The *Banksia australis, Banksia Cunninghamii*, and *Banksia ericæfolia*. [B, 275 (a, 24).]—**Jamaica h.** The *Passiflora laurifolia*. [B, 275 (a, 24).]—**Japan h.** The *Lonicera japonica*. [B, 275 (a, 24).]—**Minorca h.** The *Lonicera implexa*. [B, 275 (a, 24).]—**Pale perfoliate h.** The *Lonicera caprifolium*. [B, 34, 275 (a, 35).]—**Privet-leaved h.** The *Lonicera ligustrina*. [B, 275 (a, 24).]—**Red h.** 1. The *Hedysarum coronarium*. 2. The *Trifolium pratense*. [A, 505 (a, 21).]—**Scarlet h.** The *Lonicera sempervirens*. [B, 34 (a, 35).]—**Swamp-fly-h.** The *Lonicera oblongifolia*. [B, 275 (a, 24).]—**Small trumpet-h.** The *Lonicera sempervirens minor*. [B, 275 (a, 24).]—**Tasmanian h.** See *Australian h.*—**Trumpet-h.** See LONICERA *sempervirens*.—**Virgin Mary's h.** The *Pulmonaria officinalis*. [B, 275 (a, 24).]—**West Indian h.** 1. The *Tecoma capensis*. 2. A name for various species of *Desmodium*. [B, 275 (a, 24).]—**White h.** 1. The *Azalea viscosa*. 2. The *Trifolium repens*. [A, 505 (a, 21); B, 275 (a, 24).]—**White Italian h.** The *Lonicera caprifolium alba*. [B, 275 (a, 24).]—**White swamp-h.** The *Rhododendron viscosum*. [B, 275 (a, 24).]—**Winter-flowering h.** The *Lonicera fragrantissima*. [B, 275 (a, 24).]—**Yellow Italian h.** The *Lonicera caprifolium*. [B, 275 (a, 24).]—**Yellow upright h.** The *Lonicera Diervilla*. [B, 275 (a, 24).]

HONEYWORT, n. Hu[3]n'i[2]-wu[6]rt. 1. The *Galium cruciatum*. 2. The genus *Cerinthe*. [B, 19, 275 (a, 24).]—**Great h.** The *Cerinthe major*. [B, 71 (a, 14).]—**Hedge-h.** The *Sison amomum*. [B, 275 (a, 24).]—**Rough-h.** The *Cerinthe aspera*. [B, 275 (a, 24).]—**Small h.** The *Cerinthe minor*. [B, 71 (a, 14).]—**Spotted h.** The *Cerinthe maculata*. [B, 71 (a, 14).]

O, no; **O[2]**, not; **O[3]**, whole; **Th**, thin; **Th[2]**, the; **U**, like oo in too; **U[2]**, blue; **U[3]**, hull; **U[4]**, full; **U[5]**, urn; **U[6]**, like ü (German).

HONFLEUR (Fr.), n. O^{3}n^2-flu^{5}r. A place in the department of Calvados, France, where there is sea-bathing. [L, 30, 41, 49 (*a*, 14).]

HONGLANE (Chin.), n. 1. The *Helleborus tecta.* [B, 121 (*a*, 35).] 2. See RADIX *soulin.*

HONG-LO-PÉ (Chin.), n. The *Daucus carota.* [B, 92 (*a*, 14).]

HONGRE (Fr.), n. O^{2}n^2-gr'. A castrated horse. [L, 41 (*a*, 14).]

HONG-YÛ-TSÉ (Chin.), n. The *Coriandrum sativum.* [B, 92 (*a*, 14).]

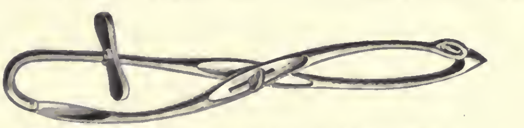
HONIG (Ger.), n. Ho^{3}n'i^{2}g. See HONEY.—**Abgeschäumter H.** See MEL *despumatum.*—**Aegyptischer H.** See ÆGYPTIACUM.—**Bitterh'.** See PICROMEL.—**Gemeiner H.** Common or crude honey. [B, 180 (*a*, 24).]—**Gereinigter H.** See MEL *despumatum.*—**Gewöhnlicher H.** See *Gemeiner H.*—**H'absondernd.** See NECTARIFLUUS.—**H'artig.** See MELLEOUS.—**H'behälter.** See NECTAROTHECA.—**H'behälterförmig.** See NECTARIFORMIS.—**H'blatt.** The *Melittis melissophyllum.* [B, 48 (*a*, 14).]—**H'blume.** The *Melissa officinalis* and the genus *Melianthus.* [B, 48 (*a*, 14).]—**H'decke.** See NECTAROLYMA.—**H'führend.** Melliferous. [B, 123 (*a*, 24).]—**H'gefäss.** See NECTARY.—**H'geschwulst.** See MELICERIS and KERION.—**H. Johannes des Täufers.** See *Alhagi* MANNA.—**H'klee.** See the major list.—**H'krug.** See URCEOLUS *nectarifer.*—**H'mahl.** See NECTAROSTIGMA.—**H'säure.** Mellitic acid.—**H'saft.** Nectar. [B, 123 (*a*, 24).]—**H'saftbehälter.** See NECTAROTHECA.—**H'saftdecke.** Nectarolyma. [L, 80.]—**H'saftführend.** Nectariferous. [B, 123 (*a*, 24).]—**H'spelze.** See GLUMELLULA.—**H'stein.** Mellite. [B, 48 (*a*, 14).]—**H'steinsäure.** Mellitic acid. [B.]—**H'teig.** See ARTOMELI.—**H'thau.** Manna. [B, 180 (*a*, 24).]—**H'thee.** See CYCLOPIA *longifolia.*—**H'wabe.** See KERION.—**H'wabenartig.** Honeycombed. [L, 31.]—**H'wasser.** See HYDROMEL.—**H'wein.** See ŒNOMEL.—**H'werkzeug.** See NECTARY.—**H'wicke.** The seed of *Lathyrus pratensis.* [B, 48 (*a*, 14).]—**Italienischer H.** See *Italian* HONEY.—**Jungfernh'.** See *Virgin* HONEY.—**Narboneser H.** A honey highly esteemed ; imported into France and England. [B, 180 (*a*, 24).]—**Römischer H.** See *Italian* HONEY.—**Roher H.** Crude honey. [L, 80.]—**Weisser H.** White honey. [L, 80.]

HONIGKLEE (Ger.), n. Ho^{3}n'i^{2}g-kla. The *Melilotus officinalis* and the *Trifolium repens.* [B, 180 (*a*, 24).]—**Gelber H.** The *Lotus corniculatus.* [B, 180 (*a*, 24).]

HONKENYA (Lat.), n. f. Ho^{2}n^2-ke^{2}n'ya^3. From *Honkenej.* Fr., *honkénye.* A section of the genus *Arenaria.* [B, 42 (*a*, 24).]—**H. peploides.** See ARENARIA *peploides.*

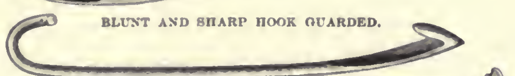
HONOR CAPITIS (Lat.), n. m. Hon(ho^{2}n)'o^{2}r ka^{2}p(ka^{3}p)'i^{2}t-i^{2}s. The hair of the head. [A, 322.]

HONTEUX (Fr.), adj. O^{2}n^2-tu^5. See PUDIC.—**Honteuses externes.** The external genitals.—**Honteuses internes.** The internal genitals.



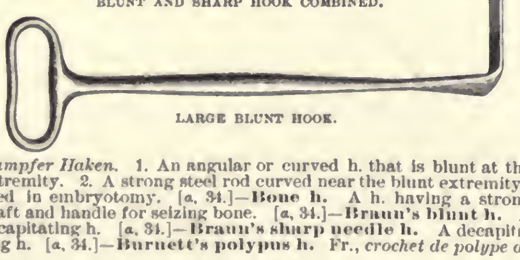
HOOD, n. Hu^{4}d. A.-S., *hôd.* 1. See CAUL. 2. In botany, see CUCULLUS.—**Caudal h.** Fr., *capuchon caudal.* The caudal or tail fold of the embryo. [J.]—**Cephalic h.** Fr., *capuchon céphalique.* The cephalic or head fold of the embryo. [J.]—**H.-shaped.** Cucullate, having the apex or sides curved inward, as in the lip of *Calypso.* [*a*, 35.]—**H'wort.** The *Scutellaria lateriflora* and other species of *Scutellaria.* [B, 275 (*a*, 24).]—**Pre-oral h.** Fr., *épipleur.* The anterior folds of the epipleuron which surrounds the mantle of the *Amphioxus.* [L, 121 (*a*, 39).]

HOODED, adj. Hu^{4}d'e^{2}d. See CUCULLATE.



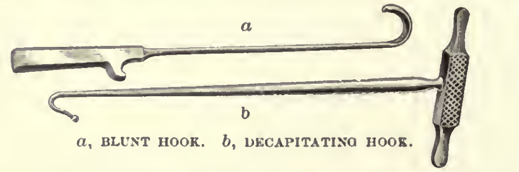
HOOF, n. Hu^{4}f. A.-S., *hôf.* Lat., *ungula* (from *unguis*, a nail.) Fr., *ongle.* Ger., *Huf.* The horny appendage which terminates the feet of the *Ungulata.* [A, 359 ; L, 13 (*a*, 39).]—**H.-bound.** Ger., *hufzwängig.* Suffering from dryness and contraction of the h., with consequent pain and lameness. [L, 56.]

HOOFS, n. Hu^{4}fs. The *Tussilago farfara.* [B, 275 (*a*, 24).]



HOOK, n. Hu^{4}k. A.-S., *hôc.* Fr., *crochet, griffe.* Ger., *Haken.* It., *uncinetto.* Sp., *garabatillo.* 1. An instrument for seizing and holding anything by means of a curve near its point. See also TENACULUM. 2. See HAMUS, HAMULUS, and UNCUS.—**Blunt h.** Ger.,

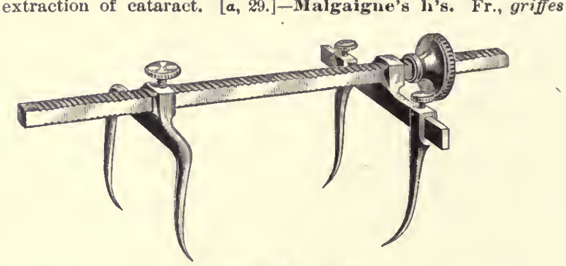
BLUNT AND SHARP HOOK GUARDED.



BLUNT AND SHARP HOOK COMBINED.

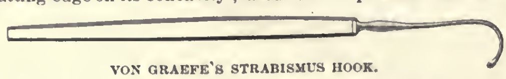
LARGE BLUNT HOOK.

stumpfer Haken. 1. An angular or curved h. that is blunt at the extremity. 2. A strong steel rod curved near the blunt extremity ; used in embryotomy. [*a*, 34.]—**Bone h.** A h. having a strong shaft and handle for seizing bone. [*a*, 34.]—**Braun's blunt h.** A decapitating h. [*a*, 34.]—**Braun's sharp needle h.** A decapitating h. [*a*, 34.]—**Burnett's polypus h.** Fr., *crochet de polype de Burnett.* Ger., *Burnett'scher Polypenhaken.* A small steel h. fitted into a tenotome-holder, for the removal of small aural polypi without touching the wall of the auditory canal. [F, 33.]—**Calvaria h.** A very strong h. for tearing off the calvaria in autopsies. [E.]—**Chain-h.** A number of connected lengths of chain, usually of steel, with a h. at each free end ; used in dissection for fixation of yielding or partly detached parts of the subject. [E.]—**Cleft-palate h.** A short curved h. on a long handle ; used to draw the thread through the flap in staphylorraphy. [*a*, 34.]—**Decapitating**



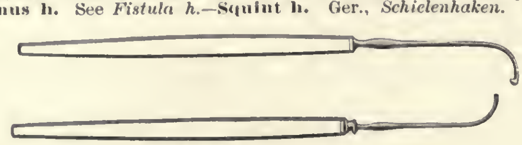
a, BLUNT HOOK. *b*, DECAPITATING HOOK.

h. Fr., *crochet à décapitation.* See DECAPITATOR, *Key h.*, and *Sharp h.*—**Dissecting h.** See *Chain-h.*—**Double h.** A h. in which the extremity of the shaft is expanded and divided into dull or sharp points. It is made in different sizes for ophthalmic and gynæcological uses. [*a*, 34.]—**Emmet's counter-pressure h.** A Sims blunt h. with a curve like a shoe-buttoner. [*a*, 34.]—**Fistula h.** Ger., *Fistelhaken.* A tenaculum used for holding the edges of a fistula or sinus apart for medication or exploration. [*a*, 39.]—**Fixa-**



SÉDILLOT'S DOUBLE FIXATION HOOK.

tion h. Fr., *crochet de fixation.* Ger., *fixirender Haken.* An instrument for holding the eyeball steady in operations ; consisting of a long shaft or handle on the end of which are two h's curved in opposite directions. It is placed lightly on the conjunctiva, near the corneal margin, and rotated between the thumb and index finger until the tissues are twisted into a little rope by which the eyeball is held. [F.]—**Grappling h.** A dissecting instrument composed of a small shaft of metal with two sharp h's at each end. [E.]—**Key-h.** Fr., *crochet boutonné* (ou *claviforme*). Ger., *Schlüsselhaken.* An instrument devised by C. Braun von Fernwald for performing decapitation of the fœtus. [A, 22.]—**Knife-edged h.** A h. with a cutting edge, *e. g.*, the curved knife introduced by Agnew for incising certain forms of stricture of the inferior lacrymal canaliculus. ["Trans of the Am. Ophth. Soc.," 1878, p. 510 (*a*, 29).]—**Lens h.** A small h. occasionally employed to assist in the extraction of cataract. [*a*, 29.]—**Malgaigne's h's.** Fr., *griffes*



MALGAIGNE'S HOOKS.

de Malgaigne. An apparatus for approximating the fragments in fracture of the patella ; consisting of two sliding plates, each terminating in two sharp h's, which pierce to the bone above and below, and are then drawn together by a screw. [E.]—**Merriam's counter-pressure h.** An Emmet's counter-pressure h. with slightly larger curve and metal handle. [*a*, 34.]—**Obstetric h.** See *Blunt h.* (2d def.).—**Palate h.** Fr., *crochet palatin.* See *Uvula h.* [*a*, 34.]—**Ramsbotham's decapitating h.** A h. with a cutting edge on its concavity ; used for decapitation of the fœtus.

VON GRAEFE'S STRABISMUS HOOK.

—**Sharp h.** Fr., *crochet tranchant.* Ger., *scharfer Haken.* See DECAPITATOR.—**Sims's blunt h.** A solid piece of metal forming a handle, a slender shaft that is slightly curved and rounded toward the extremity, the latter being blunt. It is used to press down the tissues and engage the needle in the operation for vesico-vaginal fistula. [*a*, 34.]—**Sims's volsella h.** A double h. with a sliding rod that is expanded at its extremity so as to be brought into opposition with the h's. It is used for fixation of the uterus. [*a*, 34.]—**Sinus h.** See *Fistula h.*—**Squint h.** Ger., *Schielenhaken.* A

CRITCHETT'S STRABISMUS HOOKS.

blunt h., usually with a slightly bulbous extremity, for holding and making traction upon the tendon in squint operations. [B.]

—**Tonsil h.** Ger., *Tonsillenhäkchen.* A long, slender, single or double h. for seizing the tonsil. [*a*, 34.]—**Tracheotomy h.** An instrument for seizing and fixing the trachea in tracheotomy. It has a tenaculum-like blade in a handle. *Langenbeck's tenaculum double h.* is a tenaculum with a second blade, affixed near the

WECKER'S STRABISMUS HOOKS.

handle by a single joint, and expanding into a broad thumb-piece that is held open by a spring. [*a*, 34.]—**Tumor h.** A single or double h. having a strong shaft and sharp prongs for seizing and holding tumors. [*a*, 34.]—**Tyrrell's h.** Fr., *crochet de Tyrrell.* Ger., *Tyrrell'scher Haken.* A blunt h. at the end of a shank, originally devised for drawing out the iris through a small hole in the

GREEN'S TONSIL HOOK.

GREEN'S DOUBLE TONSIL HOOK.

cornea. [F.]—**Uterine h.** A long, slender steel rod the extremity of which is an angular or curved h. It is used to seize and hold the uterus. [*a*, 34.]—**Uvula h.** An instrument for retracting the uvula. *Voltolini's u. h.* is a long shaft flattened toward the extremity with a moderate curve at the end, near which on each side is a flange to hold the uvula in place. *Fraenkel's u. h.* is a long shaft flattened, curved, and fenestrated near the extremity. *Roe's u. h.* has a long metal shaft curved at the free extremity and terminating in a globular point. [*a*, 34.]—**Vertebral h.** Ger., *Vertebralhaken.* A h. devised by Oldham, to be inserted into the vertebral canal for extracting the fœtus after craniotomy. [A, 81.]

HOOKED, adj. Hu^{4}kt. Lat., *uncinatus.* Fr., *crochu.* Ger., *hakig.* 1. Bent into the form of a hook. 2. Provided with a hook or hooks.—**H.-back.** Curved from the apex to the base. [B, 19 (*a*, 24).]

HOOK-HEAL, n. Hu^{4}k'hel. The *Prunella vulgaris.* [B, 19, 275 (*a*, 24).]

HOOKLET, n. Hu^{4}k'le^{2}t. Lat., *hamulus.* Fr., *crochette.* Ger., *Häkchen.* A small hook.—**Wing h's.** Ger., *Flügelhäkchen.* The minute hook-shaped bristles in the anterior margin of the lower wings of birds by which they lay hold of the posterior margin of the upper wings and serve to hold the two wings of a side together during flight. [*a*, 39.]

HOOLAKINS, n. Hul'a^{2}k-i^{2}nz. See EULACHON.

HOOLHOOL (Beng.), n. The *Gynandropsis pentaphylla.* [B, 172 (*a*, 24).]

HOOP-ASH, n. Hu^{4}p'a^{2}sh. See *Hoop*-ASH.

HOOPING-COUGH, n. Hup'i^{2}n^2-ko^{2}f. See WHOOPING-COUGH.

HOOP-KOOP-PLANT, n. Hu^{4}p'kup-pla^{2}nt. The *Lespedeza striata.* [B, 275 (*a*, 24).]

HOOP-PETTICOAT, n. Hu^{4}p-pe^{2}t'i^2-ko^{3}t. The genus *Corbularia.* [B, 19 (*a*, 24).]

HOOP-TREE, n. Hu^{4}p'tre. The *Melia sempervirens.* [B, 275 (*a*, 24).]

HOOP-WITHE, HOOP-WITHY, n's. Hup'wi^{2}th, -i^2. The *Colubrina asiatica.* [B, 275 (*a*, 24).]—**Jamaica h.-w.** The *Rivina octandra.* [B, 275 (*a*, 24).]—**West Indian h.-w.** The genus *Rivina.* [B, 275 (*a*, 24).]

HOOR-HOORYA (Beng., Hind.), n. The *Polanisia icosandra.* [B, 172 (*a*, 24).]

HOOROOYA (Hind.), n. The *Sapium indicum.* [B, 172 (*a*, 24).]

HOOSE, n. Hus. Bronchial irritation caused by the presence of the *Strongylus filaria* in the bronchial tubes and lung-substance of lambs, and in the parenchyma of the sheep's lung. The presence of the parasites is indicated by a cough, rubbing the nose on the ground, and accelerated respiratory movements. [M. Williams (*a*, 34).]

HOOY, n. In Java, a name for various species of Calamus. [*a*, 35.]—**H. korot.** The *Calamus heteroideus.* [B, 121 (*a*, 35).]—**H. loeloes, H. leles.** The *Calamus asperrimus.* [B, 121 (*a*, 35).]—**H. mukka.** The *Calamus ciliaris.* [B, 121 (*a*, 35).]—**H. omas.** The *Calamus spectabilis.* [B, 121 (*a*, 35).]—**H. perlas.** The *Ceratolobus glaucescens.* [B, 121 (*a*, 35).]—**H. tertas, H. tratlas, H. tritas.** The *Calamus platyacanthus.* [B, 121 (*a*, 35).]

HOP, n. Ho^{2}p. Low Lat., *hupa.* Dan., *h.*, *hoppe.* Fr., *houblon.* Ger., *Hopfen.* It., *luppolo.* Sp., *lúpulo, hombrecillo.* 1. The *Humulus lupulus.* 2. The *Medicago lupulina.* 3. The *Bryonia dioica.* 4. In the pl., *h's* (Lat., *humulus* [U. S. Ph.], *lupulus* [Br. Ph.], Fr., *cône de houblon* [Fr. Cod.]), the strobiles of *Humulus lupulus.* [A, 505 (*a*, 21); B.]—**Alcoholic extract of h's.** See *Extractum* LUPULI.—**Bitter acid** (or **principle**) **of h's.** Ger., *Hopfenbittersäure.* A bitter crystalline substance, $C_{32}H_{50}O_7$, formerly called lupuline or lupulite, found in h.-glands. [B, 5 (*a*, 38); "Ctrlbl. f Therap.," Jan., 1888, p. 57 (B).]—**Bog-h.** The *Menyanthes trifoliata.* [B, 275 (*a*, 24).]—**Common h.** See *H.* (1st def.).—**Elixir of h's.** A preparation made by mixing and filtering 5 parts of fluid extract of h's and 27 of simple elixir. [B, 5 (*a*, 38).]—**Essential** (or **ethereal**) **oil of h's.** Ger., *ätherisches Hopfenöl.* A clear, thin oil distilled from h. cones, having a sharp, firy taste. It is a mixture of a terpene, $C_{10}H_{16}$, which boils at 135° C., and an oil, $C_{10}H_{18}O$, which boils at 210° C. [B, 270 (*a*, 38).]—**Extract of h's.** See *Extractum* LUPULI.—**H. cone.** See *H.* (4th def.).—**H. pillow.** A pillow stuffed with h's; employed in domestic practice as a hypnotic and anodyne. [B.]—**H.-plant.** See HUMULUS *lupulus.*—**H.-root.** See *Racine de* HOUBLON.—**H.-tree.** See the major list.—**H.-vine.** See HUMULUS *lupulus.*—**Infusion of h's.** See *Infusum* LUPULI.—**Little h.-plant.** The *Origanum sipyleum.* [B, 275 (*a*, 35).]—**Native h. of Australia.** The seed-vessels of the genus *Dodonæa;* also various species of *Daviesia.* [B, 275 (*a*, 24).]—**Native h. of Victoria.** The *Daviesia latifolia.* [B, 275 (*a*, 24).]—**Resin of h's.** Ger., *Hopfenharz.* A bitter resin contained in h's, playing an important part in beer brewing. Three varieties are known: Two soft resins, of which one can, and the other can not, be precipitated with lead, while both are soluble in benzin, and a hard resin, which is not soluble in benzin, and can not be precipitated with lead. All three have a slight acid reaction. [B, 270 (*a*, 38).]—**Tannic acid of h's.** Fr., *acide tannique de houblon.* Ger., *Hopfengerbsäure.* An acid, $C_{25}H_{24}O_{13}$, obtained from h. cones, and occurring as a dark-red, amorphous mass or powder, soluble in water and in alcohol, insoluble in ether. [B, 270 (*a*, 38).]—**Tincture of h's.** See *Tinctura* HUMULI.—**Wild h.** 1. The *Bryonia dioica.* 2. The *Polygonum convolvulus.* 3. The *Stachys betonica.* [A, 505 (*a*, 21).]

HOPÁRI (Guz.), n. See ARECA *catechu.*

HOPEA (Lat.), n. f. Ho^{3}p'e^2-a^3. Fr., *hopée* (2d def.). 1. Of Roxburgh, a genus of the *Dipterocarpeæ.* 2. Of Linnæus, a genus of the *Styraceæ,* or, of Bentham and Hooker, a section of the genus *Symplocos.* [B, 19, 42 (*a*, 24).]—**H. aspera.** A species which furnishes the same fatty substance as *H. splendida.*—**H. micrantha.** A tall tree indigenous to Borneo. It yields a variety of Indian dammar, known as rock dammar. [B, 77, 185 (*a*, 35).]—**H. odorata.** A species growing in Pegu, yielding a resin called *thingan.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**H. splendida.** A species of which the seeds furnish a fatty substance, known in the islands of Sunda as *myniak-tangkawank,* or *myniak-sangkawank,* which has been suggested as a basis for ointments and suppositories. It also yields Indian dammar. [Grossi, "Rif. med."; "Gazz. degli ospit."; "N. Y. Med. Jour.," July 11, 1885, p. 56; "Proc. of the Am. Pharm. Assoc.," xxxii (*a*, 14).]—**H. ternifolia, H. tinctoria.** The *Symplocos alstonia.* [*a*, 24.]

HOPEINE, n. Ho^{2}p'e^2-en. Fr., *hopéine.* Ger., *Hopeïn.* It., *opeina.* The alleged active principle of hops; a factitious mixture of alkaloids, principally morphine. [B, 46, 270 (*a*, 38).]

HOPES, n. Hops. The *Matthiola incana.* [B, 275 (*a*, 24).]

HOPFEN (Ger.), n. Ho^{2}pf'e^{2}n. See HOP and HUMULUS.—**Aetherisches H'öl.** See *Ethereal oil of* HOPS.—**Cretischer H.** See ORIGANUM *creticum.*—**Feldh'kraut.** The herb of *Hypericum perforatum.* [B, 180 (*a*, 24).]—**Gemeiner H.** See HUMULUS *lupulus.*—**H'aufguss.** See *Infusum* LUPULI.—**H'baum.** The genus *Ostrya.* [B, 48 (*a*, 14).]—**H'bitter, H'bittersäure, H'drüsen.** See *Bitter acid* (or *principle*) *of* HOPS.—**H'extrakt.** See *Extractum* LUPULI.—**H'gerbsäure.** See *Tannic acid of* HOPS.—**H'harz.** See *Resin of* HOPS.—**H'kegeln.** The cones or strobiles of *Humulus lupulus.* [B, 180 (*a*, 24).]—**H'keimchen.** The young shoots of *Humulus lupulus.* [B, 180 (*a*, 24).]—**H'klee.** The *Trifolium agrarium.* [B, 48 (*a*, 14).]—**H'mehl.** See LUPULIN.—**H'seide.** See the major list.—**H'sprossen.** The young shoots of *Humulus lupulus.* [B, 180 (*a*, 24).]—**H'staub.** Lupulin. [B, 18 (*a*, 24).]—**H'tinktur.** See *Tinctura* HUMULI.—**H'wurzel.** See *Racine de* HOUBLON.—**H'zapfen.** The strobiles of *Humulus lupulus.* [B, 180 (*a*, 24).]—**Spanischers H'öl.** See *Oleum* ORIGANI *cretici.*

HOPFENSEIDE (Ger.), n. Ho^{2}p'fen-zid-e^2. The genus *Cuscuta.* [B, 48 (*a*, 14).]—**Brasilianische H.** The herb of *Cuscuta racemosa.* [B, 180 (*a*, 24).]

HÔPITAL (Fr.), n. O-pe-ta^{3}l. See HOSPITAL.—**H. ambulant.** See *Field* HOSPITAL.—**H. des enfants trouvés.** A foundling asylum.—**H. sédentaire.** A permanent or fixed hospital, in contradistinction to field hospital. [D, 11.]—**H. sous tente.** See *Field* HOSPITAL.

HOPLOCHRISMA (Lat.), n. n. Ho^{2}p-lo(lo^3)-kri^{2}z(ch^{2}res)'-ma^3. Gen., *-rismatos* (*-atis*). From ὅπλον, an implement, and χρῖσμα, an ointment. Fr., *hoplochrisme.* Ger., *Waffensalbe.* An ancient ointment esteemed a remedy for wounds when applied to the weapon with which they had been inflicted. [A, 322.]

HOPLOMOCHLION (Lat.), n. n. Ho^{2}p-lo(lo^3)-mo^{2}k(mo^{2}ch^2)'-li^2-o^{2}n. Gr., ὁπλομόχλιον. Of Fabricius ab Aquapendente, a certain surgical instrument applicable to any part of the body. [A, 325; L, 135 (*a*, 39).]

HOPLOPODOUS, adj. Ho^{2}p-lo^{2}p'o-du^{3}s. Lat., *hoplopodus* (from ὅπλον, an implement, and πούς, a foot). Fr., *hoplopode.* Of or pertaining to the members of the order *Hoplopoda.* [L, 180 (*a*, 39).] The *Hoplopoda* are, of Goldfuss, an order of *Mammalia,* including those which have their feet protected with hoofs. [L, 180 (*a*, 39).]

HOP-TREE, n. Ho^{2}p'tre. The *Ptelea trifoliata.* [B, 275 (*a*, 24).]—**Yellow-leaved h.-t.** The *Ptelea trifoliata aurea.* [B, 275 (*a*, 24).]

HOQUET (Fr.), n. Ho-ka. See HICCOUGH.

HORA (Lat.), n. f. Ho'ra^3. Gr., ὥρα. Of Aretæus, the age of puberty. [A, 322.]

HORÆA (Lat.), n. n. pl. Ho-re'(ra^3'e^2)-a^3. Gr., ὡραῖα. The menses. [Hippocrates (A, 311).]

HORÆOTAS (Lat.), **HORÆOTES** (Lat.), n's f. Hor-e'(a^3'e^2)-o^{2}t-a^{2}s(a^{3}s), -ez(as). Gr., ὡραιότης. 1. Puberty. 2. The maturity of the body. [A, 322.]

HORÆUS (Lat.), adj. Hor-e'(a^3'e^2)-u^{3}s(u^{4}s). Gr., ὡραῖος. 1. Timely. 2. Mature, adult. [A, 322.] 3. Occurring in summer. [Laucisius (II).]

HORAIRE (Fr.), adj. O-re^{2}r. See HORARIOUS.

HORAMA (Lat.), n. n. Ho^{2}r-am(a^{3}m)'a^2. Gen., *-am'atos (-atis)*. Gr., ὅραμα (from ὁρᾶν, to see). Fr., *vision*. Ger., *das Beobachtete, Schauspiel*. That which is observed. [A, 322.]

HORARIOUS, adj. Ho-ra'ri^2-u^{3}s. Lat., *horarius* (from *hora*, an hour). Fr., *horaire*. Lasting for but an hour or two. [B, 1, 19, 121 (a, 24).]

HORASIS (Lat.), n. f. Ho^{2}r-a(a^2)'si^{2}s. Gen., *-as'eos (-as'is)*. Gr., ὅρασις (from ὁρᾶν, to see). Fr., *horase*. Ger., *Beobachten, Sehen*. A seeing or observing. [A, 322.]

HORATICUS (Lat.), adj. Ho^{2}r-a^{2}t(a^{3}t)'i^{2}k-u^{3}s(u^{4}s). Gr., ὁρατικός. Capable of seeing. [A, 322.]

HORAU (Fr.), n. O-ro. The *Avicennia tomentosa*. [B, 88 (a, 39).]

HORAZDJOWITZ (Bohem.), n. A place in the district of Pilsen, Bohemia, where there are a sulphurous spring and a bathing establishment. [L, 30 (a, 14).]

HORCAJO DE LUCENA (Sp.), n. Or-ka^3'ho da lu-tha'na^3. A place in the province of Cordoba, Spain, where there is a spring containing calcium sulphate. [L, 49 (a, 14).]

HORDEACEOUS, adj. Ho^{2}r-de-a'shu^{3}s. Lat., *hordeaceus* (from *hordeum*, barley). Resembling barley. The *Hordeaceæ* (Fr., *hordeacées*) of Kunth are a tribe of grasses, comprising *Hordeum*, *Triticum*, etc. The *Hordeæ* of Lindley and *Hordeeæ* of Bentham and Hooker are the same. [B, 34, 170 (a, 24); L, 107.]

HORDÉATION (Fr.), n. Or-da-a^3-se-o^{2}n^2. From *hordeum*, barley. Foundering in horses due to an excess of barley in their food. [L, 41 (a, 14).]

HORDEATUM (Lat.), n. n. Ho^{2}r-de^2-at(a^{3}t)'u^{3}m(u^{4}m). From *hordeum*, barley. See *Decoctum* HORDEI.

HORDEIC ACID, n. Ho^{2}r-de'i^{2}k. A crystalline acid, $C_{12}H_{24}O_2$, isomeric or identical with lauric acid, obtained by distilling barley with dilute sulphuric acid, and melting at 60° C. [B, 48, 93 (a, 38).]

HORDEIFORMIS (Lat.), adj. Ho^{2}rd-e^2-i^2-fo^{2}rm'i^{2}s. From *hordeum*, barley, and *forma*, form. Fr., *hordéiforme*. Ger., *gerstenartig*. Barleycorn-shaped. [L, 49, 107.]

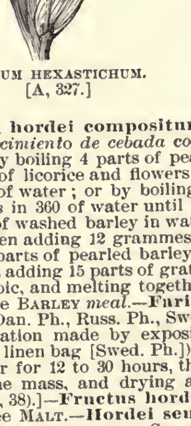
HORDEIN, n. Ho^{2}r'de-i^{2}n. From *hordeum*, barley. Fr., *hordéine*. Ger., *H.* An insoluble powder remaining when barley starch is heated with acidulated water; a mixture of starch, cellular tissue, and a nitrogenous principle. [B, 38, 48, 93 (a, 38).]

HORDEINIC ACID, n. Ho^{2}r-de-i^{2}n'i^{2}k. 1. An acid, probably identical with lauric acid, obtained by distilling barley with sulphuric acid. [B. 18.] 2. See HORDEIC ACID.

HORDEOLARIS (Lat.), adj. Ho^{2}rd-e^2-o^{2}l-a(a^3)'ri^{2}s. From *hordeum*, barley. Arranged in a line, like grains of barley (see ACNE *h.*). [G.]

HORDEOLUM (Lat.), n. n. Ho^{2}rd-e(e^2)'o^{2}l-u^{3}m(u^{4}m). From *hordeum*, barley. Gr., κριθίον, κριθίδιον. Fr., *orgelet, orgeolet*. Ger., *Gerstenkorn*. It., *orzaiuolo*. Sp., *orzuelo*. A sty; a phlegmonous or suppurative inflammation of the connective tissue, or of one of the sebaceous glands in the eyelid. [F.]—**H. externum.** A h. in which the inflamed glands are external or in the intermarginal edges. [Reuss (A, 319, 326 [a, 21]).]—**H. hydatidosum.** A hydatid form of h. [a, 29.] -**H. internum.** A h. in which the inflamed glands (Meibomian glands) are in the conjunctival sac. [Reuss (A, 319 [a, 21]).]—**H. meibomianum.** A Meibomian stye. [B.]—**H. zeissianum.** A Zeissian or ordinary stye; a h. externum in which the intermarginal glands of Zeiss are inflamed. [B.]

HORDEOZYMOSE, n. Ho^{2}r-de-o-zim'oz. From *hordeum*, barley, and ζύμωσις, fermentation. See DIASTASE and *Soluble* FERMENT.



HORDEUM (Lat.), n. n. Ho^{2}rd'e^2-u^{3}m(u^{4}m). Gr., κριθή. Fr., *orge*. Ger., *Gerste*. It., *orzo*. Sp., *cebada*. 1. Barley; a genus of grasses growing in temperate regions, and forming an important article of bread-food. All the cultivated species have the same properties. The grain is used, in decoction, in febrile and inflammatory complaints, and, in the form of malt, as a demulcent and nutritious liquor. 2. A germ. 3. Of the Gr. Ph., the seed of *H. vulgare* and *H. hexastichon*. 4. Of the U. S. Ph., 1870, see *Pearled* BARLEY. [B, 5, 19, 34, 42, 173, 180 (a, 24); B, 95.] 5. In the pl., *hordea*, of E. C. Spitzka, small rounded elevations in the floor of the fourth ventricle of the brain, sometimes apparently connected with the striæ acusticæ. ["Med. Record," Aug. 30, 1884, p. 249 (I).]—**Aqua hordei, Decoctum hordei** [Br. Ph., Belg. Ph.]. Fr., *tisane d'orge* [Fr. Cod.], *tisane* (ou *eau*) *d'orge perlé*. Ger., *Gerstenschleim, Gerstendecoct*. Sp., *cocimiento de cebada* [Sp. Ph.]. Barley-water; a preparation made by washing 2 parts of pearl barley in cold water, then boiling in 30 parts of water and straining [Br. Ph.]; or by boiling 2 parts of pearl barley in water sufficient to make, after adding 1 part of licorice-root and straining, 96 parts of decoction [Sp. Ph.]. The French preparation uses 20 parts, the Belgian 30 parts, of pearled barley, and water sufficient to make 1,000 parts of decoction. [B, 95 (a, 38).]—**Decoctum hordei acidulatum** (seu **acidulum**). Fr., *décoction d'orge acidulée*. A preparation made by boiling 9 parts of barley and 3 of *Triticum repens* in 360 of water, reducing to 288 parts, and adding 22 of oxymel; or by mixing 216 parts of decoction of barley with 12 of cranberry-juice, and sweetening. [B, 119 (a, 38).]—**Decoctum hordei amygdalinum.** Fr., *décoction d'orge émulsionnée*. A preparation made by mixing 8 parts of sweet almonds and 15 parts each of gum arabic and white sugar, then slowly adding 946 of decoction of barley, triturating, and straining; by making an emulsion of 14 parts each of sweet almonds and mallow-seeds, 29 of gum arabic, and 690 of decoction of barley; or by making an emulsion of 31 parts of sweet almonds, 15 each of sugar and rose-water, and 369 of decoction of barley. [B, 119 (a, 38).]—**Decoctum hordei citratum.** See *Decoctum hordei acidulatum*.—**Decoctum hordei compositum.** Fr., *décoction d'orge composée*. Sp., *cocimiento de cebada compuesto* [Sp. Ph.]. A preparation made by boiling 4 parts of pearl barley, 2 of ground ivy, and 1¼ part each of licorice and flowers of *Papaver rhœas* in a sufficient quantity of water; or by boiling 9 parts of barley and 3 of *Triticum repens* in 360 of water until reduced to 288; or by boiling 20 grammes of washed barley in water sufficient to make a litre of decoction, then adding 12 grammes of licorice and straining; or by boiling 90 parts of pearled barley in 1,440 of water until reduced one half, then adding 15 parts of grated licorice, straining, adding 45 of gum arabic, and melting together. [B, 95, 119 (a, 38).]—**Farina hordei.** See BARLEY *meal*.—**Farina hordei præparata** [Ger. Ph. (1st ed.), Dan. Ph., Russ. Ph., Swed. Ph.]. Syn.: *h. præparatum*. A preparation made by exposing barley meal in a closed vessel (or strong linen bag [Swed. Ph.]) to the heat of a steam bath or boiling water for 12 to 30 hours, then removing the top or outside part of the mass, and drying and triturating the remainder. [B, 95, 119 (a, 38).]—**Fructus hordei.** See *H. crudum*.—**Hordei maltum.** See MALT.—**Hordei semina.** See *Semen hordei* and BARLEY.—**H. avenaceum.** See ARRHENATHERUM *avenaceum*.—**H. canterinum.** See *H. hexastichon*.—**H. causticum.** See CEVADILLA.—**H. crudum** [Belg. Ph.]. Sp., *cebada* [Sp. Ph.]. The unhusked seed of *H. vulgare* and *H. hexastichon*. [B, 95.]—**H. decorticatum** [Br. Ph.], **H. denudatum.** 1. Of the Br. Ph., see *Pearled* BARLEY. 2. See *Hulled* BARLEY.—**H. distichon, H. distichum.** Fr., *orge à deux rangs* (ou *à long épis*, ou *anglaise*), *baillarge, paumelle*. Ger., *zweizeilige Gerste*. A species which is the chief source of pearled barley, and is probably indigenous to western Asia. [B, 5, 18, 173, 180 (a, 24).]—**H. excorticatum.** See *Pearled* BARLEY.—**H. galacticum.** A variety of barley. [B, 307 (a, 35).]—**H. germinatum.** See MALT.—**H. hexastichon, H. hexastichum.** Fr., *orge anguleuse* (ou *carrée*, ou *à six rangs*), *escourgeon*. Ger., *sechszeilige Gerste*. Six-rowed (or winter) barley, of which two varieties—*H. hexastichon densum*, or the large six-rowed barley, and *H. hexastichon sanctum*, or the small six-rowed barley—were cultivated by the ancients. The second variety is the sacred barley of antiquity, ears of which are figured on ancient coins. [B, 19, 77, 173, 180 (a, 24).]—**H. jubatum.** A species cultivated in Michigan as a substitute for *H. vulgare*. ["Proc. of the Am. Pharm. Assoc.," vii (a, 14).]—**H. mundatum** [Belg. Ph., Gr. Ph.]. See *Hulled* BARLEY.—**H. murinum.** Fr., *orge de murs, orge queue de souris*. Ger., *Mäusegerste*. Mouse or wall-barley; a wild species, of which the herb, *herba hordei murini*, was formerly used in medicine, being confounded with *Lolium perenne*. [B, 19, 173, 180 (a, 24).]—**H. nigrum.** Fr., *orge noire*. Ger., *schwarze Gerste*. Black barley, a variety of *H. vulgare*. [B, 173, 180 (a, 24).]—**H. perlatum** [Belg. Ph., Gr. Ph.]. See *Pearled* BARLEY.—**H. polystichum.** See *H. hexastichon*.—**H. præparatum.** See *Farina* HORDEI *præparata*.—**H. pratense.** Fr., *seiglain*. A wild species growing in meadows. Its herbage is sweet and nutritious, but the spiculæ of the awns often cause swell-

ing of the mouth in animals eating it in hay. [B, 19, 173 (*a*, 24).]—**H. sativum.** See *H. vulgare.*—**H. secalinum.** See *H. pratense.*—**H. vulgare.** Fr., *orge commune, béchette, épeautre, épeute, grosse orge.* Ger., *gemeine Gerste.* Bere, bigg, four-rowed barley, the common species; its culm is from 2 to 5 feet high, fistular, with alternate lance-linear leaves. The spikelets are all fertile, with an awn-like rudiment at the base of the upper palea. It is extensively cultivated, though its original country is unknown. It is mentioned in Chinese books 2500 B. C. [B, 5, 18, 34, 77, 173, 180 (*a*, 24).]—**H. zeocriton.** Fr., *faux riz, froment barbu. orge de Russie, riz d'Allemagne.* Ger., *Bartgerste, Reisgerste, Pfauengerste, Fächelgerste.* Fan, spratt, or battledoor barley; a species once known as German rice, and furnishing a superior flour. [B, 173, 180 (*a*, 24).]—**Maltum hordei** [Gr. Ph.]. See MALT.—**Ptisana de hordeo** [Fr. Cod.] (seu **hordei**). Fr., *tisane d'orge.* Ger., *Gerstenabkochung.* A preparation made by boiling 20 grammes of washed pearled barley until the kernels burst in water sufficient to leave a litre of liquid. [B, 95 (*a*, 38).]—**Semen hordei** [Belg. Ph.]. The seed of *H. hexastichon* and *H. vulgare.* [B, 95.]—**Semen hordei decorticatum** [Netherl. Ph.]. See *Pearled* BARLEY.

HOREHOUND, n. Hor'hu^5-u^{4}nd. 1. The *Marrubium vulgare.* 2. The *Ballota nigra.* [A, 505 (*a*, 21).]—**Alcoholic extract of h.** See *Extrait alcaolique de* MARRUBE.—**Aqueous extract of h.** See *Extrait aqueux de* MARRUBE.—**Base h.** The *Stachys germanica* and some other species of *Stachys.* [A, 511; B, 307 (*a*, 35).]—**Black (stinking) h.** See *H.* (2d def.).—**Common h.** See *H.* (1st def.).—**Conserve of h.** See *Conserve de* MARRUBE.—**Marsh-h.** The *Lycopus europæus.* [A, 505 (*a*, 21).]—**Stinking h.** See *H.* (2d def.).—**Water-h.** The *Lycopus europæus* and other species of *Lycopus.* [B, 275 (*a*, 24).]—**White h.** See *H.* (1st def.).—**Wild h.** The *Eupatorium pilosum.* [B, 275 (*a*, 24).]

HÖREN (Ger.), n. Hu^{5}r'e^{2}n. See AUDITION.—**Hinüberh'.** See *Contre*-AUDITION.

HÖREND (Ger.), adj. Hu^{5}r'e^{2}nd. Auditory.

HOREWORT, n. Hor'wu^{5}rt. The *Filago germanica.* [A, 505 (*a*, 21).]

HÖRFÄHIGKEIT (Ger.), n. Hu^{5}r'fa-hi^{2}g-kit. The power of hearing. [A, 528.]

HÖRHOLZ (Ger.), n. Hu^{5}r'holts. See ACOUOXYLON.

HÖRIGKEIT (Ger.), n. Hu^{5}r'i^{2}g-kit. See HÖRFÄHIGKEIT.—**Feinh'.** See HYPERACUSIS.

HORION (Fr.), n. O-re-o^{2}n^2. See DANDO.

HORISTOCACOPNEUMONIA (Lat.), **HORISTOPNEUMONOSAPROSIS** (Lat.), **HORISTOPNEUMONOSEPSIS** (Lat.), n's f. Ho^{2}r-i^{2}st''o(o^3)-ka^{2}k(ka^{3}k)-o(o^3)-nu^2(pnu^2)-mon(mo^{2}n)'-i^2-a^3, -o(o^3)-sa^{2}p(sa^{3}p)-ros'i^{2}s, -se^{2}p(sap)'si^{2}s. Gen., *-moniæ, -ros'eos (-is), -seps'eos (-is).* From ὁριστός, circumscribed, κακός, evil, and πνευμονία, pneumonia, or πνεύμων, the lung, and σαπροῦν, to putrefy, or σῆψις, putrefaction. Ger., *begrenzte Lungenfäule.* Circumscribed gangrene of the lung. [A, 322.]

HORISTOS (Lat.), **HORISTUS** (Lat.), adj's. Ho^{2}r-i^{2}st'o^{2}s, -u^{3}s(u^{4}s). Gr., ὁριστός. Fr., *limité.* Ger., *begrenzt.* Limited, circumscribed. [L, 50 (*a*, 14).]

HORIZOCARDIA (Lat.), n. f. Ho^{2}r-i^{2}z(ez)-o(o^3)-ka^{3}rd'i^2-a^3. From ὁρίζων, the horizon, and καρδία, the heart. Ger., *Horizocardie.* Of Alvarenga, the horizontal position of the heart on the diaphragm in the middle of the thoracic cavity, occurring especially in pronounced, eccentric hypertrophy, or in simple dilatation of both ventricles, and usually associated with rotation (trochorizocardia). [A, 319 (*a*, 21).]

HORIZONTAL, adj. Ho^{2}r-i^2-zo^{2}n't'l. Lat., *horizontalis* (from ὁρίζων, the horizon). Fr., Ger., *h.* Parallel with the horizon, level. [*a*, 24.]

HORKELIA (Lat.), n. f. Ho^{2}r-ke^{2}l'i^2-a^3. From *Horkel,* a German botanist. Fr., *horkélie.* 1. Of Chamisso and Schlechtendahl, a genus of the *Rosaceæ,* tribe *Chamœrhodeæ.* 2. Of Reichenbach, a section of the genus *Wolffia.* [B, 38, 48; "Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]—**H. cuneata, H. fusca, H. tenuiloba.** Medicinal species growing in California. ["Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]

HORLOGE DE FLORE (Fr.), n. Or-lozh d'flor. Ger., *Blumenuhr.* See HOROLOGIUM *floræ.*

HORLEY-GREEN, n. Ho^{2}rl''i^2-gren'. A place in Yorkshire, England, where there is a chalybeate spring. [A, 316; L, 49.]

HORME (Lat.), n. f. Ho^{2}rm'e(a). Gen., *horm'es* (-æ). Gr., ὁρμή. See INSTINCT.

HORMIN (Fr.), n. Or-ma^{2}n^2. The *Salvia horminum.* [B, 19 (*a*, 24).]

HORMINKRAUT (Ger.), n. Ho^{2}r-men'kra^3-u^{4}t. The *Salvia sclarea.* [B, 180 (*a*, 24).]

HORMINUM (Lat.), n. n. Ho^{2}r-min(men)'u^{3}m(u^{4}m). Gr., ὅρμινον. Fr., *hormin.* 1. Of Linnæus, a genus of labiates, of the *Satureineæ.* 2. Of Mönch, a section of *Sclarea* (a subgenus of *Salvia*), so called because said to be aphrodisiac. The *Hormineæ* of Endlicher are a subtribe of the *Monardeæ,* and Lindley's *Horminidæ* are the same. [B, 42, 78, 170 (*a*, 14, 24).]—**Herba hormini.** 1. The herb of *Salvia h.* 2. The *Salvia sclarea,* especially its leaves. [B, 180 (*a*, 24).]—**H. hortense.** 1. Probably the *Salvia h.* 2. The *Salvia sclarea.* [B, 180 (*a*, 24).]—**H. pratense.** The *Salvia pratensis.* [B. 180 (*a*, 24).]—**H. pyrenaicum.** Pyrenean dead-nettle; a species of *H.* (1st def.) growing in the mountains of the temperate parts of Europe. [B, 19, 275 (*a*, 24).]—**H. sativum.** The *Salvia h.* and *Salvia sclarea.* [B, 173, 180 (*a*, 24).]—**H. sclareum.** The *Salvia sclarea.* [B. 180 (*a*. 24).]—**H. silvestre.** The *Salvia verbenacea.* [B, 307, 310 (*a*, 35).]—**H. silvestre, foliis purpureis.** The *Salvia horminum.* [B, 310 (*a*, 35).]—**H. silvestre, inciso folio.** Of Gerarde, the *Salvia multifida.* [B, 310 (*a*, 35).]—**H. verbenaceum.** The *Salvia verbenacea.* [B, 173 (*a*, 24).]

HORMISCIUM (Lat.), n. n. Ho^{2}r-mi^{2}s'si^2(ki^2)-u^{3}m(u^{4}m). From ὁρμίσκος, a small necklace. A genus of fungous ferments of the *Hormiscinei.* [B, 104, 121 (*a*, 24).]—**H. cerevisiæ.** 1. Of Bonard, the *Saccharomyces mycoderma.* [A, 396 (*a*, 21).] 2. See SACCHAROMYCES *cerevisiæ.*—**H. vini.** See *H. cerevisiæ* (1st def.).

HORMOCOCCUS (Lat.), n. m. Ho^{2}rm-o(o^3)-ko^{2}k'ku^{3}s(ku^{4}s). From ὅρμος, a cord, and κόκκος, a kernel. Of Preuss, a genus of *Fungi* found on the orange, grape-vine, poplar, rose, and other plants. The *Hormococcaceæ* of Preuss are a family of the *Myelomycetes.* [B, 121 (*a*, 35).]

HORMOGONIA (Lat.), **HORMOGONIUM** (Lat.), n. f. and n. n. Ho^{2}rm-o(o^3)-gon(go^{2}n)'i^2-a^3, -u^{3}m(u^{4}m). From ὅρμος, a cord, and γόνος, any product. Fr., *hormogonie.* One of the segments, consisting of roundish cells, composing the filaments in *Nostoc,* and other *Cyanophyceæ.* They are endowed with a power of movement, and, after separating from the matrix, develop by growth and cell-division into new individuals. [B, 121 (*a*, 24).]

HORMOID, adj. Ho^{2}rm'oid. From ὅρμος, a necklace, and εἶδος, resemblance. Fr., *hormoïde.* Ger., *halsschnurförmig.* Necklace-shaped.

HORMON (Lat.), n. n. Ho^{2}rm'o^{2}n(on). Gr., ὁρμῶν. See ENORMON.

HORMOSIPHON (Lat.), n. m. Ho^{2}rm-o(o^3)-si(se)'fo^{2}n(fon). Gen., *-on'os (-is).* From ὅρμος, a cord, and σίφων, an empty. hollow body. A genus of green-spored *Algæ.* [B, 19 (*a*, 24).]—**H. arcticus.** A species abounding in the Arctic regions. It affords a wholesome food, which has none of the bitterness or purgative qualities of the *tripe de roche.* [B, 19 (*a*, 24).]

HORN, n. Ho^{2}rn. A.-S., *h.* Gr., κέρας. Lat., *cornu.* Fr., *corne.* Ger., *H.* It., *corne, corno.* Sp., *cuerno.* 1. One of the hard, pointed bodies which grow on the heads of some graminivorous quadrupeds and serve them for weapons. 2. A feeler of a snail. 3. Any h.-shaped structure.—**Anterior h. of the lateral ventricle.** Lat., *cornu anterius cerebri.* Fr., *corne antérieure.* Ger., *vorderes H. des Ventriculus lateralis.* The short cephalad prolongation of the lateral ventricle which extends into the frontal lobe. Its mesal boundary is formed by the septum lucidum, its roof by the corpus callosum. [I, 1 (K).]—**Anterior h. (of the spinal cord).** See *Anterior gray* CORNU.—**Buck's-h.** See BUCK'S-HORN and CORNU CERVI.—**Burnt h.** See CORNU CERVI *ustum.*—**Cutaneous h.** See CORNU *cutaneum.*—**Descending h. of the lateral ventricle.** Lat., *cornu descendens.* Fr., *corne postérieure (descendante).* Ger., *unteres* (oder *absteigendes*) *H.* A portion of the lateral ventricle having a direction successively caudad, laterad, ventrad, cephalad, and mesad. Its floor is largely formed by the hippocampus major. [I (K).]—**Devil's-h.** The *Phallus impudicus.* [B, 275 (*a*, 24).]—**External h.** [Spitzka]. See *Posterior* CORNU *of the medulla oblongata.*—**Hart's h.** See CORNU CERVI.—**Hatch-h.** The fruit of *Quercus robur.* [A, 505 (*a*, 21).]—**H.-of-plenty.** The *Fedia cornucopiæ.* [B, 19, 275 (*a*, 24).]—**H's of the uterus.** See CORNUA *of the uterus.*—**H. of the ventricles of the brain.** See *Anterior* and *Descending h. of the lateral ventricle,* and CORNU *laterale.*—**H.-plant.** The *Ecklonia buccinalis.* [B, 19, 275 (*a*, 24).]—**H'weed.** See CERATOPHYLLON.—**H.-wort.** 1. The *Ceratophyllum demersum.* 2. In the pl., *h'worts,* the *Ceratophyllaceæ.* [B, 19, 275 (*a*. 24).]—**Internal h.** [Spitzka]. The gray matter in the oblongata which corresponds to the lateral h. of the spinal cord. ["Jour. of Nerv. and Ment. Dis.," Apr., 1880, p. 208 (J).]—**Lateral h. of the lateral ventricle.** See CORNU *laterale.*—**Occipital h. of the lateral ventricle.** The posterior h. of the lateral ventricle. [C. S. Bull, "N. Y. Med. Jour.," Aug. 11, 1888.]—**Papillary h.** Cornu cutaneum, as associated with marked hypertrophy of the papilla. [G.]—**Posterior gray h.** See *Posterior* CORNU *of the spinal cord.*—**Posterior h. of the lateral ventricle.** Lat., *cornu posterius* (seu *posticum*) *ventriculi lateralis, forea digitata.* Fr., *corne postérieure.* Ger., *hinteres H., Hinterhauptsh'.* A portion of the lateral ventricle directed caudad, laterad, and then mesad into the occipital lobe. On its mesal wall is the projection known as the calcar, or hippocampus minor. [I (K).]—**Posterior h. of the spinal cord.** See under CORNU.—**Ram's-h's.** The *Orchis mario.* [A, 505 (*a*, 21).]—**Stag h., Stag's h.** The *Lycopodium clavatum.* [A, 505 (*a*, 21).]

HORN (Ger.), n. Ho^{3}rn. A place in the canton of Thurgau, Switzerland, where there is a whey-cure establishment. [L, 30, 87 (*a*, 39).]

HORN (Ger.), n. Horn. See HORN (Eng.) and CORNU.—**Aalsh'.** See SAMBUCUS.—**Absteigende H.** See *Descending* HORN *of the lateral ventricle.*—**Amberh'.** See STYRAX *officinalis.*—**Fühlh'.** See ANTENNA.—**Gebärmutterhörner.** See CORNUA *of the uterus.*—**Geraspeltes Hirschh'.** See CORNUA CERVI *raspatum.*—**Grosse Zungenbeinhörner.** See *Great* CORNUA *of the hyoid bone.*—**Hauth'.** See CORNU *cutaneum.*—**Hinteres H.** See *Posterior* HORN *of the lateral ventricle.* [I, 6.]—**Hinteres H. des Rückenmarkes.** See *Posterior* CORNU *of the spinal cord.*—**Hinterhauptsh'.** See *Posterior* HORN *of the lateral ventricle.*—**Hinterh'.** See the major list.—**Hirschh'.** See the major list.—**H'artig.** See CORNEOUS.—**H'auswuchs.** See CORNU *cutaneum.*—**H'bildung.** See KERATOSIS.—**H'blatt** [Remak]. 1. Of Remak, see EPIBLAST. 2. See TÆNIA *semicircularis.*—**H'blättchen.** The cells of the stratum corneum. [J.]—**H. der Seitenhöhle.** A cornu of the lateral ventricle. [I, 30 (K).]—**Hörnermohn.** The *Glaucium corniculatum.* [B, 88 (*a*, 39).]—**H'erz.** Horn ore (or silver), native silver chloride. [B.]—**H'farn.** The *Acrostichum thalictroides.* [B, 42 (*a*, 14).]—**H'förmig.** Horn-shaped.—**H'früchtige.** See CORNICULATÆ.—**H'füssig.** See CORNUPES.—**H'gerüst.** 1. The tubules of Stilling. [J.] 2. See *Horny* FRAMEWORK.—**H'geschwulst.** A horny tumor. [A, 521.]—**H'gewächs.** A horny excrescence. [A, 521.]—**H'gewebe.** See *Corneous* TISSUE.—**H'haut.** See the major list.—

H'häutig. Callous. [A, 521.]—**H'häutigkeit.** Callosity. [A, 521.]—**H'kraut.** 1. The genus *Cerastium.* [B, 48 (a, 14).] 2. See CHIMAPHILA *umbellata.*—**H'magsamen.** The *Glaucium corniculatum.* [B, 88 (a, 39).]—**H'mangel.** See ACERATIA and ACERATOSIS.—**H'mohn.** See the major list.—**H'riss.** A disease in horses consisting in a separation of the horny fibres in the hoof. [L, 30, 80 (a, 14).]—**H'spalte.** An aggravated form of *H'riss* (*q. v.*). [L, 30 (a, 14).]—**H'stoff.** See KERATIN.—**H'substanz.** See KERATIN.—**Hörnertragend.** See CORNUTUS.—**H'träger.** See CERASPHORIUM.—**H'weide.** The *Salix caprea.* [B, 48 (a, 14).]—**H'zahn.** The genus CERATODON. [B, 48 (a, 14).]—**Kleine Zungenbeinhörner.** See *Lesser* CORNUA *of the hyoid bone.*—**Kreuzbeinhörner.** See *Sacral* CORNUA.—**Mittleres H.** See *Intermedio-lateral* TRACT.—**Oberes Schildh'.** See *Superior* CORNU *of the thyreoid cartilage.*—**Seitliches H.** [Reichert]. See *Intermedio-lateral* TRACT.—**Steissbeinhörner.** See CORNUA *of the coccyx.*—**Unteres H.** See *Descending* HORN *of the lateral ventricle.*—**Unteres Schildh'.** See *Inferior* CORNU *of the thyreoid cartilage.*—**Unterh'.** See the major list.—**Uterushörner.** See CORNUA *of the uterus.*—**Vorderes H. des Ventriculus lateralis.** See *Anterior* HORN *of the lateral ventricle.*—**Vorderh'.** See the major list.—**Wespenbeinhörner.** See *Sphenoidal* CORNUA.—**Ziegenh'.** See TRIGONELLA *fœnum græcum.*—**Zungenbeinh'.** A cornu of the hyoid bone. [L.]

HORNADROS (Sp.), n. Or-na^3'dros. A place in the province of Badajoz, Spain, where there are ferruginous springs. [L, 30 (a, 14).]

HORNBEAM, n. Ho^{2}rn'bem. See CARPINUS *betulus.*—**American h.** The *Carpinus americana.* [B, 275.]—**Common h., Cut-leaved h.** See *H.*—**Hop-h.** The genus *Ostrya.* [B, 34 (a, 24).]

HORNBEECH, n. Ho^{2}rn'bech. See HORNBEAM.

HORNBERG (Ger.), n. Ho^{2}rn'be^{2}rg. A village in the Black Forest, Germany, considered a health resort. [A, 528.]

HÖRNCHEN (Ger.), n. Hu^{5}rn'ch^{2}e^{2}n. See CORNICULUM.

HORNED, adj. Ho^{2}rn'e^{2}d. See CORNICULATE and CORNUTUS.

HÖRNERN (Ger.), adj. Hu^{5}rn'e^{2}rn. See CORNEUS.

HORNHAUSEN (Ger.), n. Ho^{2}rn'ha^3-u^{4}z-e^{2}n. A place in the district of Magdeburg, Prussian Saxony, where there is an abandoned mineral spring. [L, 30 (a, 14).]

HORNHAUT (Ger.), n. Ho^{2}rn'ha^3-u^{4}t. 1. See CORNEA (1st def.). 2. See CHIMAPHILA *umbellata.*—**Durchsichtige H.** See CORNEA.—**H'ausschnitt.** See CERATOMIA.—**H'auswuchs.** See HYPERKERATOSIS.—**H'blatter.** An old term for cloudiness or opacity of the cornea. [L, 80.]—**H'bruch.** See KERATOCELE.—**H'durchstechung.** See KERATONYXIS.—**H'entzündung.** See KERATITIS.—**H'erweichung.** See KERATOMALACIA.—**H'falz.** The margin of the cornea. [a, 29.]—**H'fleck.** See CALIGO *corneæ.*—**H'gefässentzündung.** See ANGEIOKERATODEITIS.—**H'geschwür.** A corneal ulcer. [L, 135 (a, 39).]—**H'granulom.** See GRANULOMA *of the cornea.*—**H'infiltrat.** Infiltration of the cornea.—**H'nagel.** An opaque thickening of the cornea. [L, 135 (a, 39).]—**H'narbe.** See CALIGO *corneæ.*—**H'rand.** The margin of the cornea.—**H'ring.** See ARCUS *senilis corneæ.*—**H'schnitt.** See KERATOTOMY.—**H'staphylom.** See STAPHYLOMA *of the cornea.*—**H'stich.** See KERATONYXIS.—**H'tatouirung.** Tattooing of the cornea. [a, 29.]—**H'transplantation.** Transplantation of the cornea. [a, 29.]—**H'träublein.** Staphyloma of the cornea. [a, 29.]—**H'trübung, H'verdunkelung.** Opacity of the cornea. [a, 29.]—**H'verknöcherung.** Ossification of the cornea. [L, 135 (a, 39).]—**H'verschwärung.** Ulceration of the cornea. [a, 29.]—**H'vorfall.** Staphyloma of the cornea. [a, 29.]—**Perlförmige H.** Maculæ corneæ margaritaceæ. [L, 80.]—**Uebermässigerhabene H.** See HYPERKERATOSIS.—**Undurchsichtige H.** Opacity of the cornea. [L, 80.]—**Weisse H.** Leucoma. [L, 80.]

HORNHAUTBILDUNG (Ger.), n. Ho^{2}rn'ha^3-u^{4}t-bi^{2}ld-un^3. See KERATOSIS.—**Künstliche H.** See KERATOPLASTY.

HORNHÄUTLEIN (Ger.), n. Ho^{2}rn'hoit-lin. See HORNHAUT.

HORNIG (Ger.), adj. Ho^{2}rn'i^{2}g. See CORNEOUS.

HORNISSE (Ger.), n. Hor-nes'se^2. See VESPA *crabro.*

HORNKLEE (Ger.), n. Ho^{2}rn'kla. The *Lotus corniculatus.* [B, 180 (a, 24).]—**Gemeiner H.** The *Lotus corniculatus,* var. *vulgaris.* [B, 180 (a, 24).]

HORNMOHN (Ger.), n. Ho^{2}rn'mon. The genus *Glaucium.* [B, 180 (a, 24).]—**Gelber H.** The *Glaucium luteum.* [B, 180 (a, 24).]—**Löwengelber H.** The *Glaucium fulvum.* [B, 180 (a, 24).]—**Rother H.** The *Glaucium corniculatum.* [B, 180 (a, 24).]

HORNOTINUS (Lat.), adj. Ho^{2}r(hor)-no^{2}t(not)'i^{2}n-u^{3}s(u^{4}s). See HORNUS.

HORN-POX, n. Ho^{2}rn'po^{2}x. Ger., *Hornpocke.* See VARIOLA *verrucosa.*

HORNSTRAUCH (Ger.), n. Ho^{2}rn'stra^3-u^{4}ch^2. The genus *Cornus.* [B, 180 (a, 24).]—**Gelber h.** See CORNUS *mascula.*—**Schönblühender H.** See CORNUS *florida.*

HORNUNGSBLUME (Ger.), n. Ho^{2}rn'un^{2}z-blum-e^2. The *Narcissus pseudonarcissus.* [B, 180 (a, 24).]

HORNUS (Lat.), adj. Ho^{2}rn(horn)'u^{3}s(u^{4}s). Contr. of *horinus* (from ὥρα, a season). Ger., *diesjährig.* Of the current year (said of parts of plants not a year old). [B, 19, 123 (a, 24).]

HORNY, adj. Ho^{2}rn'i^2. See CORNEOUS.

HOROLOGIUM (Lat.), n. n. Ho^{2}r(hor)-o^{2}l-oj(o^{2}g)'i^2-u^{3}m(u^{4}m). Gr., ὡρολόγιον (from ὥρα, time, and λόγος, understanding). Fr., *horloge.* Ger., *Uhr.* A clock or dial.—**H. Floræ.** Fr., *horloge de Flore.* Ger., *Blumenuhr.* Of Linnæus, a time-paper of flowers; a table of plants growing wild in the neighborhood of Upsal, the opening of whose flowers indicated the different hours of the day. [B, 1, 19 (a, 24).]

HORONOSOS (Lat.), **HORONOSUS** (Lat.), n's f. Ho^{2}r(hor)-o^{2}n'o^{2}s-o^{2}s, -u^{3}s(u^{4}s). From ὥρα, a season, and νόσος, disease. Fr., *horonose.* Ger., *Jahreszeitenkrankheit.* A disease especially prevalent at a certain time of the year. [L, 50 (a, 14).]

HOROPTER (Lat.), n. m. Ho^{2}r-o^{2}p'tu^{5}r(tar). Gen., *-ter'os* (*-is*). From ὅρος, a boundary, and ὀπτήρ, one who sees. Fr., *horoptère.* Ger., *H., Sehziel, Sehachsenkreuzung.* The surface of single vision, corresponding to any given binocular position; that region of external space the different points of which are imaged on identical spots. [F.]—**Horizontal h.** Fr., *horoptère horizontale.* Ger., *Horizontalh'.* A line h. for all lines which appear to run parallel to the horizontal plane of the retina in both visual fields. [F.]—**H. der Deckstellen** (Ger.). The h. formed by the intersection of the horizontal and vertical h's. [F, 21 (a, 29).]—**H. der Längsschnitte** (Ger.). See *Vertical h.*—**H. der Querschnitte** (Ger.). See *Horizontal h.*—**Line h.** Fr., *horoptère à ligne.* Ger., *Linienh'.* The surface or plane in which straight lines of a certain direction must lie in order to produce two corresponding images. [F.]—**Point h.** Fr., *horoptère à point.* Ger., *Punkth'.* That portion of the h. curve which is seen distinctly and singly. [F.]—**Vertical h.** Fr., *horoptère verticale.* Ger., *Verticalh'.* A line-h. for all lines which appear to run normal to the horizontal plane of the retina in both visual fields. [F.]

HOROPTERIC, adj. Ho^{2}r-o^{2}p-te^{2}r'i^{2}k. From ὅρος, a boundary, and ὀπτήρ, one who sees. Fr., *horoptérique.* Pertaining to the horopter. [a, 29.]

HORRENS (Lat.), adj. Ho^{2}r're^{2}nz(rans). From *horrere,* to shudder. Fr., *tremblant.* Ger., *schauderhaft.* Trembling, shivering. [L, 50 (a, 14).]

HORRENTIA (Lat.), n. f. Ho^{2}r-re^{2}n'shi^2(ti^2)-a^3. See HORRIPILATION.

HORRIDUS (Lat.), adj. Ho^{2}r'ri^{2}d-u^{3}s(u^{4}s). From *horrere,* to shiver. 1. Attended with shivering (said of fevers). [L, 50, 107 (a, 14).] 2. Horrid, dreadful (*e. g.,* the *Crotalus h.*).

HORRIFER (Lat.), **HORRIFICUS** (Lat.), adj's. Ho^{2}r'ri^2-fu^{5}r(fe^{2}r), ho^{2}r-ri^{2}f'i^{2}k-u^{3}s(u^{4}s). From *horror,* shivering, and *ferre,* or *facere,* to produce. See HORRIDUS (2d def.).

HORRIPILATION, n. Ho^{2}r-ri^2-pi^2-la'shu^{3}n. Lat., *horripilatio* (from *horripilare,* to bristle with hairs). Fr., *h.* Ger., *Schaudern, Haarsträuben.* It., *orripilazione.* The erection of the hairs on the body, produced by fear, pain, or chilliness; also the sensation of such an occurrence. [D.]

HORRIPILATORES (Lat.), n. m. pl. Ho^{2}r-ri^2-pi^{2}l-a^{2}t(a^{3}t)-o'rez(ras). See ARRECTORES *pilorum.*

HORROR (Lat.), n. m. Ho^{2}r'ro^{2}r. Gen., *-ror'is.* From *horrere,* to shiver. Fr., *horreur.* A shivering. [L, 50, 107.]—**H. ciborum.** A distaste for all food. [a, 34.]

HORRORS, n. Ho^{2}r'orz. A popular term for delirium tremens.

HORSE, n. Ho^{2}rs. A.-S., *hors.* Gr., ἵππος. Lat., *equus.* Fr., *cheval.* Ger., *Pferd.* 1. See EQUUS *caballus.* 2. As an adj., pertaining to the h. 3. As an adj., coarse.—**Fairies'-h.** The *Senecio jacobæa.* [A, 505 (a, 21).]—**H.-bane.** The *Œnanthe phellandrium.* [B, 19, 275 (a, 24).]—**H.-blob.** See CALTHA *palustris.*—**H.-buckles.** The *Primula veris.* [A, 505 (a, 21).]—**H.-chestnut.** See the major list.—**H.-crust.** See CRUSTA *genu equini.*—**H. distemper.** See DISTEMPER (2d def.).—**H. flower.** The *Melampyrum arvense.* [A, 505 (a, 21).]—**H.-fly-weed.** The *Baptisia tinctoria.* [B, 275 (a, 24).]—**H.-gogs.** A variety of *Prunus domestica.* [A, 505 (a, 21).]—**H.-gram.** The *Dolichos biflorus* and *Dolichos uniflorus.* [B, 185, 275 (a, 24).]—**H'hair.** Hair from the h's tail or mane. Rendered aseptic, it is used for capillary drainage and occasionally for sutures.—**H.-heal, H'heale, H'hele.** The *Inula helenium.* [A, 505 (a, 21).]—**H.-hoof, H.-hove.** The *Tussilago farfara.* [A, 505 (a, 21).]—**H.-jags.** A variety of *Prunus domestica.* [A, 505 (a, 21).]—**H.-knob, H.-knobs.** The *Centaurea nigra.* [B, 19 (a, 24).]—**H'mint.** See the major list.—**H.-peus.** The *Rhinanthus crista galli.* [A, 505 (a, 21).]—**H.-pipe.** The genus *Equisetum.* [B, 19 (a, 24).]—**H.-pox, H'radish.** See the major list.—**H's-breath.** The *Ononis arvensis.* [A, 505 (a, 21).]—**H.-shoe.** The *Hippocrepis comosa.* [A, 505 (a, 21).]—**H. sugar.** The *Symplocos tinctoria.* [B, 116.]—**H.-tongue.** The *Scolopendrium vulgare.* [A, 505 (a, 21).]—**H.-weed.** 1. The *Collinsonia canadensis* and *Erigeron canadensis.* 2. In Kansas, the *Ambrosia trifida.* ["Proc. of the Am. Pharm. Assoc.," xxix (a, 14); B, 19, 121, 275 (a, 24).]—**River-h.** See HIPPOPOTAMUS.

HORSE-CHESTNUT, n. Ho^{2}rs'che^{2}st-nu^{3}t. The *Æsculus hippocastanum.* [B, 88 (a, 39).]—**Alcoholic extract of h.-c. bark.** See *Extrait alcoolique de* MARRONIER *d'Inde.*—**American h.-c.** The buckeye (*Æsculus pavia*). [B, 197 (a, 35).]—**Aqueous extract of h.-c.** See *Extrait aqueux de* MARRONIER *d'Inde.*—**Decoction of h.-c. bark.** See *Decoctum corticis* HIPPOCASTANI.—**Ethereal oil of h.-c.** A volatile oil obtained from h.-c. bark by percolation with ether and evaporation; used as a topical application in the early stages of gout and rheumatism. ["Proc. of the Am. Pharm. Assoc.," xiii (a, 14).]—**H.-c. tree.** See ÆSCULUS *hippocastanum.*—**Scarlet-flowered h.-c.** The *Æsculus hippocastanum rubicunda* (*Æsculus pavia*). [D. J. Browne (a, 35).]

HORSEMINT, n. Ho^{2}rs'mi^{2}nt. The *Mentha silvestris,* and the *Monarda punctata.* [B, 5, 275 (a, 24).]—**Bradbury's h.** The *Monarda Bradburyana.* [B, 275 (a, 24).]—**Canadian h.** The *Collinsonia canadensis.* [B, 275 (a, 24).]—**Panicled h.** The *Monarda paniculata.* [B, 275 (a, 24).]—**Round-leaved h.** The *Mentha rotundifolia.* [B, 310 (a, 35).]—**Sweet h.** The *Cunila mariana.* [L, 45.]

HORSE-POX, n. Ho^{2}rs'po^{2}x. Lat., *equinia.* Fr., *h.-p.* Ger., *Schutzmauke, Pferdepocken.* A contagious disease of the horse characterized by a general eruption of pocks. Inoculation of man

or the cow with the virus from the pocks gives rise to the vaccinal lesion and confers immunity from small-pox.

HORSERADISH, n. Ho^{2}rs'ra^{2}d-i^{2}sh. See ARMORACIA and ARMORACIA *rusticana*.—**Compound spirit of h.** See *Spiritus* ARMORACIÆ *compositus*.—**East Indian country h., East Indian h.** The root of *Moringa pterygosperma*. [B, 496 (α, 35).]—**H.-root.** See under ARMORACIA *rusticana*.—**Kerguelen h.** The *Pringlea antiscorbutica*. [B, 275 (α, 24).]—**H.-tree.** The *Moringa pterygosperma*. [B, 172, 275 (α, 24).]

HORSE-TAIL, n. Ho^{2}rs'tal. The genus *Equisetum*. [B, 19, 275 (α, 24).]—**American h.-t.** The *Equisetum robustum* and *Equisetum lævigatum*. [B, 275 (α, 24).]—**Blunt-topped h.-t.** The *Equisetum umbrosum*. [B, 275 (α, 24).]—**Common h.-t.** The *Equisetum arvense*.—**Corn h.-t.** The *Equisetum arvense*. [A, 511 (α, 35).]—**Field h.-t.** The *Equisetum arvense*. [B, 275 (α, 24).]—**Great h.-t.** The *Equisetum telmateia*. [B, 275 (α, 24).]—**Great shrubby h.-t.** The *Ephedra distachya*. [B, 275 (α, 24).]—**Great water h.-t.** The *Equisetum fluviatile*. [A, 511 (α, 35).]—**Long-branched h.-t.** The *Equisetum ramosum*. [B, 275 (α, 24).]—**Marsh h.-t.** The *Equisetum palustre*. [B, 275 (α, 35).]—**Rough h.-t.** The *Equisetum hiemale*. [B, 275 (α, 24).]—**Shrubby h.-t.** The genus *Ephedra*. [B, 19 (α, 35).]—**Small shrubby h.-t.** The *Ephedra monostachya*. [B, 275 (α, 24).]—**Smooth h.-t.** The *Equisetum limosum*. [B, 275 (α, 24).]—**Tree h.-t.** The *Casuarina equisetifolia*. [B, 275 (α, 24).]—**Wood h.-t.** The *Equisetum silvaticum*. [B, 275 (α, 24).]

HÖRSINN (Ger.), n. Hu^{5}r'zi^{2}n. The sense of hearing.

HÖRSTORUNG (Ger.), n. Hu^{5}r'stu^{5}r-un^2. Any derangement of the hearing.

HORTENSIA (Lat.), n. f. Ho^{2}r-te^{2}ns'i^2-a^3. From *Hortense*, a proper name. The *Hydrangea h.* [B, 19 (α, 24).]

HORTENSIS (Lat.), adj. Ho^{2}r-te^{2}n'si^{2}s. From *hortus*, a garden. Of, pertaining to, or growing in a garden (a botanical species name). [B, 19 (α, 24).]

HORTIA (Lat.), n. f. Ho^{2}rt'i^2-a^3. From *hortus*, a garden. Fr., *hortie*, *h.* Of Bentham and Hooker, a genus of the *Toddalieæ*; of Vandell, a genus of the *Diosmeæ*, tribe *Pilocarpeæ*. [B, 38, 48 (α, 14), 19, 42, 173 (α, 24).]—**H. arborea.** The species producing the *casca paratudo*. ["Proc. of the Am. Pharm. Assoc.," xxxiii (α, 14).]—**H. brasiliana.** Fr., *h. du Brésil*. A species the bitter bark of which is used in Brazil as a febrifuge in place of quinine. [B, 19, 173, 180 (α, 24).]

HORTICOLUS (Lat.), adj. Ho^{2}rt-i^{2}k'o^{3}l-u^{3}s(u^{4}s). From *hortus*, a garden, and *colere*, to inhabit. Growing in gardens (said of plants). [L, 107.]

HORTULUS CUPIDINIS (Lat.), n. m. Ho^{2}rt'u^{2}l(u^{4}l)-u^{3}s(u^{4}s) ku^2(ku^4)-pi^{2}d(ped)'i^{2}n-i^{2}s. Lit., Cupid's little garden; an old name for the vulva. [A, 322.]

HORTUS (Lat.), n. m. Ho^{2}rt'u^{3}s(u^{4}s). Gr., κῆπος. Fr., *jardin*. Ger., *Garten*. A garden. [α, 24.]—**H. lætitiæ.** See CROCUS.—**H. siccus.** See HERBARIUM.

HOSACKIA (Lat.), n. f. Ho^{2}s-a^{2}k'i^2-a^3. From *Hosack*, an American physician. Fr., *hosackie*. A genus of the *Leguminosæ*. [B, 38, 42, 48 (α, 24).]—**H. purshiana.** A species found in Arizona; said to produce the disease called *loco* in animals feeding upon it. [B, 66.]—**H. stolonifera.** A species growing in California. [B, 71 (α, 14).]

HOSE-IN-HOSE, n. Hoz'i^{2}n-hoz. A peculiar variety of garden *Polyanthus* in which the calyx becomes petaloid and presents the appearance of one corolla outside of another. [A, 505 (α, 21).]

HOSPICE (Fr.), n. Os-pes. From *hospitium*, a place of entertainment for strangers. See INFIRMARY.

HOSPITAL, n. Ho^{2}s'pi^2-t'l. Lat., *hospitale*, *hospitium* (from *hospes*, a host). Fr., *hôpital*. Ger., *H.*, *Krankenhaus*. A place designed for the shelter and treatment of the sick and wounded.—**Bewegliches H.** (Ger.). See *Field h.*—**Cottage h.** A small detached building containing a few rooms holding a few beds each, with rooms for offices, etc. These h's were formerly thought to afford better results in treating surgical cases. [α, 34.]—**Field h.** Fr., *ambulance*, *hôpital ambulant* (ou *sous tente*), *baraque hospitalière*. Ger., *Feldh'*, *bewegliches H.* A h. consisting of separate large tents for necessary offices and wards; or of woodwork that can be easily and quickly screwed and bolted together, or taken apart, for use with an army in the field. [α, 34.]—**Floating h., H. boat.** A barge fitted with berths, a surgeon's office and a pharmacy, a kitchen, and bunks for attendants; used at quarantine stations and on waterways for the reception and treatment of sick and injured persons. [α, 34.]—**H. knapsack.** A case of wood, or wicker-work covered with enameled cloth, weighing, when packed, from sixteen to twenty pounds; it is carried by an orderly in the field, and contains anæsthetics, styptics, stimulants, anodynes, and material for primary dressings. [α, 34.]—**H. railway-car.** A freight or passenger car fitted for transporting sick and wounded persons. [α, 34.]—**H. steamer.** A steamer or steamship fitted with berths arranged as in a ward, with necessary offices, attendants' quarters, kitchens, etc.; used for the transportation of the sick and wounded. [α, 34.]—**H. train.** A train composed of h. railway-cars. [α, 34.]—**Lock h.** In Great Britain, a h. for the treatment of venereal diseases. [L, 107 (α, 43).]

HOSPITALIER (Fr.), adj. Os-pe-ta^2-le-a. Pertaining to a hospital.

HOSPITALIZATION, n. Ho^{2}s-pi^2-ta^{2}l-i^{2}z-a'shu^{3}n. Fr., *hospitalisation*. Subjection of a person to treatment or isolation in a hospital.

HOSPITALISM, n. Ho^{2}s'pi^2-t'l-i^{2}z'm. Of Sir J. Y. Simpson, the unfavorable influence of a crowded hospital on its inmates.

HOSSZUMEZO (Magy.), n. A place in the county of Marmaros, Hungary, where there are ferruginous springs. [L, 30 (α, 14).]

HOST, n. Host. Lat., *hospes*. Fr., *hôte*. Ger., *Wirth*. An organism on or in which another organism lives as a parasite.

HOSTARIUS (Lat.), n. m. Ho^{2}st-a(a^3)'ri^2-u^{3}s(u^{4}s). See PYLORUS.

HOT, adj. Ho^{2}t. A.-S., *hat*. Gr., θερμός. Lat., *calidus*. Fr., *chaud*. Ger., *heiss*. It., *ardente*, *caldo*. Sp., *caliente*. 1. Heated. 2. Acrid, piquant.

HO-TAO (Chin.), n. The *Juglans regia*. [B, 88 (α, 39).]

HOT ARROW-HEAD, n. Ho^{2}t a^{2}r'ro-he^{2}d. A mineral spring in California. ["Therap. Gaz.," Oct. 15, 1890, p. 707.]

HOT SPRINGS, n. Ho^{2}t spri^{2}n^{2}z'. 1. A place in Garland County, Arkansas, where there are thermal springs containing magnesium and calcium carbonates, sodium chloride, potassium, sodium, and calcium sulphates, iron sesquioxide, iodine, bromine, calcium, silicates, silica, alumina, and organic matter. 2. A place in Bath County, Virginia, where there are thermal springs containing magnesium, iron, and calcium carbonates, potassium and sodium chlorides, potassium, sodium, magnesium, and calcium sulphates, and silica. [A, 363 (α, 21).]

HOT SULPHUR SPRINGS, n. Ho^{2}t su^{3}l'fu^{5}r. A place in Grand County, California, where there are warm springs containing sulphur, magnesium, etc. [α, 14.]

HOTTENTOT-HOLLAND, n. Ho^{2}t''e^{2}n-to^{2}t-ho^{2}l'la^{2}nd. A place at the Cape of Good Hope where there is a warm ferruginous and gaseous spring. [L, 30, 49, 105 (α, 14).]

HOTTENTOT'S-HEAD, n. Ho^{2}t''e^{2}n-to^{2}ts-he^{2}d'. The *Stangeria paradoxa*. [B, 275 (α, 24).]

HOTTENTOTTISMUS (Lat.), n. m. Ho^{2}t-e^{2}n-to^{2}t-ti^{2}z(ti^{2}s)'-mu^{3}s(mu^{4}s). An intense form of congenital stammering, sometimes due to a deformity of the mouth. [L, 20.]

HOUBLON [Fr. Cod.] (Fr.), n. Hu-blo^{2}n^2. From *humulus*, the hop. 1. See HUMULUS, HOP, and LUPULIN.—**Acide tannique de h.** See *Tannic acid of* HOPS.—**Cône de h.** [Fr. Cod.]. See under HUMULUS and HOP.—**Extrait alcoolique de h.** See *Extractum* LUPULI.—**Extrait de h.** [Fr. Cod.]. See *Extractum* LUPULI.—**H. cultivé.** The *Humulus lupulus*. [B, 173 (α, 24).]—**H. de montagne.** The *Ornithogalum flavescens*. [B, 173 (α, 24).]—**Racine de h.** [Fr. Cod.]. Lat., *radix lupuli*. Ger., *Hopfenwurzel*. The root of *Humulus lupulus*. [B, 95 (α, 38).]—**Sirop de h.** [Fr. Cod.]. A preparation made by infusing 10 parts of hop cones in a closed vessel with 150 parts of boiling water, expressing, and adding 18 parts of dissolved sugar for each 10 parts of clarified colature, then boiling quickly, and straining. [B, 95 (α, 38).]—**Tisane de h.** [Fr. Cod.]. See *Infusum* LUPULI.

HOUBLONNÉ (Fr.), adj. Hu-blo^{2}n-na. Scented with hops (said of morphine sophisticated to resemble hopeine). [C. Élog, "Union méd.," Feb. 18, 1886, p. 281.]

HOUDIN (Fr.), n. U-da^{2}n^2. The *Ruscus aculeatus*. [B, 173 (α, 24).]

HOUGH, n. Hu^{3}f. A.-S., *hôh*, *hô*. The lower part of the thigh. [L.] Cf. HOCK.

HOUILLE (Fr.), n. Hu-el-y'. Pit-coal. [L, 49.]—**H. grasse.** See *Bituminous* COAL.—**H. sèche.** See *Anthracite* COAL.—**Huile de h.** See PETROLEUM.—**Sucre de h.** See SACCHARIN.

HOULGATE (Fr.), n. Ul-ga^{3}t. A place in the department of Calvados, France, where there is sea-bathing. [L, 41, 87 (α, 14).]

HOULQUE (Fr.), n. Hulk. See HOLCUS.—**H. à balais.** The *Sorghum vulgare*. [B, 173 (α, 24).]—**H. aristée.** See HOLCUS *lanatus*.—**H. de deux couleurs.** See HOLCUS *bicolor*.—**H. laineuse.** See HOLCUS *lanatus*.—**H. odorante.** See HOLCUS *australis*.—**H. tendre.** See HOLCUS *mollis*.—**H. veloutée.** See HOLCUS *lanatus*.

HOUMIRI, n. 1. The *Hedwigia balsamifera*. 2. In French Guiana, the *Humiria balsamifera*. [B, 88 (α, 39).]

HOUMIRIA (Lat.), n. f. Hu-mi^2'ri^2-a^3. See HUMIRIA.

HOUNDBERRY, n. Hu^5'u^{4}nd-be^{2}r-i^2. 1. The *Solanum nigrum*. 2. The *Cornus sanguinea*. [B, 19, 121, 275 (α, 24).]—**H.-tree.** See CORNUS *sanguinea*.

HOUNDSTONE, n. Hu^5'u^{4}nd-sto^{3}n. See CYNOGLOSSUM *majus*.

HOUND'S-TONGUE, n. Hu^5'u^{4}ndz-tu^{3}n^2. 1. The genus *Cynoglossum*, especially the *Cynoglossum majus*. 2. The *Stachys palustris*. [A, 505 (α, 21); B, 5, 19, 275 (α, 24).]—**Alpine h.-t.** 1. The *Cynoglossum alpinum*. 2. The *Liatris odoratissima*. [B, 121, 275 (α, 24).]—**Common h.-t.** See CYNOGLOSSUM *majus*.—**Green h.-t.** The *Cynoglossum montanum*. [B, 275 (α, 24).]—**Stock-leaved h.-t.** The *Cynoglossum cheirifolium*. [B, 275 (α, 24).]

HOUPALE (Fr.), n. Hu-pa^{3}l. The *Agaricus procerus*. [B, 121 (α, 35).]

HOUPPE (Fr.), n. Up. In botany, the tuft of hairs at the ends of some seeds; also the pappus in the *Compositæ*. [B, 121 (α, 35).] Cf. ARISTA and BARB.—**H. blanche.** A name for many species of *Clavaria* and *Hydnum*. [B, 121 (α, 35).]—**H. des arbres.** The *Hydnum arenaceum*. [B, 121 (α, 35).]—**H. nerveuse.** A tuft-like termination of a fasciculus of nerves in a papilla. [J, 33.]

HOUQUE (Fr.), n. Huk. See HOLCUS.

HOUR (Ar.), n. The *Populus alba*. [B, 121 (α, 35).]

HOURDEL (Fr.), n. Ur-de^{2}l. A place in the department of Somme, France, where there is sea-bathing. [L, 49, 87 (α, 14).]

HOUSE-GREEN, n. Hu^5'u^{4}s-gren. The *Sempervivum tectorum*. [A, 505 (α, 21).]

HOUSELEEK, n. Hu^5'u^{4}s-lek. The genus *Sempervivum*, especially the *Sempervivum tectorum*. [B, 19, 275 (α, 24).]—**Cobweb-h.** See SEMPERVIVUM *arachnoideum*.—**Common h.** See SEMPER-

VIVUM *tectorum*.—**Dwarf h.** The *Sedum reflexum*. [A, 505 (*a*, 21).] —**Gouty-stalked h.** The *Sempervivum tortuosum*. [B, 275 (*a*, 24).]—**Hen-and-chickens h.** The *Sempervivum globiferum*. [B, 275 (*a*, 24).]—**H.-tree.** See SEMPERVIVUM *arboreum*.—**Little h.** The *Sedum acre*. [A, 505 (*a*, 21).]—**Purple-tipped h.** The *Sempervivum calcareum*. [B, 275 (*a*, 24).]—**Red-leaved h.** The *Sempervivum triste*. [B, 275 (*a*, 24).]—**Russian h.** The *Sempervivum ruthecinum*. [B, 275 (*a*, 24).]—**Sea-h.** An old name for aloes. [B, 275 (*a*, 24).]—**Small h.** The *Sedum acre*. [B, 5 (*a*, 24).]—**Teneriffe h.** The *Sempervivum ciliatum*. [B, 275 (*a*, 24).]—**Tree-h.** The *Sempervivum arboreum*. [B, 275 (*a*, 24).]—**Water-h.** The *Stratiotes aloides*. [A, 505 (*a*, 21).]

HOUSSON (Fr.), n. Us-so^{2}n^{2}. The *Ruscus aculeatus* and the *Ilex aquifolium*. [B, 173 (*a*, 24).]

HOUT, n. In Abyssinia, the cotton-plant. [B, 121 (*a*, 35).]

HOUTTUYNIA (Lat.), **HOUTUYNIA** (Lat.), n's f. Hu^{3}-u^{4}t-tin'i^{2}-a^{3}. From *Houttuyn*, a Dutch physician. 1. Of Thunberg, a genus of the *Piperaceæ*, tribe *Saurureæ*. 2. Of Houttuyn, a genus of the *Irideæ*. The *Houttuynieæ* of Jussieu are a tribe of the *Saurureæ*. [B, 38, 42, 48, 173 (*a*, 24).]—**H. cochinchinensis, H. cordata, H. fœtida.** The *doku-dame* of the Japanese. In Cochin-China the leaves and other parts of the plant are used as a laxative and emmenagogue. [B, 19, 121, 180 (*a*, 24).]—**H. polypara.** Fr., *houttuyne polypare*. A species used for seasoning salads. [B, 173 (*a*, 24).]

HOUX (Fr.), n. Hu. The genus *Ilex*, especially the *Ilex aquifolium*. [B, 19, 173 (*a*, 24).]—**H. apalache, H. apalachin.** The *Ilex vomitoria*. [B, 121, 173 (*a*, 24).]—**H. commun.** The *Ilex aquifolium*. [B, 173 (*a*, 24).]—**H. commun à feuilles épaisses.** The *Ilex crassifolia*. [B, 173 (*a*, 24).]—**H. commun en scie.** The *Ilex serrata*. [B, 173 (*a*, 24).]—**H. commun hérisson.** The *Ilex ferox*. [B, 173 (*a*, 24).]—**H. commun panaché.** The *Ilex variegata*. [B, 173 (*a*, 24).]—**H. dentelé.** The *Ilex obcordata*. [B, 173 (*a*, 24).]—**H. fragon, H. frelon.** The *Ruscus aculeatus*. [B, 121, 173 (*a*, 24).]—**H. opaque.** The *Ilex opaca*. [B, 173 (*a*, 24).]—**H. purgatif.** The *Ilex vomitoria*. [B, 173 (*a*, 24).]—**H. safrané.** The *Ilex crocea*. [B, 173 (*a*, 24).]—**H. vomitif.** The *Ilex vomitoria*. [B, 121, 173 (*a*, 24).]—**Petit h.** The *Ruscus aculeatus*. [B, 173 (*a*, 24).]

HOVE, n. Hov. The *Nepeta glechoma*. [B, 19 (*a*, 24).]

HOVEN, n. Hov'n. In cattle and sheep, tympanites arising from the retention of food in the rumen. [Williams (*a*. 34).]

HOVENIA (Lat.), n. f. Ho-va'ni^{2}-a^{3}. From *Hoven*, Dutch minister to Japan. Fr., *hovénie*. Of Thunberg, a genus of the *Rhamneæ*. [B, 42 (*a*, 24).]—**H. dulcis.** Fr., *hovénie douce*. A species found in Japan, where the sweet, red pulp of the peduncles (called *siku*) is eaten. [B, 19, 173, 180 (*a*, 24).]—**H. inæqualis.** A species growing in the Himalaya Mountains; identified by some with *H. dulcis*. [B, 19, 42, 180 (*a*, 24).]

HOVINGHAM, n. Hu^{3}v'i^{2}n^{2}-ha^{2}m. A place in Yorkshire, England, where there is a gaseous and saline spring. [L, 49 (*a*, 14).]

HOWARDIA (Lat.), n. f. Hu^{6}-u^{4}-a^{3}rd'i^{2}-a^{3}. From *Howard*, an English botanist. Fr., *howardie*. Of Weddell, the genus *Pogonopus*. [B, 38, 42 (*a*, 24).]—**H. febrifuga.** The *Pogonopus febrifugus*. [B, 42 (*a*, 24).]

HOWELLITE, n. Hu^{6}'u^{4}-e^{2}l-it. Potassium chloride, often mixed with potassium and magnesium sulphites, and magnesium chloride, obtained at the mines of Stassfurt, Germany. ["Proc. of the Am. Pharm. Assoc.," xxii (*a*, 14).] Cf. SYLVINE.

HOYA (Lat.), n. f. Hoi'a^{3}. From *Hoy*, an English horticulturist. Fr., *h*. A genus of the *Asclepidaceæ*, tribe *Marsdenieæ*. The *Hoyaceæ* of Don are a subtribe of the *Orthophuramiæ*, and the *Hoyeæ* of Endlicher are a subtribe of the *Pergularieæ*. [B, 19, 42, 170 (*a*, 24).]—**H. alba.** A species having properties like those of *H. coronaria*. [B, 180 (*a*, 24).]—**H. coronaria.** A species found in Malacca, Sumatra, and Borneo. It yields a thick, viscous milk used as a remedy in gonorrhœa, and externally in wounds from the stings of poisonous fish. [B, 180, 212 (*a*, 24).]—**H. diversifolia.** A species growing in Burmah, Malacca, Java, and Amboyna, having the properties of *H. Rumphii*. [B, 180 (*a*, 24).]—**H. elegans.** A species having the appearance and properties of *H. Rumphii*. [B, 180 (*a*, 24).]—**H. lacuna.** The *Dregea volubilis*, var. *lacuna*. [B, 212.]—**H. lutea.** A species found in Amboyna, having the appearance and properties of *H. coronaria*. [B, 180, 214 (*a*, 24).]—**H. opposita.** See *H. Rumphii*.—**H. orbiculata.** See *H. diversifolia*.—**H. pendula.** A species found in the East Indies; emetic and alexipharmac. [B, 172, 212 (*a*, 24).]—**H. planiflora.** See TYLOPHORA *asthmatica*.—**H. Rheedii.** See *H. pendula*.—**H. Rumphii.** A species growing in the Moluccas; used like *H. coronaria*. [B, 180, 212 (*a*, 24).]—**H. velutina.** See *H. coronaria*.—**H. viridiflora.** See DREGEA *volubilis*.—**H. Wightii.** See *H. pendula*.

HUACAMOTL [Mex. Ph.] (Sp.), n. 1. A starch derived from *Manihot aipi*. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.] 2. Of the Mex. Ph., the *Manihot aipi*. [B, 224 (*a*, 14).]

HUANG-LIANG (Chin.), n. Lit., yellow-excellent; rhubarb. [B, 18 (*a*, 24).]

HUANOKINE, n. U-a^{3}n'o-ken. Fr., *huanoquine*. Ger., *Huanokin*. A crystalline alkaloid, $C_{20}H_{12}NO$, or $C_{20}H_{24}N_2O$, obtained from a variety of cinchona collected near Huánuco, probably the *Cinchona nitida*. It is insoluble in water, soluble in alcohol and in ether, and is said to be a powerful febrifuge. [B, 48 (*a*, 14), 93 (*a*, 38); "Proc. of the Am. Pharm. Assoc.," vii (*a*, 14).]

HUARITURU, n. In Peru, the *Valeriana coarctata*. [B, 121 (*a*, 24).]

HUAUZONTLE [Mex. Ph.] (Sp.), n. U-a^{3}-u^{4}-zon'tla. See CHENOPODIUM *bonus Henricus*.

HUAYCAN, n. The *Porliera hygrometrica*. [B, 121 (*a*, 24), 224 (*a*, 14).]

HUB (Ger.), **HUBBAD** (Ger.), n's. Hub, hub'ba^{3}d. A place in the district of the middle Rhine, Baden, where there is a hot gaseous, alkaline, and chalybeate spring. [L, 30, 49, 87 (*a*, 14).]

HUBBARDSTON WELL, n. Hu^{3}b''ba^{3}rd-stu^{3}n-we^{2}l'. A well situated at Hubbardston, Ionia County, Michigan. It contains magnesium and calcium carbonates, iron protoxide, and silica. [A, 363 (*a*, 21).]

HUBERTIA (Lat.), n. f. Hu^{2}-bu^{6}rt'i^{2}-a^{3}. From *Hubert*, a proper name. The genus *Senecio*. [B, 42 (*a*, 24).]

HUBERTSBRUNNEN (Ger.), **HUBERTUSBAD** (Ger.), n's. Hu-be^{2}rts'brun-ne^{3}n, -be^{2}rt'us-ba^{3}d. A place in the province of Saxony, Germany, where there are gaseous and saline springs, bathing and water-cure establishments, and pine-needle baths. [A, 319 (*a*, 21); L, 49 (*a*, 14).]

HUBHÖHE (Ger.), n. Hub'hu^{6}-he^{2}. Lit., height of the lift; of E. Weber, the amount of shortening observed in a loaded muscle when it is caused to contract by an artificial stimulus. [K, 16; Landois (K).]

HUB-UL-KILKIL (Bomb.), n. The stones of a variety of *Prunus cerasus*, brought to Bombay from northern India and Persia. The kernel has a brown skin and a strong prussic-acid flavor. ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14).]

HUB-UL-MISHKA-KE-BINJA (Ar.), n. See ABELMOSCHUS *moschatus*.

HUCKBERRY, n. Hu^{3}k'be^{2}r-ri^{2}. The *Celtis cordata*. [B, 19, 275 (*a*, 24).]

HUCKBLATT (Ger.), n. Huk'bla^{3}t. The *Campanula trachelium*. [B, 48 (*a*, 14).]

HUCKLE, n. Hu^{3}k'l. The hip or a hip-like projection. [L, 56.]

HUCKLEBERRY, n. Hu^{3}k'l'be^{2}r-i^{2}. 1. The genus *Gaylussacia*. 2. The *Vaccinium myrtillus*. [B, 19, 275 (*a*, 24).]—**Bear-h.** The *Gaylussacia ursina*. [B, 215.]—**Black h.** The *Gaylussacia resinosa*. [B, 275 (*a*, 24).]—**Box-h.** The *Gaylussacia brachycera*. [B, 275 (*a*, 24).]—**Dwarf-h.** The *Gaylussacia dumosa*. [B, 275 (*a*, 24).]—**Squaw-h.** The *Vaccinium stamineum*. [B, 275 (*a*, 24).]

HUDIN (Fr.), n. U^{6}-da^{2}n^{2}. The *Ulex autumnalis* and *Ruscus aculeatus*. [B, 173 (*a*, 24).]

HUDUM-BET, n. In India, the *Calamus polygamus*. [B, 121 (*a*, 24).]

HUECHYS (Lat.), n. f. Hwe^{2}k(hue^{2}ch^{2})'i^{2}s(u^{6}s). A genus of coleopterous insects comprising the species *H. sanguinea*. ["Proc. of the Am. Pharm. Assoc.," xxxv (*a*, 39).]—**H. sanguinea.** An insect furnishing a new variety of Chinese can'harides, which appeared in 1887 in the London drug market. ["Proc. of the Am. Pharm. Assoc.," xxxv (*a*, 14).]

HUF (Ger.), n. Huf. See HOOF.—**Gespaltener H.** A cloven hoof. [L, 80.]—**H'eisenförmig.** Horse-shoe-shaped. [L, 31.]—**H'zwängig.** See HOOF-*bound*.

HUFBEINBEUGER (Ger.), n. Huf'bin-boig-e^{2}r. The radio-phalangeus muscle. [A, 314 (L).]—**Dicker H.** See TIBIO-PHALANGEUS.—**Fünfköpfiger H.** See *H*.—**Langer H.** See TIBIO-PHALANGEUS.

HUFBEINSTRECKER (Ger.), n. Huf'bin-stre^{2}k-e^{2}r. The epicondylo-præphalangeus muscle. [Müller (A, 314 [L]).]—**Langer H.** See *H*.

HUFCAP, n. Hu^{3}f'ka^{2}p. The *Triticum repens*. [A, 505 (*a*, 21).]

HUFLATTIG (Ger.), n. Huf'la^{2}t-ti^{2}g. The genus *Tussilago*. [B, 180 (*a*, 35).]—**Bastardh'.** The *Tussilago hybrida*. [L, 30.]—**Gemeiner H.** The *Tussilago farfara*. [B, 180 (*a*, 35).]—**Grosser H.** The *Petasites vulgaris*. [B, 180 (*a*, 35).]—**Weisser H.** The *Tussilago alba*. [L. 80.]

HÜFTBEIN (Ger.), n. Hu^{6}ft'bin. A hip bone, especially the ilium.—**Vorderes H.** The pubic bone. [L, 80.]

HÜFTBLUTADER (Ger.), n. Hu^{6}ft'blut-a^{3}d-e^{2}r. An iliac vein.—**Aeussere H.** The external iliac vein. [L, 115.]—**Gemeinschaftliche H.** The common iliac vein. [L, 115.]—**Umgeschlagene H.** The circumflex iliac vein. [L, 115.]

HÜFTLOCHMUSKEL (Ger.), n. Hu^{6}ft'lo^{2}ch^{2}-musk-e^{2}l. An obturator muscle. [L, 115.]—**Aeusserer H.** See OBTURATOR *externus*.—**Innerer H.** See OBTURATOR *internus*.

HÜFTVERRENKUNG (Ger.), n. Hu^{6}ft'fe^{2}r-re^{2}n^{2}k-un^{2}. Dislocation of the hip. [E.]

HÜFTE (Ger.), n. Hu^{6}ft'e^{2}. See HIP.—**H'ngegend.** The iliac region. [L, 80.]—**H'npfannenschmerz.** See COXALGIA *cotyloidea*. —**H'nschmerz.** See HÜFTWEH.—**H'nstrauch.** The *Rosa canina*. [B, 180 (*a*, 24).]

HÜFTGELENK (Ger.), n. Hu^{6}ft'ge^{2}-le^{2}n^{2}k. The hip joint.—**H'entzündung.** See COXITIS.—**H'pfannenentzündung.** See COXITIS *cotyloidea*.—**H'schmerz.** See COXALGIA.—**H'weh.** See COXALGIA.

HÜFTWEH (Ger.), n. Hu^{6}ft'va. See COXALGIA.

HÜGEL (Ger.), n. Hu^{6}g'e^{2}l. A prominence or tuberosity. [C.] —**Aschgrauer H.** The gray matter of the aqueduct of Sylvius. [I, 3 (K).]—**Doyère'scher H.** See *Motorial nerve* END-PLATE.—**Epidermish', Epithelh', Epithelial-H.** A hill-like mass of flattened epithelial cells surrounding cylindrical cells, and containing the termination of one or more nerves. The bodies are somewhat similar to taste-buds, and are found in the mucous membrane of the mouth of reptiles. [Leydig, "Arch. f. mikr. Anat.," 1872, p. 37 (J).]—**Ganglienh'.** The corpora striata and optic thalami; so-called because they form projections on the floor of the lateral ventricles. [I, 17 (K).]—**Gangliöse H.** [Burdach]. A mass of gan-

glion cells in the gray matter of the brain. [I, 3 (K).]—**Gehirnmarkh'.** See CORPUS *albicans* (2d def.).—**Gelenkh'.** See under GELENK.—**Gesichtsh'.** The optic thalamus. [A, 521.]—**Gestreifter H., Grauer H.** See CORPUS *striatum*.—**H'bewohnend.** See COLLINUS.—**H'chen.** The corpora albicantia. [I, 3 (K).]—**H'ig.** See COLLICOSUS.—**Hinterhauptsh'.** The occipital protuberance. [L, 80.]—**Hirnmarkh'.** See CORPUS *albicans* (2d def.).—**H. am Schambein.** See MONS *Veneris*.—**Innerer gespaltener H.** See PES *hippocampi*.—**Kleiner H.** See COLLICULUS.—**Nervenh'.** See *Motorial nerve* END-PLATE.—**Obere H. des Corpus quadrigeminum.** The anterior bigeminal bodies. [I, 17 (K).]—**Samenh'.** See CAPUT *gallinaginis*.—**Schamh'.** See MONS *Veneris*.—**Sehh'.** See *Optic* THALAMUS.—**Streifenh' (des grossen Gehirns).** See CORPUS *striatum*.—**Vierh'.** See CORPORA *quadrigemina*.—**Vordere H.** The anterior bigeminal bodies. [I, 4.]

HUGONIA (Lat.), n. f. Hu-gon'i^{2}-a^{3}. From *Hugon*, a German physician. Fr., *hugonie*, *hugone*. Of Linnæus, a genus of the *Lineæ*. The *Hugoniaceæ* of Arnott are a group of plants now included under the *Oxalidaceæ*. The *Hugonieæ* (Fr., *hugoniées*) are a tribe of the *Lineæ*. [B, 19, 42 (a, 24).]—**H. mystax.** Fr., *cerisier de Ceylan*. A tree found on the Malabar and Coromandel coasts. The root is used as a tonic, diuretic, and vermifuge, and externally as an antidote in snake-bites. [B, 121, 172, 173, 180 (a, 24).]—**H. serrata.** A species of the Mauritius Island, erroneously identified by Cavanilles with the *H. mystax* of Linnæus. [B, 214, 310 (a, 35).]

HUGUENINIA (Lat.), n. f. U^{6}g-ne'ni^{2}-a^{3}. From *Huguenine*, a Savoyard botanist. Ger., *Hugueninie*. Of Reichenbach, a genus of the *Sisymbrieæ*; of Bentham and Hooker, a section of the genus *Sisymbrium*. [B, 42, 64 (a, 24).]—**H. tanacetifolia.** The *Sisymbrium tanacetifolium*. [B, 64 (a, 24).]

HUGUENOT SPRINGS, n. Hu^{2}'g'not. A place in Powhatan County, Virginia, where there is a sulphurous and a chalybeate spring. [A, 363 (a, 21); a, 14.]

HUHN (Ger.), n. Hun. See GALLINA.—**Hühnerähnlich.** See GALLINACEUS.—**Hühnerauge.** See CLAVUS.—**Hühnerbiss.** 1. The *Stellaria media*. 2. The *Arenaria peploides*. 3. The *Anagallis arvensis*. 4. The *Sagina procumbens*. 5. The *Radiola millegrana*. 6. The *Cucubalus bacciferus*. [B, 48 (a, 14).]—**Hühnerblind.** The *Primula elatior*. [B, 180 (a, 24).]—**Hühnerbrühe.** See CHICKEN-*broth*.—**Hühnerdarm.** See the major list.—**Hühnerschmalz.** See AXUNGIA *gallinæ*.—**Hühnersuppe.** See CHICKEN-*broth*.—**Hühnertod.** The *Lamium amplexicaule* and the *Solanum nigrum*. [B, 48 (a, 14).]—**Hühnertodkraut.** The *Hyoscyamus niger*. [B, 180 (a, 24).]—**Hühnertritt.** See the major list.—**Hühnerwehr.** The *Sedum album*. [B, 180 (a, 24).]—**Hühnerwurzel.** The *Geranium sanguineum*. [B, 180 (a, 24).]—**Hühnerwurzkraut.** The *Tormentilla erecta*. [B, 180 (a, 24).]

HÜHNERDARM (Ger.), n. Hu^{6}n'e^{2}r-da^{3}rm. The genus *Stellaria*, especially the *Stellaria media*. [B, 180 (a, 24).]—**Gelber H.** The *Lysimachia nemorum*. [B, 180 (a, 24).]—**Rauher H.** The *Cerastium viscosum*. [B, 48 (a, 14).]—**Rother H.** The *Anagallis arvensis*. [B, 48, 124 (a, 14).]—**Weisser H.** The *Stellaria media*. [B, 124 (a, 14).]

HÜHNERTRITT (Ger.), n. Hu^{6}n'e^{2}r-tri^{2}t. The genus *Anagallis*. [B, 48 (a, 14).]—**Blauer H.** The *Anagallis cærulea*. [B, 48 (a, 14).]—**Rother H.** The *Anagallis arvensis*. [B, 48 (a, 14).]

HUICHICHILE [Mex. Ph.], n. In Mexico, the *Hoitzia coccinea*. [A, 447 (a, 21).]

HUILE (Fr.), n. Wel. See OIL.—**H. américaine.** Castor-oil. [B, 173 (a, 24).]—**H. ammoniacale.** See *Linimentum* AMMONIÆ.—**H. animale de Dippel.** See *Dippel's animal* OIL.—**H. animale empyreumatique.** See OLEUM *pyro-animale*.—**H. bézoardique de Wedel.** See OLEUM *bezoardicum Wedelii*.—**H. blanche.** The oil of the seeds of the *Papaver niger*. [B, 173 (a, 24).]—**H. camphrée** [Fr. Cod.]. See *Linimentum* CAMPHORÆ.—**H. carminative.** See OLEUM *carminativum*.—**H. chlorée.** A preparation made by passing a current of chlorine through olive-oil and washing the latter with cold water after two or three days. [B, 119 (a, 38).]—**H. de Bakouck.** Liquid vaseline. [Dujardin-Beaumetz, "Progr. méd.," Feb. 12, 1887; "N. Y. Med. Jour.," Mar. 5, 1887, p. 280.]—**H. de bois.** Candle-nut oil. [B, 173 (a, 24).]—**H. de Brésil.** Balsam of copaiba. [B, 121 (a, 35).]—**H. de Herva.** Castor-oil. [B, 88 (a, 39).]—**H. de Macassar.** See BORBORI.—**H. de médicinier.** Oil expressed from the Barbadoes-nut. [B, 46 (a, 39).]—**H. d'enfer.** An inferior kind of olive-oil. [B, 38 (a, 14).]—**H. de paume Dieu.** Castor-oil. [B, 173 (a, 24).]—**H. de Sainte-Barbare.** Of Nicolas Mirepsus, petroleum. [B, 88 (a, 39).]—**H. des sept fleurs.** See OLEUM *septem florum*.—**H. de terre.** The oil of the seeds of *Cucurbita pepo*. [B, 173 (a, 24).]—**H. de Touloucouna.** See under CARAPA *guineensis*.—**H. de Vénus.** Oil of carrot-flowers. [B, 173 (a, 24).]—**H. douce.** Olive-oil. [a, 24.]—**H. empyreumatique.** See *Dippel's animal* OIL.—**H. essentielle.** An essential oil. [a, 24.]—**H. essentielle camphrée.** See CAMPHOLÉULE.—**H. essentielle cantharidée.** A preparation consisting of 1 part of cantharides treated with 8 parts of oil of turpentine for a fortnight, then strained and filtered. [B, 119 (a, 38).] Cf. *Linimentum* CANTHARIDIS.—**H. éthérée.** See OLEUM *æthereum*.—**H. fermentée.** An inferior variety of olive-oil obtained from fruit which has undergone partial decomposition. [B, 18 (a, 24).]—**H's fixes.** See *Fixed* OILS.—**H. fossile éthérée.** Petroleum. [a, 38.]—**H. grasse camphrée.** See *Linimentum* CAMPHORÆ.—**H's grasses.** See *Fixed* OILS.—**H. iodée.** A preparation made by dissolving 5 parts of iodine in 1,000 of oil of sweet almonds, and warming in the water-bath until the solution is colored by the iodine. [L, 49 (a, 38).]—**H. iodo-phosphorée.** A preparation consisting of 5 parts of iodine, $\frac{1}{10}$ part of phorphorus, and 1,000 parts of oil of almonds. [L, 49 (a, 38).]—**H. liquide.** Liquidambar. [B, 121 (a, 35).]—**H's médicinales.** Official solutions of one or more substances in a fixed oil, generally olive-oil. [B, 46 (a, 39).]—**H. minérale.** Refined petroleum. [B.]—**H. narcotique.** See BALSAMUM *tranquillans*.—**H. omphacine.** Oil from unripe olives. [B, 121 (a, 35).]—**H. parégorique.** A preparation consisting of 15 grammes of oil of hyoscyamus-seeds, 7 grammes of petroleum oil, and 10 drops each of oil of juniper and oil of amber. [B, 119 (a, 38).]—**H. pétrosolaire.** Refined petroleum. [B.]—**H. phosphorée** [Fr. Cod.]. See OLEUM *phosphoratum*.—**H. phosphorée aromatique.** A mixture of 30 parts of phosphorus and 500 of olive-oil, flavored with oil of bergamot. [B, 119 (a, 38).]—**H. phosphorée au centième** [Fr. Cod.]. H. phosphorée; so called because it contains one per cent. of phosphorus. [B.]—**H. phosphorée au millième** [Fr. Cod.]. H. phosphorée diluted with 9 parts of sweet-almond oil, so as to afford a preparation containing 1 part of phosphorus in a thousand. [B.]—**H. phosphorée camphrée.** A preparation made by warming from $\frac{3}{5}$ to $\frac{4}{5}$ of a gramme of phosphorus and 30 grammes of oil of almonds in the water-bath, and adding from 1$\frac{1}{4}$ to 2$\frac{1}{4}$ grammes of camphor. [B, 119 (a, 38).]—**H. purgative.** See OLEUM *purgans*.—**H. pyro-animale depurée, H. pyrogénée.** See *Dippel's animal* OIL.—**H. rosat.** See *H. de* ROSE *pâle*.—**H. sainte, H. Sainte-Catherine.** Naphtha. [B, 88 (a, 39).]—**H. tournante.** Ger., *Tournantöl*. The most inferior variety of olive-oil, obtained from the residue left after the better varieties have been removed by expression. [B, 18 (a, 24).]—**H. verte.** See BALSAMUM *viride Metensium*.—**H. vierge.** Virgin oil. [a, 38.] See OLIVE-*oil*.—**Marc d'h.** See AMURCA.

HUILEUX (Fr.), adj. We-lu^{5}. See OILY.

HUIÑAPU (Sp.), n. Hwen-ya^{3}'pu. In South America, germinated maize, used for making a fermented beverage called *chicha* by the Indians. [a, 14.]

HUINAR [Mex. Ph.] (Sp.), n. Wen-a^{3}r'. The *Malva scoparia*. [A, 447 (a, 21).]

HUINGAN, n. A Chilian drug said to come from the *Duvaua dependens*. [B, 270 (a, 38).]

HUIQUILITE (Sp.), n. We-ke-le'ta. In Mexico, the *Indigofera anil* and *Indigofera tinctoria*. [B, 121, 127, 224 (a, 14).]

HUISACHE (Sp.), n. We-sa^{3}'cha. 1. The *Acacia farnesiana*. 2. In Mexico, the *Acacia albicans*. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14); B, 1.]

HUIT-DE-CHIFFRE (Fr.), n. Wet-d'-she-fr'. See *Figure-of-eight* BANDAGE.

HUITLACOCHE [Mex. Ph.], n. The *Uredo maidis*. [A, 447 (a, 21).]

HUÎTRE (Fr.), n. We-tr'. The oyster. [a, 21.]—**Coquilles d'h's, Écaille d'h.** Oyster-shells, used in pharmacy.—**Écaille d'h's préparées.** See TESTA *præparata*.—**H's végétales.** The fruit of *Jacaranda mimosæfolia*. [B, 121 (a, 35).]

HULABAHA (Ar.), n. The *Trigonella fœnugræcum*. [A, 479 (a, 21).]

HULAHULA (Mah.), n. See CLEOME *viscosa*.

HULDA (Hind.), n. The *Terminalia chebula*. [B, 172 (a, 24).]

HULDIE (Beng., Hind.), n. The *Curcuma longa*. [B, 121, 172 (a, 24).]

HULDI-LUNKA-MURICH (Beng.), n. The *Capsicum frutescens*. [B, 172 (a, 24).]

HULFERE, n. Hu^{3}l'fer. The *Ilex aquifolium*. [A, 505 (a, 21).]

HÜLFSGURT (Ger.), n. Hu^{6}lfs'gurt. A sling to be attached to an obstetrical forceps and to the operator's shoulder to increase the force of the traction.

HÜLFSMITTEL (Ger.), n. Hu^{6}lfs'mi^{2}t-te^{2}l. An adjuvant.

HULL, n. Hu^{3}l. A.-S., *hule*. 1. The outer coat of a seed or other structure. 2. The *Ilex aquifolium*. [A, 505 (a, 21).]

HÜLLBLATT (Ger.), n. Hu^{6}l'bla^{3}t. A leaf of the involucre. [B, 123 (a, 24).]

HÜLLCHEN (Ger.), n. Hu^{6}l'ch^{2}e^{2}n. See INVOLUCEL.

HÜLLE (Ger.), n. Hu^{6}l'le^{2}. 1. A cover, a covering. 2. The volva of a mushroom. [B, 491.]—**Amniosh'.** The ammonic membrane. ["Arch. Anat. Phys.," 1861, p. 280 (a, 39).]—**Dotterh'.** The vitelline membrane. ["Arch. Anat. Phys.," 1848, p. 558 (a, 39).]—**Eierstocksh'n.** The membranes formed around eggs during their passage through the oviduct. ["Arch. f. Anat. u. Phys.," 1856 (a, 39).]—**Eih'.** See the major list.—**Eileiterh'.** See *Oviduct* MEMBRANE.—**Gallerth'.** The gelatinous outer envelope of the ova of starfishes. ["Quar. Jour. of Mic. Sci.," 1876, p. 153 (J).]—**Gehirnh'n.** The meninges of the brain. [A. 521.]—**Gliah'.** A layer of neuroglia on the surface of the myel next the pia. It is especially marked on the dorsal aspect. [J, 124, 140.]—**Haarh'n.** The coverings of a hair in its follicle. ["Arch. Anat. Phys.," 1846, p. 30 (a, 39).]—**Hirnh'n.** See *Gehirnh'n*.—**H'n der Leibesfrucht.** See FŒTAL *envelopes*.—**H'n des Centralorgans, H'n des Gehirns.** See *Gehirnh'n*.—**H. des Körpers.** See INTEGUMENT.—**H'n des Rückenmarks.** See *Spinal* MENINGES.—**H'nlos.** Naked, devoid of a cell membrane. [J.]—**Nervenh'.** See EPINEURIUM and PERINEURIUM.—**Seröse H.** A serous envelope; of von Baer, the outer layer of the amnion after it has become a complete sac.—**Spermah'n.** In the *Campanularia*, the envelope which holds the spermatozooids. [a, 39.]—**Zellfaserh'.** A connective-tissue envelope. ["Arch. Anat. Phys.," 1844, p. 257 (J).]

HULLED, adj. Hu^{3}ld. See DECORTICATED.

HÜLSE (Ger.), n. Hu^{6}lz'e^{2}. 1. A legume. 2. See ILEX. In this sense also in the pl., *H'n*. [B, 123 (a, 24).]—**Capillarh'.** See *Capillary* SHEATH.—**Gemeine H'n.** The *Ilex aquifolium*. [B.]—**Gliederh'.** A loment. [L, 80.]—**H'busch.** The *Ilex aquifolium*. [B, 180 (a, 24).]—**H'nartig.** Leguminous. [B, 123 (a, 24).]—**H'nbaum.** The *Hymenæa courbaril*. [L, 80.]—**H'ndorn.** The *Ilex aquifolium*. [B, 180 (a, 24).]—**H'nfrüchte, H'ngewächse.** The

Leguminosæ. [L, 80; B, 180 (a, 24).]—**H'ntragend.** Leguminous. [B, 123 (a, 24).]—**H'nwurm.** See the major list.

HÜLSENALGE (Ger.), n. Hu^{6}lz'e^{2}n-a^{3}l-ge^2. The genus *Rhodomela.* [B, 180 (a, 24).]—**Rothbraune H.** The *Rhodomela subfusca.* [B, 180 (a, 24).]—**Tannenartige H.** The *Rhodomela pinastroides.* [B, 180 (a, 24).]

HÜLSENWURM (Ger.), n. Hu^{6}lz'e^{2}n-vurm. See Cysticercus *cellulosæ* and Echinococcus.—**Acephalocystischer H.** See *Acephalocystic* echinococcus.—**Endogenischer H.** See Echinococcus *endogenus.*—**Skolexerzeugender H.** See Echinococcus *scoleciparieus.*—**Zellgewebs-Blasenschwanz-H.** See Cysticercus *cellulosæ.*

HÜLSKRAPPENKRAUT (Ger.), n. Hu^{6}lz'kra^{3}p-pe^{2}n-kra^3-u^{4}t. The leaves of *Ilex aquifolium.* [B, 180 (a, 24).]

HULST (Ger.), n. Hulst. The *Ilex aquifolium.* [B, 19 (a, 24).]

HULUD (Malay), n. The genus *Curcuma.* [B, 121 (a, 35).]

HULUDEE (Beng.), n. The *Curcuma longa.* [B, 172 (a, 24).]

HULVER, n. Hu^{3}l'vu^{6}r. The *Ilex aquifolium.* [B, 19 (a, 24).]—**Knee-h.** The *Ruscus aculeatus.* [B, 12 (a, 24).]—**Sea-h.** The *Eryngium maritimum.* [B, 19 (a, 24).]

HULWORT, n. Hu^{3}l'wu^{5}rt. The *Teucrium polium.* [A, 505 (a, 21).]

HUM, n. Hu^{3}m. Fr., *bourdonnement.* Ger., *Hummen.* A soft, monotonous sound.—**Amphoric h.** A sound like that made by blowing into a large empty bottle, heard in auscultation over a cavity in the lung, or over the cardiac region when the stomach is distended with gas. [a, 40.]—**Venous h.** A h. heard on auscultation over a vein.

HUMAN, adj. Hu^2'm'n. Lat., *humanus* (from *homo*, a man). Fr., *humain.* Ger., *menschlich.* It., *umano.* Sp., *humano.* Pertaining to man. [L, 30, 41, 50 (a, 14).]

HUMARA (Ar.), n. The pod of *Tamarindus indica.* [A, 479 (a, 21).]

HUMATE, n. Hu^2'mat. From *humus*, the earth. A salt of humic acid. [B, 2.]

HUMBLE-PLANT, n. Hu^{3}mb'l'pla^{3}nt. The *Mimosa pudica.* [B, 19, 275 (a, 24).]

HUMBOLDTIN, n. Hu^{3}m'bo^{3}lt-i^{2}n. From *Humboldt*, a German scientist. See Iron *oxalate.*

HUMBOLDTS-AU (Ger.), n. Hum'bo^{3}lts-a^3-u^4. A place in Prussian Silesia where there are pine-needle baths. [A, 319 (a, 21).]

HUMECTANT, adj. Hu^{2}m-e^{2}k't'nt. Lat., *humectans* (from *humectare*, to moisten). Fr., *h.* Ger., *anfruchtend.* Serving to impart moisture. [L, 41 (a, 14).]

HUMECTATION, n. Hu^2-me^{2}k-ta'shu^{3}n. Lat., *humectatio.* Fr., *h.* Ger., *Anfeuchtung.* A moistening.

HUMERA (Sp.), n. U-ma'ra^3. A place in the province of Madrid, Spain, where there is a gaseous and ferruginous spring containing magnesium carbonate and sulphate. [L, 49 (a, 14).]

HUMERAL, adj. Hu^{2}m'e^2-r'l. Lat., *humeralis* (from *humerus* [*q. v.*]). Fr., *huméral.* Of or pertaining to the humerus, or to the upper arm. [C; L, 343.]

HUMÉRAL (Fr.), adj. U^6-ma-ra^{3}l. See Humeral; as a n., of Cuvier, the coracoid bone (1st def.) in fishes. [L, 14.]

HUMERALIFER, HUMERALIFERUS (Lat.), adj's. Hu^2-(hu^4)-me^{2}r-a^{3}l(a^{3}l)'if-u^{6}r(e^{2}r), -a^{3}l(a^{3}l)-i^{2}f'e^{2}r-u^{3}s(u^{4}s). Fr., *huméralifère.* From *humerus* (*q. v.*), and *ferre*, to bear. Furnished with a cape or cloak (as in the *Jacchus humeralifer*). [L, 180 (a, 39).]

HUMERALIS (Lat.), adj. Hu^2(hu^4)-me^{2}r-a(a^3)'li^{2}s. See Humeral; as a n., see Deltoid.—**H. externus.** See Humero-radialis.

HUMEREN, adj. Hu^2'me^{2}r-e^{2}n. See Humeral.

HUMERIUS (Lat.), adj. Hu^2(hu^4)-me(me^2)'ri^2-u^{3}s(u^{4}s). See Humeral.

HUMERO-ABDOMINALIS (Lat.), adj. Hu^2(hu)''me^{2}r-o(o^3)-a^{2}b(a^{3}b)-do^{2}m-i^{2}n-a(a^3)'li^{2}s. For deriv., see Humerus and Abdomen. Pertaining to the humerus and to the abdomen; as a n., the costal part of the pectoralis major muscle in batrachians. [L, 229 (a, 29).]

HUMERO-BICIPITAL, adj. Hu^{2}m''e^{2}r-o-bi-si^{2}p'i^2-t'l. Pertaining to the humerus and to the biceps flexor cubiti.

HUMERO-CORONARIUS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o(o^3)-ko^{2}r-on-a(a^3)'ri^2-u^{3}s(u^{4}s). From *humerus* (*q. v.*), and *corona*, a crown. See Epitrochleo-phalangeus.

HUMERO-CUBITALIS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o(o^3)-ku^3(ku)-bi^{2}t-a(a^3)'li^{2}s. From *humerus* (*q. v.*), and *cubitus*, the elbow. Fr., *huméro-cubital* [Chaussier]. Pertaining to the humerus and to the forearm; as a n., the brachialis anticus. [A, 299 (L).]—**H.-c. obliquus.** Fr., *huméro-cubital oblique.* See Humero-radialis.

HUMERO-METACARPAL, adj. Hu^{2}m''e^{2}r-o-me^{2}t-a^3-ka^{3}r'-p'l. From *humerus* (*q. v.*), and μετακάρπιον, the wrist. Of or pertaining to the humerus and the metacarpus. [L.]

HUMERO-METACARPEUS (Lat.), n. m. Hu^2(hu^4)'me^{2}r-o-(o^3)-me^{2}t-a^3-ka^{3}rp'e^2-u^{3}s(u^{4}s). In the horse, a muscle representing the extensores carpi radialis longus et brevis. [L, 13.]—**H.-m. externus.** See Epicondylo-supercarpeus.—**H.-m. internus.** See Epitrochleo-supercarpeus.

HUMERO-OLECRANAL, adj. Hu^{2}m''e^{2}r-o-o-le^{2}k'ra^2-n'l. From *humerus* (*q. v.*), and ὠλέκρανον, the olecranon. Fr., *huméro-olécrânien.* Pertaining to the humerus and to the olecranon. [A, 385.]

HUMÉRO-OLÉCRÂNIEN (Fr.), n. U^6-ma-ro-o-la-kra^3-ne-a^{3}n^2. See Humero-olecranius.—**Petit h.-o.** See Humero-olecranius *minor.*

HUMERO-OLECRANIUS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o(o^3)-o^{2}l(ol)-e^2-kran(kra^{3}n)'i^2-u^{3}s(u^{4}s). Fr., *huméro-olécrânien.* Connected with the humerus and the olecranon. [L, 13.]—**H.-o. externus.** Fr., *huméro-olécrânien externe, court extenseur de l'avant-bras.* Ger., *äusserer Armbeinellenbogenmuskel, äusserer* (oder *mittlerer*) *Strecker des Vorarmes.* The external portion or caput medium of the extensor triceps brachii muscle of lower mammals, the analogue of the external head of the extensor triceps brachii of man. [L.]—**H.-o. internus.** Fr., *huméro-olécrânien interne, moyen extenseur de l'avant-bras.* Ger., *innerer Armbeinellenbogenmuskel kurzer* (oder *innerer*) *Strecker des Vorarmes.* The internal head or caput parvum of the triceps extensor brachii muscle of lower mammals, analogous to the internal head of the triceps extensor brachii of man. [L.]—**H.-o. minor.** Fr., *petit huméro-olécrânien, petit extenseur de l'avant-bras, anconé.* Ger., *kleiner Armbeinellenbogenmuskel, kleiner* (oder *hinterer*, oder *kurzer äusserer*) *Strecker des Vorarmes, tiefer* (oder *kleiner*) *Kopfknorrenmuskel.* 1. The analogue of the anconæus muscle of man, found in most of the lower mammals. [L.] 2. See Anconæus (3d def.).

HUMERO-PHALANGEUS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o-(o^3)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *humerus* (*q. v.*), and φάλαγξ (see Phalanx). In the horse, the analogue of the flexor perforatus of man. [L, 13.]

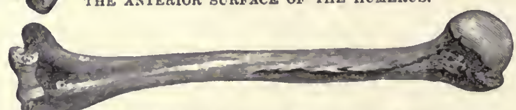
HUMERO-PRÆPHALANGEUS (Lat.), n. m. Hu^2(hu^4)''-me^{2}r-o(o^3)-pre(pra^3-e^2)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *humerus* (*q. v.*), *præ*, before, and φάλαγξ (see Phalanx). See Epicondylo-præphalangeus.

HUMERO-RADIAL, adj. Hu^{2}m''e^{2}r-o-ra'di^2-a^{3}l. Lat., *humero-radialis* (from *humerus* [*q. v.*], and *radius* [*q. v.*]). Fr., *huméro-radial.* Ger., *humeroradial, Armvorarmbein-.* Pertaining to the humerus and to the radius; as a n. (Fr., *huméro-radial, court fléchisseur de l'avant-bras, brachial antérieur*; Ger., *Armvorarmbeinmuskel, kurzer Beuger des Vorarms, gewundener Beuger*), the analogue of the brachialis anticus muscle of man, found in the lower animals. [L.]

HUMERO-RADIO-PHALANGEUS (Lat.), adj. Hu^2(hu^4)''-me^{2}r-o(o^3)-ra(ra^3)-di^2-o(o^3)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). For deriv., see Humerus, Radius, and Phalanx. Connected with the humerus, the radius, and the phalanges; as a n., a muscle in the horse which is the analogue of the flexor perforans in man. [L, 13.]

HUMERO-SUPRACARPEUS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o-(o^3)-su^2(su)-pra^3-ka^{3}rp'e^2-u^{3}s(u^{4}s). From *humerus*, the upper bone of the arm, *supra*, above, and καρπός, the wrist. A muscle connected with the humerus and the carpus. [L.]—**H.-externus.** See Epicondylo-supracarpeus.

HUMERO-SUPRARADIALIS (Lat.), n. m. Hu^2(hu^4)''me^{2}r-o(o^3)-su^2(su)-pra^3-ra(ra^3)-di^2-a(a^3)'li^{2}s. From *humerus* (*q. v.*), *supra*, above, and *radius* (*q. v.*). See Supinator *longus.*



HUMÉRO-TRANSVERSAIRE (Fr.), n. U^6-ma-ro-tra^{3}n^{2}s-ve^{2}r-sa^{2}r. See Cervico-costo-humeralis.

HUMERO-ULNAR, adj. Hu^2''me^{2}r-o-u^{3}l'na^{3}r. For deriv., see Humerus and Ulna. Pertaining to the humerus and the ulna. [L.]

HUMERUS (Lat.), n. m. Hu^2(hu^4)'me^{2}r-u^{3}s(u^{4}s). More properly written *umerus.* Gr., ὦμος. Fr., *humérus.* Ger., *Oberarmbein* (1st def.), *Armknochen* (1st def.). It., *omero.* Sp., *húmero.* Syn.: *os brachii* (1st def.), *os humeri* (1st def.). 1. (Obs.) the shoulder. [A, 325.] 2. The bone of the upper arm, articulating with the scapula above and the ulna and radius below. Its

THE ANTERIOR SURFACE OF THE HUMERUS.

THE POSTERIOR SURFACE OF THE HUMERUS.

upper part embraces the surgical neck, the anatomical neck, the greater and lesser tuberosities, and the head of the bone; below, it terminates in the outer and inner condyles and the trochlea. [A, 70.] 3. In ornithology, the analogue of the bone described in the 2d def.; sometimes also "the whole upper arm, from shoulder to elbow." [L, 343.]—**Humeri alati.** The shoulder-blades of consumptives, from their resemblance to wings. [L, 30.]

HUMEUR (Fr.), n. U^6-mu^{6}r. See Humor and Temperament.—**H. albugineux.** See Humor *albugineus oculi* (2d def.).—**H. aqueuse.** See *Aqueous* humor.—**H's catholiques.** In ancient medicine, humors (2d def.) supposed to pervade the entire body. [L, 41.]—**H's constituantes.** The blood, lymph, and chyle. [L, 49 (a, 14).]—**H. de Cotugno.** See Perilymph.—**H. de Morgagni.** See Liquor *Morgagnii.*—**H. de Scarpa.** See Endolymph.—**H's excrémentitielles.** Excrementitious secretions. [L, 49 (a, 14).]—**H's excrémento-récrémentitielles.** Secretions, such as the buccal, nasal, and vesical mucus, saliva, tears, gastric juice, bile, etc., that are partly excrementitious and partly designed to play a further part in the organism. [L, 49 (a, 14).] Cf. *H's récrémentitielles.*—**H's froides.** Lit., cold humors. [D, 74.] See Scrofula.—**H. hyaloïde.** See Corpus *vitreum.*—**H's produites.**

The secretions; they comprise the *h's récrémentitielles* and the *h's excrémento-récrémentitielles.* [L, 49 (α, 14).]—**H's récrémentitielles.** The cerebro-spinal, synovial, and spermatic fluids, and the milk. [L, 49 (α, 14).]—**H's sécrétées.** See *H's produites.*—**H. vitrée.** See Corpus *vitreum.*

HUMIC ACID, n. Hu2m'i2k. From *humus* (*q. v.*). Fr., *acide humique.* Ger., *Huminsäure, Geïnsäure, Humussäure.* Syn.: *ulmic acid.* An amorphous colloidal substance, $C_{60}H_{54}O_{27}$, contained in humus. It has an acid reaction, and contains 8 atoms of hydrogen, replaceable by basic radicles. Its presence in the soil seems to facilitate the absorption of nitrogen from the air. [B, 2.]

HUMID, adj. Hu2m'i2d. Lat., *humidus* (from *humere*, to be moist). Fr., *humide.* Ger., *feucht.* Moist, damp, wet. [A, 312 (α, 21).]

HUMIDITY, n. Hu2-mi2d'i2-ti2. From *humidus*, moist. Fr., *humidité.* Ger., *Feuchtigkeit.* It., *umidità.* Sp., *humedad.* The state of being humid.—**Absolute h.** Ger., *absolute Feuchtigkeit.* As applied to the atmosphere, the actual weight of vapor of water in a given bulk; usually reckoned in grains to the cubic foot. [C. Denison, "N. Y. Med. Jour.," Nov. 28, 1885, p. 600.]—**Relative h.** Ger., *relative Feuchtigkeit.* As applied to the atmosphere, the proportion of its actual amount of moisture to what it would contain if saturated; saturation being 100, the relative h. is expressed in hundredths. [C. Denison, *l. c.*]

HUMIDUM (Lat.), n. n. Hu2(hu)'mi2d-u3m(u4m). From *humere*, to be moist. A humor.—**H. nativum articulorum.** The synovial fluid. [α, 40.]—**H. primigenium, H. radicale.** A name given by the humoralists to the fluid which was supposed to give consistence and flexibility to different parts of the body. [α, 40.]—**H. seminale.** The seminal fluid. [α, 40.]—**H. vitreum.** See Corpus *vitreum.*

HUMIFORME (Fr.), adj. U6-me-fo3rm. Resembling humus or humic acid. [A, 385.]

HUMIFUSE, adj. Hu2'mi2-fu2s. Lat., *humifusus* (from *humus*, the ground, and *fundere*, to pour out. Fr., *h.* Spread over the ground (said of plants). [B, 19 (α, 24).]

HUMILIS (Lat.), adj. Hu2(hu4)'mi2l-i2s. From *humus*, the ground. 1. Of plants, low in stature as compared with others of the same genus. [B, 19 (α, 24).] 2. As a n., an old term for the rectus inferior oculi muscle, because its action gives the impression of humility. [F.]

HUMILUS (Lat.), n. m. Hu3(hu4)'mi2l-u3s(u4s). See Humulus.

HUMIN, n. Hu2'mi2n. See Humic acid.—**H'säure** (Ger.). See Humic acid.

HUMIRI (Lat.), **HUMIRIA** (Lat.), **HUMIRIUM** (Lat.), n's n., f., and n. Hu2(hu)'mi2r-i(e), hu2(hu)-mi2r'i2-a3, -u3m(u4m). Fr., *humirie.* Ger., *Humiribaum.* Of Aublet, a genus of the *Humiriaceæ* (Fr., *humiriacées;* Ger., *Humiriaceen*), which are a natural order of balsamiferous, exstipulate trees, or shrubs, including *Vantanea, H.*, and *Sacoglottis.* The *Humirieæ* of Reichenbach are the same. [B, 12, 42 (α, 24).]—**Gujanischer Humiribaum** (Ger.). See *Humiria balsamifera.*—**Humiri balsam.** See under *Humiria floribunda.*—**Humiria balsamifera.** Ger., *gujanischer Humiribaum.* A tree from 30 to 40 feet high, growing in Guiana, and yielding, when the bark is incised, a reddish juice which concretes and resembles storax. It is burned as a perfume, and is used internally as a stimulating expectorant in rheumatism and in tapeworm, and externally as an ingredient in salves and ointments. [B, 12, 180, 185 (α, 24).]—**Humiria floribunda.** Ger., *reichblüthiger Humiribaum.* A smaller species, 20 to 40 feet high, growing in Brazil, where its balsam is called *umire*, and is used like copaiba in gonorrhœa and diarrhœa. The bark furnishes a perfume. [B, 12, 180, 185 (α, 24); "Am. Jour. of Pharm.," July, 1888, p. 33 (α, 24).]—**Humiria gabonensis.** A species (formerly regarded by Baillon as constituting a distinct genus) called *djouga* in Gaboon, and having a drupaceous fruit with a very hard stone, the latter full of lacunæ filled with a balsamic resin. [B, 121.]—**Reichblutiger Humiribaum** (Ger.). See *Humiria floribunda.*

HUMISTRATOUS, adj. Hu2-mi2st'ra2t-u3s. From *humus*, the ground, and *sternere*, to spread out. See Humifuse.

HUMIVAGUE (Fr.), adj. U6-me-va3g. From *humus*, the ground, and *vagari*, to wander. In zoology, crawling, creeping. [A, 385.]

HUMLY, n. Hu3m'li2. See Conium *maculatum.*

HUMMATU (Malay), n. The *Datura alba* and *Datura metel.* [B, 121, 172 (α, 24).]

HUMMER (Ger.), n. Hum'me2r. The genus *Homarus.* [A, 528.]

HUMMING, adj. and n. Hu3m'i2n2. 1. (Adj.) producing or having the quality of a hum. 2. (N) see Hum.

HUMOPIC ACID, n. Hu2m-op'i2k. For deriv., see Humus and Opium. Fr., *acide humopique.* An acid, $C_{22}H_{20}O_7$, formed when narcotine is heated to 220° C.; occurring as a dark-brown, amorphous mass, insoluble in water and in weak acids, soluble in alkaline solutions. [B, 93 (α, 38).]

HUMOR (Lat.), n. m. Hu2(hu)'mo2r. Gen., *-or'is.* Fr., *humeur.* Ger., *Feuchtigkeit, Saft.* It., *umore.* Sp., *h.* 1. Any fluid of the body. 2. Of the old writers, a fluid supposed to be present in the body which by its excess gave the type to a certain disease. According to their ideas there were four h's, yellow and black bile, blood, and phlegm. [K. 3.] 3. In popular language, a chronic skin disease attributed to disorder of the blood.—**Aqueous h.** Lat., *h., aquosus.* Fr., *humeur aqueuse.* Ger., *Kammerwasser.* The fluid which fills the anterior chamber, between the cornea anteriorly and the lens and suspensory ligament posteriorly; in weight, 5 or 6 grains; specific gravity, 1·0003; coefficient of refraction, 1·3366. It contains albumin, sodium chloride, and calcium phosphate in small quantities. [F.]—**Cardinal h's.** The blood, mucus, bile, and black bile, constituting the h's of the ancients. [α, 40.]—**Catholic h's.** Those h's common to all parts of the body, *e. g.*, the blood and lymph. [α, 40.]—**Cold h's.** Fr., *humeurs froides.* See Scrofula.—**Constituent h's.** See *H. alimentarius.*—**Corroding h.** See Atrabilis.—**Crystalline h.** See *Crystalline* lens.—**Dartrous h.** Fr., *humeur dartreuse.* A h. supposed to give rise to dartrous diseases or to herpetism. [G.]—**Glacial h.** See *H. glacialis.*—**H. albugineus (oculi), H. albuginosus.** Fr., *humeur albugineux* (2d def.). 1. Of James, the aqueous h. 2. Of Paré, the vitreous h. [B, 52.]—**H. albumineus.** See *Aqueous h.*—**H. alimentarius.** Those fluids which build up or produce the tissues of the human body, *e. g.*, the blood, chyle, or lymph. [α, 40.]—**H. amnii.** See *Liquor* amnii.—**H. aqueus, H. aquosus.** See *Aqueous h.*—**H. articularis.** See Synovia.—**H. ceruminosus.** The cerumen of the ear. [α, 40.]—**H. Cotugnii.** See Perilymph.—**H. crystallinus.** Ger., *crystallische Feuchtigkeit.* See *Crystalline* lens.—**H. Evagaidos.** See *Aqueous h.*—**H. genitalis.** The semen. [J.]—**H. glacialis.** 1. See *H. crystallinus.* 2. See *Aqueous h.*—**H. glarealis** [Van Helmont]. See Synovia.—**H. hyalinus, H. hyaloides.** See Corpus *vitreum.*—**Humores in secundis.** The liquor amnii. [L, 135 (α, 39).]—**Humores inutiles.** Ger., *unnützliche Feuchtigkeiten.* The purely excremental fluids of the body, such as the urine, the moisture of expiration, insensible perspiration, and the secretions of the large intestine. [α, 40.]—**H. lacrimalis.** The lacrymal secretion. [F.]—**H. lacteus.** See Milk.—**H. Meibomii.** The secretion of the Meibomian glands. [α, 29.]—**H. melancholicus, H. mercurialis.** A fluid supposed by the humoralists to exist in the blood and to be the cause of melancholia. [α, 40.]—**H. morgagnianus, H. Morgagnii.** See Liquor *Morgagnii.*—**H. mucilaginosus.** Ger., *mucilaginöse Feuchtigkeit.* Synovia. [J.]—**H. of Cotugno.** See Perilymph.—**H. of Morgagni.** See Liquor *Morgagnii.*—**H. of Scarpa.** See Endolymph.—**H's of the eye.** Lat., *humores oculares.* See *Aqueous h.*, Corpus *vitreum*, and *Crystalline* lens.—**Humores oleosi.** Ger., *ölichte Feuchtigkeiten.* The secretions of the human body having fatty constituents. [α, 40.]—**H. ovatus, H. oviformis.** An old term for the aqueous h. [F.]—**H. pericardii.** The normal pericardial fluid. [α, 40.]—**H. purulentus.** See Pus.—**H. Scarpæ.** See Endolymph.—**H. seminalis.** See *H. genitalis.*—**Humores utiles.** Ger., *nützliche Feuchtigkeiten.* The constituent and recrementitial h's, embracing in the latter class the serous and mucous secretions, the bile, the pancreatic and intestinal juices, etc. [α, 40.]—**H. venereus.** See *H. genitalis.*—**H. vitreus, Hyaloid h.** See Corpus *vitreum.*—**Milky h.** Of Wharton and Haller, the uterine milk (*q. v.*).—**Ocular h's.** See *H's of the eye.*—**Secreted h.** See Secretion.—**Vitreous h.** See Corpus *vitreum.*—**Vitreous h. of the ear.** Fr., *vitrine auditive.* Ger., *Glaskörper des Ohres.* See Endolymph.

HUMORAL, adj. Hu2'mo2-r'l. Lat., *humoralis* (from *humor*, a fluid). Fr., *h.* Ger., *h., humoralisch.* Of Harvey, pertaining to or proceeding from the humors. [D, 20.]

HUMORALISM, n. Hu2'mo2-r'l-i2z'm. See *Humoral* pathology.

HUMORALIST, n. Hu2'mo2-r'l-i2st. Fr., *humoraliste.* Ger., *Humoralpatholog.* A follower of or believer in the humoral pathology. [D, 3.]

HUMORAL-PATHOLOGISCH (Ger.), adj. Hu-mo-ra3l'pa3t-o-log"i2sh. Pertaining to humoral pathology. [D.]

HUMORARIUS (Lat.), adj. Hu2(hu)-mo2r-a(a3)'ri2-u3s(u4s). See Humoric.

HUMORIC, adj. Hu2-mo2r'i2k. Lat., *humoricus, humorarius* (from *humor*, a fluid). Fr., *humorique.* Due to or arising from a liquid. [α, 17.] See *H.* sound.

HUMORISM, n. Hu2'mo2r-i2z'm. Fr., *humorisme.* See *Humoral* pathology.

HUMORIST, n. Hu2'mo2r-i2st. Lat., *humorista* (from *humor*, a fluid). Fr., *humoriste.* See Humoralist.

HUMORO-VITALISM, n. Hu2m"o2r-o-vit'a2l-i2z'm. From *humor*, a fluid, and *vita*, life. Fr., *humoro-vitalisme.* The doctrine that the seat of life is in the humors. [A, 385.]

HUMOUR, n. Hu2'mo2r. See Humor.

HUMP, n. Hu3mp. Fr., *bosse.* Ger., *Höcker.* It., *gobba.* Sp., *giba.* A protuberance.—**H.-back.** See Kyphosis.—**H.-backed.** Affected with kyphosis.—**Visceral h.** In the *Mollusca*, the thin-walled dorsal or antipodal region formed by the soft viscera. [L, 121 (α, 39).]

HUMUANCHIANG (Chin.), n. See Gelsemium *elegans.*

HUMULA (Beng.), n. The *Kaempferia galanga.* [B, 172 (α, 24).] Cf. Kumula.

HUMULIN, n. Hu2'mu2-li2n. From *humulus*, the hop. Fr., *humuline.* Ger., *H.* See Lupulin.

HUMULINE, n. Hu2m'u2l-en. From *humulus*, hops. A mixture of tincture of hops and infusion of hops, previously evaporated separately. [B, 5 (α, 38).]

HUMULO-TANNIC ACID, n. Hu2"mu2-lo-ta2n'i2k. Fr., *acide humulo-tannique.* A whitish, amorphous mass insoluble in ether, soluble in acetic ether, in alcohol, and in hot water. [B, 5 (α, 38).]

HUMULUS (Lat.), n. m. Hu2(hu4)'mu2l(mu4l)-u3s(u4s). From *humus*, the earth. 1. A genus of urticaceous plants. The *Humulinæ* of Dumortier are a tribe of the *Urticaceæ*, consisting of the single genus *H.* 2. Of the U. S. Ph. and Br. Ph., the dried strobiles of *H. lupulus.* [B, 19, 42, 121, 180 (α, 24).]—**Amenta humuli.** Hop strobiles. [B, 180 (α, 24).]—**Extractum humuli.** See *Extractum* lupuli.—**Flores humuli.** The strobiles of *H. lupulus.* [B, 180 (α, 24).]—**Folia humuli.** The leaves or herb of *H. lupulus.* [B, 180 (α, 24).]—**Fructus humuli.** 1. The strobiles of *H. lupulus.* 2. The true

fruit (the ovary, which changes into a small nut enveloped in an enlarged sepal). [B, 12, 180 (*a*, 24).]—**Glandulæ humuli.** See Hop and Lupulin.—**Herba humuli.** The leaves of *H. lupulus.* [B, 180 (*a*, 24).]—**Humuli strobili.** Hops. [*a*, 24.]—**H. lupulus.** Fr., *houblon, salsepareille nationale, vigne du Nord.* Ger., (*gemeiner*) *Hopfen.* It., *luppolo.* Sp., *lúpulo, hombrecillo.* The common hop; a diœcious, perennial plant producing long, annual, twining stems, indigenous to North America (where it is found growing wild) and to Europe. It is extensively cultivated for the sake of its ament-like fruit (strobiles), called hops, which are used in the manufacture of beer. The calyx and scales in the fruit are covered with reddish atoms (see Lupulin) containing the active principle of the plant. Hops are tonic and slightly narcotic, and have been used, combined with capsicum, in the dyspepsia of alcoholism as a substitute for alcoholic stimulants. According to Bartholow, hops increase the action of the heart, excite the cutaneous circulation, and cause diaphoresis. They are also considered anaphrodisiac. They are used empirically in the form of a pillow for sleeplessness, and, placed in a bag and dipped in hot water, as an anodyne fomentation. In Belgium the young and tender tops are eaten like asparagus. [B, 5, 12, 18, 34, 77, 180 (*a*, 24).] See also Hop.—**Infusum humuli.** Fr., *tisane de houblon.* Ger., *Hopfenaufguss.* Syn.: *infusum lupuli* [Br. Ph.]. A preparation made by infusing ½ oz. (troy) of hops in 1 pint of water [U. S. Ph., 1870]; or ½ oz. (av.) of hops in 10 fl. oz. of water [Br. Ph.], and straining. The present U. S. preparation (made by the general formula) is three times as strong as the older infusion. [B, 5 (*a*, 38).]—**Strobili (seu Summitates) humuli.** Hops. [B.]—**Tictura humili** [U. S. Ph., Belg. Ph.]. A preparation made by macerating 1 part (2½ oz. [Br. Ph.]) of hop strobiles (in No. 20 powder [U. S. Ph.]) for from 1 to 5 days in 5 parts of dilute alcohol [Belg. Ph., Swed. Ph.], or a sufficient quantity of stronger alcohol to make 5 parts [U. S. Ph.] or 20 fl. oz. [Br. Ph.] of filtered tincture. [B, 95 (*a*, 38).]

HUMUS (Lat.), n. m. Hu^2(hu^4)'mu^{2}s(mu^{4}s). Gr., *χθών.* Fr., *h.* Ger., *Ackererde, Erdboden.* The brown or black substances found in vegetable mold, peat, and decayed wood; produced by the action of mineral acids or of alkalies upon carbohydrates. They are soluble in alkalies, insoluble in acids. [B, 3 (*a*, 38).]—**H'säure** (Ger.). See Humic acid.—**H'quellsäure** (Ger.). Apocrenic acid. [A, 324.]—**H'stoffe** (Ger.). Certain chemical compounds peculiar to h. [A, 396 (*a*, 21).]

HUNAN (Ar.), n. The fruit of *Zizyphus sativa.* [B, 92, 121 (*a*, 14).]

HUNCH, n. Hu^{2}nch. See Hump.—**H'back.** See Kyphosis.

HUND (Ger.), n. Hund. See Canis and Dog.—**H'eartig.** See Cynic.—**H'ebeinig.** Dog-legged.—**H'eblume.** The *Taraxacum officinale.* [B, 180 (*a*, 24).]—**H'edrage.** The *Nepeta glechoma.* [L, 80.]—**H'efett.** See Adeps *caninus.*—**H'ekoth.** See Album *græcum.*—**H'eschmalz.** See Axungia *canis.*—**H'eschwanz.** See Cynosurus.—**H'sbaum.** The *Rhamnus frangula, Rhamnus cathartica, Lonicera xylosteum, Prunus padus,* and *Euonymus europæus.* [B, 48, 180 (*a*, 14, 24).]—**H'sbaumrinde.** The bark of *Rhamnus frangula.* [B, 180 (*a*, 24).]—**H'sblume.** The *Taraxacum officinale* and the *Maruta cotula.* [B, 48 (*a*, 14).]—**H'sflechte.** The *Peltigera canina.* [B, 180 (*a*, 24).]—**H'sgiftgewächse.** The *Apocynaceæ.* [*a*, 24.]—**H'sholz.** The *Robinia frutescens* and the *Rhamnus cathartica.* [B, 48 (*a*, 14).]—**H'skopf.** The *Linaria vulgaris* and the *Antirrhinum orontium.* [B, 48, 124 (*a*, 14).]—**H'sköpfig.** See Cynocephalous.—**H'skoth.** See Album *græcum.*—**H'snasenkraut.** The herb of *Linaria vulgaris.* [B, 180 (*a*, 24).]—**H'stod.** The *Mercurialis annua* and *Aconitum lycoctonum.* [B, 48 (*a*, 14).]—**H'stodgewächse.** See Apocynaceæ.—**H'stoll, H'stollheit.** See Rabies *canina.*—**H'swurzel.** The root-stock of *Triticum repens.* [B, 180 (*a*, 24).]—**H'swuth.** See Rabies *canina.*

HUNDERT (Ger.), adj. Hund'e^{2}rt. A hundred.—**H'blättrig.** Hundred-leaved.—**H'füssig.** See Centipedal.—**H'gradig.** See Centigrade.—**H'kopfwurzel.** The root of *Eryngium campestre.* [B, 180 (*a*, 24).]

HÜNDISCH (Ger.), adj. Hu^{6}nd'i^{2}sh. See Canine.

HUNDRED-FOLD, n. Hu^{2}nd're^{2}d-fold. See Galium *verun.*

HUNDRED-LEAVED, adj. Hu^{2}n'dre^{2}d-levd. See Centifolious.

HUNDSBEERSTRAUCH (Ger.), n. Hundz'bar-stra^2-u^{4}ch^2. The *Cornus mascula, Cornus sanguinea, Lonicera xylosteum, Rhamnus cathartica, Viburnum opulus, Ligustrum vulgare,* and *Ceanothus americanus.* [B, 48 (*a*, 14).]—**Virginischer H.** The *Cornus florida.* [B, 180 (*a*, 24).]

HUNDSBLÜTHE (Ger.), n. Hundz'blu^{6}t-e^2. The genus *Cynomorium.*—**Scharlachrothe H.** The *Cynomorium coccineum.*

HUNDSKOHL (Ger.), n. Hundz'kol. 1. The genus *Apocynum.* 2. The *Mercurialis annua.* [B, 49; B, 180 (*a*, 24).] 3. See Cynocrambe.—**Fliegenfangender H.** The *Apocynum androsæmifolium.* [L, 80.]—**Hanfartiger H.** The *Apocynum cannabinum.* [L, 80.]—**Venetischer H.** The *Apocynum venetum.* [L, 80.]

HUNDSKOLBEN (Ger.), n. Hundz'kolb-e^{2}n. See Cynomorion.—**Rother H.** The *Cynomorion coccineum.* [B, 180 (*a*, 24).]

HUNDSWÜRGER (Ger.), n. Hundz'vu^{6}rg-e^{2}r. See Cynanchum.—**Gemeiner H.** The *Cynanchum vincetoxicum.* [*a*, 24.]—**Rundblättriger H.** See Cynanchum *monspeliacum.*

HUNDSZAHN (Ger.), n. Hundz'tsa^{2}n. 1. The genus *Cynodon.* 2. The *Erythronium dens canis.* [B, 180 (*a*, 24).]—**Wuchernder H.** See Cynodon *dactylon.*

HUNDSZUNGE (Ger.), n. Hundz'tsun^2-e^2. 1. See Cynoglossum. 2. The *Cynoglossum officinale* and the *Prunella vulgaris.* [B, 48 (*a*, 14); B, 88 (*a*, 39).]—**Gebräuchliche H., Gemeine H.** The *Cynoglossum officinale.* [B, 180 (*a*, 24).]

HUNGARIAN, adj. Hu^{2}n^2-ga'ri^2-a^{2}n. Lat., *hungaricus.* Fr., *hongrois.* Ger., *ungarisch.* Pertaining to or originating in Hungary.

HUNGER, n. Hu^{2}n^2'gu^{5}r. A.-S., *hungur, hungor, h.* Gr., *ὄρεξις.* Lat., *fames.* Fr., *faim.* Ger., *H.* The desire for food.—**Air-h.** See Besoin *de respirer.*—**Heftiger H.** (Ger.). **Heissh'** (Ger.). See Bulimia.—**Hundsh'** (Ger.). See Cynorexia.—**H'ig** (Ger.). Hungry. [L, 80.]—**H'kraut** (Ger.). The *Rumex hydrolapathum* and the *Chrysanthemum segetum.* [B, 48, 180 (*a*, 14, 24).]—**H'leidend** (Ger.). Famished.—**H'snoth** (Ger.). Famine. [*a*, 14.]—**H.-weed.** 1. The *Ranunculus arvensis.* 2. The *Alopecurus agrestis.* [A, 505 (*a*, 21).]—**Widernatürlicher H.** (Ger.). See Bulimia.

HUNGERBLÜMCHEN (Ger.), n. Hun^2'e^{2}r-blu^{6}m-ch^{2}e^{2}n. See Draba.—**Blaues H.** The *Veronica triphyllos.* [B, 180 (*a*, 24).]

HUNTERIA (Lat.), n. f. Hu^{3}n-ter'i^2-a^3. From *Hunter*, an English anatomist. A genus of apocynaceous trees found in the East Indies, belonging to the tribe *Plumierieæ.* [B, 42 (*a*, 24).]—**H. corymbosa.** A large tree found in India. It has been used in medicine. ["Nouv. rém.," May 8, 1889. p. 242 (*a*, 24).]

HUNTERIAN, adj. Hu^{3}n-te'ri^2-a^{2}n. From *Hunter*, an English anatomist. Described by John Hunter (see *H.* chancre).

HUNTSMAN'S-CUP, n. Hu^{3}nts''mu'nz-ku^{3}p'. The *Sarracenia purpurea.* [B, 121, 275 (*a*, 24).]

HUNYADI JÁNOS WATER, n. Hu^{4}n'ya^4-di^2 Ya^{3}n'o^{3}s. 1. A mineral water obtained in Buda-Pesth, Hungary, containing free carbonic acid and about 157 parts each of sodium sulphate and magnesium sulphate, with 11 parts of sodium chloride, 6 of calcium carbonate, a little potassium sulphate and strontium carbonate, and a very little iron and alumina. [A, 363 (*a*, 21); B, 81 (*a*, 38).] 2. An artificial substitute, said to have every advantage of the natural water, made by dissolving magnesium sulphate 514·92 grains, sodium sulphate 519·54 grains, potassium sulphate 2·76 grains, sodium chloride 39·15 grains, in 16 oz. of water. ["Lancet"; "Am. Jour. of Pharm.," June, 1882, p. 310.]

HUNZIL (Ar., Pers.), n. The *Citrullus colocynthis.* [B, 88 (*a*, 39); B, 121.]

HUR (Hind.), **HURA** (Hind.), n's. The *Terminalia chebula.* [B, 121, 172 (*a*, 24).]

HURA (Lat.), n. f. Hu^2(hu)'ra^3. Fr., *sablier.* Ger., *Sandbüchsenbaum.* A genus of euphorbiaceous trees found in tropical America, belonging to the tribe *Crotoneæ.* The *Huraceæ, Hureæ,* or *Hurideæ* are a division of one-ovuled *Euphorbiaceæ.* [B, 42, 121, 177, 180 (*a*, 24).]—**H. brasiliensis.** Fr., *sablier du Brésil.* Ger., *brasilianischer Sandbüchsenbaum.* The *assacou* or *ussacu* of the Brazilians. All parts of the tree contain an acrid and very poisonous principle. The juice, used by the Brazilians in preparing poisonous drinks, acts as an emetic and produces ulcerating pustules on the skin. The milky juice of the plant, and a decoction of the bark, have been used as a remedy for elephantiasis. [B, 5, 180 (*a*, 24).]—**H. crepitans.** Fr., *sablier élastique, arbre du diable, buis de soble, pet du diable.* Ger., *gemeiner Sandbüchsenbaum.* The sand-box tree, indigenous to tropical America; known in Panama as *javilla*, and in New Granada as *ocupa* and *habille.* Its properties are similar to those of *H. brasiliensis.* The seeds contain 50 per cent. of fixed oil, and this oil, when extracted, is used as a purgative. The seeds are employed in Mexico as a severe drastic cathartic, one seed sufficing to purge violently, and even to produce emesis frequently. Instances have been known of the juice of the plant causing destructive injury to the eyes. ["Proc. of the Am. Pharm. Assoc.," xvi, xxiv (*a*, 14); J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601; B, 5, 19, 173, 180 (*a*, 24).]—**H. strepens.** Ger., *prasselnder Sandbüchsenbaum.* A species having the same properties as *H. brasiliensis.* [B, 180 (*a*, 24).]

HURE (Ger.), n. Hur'e^2. A prostitute.—**H'nkolik.** See Colica *scortorum.*—**H'rei.** See Prostitution.—**Stinkende H.** The *Chenopodium vulvaria.* [B, 180 (*a*, 24).]

HURE DE LOUP (Fr.), n. U^{5}r d' lu. The *Daucus carota*, var. *silvestris.* [B, 38 (*a*, 14).]

HURIDA (Beng.), n. The *Curcuma longa.* [B, 172 (*a*, 24).]

HURIN, n. Hu^{2}r'i^{2}n. Fr., *hurine.* Ger., *H.* A crystallizable, acrid principle obtained from the sap of *Hura crepitans.* It is insoluble in water, soluble in alcohol, ether, and ethereal oils. It melts at 100° C. and decomposes at a higher temperature. [B, 48, 93 (*a*, 14); B, 81 (*a*, 38).]

HURIVILASINEE (Hind., Beng.), n. The *Curcuma longa.* [B, 172 (*a*, 24).]

HURMAL (Hind.), **HURMARO** (Hind.), n's. An Indian drug, consisting of the seeds, mixed with a few pedicels of *Peganum harmala.* The infusion or tincture acts as a stimulant emmenagogue and produces slight intoxication like that from *Cannabis indica.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

HURR BURR, n. Hu^{5}r'bu^{5}r. See Lappa *major.*

HURR-NUT, n. Hu^{5}r'nu^{3}t. The fruit of the hurr or hurrah (*Terminalia chebula*). [*a*, 35.]

HURT, n. Hu^{5}rt. A.-S., *hyrt.* See Trauma.

HURTLEBERRY, n. Hu^{5}rt'l'be^{2}r-ri^2. The *Vaccinium myrtillus* or its fruit. [B, 19, 185 (*a*, 24).]

HURTS, n. Hu^{5}rtz. The fruit of *Vaccinium myrtillus.* [A, 505 (*a*, 21).]

HURT-SICKLE, n. Hu^{5}rt'si^{2}k'l. See Centaurea *cyanus* and Centaurea *nigra.*

HUSK, n. Hu^{2}sk. M. E., *huske.* 1. The external covering of fruits or seeds, especially, in the United States, the covering of ears of maize. The h's of the New Testament were probably the carobs of *Ceratonia siliqua.* [B, 77, 185 (*a*, 24).] 2. See Hoose.

HUSKINESS, n. Hu^{2}sk'i^2-ne^{2}s. Roughness of the voice. [D.]

HUSKY, adj. Hu^{2}sk'i^2. Of the voice, rough. [D.]

HUSO (Lat.), n. Hu(hu)-so. See ACIPENSER *h.*

HUSTEN (Ger.), n. Hust'e^{2}n. See COUGH.—**Bellh'.** See *Barking* COUGH.—**Blauer H., Blauh'.** See WHOOPING-COUGH.—**Epidemischer H.** See INFLUENZA.—**Eselsh'.** See WHOOPING-COUGH.—**Feuchter H.** A loose cough. [L, 80.]—**H'anfall.** A paroxysm of coughing.—**Kitzelnder H.** A tickling cough. [L, 80.]—**Schafh', Tönender H.** See WHOOPING-COUGH.—**Trockener H.** A dry cough. [L, 80.]—**Ohrenh', Ohrh'.** See *Ear*-COUGH.—**Schleimiger H'.** See *Mucous* COUGH.—**H'artig.** See BECHODES.—**H'mittel.** A cough medicine.—**H'reiz.** See BECHÆSTHESIS.

HUT (Ger.), n. Hut. 1. A hat. 2. In botany, see PILEUS.—**H'-förmig.** Pileiform. [B, 123 (*a*, 24).]—**H'tragend.** See PILEATE.

HÜTCHEN (Ger.), n. Hu^{6}t'ch^{2}e^{2}n. A little covering like a hat.—**Gummiwarzenh'.** An India-rubber nipple-shield.

HUTCHINSIA (Lat.), n. f. Hu^{3}ch-i^{2}n'zi^2-a^3. From Miss *Hutchins*, an Irish cryptogamologist. Fr., *hutchinsie.* Ger., *Hutchinsie.* 1. A genus of the *Cruciferæ* allied to *Lepidium.* 2. Of Agardh, a genus of the *Confervaceæ*, tribe *Ceramieæ.* The *Hutchinsideæ* of Gray are a division of *Algæ* belonging to the *Thalassophyti.* [B, 38, 48, 71 (*a*, 14); B, 121 (*a*, 35); B, 19, 64, 170 (*a*, 24).]—**H. atrorubescens.** The *Polysiphonia atrorubescens.* [Agardh (*a*. 35).]—**H. petræa.** The *Lepidium petræum.* [B, 64 (*a*, 24).]—**H. procumbens.** The *Lepidium procumbens.* [B, 173 (*a*, 24).]

HÜTTE (Ger.), n. Hu^{6}t'te^2. A hut, cot, cottage. [A, 450 (*a*, 21).]—**Gifth'n.** Chambers for the condensation of arsenic trioxide. [B, 3, 49 (*a*, 27).]

HUTTERSBACH (Ger.), n. Hut'te^{2}rz-ba^{3}ch^2. A place in the Grand Duchy of Baden, Germany, where there is a ferruginous saline spring. [L, 49 (*a*, 14).]

HUTTONING, n. Hu^{3}t'n'i^{2}n^2. Of the bone-setters, the system of manipulation for replacing dislocated bones practiced by Hutton. [*a*, 40.]

HUYER (Beng.), n. The *Cocculus villosus.* [B, 172 (*a*, 24).]

HUYGHENIAN, adj. Hi-gen'i^2'n. Invented or described by Christian Huygens.

HUZIZ, n. A medicinal extract prepared in India from a species of *Berberis.* [B, 121.]

HWANG-LIEN (Chin.), n. The rhizome of *Coptis teeta.* [B, 18 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

HWANG-NOA (Chin.), n. The *Strychnos Gauthieri.* [B, 121.]

HWANG-PEH (Chin.), n. A yellow dye-bark, probably identical with that of *Evodia glauca.* ["Proc. of the Am. Pharm. Assoc.," xxxvi (*a*, 14).]

HYACINTH, n. Hi'a^3-si^{2}nth. Gr., ὑάκινθος. Lat., *hyacinthus.* Fr., *hyacinthe.* Ger., *Hyacinthe.* It., *giacinto, jacinto.* Sp., *jacinto.* 1. An ancient name for several plants. 2. The genus *Hyacinthus.* 3. The *Scilla nutans* and other plants with bulbous roots. [A, 505 (*a*, 21); B, 77, 275 (*a*, 24).] 4. An orange-brown gem formerly used as a cardiac stimulant, hypnotic, and antispasmodic. [B, 88 (*a*, 39).]—**American wild h.** The *Camassia Fraseri.* [B, 275 (*a*, 24).]—**Amethyst h.** The *Hyacinthus amethystinus.* [B, 275 (*a*, 24).]—**Californian h.** The genus *Brodiæa.* [B, 275 (*a*, 24).]—**Cape h.** The *Scilla brachyphylla* and *Scilla corymbosa.* [B, 19, 275 (*a*, 24).]—**Common garden-h.** The *Hyacinthus orientalis* and its varieties. [B, 275 (*a*, 24).]—**Fair-haired h.** The *Muscari comosum.* [B, 275 (*a*, 24).]—**Feathered h.** The *Muscari comosum monstruosum.* [B, 19, 77 (*a*, 24).]—**Grape-h.** See the major list.—**Late-flowering h.** The *Hyacinthus serotinus.* [B, 275 (*a*, 24).]—**Lily-h.** The *Scilla lilio-hyacinthus.* [B, 275 (*a*, 24).]—**Missouri h.** 1. The genus *Brodiæa.* 2. The *Hesperoscordium pacteum.* [B, 77, 275 (*a*, 24).]—**Peruvian h.** The *Scilla peruviana.* [B, 77 (*a*, 24).]—**Spanish h.** The *Hyacinthus amethystinus.* [B, 275 (*a*, 24).]—**Star-h.** The *Scilla amœna.* [B, 275 (*a*, 24).]—**Starch-h.** The *Muscari racemosum.* [B, 19, 275 (*a*, 24).]—**Tasmanian h.** The *Thelymitra nuda.* [B, 275 (*a*, 24).]—**Tassel-h.** The *Muscari comosum.* [B, 275 (*a*, 24).]—**White Cape h.** The *Hyacinthus candicans.* [B, 275 (*a*, 24).]—**Wild h.** The *Scilla nutans* and *Scilla Fraseri.* [B, 77, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]—**Winter-h.** The *Scilla autumnalis.* [B, 275 (*a*, 24).]

HYACINTHE (Fr., Ger.), n. E-a^3-sa^{2}n^{2}t, hu^6-a^3-tsent'e^2. See HYACINTH and HYACINTHUS.—**Confection d'h.** [Fr. Cod.] (Fr.). See *Électuaire de* SAFRAN *composé.*—**Espèces d'h.** See *Species de* HYACINTHO.—**Gewöhnliche H.** (Ger.). See HYACINTHUS *orientalis.*—**H. à toupet** (Fr.). See MUSCARI *comosum.*—**H. non escrit** (Fr.). See SCILLA *nutans.*

HYACINTHINE, adj. Hi'a^3-sinth-i^{2}n. From ὑάκινθος, a hyacinth. Resembling a hyacinth flower in color or form. [A, 511 (*a*, 35); L, 156.]

HYACINTHORCHIS (Lat.), n. f. Hi(hu^6)-a^3-si^{2}n(ki^{2}n)-tho^{2}r'-ki^{2}s(ch^{2}i^{2}s). Gen., *-orch'ios, -orch'eos (-orch'is).* From ὑάκινθος, a hyacinth, and ὄρχις, a testicle. See CREMASTRA (2d def.).

HYACINTHUS (Lat.), n. m. Hi(hu^6)-a^3-si^{2}n(ki^{2}n)'thu^{3}s(thu^{4}s). Gr., ὑάκινθος. Fr., *hyacinthe.* Ger., *Hyacinthe.* A genus of the *Liliaceæ.* The *Hyacintheæ* (Fr., *hyacinthées*; Ger., *Hyacintheen*) of Dumortier are a tribe of the *Liliaceæ*, including *Muscari, Hyacinthus, Scilla, Urginea, Allium*, etc. (mostly included in the *Scilleæ* of Bentham and Hooker). The *Hyacinthi* of Adanson are the same. The *Hyacinthinæ* of Batsch are a family of the *Campanales*, and of Link a suborder of the *Liliaceæ*, including *Hyacinthus, Phormium, Lachenalia*, etc. [B, 42, 104, 170 (*a*, 24).]—**Confectio de hyacintho.** See *Électuaire de* SAFRAN *composé.*—**H. belgicus.** The *Scilla nutans.* [B, 180 (*a*, 24).]—**H. comosus.** Fr., *hyacinthe à toupet.* See MUSCARI *comosum.*—**H. indicus.** The *Polyanthes tuberosa.* [B, 88 (*a*, 39).]—**H. monstruosus.** See MUSCARI *comosum monstrosum.*—**H. muscari.** See MUSCARI *comosum.*—**H. non scriptus.** See SCILLA *nutans.*—**H. orientalis.** Ger., *orientalische* (oder *gewöhnliche*) *Hyacinthe.* The common garden hyacinth, the ὑάκινθος of the ancients, and the source of all the varieties obtained by cultivation. It is indigenous to the Levant and western Asia. The seed was formerly used in jaundice and kidney diseases. [B, 77, 180 (*a*, 24).]—**H. paniculatus.** See *H. comosus.*—**H. poeticus.** A name for many species of *Iris.* [B, 121 (*a*, 35).]—**Species de hyacintho.** Fr., *espèces d'hyacinthe.* An astringent powder consisting of 6 parts each of hyacinth, Armenian bole, Lemnian earth, and red coral, 4 parts each of Oriental pearls and emeralds, and 5 parts each of hartshorn prepared without fire, ivory filings, bone of stag's heart, fraxinella-root, tormentilla-root, white, yellow, and red saunders, petals of red rose, cochineal, sorrel, lemon, and purslain seeds, saffron, and myrrh. Sometimes 5 parts each of ambergris and musk are added, and the species are then called "complete." [B, 119 (*a*, 38).]

HYACINTHUS ORIENTALIS. [A, 327.]

HYÆNANCHE (Lat.), n. f. Hi-(hu^6)-en(a^3-e^{2}n)-a^{2}n^2(a^{3}n^2)'ke(ch^{2}a). Gen., *-anch'es.* From ὕαινα, the hyena, and ἄγχειν, to strangle. Fr., *h.* A genus of the *Euphorbiaceæ*, tribe *Phyllantheæ.* The *Hyænancheæ* (Fr., *hyænanchées*) of H. Baillon are a division of the *Euphorbiaceæ.* [B, 42, 121 (*a*, 24).]—**H. capensis, H. globosa.** Fr., *h. globuleux.* A species the fruit of which is used in South Africa to poison hyenas. [B, 173, 180 (*a*, 24).]

HYÆNASIC ACID, HYÆNIC ACID, n's. Hi-e^{2}n-a^{2}s'i^{2}k, -e^{2}n'i^{2}k. Fr., *acide hyénique.* Ger., *Hyänasäure.* A monobasic acid, $C_{25}H_{50}O_2$, derived from the fat occurring in the glandular pouches of *Hyæna striata.* It is slightly soluble in cold alcohol, readily soluble in ether, melts at 77° to 78° C., and resembles cerotic acid. [B, 4, 93 (*a*, 14).]

HYA-HYA, n. In British Guiana, the *Tabernæmontana utilis.* [B, 185 (*a*, 24).]

HYAL, adj. Hi'a^{2}l. See HYOID.

HYALEOUS, adj. Hi-a^{2}l'e^2-u^{3}s. Gr., ὑαλόεις (from ὕαλος, glass). See HYALINE.

HYALIN (Ger.), n. Hu^6-a^3-len'. From ὕαλος, glass. 1. Of Hoppe-Seyler, a translucent substance, soluble in hot water, insoluble in water, in alcohol, and in ether, forming the chief constituent of an echinococcus-cyst wall. [Munk (A, 319 [*a*, 21]).] 2. Of Von Recklinghausen, the substance deposited in tissues undergoing amyloid degeneration. [*a*, 40.]

HYALINE, adj. Hi'a^{2}l-i^{2}n. Gr., ὑαλόεις, ὕαλος (from ὕαλος, glass). Lat., *hyalinus.* Fr., *hyalin.* Ger., *durchsichtig, wasserklar.* It., *jalino.* Glassy, crystalline, transparent. [B, 28 (*a*, 27).]—**H.-fibroid.** Of Gull and Sutton, h. and fibroid (said of a substance observed in chronic Bright's disease, with contracted kidney, found between the tubules and around the Malpighian bodies and the walls of minute arteries). [*a*, 40.]

HYALINOSIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-i^{2}n-o'si^{2}s. Gen., *-os'eos (-os'is).* From ὑάλινος, of crystal or glass. Ger., *Hyalinose.* Of Weber, waxy degeneration. [D, 3.]

HYALIPENNATE, adj. Hi-a^{2}l-i^2-pe^{2}n'at. Lat., *hyalipennis* (from ὕαλος, glass, and *penna*, a feather). Fr., *hyalipenné.* See HYALOPTEROUS.

HYALISTOS (Lat.), **HYALISTUS** (Lat.), n's m. Hi(hu^6)-a^{2}l-a^{3}l-i^{2}st'o^{2}s, -u^{3}s(u^{4}s). From ὕαλος, glass, and ἱστός, a tissue. See CORPUS *vitreum.*

HYALITIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* Gr., ὑαλῖτις (from ὕαλος, glass). Fr., *hyalite, hyaloïdéite.* Ger., *H., Glaskörperentzündung.* Inflammation of the vitreous humor, characterized mainly by failing vision and floating or fixed opacities in the vitreous, seen with the ophthalmoscope, and consisting of wandering lymphoid cells. It rarely occurs as a primary disease, but is usually secondary to some ciliary or chorioidal disease. [A, 326 (*a*, 21); F.]—**H. chronica.** H. in which thickening of the vitreous results from organization of the wandering cells into connective tissue. [A, 326 (*a*, 21).]—**H. plastica.** H. characterized by a delicate and vascular plastic formation. [Klein (A, 319 [*a*, 21]).]—**H. punctata.** Of Benson, a condition marked by a number of punctate opacities on or in the neighborhood of the anterior portion of the hyaloid membrane. ["N. Y. Med. Jour.," July 27, 1889, p. 111 (*a*, 29).]—**H. purulenta.** Fr., *hyalite purulente.* Ger., *eitrige H.* (oder *Glaskörperentzündung*). An inflammation characterized by the infiltration of the vitreous by large numbers of lymphoid cells, so that the vitreous consists practically of a large abscess. It may be circumscribed or diffuse, idiopathic or traumatic. It may accompany a general panophthalmitis, or be the result of an intra-ocular thrombus. [F.]—**H. serosa.** Fr., *hyalite séreuse.* Ger., *seröse H.* (oder *Glaskörperentzündung*). A low grade of h. characterized by opacities, and fluidity of the vitreous, and failing vision. It is usually due to chorioiditis or cyclitis. [F.]—**Suppurating h.** Lat., *h. suppurativa.* See *H. purulenta.*

HYALODEITIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-od-e^2-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). See Hyalitis.

HYALODEOGLISCHROTES (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-od''e^2-o(o^3)-gli^{2}sk(gli^{2}sch^2)'ro^{2}t-ez(as). Gen., *-rotet'os* (*-et'is*). From ὑαλοειδής, vitreous, and γλισχρότης, viscidity. Viscidity of the corpus vitreum. [A, 322.]

HYALODEOMALACIA (Lat.), **HYALODEOMALACOSIS** (Lat.), n's f. Hi(hu^6)-a^{2}l(a^{3}l)-od-e^2-o(o^3)-ma^{2}l(ma^{3}l)-a(a^3)'si^2(ki^2)-a^3, -a^{2}k(a^{3}k)-os'i^{2}s. Gen., *-ac'iæ*, *-cos'eos* (*-cos'is*). From ὑαλοειδής, glassy, and μαλακία, softness. Softening of the corpus vitreum. [L, 50, 107 (a, 14).]

HYALODEONYXIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-od-e^2-o(o^3)-ni^{2}x(nu^{4}x)'i^{2}s. Gen., *-nyx'eos* (*-nyx'is*). See Hyalonyxis.

HYALODEOPROPTOSIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-od'e^2-o(o^3)-pro^{2}p-to'si^{2}s. Gen., *-ptos'eos* (*-is*). From ὑαλοειδής, glassy, and πρόπτωσις, a falling forward. Fr., *hyalodéoproptose*. Ger., *Glaskörpervorfall*. Prolapse of the corpus vitreum. [L, 50 (a, 14).]

HYALODES (Lat.), adj. Hi(hu^6)-a^{2}l(a^{3}l)-od'ez(as). Gr., ὑαλοειδής (from ὕαλος, glass, and εἶδος, resemblance). Fr., *hyaloïde*. Ger., *glasähnlich*. See Hyaloid; as a n. (Ger., *Glaskörper*), the corpus vitreum. [L, 50 (a, 14).]

HYALOGEN, n. Hi-a^{2}l'o-je^{2}n. From ὕαλος, glass, and γεννᾶν, to engender. An albuminous substance found in cartilage; so called because it is readily reduced to hyalin. [Krukenberg, "Ztschr. f. Biol.," xx, 305, in "Ctrlbl. f. d. med. Wssnsch.," Jan. 10, 1885, p. 21 (B).]

HYALOID, adj. Hi'a^{2}l-oid. Gr., ὑαλώδης (from ὕαλος, glass, and εἶδος, resemblance). Lat., *hyalodes*, *hyaloides*, *hyaloideus*. Fr., *hyaloïde*, *hyaloïdien*. Ger., *glasähnlich* (1st def.). It., *vitreo* (1st def.). Sp., *vitreo* (1st def.). 1. Pertaining to the corpus vitreum; as a n. (Lat., *hyaloidea*), the h. membrane. 2. As a n., of Eimer, a clear zone surrounding the nucleolus of cells. ["Arch. f. mikr. Anat.," 1877, p. 94 (J).]

HYALOIDEA (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-i^{2}d(ed)'e^2-a^3. See under Hyaloid.—**H. propria.** See *Hyaloid* membrane.

HYALOIDEITIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-i^{2}d(ed)-i'-(e^2-e')-ti^{2}s. Gen., *-it'idos* (*-idis*). See Hyalitis.

HYALOIDIOPROPTOSIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-i^{2}d(ed)-i^2-o(o^3)-pro^{2}p-to'si^{2}s. Gen., *-ptos'eos* (*-is*). See Hyalodeproptosis.

HYALOIDITIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-i^{2}d(ed)-i(e)'-ti^{2}s. Gen., *-it'idos* (*-idis*). Fr., *hyaloïdite*. See Hyalitis.

HYALOLÆNA (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-len'(la^3'e^{2}n)-a^3. Of Bunge, a genus of the *Umbelliferæ*; of Bentham and Hooker, a section of the genus *Selinum*. [B, 42 (a, 24).]—**H. Severzovi.** The *Ferula sumbul*. [B, 95.]

HYALOM (Ger.), n. Hu^6-a^3-lom'. See Hyaloma.—**H. der Haut.** See *Colloid* milium.

HYALOMA (Lat.), n. n. Hi(hu^6)-a^{2}l(a^{3}l)-o'ma^3. Gen., *-om'atos* (*-atis*). From ὕαλος, glass. Fr., *hyalome*. Ger., *Hyalom*. A conversion of the eye into a glass-like mass. [L, 50 (a, 14).]

HYALOMENINX (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-men(man)'-i^{2}n^{2}x. Gen., *-ing'gos* (*-ing'gis*). From ὕαλος, glass, and μῆνιγξ, a membrane. A hyaloid membrane, especially that of the eye. [L, 50 (a, 14).]

HYALONYXIS (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-ni^{2}x(nu^{4}x)'i^{2}s. Gen., *-nyx'eos* (*-is*). From ὕαλος, glass, and νύξις, a pricking. Puncture of the corpus vitreum, as in keratonyxis. [A, 322.]

HYALOPHAGIA (Lat.), n. f. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-faj(fa^{3}g)'-i^2-a^3. From ὕαλος, glass, and φαγεῖν, to eat. Ger., *Glasfressen*. A mania for, or a vicious habit of, eating glass. [L, 50 (a, 14).]

HYALOPLASM, n. Hi'a^{2}l-o-pla^{2}z'm. Gen., *-plasm'atos* (*-atis*). Lat., *hyaloplasma* (from ὕαλος, glass, and πλάσμα, anything formed). Fr., *hyaloplasme*. 1. Of Hanstein (1880), the fundamental hyaline substance of cells. 2. Of Strasburger, the more homogeneous and fluid part of the protoplasm of the formative cell. [J, 15; "Quart. Jour. of Micr. Sci.," N. S. xxx, p. 33 (a, 32).] Cf. Spongioplasm.—**Nuclear h.** Fr., *hyaloplasme nucléaire*. Of Strasburger, the reduplicated filament of the necleus, more dense than the hyaline substance (Ger., *Kernsaft*) of the nucleus itself. [B, 104 (a, 24).]

HYALOPTEROUS, adj. Hi-a^{2}l-o^{2}pt'e^{2}r-u^{2}s. Lat., *hyalopterus* (from ὕαλος, glass, and πτέρον, a wing). Fr., *hyaloptère*. Having transparent wings. [L, 41 (a, 14).]

HYALOSOMA (Lat.), n. n. Hi(hu^6)-a^{2}l(a^{3}l)-o(o^3)-so'ma^3. Gen., *-som'atos* (*-atis*). From ὕαλος, glass, and σῶμα, a body. Fr., *hyalosome*. Of Planter, the hyaline part of the germinal spot in the maturing ova of molluscs. ["Arch. f. mikr. Anat.," 1885 (J).] See also Prothyalosoma.

HYALOSPERMOUS, adj. Hi-a^{2}l-o-spu^{6}rm'u^{2}s. Lat., *hyalospermus* (from ὕαλος, glass, and σπέρμα, a seed). Having transparent seeds. [L, 107.]

HYÄNASÄURE (Ger.), n. Hu^6-an'a^3-zoir-e^2. See Hyænic acid.

HYANCHE (Lat.), n. f. Hi(hu^6)-a^{2}n^2(a^{3}n^2)'ke(ch^{2}a). Gen., *-anch'es*. Gr., ὑάγχη (from ὗς, a swine, and ἄγχειν, to strangle). See Cynanche *tonsillaris*.

HYBANTHUS (Lat.), n. m. Hi^{2}b(hu^{6}b)-a^{2}n(a^{3}n)'thu^{2}s(thu^{4}s). From ὕβος, the hump of a camel, and ἄνθος, a flower. Of Jacquin, a genus of the *Violarieæ*, tribe *Violeæ*. The *Hybantheæ* are a section of the *Violaceæ*. [B, 42, 121 (a, 24).]—**H. brevicaulis.** A species found in Brazil, used like *Ionidium ipecacuanha*. [B, 93 (a, 14).]—**H. ipecacuanha.** The *Ionidium ipecacuanha*. [B, 121 (a, 35).]—**H. maytensillo.** A species growing in Chili. [B, 93 (a, 14).]—**H. microphyllus.** The *Ionidium microphyllum*. [B, 121 (a, 35).]—**H. parviflorus.** The *Ionidium parviflorum*. [B, 121 (a, 35).]—**H. scandens.** The *Ionidium h.* [B, 93 (a, 14).]—**H. striatus.** A species found in the West Indies; used like *Ionidium ipecacuanha*. [B, 93 (a, 14).]—**H. urticæfolius.** A Brazilian species. [B, 93 (a, 14).]—**H. verticillatus.** The *Ionidium polygalæfolium*. [B, 93 (a, 14).]

HYBERNATION, n. Hi-bu^{6}rn-a'shu^{2}n. See Hibernation.

HYBOMA (Lat.), n. n. Hi(hu^6)-bo'ma^3. Gen., *-bom'atos* (*-atis*). Gr., ὕβωμα. See Gibbosity.—**H. scoliosis.** Lateral curvature of the spine. [L, 29 (a, 29).]

HYBOMÈTRE (Fr.), n. E-bo-me^{2}tr'. From ὕβος, a hump, and μέτρον, a measure. An instrument for measuring a pathological projection. [L, 41 (a, 14).]

HYBOSIS (Lat.), n. f. Hi(hu^6)-bo'si^{2}s. Gen., *-os'eos* (*-os'is*). Gr., ὕβωσις. See Gibbosity.

HYBRID, adj. Hi'bri^{2}d. Lat., *hybridus* (from ὕβρις, wanton violence). Fr., *hybride*. Ger., *h.* 1. Of mixed origin, cross-bred, mongrel (said of animals and plants). 2. Of a disease, due to more than one kind of poison. [B, 1, 123 (a, 24).]—**H. of measles and scarlet fever.** See Rötheln.

HYBRIDATION, n. Hi-bri^{2}d-a'shu^{2}n. Fr., *h.* See Hybridization.

HYBRIDISM, n. Hib'ri^{2}d-i^{2}z'm. From ὕβρις, wanton violence. The act of making or becoming hybrid.—**Syphilitic h.** Of Verneuil, a condition in which the effects of syphilis and some other diseases (such as alcoholism, malarial diseases, neoplasms, varicose ulcers, etc.) are combined. It is maintained that this combination produces affections that are unlike either of the diseases concerned, though most resembling syphilis, and also that the resulting affection is entirely unaffected by antisyphilitic treatment. ["Med. Chron.," April, 1888, p. 47; "Union méd.," Dec. 17. 1887 (G).]

HYBRIDITY, n. Hi-bri^{2}d'i^2-ti^2. From ὕβρις, wanton violence. Fr., *hybridité*. The state of being hybrid.

HYBRIDIZATION, n. Hi-bri^{2}d-i-za'shu^{2}n. From ὑβρίζειν, to wax wanton. The process, or the fact, of the formation of a hybrid (disease, animal, or plant). See *Cross*-fertilization.

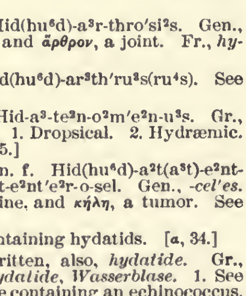
HYDALEOUS, adj. Hi-dal'e-u^{2}s. Gr., ὑδαλέος (from ὕδωρ, water). Watery, dropsical. [A, 311 (a, 21).]

HYDANTOIC ACID, n. Hid-a^{2}n-to'i^{2}k. Fr., *acide hydantoïque*. Ger., *Hydantoïnsäure*. Glycoluramic or glycoluric acid, a crystalline body, $C_3H_6N_2O_3 = NH_2.CO.NH - CH_2.CO.OH$, possessing the properties of a monobasic acid, and derived from hydantoin (glycolyl urea) by the addition of the elements of a molecule of water. [B, 4.]

HYDANTOIN, n. Hid-a^{2}n'to-i^{2}n. Fr., *hydantoïne*. Ger., *H.*, *Hydantoïn*. Glycolyl urea, a body, $C_3H_4N_2O_2 = CH_2CO{:}N_2H_2CO$, forming colorless, acicular crystals, having a sweet taste, soluble in water, and melting at 206° C. [B, 3, 4 (a, 38).]

HYDARTHROS (Lat.), n. m. Hid(hu^{6}d)-a^{3}r'thro^{2}s. See Hydrarthron.

HYDARTHROSIS (Lat.), n. f. Hid(hu^{6}d)-a^{3}r-thro'si^{2}s. Gen., *-thros'eos* (*-os'is*). From ὕδωρ, water, and ἄρθρον, a joint. Fr., *hydarthrose*. See Hydrarthrosis.



HYDARTHRUS (Lat.), n. m. Hid(hu^{6}d)-ar^{3}th'ru^{2}s(ru^{4}s). See Hydrarthron and Hydrarthrosis.

HYDATÆNOMENOUS, adj. Hid-a^3-te^{2}n-o^{2}m'e^{2}n-u^{2}s. Gr., ὑδαταινόμενος. Lat., *hydatænomenus*. 1. Dropsical. 2. Hydræmic. 3. Having watery menses. [A, 311, 325.]

HYDATENTEROCELE (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-e^{2}nt-e^{2}r o(o^3)-se(ka)'le(la); in Eng., hi-da^{2}t-e^{2}nt'e^{2}r-o-sel. Gen., *-cel'es*. From ὕδωρ, water, ἔντερον, an intestine, and κήλη, a tumor. See Hydrenterocele.

HYDATIC, adj. Hi-da^{2}t'i^{2}k. Containing hydatids. [a, 34.]

HYDATID, n. Hi'da^{2}t-i^{2}d. Written, also, *hydatide*. Gr., ὑδατίς. Lat., *hydatis*. Ger., *H.*, *Hydatide*, *Wasserblase*. 1. See Echinococcus *hominis*. 2. The vesicle containing an echinococcus. 3. In anatomy, a name for certain bulbous cyst-like remnants of atrophied embryonic structures, one of which, the h. of Morgagni, hangs by a pedicle from the fimbriated extremity of the oviduct, and another from the epoophoron. 4. In the pl., *h's*, see Cystica. [A, 5; B, 28 (a, 27).]—**Alveolar h's.** The nerve sacs at the roots of the teeth. [a, 40.]—**Barren h.** A h. (2d def.) in which there are no echinococcus heads developed upon the endocyst, but fluid alone is contained within it. [Ashhurst (a, 39).] See Acephalocysts.—**Carcinomatous h.** Fr., *hydatide carcinomateuse*. A name given in the last century, by Adams, to the animal supposed to constitute the morbid tissue of cancer. [a, 40.]—**Fertile h.** An h. the endocyst of which is supplied with minute buds or germinæ, which develop into scolices or echinococcus heads that eventually break loose from their attachments and form secondary and tertiary cysts. These cysts are not cured by tapping. [L, 40.]—**Gid h.** See Cœnurus *cerebralis*.—**H. cyst.** See *H.* (2d def.).—**H's of Morgagni.** Lat., *corpora Morganii*, *corpuscula sacciformia* [Rosenmüller]. Fr., *hydatides pédiculées*. Syn.: *hyaloid bodies* [Simpson]. The terminal bulbs of the vestiges of the Müllerian duct, which in the female hang from the fimbriated extremity of the oviduct by a pedicle in the female, and in the male is situated between the body of the testicle and the upper globe of the

A HYDATID OF FOUR WEEKS' GROWTH, SHOWING THE ECTOCYST AND ENDOCYST. (FROM COBBOLD [A, 364], AFTER LEUCKART.)

epididymis. [A, 5.]—**H. of the conjunctiva.** An ancient name for a phlyctenule of the conjunctiva. [α, 29.]—**H. of the epididymis, H. of the Fallopplan tube, H. of the oviduct.** See under *H's of Morgagni.*—**H. of the eyelid.** See HYDATIS (2d def.).—**H's of the uterus.** An old term for a vesicular mole.—**Pillbox h.** A hydatid cyst which, owing to its endogenous character is made up of several smaller h's, one within the other. [Gross (α, 39).]—**Multilocular h.** See ECHINOCOCCUS *multilocularis.*—**Sterile h.** See *Barren h.*—**Uterine h's.** See *H's of the uterus.*

HYDATIDE (Fr., Ger.), n. E-da^3-ted, hu^6-da^3-ted'e^2. See HYDATID.—**H'nähnlich** (Ger.). See HYDATIFORM.—**H'nkrankheit** (Ger.). See HYDATIDOSIS.—**H's pédiculées** (Fr.). See HYDATIDS *of Morgagni.*

HYDATIDEPATITIS (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-e^{2}p-(ap)-a^3-ti(te)'ti^{2}s. Gen., *-it'idos (-idis).* From ὑδατίς, a drop of water, and ἡπατῖτις, pertaining to the liver. Fr., *hydatidepatite.* Hepatitis associated with hydatids. [L, 50 (α, 14).]

HYDATIDIC, adj. Hid-a^3-ti^{2}d'i^{2}k. Lat., *hydatidicus* (from ὑδατίς, a drop of water). Fr., *hydatidique.* Pertaining to hydatids. [L, 107.]

HYDATIDIFORM, adj. Hid-a^3-ti^{2}d'i^2-fo^{2}rm. Fr., *hydatidiforme.* Ger., *hydatidenähnlich.* See HYDATIDOID.

HYDATIDOCELE (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-o(o^3)-se-(ka)'le(la); in Eng., hid-a^3-ti^{2}d'o-sel. Gen., *-cel'es.* From ὑδατίς, a hydatid, and κήλη, a tumor. Ger., *Wasserblasenbruch.* An oscheocele containing hydatids. [E.]

HYDATIDOCEPHALUS (Lat.), n. m. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-o(o^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ὑδατίς, a hydatid, and κεφαλή, the head. See GID.

HYDATIDODES (Lat.), adj. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-od'ez(as). See HYDATIDOID.

HYDATIDOGENOUS, adj. Hid-a^{2}t-i^{2}d-o^{2}j'e^{2}n-u^{3}s. From ὑδατίς, a hydatid, and γεννᾶν, to engender. Having the capability of producing a hydatid. [α, 40.]

HYDATIDOID, adj. Hid-a^{2}t'i^{2}d-oid. Lat., *hydatidodes, hydatidoides* (from ὑδατίς, a hydatid, and εἶδος, resemblance). Fr., *hydatidoïde.* Ger., *hydatidenähnlich.* Resembling hydatids.

HYDATIDOMA (Lat.), n. n. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d o'ma^3. Gen., *-om'atos (-atis).* From ὑδατίς, a hydatid. Ger., *Blasenwurmgeschwulst.* A hydatidic tumor. [L, 50 (α, 14).]

HYDATIDOSCHEOCELE (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-o^{2}s-ke^2(ch^{2}e^2)-o(o^3)-se(ka)'le(la); in Eng., hi^{2}d-a^{2}t-i^{2}d-o^{2}s'ke^2-o-sel. Gen., *-cel'es.* From ὑδατίς, a hydatid, ὄσχεον, the scrotum, and κήλη, a tumor. See HYDATIDOCELE.

HYDATIDOSIS (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}d-o'si^{2}s. Gen., *-os'eos (-is).* From ὑδατίς, a hydatid. Fr., *hydatidose.* Ger., *Hydatidenkrankheit.* The state of being affected with hydatids. [L, 50 (α, 14).]

HYDATIDOUS, adj. Hid-a^{2}t'i^{2}d-u^{3}s. Lat., *hydatidosus.* Fr., *hydatideux.* Affected with hydatids. [A, 322.]

HYDATIFORM, adj. Hi-da^{2}t'i^2-fo^{2}rm. From ὑδατίς, a hydatid, and *forma*, form. See HYDATIDOID.

HYDATIGENA (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i^{2}j(i^{2}g)'e^{2}n-a^3. From ὑδατίς, a hydatid, and γένος, a genus. A genus of the *Tæniadæ* in the larval state. [Goeze (L, 16).]—**H. granulosa.** See ECHINOCOCCUS *hominis.*—**H. orbicularis, H. oblonga.** See CYSTICERCUS *tenuicollis.*

HYDATIGENOUS, adj. Hid-a^{2}t-i^{2}j'e^{2}n-u^{3}s. From ὑδατίς, a hydatid, and γεννᾶν, to engender. Fr., *hydatigène.* Causing, or bearing, or caused by hydatids. [L, 50, 107 (α, 14).]

HYDATINIFORM, adj. Hi^{2}d-a^{2}t-i^{2}n'i^2-fo^{2}rm. See HYDATIDOID.

HYDATINUS (Lat.), adj. Hid(hu^{6}d)-a^{2}t(a^{3}t)-i(e)'nu^{3}s(nu^{4}s). Gr., ὑδάτεινος, ὑδάτινος. Fr., *hydatinien.* Watery; as a n., in the neut., *hydatinum* (= ὑδάτεινον), a certain ancient collyrium made with rain-water. [A, 311; Galen (A, 325).]

HYDATIS (Lat.), n. f. Hid(hu^{6}d)'a^{2}t(a^{3}t)-i^{2}s. Gen., *-at'idos (-idis).* Gr., ὑδατίς (from ὕδωρ, water). Fr., *hydatide.* Ger., *H., Hydatide, Wasserbläschen.* It., *idatide.* Sp., *hidatide.* Lit., a particle of water (Lat., *aquula*), a drop. 1. A hydatid, or a hydatid cyst; of Lamarck, a genus of the *Tæniadæ* in the larval state; of Rudolphi, the *Echinococcus hominis.* [L, 16.] 2. (Obs.) a rounded vesicle, as large as a pea, with pellucid contents, usually solitary, met with often on the eyelids. [G, 11.]—**H. acephalocystis.** See ACEPHALOCYST.—**H. cellulosa.** Cystic degeneration in cellular tissue. [G, 11.]—**H. cœnurus.** See CŒNURUS *cerebralis.*—**H. conjunctivæ, H. cuticularis.** Ger., *Wasserbläschen am Augapfel.* See *H.* (2d def.).—**H. ditrachyceras.** See DITRACHYCERAS.—**H. echinococcus.** See ECHINOCOCCUS.—**H. erratica.** See ECHINOCOCCUS *hominis.*—**H'finne** (Ger.). See CYSTICERCUS.—**H. glandulæ lacrimalis.** An old term for a hydatid cyst of the lacrymal gland. [F.]—**H. globosa.** See CYSTICERCUS *tenuicollis.*—**Hydatides Morgagnii.** See HYDATIDS *of Morgagni.*—**H. palpebræ.** See *H.* (2d def.).—**H. tunicæ vaginalis testiculi.** The hydatid of Morgagni in the male. A small cystic tumor about 3 lines in diameter situated at the junction of the testicle and the epididymis, attached to the tunica vaginalis. [α, 40.]—**Tænia h.** An old term for the vesicular mole. [A, 42.]

HYDATISM, n. Hi^{2}d'a^3-ti^{2}z'm. Gr., ὑδατισμός. Lat., *hydatismus.* Fr., *hydatisme.* Ger., *Wassergeräusch, Flüssigkeitsschall.* It., *idatismo.* Sp., *hidatismo.* 1. Of Cælius Aurelianus, the sound produced by moving a liquid contained in a cavity, especially that of the thorax. [L, 41. 44, 50 (α, 14).] 2. The percussion note elicited in hydrothorax. [L, 135 (α, 39).]

HYDATISOMATOUS, adj. Hi^{2}d-a^3-ti^2-som'a^{2}t-u^{3}s. Lat., *hydatisomatus* (from ὑδατίς, a drop of water, and σῶμα, a body). Of De Blainville, having vesicle-shaped bodies (said of a tribe of the *Hydatisomata*). [L, 180.] The *Hydatisomata* of De Blainville belong to the class of subannelids. [L, 180 (α, 39).]

HYDATOCELE (Lat.), n. f. Hi^{2}d(hu^{6}d) a^{2}t(a^{3}t)-o(o^3)-se(ka)'-le(la); in Eng., hi^{2}d'a^{2}t-o-sel. Gen., *-cel'es (-æ).* See HYDATIDOCELE and HYDROCELE.

HYDATOCHLOOS (Lat.), **HYDATOCHLOROS** (Lat.), **HYDATOCHLOUS** (Lat.), adj's. Hi^{2}d(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}k(o^{3}ch^2)'-lo(lo^2)-o^{2}s, -o^{2}k(o^{3}ch^2)-lo'ro^{2}s, -o^{2}k(o^{3}ch^2)'lo(lo^2)-u^{3}s(u^{4}s). Gr., ὑδατόχλοος (from ὕδωρ, water, and χλόη, the first light-green shoot of plants). Ger., *wassergrün.* Watery and green. [A, 311 (α, 17).]

HYDATOCHOLOS (Lat.), **HYDATOCHOLUS** (Lat.), adj's. Hi^{2}d(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}k(o^{2}ch^2)'o^{2}l-o^{2}s, -u^{3}s(u^{4}s). Gr., ὑδατόχολος (from ὕδωρ, water, and χόλος, bile). Ger., *wässerig-gallicht.* Of Hippocrates, watery and containing bile (said of the stools). [A, 322.]

HYDATOCHROOS (Lat.), adj. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}k(o^{2}ch^2)'-ro(ro^2)-o^{2}s. Gr., ὑδατόχροος (from ὕδωρ, water, and χροός, color). Ger., *wasserfarbig.* Of the color of water; of Hippocrates, pale as water. [A, 311 (α, 17); L, 50 (α, 14).]

HYDATODEITIS (Lat.), n. f. Hi^{2}d(hu^{6}d)-a^{2}t(a^{3}t)-od-e^2-i(e)'-ti^{2}s. Gen., *-it'idos (-idis).* From ὑδατώδης, watery (see also *-itis**). Inflammation of the lining membrane of the anterior chamber of the eye. [L, 50 (α, 14).]

HYDATODES (Lat.), adj. Hid(hu^{6}d)-a^{2}t(a^{3}t)-od'ez(as). Gr., ὑδατώδης (from ὕδωρ, water, and εἶδος, resemblance). Fr., *hydatoïde.* Ger., *wässerig.* 1. Of Hippocrates, watery; of urine, limpid; of a person, dropsical. 2. Of Galen, diluted with water (said of wine). [A, 311 (α, 17); L, 50 (α, 14).] 3. As a n., the aqueous humor. [B.]

HYDATOGENESIS (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o(o^3)-je^{2}n-(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-es'eos (-gen'esis).* From ὕδωρ, water, and γένεσις, a production. Fr., *hydatogénèse.* Ger., *Wasserbildung.* The formation of water, or of a watery fluid, in the body. [L, 50, 107 (α, 14).]

HYDATOID, adj. Hi^{2}d'a^{2}t-oid. Gr., ὑδατόεις, ὑδατοειδής, ὑδατώδης (from ὕδωρ, water, and εἶδος, resemblance). Lat., *hydatoides.* Fr., *hydatoïde.* Ger., *wasserähnlich* (1st def.), *blasenwurmähnlich* (2d def.). It., *idatoide.* Sp., *hidatoïde.* 1. Water-like. [L, 41, 44 (α, 14).] 2. Resembling a hydatid. [α, 17.] 3. As a n., the aqueous humor and its supposititious investment.

HYDATONCUS (Lat.), n. m. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}n^{2}k'u^{3}s(u^{4}s). From ὕδωρ, water, and ὄγκος, a tumor. Ger., *Wassergeschwulst.* A swelling with watery contents. [L, 50, 107 (α, 14).]

HYDATOPHTHONGOS (Lat.), **HYDATOPHTHONGUS** (Lat.), n's m. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}f-tho^{2}n^2'go^{2}s, -gu^{3}s(gu^{4}s). From ὕδωρ, water, and φθόγγος, the voice. Fr., *hydatophthonge.* Of Piorry, hydatism. [L, 50 (α, 14).]

HYDATOPOSIA (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o(o^3)-po(po^2)'-zi^2(si^2)-a^3. Gr., ὑδατοποσία (from ὕδωρ, water, and πόσις, a drinking). Fr., *hydatoposie.* Ger., *Wassertrinken.* The drinking of water. [Hippocrates (A, 311 [α, 17]).]

HYDATOPOTA (Lat.), **HYDATOPOTES** (Lat.), n's m. Hid-(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}p'o^{2}t-a^3, -ez(as). Gen., *-op'otæ, -op'otu (-æ).* From ὕδωρ, water, and ποτεῖν, to drink. A water-drinker. [A, 322 (α, 21).]

HYDATORRHŒA (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}r-re'(ro^2'-e^2)-a^3. Gr., ὑδατοορρία (from ὕδωρ, water, and ῥοία, a flow). See HYDRORRHŒA.

HYDATOSCHEOCELE (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o^{2}s-ke^2(ch^{2}e^2)-o(o^3)-se(ka)'le(la); in Eng., hid-a^{2}t-o^{2}s'ke^2-o-sel. Gen., *-cel'es.* See HYDATIDOSCHEOCELE.

HYDATOSIS (Lat.), n. f. Hi^{2}d(hu^{6}d)-a^{2}t(a^{3}t)-o'si^{2}s. Gen., *-os'eos (-os'is).* From ὑδατοῦν, to make watery. Fr., *hydatose.* See HYDATOGENESIS.

HYDATOTHERAPIA (Lat.), n. f. Hid(hu^{6}d)-a^{2}t(a^{3}t)-o(o^3)-the^{2}r-a^{2}p(a^{3}p)-i(e)'a^3. Fr., *hydatothérapie.* See HYDROTHERAPY.

HYDATULA (Lat.), n. f. Hi^{2}d(hu^{6}d)-a^{2}t(a^{3}t)'u^{2}l(u^{4}l)-a^3. From ὑδατίς, a drop of water. A genus of the *Tæniadæ* in the larval state. [L.]—**H. cerebralis.** See CŒNURUS *cerebratis.*—**H. solitaria.** See CYSTICERCUS *tenuicollis.*

HYDERIASIS (Lat.), n. f. Hi^{2}d(hu^{6}d)-e^{2}r-i(i^2)-a(a^3)'si^{2}s. Gen., *-as'eos (-as'is).* Gr., ὑδεριασις. See HYDROPS.

HYDERICUS (Lat.), **HYDERODES** (Lat.), adj's. Hid(hu^{6}d)-e^{2}r'i^{2}k-u^{3}s(u^{4}s), -e^{2}r-od'ez(as). Gr., ὑδερικός, ὑδερώδης. Dropsical. [L, 50 (α, 14).]

HYDERONCUS (Lat.), n. m. Hid(hu^{6}d)-e^{2}r-o^{2}n^{2}k'u^{3}s(u^{4}s). From ὕδερος, the dropsy, and ὄγκος, a tumor. See HYDATONCUS.

HYDEROS (Lat.), **HYDERUS** (Lat.), n's m. Hi^{2}d(hu^{6}d)'e^{2}r-o^{2}s, -u^{3}s(u^{4}s). Gr., ὕδερος (from ὕδωρ, water). 1. Of Greek writers, diabetes, also dropsy. 2. Of later writers, ascites and anasarca. 3. Of Paulus Ægineta, hepathyderus. [L, 50 (α, 14); L, 107; L, 135 (α, 38).]

HYDNE (Fr.), n. Ed-n'. See HYDNUM.—**H. blanc.** See HYDNUM *album.*—**H. cure-oreille.** See HYDNUM *auriscalpium.*—**H. écailleux.** See HYDNUM *subsquamosum.*—**H. en forme de coupe.** See HYDNUM *cyathiforme.*—**H. hérisson.** See HYDNUM *erinaceum.*—**H. hérisson souterrain.** See HYDNUM *erinaceum subterraneum.*—**H. imbriqué.** See HYDNUM *imbricatum* (1st def.) and HYDNUM *repandum.*—**H. sinué.** See HYDNUM *repandum.*—**H. zoné.** See HYDNUM *cyathiforme concrescens.*

HYDNOCARPUS (Lat.), n. m. Hi^{2}d(hu^{6}d)-no(no^3)-ka^{3}rp'u^{3}s-(u^{4}s). From ὕδνον (see HYDNUM) and καρπός, a fruit. Fr., *hydnocarpe.* Of Gärtner, a genus of the *Bixaceæ*, tribe *Pangieæ.* [B, 121 (α, 35).]—**H. anthelminthicus.** A tree growing in Cochin-China not generally recognized by botanists, but from the structure of the seed probably a species of *Gynocardia.* The seed, known in Siam as *lukrabo*, and in China as *ta-fung-tsze*, is used in

a variety of skin diseases, and is said to be sometimes substituted for St. Ignatius's beans. [B, 18, 121, Hooker (*a*, 35).]—**H. inebrians.** A species found in Ceylon, where it is called *makooloo*, and on the Malabar coast. The fruit is extremely poisonous, and is used in New Zealand as a fish poison. An oil obtained from the seed is used in India in leprosy and skin diseases. [B, 19, 121 (*a*, 35).]—**H. odoratus.** See GYNOCARDIA *odorata*.—**H. venenatus.** See *H. inebrians*.—**H. wightianus.** A species found in India. An infusion of the seeds is used as a detergent douche after delivery, and an oil obtained from them is used like chaulmoogra oil. [A, 479 (*a*, 21).]

HYDNON (Lat.), n. n. Hi2d(hu6d)'no2n. Gr., ὕδνον. See HYDNUM.

HYDNORA (Lat.), n. f. Hi2d(hu6d)'no2r-a3. From ὕδνον, an edible fungus, and ὁρᾶν, to see. Fr., *hydnore*. Syn.: *Aphyteia* [Achariuss]. Of Thunberg, a genus of fungus-like, leafless plants, of the *Cytinaceæ*, tribe *Hydnoreæ*, parasitic on the roots of the *Euphorbiaceæ*, etc. The *Hydnoreæ* (Fr., *hydnorées*) are: Of Bentham and Hooker, a tribe of the *Cytinaceæ*; of Reichenbach, a division of the *Cytineæ*. The *Hydnorinæ* of Agardh are an order of *Fungi*, including *H.* and *Rafflesia*. [B, 19, 38, 42, 121, 170 (*a*, 24).]—**H. africana.** Fr., *aphytée aquatique, melon d'eau de Hottentots*. Jackal's-kost, a species found at the Cape of Good Hope. It smells like decaying roast beef. The Hottentots eat the fruit, raw or cooked. [B, 19, 173 (*a*, 24).]

HYDNUM (Lat.), n. n. Hi2d(hu6d)'nu3m(nu4m). Gr., ὕδνον. Fr., *hydne*. Ger., *Stachelpilz, Stachelschwamm*. Of Linnæus, a genus of the *Hydneæ*. The *Hydnacei* (Fr., *hydnacés*) are an order of the *Hymenomycetes*. The *Hydneæ* or *Hydnei* (Fr., *hydnées, hydnes*; Ger., *Hydneen*) are a division of hymenomycetous *Ectobasides* (by some authors made a natural order of *Fungi*). The *Hydnidæ* of Gray are the same (in part). [B, 19, 104, 121, 173, 180, 291 (*a*, 24).]—**Coral-like h., H. abietinum.** See *H. coralloides*.—**H. album.** Fr., *hydne blanc*. A species eaten in France. [B, 173 (*a*, 24).]—**H. alpinum.** The *Sphagnum alpinum*. [B, 173 (*a*, 24).]—**H. auriscalpium.** Fr., *hydne cure-oreille, brouquichons*. An edible species found on fir cones. [B, 19, 173 (*a*, 24).]—**H. barba Jovis.** Ger., *Bartschwamm*. The Jew's beard, a species growing on decayed branches and hollow trunks of trees. [B, 48, 71 (*a*, 14).]—**H. caput Medusæ.** Fr., *tête de Méduse*. Ger., *Medusenkopf*. A species eaten in Europe. [B, 173, 180 (*a*, 24).]—**H. carnosum.** See *H. repandum*.—**H. cervinum.** 1. See *H. imbricatum* (1st def.). 2. See *H. erinaceum*.—**H. clandestinum.** See *H. repandum*.—**H. coralloides, H. coralloideum, H. crispum.** Fr., *hydne coralloïde, chevelure des arbres, corne de cerf, couleur de chair*. A species eaten in Piedmont and Tuscany. [B, 173 (*a*, 24).]—**H. cubile β.** The *Sphagnum alpinum*. [B, 173 (*a*, 24).]—**H. cyathiforme.** Fr., *hydne en forme de coupe*. An edible species. [B, 173 (*a*, 24).]—**H. cyathiforme concrescens.** A variety of *H. cyathiforme*. [B, 173 (*a*, 24).]—**H. diversidens.** A species with a whitish fleshy pileus found on birch trees in Europe. It is recommended as a wholesome food. [B, 314, 316 (*a*, 35).]—**H. erinaceum.** Fr., *hydne hérisson*. Ger., *Igelschwamm*. An edible species found growing in the autumn on old oaks and beeches in southern and central Europe. [B, 173, 180 (*a*, 24).]—**H. erinaceum subterraneum.** Fr., *hydne hérisson souterrain*. A subterranean variety of *H. erinaceum*. [B, 173 (*a*, 24).]—**H. flavidum.** See *H. repandum*.—**H. imbricatum.** Fr., *hydne imbriqué* (1st def.), *barbe de bouc* (1st def.). Ger., *Habichtsschwamm* (1st def.). 1. Of Linnæus, the goat-beard or hawk-mushroom, an edible species growing in autumn on the ground. 2. Of Bolton, the *H. repandum*, or, according to Pomé, a variety of the latter. 3. Of Schumacher, the *H. subsquamosum*. [B, 173, 180 (*a*, 24).]—**H. lacinatum.** See *H. coralloides*.—**H. medium.** See *H. repandum*.—**H. muscoides.** Fr., *hydne muscoïde*. Of Schumacher, the *H. coralloides*; of Persoon, a variety of the same. [B, 173 (*a*, 24).]—**H. ramosum.** See *H. coralloides*.—**H. repandum, H. rufescens.** Fr., *hydne sinué* (ou *imbriqué*), *arresteron, barbe de chèvre* (ou *de vache*), *chamois, chevrette, chevrotine, pied de mouton blanc, rignoche, urchin*. Ger., *Stoppelpilz, weisser Ziegenfuss*. A species found late in the summer or in the autumn in woods, scattered in patches or occurring in large rings. It is an excellent article of food. [B, 19, 173, 180 (*a*, 24).]—**H. scrobiculatum.** See *H. cyathiforme*.—**H. sinuatum.** See *H. repandum*.—**H. squamosum.** 1. Of Schäffer, see *H. repandum*. 2. Of Bulliard, see *H. subsquamosum* (1st. def.).—**H. squarrosum.** See *H. imbricatum* (1st def.).—**H. stalachtitinum.** See *H. coralloides*.—**H. subsquamosum.** Fr., *hydne écailleux, chevroltine écailleuse, grande chevrette*. 1. A species eaten in France. 2. Var. *a* of Batsch, the *H. imbricatum* (1st def.). [B, 173 (*a*, 24).]—**H. zonatum.** Fr., *hydne zoné*. See *H. cyathiforme concrescens*.

HYDORRHŒA (Lat.), n. f. Hid(hu6d)-o2r-re'(ro2'e3)-a3. See HYDRORRHŒA.

HYDRA (Lat.), n. f. Hid(hu6d)'ra3. Gr., ὕδρα. 1. Of Linnæus, a genus of the *Tæniadæ* in the larval state. [L, 16.] 2. A genus of fresh-water *Hydrozoa*, remarkable for the fact that every part of it when cut in pieces becomes a new organism. [B.]—**H. hydatula.** See CYSTICERCUS *tenuicollis*.—**H. viridis.** A species of *H.* (2d def.) found in fresh water; it is green, and the tentacula, which number 8 or 10, are much shorter than the body. [*a*, 39.]

HYDRABIETIC ACID, HYDRABIETINIC ACID, n's. Hid-ra2b-i2-e2t'i2k, -i-e2t-i2n'i2k. Fr., *acide hydrabiétique*. A white, crystalline acid, $C_{44}H_{68}O_6$, fusing partially at 129° C., melting at 144° C., insoluble in water, soluble in alcohol and in ether; formed by treating sodium amalgam with abietic acid. [B, 46 (*a*, 39); L, 49 (*a*, 38).]

HYDRACETAMIDE, n. Hid-ra2s-e2t'a2m-i2d. Fr., *hydracétamide*. An amorphous body, $C_6H_{12}N_2$, formed by exposing aldehyde ammonia for some time to moisture, or to alcohol; soluble in water and in alcohol, insoluble in ether, and decomposed by boiling water. [B, 3, 4, 46, 93 (*a*, 38).]

HYDRACETIN, n. Hid-ra2s'e2t-i2n. From ὕδρα, a water-serpent. Fr., *hydracétine, pyrodine, acétyl-phényl-hydrazine*. Of Guttman, pure acetphenylhydrazide, $C_6H_5NH-NH.C_2H_3O$, formerly used in an impure state under the name of pyrodine. It forms a white, crystalline, odorless, and almost tasteless powder, soluble with difficulty in water (1 to 50), easily soluble in alcohol, a powerful reducing agent, and decidedly antipyretic and antirheumatic. It has been used in the form of an ointment in psoriasis. ["Proc. of the Am. Pharm. Assoc.," xxxviii (*a*, 14); "Therap. Gaz.," Aug. 11, p. 546 (*a*, 17).]

HYDRACHNE (Lat.), n. f. Hid(hu6d)-ra2k(ra3ch2)'ne(na). Gen., *-rach'nes*. From ὕδωρ, water, and ἄχνη, anything shaved off. Fr., *hydrachne*. Ger., *frieselartige Wasserblase*. A small watery vesicle of the skin or the mucous membrane of the mouth. [L, 50 (*a*, 14).]

HYDRACHNIDES (Lat.), n. f. pl. Hi2d(hu6d)-ra2k(ra3ch2)'-ni2d-ez(e2s). From ὕδωρ, water, ἄχνη, anything shaved off, and εἶδος, resemblance. Ger., *Wasserpocken, Lymphpocken*. 1. Vesicles with watery contents. [L, 50 (*a*, 14).] 2. The water-mites, a family of the *Acaridea*, found, when immature, as parasites on water-bugs and beetles, and, through life, on the gills of the fresh-water mussel. [B, 77 (*a*, 24).]

HYDRACID, n. Hi-dra2s'i2d. For deriv., see HYDROGEN and ACID. Lat., *hydracidum*. Fr., *hydracide*. See *Hydrogen* ACID.

HYDRACRYLAMIC ACID, n. Hi-dra2k-ri2l-a2m'i2k. Fr., *acide hydracrylamique*. Ger., *Hydracrylaminsäure*. See LACTAMIC ACID.

HYDRACRYLATE, n. Hi-dra2k'ri2l-at. Fr., *h*. Ger., *Hydracrylat*. A salt of hydracrylic acid. The h's are isomeric with the lactates, and have in general the constitution $Rn(C_3H_5O_3)n$, where Rn is a radicle of the combining power *n*. [B.]

HYDRACRYLIC ACID, n. Hi-dra2k-ri2l'i2k. Fr., *acide hydracrylique* (ou *lactique nonal*). Ger., *Hydracrylsäure*. A syrupy, acid liquid, $CH_2.OH.(CH.CH)O.OH$ (probably), or $C_3H_4O_2$-(acrylic acid) $+ H_2O = C_3H_6O_3$, isomeric with lactic acid, into which it is converted by prolonged boiling with an excess of soda. [B, 46 (*a*, 39).]

HYDRADEN (Lat.), n. m. and f. Hi2d(hu6d)'ra2d(ra3d)-e2n-(an). Gen., *-ad'enos* (*-is*). From ὕδωρ, water, and ἀδήν, a gland. See *Lymphatic* GLAND.

HYDRADENITIS (Lat.), n. f. Hid(hu6d)-ra2d(ra3d)-e2n-i(e)'-ti2s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ἀδήν, a gland (see also *-itis**). Inflammation of a lymphatic gland. [E.]—**H. axillaris.** See HIDROSADENITIS.

HYDRADÉNOMES (Fr.), n. E-dra3-da-nom. Of Jacquet and Darier, an affection of the skin in which red papules develop, varying in size from that of pin-heads to that of peas, without subjective symptoms, and which are said to be due to adenoid epithelioma of the sweat-glands. ["Ann. de dermat. et de syphil.," May, 1887, p. 317 (G).]

HYDRADENYPERTROPHIA (Lat.), n. f. Hid(hu6d)-ra2d-(ra3d)-e2n-ip(u6p)-e2r-tro(tro2)'fi2-a3. From ὕδωρ, water, ἀδήν, a gland, ὑπέρ, beyond measure, and τροφή, nourishment. Hypertrophy of a lymphatic gland. [A, 322.]

HYDRÆDOS (Lat.), n. f. Hid(hu6d)-red'(ra3'e2d)-o2s. Gen., *-ræd'oos* (*-ræd'ous*). From ὕδωρ, water, and αἰδώς, shame. A swelling of the female pudendum. [L, 50 (*a*, 14).]

HYDRÆMATOCELE (Lat.), n. f. Hid(hu6d)-re2m(ra3-e2m)-a2t(a3t)-o(o3)-se(ka)'le(la); in Eng., hid-re2m'a2t-o-sel. Fr., *hydrohématocèle*. A hæmatocele consecutive to a hydrocele. [A, 526.]

HYDRÆMIA (Lat.), n. Hi2d(hu6d)-rem'(ra3'e2m)-i2-a3. From ὕδωρ, water, and αἷμα, blood. Fr., *hydrémie, hydrohémie*. Ger., *Hydrämie, Wässerigkeit des Blutes*. It., *idroemia, idremia*. Sp., *hidrohemia*. A condition in which the watery constituent of the blood is abnormally increased; due to hæmorrhage, albuminuria, deficient excretion of water from the kidneys or skin, and possibly extensive burns. [D.]

HYDRÆMIC, adj. Hi-drem'i2k. Fr., *hydroémique*. Ger., *hydrämisch*. Of, pertaining to, or affected with hydræmia. [*a*, 17.]

HYDRAÉROPÉRICARDIE [Piorry] (Fr.), n. E-dra3-a-ro-pa-re-ka3r-de. From ὕδωρ, water, ἀήρ, air, περί, around, and καρδία, the heart. A collection of liquid and gas in the pericardium. [A, 250 (*a*, 21).]

HYDRAÉROPÉRITONIE [Piorry] (Fr.), n. E-dra3-a-ro-pa-re-to-ne. From ὕδωρ, water, ἀήρ, air, and περιτόναιον, the peritonæum. An effusion of water and gas into the peritonæum. [A, 250 (*a*, 21).]

HYDRAÉROPLEURIE [Piorry] (Fr.), n. E-dra3-a-ro-plu6-re. From ὕδωρ, water, ἀήρ, air, and πλευρά, the side. See HYDROPNEUMOTHORAX.

HYDRAFORM, adj. Hi'dra3-fo2rm. From ὕδρα, a water-serpent, and *forma*, form. Having the form of the common fresh-water polyp (*Hydra*). [B, 28 (*a*, 27).]

HYDRAGOGIA (Lat.), n. f. sing. and n. pl. Hid(hu6d)-ra3-goj-(gog)'i2-a3. Gr., ὑδραγωγία (from ὕδωρ, water, and ἄγειν, to lead). 1. (Sing.) hydragogue action. 2. (N. pl.) the lymphatics. [L, 50 (*a*, 14); L, 135 (*a*, 39).]

HYDRAGOGON (Lat.), n. n. Hi2d(hu6d)-ra3-go'go2n. From ὕδωρ, water, and ἄγειν, to conduct. 1. A hydragogue. 2. The *Ruscus aculeatus*. [B, 121 (*a*, 35).]

HYDRAGOGUE, adj. Hi'dra3-go2g. Gr., ὑδραγωγός (from ὕδωρ, water, and ἄγειν, to conduct). Lat., *hydragogus*. Fr., *h*. Ger., *wassertreibend*. Causing copious watery evacuations, especially by the bowels.

HYDRAGOGUM (Lat.), n. n. Hid(hu^{6}d)-ra^{3}-gog'u^{3}m(u^{4}m). A hydragogue remedy.—**H. Boylei.** See ARGENTI *h. Boylii.*

HYDRAL, adj. Hi'dra^{2}l. Lat., *hydralis* (from ὕδωρ, water). Of or pertaining to the *Hydrales* or the h. alliance (Lat., *nixus hydralis*). [*a*, 24.]

HYDRALCOHOL, n. Hi-dra^{2}l'ko-ho^{2}l. From ὕδωρ, water, and *alcohol*. Fr., *hydralcool*. Of Béral, brandy or spirit containing 22 per cent. of alcohol. [B, 119 (*a*, 38).]

HYDRALCOOLAT (Fr.), n. E-dra^{3}l-ko-o-la^{3}t. A hydrolate to which alcohol has been added. [B, 38 (*a*, 38).]

HYDRALCOOLATURE (Fr.), n. E-dra^{3}l-ko-o-la^{3}-tu^{6}r. A tincture made with diluted alcohol. [B, 38, 93 (*a*, 38).]

HYDRALCOOLÉ (Fr.), n. E-dra^{3}l-ko-o-la. A mixture of 1 part of rectified alcohol and 30 parts of water. [B, 119 (*a*, 38).]

HYDRALCOOLIQUE (Fr.), adj. E-dra^{3}l-ko-o-lek. Containing hydralcohol as an excipient. [B, 38 (*a*, 38).]

HYDRALES (Lat.), n. f. pl. Hid(hu^{6}d)-ral(ra^{3}l)'ez(e^{2}s). From ὕδωρ, water. Of Lindley, an alliance (*nixus*) of the *Epigynæ*, including the *Hydrocharideæ*; and subsequently the *Hydrocharideæ*, *Naiadaceæ*, and *Zosteraceæ*. [B, 170 (*a*, 24).]

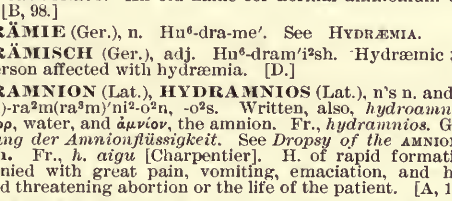
HYDRALIZARIN, n. Hi-dra^{2}l-i^{2}z'a^{2}r-i^{2}n. A dihydroxydihydranthraquinone, $C_{14}H_{10}O_4 = C_6H_4 \left| \begin{matrix} C(OH) \\ C(OH) \end{matrix} \right. C_6H_2(OH)_2$, occurring as a yellow precipitate when an alkaline alizarin solution is warmed with tin and treated with acid. [B, 4 (*a*, 38).]

HYDRALKOHOLOLYTON (Lat.), n. n. Hi^{2}d(hu^{6}d)-ra^{2}l(ra^{3}l)-ko-ho^{2}l-o^{2}l'i^{2}t(u^{6}t)-o^{2}n. See HYDROCOHOLOLYTON.

HYDRALLAS (Lat.), n. m. Hi(hu^{6})-dra^{2}l(dra^{3}l)'la^{2}s(la^{3}s). Gen., *lant'os* (*-lant'is*). From ὕδωρ, water, and ἀλλᾶς (see ALLANTOIS). Fr., *hydrallante*. Ger., *Metrydrorrhöe*. Of Dugès, excess of the allantoic fluid. [L, 41, 50 (*a*, 14).]

HYDRALMA (Lat.), **HYDRALME** (Lat.), n's f. Hi(hu^{6})-dra^{2}l-(dra^{3}l)'ma^{3}, -me(ma). Gen., *-al'mæ*, *-al'mes*. Gr., ὑδράλμη (from ὕδωρ, water, and ἅλμη, brine). Fr., *hydralme, eau de mer*. Ger., *Salzwasser*. Sea-water; in the pl., *hydralmæ* (Fr., *hydralmes*), salt, or sea-water baths. [L, 50 (*a*, 14); 135 (*a*, 39).]

HYDRALOGEN, n. Hid-ra^{2}l'o-je^{2}n. From ὕδωρ, water, ἅλς, salt, and γεννᾶν, to engender. Hydrochloric acid. [L, 80.]



HYDRAMIDE, n. Hid'ra^{2}m-i^{2}d(id). 1. An amide produced by the action of ammonia on an aromatic aldehyde (*e. g.*, hydrobenzamide). 2. An old name for ammonia, from the supposition that it was a compound of amidogen and hydrogen. [B, 46; Kane (B, 98).]—**H. carbonate.** An old name for normal ammonium carbonate. [B, 98.]

HYDRÄMIE (Ger.), n. Hu^{6}-dra-me'. See HYDRÆMIA.

HYDRÄMISCH (Ger.), adj. Hu^{6}-dram'i^{2}sh. Hydræmic; as a n., a person affected with hydræmia. [D.]

HYDRAMNION (Lat.), **HYDRAMNIOS** (Lat.), n's n. and m. Hid(hu^{6}d)-ra^{2}m(ra^{3}m)'ni^{2}-o^{2}n, -o^{2}s. Written, also, *hydroamnios*. From ὕδωρ, water, and ἀμνίον, the amnion. Fr., *hydramnios*. Ger., *Anhäufung der Amnionflüssigkeit*. See *Dropsy of the* AMNION.—**Acute h.** Fr., *h. aigu* [Charpentier]. H. of rapid formation, accompanied with great pain, vomiting, emaciation, and high fever, and threatening abortion or the life of the patient. [A, 15.]

HYDRANGEA (Lat.), n. f. Hid(hu^{6}d)-ra^{2}n(ra^{3}n^{2})'je^{2}(ge^{2})-a^{3}. Fr., *hydrangée, hydrangelle*. Of Bentham and Hooker, a genus of shrubs of the *Saxifrageæ*, tribe *Hydrangeæ*. Several species found in Japan are used in making tea. The *Hydrangeaceæ* (Fr., *hydrangéées*) of Dumortier are an order of calycifloral dicotyledons, including *H.*, etc. The *Hydrangeaceæ*, or *hydrangeads*, of Lindley are the same. The *Hydrangeæ* of Presl are a tribe or subdivision of the *Saxifraageæ*. The *Hydrangeeæ* of De Candolle and the *Hydrangieæ* of Liebmann and Zuccarini are the same. [B, 19, 34, 42, 104, 170 (*a*, 24).]—**American wild h.** See *H. arborescens.*—**Climbing h.** The *Schizophragma hydrangeoides*. [B, 275 (*a*, 24).]—**Common h.** In Europe, the *H. hortensis*; in America, the *H. arborescens*. [B, 5, 275 (*a*, 24).]—**H. arborescens.** Seven-barks, the common h. of North America. The root contains *hydrangin* (*q. v.*), is diuretic, and has been used for vesical calculi. In large doses it produces vertigo. [B, 5, 34 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," viii (*a*, 14).]—**H. azazai.** A species found in Japan, where it was formerly much used as an antiperiodic and tonic. ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]—**H. hortensia, H. hortensis.** The changeable h.; probably indigenous to China, where it has long been cultivated. [B, 19, 34, 104 (*a*, 24).]—**H. Thunbergii.** A species the leaves of which are used in Japan to make a tea called *ama-tsja*, or tea of Heaven. The sweetish leaves contain a white, neutral, crystalline body, $C_{10}H_9O_3$, melting at 128° C., sparingly soluble in cold or hot water and in cold alcohol or ether, readily soluble in boiling alcohol or ether, hot glacial acetic acid, chloroform, benzene, or dilute alkalies. ["Proc. of the Am. Pharm. Assoc.," xxxiv (*a*, 14).]—**H. vulgaris.** See *H. arborescens.*—**Lithiated h.** A proprietary preparation reputed to be made from a species of *H.* (probably *H. arborescens*) and to contain lithium; used as a lithontriptic and in gouty and rheumatic affections. [*a*, 22.]

HYDRANGEA HORTENSIS. [A, 327.]

HYDRANGEITIS (Lat.), n. f. Hid(hu^{6}d)-ra^{2}n(ra^{3}n^{2})-je^{2}(ge^{2})-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ἀγγεῖον, a vessel (see also *-itis**). See LYMPHANGEITIS.

HYDRANGEIOGRAPHY, HYDRANGEIOLOGY, n's. Hi-dra^{2}n-ji^{2}-o^{2}g'ra^{2}f-i^{2}, -o^{2}l'o-ji^{2}. Lat., *hydrangeiographia, hydrangeiologia* (from ὕδωρ, water, ἀγγεῖον, a vessel, and γράφειν, to write, or λόγος, understanding). Fr., *hydrangéiologie*. Ger., *Lehre von den Lymphgefässen*. The anatomy, etc., of the lymphatic vessels. [L, 50 (*a*, 14).]

HYDRANGEION (Lat.), n. n. Hid(hu^{6}d)-ra^{2}n(ra^{3}n^{2})-ji'(ge^{2}'i^{2})-o^{2}n. A lymphatic vessel. [A, 322.]

HYDRANGEIOTOMY, n. Hi-dra^{2}n-ji^{2}-o^{2}t'o^{2}m-i^{2}. Lat., *hydrangeiotomia* (from ὕδωρ, water, ἀγγεῖον, a vessel, and τομή, a cutting). Ger., *Zergliederung der Lymphgefässe*. Dissection of the lymphatic vessels. [L, 50 (*a*, 14).]

HYDRANGEIUM (Lat.), n. n. Hi(hu^{6})-dra^{2}n(dra^{3}n^{2})-ji'(ge^{2}'i^{2})-u^{3}m(u^{4}m). See HYDRANGEION.

HYDRANGELLE (Fr.), n. E-dra^{3}n^{2}-zhe^{2}l. See HYDRANGEA.

HYDRANGIARRHÉE [Piorry] (Fr.), n. From ὕδωρ, water, ἀγγειόν, a vessel, and ῥοία, a flowing. See *Pituitous* CATARRH.

HYDRANGIN, n. Hid-ra^{2}nj'i^{2}n. A crystalline glucoside obtained from the root of *Hydrangea arborescens*. It melts at 235° C., and, on increasing the temperature slightly, sublimes without decomposing. It is decomposed by dilute acids into glucose and a resin-like mass. [B, 5 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxv (*a*, 14).]

HYDRANGIUM (Lat.), n. n. Hid(hu^{6}d)-ra^{2}n(ra^{3}n^{2})-ji'(ge^{2}'i^{2})-u^{3}m(u^{4}m). See HYDRANGEION.

HYDRANISOIN, n. Hi-dra^{2}n-i^{2}s-o'i^{2}n. Fr., *hydranisoïne*. A crystalline substance, $C_{16}H_{18}O_4$, resembling cholesterin, obtained by treating anisic aldehyde with sodium amalgam. It is insoluble in water and in cold ether, soluble in alcohol, and melts at about 170° C. [B, 38, 46, 93 (*a*, 14).]

HYDRANOSOS (Lat.), **HYDRANOSUS** (Lat.), n's f. Hi(hu^{6})-dra^{2}n(dra^{3}n)'o^{2}s-o^{2}s, -u^{3}s(u^{4}s). Gen., *-os'eos* (*-dran'osis*), or *-dran'osi*. From ὕδωρ, water, and νόσος, disease. Fr., *hydranose*. Ger., *serose Ausschwitzung*. It., *idranosi*. 1. Of Lobstein, a serous exudation. 2. Of some modern pathologists, hydatosis. [L, 41, 44, 50, 135 (*a*, 14, 39).]

HYDRANTH, n. Hi'dra^{2}nth. From ὕδωρ, water, and ἄνθος, a flower. The proper nutritive zooid, or that part of it which carries the mouth and proper digestive cavity. [L, 193.]

HYDRANTOIC ACID, n. Hi-dra^{2}n-to'i^{2}k. See HYDANTOIC ACID.

HYDRANTOIN, n. Hi-dra^{2}n-to'i^{2}n. See HYDANTOIN.

HYDRANZOTHIN, n. Hid-ra^{2}n'zo-thi^{2}n. A white crystalline powder, $S_2(CS.NH_2)_2$, obtained by treating ammonium thiocyanate with a mixture of hydrochloric acid and ferric chloride, and in other ways. [B, 3 (*a*, 38).]

HYDRAPORIA (Lat.), n. f. Hi(hu^{6})-dra^{2}p(dra^{3}p)-o(o^{2})'ri^{2}-a^{3}. From ὕδωρ, water, and ἀπορία, want of resource. Fr., *hydraporie*. Ger., *Mangel an Wasser*. An insufficiency of water. [L, 50 (*a*, 14).]

HYDRARGICUS (Lat.), adj. Hi(hu^{6})-dra^{3}r'ji^{2}(gi^{2})-ku^{3}s(ku^{4}s). See HYDRARGYRATE.

HYDRARGOCHLORIDE, n. Hi-dra^{3}r-go-klor'i^{2}d(id). A compound of mercury bichloride with another chloride. [L, 56.]

HYDRARGURE (Fr.), n. E-dra^{3}r-gu^{6}r. From ὑδράργυρος, quicksilver. An amalgam of mercury and another metal. [B, 38 (*a*, 14).]

HYDRARGYRANATRIPSIS (Lat.), n. f. Hi(hu^{6})-dra^{3}r''ji^{2}r-(gu^{6}r)-a^{2}n(a^{3}n)-a^{3}-tri^{2}p(trep)'si^{2}s. Gen., *-trips'eos* (*-trips'is*). From ὑδράργυρος, quicksilver, and τρῖψις, friction. Fr., *hydrargyranatripsie*. Ger., *Quecksilbereinreibung*. Mercurial friction. [L, 50 (*a*, 14).]

HYDRARGYRATE, adj. Hi-dra^{3}r'ji^{2}-rat. Lat., *hydrargyratus, hydrargyricus* (from ὑδράργυρος, quicksilver). Fr., *hydrargyride*. Of, pertaining to, or containing mercury. [B.]

HYDRARGYRENTEROPHTHISIS (Lat.), n. f. Hi(hu^{6})-dra^{3}r-ji^{2}r(gu^{6}r)-e^{2}n-te^{2}r-o^{2}t(o^{2}f)'i^{2}s(thi^{2}s)-i^{2}s. Gen., *-phthis'eos* (*-oph'thisis*). From ὑδράργυρος, quicksilver, ἔντερον, an intestine, and φθίσις, phthisis. Fr., *hydrargyrentérophthisie*. Ger., *Quecksilberdarmschwindsucht*. A wasting disease of the intestines produced by the use of mercury. [L, 41, 50 (*a*, 14).]

HYDRARGYRENTRIPSIS (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r-(gu^{6}r)-e^{3}n-tri^{2}p(trep)′si^{2}s. Gen., *-trips′eos* (*-is*). From ὑδράργυρος, quicksilver, and τρῖψις, friction. Ger., *Quecksilberschmierkur.* A system of treatment consisting in the use of mercurial frictions. [L, 50 (*a*, 14).]

HYDRARGYREUX (Fr.), adj. E-dra^{3}r-zhe-ru^5. Containing mercury. [L, 41.]

HYDRARGYRIA (Lat.), n. f. Hi(hu^6)-dra^{3}r-jir(gu^{6}r)′i^2-a^3. From ὑδράργυρος, quicksilver artificially prepared from cinnabar ore. Fr., *hydrargyrie.* Ger., *Hydrargyrie, Quecksilberausschlag.* 1. See Eczema *mercuriale.* 2. Chronic mercurial poisoning.—**H. febrilis.** Fr., *hydrargyrie fébrile.* A variety of h. described by Alley. [G.]—**H. maligna.** Fr., *hydrargyrie maligne.* A very severe (sometimes fatal) form of h. or mercurial eczema described by Alley. [G.]—**H. mitis.** Fr., *hydrargyrie bénigne.* See Eczema *mercuriale.*

HYDRARGYRIASIS (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-i^2-a(a^3)′si^{2}s. Gen., *as′eos* (*-is*). From ὑδράργυρος, quicksilver. Fr., *hydrargyrose, hydrargyrie.* Ger., *Hydrargyrie, Quecksilberkrankheit.* Mercurialism, mercurial poisoning. [L, 41, 44, 50 (*a*, 14).]

HYDRARGYRIC, adj. Hi-dra^{3}r-ji^{2}r′i^{2}k. Lat., *hydrargyricus.* Fr., *hydrargyrique.* Mercuric, pertaining to mercury. [B; L, 41, 50 (*a*, 14).]

HYDRARGYRIDE (Fr.), adj. E-dra^{3}r-zhe-red. Resembling mercury. [L, 41.]

HYDRARGYRIE (Fr., Ger.), n. E-dra^{3}r-zhe-re, hu^6-dra^{3}r-gu^6-re′. See Hydrargyria and Hydrargyriasis.

HYDRARGYRIQUE (Fr.), adj. E-dra^{3}r-zhe-rek. See Hydrargyric.

HYDRARGYRIS (Lat.), n. f. Hi(hu^6)-dra^{3}r′ji^{2}r(gu^{6}r)-i^{2}s. From ὑδράργυρος, quicksilver. 1. Of Bonnsdorf, an amalgam. 2. In the pl., *hydrargyrides*, of Beudant, a family of ponderable bodies, having mercury as their type. [L.]

HYDRARGYRISM, n. Hi-dra^{3}r′ji^2-ri^{2}z′m. Lat., *hydrargyrismus.* See Hydrargyriasis.

HYDRARGYRIUM (Lat.), n. n. Hid(hu^{6}d)-ra^{3}r-ji^{2}r(gu^{6}r)′i^2-u^{3}m(u^{4}m). See Eczema *mercuriale.*

HYDRARGYROCYANATE (Fr.), n. E-dra^{3}r-zhe-ro-se-a^3-na^{2}t. A salt of hydrargyrocyanic acid. [B, 38 (*a*, 34).]

HYDRARGYROCYANIC ACID, n. Hi-dra^{3}r″ji^{2}r-o-si-a^{2}n′-i^{2}k. Fr., *acide hydrargyrocyanique.* An acid produced by the combination of hydrogen with mercury cyanide. [B, 38 (*a*, 14).]

HYDRARGYRO-KALIUM (Lat.), n. n. Hi(hu^6)-dra^{3}r″ji^{2}r-(gu^{6}r)-o(o^3)-kal(ka^{3}l)′i^2-u^{3}m(u^{4}m). A compound of mercury and potassium. [B.]—**H.-k. bijodatum.** See Mercury *and potassium iodide.*—**H.-k. cyanido-jodatum.** See Mercury *and potassium iodocyanide.*—**H.-k. subsulfurosum.** See Mercury *and potassium thiosulphate.*

HYDRARGYROMANIA (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-o(o^3)-man(ma^{3}n)′i^2-a^3. From ὑδράργυρος, quicksilver, and μανια, madness. Fr., *hydrargyromanie.* Insanity attributed to the excessive use of mercury. [L, 50 (*a*, 14).]

HYDRARGYROPERICARDITIS (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-o(o^3)-pe^{2}r-i^2-ka^{3}rd-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From ὑδράργυρος, quicksilver, περί, around, and καρδία, the heart (see also *itis**). Fr., *hydrargyropéricardite.* Mercurial pericarditis. [L, 50 (*a*, 14).]

HYDRARGYROPHTHALMIA (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-o^{2}f-tha^{2}l(tha^{3}l)′mi^2-a^3. From ὑδράργυρος, quicksilver, and ὀφθαλμία, ophthalmia. Fr., *hydrargyrophthalmie.* Ger., *mercurielle Ophthalmie.* A mercurial ophthalmia. [L, 50 (*a*, 14).]

HYDRARGYRO-PLUMBUM (Lat.), n. n. Hi(hu^6)-dra^{3}r″-ji^{2}r(gu^{6}r)-o(o^3)-plu^{3}m(plu^{4}m)′bu^{3}m(bu^{4}m). From *hydrargyrum*, quicksilver, and *plumbum*, lead. A compound of mercury and lead. [B.]—**H.-p. jodatum.** See Lead *and mercury iodide.*

HYDRARGYROPNEUMATIC, adj. Hi-dra^{3}r-ji^2 ro-nu^2-ma^{2}t′-i^{2}k. From ὑδράργυρος, quicksilver, and πνεῦμα, air. Fr., *hydrargyropneumatique.* Pertaining to mercury and to a gas (see *H.* trough). [L, 41, 50 (*a*, 14).]

HYDRARGYROPSYDRACIA (Lat.), n. f. Hi(hu^6)-dra^{3}r″-ji^{2}r(gu^{6}r)-o(o^{2}p)-si^{2}d(su^{6}d)-ra(ra^3)′si^2(ki^2)-a^3. From ὑδράργυρος, quicksilver, and ψύδραξ, a blister. Fr., *hydrargyropsydracie.* Ger., *mercurielle Wasserkrätze.* An eruption of mercurial pustules. [L, 50 (*a*, 14).]

HYDRARGYROS (Lat.), n. m. Hi(hu^6)-dra^{3}r′ji^{2}r(gu^{6}r)-o^{2}s. Gr., ὑδράργυρος. See Hydrargyrum.

HYDRARGYROSIALORRHŒA (Lat.), n. f. Hi(hu^6)-dra^{3}r″-ji^{2}r(gu^{6}r)-o(o^3)-si(si^2)-a^{2}l(a^{3}l)-o^{2}r-re′(ro^2′e^2)-a^3. From ὑδράργυρος, quicksilver, σίαλον, saliva, and ῥοία, a flowing. Fr., *hydrargyrosialorrhée.* Mercurial salivation. [L, 50 (*a*, 14).]

HYDRARGYROSIS (Lat.), n. f. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-o′si^{2}s. Gen., *-os′eos* (*-os′is*). From ὑδράργυρος, quicksilver. Fr., *hydrargyrose.* 1. Hydrargyriasis. 2. The use of mercurial frictions or fumigations. [L, 41, 44, 50 (*a*, 14).]

HYDRARGYROSO-AMMONICUS (Lat.), adj. Hi(hu^6)-dra^{3}r)-ji^{2}r(gu^{6}r)-os″o(o^3)-a^{2}m(a^{3}m)-mon′i^{2}k-u^{3}s(u^{4}s). Containing both ammonium and mercury. [B.] See Azotas *h.-a.*

HYDRARGYROSTOMATITIS (Lat.), n. f. Hi(hu^6)-dra^{3}r″-ji^{2}r(gu^{6}r)-o(o^3)-stom(sto^{2}m)-a^{2}t(a^{3}t)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From ὑδράργυρος, quicksilver, and στόμα, the mouth (see also *-itis**). 1. Mercurial stomatitis. 2. Of Trenile, mercurial salivation. [L, 50 (*a*, 14).]

HYDRARGYROSUS (Lat.), adj. Hi(hu^6)-dra^{3}r-ji^{2}r(gu^{6}r)-os′-u^{3}s(u^{4}s). Mercurous. [B.]

HYDRARGYROTRIPSIS (Lat.), n. f. Hi(hu^6)-dra^{3}r″ji^{2}r-(gu^{6}r)-o(o^3)-tri^{2}p(trep)′si^{2}s. Gen., *-trips′eos* (*-trips′is*). See Hydrargyranatripsis.

HYDRARGYRUM (Lat.), n. n. Hi(hu^6)-dra^{3}r′ji^{2}r(gu^{6}r)-u^{3}m-(u^{4}m). Gr., ὑδράργυρος (from ὕδωρ, water, and ἄργυρος, silver). Guz., *páro.* Hind., Mah., Beng., *párá.* Ar., *jibaka.* Pers., *simába, jivaha.* Sanscr., *páradaha, rasama.* Fr., *mercure du commerce* [Fr. Cod.] (2d def.), *mercure purifié* [Fr. Cod.] (3d def.). Ger., *Quecksilber.* It., *idrargiro.* Sp., *mercurio, azogue* [Sp. Ph.] (2d def.), *mercurio puro* [Sp. Ph.] (3d def.). Roum., *mercuriu* [Roum. Ph.] (3d def.). 1. Of Pliny, mercury artificially prepared by roasting cinnabar with charcoal. 2. Of the Gr. Ph., crude mercury. 3. Of the U. S. Ph., Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph., Belg. Ph., Netherl. Ph., Dan. Ph., Finn. Ph., and Swiss Ph., mercury purified by distillation for medicinal use. [*a*, 38.]—**Acetas hydrargyri, Acetas protoxydi hydrargyri** [Belg. Ph.]. See Mercury *acetate.*—**Adeps hydrargyri muriate oxygenato medicatus.** See Pommade *de Cirillo.*—**Adeps hydrargyri nitrate medicatus.** See *Unguentum hydrargyri nitratis.*—**Adeps hydrargyri oxido rubro et plumbi acetate medicatus.** See Pomatum *de Regent.*—**Adeps hydrargyro medicatus.** See *Unguentum hydrargyri.*—**Adeps nitrate hydrargyri medicatus.** See *Unguentum hydrargyri nitratis.*—**Ammoniuretum hydrargyri.** See *Ammoniated* mercury.—**Aqua hydrargyri muriatici corrosivi cum opio.** See *Collyrium ex hydrargyro muriatico corrosivo.*—**Aqua hydrargyri muriatici mitis nigra.** See *Lotio hydrargyri nigra.*—**Balneum hydrargyri bichloridi.** See Balneum *mercuriale.*—**Bichloretum hydrargyri.** See Mercury *bichloride.*—**Bicyanuretum hydrargyri.** Mercury bicyanide. [B.]—**Bisulphuretum hydrargyri (rubrum).** See *Red* mercury *sulphide.*—**Boras hydrargyri.** A preparation, no longer official, made by triturating together 22 parts of calomel and 26 of borax, adding a quantity of water slowly, decanting, then thoroughly washing and drying the precipitate, or, according to some of the older pharmacopœias, by dissolving 2 parts of calomel in 2 of concentrated nitric acid, diluting with 4 parts of water, then adding a solution of borax, washing, and drying. [B, 119 (*a*, 38).]—**Borussias hydrargyri.** Mercury cyanide. [*a*, 38.]—**Calx hydrargyri rubra.** Red mercury oxide. [*a*, 38.]—**Carbonas hydrargyri.** See Mercury *carbonate.*—**Ceratum hydrargyri.** See Ceratum *mercuriale.*—**Ceratum hydrargyri sulphureti rubri.** See *Ceratum* cinnabaris.—**Collyrium ex hydrargyro (muriatico) corrosivo.** Syn.: *aqua hydrargyri muriatici corrosivi cum opio.* A preparation, no longer official, consisting of a grain (6 centigrammes) of corrosive sublimate, either tincture of opium, extract of opium, or Sydenham's laudanum in varying amount, and rose-water or infusion of elder-flowers varying from 37 to 180 grammes. Some of the pharmacopœias added to the collyrium a little licorice, quince-seed, or tragacanth. [B, 119 (*a*, 38).]—**Collyrium ex muriate hydrargyri oxygenato.** A preparation, no longer official, consisting of 1 grain of corrosive sublimate and 6 oz. of distilled water. [B, 119 (*a*, 38).]—**Cyanuretum hydrargyri** [Belg. Ph.]. See Mercury *cyanide.*—**Decoctum hydrargyri.** Fr., *décoction de mercure composée.* A decoction, formerly official, made by boiling 1 part of mercury and 6 parts of tansy-water, and then adding 1 part syrup of peach-blossoms. [B, 119 (*a*, 38).]—**Deutochloridum hydrargyri.** See Mercury *bichloride.*—**Deutoioduretum hydrargyri** [Belg. Ph.]. See Mercury *biniodide.*—**Deutosulphas hydrargyri.** See Mercury *sulphate.*—**Deutosulphuretum hydrargyri rubrum.** See *Red* mercury *sulphide.*—**Emplastrum ammoniaci cum hydrargyro.** See under Ammoniacum.—**Emplastrum cum hydrargyro** [Fr. Cod.]. See *Emplastrum hydrargyri* (2d def.).—**Emplastrum ex hydrargyro (seu hydrargyri** [U. S. Ph., Br. Ph., Ger. Ph., etc.]). Fr., *emplâtre* (et *sparadrap* [Fr. Cod.] (2d def.) *mercuriel.* Ger., *Quecksilberpflaster.* It., *empiastro di mercurio, empiastro mercuriale.* Sp., *emplasto mercurial simple.* Roum., *emplastru mercuriale simplu* [Roum. Ph.] (1st def.), *emplastru mercuriale compus* (2d def.). Syn.: *emplastrum cum hydrargyro* [Fr. Cod.] (2d def.), *emplastrum hydrargyro compositum* [Swiss Ph.] (2d def.). 1. Of the U. S. Ph., Br. Ph., Ger. Ph., etc., a preparation consisting of metallic mercury triturated with some fatty matter till the separate globules of the metal cease to be visible, and incorporated with lead plaster. 2. Of the Fr. Cod., Swiss Ph., Roum. Ph., a preparation made by triturating 60 parts of metallic mercury with 30 of styrax, 10 of larch turpentine, 1 part volatile oil of lavender till the mercury globules become invisible, and adding this mixture to a lead plaster (200 parts lead) [Fr. Cod., Swiss Ph.], or by adding 40 parts styrax and 2 of oil of lavender to the plaster prepared according to def. 1 [Roum. Ph.]. There are further put into the preparation yellow wax (10 parts [Fr. Cod., Swiss Ph.], 20 [Roum. Ph.]), colophony (10 parts [Fr. Cod.], 20 parts [Roum. Ph.]) (for which the Swiss Ph. substitutes 10 parts of pine resin), gum ammoniac, powdered myrrh, and olibanum (3 parts each [Fr. Cod.], 4 parts each [Swiss Ph.], 5 parts each [Roum. Ph.]), powdered saffron (2 parts [Fr. Cod., Swiss Ph.], 3 parts [Roum. Ph.]), and in the Fr. Cod., 3 of powdered bdellium. The amount of mercury in the different preparations is 33 per cent. [Br. Ph.], 40 per cent. [U. S. Ph.], 20 per cent. [Ger. Ph.], 18 per cent. [Fr. Cod.], and in the other pharmacopœias varies from 12½ to 30 per cent. [B, 95, 113 (*a*, 38).]—**Emplastrum hydrargyri compositum.** See *Emplastrum hydrargyri* (2d def.).—**Emplastrum hydrargyri cum conio.** A plaster, formerly official, consisting of equal parts of mercurial plaster and hemlock plaster worked together. [B, 119 (*a*, 38).]—**Emplastrum hydrargyri cum conio et opio.** A plaster, formerly official, consisting of 6 parts of emplastrum hydrargyri cum conio and 1 part of opium thoroughly mixed. [B, 119 (*a*, 38).]—**Liquor hydrargyri nitratis** [U. S. Ph.]. Fr., *liqueur d'azotate de mercure.* Syn.: *liquor hydrargyri nitrici* (*oxydati* [Swiss Ph.]), *h. nitricum oxydatum liquidum* [Gr. Ph.], *nitras hydrargyri liquidus* [Belg. Ph.], *solutio nitratis hydrargyri* [Swed. Ph.], *liquor nitratis hydrargyri.* A preparation consisting of an extemporaneously prepared mercuric nitrate, $Hg(NO_3)_2$, dissolved in water with the addition of nitric acid. The U. S. preparation is made by dissolving 40 parts of red mercury oxide (mercuric oxide), corresponding to 37 of mercury, in a mixture of 45 of nitric acid and 15 of water. The Swedish preparation is a solution of 10 parts of pure mercury in 36 of nitric acid; the Belgian, one of 10 parts of pure mercury in 15 of nitric acid and 5 of water; the Swiss and Greek preparation is a solution of 10 parts of red mercury oxide in a sufficient quantity of nitric acid and water. The sp. gr. of the U. S. preparation is 2·100, and it contains about 50 per cent. of mercuric nitrate, with a little free nitric acid. The sp. gr. of the other preparations varies from 1·440 to 1·185. The preparation is a transparent, nearly [U. S. Ph.] or quite [Belg. Ph., Gr. Ph., Swiss Ph., Swed. Ph.] colorless liquid of strongly acid reaction. [B, 95 (*a*, 38).] —**Liquor hydrargyri nitratis acidus** [Br. Ph.]. Fr., *azotate mercurique liquide, nitrate acide de mercure* [Fr. Cod.]. Sp., *nitrato mercúrico ácido* [Sp. Ph.], *mercuriu azoticu acidulatu licuidu* [Roum. Ph.]. Syn.: *liquor hydrargyri nitrici oxydati acidus.* A colorless, very strongly acid and caustic preparation of mercuric nitrate, $Hg(NO_3)_2$, dissolved in water with nitric acid in excess, made by dissolving 4 parts of pure mercury in 7·1 of nitric acid and 1·5 of water [Br. Ph.]; or in 6·6 of nitric acid and 1·4 of water [Fr. Cod.]; or 8 [Sp. Ph.], or 6 [Roum. Ph.] of nitric acid and 2 of water. The sp. gr. of the British preparation is about 2·0, that of the French and Spanish preparations about 2·246. [B, 95 (*a*, 38).] —**Liquor hydrargyri nitrici** (**oxydati** [Swiss Ph.]). See *Liquor hydrargyri nitratis.*—**Liquor hydrargyri nitrici oxydati acidus.** See *Liquor hydrargyri nitratis acidus.*—**Liquor hydrargyri nitrici oxydulati** [Ger. Ph., 1st ed., Swiss Ph.]. Syn.: *h. nitricum oxydulatum liquidum* [Gr. Ph.] (seu *solutum* [Russ. Ph.]), *liquor* [Finn. Ph.] (seu *solutio* [Dan. Ph.]) *nitratis hydrargyrosi.* Solution of mercurous nitrate; a clear, colorless liquid of acid reaction, made by dissolving mercurous nitrate crystals in nitric acid and water. The German and Russian preparations contain 10 parts of mercurous nitrate in 1·5 part of acid and 88·5 parts of water; the Swiss preparation, 10 parts of mercurous nitrate in 2 of nitric acid and 88 of water; the Greek, 8 parts of mercurous nitrate in 1 part of nitric acid and sufficient water; the Danish, 20 parts of mercurous nitrate in 3 of acid and 177 of water; the Finnish, 21 parts of mercurous nitrate in 3 of acid and 165 (or as much more as may be necessary) of water. [B, 95 (*a*, 38).]—**Liquor hydrargyri oxymuriatis.** Fr., *hydrolé mercuriel alcoolisé.* Syn.: *murias hydrargyri spirituosus liquidus, hydrargyri murias spirituosus liquidus.* A preparation, no longer official, consisting of 6 grains of corrosive sublimate and a pound of rectified spirit, or of 8 grains of corrosive sublimate, 15 oz. of distilled water, and 1 oz. of rectified alcohol. [B, 119 (*a*, 38).]—**Liquor hydrargyri perchloridi** [Br. Ph.]. Syn.: *liquor mercurialis Van Swieten* [Swiss Ph.], *liquor sublimati corrosivi* [Belg. Ph.], *liquor hydrargyri ammoniati* (seu *bichlorati corrosivi* [Pruss. Ph., 6th ed.]), *liquor Van Swieten* [Belg. Ph., Fr. Cod., Sp. Ph., Swiss Ph.]. Fr., *soluté de bichlorure de mercure* [Fr. Cod.]. Sp., *solución hidro-alcohólica de cloruro mercúrico* [Sp. Ph.]. A solution of 1 part of corrosive sublimate in 875 parts of water and 1 part of ammonium chloride [Br. Ph.], or in 480 parts of water and 1 part of ammonium chloride [Pruss. Ph.], or in 900 parts of water and 100 of 80-per-cent. alcohol [Fr. Cod.], or in 99 parts of water and 100 of 92-per-cent. alcohol [Belg. Ph.], or in 500 parts each of water and of 83⅛-per-cent. alcohol [Swiss Ph.], or in 1,100 parts of water and 100 of 90-per-cent. alcohol [Sp. Ph.]. [B, 95 (*a*, 38).]—**Liquor nitratis hydrargyri.** See *Liquor hydrargyri nitratis.*—**Lotio hydrargyri.** 1. See *Lotio hydrargyri nigra.* 2. A solution of 1 part of corrosive sublimate in 288 parts of distilled water, with or without the addition of a small amount of hydrochloric acid. [B, 119 (*a*, 38).] Cf. Eau *de Van Swieten* and *Liquor hydrargyri perchloridi.*—**Lotio hydrargyri flava** [Br. Ph.] (seu **lutea**). Fr., *eau phagédénique, hydrolé mercuriel calcaire.* It., *acqua fagedenica, lozione mercuriale gialla.* Syn.: *aqua phagedænica* (Fr. Cod.). Yellow lotion of mercury, yellow-wash; a preparation made by adding 36 grains (1 part) of corrosive sublimate to an imp. pint (243 parts) of lime-water [Br. Ph.], or by adding one part of corrosive sublimate dissolved in 25 parts of water to 300 parts of lime-water [Fr. Cod.]. It consists of a yellowish powder (yellow mercury oxide) suspended in a clear liquid. [B.]—**Lotio hydrargyri nigra** [Br. Ph.]. Fr., *eau phagédénique noire.* It., *lozione mercuriale nera, aqua fagedenica nera.* Syn.: *aqua phagedænica nigra, aqua hydrargyri muriatici mitis nigra.* Black lotion of mercury, black-wash; a preparation made by adding a drachm of calomel to an imp. pint of lime-water (= 1 part of calomel to 146 parts of lime-water). It is a liquid containing in suspension a black powder. The latter consists of mercurous oxide mixed with a little calomel; the former, of an aqueous solution of calcium chloride. [B.]—**Massa hydrargyri** [U. S. Ph.]. Fr., *pilules mercurielles simples* [Fr. Cod.]. Syn.: *pilulæ hydrargyri* [Br. Ph., Swed. Ph., U. S. Ph., 1870] (seu *hydrargyricæ* [Belg. Ph.], seu *mercuriales cæruleæ* [Swiss Ph.], seu *cum hydrargyro* [Fr. Cod.]). Mass of mercury, blue mass, blue pill, a preparation consisting of mercury incorporated into a pilular mass in a state of such fine subdivision that no metallic globules can be discovered with a glass of low magnifying power. The U. S. preparation contains 33 parts of mercury, 3 of glycerin, and 34 of honey of rose, triturated together and gradually incorporated with 5 parts of licorice-root and 25 of marsh-mallow in No. 60 powder. The Belgian preparation contains 33 parts of mercury triturated with 33 of honey and 7 of powdered flowers of French rose, and then incorporated with 10 of sugar and 17 of powdered licorice-root. The other preparations are triturations of 2 parts of mercury with 3 of conserve of rose, mixed with 1 part of powdered licorice-root, distributing it uniformly. The Br. Ph. directs that pills from 3 to 8 grains be made of the mass, and the Fr., Swiss, and Swed. preparations contain 5 centigrammes of mercury to a pill. [B, 95 (*a*, 38).]—**Mixtura gummosa ex hydrargyro muriatico corrosivo.** A preparation, for external application, made by dissolving 1 part each of corrosive sublimate and sal ammoniac in 15 parts of water and adding 1¼ part of gum arabic. It is no longer official. [B, 119 (*a*, 38).]—**Mucilago hydrargyri.** See *Syrupus hydrargyri.* —**Murias hydrargyri corrosivus.** See Mercury *bichloride.*— **Murias hydrargyri mitis** (seu **oxydulati**). Pills (no longer official) made of 30 centigrammes of calomel, 2 grammes of jalaproot, and a sufficient quantity of gum-arabic mucilage to make 15 pills. [B, 119 (α, 38).]—**Pilulæ ex hydrargyro miti cum sulphure stibiato aurantiaco.** See *Pilulæ* ANTIMONII *compositæ*.—**Pilulæ ex hydrargyro muriatico miti.** See *Pilulæ ex* MERCURIO *dulci*.—**Pilulæ ex hydrargyro solubili Hahnemanni.** Pills of a mass consisting of 40 centigrammes of Hahnemann's soluble mercury and 7·6 grammes of licorice extract. Each pill should contain 9 milligrammes of the mercury, according to one of the older pharmacopœias, 26 milligrammes according to another. [B, 119 (α, 38).]—**Pilulæ hydrargyri** [Br. Ph., Swed. Ph., U. S. Ph., 1870]. See *Massa hydrargyri*.—**Pilulæ hydrargyri bichlorati.** Syn.: *pilulæ chloreti hydrargyrici corrosivi* [Finn. Ph.]. Pills containing each 8 milligrammes of mercuric chloride, 8 of ammonium chloride, 8 of sugar, and 32 of bread-crumb. [B, 95.]—**Pilulæ hydrargyri bichlorati opiatæ.** See *Pilules de* CHLORURE *mercurique opiacées*.—**Pilula hydrargyri gummosa.** A pilular mass made by triturating together 1 part of mercury, 3 parts of powdered gum arabic, and a sufficiency of syrup of rhubarb, and adding 4 parts of bread crumb. [B, 119 (α, 38).]—**Pilulæ hydrargyri jalappinæ.** Two-grain pills consisting of 1 part of calomel and from 3 to 8 parts either of jalap soap alone, or of jalap resin with medicinal soap or sapo alicantinus. Sometimes tincture of orange is added. [B, 119 (α, 38).]—**Pilulæ hydrargyri jodati.** See *Pilulæ hydrargyri protojodati compositæ*.—**Pilulæ hydrargyri jodati opiatæ.** See *Pilules d'*IODURE *mercureux opiacées*.—**Pilulæ hydrargyri protojodati compositæ** [Swiss Ph.]. Syn.: *pilulæ projodurati hydrargyri Ricordi* [Gr. Ph.], *pilulæ hydrargyri jodati*. Pills containing 3 parts of mercurous iodide, 6 of extract of hemlock, and either 3 of extract of lettuce [Swiss Ph.] or 1 part of extract of opium, and 3 parts of lactucarium [Gr. Ph.]. [B, 95 (α, 38).]—**Pilulæ hydrargyri subchloridi compositæ** [Br. Ph.]. See *Pilulæ* ANTIMONII *compositæ*.—**Pilulæ protojodurati hydrargyri Ricordi** [Gr. Ph.] See *Pilulæ hydrargyri protojodati compositæ*.—**Pilulæ purgantes cum hydrargyro muriatico miti.** See *Pilulæ ex hydrargyro catharticæ*.—**Pilulæ submuriatis hydrargyri compositæ.** See *Pilulæ* ANTIMONII *compositæ*.—**Plasma hydrargyri ammoniati** [Ph. of the Roy. Lond. Ophth. Hosp.]. A preparation made by mixing thoroughly 126 parts of glycerin, 18 of starch, and 5 of ammoniated mercury. ["Proc. of the Am. Pharm. Assoc.," x (α, 14).]—**Plasma hydrargyri oxidi** [Ph. of the Roy. Lond. Ophth. Hosp.]. A preparation made by mixing thoroughly 252 parts of glycerin, 36 of starch, and 15 of red mercury oxide. ["Proc. of the Am. Pharm. Assoc.," x (α, 14).]—**Plasma hydrargyri subnitratis** [Ph. of the Roy. Lond. Ophth. Hosp.]. A preparation made by mixing thoroughly 189 parts of glycerin, 27 of starch, and 10 of mercury protonitrate. ["Proc. of the Am. Pharm. Assoc.," x (α, 14).]—**Pomatum cum hydrargyro** (**simplex**) [Fr. Cod.]. See *Unguentum hydrargyri*.—**Protochloruretum hydrargyri.** See MERCURY *chloride*.—**Protoioduretum hydrargyri.** See MERCURY *protiodide*.—**Protonitras hydrargyri** [Belg. Ph.]. See *Red* MERCURY *sulphide*.—**Sulphuretum hydrargyri stibiatum.** See ÆTHIOPS ANTIMONIALIS.—**Supermurias hydrargyri.** See MERCURY *bichloride*.—**Suppositoria hydrargyri** [Br. Ph., Belg. Ph.]. A preparation made by melting 120 grains of oil of theobroma, adding 60 grains of mercurial ointment containing 47 per cent. of mercury, and molding into suppositories containing each 15 grains of the mixture, or 2·35 grains of mercury. [B, 95 (α, 38).]—**Syrupus ex oxydulo hydrargyri Hahnemanni.** A preparation consisting of 1¼ part of Hahnemann's soluble mercury, 4 parts of gum arabic, and a sufficiency of honey of rose, added to 90 parts of syrup of marsh-mallow. [B, 119 (α, 38).]—**Syrupus hydrargyri.** Syn.: *mucilago hydrargyri*. A preparation consisting of 1 part of mercury, 3 parts of gum arabic, and a varying quantity of water, triturated till the mercury is extinguished, and then added to 4 parts of syrup of poppy-heads, or 32 of syrup of sugar, or to a mixture of 32 parts of syrup of violets, and 16 of water of elder-flowers. [B, 119 (α, 38).]—**Tartras hydrargyri.** See MERCURY *tartrate*.—**Trochisci hydrargyri chlorati.** See *Tablettes de* CALOMEL.—**Trochisci muriatis oxygenati hydrargyri.** Lozenges consisting of 1 part of corrosive sublimate, 2 parts of starch, and gum arabic enough to make a homogeneous mass; or of 4 parts of corrosive sublimate, 7 parts of starch, 1 part of tragacanth, and water enough to make the mass homogeneous. [B, 119 (α, 38).]—**Unguentum deutoxydi hydrargyri nitrati, Unguentum ex hydrargyro oxydato rubro.** See *Unguentum hydrargyri oxidi rubri*.—**Unguentum hydrargyri** [U. S. Ph., Br. Ph., Belg. Ph., Austr. Ph., Hung. Ph. (2d ed.), Dan. Ph., Finn. Ph., Gr. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]. Fr., *pommade mercurielle faible* (*ou à parties égales* [Fr. Cod.]). Ger., *graue Quecksilbersalbe*. It., *unguento di mercurio*. Sp., *pomada mercurial doble* (*ó simple*) [Sp. Ph.]. Roum., *unguento de mercuriu simplu* [Roum. Ph.]. Syn.: *unguentum hydrargyri cinereum* [Ger. Ph., Russ. Ph., Swiss Ph.], *pomatum cum hydrargyro* (*simplex*) [Fr. Cod.]. Mercurial (or blue) ointment; a preparation consisting of metallic mercury intimately mixed with fatty matter so that the separate mercurial globules are no longer visible to the naked eye, or under a weak magnifying power. In the U. S. Ph., the Br. Ph., and the Fr. Cod., the proportion of fatty matter to mercury is as one to one; in the Ger. Ph. as two to one. The U. S. Ph. preparation contains 500 parts of mercury, 225 each of lard and suet, and 40 of compound tincture of benzoin; the Br. Ph. preparation, 16 parts each of mercury and lard, and 1 part of suet; the Fr. Cod. preparation, 15 parts each of mercury and benzoinated lard; the Ger. and Finn. preparations, 10 parts of mercury, 13 of lard, and 7 of suet; the Austr. preparation, 4 parts of mercury, 6 of lard, and 2 of suet; the Dan. preparation, 9 parts of mercury, 22 of lard, and 14 of suet; the Gr. preparation, 3 parts of mercury, 4 of lard, and 2 of suet; the Belg. Ph. preparation, 50 parts of mercury, 40 of benzoinated lard, and 5 each of suet and oil of almonds; the Swiss preparation, 7 parts of mercury, 10 of lard, and 4 of suet; the Hung. Ph. preparation, 300 parts of mercury, 450 of lard, and 150 of suet; the Dutch Ph. preparation, 3 parts of mercury and 7 of lard; the Norw. Ph. preparation, 20 parts of mercury, 60 of lard, and 20 of suet; the Roum. preparation, 35 parts of mercury, 40 of lard, and 20 of suet; the Russ., 7 parts of mercury, 8 of lard, and 4 of suet; the Swed. Ph., 9 parts of mercury and 18 each of lard and suet; the Sp. preparation, 6 parts of mercury and 6 of lard. The Fr. Cod. has an additional preparation, the *pommade mercurielle faible* (*onguent mercuriel simple, pomatum cum hydrargyro simplex*), which consists of the ordinary mercurial ointment (*pommade mercurielle à parties égales*), diluted with 3 times its weight of benzoinated lard; the Belg. Ph., a preparation, the *unguentum hydrargyri mitius*, consisting of the ordinary mercurial ointment diluted with an equal weight of benzoinated lard; the Gr. Ph., the *unguentum hydrargyri Lowrierii*, a preparation consisting of equal parts of mercury and simple ointment; the Roum. Ph., the *unguentum de mercuriu dublu*, consisting of 100 parts of mercury and 50 parts each of lard and oil of theobroma; and the Sp. Ph., two additional preparations, the *pomada mercurial simple*, consisting of the ordinary mercurial ointment diluted with twice its weight of lard, and the *pomada mercurial terciada*, consisting of 2 parts of the ordinary ointment and 1 part of lard. [B, 95 (α, 38).]—**Unguentum hydrargyri album** [Ger. Ph., Swiss Ph., Gr. Ph.] (**seu amidato-bichlorati** [Russ. Ph.], **seu ammoniati** [U. S. Ph., Br. Ph.]). Ger., *weisse Quecksilbersalbe*. It., *unguento di mercurio ammoniato*. Syn.: *unguentum chloreti hydrargyrici et amididi hydrargyrici* [Netherl. Ph.], *unguentum hydrargyri præcipitati album, unguentum muriatis hydrargyri ammoniacalis*. White-precipitate ointment; a preparation consisting of 1 part of ammoniated mercury mixed with 9 parts of benzoinated lard [U. S. Ph.], or of simple ointment [Br.

Ph.], or vaseline [Ger. Ph.], or of simple ointment and a little oil [Swiss Ph.], or of lard [Russ. Ph.], or 8 parts [Gr. Ph.], or 16 parts [Netherl. Ph.] of lard. [B, 95 (*a*, 38).]—**Unguentum hydrargyri cinereum** [Ger. Ph., Russ. Ph., Swiss Ph.]. See *Unguentum hydrargyri.*—**Unguentum hydrargyri citrinum** [Swiss Ph., Gr. Ph.]. See *Unguentum hydrargyri nitratis.*—**Unguentum hydrargyri compositum.** 1. See *Unguentum hydrargyri nitratis.* 2. Of the Br. Ph., a preparation made up of 4 parts of mercurial ointment, 2 each of yellow wax and olive-oil, and 1 part of camphor. [B.]—**Unguentum hydrargyri fortius.** An ointment consisting of 180 grammes of metallic mercury, 120 of pork lard, 60 of mutton suet, and 1½ gramme of corrosive sublimate, triturated together till the metal is completely extinguished. [B, 119 (*a*, 38).]—**Unguentum hydrargyri iodidi rubri** [Br. Ph.]. Fr., *pommade de biiodure de mercure* [Fr. Cod.]. 1. Of the Br. Ph., a preparation consisting of 1 part of mercuric iodide and 28 parts of simple ointment. 2. Of the Fr. Cod., a preparation for veterinary use, consisting of 1 part of mercuric iodide and 11½ parts of lard. [B, 5.]—**Unguentum hydrargyri nitrati** (seu **nitratis** [U. S. Ph., Br. Ph.]). Fr., *pommade citrine* [Fr. Cod.], *onguent citrin.* It., *unguento di nitrato di mercurio, unguento citrino.* Sp., *pomada de nitrato mercurial* [Sp. Ph.]. Syn.: *unguentum nitratis hydrargyri* [Belg. Ph.] (seu *hydrargyrici* [Dan. Ph., Swed. Ph.]), *unguentum hydrargyri citrinum* [Swiss Ph., Gr. Ph.], *adeps hydrargyro* (seu *hydrargyri nitrate,* seu *nitrate hydrargyri*) *medicatus.* A preparation consisting of mercury dissolved in nitric acid, and mixed with some fatty matter. The U. S. Ph. preparation is made by adding 7 parts of nitric acid to 76 of warmed lard oil, and mixing with a solution of 7 parts of mercury in 10 of nitric acid; the Br. Ph. preparation by melting 3½ parts of lard in 7½ of olive-oil, and adding a solution of 1 part of mercury in 4·26 parts of nitric acid; the Fr. Cod. preparation by melting 1 part of lard in 1 of olive-oil, and adding a solution of 1 part of mercury dissolved in 2 parts of nitric acid; the Belg. Ph. preparation by melting 414 parts of lard in as much olive-oil, and adding a solution of 69 parts of mercury in 103 of nitric acid; the Sp. Ph. preparation by melting 48 parts of lard in as much olive-oil, and adding a solution of 6 parts of mercury in 9 of nitric acid; the Swiss preparation by adding 80 parts of melted lard to a solution of 7 parts of mercury in 14 of crude nitric acid; the Gr. Ph. preparation by adding 12 parts of melted lard to a solution of 1 part of mercury in 2 parts (or as much more as is necessary) of nitric acid; the Swed. preparation by adding 12 parts of melted lard to a solution of 1 part of crude mercury in 2 parts of fuming nitric acid; and the Dan. preparation by melting 3 parts of lard in 9 of olive-oil, and adding a solution of 1 part of mercury in 2 parts of fuming nitric acid. The ointment has a yellowish color as long as it is fresh enough to use. [B. 95 (*a*, 38).]—**Unguentum hydrargyri nitratis dilutum** [Br. Ph.]. An ointment made by mixing 1 part of unguentum hydrargyri nitratis with 2 parts of vaseline. [B, 95 (*a*, 38).]—**Unguentum hydrargyri nitrico-oxydi.** See *Unguentum hydrargyri oxidi rubri.*—**Unguentum hydrargyri oxidi flavi** [U. S. Ph.]. Fr., *pommade d'oxyde jaune* (ou *avec l'oxyde jaune*) *de mercure* [Fr. Cod.]. Sp., *pomada de óxido mercúrico amarillo* [Sp. Ph.]. Syn.: *unguentum hydrargyri oxydati* [Russ. Ph.] (seu *oxydi hydrargyri* [Belg. Ph.]). A preparation consisting of 1 part of yellow mercury oxide mixed with 9 parts of ointment [U. S. Ph.], or with 15 parts of vaselin [Fr. Cod.], or with 15 parts of either vaselin or lard [Sp. Ph.], or with 49 parts of lard [Russ. Ph.], or of benzoinated lard [Belg. Ph.]. [B, 95 (*a*. 38).]—**Unguentum hydrargyri oxidi rubri** [U. S. Ph., Br. Ph.]. Fr., *pommade d'oxyde rouge de mercure* [Fr. Cod.]. Ger., *rothe Quecksilbersalbe.* It., *unguento di ossido rosso di mercurio.* Sp., *pomada de óxido mercúrico rojo* [Sp. Ph.]. Syn.: *unguentum hydrargyri rubrum* [Ger. Ph., Swiss Ph., Gr. Ph.], *unguentum oxydi hydrargyri* [Belg. Ph.] (seu *hydrargyrici* [Dan. Ph., Netherl. Ph., Norw. Ph.]). Red-precipitate ointment; consisting of 1 part of red mercury oxide mixed with 9 parts of ointment [U. S. Ph.], with 7 of a mixture of vaseline and solid paraffin [Br. Ph.], with 9 [Ger. Ph.] or [Fr. Cod.] 15 of vaselin, with 15 of rose ointment [Sp. Ph.], with 19 of wax ointment [Dan. Ph., Norw. Ph.] or of rectified lard [Swiss Ph.], with 32 of lard [Netherl. Ph.], with 48 of simple ointment [Gr. Ph.], or with 49 of benzoinated lard [Belg. Ph.]. The Fr. Cod. has also the *pommade de Régent*, which contains 1 part in 20 of the red mercury oxide. [B, 95 (*a*, 38).]—**Unguentum hydrargyri oxydati** [Russ. Ph.]. See *Unguentum hydrargyri oxidi flavi.*—**Unguentum hydrargyri oxydi nitrici** [Dubl. Ph., 1824]. See *Unguentum hydrargyri oxidi rubri.*—**Unguentum hydrargyri præcipitati album.** See *Unguentum hydrargyri album.*—**Unguentum hydrargyri rubrum** [Ger. Ph., Swiss Ph., Gr. Ph.]. See *Unguentum hydrargyri oxidi rubri.*—**Unguentum hydrargyri subchloridi** [Br. Ph.]. Fr., *pommade de calomel* (ou *de chlorure mercureux* [Fr. Cod.]). Sp., *pomada de cloruro mercurioso* [Sp. Ph.]. Ointment of calomel; consisting of 1 part of calomel mixed with 5⅓ [Br. Ph.] or 9 parts [Fr. Cod.] of benzoinated lard, or with 7½ of rose ointment [Sp. Ph.]. [B, 95 (*a*, 38).]—**Unguentum muriatis hydrargyri ammoniacalis.** See *Unguentum hydrargyri album.*—**Unguentum muriatis hydrargyri oxygenati.** See POMMADE *de Cirillo.*—**Unguentum muriatis oxygenati hydrargyri.** An ointment consisting of 1 part of corrosive sublimate, from 10 to 15 parts of white lard, and 30 parts of butter or lard, to which, in one of the old pharmacopœias, were added 1 part of dry alum, the yolks of two eggs, 4 parts each of oil of roses and terebinth, and 7 or 8 parts of lemon juice. [B, 119 (*a*, 38).]—**Unguentum nitratis hydrargyri** [Belg. Ph.]. See *Unguentum hydrargyri nitratis.*—**Unguentum oxydi hydrargyri** [Belg. Ph.]. See *Unguentum hydrargyri oxidi rubri* and *Unguentum hydrargyri oxidi flavi.*—**Unguentum oxydi hydrargyri rubri.** See *Unguentum hydrargyri oxidi rubri.*

HYDRARGYRURE (Fr.), n. E-dra[3]r-zhe-ru[6]r. From ὑδράργυρος, quicksilver. See AMALGAM (1st def.).

HYDRARGYRUS (Lat.), n. m. Hi(hu[6])-dra[3]r'ji[2]r(gu[6]r)-u[3]s(u[4]s). Gr., ὑδράργυρος (from ὕδωρ, water, and ἄργυρος, silver). See HYDRARGYRUM.—**H. acetatus.** Mercury acetate. [B, 69.]—**H. biiodatus, H. bijodatus.** See MERCURY *biniodide.*—**H. calcinatus.** See *Red* MERCURY *oxide.*—**H. chloratus mitis.** See CALOMEL.—**H. cum creta.** See HYDRARGYRUM *cum creta.*—**H. cum sulphure** [Lond. Ph., 1788]. Æthiops martialis. [B, 59.]—**H. iodatus (flavus).** Mercury protoiodide. [*a*, 38.]—**H. iodatus ruber.** Mercury biniodide. [*a*, 38.]—**H. muriaticus mitis.** Calomel. [B.] See MERCURY *chloride.*—**H. muriatus.** Mercury bichloride. [*a*, 38.]—**H. muriatus mitis.** Calomel. [B.] See MERCURY *chloride.*—**H. nitratus ruber.** Red mercury oxide. [*a*, 38.]—**H. periodatus.** See MERCURY *bichloride.*—**H. phosphoratus.** Mercury phosphide. [*a*, 38.]—**H. purificatus.** See HYDRARGYRUM (3d def.).—**H. sulphuratus ruber.** See *Red* MERCURY *sulphide.*—**H. vitriolatus.** See MERCURY *subsulphate.*

HYDRARSÉNIATE (Fr.), n. E-dra[3]r-sa-ne-a[3]t. An arsenate containing water in a state of chemical combination. [L, 41 (*a*, 14).]

HYDRARTHRICUS (Lat.), adj. Hid(hu[6]d)-ra[3]rth'ri[2]k-u[3]s-(u[4]s). From ὕδωρ, water, and ἄρθρον, a joint. Ger., *Gelenkwassersuchtbetreffend.* Of or pertaining to hydrarthron. [L, 56 (*a*, 14).]

HYDRARTHRON (Lat.), **HYDRARTHROS** (Lat.), **HYDRARTHROSIS** (Lat.), **HYDRARTHRUS** (Lat.), n's n., m., f., and m. Hid(hu[6]d)-ra[3]rth'ro[2]n, -ro[2]s, -ra[3]rth-ro'si[2]s, -ra[3]rth'ru[3]s-(ru[4]s). Gen., *-os'eos* (*-is*). From ὕδωρ, water, and ἄρθρον, a joint. Fr., *hydarthrose.* Ger., *Gelenkhydrops, Gelenkwassersucht.* Dropsy of an articular cavity.

HYDRAS (Lat.), n. m. Hid(hu[6]d)'ra[2]s(ra[3]s). Gen., *-rat'is.* From ὕδωρ, water. See HYDRATE.—**H. calcicus** [Fr. Cod.]. Calcic hydrate; slaked lime. [B.]—**H. chloralicus** [Dan. Ph., Norw. Ph., Swed. Ph.]. See CHLORAL *hydrate.*—**H. ferrico-magnesicus** [Swed. Ph.]. A preparation corresponding to ferri oxidum hydratum cum magnesia and containing 5 per cent. of iron. [B, 95.]—**H. ferricus** [Fr. Cod.]. 1. Of the Fr. Cod., Norw. Ph., and Swed. Ph., ferric hydroxide. [B, 95, 113 (*a*, 21).] 2. Of the Finn. Ph., see IRON *carbonate.*—**H. ferroso-magnesicus.** See FERRI *oxidum hydratum cum magnesia.*—**H. kalicus** [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]. Potassium hydrate; caustic potash. [B, 95.]—**H. kalicus fusus.** See POTASSA *fusa.*—**H. magnesicus** [Fr. Cod.]. Magnesic hydrate; magnesium hydroxide. [B.]—**H. natricus** [Netherl. Ph.]. See SODA (1st def.).—**H. potassicus** [Fr. Cod.]. Potassic hydrate; potassium hydroxide. [B, 173 (*a*, 38).]—**H. sodicus.** See SODA (1st def.).—**Liquor hydratis kalici** [Finn. Ph.]. See *Liquor* POTASSÆ.—**Mistura hydratis ferrici et magnesici** [Finn. Ph.]. A preparation corresponding to ferri oxidum hydratum cum magnesia, containing 6⅔ per cent. of iron. [B, 95.]—**Solutio hydratis calcici** [Dan. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]. See *Liquor* CALCIS.—**Solutio hydratis kalici** [Dan. Ph.]. See *Liquor* POTASSÆ.—**Solutio hydratis natrici** [Dan. Ph., Swed. Ph.]. See *Liquor* SODÆ.

HYDRASTE (Fr.), n. E-dra[3]st. See HYDRASTIS.

HYDRASTINE, n. Hi-dra[3]st'en. Lat., *hydrastina, hydrastinum, hydrastia* (obs.). Fr., *h.* Ger., *Hydrastin.* An alkaloid, $C_{22}H_{23}NO_6$, contained in the rhizome of *Hydrastis canadensis.* It forms shining, white prisms, melts at 135° C., decomposes at a higher temperature, and is insoluble in water, soluble in alcohol, in ether, and in diluted mineral acids. In small doses it causes vaso-constriction, diminution in the size of the kidneys, and heightening of blood-pressure; in large doses, vaso-paresis and diminution of blood-pressure. In the voluntary muscles it produces convulsions like those of strychnine poisoning. In small doses it is applied to inflamed mucous membranes. [R. Massini, "Corresp. Bl. d. Schweiz. Aerzt.," 1885, No. 16; "Ann. di chim. e di farmacol.," July, 1890, p. 49 (B); "Proc. of the Am. Pharm. Assoc.," xxxii, xxxvi, xxxvii (*a*, 14); B, 93 (*a*, 14).]—**H. tartrate.** Lat., *hydrastinum tartaricum.* A compound of h. and tartaric acid; a yellowish-white, crystalline powder, soluble in boiling water and boiling alcohol, insoluble in ether. ["Ann. di chim. e di farmacol.," July, 1890, p. 46 (B).]

HYDRASTININE, n. Hi-dra[2]st'i[2]n-en. Fr., *h.* Ger., *Hydrastinin.* An alkaloid, $C_{11}H_{13}NO_3$, obtained by oxidizing hydrastine with nitric acid, forming white acicular crystals, readily soluble in alcohol, in ether, and in chloroform, less soluble in warm water, and forming soluble acid salts. It exerts a paralyzing action on the voluntary muscles, but stimulates the vaso-constrictor nerves, causing contraction of the vessels, heightened cardiac systole, and increase of blood-pressure. As a substitute for ergot, it is more prompt and sustained in action, produces no irritation when injected subcutaneously, and produces no subsequent discomfort. It has been used in metrorrhagia, congestive dysmenorrhœa, and the hæmorrhage of uterine myoma. ["Ann. di chim. e di farmacol.," July, 1890, p. 46, 49 (B); "Therap. Gaz.," Feb., 1890, p. 86 (*a*, 17).]—**H. hydrochloride.** A compound of h. and hydrochloric acid; readily soluble in water, and preferred to the uncombined base for medicinal use. ["Ann. di chim. e di farmacol.," July, 1890, p. 46 (B).]

HYDRASTINUM (Lat.), n. n. Hid(hu[6]d)-ra[2]s(ra[3]s)-tin(ten)'-u[3]m(u[4]m). See HYDRASTINE.—**H. tartaricum.** See HYDRASTINE *tartrate.*

HYDRASTIS (Lat.), n. f. Hid(hu[6]d)-ra[2]s(ra[3]s)'ti[2]s. Gen., *-rast'idos* (*-idis*), *-rast'is.* From ὕδωρ, water. Fr., *h.* (1st def.), *hydraste* (1st def.), *hydrastide* (1st def.), *racine d'h. du Canada* (2d def.). Ger., *H., Wasserkraut* (1st def.), *Gelberwurzel* (2d def.). It., *idrasto* (1st def.). Syn.: *h. rhizome, rhizoma h.* (seu *hydrastidis* (2d def.). Indian turmeric; of Linnæus, a genus of the *Ranunculaceæ*, tribe *Helleboreæ.* The *Hydrastideæ* of Torrey and Gray are a tribe of the *Ranunculaceæ* consisting of the genus *H.* 2. Of the U. S. Ph., the rhizome and rootlets of *H. canadensis.* [B, 5, 34, 42, 170, 173, 180, 275 (*a*, 24).]—**Extractum h. fluidum** [U. S. Ph.]. Fr., *extrait liquide de h.* Ger., *flüssiges H'-extrakt.* A preparation made by exhausting the rhizome of *H. canadensis*, in No. 60 powder, with a mixture of alcohol and water

(in the proportion of 3 parts of the former to 1 part of the latter), reserving the first 85 cu. cent. of the percolate, evaporating the remainder of the percolate to a soft extract, mixing this with the reserved portion, and adding enough of the menstruum to make the whole measure 100 cu. cent. [B, 81.]—**H. canadensis.** Fr., *h. de Canada.* Ger., *canadisches Wasserkraut, Gelbsuchtwurzel.* Golden-seal; a small herb found in bog meadows from Canada to Carolina and Kentucky. Its thick, fleshy rhizome with its numerous fibres, the *h.* of the U. S. Ph., contains hydrastine, berberine, and xanthopuccine, and is considered a tonic, alterative, and aperient. It has been used in diseases of the mucous membranes (enteritis, leucorrhœa, etc.) and in uterine hæmorrhage. By some it is substituted for quinine in intermittent fevers, and at one time it was considered a remedy for cancer. [B, 5, 19, 34, 173, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxvi (*a*, 14).]—**H. rhizome, Rhizoma h.** (seu **hydrastidis**). See *H.* (2d def.).—**Tinctura h.** [U. S. Ph.]. A preparation made by moistening 20 parts of hydrastis, in No. 60 powder, with 15 of dilute alcohol, macerating for 24 hours, and adding slowly enough dilute alcohol to make 100 parts of tincture. [B, 5 (*a*, 38).]

HYDRATABLE, adj. Hid'rat-a²-b'l. Fr., *h.* Capable of being hydrated or converted into a hydrate. [L, 41 (*a*, 38).]

HYDRATATION, n. Hi-dra-ta'shu³n. See Hydration.

HYDRATE, n. Hid'rat. Lat., *hydras, hydratum* (from ὕδωρ, water). Fr., *h.* Ger., *Hydrat.* It., *idrato.* Sp., *hidrato.* 1. Originally, a compound of an element or radicle with water. The term is still used in this sense in speaking of crystalline substances in which water (water of crystallization) forms a part of the chemical or physical organization. Thus ordinary sulphate of copper, $CuSO_4,5H_2O$, is spoken of as a h. of the dried or anhydrous sulphate, $CuSO_4$. 2. In the usual sense of the term, a compound of a metal or radicle with hydroxyl (OH). Such compounds may be regarded as water in which an atom of hydrogen is replaced by an atom or molecule of the combining radicle. Such compounds are now often denominated *hydroxides,* to avoid confusion with h. in the first sense. [B.]—**Haloid h.** Ger., *Haloïdhydrat.* A h., or compound of a radicle with two or more molecules of hydroxyl, in which one of the molecules of hydroxyl is replaced by a haloid element. [B.]—**H. aluminique** (Fr.). See Terra *argillacea pura.*

HYDRATED, adj. Hid'rat-e²d. Fr., *hydraté.* 1. Compounded with or containing water, either simply admixed or as an essential part of its constitution (*e. g.*, a h. crystal is one containing water of crystallization). 2. Containing hydroxyl (OH); forming a hydrate (hydroxide), or combined with a hydrate (*e. g.*, hydrated iron oxide). [B.]

HYDRATIC, adj. Hid-ra²t'i²k. Fr., *hydratique.* Ger., *hydratisch.* Having the character of a hydrate. [B, 38.]

HYDRATION, n. Hi-dra'shu³n. From ὕδωρ, water. Fr., *h.* It., *idrazione.* The act or process of mixing or combining with water; conversion into a hydrate; also the state of being thus mixed, combined, or converted. [B.]

HYDRATOCARBONAS (Lat.), n. m. Hid(hu⁶d)-rat(ra³t)''-o(o³)-ka³rb-on'a²s(a³s). Gen., *-onat'is.* See Hydrocarbonate.—**H. ferrosus saccharatus** [Dan. Ph., Swed. Ph.]. See Ferri *carbonas saccharatus.*—**H. magnesicus** [Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph.]. See Magnesium *carbonate.*—**H. plumbicus.** See Lead *carbonate.*

HYDRATROPIC ACID, n. Hid-ra²-tro²p'i²k. From ὕδωρ, water, and Ἄτροπος (see Atropa). Fr., *acide hydratropique.* Ger., *Hydratropasäure.* See Phenylpropionic acid.

HYDRATUM (Lat.), n. n. Hid(hu⁶d)-rat(ra³t)'u³m(u⁴m). See Hydrate.—**H. chloralicum.** See Chloral *hydrate.*—**H. ferricum.** Iron hydroxide. [B.]—**H. ferricum magnesicum.** See Ferri *oxidum hydratum cum magnesia.*—**H. magnesicum.** Magnesium hydroxide. [*a*, 38.]—**H. natricum.** Sodium hydroxide. [*a*, 38.]—**H. natricum solutum.** See *Liquor* sodæ.

HYDRATUS (Lat.), adj. Hid(hu⁶d)-rat(ra³t)'u³s(u⁴s). See Hydrated.

HYDRAULIC, adj. Hid-ra⁴l'i²k. From ὕδραυλις, a hydraulic organ. Fr., *hydraulique.* Ger., *hydraulisch.* Relating to water, or to fluids in motion.

HYDRAULICS, n. sing. Hid-ra⁴l'i²ks. From ὕδραυλις, a hydraulic organ. The science of the motion of liquids.

HYDRAZINE, n. Hid'ra³-zen. Syn.: *diamide.* 1. An imaginary compound, $N_2H_4=H_2N.NH_2$. 2. A derivative of this compound, formed by substituting an alcohol radicle for 1 or 2 atoms of hydrogen (primary and secondary h's). [B, 4.]

HYDRAZOBENZENE, n. Hid''ra²z-o-be²nz'en. Fr., *hydrazobenzine.* Ger., *Hydrazobenzol.* A compound of benzene with nitrogen and hydrogen, $C_6H_5.N(H)-N(H).C_6N_5=C_{12}N_2H_{12}$, a substance isomeric with benzidine, forming colorless tabular crystals of camphoraceous odor, fusing at 131° C., and nearly insoluble in water, soluble in alcohol and ether. [B, 4, 46, 93 (*a*, 39).]

HYDRAZOBENZOIC ACID, n. Hid''ra²z-o-be²n-zo'i²k. Fr., *acide hydrazobenzoïque.* Ger., *Hydrazobenzoësäure.* A weak dibasic acid, $\left<\begin{matrix}H-N.C_6H_4CO.OH\\H-N.C_6H_4CO.OH\end{matrix}\right.=C_{14}H_{12}N_2O_4$, formed by boiling azobenzoic acid with a ferrous salt and sodic hydrate. It forms yellowish-white flakes, insoluble in water, slightly soluble in boiling alcohol. [B, 4 (*a*, 38), 46 (*a*, 39).]

HYDRAZONAPHTHOL, n. Hid''ra²z-o-na²f'tho²l. The yellow crystalline substance, $C_{10}H_8N_2O=C_{10}H_5(OH)\left<\begin{matrix}NH\\|\\NH\end{matrix}\right.$, obtained when diimidonaphthol is treated with ammonia. [B, 4 (*a*, 38).]

HYDRAZULMINE, n. Hid''ra²z-u³l'men. Fr., *h.* Ger., *Hydrazulmin.* A black, shining, amorphous substance, $(C_2N_2)_2(NH_3)_2=C_4H_6N_6$, formed by the union of dry ammonia gas with cyanogen, and, according to Jacobsen and Emmerling, closely related to uric acid. [B, 3 (*a*, 38).]

HYDRAZULMOXIN, n. Hid''ra²z-u³l-mo²x'i²n. Fr., *hydrazulmoxine.* Ger., *H.* An acid substance, $C_4H_5N_5O$, obtained, along with ammonia, by decomposing hydrazulmine with water. [B, 3 (*a*, 38).]

HYDRECHIDNEOUS, adj. Hid-re²k-i²d'ne-u³s. From ὕδωρ, water, and ἔχιδνα, a spider. Lat., *hydrechidneus.* Fr., *hydréchidné.* Living in water. The *Hydrechidnei* of J. A. Ritgen are a family of ophidian reptiles having poisonous fangs and living in water. [L, 180 (*a*, 39).]

HYDRECTASIS (Lat.), n. f. Hid(hu⁶d)-re²k'ta²s(ta³s)-i²s. Gen., *-as'eos* (*-rec'tasis*). From ὕδωρ, water, and ἔκτασις, extension. Distension by a liquid. [L, 50 (*a*, 14).]

HYDRELÆUM (Lat.), n. n. Hid(hu⁶d)-re²l-e'(a³'e²)-u³m(u⁴m). Gr., ὑδρέλαιον (from ὕδωρ, water, and ἔλαιον, olive-oil). Fr., *hydréléon.* Ger., *Oelmilch.* Of Galen, a mixture of oil and water. [B, 38, 78, 88 (*a*, 14, 39).]

HYDRELECTRIC, adj. Hid-re²l-e²k'tri²k. Lat., *hydrelectricus* (from ὕδωρ, water, and ἤλεκτρον, amber). Pertaining to hydrelectricity.

HYDRELECTRICITY, n. Hid-re²l-e²k-tri²s'i²t-i². Lat., *hydrelectricitas* (from ὕδωρ, water, and ἤλεκτρον, amber). Fr., *hydreléctricité.* Galvanism. [L, 50 (*a*, 14).]

HYDRELYTRON (Lat.), **HYDRELYTRUM** (Lat.), n's n. Hid(hu⁶d)-re²l'i²t(u⁶t)-ro²n, -ru³m(ru⁴m). From ὕδωρ, water, and ἔλυτρον, a cover. 1. Hydrocele of the tunica vaginalis testis. 2. A watery collection in the vagina. [L, 50 (*a*, 14).]

HYDREMESIS (Lat.), n. f. Hid(hu⁶d)-re²m'e²-si²s. Gen., *-es'eos* (*-rem'esis*). From ὕδωρ, water, and ἔμεσις, a vomiting. Fr., *vomissement aqueux.* Ger., *Wasserbrechen.* Watery vomiting. [L, 50 (*a*, 14).]

HYDRENCEPHALIC, adj. Hid-re²n-se²f-a²l'i²k. From ὕδωρ, water, and ἐγκέφαλος, the brain. Fr., *hydrencéphalique.* See Hydrocephalic.

HYDRENCÉPHALIE (Fr.), n. E-dra³n²-sa-fa³-le. See Hydrocephalus.—**H. prégénésique** [Piorry]. Congenital hydrocephalus. [L, 82.]

HYDRENCEPHALION (Lat.), n. n. Hid(hu⁶d)-re²n(re²n²)'-se²f(ke²f)-a²l(a³l)'i²-o²n. From ὕδωρ, water, and ἐγκέφαλος, the brain. Fr., *hydrencéphale, hydrencéphalie.* See Hydrocephalus.

HYDRENCEPHALITIS (Lat.), n. f. Hid(hu⁶d)-re²n(re²n²)-se²f(ke²f)-a²l(a³l)-i(e)'ti²s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ἐγκέφαλος, the brain (see also *-itis**). Fr., *hydrencéphalite.* Ger., *entzündliche Hirnwassersucht.* Hydrocephalus with inflammation. [L, 50 (*a*, 14).]

HYDRENCEPHALIUM (Lat.), n. n. Hid(hu⁶d)-re²n(re²n²)-se²f(ke²f)-a²l(a³l)'i²-u³m(u⁴m). See Hydrocephalus.

HYDRENCEPHALOCELE (Lat.), n. f. Hid(hu⁶d)-re²n(re²n²)-se²f(ke²f)-a²l(a³l)-o(o³)-se(ka)'le(la); in Eng., hi-dre²n-se²f'a²l-o-sel. Gen., *-cel'es* (*-œ*). From ὕδωρ, water, ἐγκέφαλος, the brain, and κήλη, a tumor. Fr., *hydrencéphalocèle.* Ger., *Hirnwasserbruch.* An encephalocele which, in addition to brain substance, contains a portion of one or both ventricles filled with fluid. [E.] See also Meningocele, Encephalocele, and Hernia *cerebri.*—**Orbital h.** See *Orbital* encephalocele.

HYDRENCEPHALOID, adj. Hid-re²n-se²f'a²l-oid. See Hydrocephaloid.

HYDRENCEPHALON (Lat.), **HYDRENCEPHALUS** (Lat.), n's n. and m. Hid(hu⁶d)-re²n(re²n²)-se²f(ke²f)'a²l(a³l)-o²n, -u³s(u⁴s). From ὕδωρ, water, and ἐγκέφαλος, the brain. See Hydrocephalus.

HYDRENTEREPIPLOCELE (Lat.), n. f. Hid(hu⁶d)-re²n-te²r-e²p-i²-plo(plo²)-se(ka)'le(la); in Eng., hi-dre²n-te²r-e²p-i²p'lo-sel. Gen., *-celes* (*-œ*). From ὕδωρ, water, ἔντερον, an intestine, ἐπίπλοον, the membrane inclosing the entrails, and κήλη, a tumor. An entero-epiplocele with serous fluid in the sac. [E.]

HYDRENTEROCELE (Lat.), n. f. Hid(hu⁶d)-re²n-te²r-o(o³)-se(ka)'le(la); in Eng., hi-dre²n'te²r-o-sel. Gen., *-cel'es* (*-œ*). From ὕδωρ, water, ἔντερον, an intestine, and κήλη, a tumor. Fr., *hydrentérocèle.* Ger., *Wasserdarmbruch.* Intestinal hernia with fluid in the sac. [E.]

HYDRENTERO-EPIPLOMPHALUM (Lat.), n. n. Hid(hu⁶d)-re²n-te²r-o(o³)-e²p-i²-plo²m'fa²l(fa³l)-u³m(u⁴m). From ὕδωρ, water, ἔντερον, an intestine, ἐπίπλοον, the membrane inclosing the entrails, and ὀμφαλός, the navel. An umbilical hernia which contains intestine, serum, and omentum. [E.]

HYDRENTEROMPHALOCELE (Lat.), **HYDRENTEROMPHALUS** (Lat.), n's f. and m. Hid(hu⁶d)-re²n-te²r-o²m-fa²l(fa³l)-o(o³)-se(ka)'le(la); in Eng., hi-dre²n-te²r-o²m'fa²l-o-sel; hid-(hu⁶d)-re²n-te²r-o²m'fa²l(fa³l)-u³s(u⁴s). Gen., *-cel'es, -omph'ali.* From ὕδωρ, water, ἔντερον, an intestine, ὀμφαλός, the navel, and κήλη, a tumor. Fr., *hydrentéromphale.* Ger., *Darmwassernabelbruch.* An umbilical hernia containing intestine and water. [E.]

HYDRENTÉRORRHÉE [Piorry] (Fr.), n. E-dra³n²-ta-ror-ra. From ὕδωρ, water, ἔντερον, an intestine, and ῥοία, a flowing. A serous or mucous diarrhœa. [A, 250 (*a*, 21); L, 82.]

HYDREPIGASTRIUM (Lat.), n. Hid(hu⁶d)-re²p-i²-ga²st-(ga³st)'ri²-u³m(u⁴m). From ὕδωρ, water, ἐπί, upon, and γαστήρ, the abdomen. Fr., *hydrépigastre.* Ger., *äussere Bauchwassersucht.* An external or superficial form of ascites, in which the fluid collects between the abdominal muscles and the peritonæum. [L, 50 (*a*, 14).]

HYDREPIPLOCELE (Lat.), n. f. Hid(hu^{6}d)-re^{2}p-i^2-plo(plo^2)-se(ka)'le(la); in Eng., hid-re^{2}p-i^{2}p'lo-sel. Gen., *-cel'es* (*-æ*). From ὕδωρ, water, ἐπίπλοον, the membrane inclosing the entrails, and κήλη, a tumor. Fr., *hydrépiplocèle.* Ger., *Netzwasserbruch.* An omental hernia with water in the sac. [E.]

HYDREPIPLOMPHALOCELE (Lat.), **HYDREPIPLOMPHALUS** (Lat.), n's f. and m. Hid(hu^{6}d)-re^{2}p-i^2-plo^{2}m-fa^{2}l(fa^{3}l)-o(o^2)-se(ka)'le(la); in Eng., hid-re^{2}p-i^2-plo^{2}m'fa^{2}l-o-sel; hid(hu^{6}d)-re^{2}p-i^2-plo^{2}m'fa^{2}l(fa^{3}l)-u^{3}s(u^{4}s). Gen., *-cel'es* (*-æ*) or *-plomph'ali.* From ὕδωρ, water, ἐπίπλοον, the omentum, ὀμφαλός, the navel, and κήλη, a tumor. Fr., *hydrépiplomphale.* Ger., *Wassernabelbruch.* An umbilical hernia containing omentum and serum. [E.]

HYDREPIPLOON (Lat.), n. n. Hid(hu^{6}d)-re^{2}p-i^{2}p'lo(lo^2)-o^{2}n. From ὕδωρ, water, and ἐπίπλοον, the omentum. Fr., *hydrépiploon.* Ger., *Netzwassersucht.* Omental dropsy. [L, 41, 50 (*a*, 14).]

HYDRERON (Lat.), n. n. Hid(hu^{6}d)-re(ra)'ro^{2}n. Gr., ὑδρηρόν. Of Dioscorides, the *Campanula erinus.* [B, 121 (*a*, 24).]

HYDRETHMIE [Piorry] (Fr.), n. E-dre^{2}t-me. From ὕδωρ, water, and ἠθμός, a strainer. Serous œdema. [L, 82.]—**H. névraxique** [Piorry]. Œdema of the brain. [L, 82.]

HYDRETHMOCARDIE [Piorry] (Fr.), n. E-dre^{2}t-mo-ka^{3}r-de. From ὕδωρ, water, ἠθμός, a strainer, and καρδία, the heart. Œdema of the heart.

HYDRETRON (Lat.), **HYDRETRUM** (Lat.), n's n. Hid(hu^{6}d)-ret(rat)'ro^{2}n, -ru^{3}m(ru^{4}m). From ὕδωρ, water, and ἦτρον, the abdomen. See Ascites.

HYDREXOSTOSIS (Lat.), n. f. Hid(hu^{6}d)-re^{2}x-o^{2}s-to'si^{2}s. Gen., *-os'eos* (*-os'is*). From ὕδωρ, water, ἐξ, outside of, and ὀστέον, a bone. Fr., *hydrexostose.* Ger., *wässeriger Knochenauswuchs.* An exostosis complicated with a collection of water. [L, 50 (*a*, 14).]

HYDRHÉMIE (Fr.), n. E-dra-me. See Hydræmia.

HYDRIASIS (Lat.), n. f. Hid(hu^{6}d)-ri(re)-a(a^3)'si^{2}s. Gen., *-as'eos* (*-as'is*). From ὕδωρ, water, and ἴασις, a mode of healing. Fr., *hydriase.* Ger., *Wasserheilkraft.* Of F. Röver, the curative action of cold water. [L, 50 (*a*, 14).]

HYDRIATIC, adj. Hid-ri^2-a^{2}t'i^{2}k. From ὕδωρ, water, and ἰατρικός, healing. Fr., *hydriatique.* Ger., *hydriatisch.* Hydrotherapeutic. [*a*, 18.]

HYDRIATICS, n. sing. Hid-ri^2-a^{2}t'i^{2}ks. See Hydriatrics.

HYDRIATRIC, adj. Hid-ri^2-a^{2}t'ri^{2}k. Pertaining to hydriatrics.

HYDRIATRICS, n. sing. Hid-ri^2-a^{2}t'ri^{2}ks. Lat., *hydriatrica* (from ὕδωρ, water, and ἰατρικός, healing). Fr., *hydriatrie.* Ger., *Hydriatrik, Wassercurmethode.* The systematic treatment of diseases with cold water. [L, 50 (*a*, 14).]

HYDRIATROS (Lat.), **HYDRIATRUS** (Lat.), n's m. Hid(hu^{6}d)-ri^2-a^{2}t(a^{3}t)'ro^{2}s, -ru^{3}s(ru^{4}s). From ὕδωρ, water, and ἰατρός, a surgeon. Fr., *hydriatre.* Ger., *Hydriatriker, Wasserarzt.* A practitioner of hydriatrics. [L, 50 (*a*, 14).]

HYDRIATRY, n. Hid'ri^2-a^{2}t-ri^2. See Hydriatrics.

HYDRIC, adj. Hid'ri^{2}k. Lat., *hydricus* (from water). Fr., *hydrique.* Ger., *hydrisch.* It., *idrico.* Sp., *hidrico.* 1. Containing water. 2. Combined with hydrogen; a term applied especially to names of the hydrogen acids considered as salts of hydrogen (*e. g.*, h. chloride = hydrochloric acid); also applied especially to acid salts, because all the hydrogen of the acid characteristic is not replaced by the basic element. [B.] See also Dihydric, Monohydric, and Trihydric.

HYDRICOCARBONICUS (Lat.), adj. Hid(hu^{6}d)''ri^{2}k-o(o^3)-ka^{3}rb-o^{2}n'i^{2}k-u^{3}s(u^{4}s). 1. Hydrocarbonic. 2. United with water, or hydroxyl, and carbonic acid (*e. g.*, plumbum hydricocarbonicum = lead hydrocarbonate). [B.]

HYDRIDE, n. Hid'ri^{2}d(rid). Lat., *hydridum* (from ὕδωρ, water). Fr., *hydrure.* Ger., *Hydrür, Hydrid, -hydrid, -wasserstoff.* It., *idruro.* Sp., *hidruro.* A compound consisting of an element or radicle united directly with hydrogen. [*a*, 38.]

HYDRIDUM (Lat.), n. n. Hid(hu^{6}d)'ri^{2}d-u^{3}m(u^{4}m). See Hydride.—**H. acetylicum.** See Acetic aldehyde.

HYDRIN, n. Hid'ri^{2}n. From ὕδωρ, water. Fr., *hydrine.* Ger., *H.* 1. A generic name for a compound of glyceryl with hydroxyl, either alone or associated with other radicles. The h's form a large class of chemical compounds, the individual members of which are indicated by distinctive prefixes; thus dichlorhydrin is $C_3H_5(OH)Cl_2$, glyceryl combined with 1 molecule of hydroxyl and 2 atoms of chlorine. 2. The term is sometimes extended to comprise a class of bodies analogous to glycerin h's, but derived from other alcohols than glycerin (*e. g.*, erythrite dibromhydrin). [B.]

HYDRINDIC ACID, n. Hid-ri^{2}n'di^{2}k. Fr., *acide hydrindique.* Ger., *Hydrindinsäure.* Dioxindol; an acid, $C_8H_7NO_2 = C_6H_4{<}{}^{CH.OH}_{NH}{>}CO$, crystallizing in transparent yellow prisms. [B, 4, 93 (*a*, 38).]

HYDRINDIN, n. Hid-ri^{2}n'di^{2}n. Fr., *hydrindine.* Ger., *H.* A yellowish-white powder, $C_{32}H_{22}N_4O_4.H_2O$, obtained by treating isatide with potassium hydroxide and alcohol. It is insoluble in water, soluble in boiling alcohol, and fuses at 300° C. [B, 46, 48, 93 (*a*, 39).]—**H'säure** (Ger.). See Hydrindic acid.

HYDRIODAS (Lat.), n. m. Hid(hu^{6}d)-ri(ri^2)'o^{2}d-a^{2}s(a^{3}s). Gen., *-at'is.* See Hydriodate.—**H. kalicus.** See Potassium *iodide.*

HYDRIODATE, n. Hid-ri'od-at. Lat., *hydriodas.* Fr., *iodhydrate, h.* A compound of an element or radicle with hydriodic acid. The term is sometimes used in the same sense as iodide, but usually signifies an addition compound of hydriodic acid with ammonia, an ammonia derivative (*e. g.*, an alkaloid), or a radicle acting in the same manner. Thus ammonia hydriodate (ammonium iodide) is NH_3HI. [B.] Cf. Hydrochlorate and Hydriodide.

HYDRIODIC, adj. Hid-ri^2-o^{2}d'i^{2}k. Lat., *hydriodicus.* Fr., *hydriodique, iodhydrique.* Compounded of hydrogen and iodine. [B.]—**Aqueous (solution of) h. acid.** See under *H. acid.*—**Dilute h. acid.** Lat., *acidum hydriodicum dilutum* [U. S. Ph., 1860]. A preparation having a sour taste, and, when fresh, colorless; made by dissolving 1 oz. (Troy) of powdered iodine in distilled water, and treating with hydrosulphuric-acid gas until the iodine color disappears, then boiling till the odor of the acid is no longer perceptible, filtering through paper, and adding sufficient distilled water to make 6 fl. oz. [B, 5 (*a*, 38).]—**H. acid.** Lat., *acidum hydriodicum.* Fr., *acide iodhydrique* (ou *hydriodique*). Ger., *Hydriodsäure, Jodwasserstoffsäure.* A colorless, fuming, heavy gas, HI, of the sp. gr. of 4·374, and having a suffocating odor and a strongly acid reaction. At a low temperature it forms a colorless liquid, and at —55° C. freezes. 2. Ordinary h. acid, aqueous (solution of) h. acid; formed by dissolving gaseous h. acid in water. The saturated solution has a sp. gr. of 1·99 at 0° C. It tends to decompose on exposure to the air. [B.]—**H. ether.** See Ethyl *iodide.*

HYDRIODIDE, n. Hid-ri'o^{2}d-i^{2}d(id). Lat., *hydriodas, iodhydras.* Fr., *iodhydrate, hydriodure.* A compound of hydrogen and iodine with an element or radicle. The term is now applied only to compounds of bases (*e. g.*, alkaloids) with hydriodic acid, in which the former are (apparently) combined directly with the latter. [B.] Cf. Hydriodate.

HYDRIODKALI (Ger.), n. Hu^{6}d-re-od'ka^{3}l-i^2. See Potassium *iodide.*

HYDRIODSÄURE (Ger.), n. Hu^{6}d-re-od'zoir-e^2. See Hydriodic *acid.*

HYDRIODURET, n. Hid-ri-o^{2}d'u^{2}r-e^{2}t. Fr., *hydriodure.* See Hydriodide.

HYDRIOSIS (Lat.), n. f. Hid(hu^{6}d)-ri^2-o'si^{2}s. Gen., *-os'eos* (*-is*). From ὕδωρ, water. See Hydriatrics.

HYDROA (Lat.), n. f. sing. and n. pl. Hi(hu^6)-dro'a^3. Written, also, *hidroa.* From ὕδωρ, water. Fr., *h., hidroa.* Ger., *Schwitzblätterchen* (1st def.), *Hitzbläschen* (1st def.). 1. Of ancient writers, a term for various cutaneous eruptions associated with profuse sweating, especially in summer. 2. In modern dermatology, a name for various vesicular diseases of uncertain nosological relations. [G.] 3. A cysticercus. 4. Of Quincy, a symptomatic miliary fever. [L, 50 (*a*, 14).]—**Arthritic h.** See *H. vacciniforme* and *H. bulleux.*—**H. pemphigoides.** See Dermatitis *herpetiformis.*—**Bullous h.** See *H. bulleux.*—**Herpetiform h.** [T. Fox]. H. characterized by vesicles, occurring in groups. ["Arch of Dermatol.," Jan., 1880, p. 16 (G).]—**H. alba.** See Miliaria *alba.*—**H. bulleux** (Fr.). Syn.: *pemphigus à petits bulles.* Of Bazin, an eruption of vesicles or small blebs, varying in size from that of a lentil to that of a pea, occupying the trunk, the arms, and the inner surfaces of the thighs, and attended with itching. The vesicles soon dry up, but successive crops appear, and the duration of the disease is from five to six months. [G, 26.]—**H. febrilis.** See Herpes *facialis.*—**H. gestationis.** Impetigo herpetiformis. [A, 326 (*a*, 21).]—**H. herpetiformis.** See *Herpetiform h.*—**H. pruriginosa** [T. Fox]. H. characterized by successive crops of vesicles or small bullæ, which, clear at first, gradually become clouded, and, on drying up, leave crusts and finally pigmented spots. The eruption is attended with severe pruritus. [G.] Cf. *H. bulleux.*—**H. simplex.** Of T. Fox, h. in which the vesicles are few in number and do not occur in groups. ["Arch. of Dermatol.," Jan., 1880, p. 16 (G).]—**H. sudamen.** See Eczema *sudorale.*—**H. symptomatica.** H. associated with some general disease. The skin affection is described as consisting of red pimples accompanied with itching. [G, 17.]—**H. vacciniforme** (Fr.). Of Bazin, a vesicular eruption occurring usually upon the nose, cheeks, wrists, hands, and buccal mucous membrane, consisting of transparent vesicles, which, on the second or third day, are umbilicated, and, their contents becoming cloudy, soon dry up, forming little crusts, which finally drop off and leave depressed cicatrices. [G, 26.]—**H. vésiculeux** (Fr.). Of Bazin, a vesicular eruption of both cutaneous and mucous surfaces, most commonly affecting the backs of the hands, the wrists, and the anterior surfaces of the knees. Toward the second or third day the buccal mucous membrane becomes affected. The vesicles are preceded and accompanied by small, sharply defined patches of erythema, in the centres of which the vesicles make their appearance. The latter soon dry up, forming little dark-colored crusts surrounded by a whitish border of detached epidermis. By most recent writers the disease is regarded as identical with herpes iris. [G, 26.]—**Vesicular h.** See *H. vésiculeux.*

HYDROABDOMEN (Lat.), n. n. Hi(hu^6)-dro(dro^2)-a^{2}b(a^{3}b)-do'me^{2}n. Gen., *-dom'inis.* From ὕδωρ, water, and *abdomen*, the belly. See Ascites.

HYDROACRIDINE, n. Hi-dro-a^{2}k'ri^{2}d-en. Fr., *h.* Ger., *Hydroacridin.* An addition compound of acridine and hydrogen, prepared by the action of sodium amalgam on acridine, and in other ways. It crystallizes in colorless prisms, insoluble in water, slightly soluble in cold alcohol, freely soluble in hot alcohol and in ether, fusing at 169° C., subliming when heated with caution, and at a very high temperature distilling to form acridine. There are two varieties: 1. *Soluble h., dihydroacridine*, forming colorless, columnar crystals, $C_{13}H_{11}N = C_{13}H_9N + H_2$. 2. *Insoluble h.*, a substance of uncertain composition, perhaps $C_{26}H_{20}N_2 = 2C_{13}H_9N + H_2$. [B, 46 (*a*, 39), 79.]

HYDROADENITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^2)-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ἀδήν, a gland (see also *-itis**). See Hidradenitis.

HYDROADIPSIA (Lat.), n. f. Hi(hu^6)-dro(dro^2)-a^{2}d(a^{3}d)-i^{2}ps'-i^2-a^3. From ὕδωρ, water, α priv., and δίψα, thirst. Of McElroy, a lack of desire for water. [Seguin, "N. Y. Med. Jour.," Oct. 25, 1884, p. 465 (D).]

HYDROÆMIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-em'(a^3'e^{2}m)-i^2-a^3. From ὕδωρ, water, and αἷμα, blood. See HYDRÆMIA.

HYDRO-AERATE, adj. Hi-dro-a'e^{2}r-at. Lat., *hydroaeratus* (from ὕδωρ, water, and ἀήρ, air). Fr., *hydro-aéré.* Living in either water or air (said of certain cryptogams). [Roussel (L, 180).]

HYDRO-AERIC, adj. Hi-dro-a'e^{2}r-i^{2}k. From ὕδωρ, water, and ἀήρ, air. Fr., *hydroaérique.* Of a sound, due to the collision of gas and liquid (in a cavity). [L, 41, 49 (α, 14).]

HYDRO-ARGENTIC, adj. Hi-dro-a^{3}r-je^{2}nt'i^{2}k. From ὕδωρ, water, and *argentum*, silver. Containing both hydrogen and silver. [B.]

HYDROARIC, adj. Hi-dro-a^{2}r'i^{2}k. From ὕδωρ, water, and ὠάριον, a small egg. Lat., *hydroaricus.* Fr., *hydroarique.* Ger., *Eierstockwassersucht betreffend.* Pertaining to ovarian dropsy. [L, 50 (α, 14).]

HYDROARION (Lat.), n. n. Hid(hu^{6}d)-ro-a(a^2)'ri^2-o^{2}n. From ὕδωρ, water, and ὠάριον, a small egg. Fr., *h.*, *hydrovaire.* Ger., *Eierstockwassersucht.* Ovarian cystoma. [L, 41, 50 (α, 14).]

HYDROATROPIC ACID, n. Hid''ro-a^{2}t-ro^{2}p'i^{2}k. See HYDRATROPIC ACID.

HYDROBENZAMIDE, n. Hi-dro-be^{2}nz'a^{2}m-i^{2}d(id). Fr., *h.* Ger., *Hydrobenzamid.* Azobenzoyl hydride, a neutral substance, $(C_6H_5CH)''_3.N_2 = C_{21}H_{18}N_2$, forming colorless octaedral crystals, soluble in alcohol. It is isomeric with amarine and lophine. [B, 4; B, 46, 93 (α, 39).]

HYDROBENZILURIC ACID, n. Hi-dro-be^{2}nz-i^{2}l-u^2'ri^{2}k. Fr., *acide hydrobenzilurique.* Ger., *Hydrobenzilursäure.* An acid, $C_{16}H_{21}NO_4$, obtained by treating hippuric acid with nascent hydrogen. [B, 2.]

HYDROBENZOIC ACID, n. Hi-dro-be^{2}n-zo'i^{2}k. Ger., *Hydrobenzoësäure.* See BENZOLEIC ACID.

HYDROBENZOIN, n. Hi-dro-be^{2}n'zo-i^{2}n. Fr., *hydro-benzoïne.* Ger., *Hydrobenzoïn.* A compound, $C_{14}H_{14}O_2 = C_6H_5CH(OH)CH(OH).C_6H_5$, obtained by treating benzoin with nascent hydrogen, and occurring in rhombic tabular crystals melting at 132·5° C., slightly soluble in water, freely soluble in alcohol. [B, 4, 93 (α, 38).]

HYDROBENZURIC ACID, n. Hid-ro-be^{2}nz-u^{6}r'i^{2}k. An acid, $C_{16}H_{24}N_2O_6$, occurring as a turpentine-like mass which crystallizes on standing a long time. [B, 3 (α, 38).]

HYDROBENZYLURIC ACID, n. Hid-ro-be^{2}nz-i^{2}l-u^{6}r'i^{2}k. An oily liquid, $C_{16}H_{21}NO_4$, which gradually solidifies on standing. [B, 3 (α, 38).]

HYDROBERBERINE, n. Hi-dro-bu^{5}r'be^{2}r-en. Fr., *hydroberbérine.* Ger., *Hydroberberin.* A monacid, crystalline base, $C_{20}H_{21}NO_4$, obtained by the action of nascent hydrogen on berberine. It forms granular or acicular crystals, without color, or with a slight yellow tinge, belonging to the oblique rhombic system. [B, 5 (α, 38); B, 46, 93 (α, 14); "Proc. of the Am. Pharm. Assoc.," xi (α, 14).]

HYDROBICARBURET, n. Hi-dro-bi-ka^{3}rb'u^2-re^{2}t. Fr., *hydrobicarbure.* A compound of bicarbureted hydrogen with a simple body. [B, 38 (α, 38).]

HYDROBILIRUBIN, n. Hi-dro-bil-i^2-ru^2'bi^{2}n. Fr., *hydrobilirubine.* Ger., *H.* A reddish-brown, amorphous substance, $C_{32}H_{40}N_4O_7$, found in the fæces and (especially in fever) in the urine. It is soluble in alkalies, in alcohol, and in chloroform, less soluble in ether and in benzene, nearly insoluble in water. According to Jaffé, it is identical, but, according to Maly, not identical, with urobilin and stercobilin. [B, 9, 93, 270 (α, 38).]

HYDROBISULPHATE, n. Hi-dro-bi-su^{3}lf'at. Fr., *hydrobisulfate.* A hydrosulphate containing twice as much sulphur as hydrogen. [B, 38 (α, 14).]

HYDROBLEPHARISMUS (Lat.), **HYDROBLEPHARON** (Lat.), **HYDROBLEPHARUM** (Lat.), n's m., n., and n. Hid(hu^{6}d)-ro(ro^3)-ble^{2}f-a^{2}r(a^{3}r)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s), -ble^{2}f'a^{2}r(a^{3}r)-o^{2}n, -u^{3}m(u^{4}m). From ὕδωρ, water, and βλέφαρον, the eyelid. See BLEPHARŒDEMA.

HYDROBROMATE, n. Hi-dro-brom'at. Lat., *hydrobromas.* Fr., *h.* Ger., *Hydrobromat.* It., *idrobromato.* Sp., *hidrobromato.* A salt of hydrobromic acid. The term is occasionally used in the same sense as bromide, but generally denotes an addition compound of hydrobromic acid with a radicle of the ammonia type (*e. g.*, an alkaloid). Thus the h. of quinine is $C_{20}H_{24}N_2O_2HBr$. Such compounds are in reality of the same nature as the so-called ammonia hydrobromate, NH_3HBr, whose real structure is probably represented by the formula $\genfrac{}{}{0pt}{}{H}{Br}\!\!>\!N \equiv H_3$, or $NH_4 - Br$. Such compounds are therefore more appropriately called hydrobromides. [B.]

HYDROBROMETHYL, n. Hi-dro-brom-e^{2}th'i^{2}l. Ger., *Hydrobromäthyl.* Ethyl bromide. [B.]

HYDROBROMIC, adj. Hi-dro-brom'i^{2}k. Lat., *hydrobromicus.* Fr., *hydrobromique, bromhydrique.* Compounded of or containing hydrogen and bromine. [B.]—**H. acid.** Lat., *acidum hydrobromicum* (seu *bromhydricum*). Fr., *acide bromhydrique* (*gazeux* [Fr. Cod.]). Ger., *Hydrobromsäure, Bromwasserstoffsäure.* A colorless, fuming gas, HBr, having an irritating odor and a strong acid reaction. At −73° C. it forms a colorless liquid, and at −87° freezes into a colorless solid. The ordinary h. acid, or aqueous solution of h. acid (Fr., *solution aqueuse d'acide bromhydrique*), consists of h. acid dissolved in water. The saturated solution has a sp. gr. of 1·78 at 0° C. It is a colorless solution emitting pungent, irritating fumes. The official (or dilute) h. acid (Lat., *acidum hydrobromicum dilutum* [U. S. Ph.], Fr., *acide bromhydrique dissous* [Fr. Cod.]) contains 10 per cent. of h.-acid gas, and has at 15° C. a sp. gr. of 1·077. It is a limpid, colorless, odorless liquid of strongly acid taste and reaction. H. acid has been used to prevent the unpleasant sensations in the head caused by quinine, to relieve tinnitus, and to mitigate the "hot flashes" of the menopause. [B.]—**H. ether.** See ETHYL *bromide.*

HYDROBROMIDE, n. Hi-dro-brom'i^{2}d(id). Fr., *hydrobromure.* Ger., *Hydrobromür, -bromwasserstoff.* It., *idrobromuro.* Sp., *hidrobromuro.* A compound of an element or radicle with hydrogen and bromine; a hydrobromate in the modern sense of that term, and used in preference to the latter, as being more precise. [B.]

HYDROBROMIODIDE, n. Hi-dro-brom-i'od-i^{2}d(id). A compound of hydrogen, bromine, and iodine with the same base. [B.]

HYDROCACHEXIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-ka^{2}k-(ka^{3}ch^2)-e^{2}x'i^2-a^3. From ὕδωρ, water, and καχεξία, a bad habit of body. Fr., *hydrocachexie.* Ger., *Wassercachexie, Wasserseuche.* See CACHEXIA *aquosa.*

HYDROCAMPHORIC ACID, n. Hi-dro-ka^{2}m-fo^{2}r'i^{2}k. Fr., *acide hydrocamphorique.* An acid, $C_{10}H_{18}O_4$, formed by heating camphoric acid at 160° C. with hydriodic acid of a density of 1·55. It occurs in granules soluble in hot water. [B, 46 (α, 39).]

HYDROCARBON, n. Hi-dro-ka^{3}rb'o^{2}n. From ὕδωρ, water, and *carbo*, a coal. Fr., *hydrocarbure.* Ger., *Kohlenwasserstoff.* It., *idrocarburo.* A compound of carbon and hydrogen. The h's constitute a number of homologous series, each member of each series being formed from the preceding member by the addition of the common difference CH_2. Consequently, in each series, the relation between the number of hydrogen and the number of carbon atoms in each member is the same; and this relation may accordingly be expressed by a general formula which will represent every member of that particular series. Thus the paraffins have the general formula $= C_nH_{2n+2}$, in which 1, 2, 3, etc., being substituted in succession for *n*, all the members of that group will be formed. Series of hydrocarbons having the following general formulæ are known:

1. C_nH_{2n+2}; paraffins or ethanes; h's in which the entire combining capacity is saturated.
2. C_nH_{2n+1}; alkyls or alcohol radicles; univalent hydrocarbons.
3. C_nH_{2n}; olefines, alkylidenes, or aldehyde radicles; bivalent hydrocarbons.
4. C_nH_{2n-1}; organic acid radicles, acidyls; trivalent hydrocarbons.
5. C_nH_{2n-2}; alcohol acid radicles; quadrivalent hydrocarbons.
6. C_nH_{2n-3}; aldehyde acid radicles; quinquivalent hydrocarbons.
7. C_nH_{2n-4}; double acid radicles; sexvalent hydrocarbons; also the saturated compounds (*terpenes*), $C_{10}H_{16}$.
8. C_nH_{2n-5}; septivalent hydrocarbons.
9. C_nH_{2n-6}; octovalent (and saturated) hydrocarbons. [Benzene derivatives, aromatic series.]
10. C_nH_{2n-7}; nonivalent (and univalent) hydrocarbons. [Phenyl derivatives.]
11. C_nH_{2n-8}; decivalent hydrocarbons. Of these are known *phenylene*, C_6H_4, and *cinnamene*, C_8H_8.
12. C_nH_{2n-10}; *cholesterene*, $C_{26}H_{42}$, is the only known member of this group.
13. C_nH_{2n-12}. Of these, *naphthalene*, $C_{10}H_8$, and *pyrene*, $C_{16}H_{10}$, are known.
14. C_nH_{2n-14}. Of these, *diphenyl*, $C_{12}H_{10}$, *acenaphthene*, $C_{12}H_{10}$, *diphenylmethane*, $C_{13}H_{12}$, *phenyltoluene*, $C_{13}H_{12}$, *dibenzyl*, $C_{14}H_{14}$, *diphenylethane*, $C_{14}H_{14}$, *benzyltoluene*, $C_{14}H_{14}$, *ditolyl*, $C_{14}H_{14}$, *ditolylmethane*, $C_{15}H_{16}$, *benzylethylbenzene*, $C_{15}H_{16}$, *ditolylethane*, $C_{16}H_{18}$, *dimesitylethane*, $C_{19}H_{24}$, and *dibenzyl*, $C_{14}H_{14}$, are known.
15. C_nH_{2n-16}. *Stilbene*, $C_{14}H_{12}$, is known.
16. C_nH_{2n-18}. Of these, *anthracene*, $C_{14}H_{10}$, *phenanthrene*, $C_{14}H_{10}$, *methylanthracene*, $C_{15}H_{12}$, *dimethylcenthracene*, $C_{16}H_{14}$, and *retene*, $C_{18}H_{18}$, are known.
17. C_nH_{2n-22}. *Diphenylbenzene*, $C_{18}H_{14}$, and *triphenylmethane*, $C_{19}H_{16}$, are known.
18. C_nH_{2n-24}. *Chrysene*, $C_{18}H_{12}$, and *diphenylphenylenemethane*, $C_{19}H_{14}$, are known.
19. C_nH_{2n-26}. *Dinaphthyl*, $C_{20}H_{14}$, is known.
20. C_nH_{2n-30}. *Triphenylbenzine*, $C_{24}H_{18}$, *tetraphenylmethane*, $C_{25}H_{20}$, and *tetraphenylethane*, $C_{26}H_{22}$, are known.
21. C_nH_{2n-32}. *Tetraphenylethylene*. $C_{26}H_{20}$, is known.

There has been proposed for the hydrocarbons a nomenclature which would indicate both the series to which any member belonged, and also its place in the series. The latter is denoted by the initial syllable of the title: *meth-*, for hydrocarbons containing 1 atom of carbon; *eth-*, when there are 2 carbon atoms; *prop-*, when there are 3 atoms; *quart-*, or *tet-*, 4 atoms; *quint-*, or *pent-*, 5 atoms, etc., each member after the third being designated by a prefix, taken from the Latin or Greek, indicative of the number of carbon atoms. The series to which the h. belongs is designated by an affix, as follows:

1. Series C_nH_{2n+2}, *-ane*, pentane, C_5H_{12}.
2. Series C_nH_{2n+1}, *-yl*, pentyl (amyl), C_5H_{11}.
3. Series C_nH_{2n}, *-ene*, pentene (amylene), C_5H_{10}.
4. Series C_nH_{2n-1}, *-enyl*, pentenyl, C_5H_9.
5. Series C_nH_{2n-2}, *-ine*, pentine, C_5H_8.
6. Series C_nH_{2n-3}, *-inyl*, pentinyl, C_5H_6.
7. Series C_nH_{2n-4}, *-one*, pentone, C_5H_6.
8. Series C_nH_{2n-5}, *-onyl*, pentonyl, C_5H_5.
9. Series C_nH_{2n-6}, *-une*, pentune, C_5H_4.
10. Series C_nH_{2n-7}, *-unyl*, pentunyl, C_5H_3. [B.]

—**Normal h.** A h. the carbon nuclei of which are imagined to be arranged in a chain, so that no one nucleus is connected with more than two adjacent nuclei. Such a row of nuclei is thus represented: $C''' - C'' - C'' - C'' \ldots\ldots - C'''$. [B.]

O, no; **O**^{2}, not; **O**^{3}, whole; **Th**, thin; **Th**^{2}, the; **U**, like oo in too; **U**^{2}, blue; **U**^{3}, lull; **U**^{4}, full; **U**^{5}, urn; **U**^{6}, like ü (German).

HYDROCARBONAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-ka^{3}rb-on'a^{2}s(a^{3}s). Gen., *-at'is.* See HYDROCARBONATE.—**H. magnesicus.** See MAGNESIUM *carbonate.*—**H. zincicus** [Fr. Cod.]. Zinc hydrocarbonate. [B, 113.]

HYDROCARBONATE, n. Hi-dro-ka^{3}rb'o^{2}n-at. Lat., *hydrocarbonas* (from ὕδωρ, water, and *carbo*, a coal). Fr., *h.* Ger., *Hydrocarbonat.* 1. A hydrated carbonate. 2. A compound consisting of a carbonate and a hydrate. 3. An acid carbonate; so called because containing an atom of hydrogen in addition to the acid radicle of carbonic acid. [B.]

HYDRO-CARBONÉ (Fr.), adj. E-dro-ka^{3}r-bo-na. From ὕδωρ, water, and *carbo*, a coal. Composed of water and carbon. [L, 41 (α, 38).]

HYDROCARBONIC, adj. Hi-dro-ka^{3}rb-o^{2}n'i^{2}k. Lat., *hydrico-carbonicus.* Fr., *hydrocarbonique.* Containing both hydrogen and carbon. [B.]—**H. sulphite.** Fr., *acide hydro-sulfocarbonique.* See THIOCARBONIC ACID.

HYDRO-CARBONICUS (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-ka^{3}rb-o^{2}n(on)'i^{2}k-u^{3}s(u^{4}s). Hydrocarbonic; with the name of a base, the acid carbonate of the base. [B.]

HYDROCARBURET, n. Hi-dro-ka^{3}rb'u^2-re^{2}t. Lat., *hydrocarburetum.* Fr., *hydrocarbure.* See HYDROCARBON.

HYDROCARDIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-ka^{3}rd'i^2-a^3. From ὕδωρ, water, and καρδία, the heart. Fr., *hydrocardie.* Ger., *Herzbeutelwassersucht.* Of Fabricius Hildanus, serous effusion into the pericardium. [L, 50 (α, 14).]

HYDROCAROTIN, n. Hi-dro-ka^{3}r-ot'i^{2}n. Fr., *hydrocarotine.* Ger., *H.* A crystalline principle, $C_{18}H_{30}O$, discovered (together with carotin) by Husemann in the carrot. According to Arnaud ["Compt. rend.," cxii, 1319, "Ann. di chim. e di farmacol.," Aug., 1886, p. 111], it is identical with cholesterin, colored with a red pigment. [B; "Proc. of the Am. Pharm. Assoc.," xv (α, 14).]

HYDROCATARRHOPHESIS (Lat.), **HYDROCATARRHOPHIA** (Lat.), n's f. Hid(hu^{6}d)-ro(ro^3)-ka^{2}t(ka^{3}t)-a^{3}r-ro^{2}f-e-(a)'si^{2}s, -rof(ro^{2}f)'i^2-a^3. Gen., *-es'eos* (*-is*), or *-rhop'hiæ.* From ὕδωρ, water, κατά, entirely, and ῥόφησις, a supping up. Fr., *hydrocatarrhophèse.* Ger., *Wassereinsaugung.* The absorption of water. [L, 50 (α, 14).]

HYDROCAULUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-ka^{4}l'(ka^3'u^{4}l)-u^{3}s(u^{4}s). From ὕδωρ, water, and καυλός, the stalk of a plant. 1. The main stem of the cœnosarc of a hydrozoon. 2. All that portion of the hydrophyton which intervenes between the hydrorrhiza and the hydranth. [B, 28 (α, 27); L, 193.]

HYDROCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se(ka)'le(la); in Eng., hid'ro-sel. Gen., *-cel'es* (*-æ*). Gr., ὑδροκήλη (from ὕδωρ, water, and κήλη, a tumor). Fr., *hydrocèle.* Ger., *Wasserbruch.* It., *idrocele.* Sp., *hidrocele.* A collection of clear, watery fluid, especially in the tunica vaginalis testis, the vaginal process of the spermatic cord, or the canal of Nuck.—**Abdominal h.** An accumulation of fluid in the tunica vaginalis communis with its greatest distention beneath the fascia transversalis. [α, 40.]—**Acute h.** Lat., *h. acuta.* 1. Of Velpeau, the effusion of serum into the tunica vaginalis during acute orchitis. 2. A h. developing from traumatism. [α, 40.]—**Anasarcous h.** Œdema of the scrotum. [α, 40.]—**Chylous h.** Fr., *hydrocèle graisseuse.* See CHYLOCELE.—**Congenital h. of the neck.** See *H. of the neck.*—**Congenital h. of the spermatic cord.** A h. due to the fact that the communication between the cavities of the peritonæum and of the tunica vaginalis has never been obliterated. [E.]—**Diffused h. of the spermatic cord.** Lat., *h. diffusa funiculi spermatici.* A disease of the nature of œdema, a watery fluid being diffused throughout the loose tissue connecting the vessels of the spermatic cord and inclosed in a sheath of condensed tissue. [E, 16.]—**Dupuytren's h.** Fr., *hydrocèle en bissac.* A h. having a constriction, so that it is more or less completely divided into two masses. [L, 41; "Un. méd. et sci. du Nord.-Est."; "Province méd.," Oct. 6, 1888, p. 577.]—**Encysted h.** A cystic tumor of the spermatic cord. It rarely exceeds the size of a hen's egg and is always of slow growth. [α, 40.]—**Encysted h. of the epididymis.** The same as encysted h. of the testicle, except that the cyst is connected with the epididymis. [E, 16.]—**Encysted h. of the spermatic cord.** Lat., *h. funiculi spermatici saccata* (1st def.). Fr., *hydrocèle enkystée du cordon spermatique.* 1. A tumor caused by the development of a cyst containing fluid in the loose connective tissue of the spermatic cord. 2. A h. of the vaginal process of the peritonæum, a portion of which has remained open. [E, 16.]—**Encysted h. of the testicle** (or **testis**). Lat., *h. saccata testis.* Fr., *hydrocèle enkystée du testicule.* A form of h. in which fluid is effused into an adventitious cyst or cysts distinct from the sac of the tunica vaginalis. [E, 16.]—**Encysted h. of the tunica vaginalis.** A h. due to the formation of an adventitious cyst in the tunica vaginalis. [E, 16.] See *Encysted h. of the testicle.*—**Endemic h. of Malabar.** Fr., *hydrocèle endémique de Malabar.* See ELEPHANTIASIS *Arabum.*—**External h.** Lat., *h. œdematodes.* Fr., *hydrocèle par infiltration.* A serous infiltration of the areolar tissue of the scrotum. [E.]—**Funicular h.** See *H. of the spermatic cord.*—**Gibbon's h.** A h. coexisting with a large hernia. ["Un. méd. et sci. du Nord.-Est"; "Province méd.," Oct. 6, 1888, p. 577.]—**H. acuta.** See *Acute h.*—**Hydatid h.** A tumor of the tunica vaginalis composed of numerous small cysts. [α, 40.]—**H. bilocularis.** A h. consisting of two cysts. [Englisch (A, 319 [α, 21]).]—**H. bilocularis abdominalis.** A h. of the tunica vaginalis communis, with distention above and below, connected by a narrow canal through which the fluid can be pressed from one lobe to the other. [α, 40.]—**H. by effusion.** 1. The ordinary h. of the tunica vaginalis. 2. Accidental cysts distended by serum. [Velpeau (α, 40).]—**H. by infiltration.** General œdema of the scrotum. [α, 40.]—**H. colli.** See *H. of the neck.*—**H. communicans.** A h. communicating with the peritoneal cavity. [A, 326 (α, 21).]—**H. complicata.** A h. complicated with hernia. [A, 326 (α, 21).]—**H. des Bauchsackes** (Ger.). See ASCITES.—**H. des Bruchsackes** (Ger.). See *H. of the hernial sac.*—**H. des Hodens** (Ger.). See *H. testis.*—**H. des Samenstranges** (Ger.). See *H. of the spermatic cord.*—**H. diffusa funiculi spermatici.** See *Diffused h. of the spermatic cord.*—**H. fœminæ, H. fœminea.** See *H. of the labium pudendi majus.*—**H. funiculi spermatici.** See *H. of the spermatic cord.*—**H. funiculi spermatici diffusa.** See *Diffused h. of the spermatic cord.*—**H. funiculi spermatici saccata.** See *Encysted h. of the spermatic cord* (1st def.).—**H. hernialis.** See *H. of the hernial sac.*—**H. ingenita.** See *Congenital h.*—**H. in the female.** Lat., *h. fœminæ, h. fœminea, h. muliebris.* See *H. of the labium pudendi majus.*—**H. intra-abdominalis.** A h. of the upper portion of the inguinal canal connected with the peritoneal cavity by a small neck. [Peterson (α, 40).]—**H. ischiadica congenita.** A congenital accumulation of fluid in a serous sac passing out through the sacro-ischiadic space. It is connected by a narrow neck with the peritoneal cavity and is reducible. [α, 40.]—**H. muliebris.** See *H. of the labium pudendi majus.*—**H. multilocularis.** See *Multilocular h.*—**H. multiplex.** See *Multiple h.*—**H. œdematodes.** See *External h.*—**H. of the canal of Nuck.** See *H. of the labium pudendi majus.*—**H. of the cells of the tunica communis** [Pott]. See *Diffused h. of the spermatic cord.*—**H. of the femoral canal.** An accumulation of serous fluid in a femoral sac the neck of which has been obliterated. [α, 40.]—**H. of the hernial sac.** Lat., *h. hernialis.* Fr., *hydrocèle du sac herniaire.* Ger., *H. des Bruchsackes.* An accumulation of fluid in a hernial sac, due to obstruction at its neck. [E.]—**H. of the labium pudendi majus.** A h. occupying the pouch of peritonæum which sometimes remains in the canal of Nuck.—**H. of the neck.** Lat., *h. colli.* Fr., *hydrocèle du cou.* Syn.: *hygroma of the neck.* A serous cyst of the neck, especially one of congenital origin. [E.]—**H. of the round ligament.** See *H. of the labium pudendi majus.*—**H. of the spermatic cord.** Lat., *h. funiculi spermatici.* Fr., *hydrocèle du cordon spermatique.* Ger., *H. des Samenstranges.* See *Congenital h.* (*of the spermatic cord*) and *Diffused h. of the spermatic cord.*—**H. of the spermatic cord by infiltration.** A condition in which multiple serous cysts occupy more or less of the length of the spermatic cord from the epididymis to the iliac fossa. [Velpeau (α, 40).]—**H. of the tunica vaginalis.** See *H. tunicæ vaginalis.*—**H. peritonæi.** Ger., *H. des Bauchsackes.* Ascites. [E.]—**H. saccata testis.** See *Encysted h. of the testicle.*—**H. simplex.** A simple h. [Englisch (A, 319 [α, 21]).]—**H. spinalis.** Hydrorrhachis. [α, 40.]—**H. testis.** A small encysted tumor beneath the tunica albuginea, probably due to a parenchymatous hæmatocele. [Heath (α, 40).]—**H. tunicæ vaginalis (testis).** A h. occupying the space between the tunica vaginalis and the testicle.—**H. unilocularis.** A h. consisting of one cyst. [A, 326 (α, 21).]—**Infantile h.** A vaginal h. involving more or less of the process of peritonæum in front of the spermatic cord, but shut off from the peritoneal cavity by obliteration of the canal at or near the internal abdominal ring. [α, 40.]—**Inguinal h.** An accumulation of fluid in a closed serous sac surrounding an undescended testicle lodged in the inguinal region. [α, 40.]—**Internal h.** See *H. tunicæ vaginalis.*—**Milky h.** See CHYLOCELE.—**Multilocular h.** Lat., *h. multilocularis.* A sacculated condition of a h. produced by adhesions in the sac and resulting in several distinct cysts which may not communicate with each other. [E, 16.]—**Multiple h.** Lat., *h. multiplex.* H. of the tunica vaginalis and the spermatic cord, or both, with cysts. [Englisch (A, 319 [α, 21]).]—**Œdematous h.** See *External h.*—**Oscheo-h.** An accumulation of serous fluid in a hernial sac the neck of which has been obliterated. [α, 40.]—**Parenchymatous h. of the epididymis.** A cyst of the epididymis not in the tunica vaginalis, globular in outline and rarely of considerable size. It consists of a delicate fibrous membrane lined by a tessellated epithelium. When it is small, the fluid is clear and colorless, but when it is large it becomes opaque and milky and contains spermatozooids. [α, 40.]—**Recto-vaginal h.** A cystic tumor, filled with serous fluid, situated between the rectum and vagina and communicating with the peritoneal cavity by a small circular orifice. [α, 40.]—**Spermatic h.** See *Encysted h.*—**Spurious h. of the hernial sac.** A scrotal hernia attended with marked serous effusion. The term covers all cases of hernia with effusion, whether the communication with the abdominal cavity is open or closed. [E, 16.]—**Vaginal h.** A h. of the tunica vaginalis. [α, 40.]—**Water-bottle h.** A h. of the tunica vaginalis which is distended below and connected by a narrow canal above with the peritoneal cavity. [α, 40.]

HYDROCÈLE (Fr.), n. E-dro-se^{2}l. See HYDROCELE.—**H. du cordon spermatique.** See HYDROCELE *of the spermatic cord.*—**H. du cou.** See HYDROCELE *of the neck.*—**H. du sac herniaire.** See HYDROCELE *of the hernial sac.*—**H. en bissac.** See *Dupuytren's* HYDROCELE.—**H. endémique de Malabar.** See ELEPHANTIASIS *Arabum.*—**H. enkystée du cordon spermatique.** See *Encysted* HYDROCELE *of the spermatic cord.*—**H. graisseuse.** See CHYLOCELE.—**H. interne.** See HYDROCELE *tunicæ vaginalis.*—**H. œdematodes.** See *External* HYDROCELE.—**H. par épanchement.** See *Internal* HYDROCELE.—**H. par infiltration.** See *External* HYDROCELE.

HYDROCELIC, adj. Hi-dro-sel'i^{2}k. Gr., ὑδροκηλικός (from ὕδωρ, water, and κήλη, a tumor). Of or pertaining to hydrocele. [E.]

HYDROCELLULOSE, n. Hi-dro-se^{2}l'u^{2}l-os. A body, $C_{12}H_{22}O_{11}$, formed when cellulose is moistened with any dilute mineral acid, and then dried. It is insoluble in water, soluble in hot dilute alkalies, and is well suited for the manufacture of photographic collodion. [B, 3 (α, 38); B, 46 (α, 39); "Proc. of the Am. Pharm. Assoc.," xxiv, xxx (α, 14).]

HYDROCELODES (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-se^{2}l(kal)-od'-ez(as). From ὑδροκήλη, hydrocele, and εἶδος, resemblance. A swelling of the scrotum resembling a hydrocele, which may be due to an accumulation of urine from a rupture of the urethra into the scrotum. [L, 81.]

HYDROCENOSIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se^{2}n(ke^{2}n)-o′-si^{2}s. Gen., *-os′eos* (*-is*). From ὕδωρ, water, and κένωσις, a discharge. Fr., *hydrocénose*. Ger., *Ausleerung des Wassers, Wasserentleerung*. The reduction of a dropsical accumulation of water, either by hydragogue medicines or by paracentesis. [L, 50, 107 (α, 14).]

HYDROCENOTIC, adj. Hid-ro-se^{2}n-o^{2}t′i^{2}k. Lat., *hydrocenoticus*. Fr., *hydrocénotique*. Pertaining to hydrocenosis. [L, 50 (α, 14).]

HYDROCÉPHALE (Fr.), n. E-dro-sa-fa^{3}l. See HYDROCEPHALUS.

HYDROCEPHALIC, adj. Hi-dro-se^{2}f-a^{2}l′i^{2}k. Lat., *hydrocephalicus* (from ὕδωρ, water, and κεφαλή, the head). Fr., *hydrocéphalique*. Ger., *hydrocephalisch*. Pertaining to, affected with, or of the nature of hydrocephalus. [D.]

HYDROCEPHALITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From ὕδωρ, water, and κεφαλή, the head (see also *-itis**). Fr., *hydrocéphalite*. See HYDRENCEPHALITIS.

HYDROCEPHALIUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)′i^2-u^{3}m(u^{4}m). See HYDROCEPHALUS.

HYDROCEPHALOCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)-o(o^3)-se(ka)′le(la); in Eng., hi-dro-se^{2}f′a^{2}l-o-sel. Gen., *-cel′es* (*-œ*). See HYDRENCEPHALOCELE.

HYDROCEPHALOCENTESIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^3)-se^{2}n(ke^{2}n)-te(ta)′si^{2}s. Gen., *-es′eos* (*-is*). From ὕδωρ, water, κεφαλή, the head, and κέντησις, a puncturing. Fr., *hydrocéphalocentèse*. Ger., *Anstechung des Wasserkopfs*. The operation of puncturing the head in hydrocephalus. [L, 50, 107 (α, 14).]

HYDROCEPHALOID, adj. Hi-dro-se^{2}f′a^{2}l-oid. From ὕδωρ, water, κεφαλή, the head, and εἶδος, resemblance. Resembling hydrocephalus; as a n., of Marshall Hall, a form of cerebral anæmia occurring in young children; so called on account of its resemblance to tubercular meningitis (from which it differs in presenting a depression of the fontanelles). After death blood is found in the vessels of the brain, and the ventricles are distended with fluid. [D, 34.]

HYDROCEPHALON (Lat.), **HYDROCEPHALUM** (Lat.), n's n. Hid-ro(ro^3)-se^{2}f(ke^{2}f)′a^{2}l(a^{3}l)-o^{2}n, -u^{3}m(u^{4}m). See HYDROCEPHALUS.

HYDROCEPHALUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-se^{2}f(ke^{2}f)′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). Written, also, *hydrocephalon*, *hydrocephalum*. Gr., ὑδροκέφαλον (from ὕδωρ, water, and κεφαλή, the head). Fr., *hydrocéphale*, *hydrocéphalie*. Ger., *Hydrocephalie*, *Wasserkopf*. It., *idrocefalo*, *idrocefalia*. Sp., *hidrocéfalo*, *hidrocefalia*. Dropsy of the brain. An accumulation of serous fluid in undue amount within the cavity of the cranium. [B, 46 (α, 39); D, 20.]—**Acquired h.** See *H. acquisitus*.—**Acute h.** Lat., *h. acutus*. Fr., *hydrocéphale aiguë*. Ger., *acuter H.* (oder *Wasserkopf*). See *Tubercular* MENINGITIS and LEPTOMENINGITIS *infantum* and cf. *Acute internal h.*—**Acute internal** (or **tuberculous**) **h.** Lat., *h. acutus internus*. Fr., *hydrocéphale aiguë* (ou *interne*, ou *ventriculaire*). Ger., *acuter* (oder *hitziger*) *Wasserkopf*. As ordinarily understood, tubercular meningitis, *i. e.*, a marked increase in the fluid contents of the ventricles of the brain, together with a softening of the surrounding portions of the brain substance, produced by miliary tubercles, in the arachnoid, at the base of the brain, acting as an irritant. [D, 29.]—**Anencephalous h.** Fr., *hydrocéphalie anencéphalique*. H. in which there is little or no development of the brain, the space it should occupy in the calvaria being filled by hydrocephalic fluid. [E. Blanc, "Nouv. arch. d'obstét. et de gynéc.," May, 1886, p. 245 (α, 40).]—**Arachnoid h.** H. in which the effusion takes place into the arachnoid cavity.—**Chronic** (**internal**) **h.** Lat., *h. chronicus internus*, *h. longus*, *hydrops ventriculorum chronicus*. Fr., *hydrocéphale chronique*. Ger., *chronischer H.*, *chronische Hydrocephalie* (oder *Gehirnwassersucht*), *Wasserkopf*. An intracranial dropsy, usually occurring in childhood, characterized by an effusion of a serous or albuminous fluid into the ventricles, ordinarily, but sometimes into the subarachnoid space, into a cyst between the hemispheres, or between the membranes. When the quantity of fluid is large and the pressure, consequently, is great, the membranes and the brain may become infiltrated and softened. The cranium is enlarged in proportion to the quantity of fluid and the pressure. It may present a symmetrical balloon-shape, being fullest at the occiput, or at the vertex; or the enlargement may be irregular. The cranial bones are usually thin and soft, but are sometimes unusually thick. In addition to the ordinary or internal form of the disease, there is also the external, in which the membranes of the brain protrude through openings between the cranial bones. [D, 1.] Cf. *External h.*—**Congenital h.** Lat., *h. congenitus*. Fr., *hydrocéphalie congénitale*. Ger., *angeborene Hydrocephalie*. A congenital form of chronic h. [A, 326 (α, 21).]—**External h.** Lat., *h. externus*. Fr., *hydrocéphale externe*. H. in which the effusion collects within the meshes of the pia mater, or in the subarachnoid spaces. [A, 326 (α, 21); D, 4.]—**Fœtal h.** See under *Congenital h.*—**H. acquisitus.** Fr., *hydrocéphalie acquise*. H. developed after birth. [A, 326 (α, 21).]—**H. acutus.** See *Acute h.*—**H. acutus internus.** See *Acute internal h.*—**H. centralis.** See *Internal h.*—**H. chronicus.** See *Chronic h.*—**H. chronicus externus.** H. in which the effusion collects between the cerebral surface and the cranial wall. [Heubner (A, 319 [α, 21]).]—**H. chronicus internus.** See *Chronic h.*—**H. congenitus.** See *Congenital h.*—**H. externus.** See *External h.*—**H. ex vacuo.** H. in which the ventricles and arachnoid space are distended with fluid in consequence of cerebral atrophy. [D, 70.] Cf. HYDROCEPHALOID.—**H. herniosus.** The external form of chronic h. (*q. v.*).—**H. internus.** See *Internal h.*—**H. internus chronicus.** See *Chronic h.*—**H. longus.** See *Chronic h.*—**H. meningeus.** The h. of tubercular meningitis. [α, 40.]—**H. of adults.** H. due to simple basilar meningitis. [α, 40.]—**H. of childhood.** See LEPTOMENINGITIS *infantum*.—**H. of the insane, H. senilis.** The h. which occurs in senile atrophy of the brain. The fluid is chiefly in the ventricles and the sulci between the atrophied convolution. [L, 40.]—**H. sine tuberculis.** H. unaccompanied by tubercular deposit. [D, 35.] See LEPTOMENINGITIS *infantum*.—**H. ventricularis, H. verus.** See *Internal h.*—**Internal h.** Lat., *h. internus*, *h. centralis*. Fr., *hydrocéphale interne*. Ger., *Gehirnhöhlenwassersucht*, *innerer Wasserkopf*. H. in which there is a serous effusion into the ventricles of the brain. [D, 4.]—**Secondary h.** The h. recurring in epidemic cerebro-spinal meningitis after the acute inflammatory symptoms have subsided. [L, 40.]—**Spurious h.** See HYDROCEPHALOID.—**Tuberculous h.** See *Tubercular* MENINGITIS.

HYDROCHAMÆMELUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-kam-(ch^{2}a^{3}m)-e^{2}m(a^3-e^{2}m)-el(al)′u^{3}m(u^{4}m). Gr., ὑδροχαμαίμηλον (from ὕδωρ, water, and χαμαίμηλον, chamomile). See *Infusum* ANTHEMIDIS.

HYDROCHARIS (Lat.), n. f. Hid-ro^{2}k(ro^{2}ch^2)′a^{2}r(a^{3}r)-i^{2}s. Gen., *-char′itos* (*-itis*). From ὕδωρ, water, and χάρις, grace. Fr., *morrène*, *hydrocharide*, *h.* Ger., *Froschbiss*. A genus of the *Hydrocharideæ*, tribe *Stratioteæ*. The *Hydrocharaceæ* of Lindley are the *Hydrocharideæ* (1st def.). The *Hydrochareæ* of Reichenbach are a division of the *Hydrocharideæ*, consisting of *Hydrocharis*, *Hydropeltis*, etc., and subsequently of the subdivisions *Anacharideæ*, *Vallisnerieæ*, and *Stratiotideæ*. The *Hydrochariæ* of Dumortier are the *Hydrocharideæ* (1st def.). The *Hydrocharidaceæ* of Lindley are the *Hydrocharideæ* (Fr., *hydrocharidées*; Ger., *Hydrocharideen*), which are the hydrocharads, or frogbits: 1. Of Ventenat, an order (of Reichenbach, a family) of the *Helobiæ*, consisting, in Reichenbach's last classification (1841), of the divisions *Hydrochareæ*, *Nepentheæ*, and *Nymphæaceæ*. Bentham and Hooker divide them into two series: the *Glycydræ*, containing the tribes *Hydrilleæ*, *Vallisnerieæ*, and *Stratioteæ*; and the *Marinæ*, consisting of the tribe *Thalassieæ*. 2. Of De Candolle, a family of plants (of Dumortier, a family of the *Hydrochariæ*), consisting of the tribes *Limnobieæ* and *Stratioteæ*. The *Hydrocharides* of Jussieu are the *Hydrocharideæ* (1st def.). The *Hydrocharidinæ* are the *Hydrocharideæ* (1st def.). The *Hydrocharies* are a tribe of the *Œnanthereæ*. [B, 19, 34, 38, 42, 48, 71, 170, 173, 180, 275 (α, 24).]—**H. morsus diaboli** (seu **ranæ**). Fr., *morrène aquatique*. Ger., *gemeiner Froschbiss*. Frogbit; formerly used as a mild astringent. [B, 173, 180 (α, 24).]

HYDROCHEMISTRY, n. Hi-dro-ke^{2}m′i^{2}st-ri^2. Lat., *hydrochemia* (from ὕδωρ, water, and χημεία, chemistry). The chemistry of water and other liquids. [L, 56.]

HYDROCHEZIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-kez(ch^{2}e^{2}z)′-i^2-a^3. From ὕδωρ, water, and χέζειν, to defecate. Fr., *hydrochézie*. Ger., *wässeriger Durchfall*. Watery diarrhœa. [L, 50 (α, 14).]

HYDROCHINIDIN (Ger.), n. Hu^6-dro-ch^{2}en-e-den′. See HYDROQUINIDINE.

HYDROCHININ, n. Hu^6-dro-ch^{2}en-en′. See HYDROQUININE.

HYDROCHINONE, n. Hi-dro-ki^{2}n′on. Lat., *hydrochinonum*. Fr., *h.* Ger., *Hydrochinon*, *Hydrochinonschwefelsäure*. See HYDROQUINONE.

HYDROCHLORADRÉE (Fr.), n. E-dro-klo-ra^3-dra. See CHOLERA *morbus*.

HYDROCHLORANILIC ACID, n. Hi″dro-klor-a^{2}n-i^{2}l′i^{2}k. Fr., *acide hydrochloranilique*. Ger., *Hydrochloranilsäure*. A 2-atom addition compound of chloranilic acid, $C_6Cl_2O_2(OH)_2 + H_2 = C_6Cl_2(OH)_4$, obtained by heating with sulphurous acid. It forms white acicular crystals, slightly soluble in hot water, soluble in cold water, in alcohol, and in ether. [B, 4; B, 46 (α, 39).]

HYDROCHLORAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-klor(ch^{2}lor)′-a^{2}s(a^{3}s). Gen., *-at′is*. See HYDROCHLORATE.—**H. ammonico-ferrosus.** See IRON *and ammonium chloride*.—**H. ammoniacus.** See AMMONIUM *chloride*.—**H. morphicus.** See MORPHINE *hydrochloride*.—**H. potassicus.** See POTASSIUM *chloride*.

HYDROCHLORATE, n. Hid-ro-klor′at. Lat., *hydrochloras*, *chlorhydras*. Fr., *hydrochlorate*, *chlorhydrate*. Sp., *clorhidráto*. A compound of hydrochloric acid. It is occasionally used in the sense of chloride, but generally denotes an addition compound of hydrochloric acid with a radicle of the ammonia type, an alkaloid, for instance. Thus the hydrochlorate of quinine is $C_{20}H_{24}N_2O_2.HCl$. Such compounds are really of the same nature as the so-called h. of ammonia, (NH_3HCl), where, although a molecule of HCl is apparently united with a molecule of NH_3, in reality the additional atoms of hydrogen and chlorine are combined separately with the quinquivalent nitrogen, as represented by the graphic formula, $\begin{matrix}H\\Cl\end{matrix}\!\!>\!N\equiv(H_3)$. The term hydrochloride, therefore, appears more appropriate as applied to these compounds. [B.]

HYDROCHLORATUS (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-klor-(ch^{2}lor)-at(a^{3}t)′u^{3}s(u^{4}s). Containing hydrochloric acid; muriated; with the name of a base, the hydrochlorate or the chloride of that base.

HYDROCHLORE (Fr.), n. E-dro-klor. Ger., *Hydrochlor*. See *Aqua* CHLORI.

HYDROCHLORIC, adj. Hid-ro-klor′i^{2}k. Lat., *hydrochloricus*. Fr., *hydrochlorique*, *chlorhydrique*. Ger., *Hydrochlor-*. It., *hidroclorico*, *cloridrico*. Sp., *hidroclórico*, *clorhídrico*. 1. Composed of chlorine and hydrogen, chlorhydric, muriatic. On the continent of Europe, chlorhydric is the more common term. 2. Prepared with h. acid (*e. g.*, h. solution of arsenic). [B; α, 38.]—**Aqueous h. acid.** See *H. acid* (2d def.).—**Chlorinated h. ether.** See ETHYLIDENE *dichloride*.—**Crude h. acid.** The h. acid of commerce. It is official in the Ger. Ph. as *acidum hydrochloricum crudum*, and in the Fr. Cod. as *acide chlorhydrique du commerce*. It contains numerous impurities, prominent among

which are sulphuric acid, chlorine, iron, and arsenic. [B.]—**Dilute h. acid.** Lat., *acidum hydrochloricum dilutum* [U. S. Ph., Ger., Ph.], *acidum muriaticum dilutum* [U. S. Ph., 1870]. An aqueous solution of h. acid diluted with water. The U. S. Ph. preparation contains 10 per cent. of h.-acid gas and has a sp. gr. of 1·049; the Br. preparation contains 10·58 per cent. of h.-acid gas and has a sp. gr. of 1·052. The Ger. preparation contains 12½ per cent. of h.-acid gas. [B.]—**Heavy h. ether.** An old name for a mixture of h. acid, acetic aldehyde, acetal, acetic acid, ethyl acetate, and chloral, produced by treating alcohol with chlorine and washing in water. [B, 2.]—**H. acid.** Lat., *acidum hydrochloricum* (seu *hydrochloratum*, *muriaticum*, seu *marinum*). Fr., *acide chlorhydrique* (ou *hydrochlorique*). Ger., *Chlorwasserstoff*, *Hydrochlorgas*, *Hydrochlorsäure*. It., *acido cloridrico*. Sp., *ácido clorhidrico*. Syn.: *chlorhydric* (or *muriatic*) *acid*. 1. A colorless, fuming gas, HCl, of strongly acid reaction and suffocating odor, formed by the union of hydrogen and chlorine. It is often called h.-acid gas, to distinguish it from its aqueous solution to which the name h. acid is usually applied. Its sp. gr. is 1·278. It dissolves readily in water, 1,000 parts of the latter at 0° taking up 825 parts by weight or 503,000 parts by volume of the gas. The amount dissolved diminishes with an increase of the temperature, 1,000 parts of water at ordinary temperatures dissolving only about 750 parts by weight of the gas. At a temperature of —16°, and under a pressure of 20 atmospheres, h.-acid gas condenses to a colorless liquid having a sp. gr. of 1·27. 2. Ordinary h. acid, aqueous solution of h.-acid gas, commonly called h. acid; a solution of h. acid in water. The saturated solution is a colorless, fuming liquid which freezes at —40°, forming a substance resembling butter. At 0° C. it contains 45 per cent. of the gas, and at ordinary temperatures from 42 to 43 per cent. Its sp. gr. at 15° is about 1·21. Official h. acid (Lat., *acidum hydrochloricum* [U. S. Ph., Br. Ph., Ger. Ph.], *acidum muriaticum* [U. S. Ph., 1870], *acidum chlorhydricum* [Fr. Cod.]; Fr., *acide chlorhydrique officinal* [Fr. Cod.]) contains 25 per cent. of the gas [Ger. Ph.], 31·8 per cent. [Br. Ph.], 31·9 per cent. [U. S. Ph.], and 34·4 per cent. [Fr. Cod.]. The sp. gr. of these solutions at 15° is, respectively, 1·13, 1·16, and 1·17. It is a transparent, colorless liquid of corrosive taste and properties, and emitting suffocating, irritant, white fumes of the h.-acid gas. [B.]—**H.-acid gas.** See *H. acid* (1st def.). —**H. ether.** See ETHYL *chloride*.—**Liquid h. acid.** A name applied sometimes, but improperly, to the aqueous solution of h.-acid gas. It should be restricted to the liquid form which the latter assumes under the combined effect of cold and pressure. [B, 5.]

HYDROCHLORIDE, n. Hid-ro-klor'i^{2}d(id). Fr., *hydrochlorure*. Ger., *-chlorwasserstoff*. It., *idrocloruro*. Sp., *hidrocloruro*. A compound of an element or radicle with both hydrogen and chlorine. It is used instead of hydrochlorate, as being less ambiguous. [B.]

HYDROCHLORINAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-klor-(ch^{2}lor)-in(en)'a^{2}s(a^{2}s). Gen., *-atis*. See HYDROCHLORIDE and CHLORIDE.—**H. natricus.** Sodium chloride. [B, 88 (*a*, 39).]

HYDROCHLORONITRIC ACID, n. Hid''ro-klor-o-ni'tri^{2}k. See NITRO-HYDROCHLORIC ACID.

HYDROCHLOROCYANIC ACID, n. Hid''ro-klor-o-si-a^{2}n'-i^{2}k. Lat., *acidum hydrochlorocyanicum*. Fr., *acide hydrochlorocyanique*. An acid composed of hydrochloric acid and cyanogen. [B, 38 (*a*, 14).]

HYDROCHLORSÄURE (Ger.), n. Hu^{6}d-ro-ch^{2}lor'zoir-e^2. See HYDROCHLORIC *acid*.

HYDROCHOLECYSTIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-kol-(ch^{2}o^{2}l)-e^2(a)-si^{2}st(ku^{6}st)'i^{2}s. Gen., *-cyst'eos* (*-is*). From ὕδωρ, water, χολή, bile, and κύστις, a bladder. Fr., *hydrocholecystite*. Ger., *Gallenblasenwassersucht*. Dropsy of the gall-bladder. [L, 50, 107 (*a*, 14).]

HYDROCHOLECYSTITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-kol-(ch^{2}o^{2}l)-e^2(a)-si^{2}st(ku^{6}st)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, χολή, bile, and κύστις, a bladder (see also *-itis**). Ger., *entzündliche Gallenblasenwassersucht*. So-called inflammatory dropsy of the gall-bladder. [L, 50 (*a*, 14).]

HYDROCHYSIS (Lat.), n. f. Hid(hu^{6}d)-ro^{2}k(ro^{2}ch^2)'i^2(u^6)-si^{2}s. Gen., *-chys'eos* (*-roch'ysis*). From ὕδωρ, water, and χύσις, a pouring. See DROPSY.—**H. cutanea.** See ANASARCA.

HYDROCINCHONIDINE, n. Hid''ro-si^{2}n-ko^{2}n'i^{2}d-en. Lat., *hydrocinchonia*. An alkaloid, $C_{19}H_{24}N_2O$, found in commercial cinchonidine, slightly soluble in chloroform, in ether, and in water, and melting at 230° C. [B, 81 (*a*, 38).]

HYDROCINCHONINE, n. Hid-ro-si^{2}n^2'kon-en. Fr., *h.* Ger., *Hydrocinchonin*. A cinchona alkaloid, $C_{19}H_{24}N_2O$, or $C_{20}H_{26}N_2O$, obtainable artificially by the action of permanganate of potassium on cinchonine. It occurs in small, brilliant needles, fusible at 258° C., insoluble in cold water, partially soluble in hot water and in alcohol. [Hesse, "Ber. d. dtsch. chem. Gesellsch.," xv, p. 854; "Pharm. Jour. and Trans.," May 6, 1882; "Am. Jour. of Pharm.," July, 1882, p. 361; B, 5, 23; B, 46, 93 (*a*, 14, 39).]

HYDROCINNAMIC ACID, n. Hid-ro-si^{2}n-a^{2}m'i^{2}k. Fr., *acide hydrocinnamique*. Ger., *Hydrozimmtsäure*. It., *acido idrocinnamico*. Syn.: *homotoluic acid*, *cumoylic acid*, *β-phenylpropionic acid*. A crystalline acid, $C_6H_5.C_2H_4.CO.OH$, or $C_9H_{10}O_2$, isomeric with hydratropic acid, obtained by treating cinnamic acid with nascent hydrogen and in other ways. It has a goat-like smell, is easily soluble in alcohol, ether, or boiling water, slightly so in cold water, melts at 47½° C., and boils at 280° C. [B, 3, 4 (*a*, 38); B, 93 (*a*, 14).]

HYDROCINNAMIDE, n. Hid-ro-si^{2}n'a^{2}m-i^{2}d(id). Fr., *h.* Ger., *Hydrocinnamid*. Syn.: *Cinnamidenediamine*. A crystalline substance, $(C_6H_5.CH:CH.CH)_3N_2$, obtained by treating oil of cinnamon or cinnamic aldehyde with ammonia. [B, 3, 4 (*a*, 38).]

HYDROCINNAMYL, n. Hid-ro-si^{2}n'a^{2}m-i^{2}l. Cinnamyl hydride (cinnamic aldehyde), C_9H_8O. [B, 88, 93 (*a*, 14; *a*, 39).]

HYDROCIRSOCELE (Lat.), n. f. Hid(hu^{6}d)''ro(ro^3)-su^{6}rs-(ki^{2}rs)'''o(o^3)-se(ka)'le(la); in Eng., hi''dro-su^{6}rs'o-sel. Gen., *cel'es*. From ὕδωρ, water, and κιρσοκήλη, an enlargement of the spermatic vessels. Fr., *hydrocirsocèle*. Ger., *Wasserkrampfaderbruch*. Hydrocele associated with varicocele. [L, 41, 50 (*a*, 14).]

HYDROCITRIC ACID, n. Hid-ro-si^{2}t'ri^{2}k. Fr., *acide hydrocitrique*. A 2-atom addition compound of citric acid, $C_6H_{10}O_7$, obtained by the action of sodium on dry citric acid, fusible at 100° C., soluble in water, insoluble in alcohol. [B, 38 (*a*, 38); B, 93 (*a*, 14).]

HYDROCLEPSIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-kle^{2}p'si^{2}s. Gen., *-cleps'eos* (*-is*). From ὕδωρ, water, and κλέψις, theft. Fr., *hydroclepsie*. A gradual and almost imperceptible decrease of watery liquid. [L, 50 (*a*, 14).]

HYDROCOBALTICYANIC ACID, n. Hid''ro-ko-ba^{4}lt-i^2-si-a^{2}n'i^{2}k. Fr., *acide hydrocobaltocyanique*. Ger., *Kobaltcyanwasserstoffsäure*. An acid, $H_6Co_2(CN)_{12} + H_2O$, occurring in the form of colorless, deliquescent, acicular crystals. It is strongly acid in reaction and of decided acid characters, forming salts with iron and zinc and decomposing the carbonates with the production of metallic cobalticyanides. Its probably constitutional formula is

$$\left.\begin{matrix} H\ (C_3N_3) \\ H_2(C_3N_3) \end{matrix}\right\} Co - Co \left\{\begin{matrix} (C_3N_3)H \\ (C_3N_3)H_2 \end{matrix}\right. .$$ [B.]

HYDROCŒLIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-sel'(ko^2'e^{2}l)-i^2-a^3. From ὕδωρ, water, and κοιλία, the belly. See ASCITES.

HYDROCOHOLOLYTON (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-ko-(ko^2)-ho^{2}l-o^{2}l'i^{2}t(u^{6}t)-o^{2}n. From ὕδωρ, water, and *alcohol* (*q. v.*), and λυτός, soluble. Fr., *hydrochohololyte*. Soluble in water and in alcohol. [L, 50 (*a*, 14).]

HYDROCOLLIDINE, n. Hid-ro-ko^{2}l'i^{2}d-en. Fr., *h.* Ger., *Hydrocollidin*. A poisonous ptomaine, $C_8H_{13}N = C_8H_{11}N + H_2$, found by Gautier and Étard among the products of putrefaction of albumin. But, according to Nencki, the body which they discovered has the formula $C_8H_{11}N$, and is probably *isophenylethylamine*. [B; E. D. Ferguson, "N. Y. Med. Jour.," Aug. 4, 1888, p. 113.]

HYDROCOMENIC ACID, n. Hid-ro-kom-e^{2}n'i^{2}k. Fr., *acide hydrocoménique*. An acid, $C_6H_8O_6$, formed by the action of sodium amalgam on comenic acid dissolved in water. It is an amorphous, deliquiscent body, slightly soluble in alcohol. [B, 46, 93 (*a*, 14, 39).]

HYDROCONCHININE, n. Hid-ro-ko^{2}n^{2}k'i^{2}n-en. Ger., *Hydroconchinin*. An alkaloid obtained by Hesse from the mother liquor, from which quinidine sulphate (conchinine) has separated; probably identical with the hydroquinidine of Forst and Böbringer. ["Ber. d. dtsch. chem. Gesellsch.," xv, p. 1656, cited in "Drugg. Circ. and Chem. Gaz.," Dec., 1882, p. 181; "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]

HYDROCONION (Lat.), **HYDROCONIUM** (Lat.), n's n. Hid(hu^{6}d)-ro(ro^3)-kon(ko^{2}n)'i^2-o^{2}n, -u^{3}m(u^{4}m). From ὕδωρ, water, and κόνιος, dusty. Fr., *bain de pluie*. Ger., *Wasserstaubbad*, *Regenbad*. Of Gillet de Grammont, a shower bath. [L, 30, 50, 105, 135 (*a*, 14; *a*, 39).]—**Bergson's h.** A spraying apparatus consisting of an open glass vessel into which is plunged a tube open at both ends and terminating in a point at the upper end. At right angles to this tube is a horizontal tube also terminating in a point in such a way that the orifices touch each other. When a strong current of air is forced through this horizontal tube by means of a rubber bulb, a vacuum is created at the orifice of the perpendicular tube and the liquid rises in consequence. [Gottstein (A, 319 [*a*, 21]).]—**Wintrich's h.** An apparatus consisting of a bottle-shaped glass vessel. Through the cork passes a vertical tube which bends at right angles and runs along in a horizontal direction parallel to and one ctm. distant from another horizontal tube connected by a tube with a bulb and an air-chamber until, turning upward near the extremity, it terminates opposite the orifice of the upper tube. [Gottstein (A, 319 [*a*, 21]).]

HYDROCORIDINE, n. Hid-ro-ko^{2}r'i^{2}d-en. A substance, $C_{10}H_{17}N$ = coridine $(C_{10}H_{15}N) + H_2$. According to A. B. Griffiths, the ptomaine produced by the *Bacterium allii* (*q. v.* in Supplement) is probably h.; this ptomaine is a monacid base, forming white deliquescent masses composed of microscopic acicular crystals, soluble in hot water, in alcohol, and in ether. ["Comptes. rend. de l'acad. des sci.," cx, p. 416; "Ann. di chim. e di farmacol.," July, 1890, p. 34 (B).]

HYDROCORM, n. Hid'ro-ko^{2}rm. Lat., *hydrocormus* (from ὕδωρ, water, and κορμός, the trunk of a tree). Fr., *hydrocorme*. Ger., *Schwimmhalm*. A stem or stalk that is horizontal and floats on the water. [L, 50, 107.]

HYDROCOTARNINE, n. Hid-ro-ko-ta^{3}rn'en. Lat., *hydrocotarnina*. Ger., *H.* A crystalline alkaloid, $C_{12}H_{15}NO_3 + \frac{1}{2}H_2O$, obtained from opium. It is readily soluble in alcohol, in ether, and in chloroform, melts at 50° C., and volatilizes at 100° C. [B, 2, 5, 270 (*a*, 38); B, 46 (*a*, 39); "Proc. of the Am. Pharm. Assoc.," xxi, xxiv (*a*, 14).] Cf. COTARNINE.

HYDROCOTOIN, n. Hid-ro-ko'to-i^{2}n. A substance, $C_{16}H_{14}O_4$, obtained from coto-bark; occurring as large, tasteless, light-yellow crystalline prisms, soluble in ether, in chloroform, in acetone, in warm nitric acid, and in dilute solution of caustic soda, and melting at 98° C. [B, 81, 270 (*a*, 38).]

HYDROCOTYLE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-ko^{2}t'i^{2}l(u^{6}l)-e(a). Gen., *-cot'yles*. From ὕδωρ, water, and κοτύλη, a cup. Fr., *h.* Ger., *Wassernabel*. Pennywort; a genus of the *Umbelliferæ*. The *Hydrocotyleæ* (Fr., *hydrocotylées*) are: Of Reichenbach, a section of the *Bolaceæ*; of Dumortier, a tribe of the *Didiscospermæ*; of De Candolle, a tribe of the *Orthospermæ*; of Bentham and Hooker, a tribe of the *Umbelliferæ*. The *Hydrocotylidæ* of Lindley, the *Hydrocotylinæ* of Sprengel, and the *Hydrocotylineæ* of Koch are the same. [B, 34, 38, 42, 170, 173, 180 (*a*, 24).]—**Herba hydrocotyles.** The herb of *H. asiatica*. [B, 95.]—**H. americana.** Sp., *sombrerillo de agua*, *yedra* (*ó hiedra*) *terrestre*. A small spe-

cies growing in moist places from Canada to South Carolina. [B, 34 (α, 24).]—**H. asiatica.** Ar., *arlániyá-e-hindi.* Sanscr., *bráhámi, manduka parane.* Mah., *brahmi.* Hind., *bráhami, brahama-manduki.* Beng., *thola-kuri, thul-kuri.* Bom., *bráhami, brahmi.* Duk., *vallári-kápatta.* Guz., *khara bráhami, khi brahami.* Tamil, *vularei.* Malay, *codagam.* Tel., *babassa.* Fr., *h. d'Asie, h.* [Fr. Cod.]. Ger., *asiatischer Wassernabel.* It., *idrocotile asiatica.* Sp., *hidrocótila* [Mex. Ph.]. Asiatic water pennywort, thick-leaved pennywort; a species found in moist places in Africa and the East Indies. The leaves are toasted and given in infusion in the bowel complaints of children. They are also applied externally in bruises, etc. In Java they are considered diuretic, and in Malabar they are used in leprosy. The plant is valuable as an internal and external remedy in cutaneous diseases. The legume is eaten, and has been used in elephantiasis Græcorum and in syphilitic ulcers and scrofula. [B, 5, 172, 173, 180 (α, 24).]—**H. bonariensis.** Ger., *Bonares'cher Wassernabel.* A species found in Peru and Brazil, of which there are two varieties—*multiflora* and *tribotrys.* Both are employed as vulneraries, and their root is used in kidney and liver diseases. [B, 180 (α, 24).]—**H. bupleurifolia.** A species growing at the Cape of Good Hope. It has the medicinal properties of the other species. [B, 121 (α, 35).]—**H. centella.** A South African species. [B, 214 (α, 35).]—**H. d'Asie** (Fr.). See *H. asiatica.*—**H. en ombelle** (Fr.). See *H. umbellata.*—**H. gummifera.** The *Azorella cæspitosa* and *Azorella glebaria.* [α, 24.]—**H. montana.** A species growing in South Africa, where it is used medicinally. [B, 121. 309 (α, 35).]—**H. multiflora.** See *H. bonariensis.*—**H. nummularioides.** A species growing in the Mascarene Islands, identified by some authors with the *H. asiatica.* [J. C. Baker; B, 309 (α, 35).]—**H. plantaginea.** A species growing at the Cape of Good Hope, erroneously identified with the *H. asiatica.* [B, 214, 309, 311 (α, 35).]—**H. rotundifolia.** A species common in India and sometimes substituted in medicine for the *H. asiatica,* from which it may be distinguished by its much smaller fruits. [B, 18 (α, 35).]—**H. schkuhriana.** See *H. vulgaris.*—**H. tribotrys.** See *H. bonariensis.*—**H. umbellata.** Fr., *h. en ombelle.* Ger., *doldiger Wassernabel.* Sp., *ombligo de Vénus* [Mex. Ph.]. A species found in Brazil, Peru, the West Indies, and also North America, in bogs and ponds. The juice is emetic, and the leaves are used in diseases of the liver and spleen. The plant is supposed to have the properties of *H. asiatica.* [B, 34, 173, 180 (α, 24); J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]—**H. vulgaris.** Fr., *h. vulgaire, écuelle d'eau, gobeleau vulgaire, gobelet d'eau, nombril de Vénus aquatique.* Ger., *gemeiner Wassernabel.* Flowk-wort, sheep's-bane, penny-rot; a species found in Europe, where, under the name *herba cotyledonis aquaticæ,* it was once used in liver and bowel complaints and as a vulnerary. It is erroneously considered a cause of rot in sheep. [B, 19, 64, 173, 180. 275 (α, 24).]—**Radix hydrocotyles.** The root of *H. asiatica.* [A, 319 (α, 21).]

HYDROCOUMARIC ACID, n. Hid-ro-ku-ma^{2}r'i^{2}k. Fr., *acide hydrocoumarique.* Ger., *Hydrocumarsäure.* 1. Melilotic acid; a monobasic, crystalline acid. $C_9H_{10}O_3 = OH.C_6H_4.CH_2.CH_2\text{-}COOH$, found in *Melilotus officinalis,* and also obtained by treating coumarin or coumaric acid with sodium amalgam. It forms long, colorless needles or prisms, melting at 83° C., and soluble in hot water, ether, or alcohol. [B. 3, 4, 270 (α, 38).] 2. An anhydrous crystalline acid, apparently not the same as melilotic acid, but having a molecular formula, $C_{18}H_{18}O_6$, double that of the latter, or $C_{36}H_{18}O_{12}$, and acting as a dibasic acid. [B, 2.]

HYDROCOUMARIN, n. Hid-ro-ku'ma^{2}r-i^{2}n. Fr., *hydrocoumarine.* A body, $C_{18}H_{16}O_4$, melting at 222° C., obtained by melting hydrocoumaric acid, when a portion of the acid sublimes. ["Proc. of the Am. Pharm. Assoc.," xix (α, 14); B, 46, 93 (α, 39).]

HYDROCRANIA (Lat.), **HYDROCRANIUM** (Lat.), n's f. and n. Hid(hu^{6}d)-ro(ro^3)-kran(kra^{3}n)'i^2-a^3, -u^{3}m(u^{4}m). From ὕδωρ, water, and κρανίον, the cranium. See HYDROCEPHALUS.

HYDROCRITHE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-kri(kre)'the-(tha). Gen., *-crith'es.* From ὕδωρ, water, and κριθή, barley. Fr., *h.* Ger., *Gerstenwasser.* Barley-water. [L, 50 (α, 14).]

HYDROCROCONIC ACID, n. Hid-ro-kro-ko^{2}n'i^{2}k. Fr., *acide hydrocroconique.* Ger., *Hydrokrokonsäure.* A dibasic crystalline acid, $C_5H_4O_5$. derived from croconic acid. [B, 3.]

HYDROCUMARIC ACID, n. Hid-ro-ku^2-ma^{2}r'i^{2}k. Ger., *Hydrocumarsäure.* See HYDROCOUMARIC ACID.

HYDROCUPROCYANIC ACID, n. Hid-ro-ku^2-pro-si-a^{2}n'-i^{2}k. Fr., *acide hydrocuprocyanique.* Ger., *Cuprocyanwasserstoffsäure.* A hydrogen acid, $H_2Cu_2(C_4N_4)$, of unstable character. Its salts are the cuprocyanides. [B.]

HYDROCYANALDINE, n. Hid-ro-si-a^{2}n-a^{2}l'den. A substance, $C_9H_{12}N_4$, formed by the action of hydrocyanic acid on ammoniac aldehyde acidulated with hydrochloric acid. It crystallizes in colorless needles, freely soluble in boiling water and in alcohol, slightly soluble in cold water and in ether. Its solutions are neutral and without odor. [B, 46, 93 (α, 39).]

HYDROCYANAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-si(ku^6)'an-(a^{3}n)-a^{2}s(a^{3}s). Gen., *-at'is.* See HYDROCYANATE and CYANIDE.—**H. morphicus.** Morphine cyanide. [α, 38.]

HYDROCYANATE, n. Hid-ro-si'a^{2}n-at. Lat., *hydrocyanas.* Fr., *h., cyanhydrate.* A salt of hydrocyanic acid. [B, 38, 93, (α, 14).]

HYDROCYANATED, adj. Hid-ro-si'a^{2}n-at-e^{2}d. Lat., *hydrocyanatus.* Combined with hydrocyanic acid; forming a cyanide. [α, 38.]

HYDROCYANIC ACID, n. Hid-ro-si-a^{2}n'i^{2}k. Lat., *acidum hydrocyanicum* (seu *cyanhydricum,* seu *hydrocyanatum,* seu *borussicum*). Fr., *acide cyanhydrique* (ou *hydrocyanique,* ou *prussique*). Ger., *Cyanwasserstoffsäure, Blausäure, Hydrocyansäure.* Prussic acid; an acid consisting of a direct compound of hydrogen with true cyanogen, $H-C\equiv N$. It is produced, along with sugar and oil of bitter almonds, by the fermentation of amygdalin induced by the action of emulsion, which is found with the former in almonds, laurel-leaves, peach-stones, etc. Artificially, it is prepared in various ways from the cyanides and ferrocyanides. It is a colorless, very volatile fluid, of peculiar almond odor, solidifying at —15° and boiling at 25·5° C. It is extremely poisonous, whether taken by the mouth or inhaled in the form of vapor, exerting a direct toxic action on the red corpuscles of the blood. The h. a. of the U. S. Ph. of 1880, *acidum hydrocyanicum dilutum,* is a solution of the strength of 2 per cent. in dilute alcohol. Under certain circumstances the nitrogen in h. a. becomes a pentad, and thus admits of the formation of addition compounds, *hydrochlorides, hydrobromides,* and *hydriodides,* of the formula $H-C\equiv N = \left\{ {H \atop Cl} \right.$, etc. [B.]—**Anhydrous h. a.** Ger., *wasserfreie Blausäure.* Aqueous h. a. deprived of its water. [B.]—**Aqueous h. a.** Ger., *wässerige Blausäure.* H. a. obtained by distillation and containing a certain amount of water, which is removed by subsequent fractional distillation and desiccation. It is very unstable. [B.]—**Dilute h. a., Diluted h. a.** Lat., *acidum hydrocyanicum dilutum* [U. S. Ph., Br. Ph.], *acidum hydrocyanicum* [Gr. Ph., Swiss Ph.], *acidum hydrocyanicum medicinale* [Russ. Ph.], *acidum cyanhydricum* [Belg. Ph.], *acidum hydrocyanatum* [Pruss. Ph. (6th ed.), Norw. Ph.]. Fr., *acide cyanhydrique dissous au 100ᵉ* [Fr. Cod.]. Sp., *ácido cianhidrico* [Sp. Ph.]. A solution of h. a. prepared by treating potassium ferrocyanide with sulphuric acid and water and taking up the product in diluted alcohol [U. S. Ph.] or in water, and in other ways. The U. S., Br., Pruss., Russ., and Norw. preparations contain 2 per cent. of h. a., the Belg. preparation contains 2·5 per cent., the Fr. preparation 1 per cent., and the Sp. preparation 10·5 per cent. [B, 95 (α, 38).]—**Inhalation of h. a.** [Br. Ph.]. See *Vapor* ACIDI HYDROCYANICI.—**Scheele's h. a.** A solution of h. a. containing 5 per cent. of the anhydrous acid. [B, 5 (α, 38).]—**Syrup of h. a.** Lat., *syrupus acidi hydrocyanici.* Fr., *sirop d'acide hydrocyanique.* A preparation in the French, Belgian, and Italian formularies containing 1 part of dilute h. a. in from 125 to 200 parts of syrup. [B.]—**Vapor of h. a.** See *Vapor* ACIDI HYDROCYANICI.

HYDROCYANIZED, adj. Hid-ro-si'a^{2}n-izd. See HYDROCYANATED.

HYDROCYANO-FERRAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-si(ku^6)-a^{2}n(a^{3}n)-o(o^3)-fe^{2}r'ra^{2}s(ra^{3}s). Gen., *-rat'is.* See HYDROFERROCYANIDE.—**H. quinicus.** See *Hydrocyanoferrate de* QUININE.

HYDROCYANOFERRIC, adj. Hid-ro-si-a^{2}n-o-fe^{2}r'i^{2}k. Lat., *hydrocyanoferricus.* Fr., *hydrocyanoferrique.* See HYDROFERROCYANIC.

HYDROCYANOFERROSUS (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-si(ku^6)-a^{2}n(a^{3}n)-o(o^3)-fe^{2}r-ros'u^{3}s(u^{4}s). Fr., *hydrocyanoferreux.* See HYDROFERROCYANOUS.

HYDROCYANOGEN, n. Hid-ro-si-a^{2}n'o-je^{2}n. Hydrocyanic acid. [B, 7.]

HYDROCYANOROSANILINE, n. Hid-ro-si-a^{2}n-o-roz-a^{2}n'-i^{2}l-en. A white, crystalline substance. $C_{21}H_{20}N_4$, formed by the action of potassium cyanide on the salts of rosaniline. [B, 46, 93 (α, 39).]

HYDROCYANSÄURE (Ger.), n. Hu^{6}d-ro-tsu^6-a^{3}n'zoir-e^2. See HYDROCYANIC ACID.

HYDROCYST, n. Hid'ro-si^{2}st. Lat., *hydrocystis* (from ὕδωρ, water, and κύστις, a cyst). Fr., *hydrocyste.* Ger., *Wasserblase.* 1. A cyst containing water. 2. In the pl., *h's.* processes attached to the cœnosarc of the *Physophoridæ,* termed feelers. [B, 28 (α, 27).]

HYDROCYSTIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-si^{2}st(ku^{6}st)'i^{2}s. Gen., *-cyst'eos (-is).* Fr., *hydrocyste.* Ger., *Wasserblase.* 1. See HYDROCYST. 2. See HYDATID.

HYDRODEOPYRA (Lat.), **HYDRODEOPYRETOS** (Lat.), n's f. and m. Hid(hu^{6}d)-rod-e^2-o^{2}p'i^{2}r(u^{6}r)-a^3, -o^{2}p-i^{2}r(u^{6}r)'e^{2}t-o^{2}s. From ὑδρώδης, watery, and πῦρ, or πυρετός, fever. Fr., *hydrodéopyre.* A fever attended with watery effusion or discharges. [L, 50 (α, 14).]

HYDRODERMA (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-du^{6}rm(de^{2}rm)'-a^3. Gen., *-derm'atos (-atis).* From ὕδωρ, water, and δέρμα, the skin. Fr., *hydroderme.* See ANASARCA.

HYDRODES (Lat.), adj. Hid(hu^{6}d)-rod'ez(as). Gr., ὑδρώδης (from ὕδωρ, water, and εἶδος, resemblance). Watery. [A, 311.]

HYDRODIARRHŒA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-di(di^2)-a^{2}r(a^{3}r)-re'(ro^2'e^2)-a^3. From ὕδωρ, water, and διάῤῥοια, diarrhœa. Fr., *hydrodiarrhée.* Ger., *wässeriger Durchfall.* Watery diarrhœa. [L, 50 (α, 14).]

HYDRODIFFUSION (Ger.), n. Hu^{6}d-ro-di^{2}f-fu-ze-on'. The physical mingling of two miscible fluids having no chemical affinity, occurring without difference of pressure and sometimes in opposition to gravity. [Munk (A, 319 [α, 21]).]

HYDRODIURÈSE (Fr.), n. E-dro-de-u^6-re^{2}z. From ὕδωρ, water, and διουρεῖν, to pass urine. A copious secretion of limpid urine. [Robert, "Union méd.," Sept. 27, 1885, p. 525.]

HYDRODYNAMIC, adj. Hid-ro-di^{2}n-a^{2}m'i^{2}k. From ὕδωρ, water, and δύναμις, power. Pertaining to hydrodynamics. [L, 107.]

HYDRODYNAMICS, n. sing. Hid-ro-di^{2}n-a^{2}m'i^{2}ks. That branch of mechanics which concerns fluids (especially liquids) in a state of motion. [B.]

HYDRŒCIUM (Lat.), n. n. Hid(hu^{6}d)-re'(ro^2'e^2)-si^2(ki^2)-u^{3}m-(u^{4}m). From ὕδωρ, water, and οἶκος, a house. The chamber into which the cœnosarc in many of the *Calycophoridæ* can be retracted. [B, 28 (α, 27).]

HYDRŒDEMA (Lat.), n. n. Hid(hu^{6}d)-re^{2}d(ro^2-e^{2}d)-em(am)'a^3. Gen., *-em'atos (-atis).* From ὕδωρ, water, and οἴδημα, a swelling. Fr., *hydrœdème.* Ger., *wässeriges Oedem.* See ŒDEMA.

HYDROELATERIN, n. Hid-ro-e2l-a2t'e2r-i2n. An amorphous substance insoluble in water, obtained from *Ecballium elaterium*. [B, 10.]

HYDRO-ELECTRIC, adj. Hid-ro-e2l-e2k'tri2k. Of or pertaining to electricity evolved by the action of water or steam. [B.]

HYDRO-ELECTRICITY, n. Hid-ro-e2l-e2k-tri2s'i2t-i2. From ὕδωρ, water, and ἤλεκτρον, amber. Electricity generated by means of water or steam.

HYDRO-ELECTRIZATION, n. Hid-ro-e2l-e2k-tri2-za'shu3n. From ὕδωρ, water, and ἤλεκτρον, amber. Of Beard and Rockwell, electrization in which water is employed as an electrode. [B, 26.]

HYDROÉMIE (Fr.), n. E-dro-a-me. See HYDRÆMIA.

HYDRO-ENCEPHALION (Lat.), n. n. Hid(hu6d)-ro(ro3)-e2n-(e2n2)-se2f(ke2f)-a2l(a3l)'i2-o2n. From ὕδωρ, water, and ἐγκέφαλος, the brain. See HYDROCEPHALUS.

HYDRO-ENCÉPHALOCELE (Fr.), n. E-dro-a3n2-sa-fa3-lo-se2l. See HYDRENCEPHALOCELE.

HYDRO-ENCEPHALUS (Lat.), n. m. Hid(hu6d)-ro(ro3)-e2n-(e2n2)-se2f(ke2f)'a2l(a3l)-u3s(u4s). From ὕδωρ, water, and ἐγκέφαλος, the brain. See HYDROCEPHALUS.

HYDRO-ENTEROCELE (Lat.), n. f. Hid(hu6d)-ro(ro3)-e2n-te2r-o(o3)-se(ka)'le(la); in Eng., hi-dro-e2n'te2r-o-sel. Gen., *-cel'es* (*-æ*). See HYDRENTEROCELE.

HYDRO-ENTERO-EPIPLOCELE (Lat.), n. f. Hid(hu6d)-ro-(ro3)-e2n-te2r-o(o3)-e2p-i2-plo(plo2)-se(ka)'le(la); in Eng., hi-dro-e2n-te2r-o-e2p-i2p'lo-sel. Gen., *-cel'es* (*-æ*). See HYDRENTEREPIPLOCELE.

HYDRO-ENTERO-EPIPLOMPHALUM (Lat.), n. n. Hid-(hu6d)-ro(ro3)-e2n-te2r-o(o3)-e2p-i2-plo2m'fa2l(fa3l)-u3m(u4m). See HYDRENTEREPIPLOMPHALUM.

HYDRO-ENTEROMPHALOCELE (Lat.), **HYDRO-ENTEROMPHALUM** (Lat.), **HYDRO-ENTEROMPHALUS** (Lat.), n's f., n., and m. Hid(hu6d)-ro(ro3)-e2n-te2r-o2m-fa2l(fa3l)-o-(o3)-se(ka)'le(la); in Eng., hi-dro-e2n-te2r-o2m-fa2l'o-sel; hid(hu6d)-ro(ro3)-e2n-te2r-o2m'fa2l(fa3l)-u3m(u4m), -u3s(u4s). See HYDRENTEROMPHALOCELE.

HYDRO-ENTÉRORRHÉE (Fr.), n. E-dro-a3n2-ta-ror-ra. Watery diarrhœa. [L, 41 (*a*, 14).]

HYDRO-EPIGASTRIUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-e2p-i2-ga2st(ga3st)'ri2-u3m(u4m). See HYDREPIGASTRIUM.

HYDRO-EPIPLOCELE (Lat.), n. f. Hid(hu6d)-ro(ro3)-e2p-i2-plo(plo3)-se(ka)'le(la); in Eng., hi-dro-e2p-i2p'lo-sel. Gen., *-cel'es*. See HYDREPIPLOCELE.

HYDRO-EPIPLOMPHALOCELE (Lat.), n. f. Hid(hu6d)-ro-(ro3)-e2p-i2-plo2m-fa2l(fa3l)-o(o3)-se(ka)'le(la); in Eng., hi-dro-e2p-i2-plo2m'fa2l-o-sel. Gen., *-cel'es*. See HYDREPIPLOMPHALOCELE.

HYDRO-EPIPLOMPHALUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-e2p-i2-plo2m'fa2l(fa3l)-u3m(u4m). See HYDREPIPLOMPHALUS.

HYDRO-EPIPLOON (Lat.), n. n. Hid(hu6d)-ro(ro3)-e2p-i2p'lo-(lo2)-o2n. See HYDREPIPLOON.

HYDROETHYLCROTONIC ACID, n. Hid-ro-e2th-i2l-kro-to2n'i2k. Fr., *acide hydro-éthyl-crotonique*. A fatty acid, $C_6H_{12}O_2$, isomeric with dieth-acetic acid and formed, when bromhydroethylcrotonic acid is treated with sodium amalgam and water. It is a colorless, oily liquid with a disagreeable odor and high specific gravity, soluble in water. It boils at 194° to 195° C. and is not solidified at —15° C. This acid is probably identical with diethyllactic acid. [B, 3 (*a*, 38); B, 46 (*a*, 39).]

HYDROETRON (Lat.), n. n. Hid(hu6d)-ro(ro3)-e(a)'tro2n. From ὕδωρ, water, and ἦτρον, the belly. See ASCITES.

HYDRO-EXOSTOSIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-e2x-o2s-to'si2s. Gen., *-os'eos* (*-os'is*). See HYDREXOSTOSIS.

HYDROFÈRE (Fr.), n. E-dro-fe2r. From ὕδωρ, water, and *ferre*, to bear. Of Mathieu de la Drôme, an apparatus designed for administering baths with an extremely small quantity of liquid. [L, 41 (*a*, 14).]

HYDROFERRICYANHYDRIC ACID, n. Hid"ro-fe2r-i2-si-a2n-hid'ri2k. See HYDROFERRICYANIC ACID.

HYDROFERRICYANIC ACID, n. Hid-ro-fe2r-i2-si-a2n'i2k. Fr., *acide hydroferricyanique* (ou *hydroferricyanhydrique*). Ger., *Ferridcyanwasserstoffsäure*. A hydrogen acid, $H_6Fe_2(C_3N_3)_4$, occurring under the form of brownish acicular crystals, readily soluble in water. It is of decided acid character and forms a series of salts called the ferricyanides. It is actively poisonous. [B.]

HYDROFERROCYANAS (Lat.), n. m. Hid(hu6d)-ro(ro3)-fe2r-ro(ro3)-si(ku6)'a2n(a3n)-a2s(a3s). Gen., *-atis*. See HYDROFERROCYANIDE.—**H. quinicus.** Quinine hydroferrocyanide. [B.]

HYDROFERROCYANATE, n. Hid-ro-fe2r-o-si'a2n-at. Fr., *h.* See HYDROFERROCYANIDE.

HYDROFERROCYANIC ACID, n. Hid-ro-fe2r-o-si-a2n'i2k. Fr., *acide hydrocyanoferrique* (ou *hydroferrocyanique*). Ger., *Ferrocyanwasserstoffsaüre*. A hydrogen acid, $H_4FeC_6N_6 = Fe\langle^{(C_2H_3):H_2}_{(C_2H_3):H_2}$, occurring as colorless crystals, soluble in water and in alcohol. It is produced by the action of hydrochloric acid on potassium ferrocyanide. It has marked acid properties and forms a series of salts called ferrocyanides. [B.]

HYDROFERROCYANIDE, n. Hid-ro-fe2r-o-si'a2n-i2d(id). Also written *hydroferrocyanate* and *ferrocyanhydrate*. Fr., *hydroferrocyanure*. Ger., *Hydroferrocyanür*. A salt of hydroferrocyanic acid; more especially applied to addition compounds of this acid with basic substances like alkaloids. [B.] See QUININE *h.*

HYDROFLUATE (Fr.), n. E-dro-flu6-a3t. A salt of hydrofluoric acid. [B, 38, 93 (*a*, 14).]

HYDROFLUORIC ACID, n. Hid-ro-flu2-o2r'i2k. Lat., *acidum fluoris*. Fr., *acide fluorhydrique*. Ger., *Hydrofluorsäure*, *Fluorwasserstoffsäure*. It., *acido fluoridrico*. A compound of hydrogen and fluorine, HF. The anhydrous acid is obtained with great difficulty, and is a volatile, colorless liquid, emitting irritant, poisonous vapors and causing great iritation on coming in contact with the skin. Its sp. gr. is ·9879. It boils at 19·4° C. The acid is readily soluble in water. It has the power of corroding glass and porcelain from its affinity for the silicon which these substances contain, and it is employed for etching on glass. It has been used as an antiseptic. [B, 3; "Nouv. rem."; "N. Y. Med. Jour.," Sept. 19, 1885, p. 336.]

HYDROFLUOSILICATE, n. Hid"ro-flu2-o-si2l'i2-kat. A salt of hydrofluosilicic acid.

HYDROFLUOSILICIC ACID, n. Hid"ro-flu2-o-si2l-i2s'i2k. Ger., *Kieselflussäure*, *Kieselfluorwasserstoffsäure*. Syn.: *silicofluoric acid*. A dibasic acid, H_2SiF_6, formed by dissolving silicon tetrafluoride in water or by treating silica with hydrofluoric acid. Its concentrated aqueous solution is a fuming, colorless, very acid liquid. [B, 3.]

HYDROGALA (Lat.), n. f. Hid(hu6d)-ro2g'a2l(a3l)-a3. Gen., *-act'os* (*-act'is*). From ὕδωρ, water, and γάλα, milk. A preparation consisting of 250 parts of cow's milk and 750 of spring-water, sweetened with syrup or syrup of currants. It was used by the ancients in fevers and diseases of the throat and stomach. [B, 38 (*a*, 38); L, 80, 108.]

HYDROGALVANIC, adj. Hid-ro-ga2l-va2n'i2k. Of or pertaining to galvanism generated by the action of fluids. [B, 116.]

HYDROGARDENIC ACID, n. Hid-ro-ga3r-de2n'i2k. A compound, $C_{14}H_{14}O_6$, or $C_{14}H_{14}O_2$, obtained by treating gardenic acid with aqueous sulphuric acid. It crystallizes in brilliant needles, fusing at 190° C., soluble in benzene, acetic acid, and boiling alcohol. [B, 46 (*a*, 39); "Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

HYDROGARON (Lat.), **HYDROGARUM** (Lat.), n's n. Hid-(hu6d)-rog'a2r(a3r)-o2n, -u3m(u4m). Gr., ὑδρόγαρον (from ὕδωρ, water, and γάρος, a sauce made of brine). Of Aetius and Gorræus, a mixture of garum and water. [L, 50 (*a*, 14).]

HYDROGASTER (Lat.), n. f. Hid(hu6d)-ro(ro3)-ga2st(ga3st)'u6r(ar). Gen., *-gast'eros* (*-is*), *-gast'ri*. Gr., ὑδρογάστηρ (from ὕδωρ, water, and γαστήρ, the belly). Ger., *Bauchwassersucht*. Ascites. [L, 50 (*a*, 14).]

HYDROGASTOR (Lat.), adj. Hid(hu6d)-ro(ro3)-ga2st(ga3st)'-o2r(or). Gen., *-gastor'os* (*-is*). Gr., ὑδρογάστωρ. Dropsical; as a n., a person affected with ascites. [L, 50 (*a*, 14).]

HYDROGASTRIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-ga2st(ga3st)'-ri2-a3. From ὕδωρ, water, and γαστήρ, the stomach. Fr., *hydrogastrie*. A disturbance of the stomach by fluid due to constriction of the pyloric and œsophageal orifices, described by Rivière and Rhodius. [*a*, 40.]

HYDROGASTRORRHÉE [Piorry] (Fr.), n. E-dro-ga3s-tror-ra. From ὕδωρ, water, γαστήρ, the stomach, and ῥοία, a flowing. A copious watery effusion into the cavity of the stomach. [L, 82.]

HYDROGEN, n. Hid'ro-je2n. Lat., *hydrogenium* (from ὕδωρ, water, and γεννᾶν, to engender). Fr., *hydrogène*. Ger., *Wasserstoff*. It., *idrogeno*. Sp., *hidrógeno*. A non-metallic element discovered by Cavendish in 1766. It is one of the components of water and of many other inorganic substances, and is a nearly constant constituent of organic compounds. It is a colorless, tasteless, odorless, inflammable gas, and is the lightest substance known, its sp. gr., in relation to that of air, being as 1 to 14·435, and to water as 1 to 11, 160. Its density is, accordingly, selected as the unity of density for gases. Under a very low temperature (—140° C.), combined with the application of very great pressure (650 atmospheres = nearly 5 tons to the square inch), it is liquefied, forming a bluish, opaque liquid. By some, h. is considered a metal. In composition, it forms the essential element in the class of compounds called acids, which are hence denominated salts of h., and, united with carbon, it forms the important class of organic compounds called hydrocarbons. In compounds it never replaces more than one atom of another element, and hence its combining power is regarded as a unit, to which that of other elements is referred, and their quantivalence is measured by the number of atoms of h. which they can replace. Its atomic weight is assumed as the unit of atomic weights in general, and is hence denoted by 1. Its symbol is H. [B, 3.]—**Antimoneted h., Antimoniureted h.** See *H. antimonide*.—**Arseneted h.** See *H. arsenide*.—**Azotureted h.** Ammonia. [B, 98.]—**Bicarbureted h.** Of Faraday, benzene. [L, 86.]—**Carbureted h.** See ETHYLENE and METHANE.—**Ethereal solution of h. peroxide.** A preparation made by adding impure h. peroxide to a mixture of 1 part of sulphuric acid and 24 parts of water at a low temperature, and then agitating a number of times with ether. [B, 81 (*a*, 38).]—**Gaseous h. phosphide.** See *Phosphureted h.*—**Heavy carbureted h.** See ETHYLENE.—**H. acetate.** Acetic acid. For other salts of hydrogen not here described, see the corresponding acid in the major list; and for compound salts of h. and another base (the so-called acid salts, *e. g.*, h. disodium orthophosphate), see under the name of the other base. [*a*, 38.]—**H. amidide.** Ammonia. [Kane (B, 98).]—**H., ammonium, and sodium phosphate.** See SODIUM, *ammonium and h. phosphate*.—**H. amylate.** See AMYL ALCOHOL.—**H. antimonide.** Lat., *hydrogenium antimoniatum*, *stibonia*. Syn.: *stibamine*, *stibien*. Antimoniureted h.; a colorless, odorless, combustible gas, SbH_3, produced by the action of nascent h. on reducible compounds of antimony, but not yet obtained pure. [B, 9 (*a*, 38).]—**H. arsenide.** Lat., *arsenia*. Fr., *hydrogène arsénié*. Syn.: *arsenamine*, *arsine*. Arseniureted or arseneted h.; a compound of arsenic and h. Two varieties are known—a solid, As_2H; and a colorless, very poisonous gas, AsH_3, having a garlic-like odor and a neutral reaction, burn-

ing with a greenish flame, and soluble in water free from air. [B, 9 (α, 38).]—**H. binoxide.** See *H. peroxide.*—**H. bismuthate.** See BISMUTHIC *acid.*—**H. bromide.** Fr., *bromure d'hydrogène.* See HYDROBROMIC *acid.*—**H. butylate.** See BUTYL *alcohol.*—**H. caproylate.** See HEXYL *alcohol.*—**H. caprylate.** 1. See OCTYL *alcohol.* 2. See CAPRYLIC *acid.*—**H. cerylate.** See CERYL *alcohol.*—**H. cetylate.** See CETYL *alcohol.*—**H. chloride.** Fr., *chlorure d'hydrogène.* See HYDROCHLORIC *acid.*—**H. chloroamide** [Kane]. A name for ammonium chloride, on the supposition that its formula is $H.NH_2,HCl$. [B, 98.]—**H. cyanide.** Fr., *cyanure d'hydrogène.* See HYDROCYANIC *acid.*—**H. deutoxide.** See *H. peroxide.*—**H. deutylate.** See ETHYL ALCOHOL.—**H. dioxide.** Fr., *dioxyde d'hydrogène.* Ger., *Wasserstoffdioxyd.* See *H. peroxide.*—**H. disulphide.** See *H. persulphide.*—**H. ethylate.** See ETHYL ALCOHOL.—**H. fluoride.** See HYDROFLUORIC ACID.—**H. heptylate.** See HEPTYL *alcohol.*—**H. hexylate.** See HEXYL *alcohol.*—**H. iodide.** Fr., *iodure d'hydrogène.* Ger., *Jodwasserstoff.* See HYDRIODIC ACID.—**H. methylate.** See METHYL *alcohol.*—**H. monosulphide.** Fr., *monosulfure d'hydrogène.* See *Sulphureted h.*—**H. monoxide.** Fr., *monoxyde d'hydrogène.* Water. [α, 38.]—**H. nitrate.** See NITRIC *acid.*—**H. octylate.** See OCTYL *alcohol.*—**H. œnanthylate.** See HEPTYL *alcohol.*—**H. oxide.** Lat., *oxidum hydrogenicum.* Fr., *oxyde d'hydrogène.* Ger., *Wasserstoffoxyd.* See *H. monoxide* and *H. peroxide.*—**H. pentylate.** See AMYL ALCOHOL.—**H. peroxide.** Lat., *hydrogenium peroxydatum* (seu *hyperoxydatum*) *solutum, hydrogenii peroxidum.* Fr., *peroxyde d'hydrogène.* Ger., *Wasserstoffperoxyd.* H. dioxide, oxygenized water; a colorless, oily liquid, H_2O_2, devoid of odor, and having an astringent and bitter taste. It is soluble in water and in ether, the latter solution being called ozonic ether. H. peroxide is readily decomposed, and, owing to the facility with which it gives up one of its atoms of oxygen, it acts as a strong oxidizing, bleaching, and disinfectant agent. It has been used as an antiseptic, particularly in nasal and aural surgery. [B, 3, 5.]—**H. persulphide.** Fr., *persulfure d'hydrogène.* Ger., *Wasserstoffpersulfür.* A yellow, oily liquid, H_2S_2, of disagreeable, acrid taste, and giving off irritant vapors of a pungent, repulsive odor, resembling that of sulphureted h. According to Alberto, it is the most powerfully antiseptic of the sulphur compounds. [B, 3; "Sem. méd.," Aug. 3, 1889, p. 263 (α, 18).]—**H. phosphide.** Fr., *phosphure d'hydrogène.* Ger., *Phosphorwasserstoff.* 1. Gaseous h. phosphide, or phosphureted h. 2. Liquid h. phosphide. 3. Solid h. phosphide. [B.]—**H. propylate.** See PROPYL *alcohol.*—**H. protylate.** See METHYL ALCOHOL.—**H. selenide.** See *Seleniureted h.*—**H. suboxide.** Water. [α, 38.]—**H. sulphate.** Sulphuric acid. [B.]—**H. sulphide.** Fr., *sulfure d'hydrogène, acide hydrothionique, gaz hépatique.* Ger., *Wasserstoffsulfid.* 1. H. monosulphide, or sulphureted h. 2. H. persulphide. [B.]—**H. telluride.** Telluretted h. [B.]—**H. tetrylate.** See BUTYL *alcohol.* **H. tritylate.** See PROPYL *alcohol.*—**Light carbureted h.** Marsh gas, or methane, CH_4, so called in opposition to the denser olefiant gas, or heavy carbureted h. [B.]—**Liquid h. phosphide** (or **phosphureted h.**). An unstable substance, P_2H_4, forming a colorless, highly refracting liquid, which burns with a bright flame as soon as it is exposed to the air. [B, 3.]—**Occluded h.** Lat., *hydrogenium.* H. absorbed by palladium or other metals. By some, h. is held under these circumstances to act as a metal, and to form an alloy with the palladium. [B, 3.]—**Olefiant h.** Ethylene. [α, 38.]—**Phosphoreted h.** Fr., *hydrogène phosphoré.* Phosphine, gaseous h., phosphide; a colorless gas, PH_3, having an odor like that of rotten fish. It dissolves in water, is very inflammable, and acts as a powerful poison when inhaled. [B, 3.]—**Seleniureted h.** H. selenide, SeH_2; a colorless, inflammable gas, of intensely disagreeable, irritant odor. Inhaled, it causes inflammation of the respiratory mucous membrane. Its aqueous solution has an acid reaction, and is often called hydroselenic or selenhydric acid. [B, 3.]—**Solid h. arsenide.** A polymeric modification of arseniureted h., As_2H_2, a brownish solid. [B, 3.]—**Solid h. phosphide.** A yellow powder, P_4H_2. [B, 3.]—**Sulphureted h.** Fr., *hydrogène sulfuré.* Ger., *Schwefelwasserstoff.* H. monosulphide, sulphur hydride, sulphydric acid, hydrosulphuric acid; a colorless gas, H_2S, having a strong, disagreeable odor of rotten eggs, and a sweetish taste, condensing under pressure into a colorless liquid, which freezes at −85° C. and boils at −61·8° C. It is inflammable. Water dissolves 3 or 4 times its volume of the gas, forming a solution of acid reaction, and an odor like that of the gas. Both the gas and its solution are much employed as chemical reagents. It has been used by rectal injection as a remedy for pulmonary tuberculosis. [B, 3.]—**Telluretted h.** Tellurium hydride, h. telluride; a colorless, inflammable gas, TeH_2, of fœtid odor, and soluble in water, the solution being sometimes called hydrotelluric or tellurhydric acid. [B.]

HYDROGENATED, adj. Hid'ro-je2n-at e2d. Lat., *hydrogenatus.* Fr., *hydrogéné.* Containing hydrogen in combination. [L, 107.]

HYDROGENATION, n. Hid-ro-je2n-a'shu3n. The act or process of causing to combine with hydrogen.

HYDROGÈNE (Fr.), n. E-dro-zhe2n. See HYDROGEN.—**Azotate d'h.** Nitric acid. [B.]—**Azoture d'h.** See AMMONIA.—**Carbure d'h.** A hydrocarbon. [B, 38.]—**Chlorure d'h.** Hydrochloric acid. [A. 324.]—**Cyanure d'h.** Hydrocyanic acid. [α, 38.]—**Dioxyde d'h.** Hydrogen peroxide. [B.]—**H. arsénié.** See HYDROGEN *arsenide.*—**H. azoté.** Ammonia. [α, 38.]—**H. phosphoré.** See *Phosphoreted* HYDROGEN.—**H. sulfuré.** See *Sulphureted* HYDROGEN.—**Iodure d'h.** Hydriodic acid. [B.]—**Monosulfure d'h.** Sulphureted h. [B.]—**Monoxyde d'h.** Water. [B.]—**Oxyde d'h.** See HYDROGEN *oxide.*—**Peroxyde d'h.** See HYDROGEN *peroxide.*—**Persulfure d'h.** See HYDROGEN *persulphide.*—**Phosphure d'h.** See HYDROGEN *phosphide.*—**Sulfate hydraté de bicarbure d'h.** See OLEUM *æthereum.*—**Sulfure d'h.** See HYDROGEN *sulphide.*

HYDROGÉNÉ (Fr.), adj. E-dro-zha-na. Hydrogenated. [α, 38.]

HYDROGENESIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-je2n(ge2n)'e2-si2s. Gen., *-es'eos* (*-gen'esis*). From ὕδωρ, water, and γεννᾶν, to engender. The formation or collection of a watery fluid. [L, 50 (α, 14).]

HYDROGENICICUM (Lat.), **HYDROGENICUM** (Lat.), n's n. Hid(hu6d)-ro(ro3)-je2n(ge2n)-i2s(i2k)'i2k-u3m(u4m), -je2n(ge2n)'-i2k-u3m(u4m). See HYDROGEN *oxide.*—**H. oxydatum.** See HYDROGEN *peroxide.*

HYDROGENIDE, n. Hid-ro2j'e2n-i2d(id). See HYDRIDE.

HYDROGENIFEROUS, adj. Hid-ro-je2n-i2f'e2r-u3s. Lat., *hydrogeniferus* (from ὕδωρ, water, γεννᾶν, to engender, and *ferre,* to bear). Fr., *hydrogénifère.* See HYDROGENATED.

HYDROGENIUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-jen(ge2n)'i2-u3m(u4m). 1. See HYDROGEN. 2. See *Occluded* HYDROGEN.—**Gas h. sulphuratum.** Gaseous hydrogen sulphide. [B. 97.]—**Hydrogenii peroxidum.** See HYDROGEN *peroxide.*—**H. antimoniatum.** See HYDROGEN *antimonide.*—**H. hyperoxydatum** (**solutum**), **H. peroxydatum.** See HYDROGEN *peroxide.*—**Liquor hydrogenii sulphuratus.** See AQUA *sulphureo-acida* (in Supplement).

HYDROGENOSULPHURETUM (Lat.), n. n. Hid(hu6d)-ro2j-(ro2g)''e2n-o(o3)-su3l(su4l)-fu2(fu4)-ret(rat)'u3m(u4m). A hydrosulphide. [α, 39.]

HYDROGENOUS, adj. Hid-ro2j'e2n-u3s. From ὕδωρ, water, and γεννᾶν, to engender. Pertaining to hydrogen. [L, 56.]

HYDROGÉNURE (Fr.), n. E-dro-zha-nu6r. A hydride. [α, 38.]

HYDROGEROUS, adj. Hid-ro2j'e2r-u3s. Lat., *hydrogerus* (from ὕδωρ, water, and *gerere,* to bear). Fr., *hydrogère.* Containing or carrying water. [L, 24.]

HYDROGETON (Lat.), n. Hid(hu6d)-ro(ro3)-je2t(gat)'o2n. From ὕδωρ, water, and γείτων, a neighbor. 1. Of Loureiro, the genus *Potamogeton.* 2. Of Persoon, the genus *Ouvirandra.* [B, 42, 121 (α, 35).]—**H. fenestrale.** The *Ouvirandra fenestralis.* [α, 35.]

HYDROGETONIS (Lat.), adj. Hid(hu6d)-ro(ro3)-je2t(gat)'o2n-i2s. From ὕδωρ, water, and γείτων, a neighbor. Fr., *hydrogétone.* Of plants, living in the water. The *Hydrogetones* of Link are an order of the *Endogeneæ.* [B, 42, 170 (α, 24).]

HYDROGLOSSA (Lat.), n. f. Hid(hu6d)-ro(ro3)-glo2s(glos)'sa3. From ὕδωρ, water, and γλῶσσα, the tongue. Fr., *hydroglosse.* See RANULA.

HYDROGURES (Fr.), n. pl. E-dro-zhu6r. The hydrogen acids. [B. 88 (α. 39).]

HYDROGURET, n. Hid-ro2g'u2r-e2t. See HYDRIDE.

HYDROGURETED, adj. Hid-ro2g'u2r-e2t-e2d. See HYDROGENATED.

HYDRO-HÆMATOCELE (Lat.), n. f. Hid(hu6d)-ro(ro3)-he2m(ha3-e2m)-a2t(a3t)-o(o3)-se(ka)'le(la); in Eng., hi-dro-he2m'a2t-o-sel. Gen., *-cel'es.* See HYDRÆMATOCELE.

HYDROHÆMIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-hem'(ha3'e2m)-i2-a3. See HYDRÆMIA.

HYDROHÆMIC, adj. Hid-ro-he2m'i2k. See HYDRÆMIC.

HYDRO-HÆMOSTAT, n. Hid-ro-he2m'o-sta2t. From ὕδωρ, water, αἷμα, blood, and ἱστάναι, to make to stand. An instrument for arresting hæmorrhage by hydrostatic pressure. [E.]—**Gouley's h.-h.** A metallic catheter the shaft of which is incased in a rubber bag, which may be distended with water through a small rubber tube. [E.]

HYDROHÆMOTHORAX (Lat.), n. m. Hid(hu6d)-ro(ro3)-he2m(ha3-e2m)-o(o3)-thor'a2x(a3x). Gen., *-thor'acos* (*-is*). From ὕδωρ, water, αἷμα, blood, and θώραξ, the chest. Fr., *hydro-hémothorax.* A condition in which hydrothorax and hæmatothorax are associated. [A, 385.]

HYDROHÉMIE [Piorry] (Fr.), n. E-dro-e2-me. See HYDRÆMIA.

HYDROHYDRASTINE, n. Hid-ro-hid-ra2s'ten. A substance, $C_{20}H_{21}NO_4$, analogous in composition to hydroberberine; formed by the absorption of 4 atoms of hydrogen by hydrastine. ["Proc. of the Am. Pharm. Assoc.," xxxii (α, 14).]

HYDROHYMENITIS (Lat.), n. f. Hid(hu6d)'ro(ro3)-hi(hu6)-me2n(man)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). See HYDRYMENITIS.

HYDROHYSTERA (Lat.), n. f. Hid(hu6d)-ro(ro3)-hi2st(hu6st)-e2r-a3. From ὕδωρ, water, and ὑστέρα, the womb. See HYDROMETRA.

HYDROICUS (Lat.), adj. Hid(hu6d)-ro'i2k-u3s(u4s). From ἱδρῶα, heat spots. Fr., *hydroïque.* Relating to or partaking of the character of hydroa. [G.]

HYDROID, adj. Hid'roid. From ὕδωρ, water (1st def.), or ὕδρα, the hydra (2d def.), and εἶδος, resemblance. Fr., *hydroïde.* Ger., *wasserähnlich* (1st def.). 1. Resembling water. 2. Resembling the *Hydra.* The *Hydroida* are a subclass of the *Hydrozoa,* comprising animals most closely allied to *Hydra.* [B, 28 (α, 27).]

HYDROIODICUS (Lat.), adj. Hid(hu6d)-ro(ro3)-i2-o2d(od)'-i2k-u3s(u4s). See HYDRIODIC.

HYDROJOBOLOUS, adj. Hid-ro-jo2b'o-lu3s. Lat., *hydrojobolus* (from ὕδωρ, water, and ἰοβόλος, shedding venom). Fr., *hydrojobole.* Aquatic and venomous. The *Hydrojoboli* of J. A. Ritgen are a family of ophidian reptiles comprising those serpents which are aquatic and venomous. [L, 180 (α, 39).]

HYDROJODAS (Lat.), n. m. Hid(hu6d)-ro(ro3)-jod(yod)'a2s-(a3s). Gen., *-at'is.* See HYDRIODATE.

HYDROJODICUS (Lat.), adj. Hid(hu6d)-ro(ro3)-jod(yod)'i2k-u3s(u4s). Hydriodic; with the name of a base, the hydriodate (iodide) of the base. [B.] Cf. KALI *hydrojodicum.*

HYDROJODINSÄURE (Ger.), n. Hu6d-ro-yo-den'zoir-e2. Hydriodic acid. [L, 80.]

HYDROKALI (Lat.), n. n. Hid(hu6d)-ro2k'a2l(a3l)-i(e). A suppositious compound of hydrogen and potassium. [*a*, 38.]—**H. carbonicum.** Acid potassium carbonate. [*a*, 38.]—**H. tartaricum.** Acid potassium tartrate. [*a*, 38.]

HYDROKEPHALUS (Lat.), n. m. Hid(hu6d)-ro(ro3)-ke2f'-a2l(a3l)-u3s(u4s). See HYDROCEPHALUS.

HYDROKINETICS, n. sing. Hid-ro-ki2n-e2t'i2ks. From ὕδωρ, water, and κινητικός, for putting in motion. The science which relates to the motions of fluids and the forces acting upon fluids. [B, 116.]

HYDROKINONE, n. Hid-ro-ki2n'on. See HYDROQUINONE.

HYDROKOMENSÄURE (Ger.), n. Hu6d-ro-ko-man'zoir-e2. Hydrocomenic acid. [B.]

HYDROKONION (Lat.), n. n. Hid(hu6d)-ro(ro3)-kon(ko2n)'i2-o2n. See HYDROCONION.—**Siegle's Dampf-H.** (Ger.). A steam suction atomizer resembling Weir's. [Gottstein (A, 319 [*a*, 21]).]

HYDROKROKONSÄURE (Ger.), n. Hu6d-ro-kro-kon'zoir-e2. Hydrocroconic acid. [B.]

HYDROL (Fr.), n. E-drol. Of Béral, a natural or artificial mineral water. [L, 41, 49, 50 (*a*, 14).]

HYDROLACTOMETER, n. Hid-ro-la2k-to2m'e2t-u6r. From ὕδωρ, water, *lac*, milk, and μέτρον, a measure. An instrument for measuring the amount of water present in milk. *Zemeck's h.* consists of two graduated bottles with a filter of paper. A known quantity is placed in one bottle, warmed and coagulated with hydrochloric acid, and filtered into the second bottle. As it is known how much serum normal milk should contain, the percentage in the sample tested will give its purity. [L, 225.]

HYDROLÆUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-le'(la3'e2)-u3m-(u4m). From ὕδωρ, water, and ἔλαιον, oil. See HYDRELÆUM.

HYDROLAPATHUM (Lat.), **HYDROLAPATHUS** (Lat.), n's n. and m. Hid(hu6d)-ro(ro3)-la2p(la3p)'a2th(a3th)-u3m(u4m), -u3s-(u4s). From ὕδωρ, water, and λάπαθον, sorrel. The *Rumex aquaticus.* [B, 121 (*a*, 35).]—**Radix et herba hydrolapathi.** The root and herb of *Rumex hydrolapathum.* [B, 180 (*a*, 24).]

HYDROLAT (Fr.), n. E-dro-la3. Lat., *hydrolatum* (from ὕδωρ, water). See EAU *distillée* (2d def.).—**H. simple.** See AQUA *destillata.*

HYDROLATURA (Lat.), n. f. Hid(hu6d)-ro(ro3)-la2t(la3t)-u2(u)'-ra3. From ὕδωρ, water. Fr., *hydrolature.* Ger., *Wasserauszug.* Of Béral, an aqueous medicinal preparation. [A, 385.]

HYDROLÉ (Fr.), n. E-dro-la. From ὕδωρ, water. An aqueous solution, decoction, or infusion of a medicinal substance. [B, 46 (*a*, 39); L, 41, 49, 77 (*a*, 14).]—**H. animal.** An aqueous solution of a medicinal substance of animal origin. [B, 46 (*a*, 39).]—**H. mercuriel alcoolisé.** See *Liquor* HYDRARGYRI *oxymurialis.*—**H. mercuriel calcaire.** See *Lotio* HYDRARGYRI *lutea.*—**H. tartrique.** See *Solutio* TARTARI *depurati.*—**H's végétaux.** Aqueous solutions of vegetable medicinal substances. [B, 46 (*a*, 39).]

HYDROLEA (Lat.), n. f. sing. and n. pl. Hid(hu6d)-rol'e2-a3. From ὕδωρ, water, and ἐλαία, the olive-tree. 1. (Sing.) a genus of the *Hydrophyllaceæ*, tribe *Hydroleæ.* 2. (Pl.) of R. Brown, the *Hydrophyllaceæ*; of Choisy, a tribe of the *Hydroleaceæ* (Fr., *hydroléacées*), which are the *Hydrophyllaceæ.* The *Hydroleæ* (Fr., *hydrolées*) of Bentham and Hooker are a tribe of the *Hydrophyllaceæ*; the *Hydroleeæ* of Reichenbach are the same. [B, 42, 170 (*a*, 24).]—**H. zeylanica.** Beng., *kauchra ishalangula.* Mal., *tsyernvallel.* A species found in the East Indies. A pulp made of the leaves is applied to malignant ulcers. [B, 19, 172 (*a*, 24).]

HYDROLEATE, n. Hid-rol'e-at. Fr., *hydroléate.* A salt of hydroleic acid. [L, 41 (*a*, 14).]

HYDROLEIC ACID, n. Hid-ro-le'i2k. Fr., *acide hydroléique.* Ger., *Hydroleïnsäure.* A substance, $C_{19}H_{34}O_2$, obtained by the action of boiling water on sulpholeic or sulphomargaric acid. It forms yellow crystals, insoluble in water, very soluble in alcohol or ether. [B, 38, 48, 93 (*a*, 14).]

HYDROLEINE, n. Hid-rol'e-i2n. From ὕδωρ, water, and *oleum*, oil. A proprietary emulsion of cod-liver oil, borax, and pancreatin. [B, 270 (*a*, 38).]

HYDROLEROS (Lat.), **HYDROLERUS** (Lat.), n's m. Hid-(hu6d)-ro(ro3)-le(la)'ro2s, -ru3s(ru4s). From ὕδωρ, water, and λῆρος, chatter. Fr., *hydrolère.* Ger., *unruhiger Wahnsinn.* A form of mania characterized by restlessness. [L, 50 (*a*, 14).]

HYDROLEUM (Lat.), n. n. Hid(hu6d)-rol(ro2l)'e2-u3m(u4m). See HYDROLÆUM.

HYDROLICUM (Lat.), n. n. Hid(hu6d)-ro2l'i2k-u3m(u4m). From ὕδωρ, water. 1. Of Béral, see HYDROLÉ. 2. See LEMONADE.

HYDROLOGY, n. Hid-ro2l'o-ji2. Lat., *hydrologia* (from ὕδωρ, water, and λογός, understanding). Fr., *hydrologie.* Ger., *Hydrologie.* That department or division of medical science which treats of the use of waters, especially mineral waters, for therapeutic purposes. [D.]

HYDROLOTIF (Fr.), n. E-dro-lo-tef. From ὕδωρ, water. An aqueous lotion. [L, 41.]

HYDROLYSIS (Lat.), n. f. Hid(hu6d)-ro2l'i2s(u4s)-i2s. Gen., *-lys'eos* (*-ol'ysis*). From ὕδωρ, water, and λύειν, to loose. Chemical decomposition undergone by a substance in consequence of the assumption of the elements of one or more molecules of water. [B.]

HYDROLYTE, n. Hid'ro-lit. From ὕδωρ, water, and λυτός, soluble. It., *idrolito.* 1. A solution in water prepared without distillation. It corresponds to the liquor of the U. S., Br., and Ger. Ph's, and the *soluté* of the Fr. Cod. [B.] 2. One of the few mineral substances which are nearly or quite soluble in water. [B, 270 (*a*, 38).]

HYDROLYTIC, adj. Hid-ro-li2t'i2k. From ὕδωρ, water, and λύτος, that which loosens. 1. Causing the elimination of water. 2. Of ferments, acting only in the presence of water and producing fermentation by hydration. [B, 116.]

HYDROMA (Lat.), n. n. Hid(hu6d)-ro'ma3. Gen., *-om'atos* (*-atis*). Gr., ὕδρωμα (from ὕδωρ, water). Fr., *hydrome.* Ger., *Wasserbalg.* Of Ritgen, a morbid growth containing water. [L, 50 (*a*, 14).]

HYDROMANIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-man(ma3n)'i2-a3. From ὕδωρ, water, and μανία, madness. Fr., *hydromanie.* Ger., *Hydromanie.* 1. An insatiable thirst. 2. Diabetes insipidus, from the excessive thirst characterizing it. [D, 72; L, 50 (*a*, 14).] 3. A mania for suicide by drowning. [A, 326 (*a*, 21); D, 72; L, 50 (*a*, 14).]

HYDROMARGARATE, n. Hid-ro-ma2rg'a3-rat. A salt of hydromargaric acid. [B, 38 (*a*, 38).]

HYDROMARGARIC ACID, n. Hid-ro-ma3r-ga2r'i2k. Fr., *acide hydromargarique.* Ger., *Hydromargarinsäure.* A crystalline acid, $C_{17}H_{34}O_2 + H_2O$, readily soluble in ether or alcohol, insoluble in water, and melting at 60° C. [B, 38 (*a*, 38).]

HYDROMARGARITATE, n. Hid-ro-ma3r-ga2r'i2-tat. A salt of hydromargaritic acid. [B, 38 (*a*, 38).]

HYDROMARGARITIC ACID, n. Hid-ro-ma3r-ga2r-i2t'i2k. Fr., *acide hydromargaritique.* Ger., *Hydromargaritinsäure.* A solid crystalline acid, $C_{34}H_{70}O_5$, soluble in ether or alcohol, insoluble in water, and melting at 68° C.; a decomposition product of margaritic acid, by Berzelius considered as the product of the highest degree of oxidation of the radicle piotin, and called piotinic acid. [B, 38, 93 (*a*, 14, *a*, 38).]

HYDROMECHANICS, n. sing. Hid-ro-me2k-a2n'i2ks. The mechanics of liquids. [B.]

HYDROMECONIC ACID, n. Hid-ro-me2-ko2n'i2k. Fr., *acide hydroméconique.* Ger., *Hydromeconsäure.* An acid, $C_7H_{10}O_7$, formed by the addition of 6 atoms of hydrogen to meconic acid through the agency of sodium amalgam and water. It forms a stable, syrupy liquid of an astringent taste. [B, 41 (*a*, 38); B, 93 (*a*, 14).]

HYDROMEDIASTINUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-med-(mad)-i2-a2st(a3st)-in(en)'u3m(u4m). From ὕδωρ, water, and *mediastinum* (*q. v.*). Fr., *hydromédiastine.* Ger., *Mittelfellwassersucht.* Dropsy of the mediastinum. [L, 41, 50 (*a*, 14).]

HYDROMEDUSÆ (Lat.), n. f. pl. Hid(hu6d)-ro(ro3)-med-(me2d)-u2(u)'se(sa3-e2). From ὕδωρ, water, and Μέδουσα, Medusa. Ger., *Schirmquallen.* A class of the *Cnidariæ*, or (of Lankester) of the *Nematophora.* [L, 228; "Quart. Jour. of Micr. Sci.," p. 443, 1877 (L).]

HYDROMEL, n. Hid'ro2m-e2l. Gr., ὑδρόμελι (from ὕδωρ, water, and μέλι, honey). Lat., *hydromeli.* Fr., *h.* Ger., *H.*, *Honigwasser* (3d def.). It., *idromele.* 1. Of the ancients, a fermented beverage made of honey and water. 2. Any medicinal liquid mixture containing honey. 3. A beverage consisting of 6 parts of white honey in 10 of water. [B, 10, 270 (*a*, 38). 78 (*a*, 14).]—**Antasthmatic h.** Lat., *h. antasthmaticum, h. asthmaticum.* Fr., *h. antiasthmatique.* An infusion of fresh digitalis-leaves, containing vinegar, honey, tincture of benzoin, and liquor ammonii anisatus. [B, 119 (*a*, 38).]—**H. composé.** See TISANE *pectorale.*—**H. fermenté de Rousseau** (Fr.). See LAUDANUM *de Rousseau.*—**H. infantum** [Austr. Ph., Hung. Ph.]. Roum., *h.* [Roum. Ph.]. A mixture of 3 parts of the infusum laxativum of the Austr. Ph. and 1 part of syrup of senna with manna. [B, 95.]—**H. simplex.** See *H.* (3d def.).—**H. vineux** (Fr.). See *Vinous h.*—**Simple h.** See *H.* (3d def.).—**Vinous h.** Lat., *hydromeli vinosum.* Fr., *h. vineux.* A preparation made by fermenting 2,500 parts of pure honey and 64 of beer yeast in 12,500 of warm water; or by boiling 1,687 parts of honey in 18,000 of water till a quarter is boiled away, then fermenting 5 or 6 weeks, and adding 8 parts of isinglass and a nutmeg. [B, 119 (*a*, 38).]

HYDROMELI (Lat.), n. n. indecl. Hid(hu6d)-ro2m'e2l-i(i2). See HYDROMEL.—**H. vinosum.** See *Vinous* HYDROMEL.

HYDROMELLÉ (Fr.), n. E-dro-me2l-la. From ὕδωρ, water, and μέλι, honey. Of Béral, a medicament made of hydromel and extracts. [A, 385.]

HYDROMELLEA (Lat.), n. f. Hid(hu6d)-ro(ro3)-me2l'le2-a3. From ὕδωρ, water, and μέλι, honey.

HYDROMELLIC ACID, n. Hid-ro-me2l'i2k. Fr., *acide hydromellique.* See HYDROMELLITIC ACID.

HYDROMELLITIC ACID, n. Hid-ro-me2l-i2t'i2k. Fr., *acide hydromellitique.* Ger., *Hydromellithsäure.* An acid, $C_6H_6(CO.OH)_6$, formed when plumbic mellitate is decomposed with sulphureted hydrogen, and occurring as an indistinctly crystalline mass. When kept it passes into the isomeric isohydromellitic acid, forming hard, tetragonal prisms, soluble in water, insoluble in hydrochloric acid. [B, 3, 4 (*a*, 38).]

HYDROMELLONE, n. Hid-ro-me2l'on. Fr., *hydromellon.* Ger., *Hydromellon.* A substance, $C_6N_9H_3$, produced by the oxidation of melam, melamine, ammeline, urea, etc. It was discovered by Liebig, who at first did not recognize the presence of hydrogen, and called it mellon. It forms a yellow powder insoluble in water, alcohol, ether, acids, and diluted alkalies. It is isomeric and perhaps identical with dicyanuramide. [B, 93 (*a*, 14).]

HYDROMELLONIC ACID, n. Hid-ro-me2l-o2n'i2k. Fr., *acide hydromellonique.* Ger., *Mellonwasserstoffsäure.* A hydrogen acid, $C_9H_{13}H_{31} = N : (C_3N_3 : NH)_3$, forming a series of salts called mellonides. [B.]

HYDROMELON (Lat.), **HYDROMELUM** (Lat.), n's n. Hid(hu^{6}d)-ro(ro^3)-mel(mal)'o^{2}n, -u^{3}m(u^{4}m). Gr., ὑδρόμηλον (from ὕδωρ, water, and μῆλον, an apple). Fr., *hydromèle*. Ger., *Aepfeltrank*. 1. A beverage made by boiling apples or quinces in water. 2. A mixture consisting of honey, quinces, and boiled water. [L, 84 (α, 14).]

HYDROMENINGITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-me^{2}n-(man)-i^{2}n(i^{2}n^2)-ji(ge)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and μῆνιγξ, a membrane (see also *-itis**). Fr., *hydroméningite*. Ger., *Hirnhautwassersucht* (1st def.). 1. Hydrocephalus. 2. An old term for serous iritis. [F.]

HYDROMENINGOCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-me^{2}n(man)-i^{2}n^2-go(go^3)-se(ka)'le(la); in Eng., hid-ro-me^{2}n-i^{2}n^2'go-sel. Gen., *-cel'es* (*-æ*). 1. See ENCEPHALOCELE. 2. That form of spina bifida in which the sac is composed of skin and the membranes of the cord, but not of the cord itself. [E.]

HYDROMENINX (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-men(man)'-i^{2}n^{2}x. Gen., *-in'gos* (*-is*). From ὕδωρ, water, and μῆνιγξ, a membrane. Fr., *hydroméninge*. Ger., *Hirnhautwassersucht*. Dropsy of the membranes of the brain. [L, 50 (α, 14).]

HYDROMENTHENE, n. Hid-ro-me^{2}nth'en. A substance, $C_{10}H_{18}$, formed by treating menthol with hydrochloric acid, and then removing hydrogen and chlorine from the product. ["Am. Jour. of Pharm.," July, 1888, p. 307 (B).]

HYDROMETER, n. Hid-ro^{2}m'e^{2}t-u^{5}r. Lat., *hydrometrum* (from ὕδωρ, water, and μέτρον, a measure). Fr., *aréomètre*. Ger., *H.* An instrument for measuring the density, etc., of fluids.—**Baumé's h.** A glass tube with a bulb blown in its end and loaded with mercury so as to float upright in a liquid. For determining the densities of liquids lighter than water the stem of the h. is so graduated that 10° mark the level to which it sinks in distilled water, and 0° the level to which it sinks in a solution of 10 parts of salt in 90 of water; the graduation being continued upon the same scale up to the top of the instrument. For liquids heavier than water, the h. is so made that the point marked 0° is at the top of the stem and indicates the level to which it sinks in distilled water; the lower part of the stem is then so graduated that 15° represents the level to which it sinks in a mixture of 15 parts of salt and 85 of water. [B.]—**Cartier's h.** See *Cartier's* ALCOHOLOMETER.—**Fahrenheit's h.** A glass tube loaded with mercury like Baumé's h., and having a standard mark on the stem and a scale-pan on the top. The h. is floated in the liquid to be examined, the specific gravity of which can then be deduced from the weight of the load that has to be placed in the scale-pan in order to sink the stem to the mark. [B.]—**H. of constant volume.** Ger., *Gewichtsaräometer*. A h. in which, like Nicholson's h. and Fahrenheit's h., the stem is always immersed to the same extent, while the load which the h. carries varies in each case and by the amount of its variation indicates the specific gravity. [B.]—**H. of constant weight.** Ger., *Scalen-Aräometer*. A h., such as Baumé's, in which the load remains constant and the amount to which the stem is immersed varies, the amount of the variation indicating the specific gravity sought.—**H. of variable volume.** See *H. of constant weight*.—**H. of variable weight.** See *H. of constant volume*.—**Nicholson's h.** A hollow metal cylinder loaded with lead so as to float upright in water, and having a standard mark on its stem and a scale-pan at the top of the stem, and also one at the bottom of the cylinder. The body whose specific gravity is to be determined is placed first in the upper and then in the lower (or submerged) pan, and the weight of the additional load that has to be placed in the upper in each case in order to sink the h. to the level of the standard mark is ascertained. From a comparison of these weights and of the weight required to sink the h. to the same level when no substance is added, the specific gravity can be determined. [B.]

HYDROMETRA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-me^{2}t(mat)'ra^3. From ὕδωρ, water, and μήτρα, the womb. Fr., *hydromètre*. Ger., *Gebärmutterwassersucht*. A collection of watery liquid in the uterine cavity. [A, 326 (α, 21); D.]—**Ascitic h.** Lat., *h. ascitica*. H. proper, as distinguished from œdema of the uterus. [A, 85.]—**Essential h.** Fr., *hydromètre essentielle*. A h. that is not necessarily amniotic. [A, 15.]—**H. gravidarum.** Dropsy of the amnion. [α, 40.]—**Hydatid h.** Fr., *hydromètre hydatique*. An accumulation of serum in one or more cysts attached to the endometrium. It is doubtful if they are ever true acephalocysts. [α, 40.]—**Lateral h.** A h. of one horn of a double uterus. [α, 40.]—**H. vetularum.** H. characterized by a frequent spontaneous opening of the os uteri internum and the evacuation of the uterine contents. [Greulich (A, 319 [α, 21]).]—**Œdematous h.** Lat., *h. œdematosa*. Œdema of the uterus. [A, 85.]

HYDROMÈTRE (Fr.), n. E-dro-me^{2}tr'. See HYDROMETRA.—**H. intra-membraneuse.** A term applied by Devilliers to a case of hydramnios of rapid formation, following an injury, and supposed by him to be of an inflammatory nature. [A, 15.]

HYDROMETRECTASIA [Piorry] (Lat.), n. f. Hid(hu^{6}d)-ro-(ro^3)-me^{2}t(mat)-re^{2}k-ta(ta^3)'zi^2(si^2)-a^3. From ὕδωρ, water, μήτρα, the womb, and ἔκτασις, a stretching. Fr., *hydrométrectasie*. Distention of the uterus by hydrometra. [L, 50 (α, 14).]

HYDROMETRIC, adj. Hid-ro-me^{2}t'ri^{2}k. From ὕδωρ, water, and μετρεῖν, to measure. Of or pertaining to the hydrometer or to its employment.

HYDROMETRY, n. Hid-ro^{2}m'e^{2}t-ri^2. From ὕδωρ, water, and μέτρον, a measure. Fr., *hydrométrie*. Syn.: *areometry*. The art of using the hydrometer; the measurement of sp cific gravities by means of the hydrometer.

HYDROMICRENCEPHALY, n. Hid-ro-mi-kre^{2}n-se^{2}f'a^{2}l-i^2. From ὕδωρ, water, μικρός, small, and ἐγκέφαλος, the brain. A disease consisting first of microcephalus, succeeded by atrophy of the brain, and this in turn by effusion of serum into the cavities and subarachnoid spaces. [α, 40.]

HYDROMICROCEPHALUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-mi^{2}k-ro(ro^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ὕδωρ, water, μικρός, small, and κεφαλή, the head. The accumulation of serum in the ventricles and other portions of the brain following cerebral atrophy in the microcephalic. [α, 40.]

HYDROMPHALOCELE (Lat.), n. f. Hid(hu^{6}d)-ro^{2}m-fa^{2}l-(fa^{3}l)-o(o^3)-se(ka)'le(la); in Eng., hid-ro^{2}m-fa^{2}l'o-sel. Gen., *-cel'es* (*-æ*). From ὕδωρ, water, ὀμφαλός, the navel, and κήλη, a tumor. A cystic tumor formed by the accumulation of serum in the sac of an umbilical hernia, the neck of which has been obliterated. [α, 40]

HYDROMPHALON (Lat.), **HYDROMPHALUM** (Lat.), **HYDROMPHALUS** (Lat.), n's n., n., and m. Hid(hu^{6}d)-ro^{2}m'-fa^{2}l(fa^{3}l)-o^{2}n, -u^{3}m(u^{4}m), -u^{3}s(u^{4}s). Gr., ὑδρόμφαλον, ὑδρόμφαλος (from ὕδωρ, water, and ὀμφαλός, the navel). Fr., *hydromphale*. Ger., *Nabelwassergeschwulst*. A tumor at the umbilicus containing serum. [E.]

HYDROMUCONIC ACID, n. Hid-ro-mu^2-ko^{2}n'i^{2}k. Fr., *acide hydromuconique*. Ger., *Hydromuconsäure*. A dibasic crystalline acid, $C_4H_6\Big\langle\begin{matrix}CO.OH\\CO.OH\end{matrix} = C_6H_8O_4$, or muconic acid plus two atoms of hydrogen. It is slightly soluble in ether and in cold water, readily soluble in boiling water. [B, 3, 4; B, 46 (α, 39), 93 (α, 14).]

HYDROMYCA (Lat.), n. f. Hid(hu^{6}d)-ro^{2}m'i^2(u^6)-ka^3. From ὕδωρ, water, and μύκης, a fungus. Fr., *hydromyce*. Ger., *Wasserschwamm*. A watery fungus. [L, 50 (α, 14).]

HYDROMYELIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-mi(mu^6)-el-(e^{2}l)'i^2-a^3. From ὕδωρ, water, and μυελός, the marrow. 1. See HYDRORRHACHIS *interna*. 2. See *Excavating* MYELITIS.

HYDROMYELITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-mi(mu^6)-e^{2}l-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and μυελός, marrow (see also *-itis**). See HYDRORRHACHIS *interna*.

HYDROMYELOCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-mi(mu^6)-e^{2}l-o(o^3)-se(ka)'le(la); in Eng., hid-ro-mi'e^{2}l-o-sel. Gen., *-cel'es*. From ὕδωρ, water, μυελός, the marrow, and κήλη, a tumor. 1. Spina bifida in which the tumor is covered by the remnants of the spinal cord. To be distinguished from hydromeningocele. [E.] 2. An excessive collection of fluid in the central canal of the spinal cord. [A, 326 (α, 21); E.]

HYDROMYELUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-mi(mu^6)'e^{2}l-u^{3}s(u^{4}s). From ὕδωρ, water, and μυελός, marrow. See HYDRORRHACHIS *interna*.—**H. aquisitus.** Acquired dilatation of the central spinal canal. [D, 35.]—**H. congenitus.** See HYDRORRHACHIS *interna*.

HYDROMYRINGA (Lat.), **HYDROMYRINX** (Lat.), n's f. Hid(hu^{6}d)-ro(ro^3)-mir(mu^{6}r)-i^{2}n^2'ga^3, -mir(mu^{6}r)'i^{2}n^{2}x. Gen., *-ingæ*, *-ing'os* (*-ing'is*). From ὕδωρ, water, and *myrinx*, the membrana tympani. Ger., *Paukenhöhlenwassersucht* (2d def.). 1. Dropsy of the membrana tympani, *i. e.*, that condition of the membrane in which it is distended with fluid and forms bullæ, as is often the case in acute and chronic myringitis. [B.] 2. Dropsy of the tympanum, an accumulation of fluid in the drum of the ear, giving rise to difficulty of hearing or slight deafness. [F, 40.]

HYDRONAPHTHOL, n. Hid-ro-na^{2}p'tho^{2}l. A medicinal preparation apparently identical with isonaphthol (β-naphthol). [B. 270 (α, 38); G. R. Fowler, "N. Y. Med. Jour.," Oct. 3, 1885, p. 374.]

HYDRONCUS (Lat.), n. m. Hid(hu^{6}d)-ro^{2}n^{2}k'u^{3}s(u^{4}s). From ὕδωρ, water, and ὄγκος, a tumor. See ANASARCA and ŒDEMA.

HYDRONEPHRECTASIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-ne^{2}f-re^{2}k-taz(ta^{3}s)'i^2-a^3. From ὕδωρ, water, νεφρός, the kidney, and ἔκτασις, distention. Fr., *hydronéphrectasie*. Dropsical distention of the kidney. [A, 322.]

HYDRONEPHROS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-ne^{2}f'ro^{2}s. From ὕδωρ, water, and νεφρός, a kidney. Ger., *Wasserniere* (1st def.). 1. A dropsical kidney. 2. Hydronephrectasia. [L, 50 (α, 14).]

HYDRONEPHROSIS [Rayer] (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-ne^{2}f-ro'si^{2}s. Gen., *-os'eos* (*-os'is*). From ὕδωρ, water, and νεφρός, a kidney. Fr., *hydronéphrose*. Ger., *H.*, *Hydronephrose*, *Harnanhäufung im Nierenbecken*. It., *idronefrosi*. Sp., *hidronefrosis*. A badly formed word (*nephrydrosis* is better) purporting to denote a morbid accumulation of the urine in the pelvis of the kidney, due to obstruction or occlusion of the lumen of the ureter, causing dilatation of the renal pelvis and calices, and giving rise to pyelitis, suppurative nephritis, or renal atrophy. [D, 5.]—**H. paraplegica.** H. associated with paraplegia. [D, 70.]—**Intermittent h.** Ger., *intermittirende Hydronephrose*. Of Landau, a h. due to flexion of the ureter, this in turn being due to a movable kidney. [α, 40.]—**Partial h.** H. in which there is dilatation of only one or a few of the calices. [D, 70.]

HYDRONEPHRUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-né^{2}f'ru^{3}s-(ru^{4}s). See HYDRONEPHROS.

HYDRONÉVRAXIE [Piorry] (Fr.), n. E-dro-na-vra^{3}x-e. From ὕδωρ, water, νεῦρον, a nerve, and *axis*, an axis. Dropsy of the central nervous system. [A, 250 (α, 21).]

HYDRONÉVRIE [Piorry] (Fr.), n. E-dro-na-vre. From ὕδωρ, water, and νεῦρον, a nerve. Dropsy of the nerves. [A, 250 (α, 21).]

HYDRONOSOS (Lat.), **HYDRONUSOS** (Lat.), n's f. Hid-(hu^{6}d)-ro^{2}n'o^{2}s-o^{2}s, -ro^{2}n-u^2(u)'so^{2}s. From ὕδωρ, water, and νόσος, or νοῦσος, a disease. Any disease attended with dropsy or watery effusion. [L, 50 (α, 14).]

HYDRO-OLIGOCYTHÆMIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-o^{2}l-i^{2}g-o(o^3)-si^{2}th(ku^{6}th)-em'(a^3'e^{2}m)-i^2-a^3. From ὕδωρ, water, ὀλίγος, few, κύτος, a cell, and αἷμα, blood. A certain form of secondary anæmia in which the proportion of the serum to the corpuscular elements in the blood is much increased. It is commonly found after mineral poisoning, especially with lead and mercury. [α, 40.]

HYDROOPHORIA (Lat.), **HYDROOPHORON** (Lat.), **HYDROOPHORUM** (Lat.), n's f., n., and n. Hid(hu6d)-ro(ro3)-o(o2)-for(fo2r)'i2-a3, -o2f'o2r-o2n, -u3m(u4m). From ὕδωρ, water, ᾠόν, an egg, and φορεῖν, to bear. Fr., *hydroophorie.* See HYDROARION.

HYDROORTHOCOUMARIC ACID, n. Hid-ro-o2r-tho-ku-ma2r'i2k. Fr., *acide hydro-orthocoumarique.* An acid, $C_9H_{10}O_3$, or $C_{18}H_{18}O_6$, occurring in *Melilotus officinalis*, and formed by the action of sodium amalgam on an alcoholic solution of coumarin or on orthocoumaric acid. It crystallizes in fine needles, slightly soluble in cold water, freely soluble in hot water, in alcohol, and in ether, and fusible at 82° C. It is isomeric with hydroparacoumaric acid. [B, 88 (α, 39), 93 (α, 14).]

HYDRO-OVARIUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-o-va(wa3)'-ri2-u3m(u4m). From ὕδωρ, water, and ὠάριον, a small egg. See HYDROARION.

HYDRO-OXIDE, n. Hi-dro-o2x'i2d(id). See HYDROXIDE.

HYDROOXYÄTHYLCHINOLIN (Ger.), n. Hu6-dro-ox-u6-a-tu6l-ch2en-o-len'. Hydride of ethylic oxyquinoline, the base kairine A. [B.] See KAIRINE.

HYDRO-OXYDATUS (Lat.), adj. Hid(hu6d)-ro(ro3)-o2x-i2d-(u6d)-at(a3t)'u3s(u4s). Combined with hydrogen and oxygen; with the name of a base, the hydroxide of that base. [B.]

HYDROOXYMETHYLCHINOLIN (Ger.), n. Hu6d-ro-ox-u6-ma-tu6l-ch2en-o-len'. The base kairine M.

HYDROPARACOUMARIC ACID, n. Hid-ro-pa2r-a3-ku-ma2r'i2k. Fr., *acide hydro-para-coumarique.* Ger., *Hydroparacumarsäure.* An acid, $C_6H_4(OH)C_2H_4.CO.OH$ (according to some, $C_{18}H_{18}O_6$), obtained by treating paracoumaric acid with sodium amalgam and in other ways, and occurring in small crystalline prisms, soluble in water, in alcohol, and in ether, and melting at about 125° C. The acid is found in normal human urine, and among the products of putrefaction of flesh. [B, 3, 4, 270 (α, 38); B, 93; "Proc. of the Am. Pharm. Assoc.," xvi (α, 14).]

HYDROPARASTATES (Lat.), n. m. Hid(hu6d)-ro(ro3)-pa2r-(pa3r)-a3st(a3st)'a2t(a3t)-ez(as). Gen., *-ast'atu* (*-æ*). From ὕδωρ, water, and παραστάτης, one who stands by. Ger., *Wasseransammlung im Nebenhoden.* A watery effusion in or about the epididymis. [L, 50 (α, 14).]

HYDROPARÉSIE (Fr.), n. E-dro-pa3-ra-ze. From ὕδωρ, water, and πάρεσις, paralysis. An affection prominently characterized by dropsy and paresis. [B. Féris, "Gaz. hebd. de méd. et de chir.," June 8, 1883, p. 383.]—**H. névrovasculaire.** A collective term for myxœdema and beri-beri. [B. Féris, *l. c.*]

HYDROPAROTIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-pa2r(pa3r)-ot'i2s. Gen., *-ot'idos* (*-idis*). From ὕδωρ, water, and παρωτίς, the parotid gland. Fr., *hydroparotide.* Ger., *Ohrdrüsenwassersucht.* 1. Œdema of the parotid gland. [L, 30, 50 (α, 14).] 2. A watery cyst of the parotid gland. [A, 385.]

HYDROPATHIC, adj. Hid-ro2p'a2th-i2k. Pertaining to hydropathy.

HYDROPATHIST, n. Hid-ro2p'a2th-i2st. Hidr-o2p'a2th-i2st. An adherent or practitioner of hydropathy (2d def.).

HYDROPATHY, n. Hid-ro2p'a2th-i2. Lat., *hydropathia* (from ὕδωρ, water, and πάθος, disease). Fr., *hydropathie.* 1. Originally, a disease caused by water; dropsy. 2. Of Oertel, hydriatrics. [L, 41, 50, 56 (α, 14).]

HYDROPEDESIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe2d(pad)-e-(a)'si2s. Gen., *-es'eos* (*-es'is*). See HIDROPEDESIS.

HYDROPEGE (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe(pa)'je(ga). Gen., *-eg'es* (*-æ*). From ὕδωρ, water, and πηγή, a spring. Fr., *hydropège.* Ger., *Wasserquell.* 1. A spring. 2. Spring-water. [L, 50 (α, 14).]

HYDROPELTIS [Michaux] (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe2lt'i2s. Gen., *-elt'is.* From ὕδωρ, water, and πέλτη, a small shield. Fr., *h.*, *hydropeltide.* The water-buckler, a genus of the *Hydropeltideæ* (Fr., *hydropeltidées*), which are: Of De Candolle and others, the *Cabombeæ* of Bentham and Hooker; of Bartling, a class of the *Chlamydoblastæ*, comprising the *Cabombeæ*, *Nymphæaceæ*, and *Nelumboneæ.* [B, 19, 34, 42, 170 (α, 21).]—**H. purpurea.** Purple water-buckler; a species found in the United States, Canada, Australia, and the Himalayas. It contains starch, and in America is considered nutritious. The leaves are astringent, and have been used in phthisis and dysentery. [B. 19, 34, 42 (α, 24).]

HYDROPÉRICARDE (Fr.), **HYDROPÉRICARDIE** [Piorry] (Fr.), n's. E-dro-pa-re-ka3rd, -ka3r-de. See HYDROPERICARDIUM.

HYDROPERICARDITIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe2r-i2-ka3rd-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, περί, around, and καρδία, the heart (see also *itis**). Fr., *hydropéricardite.* Ger., *entzündliche Herzbeutelwassersucht.* Inflammation and dropsy of the pericardium. [L, 30, 50 (α, 14).]

HYDROPERICARDIUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-pe2r-i2-ka3rd'i2-u3m(u4m). From ὕδωρ, water, περί, around, and καρδία, the heart. Fr., *hydropéricarde.* Ger., *Herzbeutelwassersucht, Hydropericardie.* An accumulation of serous fluid in the pericardium; a form of dropsy which (*a*) depends upon an increase of the normal liquor pericardii, due to a decrease in the size of the heart, thus reducing the pressure upon the pericardium from within, or occurring when the lungs become adherent to the pericardium, and are reduced in volume, either from atrophy, failure to regain their normal size after absorption of a pleuritic effusion, or contraction from chronic pneumonia; or (*b*) is associated with an obstruction of the veins of the right heart, when h. may precede dropsy of any other part of the body. Another form may be regarded as the effect of a "dropsical crasis." It appears, usually after some time, in diseases in which the blood has a tendency to lose its albumin, and the serum to transude (*e. g.*, Bright's disease, chronic affections of the spleen, the cancerous cachexia, etc.). [D, 21.]—**Active h.** Of Walshe, dropsy of the pericardium without dropsy in any other part of the body. [α, 40.]—**Mechanical h.** Dropsy of the pericardium due to pressure on the great veins occasionally found in aortic aneurysm and carcinoma. [α, 40.]—**Passive h.** A dropsy of the pericardium occurring with general dropsy. [α, 40.]

HYDROPÉRIDIDYMIE [Piorry] (Fr.), n. E-dro-pa-re-de-deme. From ὕδωρ, water, περί, around, and δίδυμος, the testicle. See HYDROCELE.

HYDROPERIONE, n. Hid-ro-pe2r'i2-on. From ὕδωρ, water, περί, around, and ἰέναι, to go. Fr., *hydropérione.* Ger., *Hydroperione.* Of Breschet, a liquid described as contained between the decidua vera and the decidua reflexa; designed, he thought, to nourish the embryo at an early period of gestation. [A, 45.]

HYDROPERIONIC, adj. Hid-ro-pe2r-i2-o2n'i2k. Pertaining to the hydroperione.

HYDROPERIPNEUMONIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe2r-i2-nu2(pnu2)-mon(mo2n)'i2-a3. From ὕδωρ, water, περί, around, and πνεύμων, a lung. Fr., *hydropéripneumonie.* Ger., *Lungenentzündung mit wässerigen Ausschwitzungen.* Pneumonia resulting in pleuritic effusion or hydrothorax. [A, 322.]

HYDROPERITONÆUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-pe2r-i2-to2n-e'(a3'e2)-u3m(u4m). From ὕδωρ, water, and περιτόναιον, the peritonæum. Fr., *hydropéritonie.* See ASCITES.

HYDROPERITONITIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-pe2r-i2-to2n-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and περιτόναιον, the peritonæum (see also *-itis**). Fr., *hydropéritonite.* Ger., *entzündliche Bauchfellwassersucht.* Peritonitis with watery effusion. [L, 41, 95 (α, 14).]

HYDROPERSULPHOCYANIC ACID, n. Hid-ro-pu3r-su3lf-o-si-a2n'i2k. Perthiodicyanic acid. [B.]

HYDROPHALLUS (Lat.), n. m. Hid(hu6d)-ro(ro3)-fa2l(fa3l)'-lu3s(lu4s). From ὕδωρ, water, and φαλλός, the penis. Œdema of the penis. [L, 30, 50, 107 (α, 14).]

HYDROPHENYL, n. Hid-ro-fe2n'i2l. See BENZENE.

HYDROPHILÆ (Lat.), n. f. pl. Hid(hu6d)-ro2f'i2l-e(a3-e2). From ὕδωρ, water, and φίλος, loving. Diamesogamous plants that are fertilized with the aid of water. [Müller (α, 24).]

HYDROPHILOUS, adj. Hid-ro2f'i2l-u3s. Lat., *hydrophilus* (from ὕδωρ, water, and φίλος, loving). Fr., *hydrophile.* Ger., *hydrophil.* 1. See AQUATIC. 2. Bibulous, absorbent, hygroscopic. ["Practitioner," Feb., 1888, p. 132.] 3. Fertilized by means of water currents (said of flowers). [B, 299 (α, 24).]

HYDROPHIMOSIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-fi(fe)-mo'si2s. Gen., *-os'eos* (*-os'is*). From ὕδωρ, water, and φίμωσις, phimosis. Fr., *hydrophimose.* Ger., *Wassergeschwulst der Vorhaut.* See PHIMOSIS *œdematodes.*

HYDROPHLEGMASIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-fle2g-ma(ma3)'zi2(si2)-a3. From ὕδωρ, water, and φλεγμασία, inflammation. Of Rayer, an acute inflammation in which the cellular tissue is infiltrated with serum. [α, 40.]—**H. textus cellularis.** Serous effusion into the cellular tissue due to inflammation of the tissue itself, in distinction from that due to mechanical causes or diseases of other portions of the body. [α, 40.]

HYDROPHLOGOSIS (Lat.), n. f. Hid(hu6d)-ro(ro3)-flo(flo2)-go'si2s. Gen., *-os'eos* (*-os'is*). From ὕδωρ, water, and φλόγωσις, a burning. Fr., *hydrophlogose.* An inflammatory process associated with an accumulation of watery fluid. [D.]—**H. ventriculorum cerebri** [Lobstein]. Acute internal hydrocephalus. [D.]

HYDROPHLORONE, n. Hid-ro-flor'on. Fr., *h.* Ger., *Hydrophloron.* A colorless, crystalline substance, $C_8H_{10}O_2 = C_8H_8(OH)_2$, bearing the same relation to phlorone that hydroquinone does to quinone. It is freely soluble in water, in alcohol, and in ether. [B, 4; B, 46 (α, 39).]

HYDROPHOBIA, n. Hid(hu6d)-ro(ro3)-fob(fo2b)'i2-a3. Gr., ὑδροφοβία (from ὕδωρ, water, and φόβος, fear). Fr., *hydrophobie* (*rabique*). Ger., *H.*, *Hydrophobie, Wasserscheu.* It., *idrofobia.* Sp., *hidrofobia, mal de rabia.* 1. Morbid horror of water or of drinking, especially when due to rabies. 2. Of Celsus, rabies canina. [A, 311.]—**H. hysterica.** See *Hysterical h.*—**H. simplex** [Cullen]. H. without rage or inclination to bite. [α, 40.]—**Hysterical h., Nervous h.** Lat., *h. hysterica.* A transitory form of h., not dependent on rabies; generally connected with other hysterical phenomena. [A, 326 (α, 21).]—**Phantom h.** A disturbed condition, due to dread of h., which may be prolonged, accompanied by imitations of the disease, until it is ultimately fatal. ["Lancet," Apr. 14, 1883, p. 647 (D).]—**Spontaneous h.** See *Hysterical h.*

HYDROPHOBIC, adj. Hi-dro-fob'i2k. Gr., ὑδροφοβικός (from ὕδωρ, water, and φοβεῖν, to fear). Lat., *hydrophobicus.* Fr., *hydrophobique.* Pertaining to, affected with, or resembling hydrophobia. [D.]

HYDROPHOBINE (Fr.), n. E-dro-fo-ben. Lat., *hydrophobinum* (from ὑδροφοβία, hydrophobia). The virus of rabies. [L, 41.]

HYDROPHOBOPHOBIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-fob-(fo2b)-o(o3)-fob(fo2b)'i2-a3. From ὑδροφοβία, hydrophobia, and φόβος, fear. See *Phantom* HYDROPHOBIA.

HYDROPHOBOS (Lat.), **HYDROPHOBUS** (Lat.), adj's. Hid(hu6d)-ro2f'o2b-o3s, -u3s(u4s). Gr., ὑδροφόβος (from ὕδωρ, water, and φόβος, fear). Affected with hydrophobia. [A, 311.]

HYDROPHONE, n. Hid'ro-fon. From ὕδωρ, water, and φωνή, the voice. An instrument invented by Allison, and modified by Cammann, similar to a binaural stethoscope in shape, but in which the sound is transmitted through a solid column of water. It is used in auscultatory percussion. [D. M. Cammann, "N. Y. Med. Jour.," Feb. 27, 1886, p. 241 (α, 40).]

HYDROPHOROUS, adj. Hid-ro2f'o2r-u3s. Of Rivière, hygroscopic. [α, 39.]

HYDROPHOSPHATE (Fr.), n. Hid-ro-fo^{2}s'fat. A hydrated phosphate. [L, 41.]

HYDROPHTHALIC ACID, n. Hid-ro^{2}f-tha^{2}l'i^{2}k. Fr., *acide hydrophtalique.* Ger., *Hydrophthalsäure.* See DIHYDROPHTHALIC ACID, TETRAHYDROPHTHALIC ACID, and HEXAHYDROPHTHALIC ACID.

HYDROPHTHALMIA (Lat.), n. f. Hid(hu^{6}d)-ro^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. From ὕδωρ, water, and ὀφθαλμία, ophthalmia. Fr., *hydrophthalmie.* Ger., *Hydrophthalmus, Wasserauge, Augenwassersucht.* It., *idroftalmia.* Sp., *hidroftalmia.* 1. A disease characterized by a uniform, spherical bulging of the anterior part of the eye. It is generally congenital, and seems to be due to a thinning and diminution in the power of resistance of the cornea, generally secondary to a severe inflammation. The cornea may be either transparent or opaque. [A, 326 (*a*, 21); F.] 2. An enlargement of the eye due to an increase in the quantity of the vitreous. [A, 326 (*a*, 21).]—**Conical h.** Lat., *h. conica.* 1. Anterior staphyloma of the cornea. 2. Conical cornea. [F.]—**H. anterior.** Fr., *hydrophthalmie antérieure.* Ger., *vorderer Hydrophthalmus.* See KERATOGLOBUS.—**H. congenitus.** H. caused by intra-uterine iridochorioiditis, and involving the whole eyeball. The tension of the eye is abnormal, normal, or subnormal. [Klein (A, 319 [*a*, 21]).]—**H. congenita anterior.** See *H.*, KERATOGLOBUS, and BUPHTHALMIA.—**H. cruenta.** See HÆMOPHTHALMIA.—**H. postica.** Fr., *hydrophthalmie postérieur.* Ger., *hinterer Hydrophthalmus.* It., *idroftalmia posteriore.* Sp., *hidroftalmia posterior.* See *H.* (2d def.).—**H. totalis.** H. which involves both the anterior and posterior portions of the eye. [A, 319 (*a*, 29).]—**H. totalis congenita.** A congenital form of h. totalis. [A, 319 (*a*, 29).]

HYDROPHTHALMIC, adj. Hid-ro^{2}f-tha^{2}l'mi^{2}k. Lat., *hydrophthalmicus* (from ὕδωρ, water, and ὀφθαλμία, ophthalmia). Fr., *hydrophthalmique.* Pertaining to or affected with hydrophthalmia. [L, 41.]

HYDROPHTHALMION (Lat.), **HYDROPHTHALMIUM** (Lat.), n's n. Hid(hu^{6}d)-ro^{2}f-tha^{2}l(tha^{3}l)'mi^2-o^{2}n, -u^{3}m(u^{4}m). From ὕδωρ, water, and ὀφθάλμιον, a little eye. An old term for an œdematous swelling of the conjunctiva. [F.]

HYDROPHTHALMOS (Lat.), **HYDROPHTHALMUS** (Lat.), n's m. Hid(hu^{6}d)-ro^{2}f-tha^{2}l(tha^{3}l)'mo^{2}s, -mu^{3}s(mu^{4}s). From ὕδωρ, water, and ὀφθαλμός, an eye. See HYDROPHTHALMIA.

HYDROPHTHORA (Lat.), n. f. Hid(hu^{6}d)-ro^{2}f'tho^{2}r-a^3. From ὕδωρ, water, and φθορά, decay. Of Pelletan, hydrofluoric acid. [B, 78 (*a*, 14).]

HYDROPHTHORIC ACID, n. Hid-ro^{2}f-tho^{2}r'i^{2}k. Fr., *acide hydrophthorique.* Hydrofluoric acid. [*a*, 38.]

HYDROPHYLLIA (Lat.), n. n. pl. Hid(hu^{6}d)-ro(ro^3)-fi^{2}l(fu^{6}l)'li^2-a^3. From ὕδωρ, water, and φύλλον, a leaf. Ger., *Deckstücke.* Overlapping appendages or plates, frequently called "bracts," which protect the polypites in some of the oceanic *Hydrozoa.* [B, 28 (*a*, 27).]

HYDROPHYLLUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-fi^{2}l(fu^{6}l)'lu^{3}m(lu^{4}m). From ὕδωρ, water, and φύλλον, a leaf. Fr., *hydrophylle.* Ger., *Wasserblatt.* Water-leaf, bur-flower; of Tournefort, a genus of the *Hydrophyllaceæ* (Fr., *hydrophyllacées*), or *hydrophylls* of Lindley, which are: Of De Candolle, an order of the *Corolliflorœ*, comprising *H., Nemophila, Ellisia, Phacelia, Cosmanthus,* etc.; of Bentham and Hooker, an order of the *Polemoniales.* The *Hydrophylleæ* (Fr., *hydrophyllées;* Ger., *Hydrophylleen*) are: Of R. Brown and others, the *Hydrophyllaceæ;* of Bentham and Hooker, a tribe of the *Hydrophyllaceæ*, comprising *H., Nemophila,* and *Ellisia.* The *Hydrophyllideæ* of Dumortier are the *Hydrophyllaceæ.* [B, 19, 34, 42, 170, 180 (*a*, 24).]—**H. canadense, H. verum.** Ger., *canadische Rinnenblume.* A species the root and herb of which are used in decoction in snakebites, and in poisoning by *Rhus toxicodendron.* [B, 38, 180 (*a*, 24).]—**H. virginicum.** In Kansas, the bur-flower. The leaves, called Shananese salad, are eaten. [B, 19 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]

HYDROPHYSOCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-fi(fu^6)-so(so^3)-se(ka)'le(la); in Eng., hi-dro-fi'so-sel. Gen., *-cel'es.* From ὕδωρ, water, φῦσα, wind, and κήλη, a tumor. Ger., *Wasserwindbruch.* A hernia containing gas and serum. [E.]

HYDROPHYSOMETRA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-fi(fe)-so(so^3)-me(ma)'tra^3. From ὕδωρ, water, φῦσα, wind, and μήτρα, the womb. Fr., *hydrophysomètre.* An accumulation of serum and gas in the uterus. [L, 41, 50 (*a*, 14).]

HYDROPHYTA (Lat.), n. n. pl. Hid(hu^{6}d)-ro^{2}f'i^{2}t(u^{6}t)-a^3. From ὕδωρ, water, and φυτόν, a plant. Fr., *hydrophytes.* Ger., *Wasserpflanzen.* The *Algæ;* by Lyngbye divided into three grand divisions: (1) those with continuous fronds (Fr., *hydrophytes à frondes continues*), (2) those with jointed fronds (Fr., *hydrophytes à frondes articulées*), and (3) the gelatinous hydrophytes (Fr., *hydrophytes gelatineuses*). The *Hydrophytæ* are: 1. Of Richard and others, the *Algæ.* 2. Of Gray, a family of the *Algæ*, consisting of the *Oscillatorideæ, Bangideæ, Lemanideæ, Vaucherideæ, Diatomideæ, Conjugatideæ, Hydrodictyonideæ,* and *Confervidæ.* 3. Of Link, a subclass of the *Exogeneæ*, consisting of the *Hydrocaryes* and *Nymphæaceæ.* The *Hydrophytæ loculatæ* of Bonnemais are a division of the *Hydrophytæ*, containing several groups: (1) *Vaginaria, Linckia, Trichophora,* etc.; (2) *Dasytricha, Dictiderma,* etc.; (3) the *Conferveæ;* and (4) *Lemanea* and *Nostoch.* Subsequently they comprised the *Epidermeæ* and *Ceramieæ.* The *Hydrophytes* (Fr., *h.*) are the *Algæ.* [B, 1, 77, 170, 180 (*a*, 24).]

HYDROPHYTOGRAPHY, HYDROPHYTOLOGY, n's. Hid-ro-fit-o^{2}g'ra^{2}f-i^2, -o^{2}l'o-ji^2. Lat., *hydrophytographia, hydrophytologia* (from ὕδωρ, water, φυτόν, a plant, and γράφειν, to write, or λόγος, understanding). The botany of the *Hydrophyta.* [L, 41.]

HYDROPHYTON, n. Hid(hu^{6}d)-ro^{2}f'i^{2}t(u^{6}t)-o^{2}n. From ὕδωρ, water, and φυτόν, a plant. The common basis of the trophosome by which its zooids are connected into a single colony. [L, 193.]

HYDROPIC, adj. Hid-ro^{2}p'i^{2}k. Gr., ὑδρωπικός. Lat., *hydropicus.* See DROPSICAL.

HYDROPICA (Lat.), n. f. sing. and n. pl. Hid(hu^{6}d)-ro^{2}p(rop)'i^{2}k-a^3. 1. (Sing.) the *Menyanthes trifoliata.* [B, 180 (*a*, 24).] 2. (Pl.) diuretic medicines. [L, 135 (*a*, 39).]

HYDROPICAL, adj. Hid-ro^{2}p'i^2-k'l. See DROPSICAL.

HYDROPICUS (Lat.), adj. Hid(hu^{6}d)-ro^{2}p(rop)'i^{2}k-u^{3}s(u^{4}s). Gr., ὑδρωπικός (from ὕδρωψ, dropsy). Dropsical; as a n., dropsy.

HYDROPIODES (Lat.), adj. Hid(hu^{6}d)-rop-i^2-od'ez(as). Gr., ὑδρωπιώδης (from ὕδρωψ, dropsy, and εἶδος, resemblance). Fr., *hydropieux.* Dropsical. [L, 50 (*a*, 14).]

HYDROPIPER (Lat.), n. n. Hid(hu^{6}d)-ro^{2}p'i^{2}p-e^{2}r. Gen., *-pipe'ris.* Gr., ὑδροπέπερι (from ὕδωρ, water, and πέπερι, the pepper-tree. The *Polygonum h.* and *Elatine h.* [B, 19 (*a*, 24).]—**Herba hydropiperis.** The herb of *Polygonum h.* [B, 180 (*a*, 24).]

HYDROPIPERIC ACID, n. Hid-ro-pi^2-pe^{2}r'i^{2}k. Fr., *acide hydropipérique.* A crystalline acid, $C_{12}H_{12}O_4$, obtained by treating piperic acid with caustic potash, and afterward with sodium amalgam, and adding hydrochloric acid. Two isomeric forms are known: one, $CH_2\langle^{O}_{O}\rangle C_6H_3.CH_2CH:CH.CH_2.CO.OH$, obtained when enough hydrochloric acid is added to keep the solution faintly alkaline, and occurring in large crystals, easily soluble in alcohol, slightly soluble in water, and melting at 78° C.; the other, $CH_2\langle^{O}_{O}\rangle C_6H_3.$-$CH_2.CH_2.CH:CH.CO.OH$, obtained when the solution is kept strongly alkaline, and crystallizing from alcohol in needles which melt at 131° C. [B, 3 (*a*, 38).]

HYDROPISCH (Ger.), adj. Hu^{6}d-rop'i^{2}sh. See DROPSICAL.

HYDROPISIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-pi^{2}s'i^2-a^3. Fr., *hydropisie.* See DROPSY.

HYDROPISIE (Fr., Ger.), n. E-dro-pe-ze, hu^{6}d-ro^3-pe-ze'. See DROPSY and HYDROPS.—**H. aiguë** (Fr.). See *Acute* DROPSY.—**H. articulaire** (Fr.). See ARTHRŒDEMA and HYDRARTHROSIS.—**H. brightique** (Fr.). Dropsy due to Bright's disease. [Jaccoud (A, 329).]—**H. de la chambre antérieure** (Fr.). See CERATECTASIA and KERATOGLOBUS.—**H. de la poitrine** (Fr.). See HYDROTHORAX.—**H. de la tête** (Fr.). See HYDROCEPHALUS.—**H. der Sehnervenscheide** (Ger.). See DROPSY *of the optic sheath.*—**H. der vorderen Kammer** (Ger.). See KERATOGLOBUS.—**H. des villosités choriales** (Fr.). See DROPSY *of the chorionic villi.*—**H. du bas ventre** (Fr.), **H. du péritoine** (Fr.). See ASCITES.—**H. du sac lacrymale** (Fr.). See HYDROPS *sacci lacrimalis.*—**H. du vagin du nerf optique** (Fr.). See DROPSY *of the optic sheath.*—**H. névrovasculaire** (Fr.). Dropsy resulting from deranged action of the vaso-motor nerves [B. Féris, "Gaz. hebdom. de méd. et de chir.," June 8, 1883, p. 383.]—**H. sous-choroïdienne** (Fr.). See *Subchorioid* DROPSY.

HYDROPISINE (Fr.), n. E-dro-pe-sen. See METALBUMIN.

HYDROPISIS (Lat.), **HYDROPISMUS** (Lat.), n's f. and m. Hid(hu^{6}d)-ro^{2}p'i^2-si^{2}s, -ro^{2}p-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gen., *-is'eos (-op'isis), -is'mi.* See DROPSY and HYDROPS.

HYDROPLASTÊMIE [Piorry] (Fr.), n. E-dro-pla^{3}s-te^2-me. From ὕδωρ, water, πλαστός, molded, and αἷμα, blood. The presence of fibrin in suspension in the blood plasma. [A, 250 (*a*, 21).]

HYDROPLATINIC ACID, n. Hid-ro-pla^{2}t-i^{2}n'i^{2}k. Fr., *acide hydroplatinique.* An acid compounded of hydrogen and platinum. [B, 38 (*a*, 38).]

HYDROPLATINOCYANIC ACID, n. Hid''ro-pla^{2}t'''i^{2}n-o-si-a^{2}n'i^{2}k. Fr., *acide hydroplatinocyanique.* Ger., *Platincyanwasserstoffsäure.* A hydrogen acid, $H_2PtC_4N_4$, forming golden acicular crystals, or, with five molecules of water of crystallization, vermilion-hued crystals; the source of the platinocyanides. [B.]

HYDROPLEURIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-plu^2'ri^2-a^3. From ὕδωρ, water, and πλευρά, the side. Fr., *hydropleurie* [Piorry]. See HYDROTHORAX.

HYDROPLEURITIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-plu^2-ri(re)'ti^{2}s. Gen., *-it'idos (-idis).* From ὕδωρ, water, and πλευρά, a rib (see also *-itis**). Fr., *hydropleurite* [Piorry]. Ger., *entzündliche Brustfellwassersucht.* Pleurisy with effusion. [L, 50 (*a*, 14), 82.]

HYDROPNEUMATIC, adj. Hid-ro-nu^2-ma^{2}t'i^{2}k. Lat., *hydropneumaticus* (from ὕδωρ, water, and πνεῦμα, air). Fr., *hydropneumatique.* Pertaining to water and gas; employed in the collection of gases (said of a vessel of water or other fluid used in chemical experiments). [L, 41, 50, 56 (*a*, 14).]

HYDROPNEUMATOCELE (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-nu^2(pnu^2)-ma^{2}t(ma^{3}t)-o(o^3)-se(ka)'le(la); in Eng., hid-ro-nu^2'ma^{2}t-o-sel. Gen., *-cel'es.* From ὕδωρ, water, πνεῦμα, air, and κήλη, a tumor. See HYDROPHYSOCELE.

HYDROPNEUMATOMPHALOCELE (Lat.), n. f. Hid-(hu^{6}d)-ro(ro^3)-nu^2(pnu^2)-ma^{2}t(ma^{3}t)-o^{2}m-fa^{2}l(fa^{3}l)-o(o^3)-se(ka)'le(la); in Eng., hid-ro-nu^2-ma^{2}t-o^{2}m'fa^{2}l-o-sel. Gen., *-cel'es.* From ὕδωρ, water, πνεῦμα, air, ὀμφαλός, the navel, and κήλη, a tumor. Ger., *Wasserluftnabelbruch.* An umbilical hernia containing serum and gas. [E.]

HYDROPNEUMATOSIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-nu^2-(pnu^2)-ma^{2}t(ma^{3}t)-o'si^{2}s. Gen., *-os'eos (-os'is).* From ὕδωρ, water, and πνεῦμα, air. 1. Any morbid collection of water and gas. 2. Pulmonary œdema. [A, 322.]

HYDROPNEUMON (Lat.), **HYDROPNEUMONIA** (Lat.), n's m. and f. Hid(hu^{6}d)-ro(ro^3)-nu^2(pnu^2)'mo^{2}n(mon), hid(hu^{6}d)-ro(ro^3)-nu^2(pnu^2)-mon(mo^{2}n)'i^2-a^3. Gen., *-pneum'onos (-is), -mon'iæ.* From ὕδωρ, water, and πνεύμων, the lung. Fr., *hydropneumonie.* Ger., *wässerige Lungenentzündung.* Pulmonary œdema. [L, 41, 50 (*a*, 14).]

HYDROPNEUMONYPOSTASIS (Lat.), n. f. Hid(hu^{6}d)-ro-(ro^{3})-nu^{2}(pnu^{2})-mo^{2}n-i^{2}p(u^{6}p)-o^{2}st'a^{2}-si^{2}s. Gen., *-as'eos* (*-post'asis*). From ὕδωρ, water, πνεύμων, the lung, and ὑπόστασις, hypostasis. Fr., *hydropneumonypostase.* Ger., *Lungenwassersenkung.* Œdematous hypostatic pneumonia. [L, 50 (*a*, 14).]

HYDROPNEUMOPERICARDIA (Lat.), **HYDROPNEUMOPERICARDIUM** (Lat.), n's f. and n. Hid(hu^{6}d)-ro(ro^{3})-nu^{2}-(pnu^{2})-mo(mo^{2})-pe^{2}r-i^{2}-ka^{3}rd'i^{2}-a^{3}, -u^{3}m(u^{4}m). From ὕδωρ, water, πνεῦμα, air, περί, around, and καρδία, the heart. Fr., *hydropneumopéricarde.* An accumulation of fluid and gas in the pericardium. [L, 41 (*a*, 14).]

HYDROPNEUMORRHÉE [Piorry] (Fr.), n. E-dro-nu^{5}-morra. From ὕδωρ, water, πνεύμων, the lung, and ῥοία, a flowing. A watery discharge from the lungs. [A, 250 (*a*, 21).]

HYDROPNEUMOSARCA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^{3})-nu^{2}-(pnu^{2})-mo(mo^{2})-sa^{3}rk'a^{3}. From ὕδωρ, water, πνεῦμα, air, and σάρξ, flesh. Fr., *hydropnumosarque.* An abscess containing water, air, and fleshy detritus. [A, 325.]

HYDROPNEUMOTHORAX (Lat.), n. m. Hid(hu^{6}d)-ro(ro^{3})-nu^{2}(pnu^{2})-mo(mo^{2})-thor'a^{2}x(a^{2}x). Gen., *-thor'acos* (*-acis*). From ὕδωρ, water, πνεῦμα, air, and θώραξ, the chest. Fr., *h.* A collection of air and fluid in the pleural cavity. [D.]—**Closed h.** A condition in which there is a combination of serous effusion and air in the pleural cavity without any opening into it, either external or internal. [*a*, 40.]—**Fistulous h.** A h. having a larger or smaller orifice between the pleural cavity and the lung itself. [*a*, 40.]

HYDROPŒIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^{3})-pe'(po^{2}'e^{2})-i^{2}-a^{3}. From ὕδωρ, water, and ποιεῖν, to make. Fr., *hydropéie.* Ger., *Wassermachen.* 1. The formation of water. 2. The manufacture of mineral waters. [L, 50 (*a*, 14).]

HYDROPOID, adj. Hid'ro-poid. Gr., ὑδροποιείδης. Lat., *hydropoides* (from ὕδρωψ, dropsy, and εἶδος, resemblance). Fr., *hydropoïde.* Resembling dropsy, dropsical. [*a*, 17.]

HYDROPOIESIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^{3})-poi-e(a)'si^{2}s. Gen., *-es'eos* (*-es'is*). From ὕδωρ, water, and ποίησις, a making. See Hydropœia.

HYDROPORES, n. pl. Hid'ro-porz. From ὕδωρ, water, and πόρος, a passage. Of Barrande, organs which are thought to be respiratory in certain of the *Cystidea.* ["Nature," July 18, 1889, p. 26 (*a*, 39).]

HYDROPOSIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^{3})-po(po^{2})'si^{2}-a^{3}. Gr., ὑδροποσία (from ὕδωρ, water, and πόσις, a drinking). Ger., *Wassertrinken.* The drinking of water. [L, 50 (*a*, 14).]

HYDROPOTA (Lat.), **HYDROPOTES** (Lat.), n's m. Hid-(hu^{6}d)-ro^{2}p'o^{2}t-a^{3}, -ez(as). Gr., ὑδροπότης (from ὕδωρ, water, and πότης, a drinker). A water-drinker. [L, 50 (*a*, 14).]

HYDROPREHNITIC ACID, n. Hid-ro-pre-nit'ri^{2}k. Ger., *Hydroprehnitinsäure.* A tetrabasic acid, $C_6H_6(CO.OH)_4$, obtained by treating an aqueous solution of prehnitic acid with sodium amalgam ; a gummr mass. [B, 3, 4 (*a*, 38).]

HYDROPS (Lat.), n. m. Hid(hu^{6}d)'ro^{2}ps(rops). Gen., *-rop'os* (*-is*). Gr., ὕδρωψ. 1. See Dropsy. 2. (Obs.) any watery discharge. [Aristotle (A, 311).] 3. (Obs.) a dropsical person. [Hippocrates (A, 311).] 4. (Obs.) diabetes. [Galen (A, 311).] 5. In Young's nosology, a genus of the *Paraphymata.* [L, 290.]—**Entzündlicher H.** (Ger.). Inflammatory dropsy. [D, 4.]—**Gelenkh'** (Ger.). See Hydrarthrosis.—**Höhlenh'** (Ger.). Dropsy of a cavity of the body. [*a*, 40.]—**H. abdominis.** Ascites. [D, 18.]—**H. abdominis aerius.** See Tympanites.—**H. abdominis saccatus.** See *H. ascites saccatus.*—**H. acutus.** Acute serous synovitis. [E.]—**H. adiposus.** 1. Dropsy in which the transuded fluid contains fatty elements derived from fatty degeneration of cell-walls. [D, 4.] 2. See *H. chylosus.*—**H. ad matulam.** An old name for diabetes mellitus. [D, 74.]—**H. anasarca.** See Anasarca.—**H. anasarca acutus.** The sudden effusion of serum into the superficial cellular tissue of the body. [*a*, 40.]—**H. antri (Highmori).** See Dropsy *of the antrum.*—**H. arachnoideæ.** See *Arachnoid* dropsy.—**H. articularis chronicus.** See Hydrarthrosis.—**H. articuli.** See Arthrœdema and Hydrarthrosis.—**H. articuli (seu articulorum) acutus.** The effusion of serum in acute synovitis. [*a*, 40.]—**H. articuli** (seu **articulorum) chronicus.** See Hydrarthrosis.—**H. articuli** (seu **articulorum) intermittens.** A painful swelling of a joint, intermittent in character, but without regular periodicity, the attacks coming on with lightning-like suddenness, and subsiding gradually. It has been regarded as a vaso-motor neurosis. [Pierson, "Dtsch. med. Woch.," 1881, No. 13 ; "Arch. f. Kinderheilk.," iii, 7 to 8, 1882, p. 330.]—**H. articuli** (seu **articulorum) tuberculosus** [König]. A primary tuberculosis of the synovial membrane with serous effusion. [A, 520 (*a*, 29).]—**H. ascites.** See Ascites.—**H. ascites adiposus.** H. adiposus of the peritonæum. [D, 18.]—**H. ascites chylosus.** H. chylosus of the peritonæum. [D, 18.]—**H. ascites diffusus.** Ascites. [D, 18.]—**H. ascites saccatus.** Ascites in which the effusion is encapsulated by peritoneal adhesions. [D, 18.]—**H. asthmaticus** [Roger]. See Beri-beri.—**H. bronchialis.** A collection of water in the bronchial passages during narcotism and disease. It is usually regarded as a sign of the near approach of death, but is not necessarily fatal. Its symptoms are loud watery râles, obstructed breathing, and coldness beginning at the feet and extending over the whole body. [*a*, 40.]—**H. bulla** [Cullen]. A serous vesicle formed upon the cutaneous or muco-cutaneous surface, commonly called a fever blister. [*a*, 40.]—**H. bursæ mucosæ.** See *Synovial* bursa.—**H. bursæ præpatellaris.** See Hygroma *præpatellare.*—**H. cachecticus, H. cacotrophicus.** See *Cachectic* dropsy.—**H. calidus.** See *H. irritativus.*—**H. cameræ anterioris.** Fr., *hydropisie de la chambre antérieure.* Ger., *Hydropisie der vorderen Kammer.* An old term for keratoglobus. [F.]—**H. capitis.** See Hydrocephalus.—**H. cardiacus.** See Hydropericardium and *Cardiac* dropsy.—**H. cavitatis columnæ vertebralis.** A hydrorrhachis in which there is no deficiency in the vertebral laminæ. [*a*, 40.]—**H. cellularis.** See Anasarca (1st def.).—**H. cellularis artuum.** General œdema. [*a*, 40.]—**H. cellularis totius corporis, H. cellulosus.** See Anascara (1st def.).—**H. cerebri.** See Hydrocephalus.—**H. chorioideæ externus.** See Sublatio *chorioideæ.*—**H. chorioideæ internus.** See Sublatio *retinæ.*—**H. chylosus.** Dropsy in which the transuded fluid is of a chylous appearance and character, the contained chyle being the result of pressure upon or rupture of chylophorous ducts, especially the thoracic duct. [D, 4.]—**H. cutaneus.** See Anascara (1st def.).—**H. cysticus.** See *Encysted* dropsy.—**H. cystidis felleæ, H. der Gallenblase** (Ger.). See Dropsy *of the gall-bladder.*—**H. ductuum biliarium saccatus.** Encysted dropsy of the bile ducts. [Von Schueppel (*a*, 17).]—**H. e** (seu **ex**) **vacuo.** See Œdema *ex vacuo.*—**H. fibrinosus.** See *Fibrinous* dropsy.—**H. flatulentus.** See Tympanites.—**H. folliculi** (seu **folliculorum) Graafii.** The effusion of serum into the remains of an old Graafian follicle. [*a*, 40.]—**H. frigidus.** See *Passive* dropsy.—**H. glottidis.** See Œdema *of the glottis.*—**H. gravitativus, H. gravitivus.** A form of œdema of the lower extremities especially apt to appear in convalescence from acute diseases of long duration ; due to innutrition, or anæmia, especially if aided by gravitation (*e. g.*, in sitting and standing). [D, 3.]—**H. hepaticus.** See *Hepatic* dropsy.—**H. hypodermaticus.** See Anasarca.—**H. hystericus.** 1. An œdema of certain portions of the body, notably the eyes and vulva, consequent upon the non-appearance of the menstrual flow at its proper period. 2. In hysterical cases, œdema occurring in connection with suppressed urinary secretion. [*a*, 40.]—**H. incarceratus.** See *Encysted* dropsy.—**H. inflammatorius.** See *Inflammatory* dropsy.—**H. intercus.** See Anascara (1st and 2d def's).—**H. irritationis calidus.** The accumulation of serum in vesicles as the result of burns. [*a*, 40.]—**H. irritativus.** An effusion of serum into the cellular tissue due to local irritation of the parts. It is rapid in development. [*a*, 40.]—**H. lacteus.** See *H. chylosus.*—**H. leucophlegmatia.** See Leucophleomasia.—**H. matellæ.** See *H. ad matulam.*—**H. mediastini.** Mediastinitis with effusion. [L.]—**H. medullæ spinalis.** See Hydrorrhachis.—**H. nervi optici.** See Dropsy *of the optic sheath.*—**H. oculi.** See Hydrophthalmia.—**H. ovarii.** See *Ovarian* cystoma.—**H. ovarii profluens.** An ovarian cyst which is connected by inflammatory adhesion to the fimbriated extremity of the Falloppian tube through which the serum of the cyst is discharged through the vagina. [*a*, 40.]—**H. palpebræ.** See Blepharœdema.—**H. paralyticus.** Œdema of the paralyzed half of the body in hemiplegia. [D, 3.]—**H. pectoris.** See Hydrothorax.—**H. pericardii.** See Hydropericardium.—**H. periostei.** An accumulation of serum beneath the periosteum. [L, 135 (*a*, 40).]—**H. peritonæi.** See Ascites.—**H. placentæ.** A serous infiltration of the whole placenta, observed in cases when a dead fœtus has been retained for some time. [*a*, 40.]—**H. pleuræ.** See Hydrothorax.—**H. processus vermiformis.** An accumulation of mucus in the appendix vermiformis, its cæcal orifice being almost or altogether closed. [A, 319 (*a*, 40).]—**H. pulmonis** (seu **pulmonum**). See Hydrothorax.—**H. pulmonis** (seu **pulmonum) cellulosus.** See *Pulmonary* œdema.—**H. pulmonum cysticus** (seu **saccatus**). Encysted hydrothorax.—**H. renalis, H. renum.** See Hydronephrosis.—**H. saccatus.** See *Encysted* dropsy.—**H. saccatus pectoris.** See *H. pulmonum cysticus.*—**H. sacci lacrimalis.** Fr., *hydropisie du sac lacrymal.* Ger., *Thränensackwassersucht.* See Dropsy *of the lacrymal sac.*—**H. scarlatinosus.** See *Scarlatinal* anasarca.—**H. scroti.** See Hydrocele.—**H. serosus.** See *H. frigidus.*—**H. siccus.** See Emphysema.—**H. spasticus.** See *H. hystericus.*—**H. spinæ (vertebralis).** See Hydrorrhachis.—**H. spurius.** See *False* dropsy.—**H. subchorioidalis.** See *Subchorioid* dropsy.—**H. subcutaneus.** See Anasarca (1st def.).—**H. subretinalis.** A collection of serous fluid between the retina and chorioid. [*a*, 29.]—**H. subscleroticalis.** See *Subchorioid* dropsy.—**H. telæ cellulosæ.** See Anasarca (1st def.).—**H. testiculi, H. testiculorum.** See Hydrocele.—**H. thoracis.** See Hydrothorax.—**H. torpidus.** See *H. frigidus.*—**H. tubæ.** See Hydrosalpinx.—**H. tubæ cysticus.** An encysted hydrosalpinx. [*a*, 40.]—**H. tubæ Falloppii.** See Hydrosalpinx.—**H. tubæ Falloppii apertæ.** See *H. tubæ profluens.*—**H. tubæ Falloppii occlusæ.** See *H. tubæ cysticus.*—**H. tubæ profluens.** An accumulation of serum in a Falloppian tube the uterine orifice of which is not closed and thus allows a more or less constant discharge of the serous fluid through the vagina. [*a*, 40.]—**H. tubæ saccatus.** Of Rokitansky, a hydrosalpinx in which the tube is flexed or constricted at several points so as to form separate collections of fluid. [*a*, 40.]—**H. tubalis, H. tubarum.** See Hydrosalpinx.—**H. tuberculosus.** An accumulation of serous fluid in a joint in consequence of tubercular disease. [Schüller (A. 319 [*a*, 21]).]—**H. tympani.** See Hydromyrinx.—**H. tympanites.** See Tympanites.—**H. umbilicalis.** See Hydromphalon.—**H. universalis.** See Anasarca (1st def.) and *General* dropsy (1st def.).—**H. uteri.** See Hydrometra.—**H. uteri vesicularis.** See *Vesicular* mole.—**H. vaginæ nervi optici.** Fr., *hydropisie du vagin du nerf optique.* Ger., *Hydropisie der Sehnervenscheide.* See Dropsy *of the optic sheath.*—**H. velamentorum herniarum.** An accumulation of serous fluid in a hernial sac. [*a*, 40.]—**H. ventriculi** (seu **ventriculorum) cerebri.** See *Internal* hydrocephalus.—**H. ventriculorum chronicus.** See *Chronic* hydrocephalus.—**H. verus.** See Anasarca (1st def.).—**H. vesicæ felleæ.** See Dropsy *of the gall-bladder.*

HYDROPSIA (Lat.), n. f. Hid(hu^{6}d)-ro^{2}ps(rops)'i^{2}-a^{3}. From ὕδρωψ, dropsy. See Dropsy.—**H. articularis.** See Arthrœdema and Hydrarthrosis.—**H. bursæ præpatellaris.** See Hygroma *præpatellare.*—**H. e** (seu **ex**) **vacuo.** See Œdema *ex vacuo.*—**H. interca.** See Anasarca (1st def.).—**H. renalis.** See Hydronephrectasia.—**H. spuria.** See *False* dropsy.—**H. tendovaginalis.** See Tendovaginitis *serosa.*

HYDROPSY, n. Hid'ro^{2}p-si^{2}. Lat., *hydropsis* (from ὕδρωψ, dropsy). See Dropsy.

HYDROPTISANA (Lat.), n. f. Hid(hu6d)-ro2p-ti2s'a2n(a3n)-a3. From ὕδωρ, water, and πτισάνη, peeled barley. Fr., *hydroptisane*. See HYDROCRITHE.

HYDROPYOPNEUMOTHORAX (Lat.), n. m. Hid(hu6d)-ro(ro3)-pi(pu6)-o(o3)-nu2-mo(mo3)-thor'a2x(a3x). Gen., *-thor'acos* (*-acis*). From ὕδωρ, water, πύον, pus, πνεῦμα, air, and θώραξ, the chest. A disease in which inflammation or injury of the pleura produces first a hydrothorax; the absorption or removal of the serum is followed by an escape of air from the lung into the pleural cavity, and this in turn is followed by a collection of pus in the cavity, more or less of which may be discharged through the lung by expectoration. [α, 40.]

HYDROPYOSALPINX (Lat.), n. f. Hid(hu6d)-ro(ro3)-pi(pu6)-o(o3)-sa2l(sa3l)'pi2n2x. Gen., *-salpin'gos* (*-is*). From ὕδωρ, water, πύον, pus, and σάλπιγξ, a trumpet. A collection of watery and purulent fluid in the oviduct.

HYDROPYRETOS (Lat.), n. m. Hid(hu6d)-ro(ro3)-pir(pu6r)'-e2t-o2s. Gr., ὑδροπύρετος (from ὕδωρ, water, and πυρετός, burning heat). See *Sweating* FEVER.

HYDROPYROCINCHONIC ACID, n. Hid-ro-pi-ro-si2n2-ko2n'i2k. A triatomic, crystalline acid, $C_{10}H_{18}O_7$, prepared by the action of sodium amalgam on pyrocinchonic acid. [B, 2.]

HYDROPYROMELLITIC ACID, n. Hid-ro-pi-ro-me2l-i2t'i2k. Fr., *acide hydropyromellitique*. A tetrabasic acid, $C_{10}H_{10}O_8 = C_6H_6(CO.OH)_4$. Two isomeric forms are known, one amorphous, the other crystallizing in needles with 2 molecules of water which are lost at 120° C., and melting at about 200° C. [B, 3, 4 (α, 38).]

HYDROQUADRISULPHATE, n. Hid-ro-qua4d-ri2-su3l'fat. Fr., *hydroquadrisulfate*. A hydrosulphate containing three times as much sulphur as hydrogen. [L, 41 (α, 14).]

HYDROQUINIDINE, n. Hid-ro-kwi2n'i2d-en. Fr., *h.* Ger., *Hydrochinidin*. An alkaloid, $C_{20}H_{26}N_2O_2 + 2\frac{1}{2}H_2O$, obtained from quinidine by oxidation with permanganate of potassium; probably identical with hydroconchinine. It is easily soluble in hot alcohol and in chloroform, slightly soluble in ether, and melts at 167° C. [B, 81 (α, 38); Forst and Böhringer, "Berichte d. dtsch. chem. Gesellsch.," xx, 1656, cited in "Drugg. Circ. and Chem. Gaz.," Dec., 1882, p. 181.]

HYDROQUININE, n. Hid-ro-kwi2n'en. A cinchona alkaloid, $C_{20}H_{26}N_2O_2$, easily soluble in alcohol and ether, and melting at 168° C. Dr. Seifert found it an antipyretic superior to salicylic acid and kairine, reducing the pulse and temperature with abundant transpiration, without disagreeable effect by continued use. [B, 81 (α, 38); "Proc. of the Am. Pharm. Assoc.," xxx, xxxiv (α, 14); Hesse, "Ber. d. dtsch chem. Gesellsch.," xv, p. 854; "Pharm. Jour. and Trans.," May 6, 1882; "Am. Jour. of Pharm.," July, 1882, p. 361.]

HYDROQUINONE, n. Hid-ro-kwi2n'on. Fr., *h.* Ger., *Hydrochinon*. It., *idrochinone*. Syn.: *hydrochinone*, *hydrokinone*. A substance having the composition of quinone with hydrogen added, $C_6H_4.O_2H_2$, and obtained by the action of nascent hydrogen or of reducing agents on that body. It may also be obtained by the oxidation of quinic acid, and by decomposition of arbutin. It forms colorless laminar and prismatic crystals of sweetish taste, which melt at 169° C. In chemical composition h. is para-dioxybenzene; *i. e.*, benzene in which two hydrogen molecules at opposite points of the closed carbon chain are replaced by hydroxyl = $C_6(H,OH,H,H,OH,H,)$. It is isomeric with resorcin and pyrocatechin. It acts rapidly in typhoid fever, acute rheumatism, and erysipelas, as an antiseptic and antiferment. It lowers both the pulse and temperature and acts on the respiration and the arterial pressure. ["Proc. of the Am. Pharm. Assoc.," xxxvii (α, 14); B, 4, 9, 93, 270 (α, 38).]—**H.-sulphuric acid.** Ger., *Hydrochinonschwefelsäure*. The form under which arbutin is excreted in the urine. [B.]

HYDRORCHIS (Lat.), n. m. Hid(hu6d)-ro2r'ki2s(ch2i2s). Gen., *-ror'chios* (*-ror'chis*), *-ror'cheos* (*-is*). From ὕδωρ, water, and ὄρχις, the testicle. Fr., *hydrorchite*. Ger., *Hodenwassersucht*. See HYDROCELE.

HYDRO-RENAL adj. Hi2d''ro-re'n'l. From ὕδωρ, water, and *ren*, the kidney. Pertaining to dropsy of the kidney.

HYDROROSATUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-ro(ro3)-sat(sa3t)'u3m(u4m). Gr., ὑδροῤῥόσατον. Fr., *hydrorosat*. 1. Rose-water. [Oribasius (A, 311).] 2. Of Paulus Ægineta, a drink made from honey, rose-leaves, and water. [L, 50, 84 (α, 14).]

HYDRORRHACHIA (Lat.), n. f. Hid(hu6d)-ro2r-rak(ra3ch2)'-i2-a3. See HYDRORRHACHIS.

HYDRORRHACHIOCENTESIS (Lat.), n. f. Hid(hu6d)-ro2r-ra2k(ra3ch2)-i2-o(o3)-se2n(ke2n)-te(ta)'si2s. From ὕδωρ, water, ῥάχις, the spine, and κέντησις, a pricking. Gen., *-es'eos* (*-es'is*). Fr., *hydrorrhachiocentèse*. Ger., *Anstechen der Rückgratswassersucht*. The operation of acupuncture for spina bifida. [L, 50 (α, 14).]

HYDRORRHACHIS (Lat.), n. f. Hid(hu6d)-ro2r'ra2k(ra3ch2)-i2s. Gen., *-orrhach'eos*, *-orrhach'ios* (*-or'rhachis*). From ὕδωρ, water, and ῥάχις, the spine. Fr., *hydrorhachis*. Ger., *Rückgratswassersucht*, *Hydrorrhachie*. It., *idrorrachide*, *idrorrachite*. Sp., *hidrorraquis*. A dropsical condition of the spinal cord or its membranes.—**Congenital h.** Lat., *h. congenita*. See SPINA *bifida*.—**External h.** Lat., *h. externa*. An exaggeration of h. interna in which the canal of the spinal cord communicates freely with the cavity of the spinal arachnoid. This condition frequently occurs in spina bifida. [D, 35.]—**H. dehiscens.** See SPINA *bifida*.—**H. externa anterior.** That form of anterior spina bifida in which the spinal cord and nerves enter the sac and blend with its walls. [Humphry, "Lancet," Mar. 28, 1885, p. 557.]—**H. externa posterior.** That form of posterior spina bifida in which the spinal cord does not pass within the sac, and is not attached to it. [Humphry, *l. c.*]—**H. in columnis.** See HYDROPS *cavitatis columnæ vertebralis*.—**H. interna.** Dropsy of the central canal of the spinal cord.

HYDRORRHACHITIS (Lat.), n. f. Hid(hu6d)-ro2r-ra2k-(ra3ch2)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ῥάχις, the spine (see also *-itis**). Of Franck, an inflammatory hydrorrhachis. [L, 50 (α, 14).]

HYDRORRHÉE (Fr.), n. E-dror-ra. See HYDRORRHŒA.—**H. des femmes enceintes.** See HYDRORRHŒA *gravidarum*.

HYDRORRHIZA (Lat.), n. f. Hid(hu6d)-ro2r-riz(rez)-a3. From ὕδωρ, water, and ῥίζα, a root. The proximal end of the hydrophyton, by which the colony fixes itself to other bodies. [L, 193 (α, 39).]

HYDRORRHODEORRHETIN, n. Hid-dro2r-rod''e2-o2r-ret'-i2n. A light-brown, amorphous substance, $C_{42}H_{52}O_{21}$, obtained by combining *rhodeorrhetin* (from jalap resin) with basic oxides, whereby it absorbs 1 equivalent of H_2O. It is soluble in water, alcohol, and acetic acid, insoluble in ether, and melts above 100° C. into a yellowish liquid. [B, 48 (α, 14).]

HYDRORRHODINON (Lat.), **HYDRORRHODINUM** (Lat.), n's n. Hid(hu6d)-ro2r-rod(ro2d)'i2n-o2n. -u3m(u4m). From ὕδωρ, water, and ῥόδον, a rose. Fr., *hydrorrhodinon*. An ancient mixture of water and oil of roses, used as an emetic in poisoning. [L, 41 (α, 14).]

HYDRORRHŒA (Lat.), n. f. Hid(hu6d)-ro2r-re'(ro2'e2)-a3. From ὕδωρ, water, and ῥοία, a discharge. Fr., *hydrorrhée* [Piorry]. Ger., *Wasserfluss*, *Hydrorrhöe*. It., *idrorrea*. Sp., *hidrorrea*. A watery discharge. [L, 30, 44, 50, 95 (α, 14).]—**H. gravidarum, H. puerperarum, H. uteri gravidi.** Fr., *hydrorrhée des femmes enceintes*, *métrorrhée*, *fausses eaux*. Ger., *Hydrorrhöe*, *Schwangerer*. A discharge of serous fluid from the gravid uterus. The source of the discharge is disputed. Authorities sustain the following theories: 1st, that it is discharged from the cavity between the decidua vera and the decidua reflexa, due to hypertrophied decidual glands; 2d, that it comes from a rent in the amniotic sac so high up as to allow only a small portion of its fluid to escape at once; 3d, that an excessive secretion of the glands of the cervix produces it. No successful treatment has been devised other than those means directed to prevent miscarriage. [α, 40.]—**Non-gravid h.** Ger., *Hydrorrhöe*, *Nichtschwangerer*. Of J. Oliver, a copious watery discharge from the non-gravid uterus in sudden gushes. ["Brit. Med. Jour.," June 21, 1884, p. 1205.]

HYDRORRHOIC, adj. Hid-ro2r-ro'i2k. Lat., *hidrorrhoicus* (from ὕδωρ, water, and ῥοία, a discharge). Fr., *hidrorrhoïque*. Pertaining to hydrorrhœa. [L, 116.]

HYDRORTHOPNŒA (Lat.), n. f. Hid(hu6d)-ro2r-thop-ne'-(pno2'e2)-a3. From ὕδωρ, water, and ὀρθόπνοια, upright breathing. Fr., *hydrorthopnée*. Ger., *Schwerathmen von Brustwassersucht*. Orthopnœa occuring in hydrothorax. [L, 50 (α, 14).]

HYDRORUBIANIC ACID, n. Hid-ro-ru2b-i2-a2n'i2k. Ger., *Hydrorubiansäure*. See THIOOXAMIDE.

HYDROSACCHARUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-sa2k-(sa3k)'a2r(a3r)-u3m(u4m). From ὕδωρ, water, and σάκχαρον, sugar. Of Forestus, sweetened water, syrup. [L, 50, 84 (α, 14).]

HYDROSADENITIS (Lat.), n. f. Hid(hu6d)-ros-a2d(a3d)-e2n-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὕδωρ, water, and ἀδήν, a gland (see also *-itis**). See HYDRADENITIS.

HYDROSALICYLAMIDE, n. Hid-ro-sa2l-i2-si2l'a2m-i2d(id). A substance, $C_{21}H_{18}N_2O_3$, produced by the action of ammonia on salicylic aldehyde, occurring in prismatic crystals, insoluble in water and in cold alcohol, but soluble in ether and in boiling alcohol, and melting at 300° C. [B, 38, 93 (α, 38); B, 46 (α, 39).]

HYDROSALPINX (Lat.), n. f. Hid(hu6d)-ro(ro3)-sa2l(sa3l)'-pi2n2x. Gen., *-ping'os* (*-is*). From ὕδωρ, water, and σάλπιγξ, a trumpet. Fr., *hydrosalpingite*. Ger., *Eileiterwassersucht*. A collection of watery fluid in the oviduct, causing distention.

HYDROSANTONIC ACID, n. Hid-ro-sa2n-to2n'i2k. Fr., *acide hydrosantonique*. A substance, $C_{15}H_{22}O_4$, obtained by the action of nascent hydrogen on santonic acid. It occurs in colorless hexagonal crystals fusible at 170°C. [B, 93 (α, 14).]

HYDROSARCA (Lat.), **HYDROSARCIDIUM** (Lat.), n's f. and n. Hid(hu6d)-ro(ro3)-sa3r'ka3, -sa2r-si2d(ki2d)'i2-u3m(u4m). From ὕδωρ, water, and σάρξ, flesh. Fr., *hydrosarque*. 1. See ANASARCA (1st def.). 2. Of M. A. Severin, a tumor containing water and fleshy tissue. [L, 50.]

HYDROSARCOCELE (Lat.), n. f. Hid(hu6d)-ro(ro3)-sa3rk-o-(o3)-se(ka)'le(la); in Eng., hid-ro-sa3rk'o-sel. Gen., *-cel'es*. From ὕδωρ, water, σάρξ, flesh, and κήλη, a tumor. Fr., *hydrosarcocèle*. Ger., *Fleischwasserbruch*. It., *idrosarcocele*. Sp., *hidrosarcocele*. Sarcocele complicated with hydrocele. [L, 30, 41, 44, 50 (α, 14).]

HYDROSAURIA (Lat.), n. n. pl. Hid(hu6d)-ro(ro3)-sa4'(sa3'u4)-ri2-a3. From ὕδωρ, water, and σαῦρα, a lizard. A subclass of saurian reptiles, comprising animals of considerable size, with teeth wedged into the jaws, a leathery skin, and swimming fins or powerful feet the digits of which are connected by webs. The crocodile is a member of this group. [L, 353 (α, 39).]

HYDROSCHEOCELE (Lat), **HYDROSCHEON** (Lat.), **HYDROSCHEUM** (Lat.), n's f., n., and n. Hid(hu6d)-ro2s-ke2(ch2e2)-o(o3)-se(ka)'le(la); in Eng., hid-ro2s'ke2-o-sel; hid(hu6d)-ro2s'ke2-(ch2e2)-o2n, -u3m(u4m). From ὕδωρ, water, ὄσχεον, the scrotum, and κήλη, a tumor. Fr., *hydroschéocèle*, *hydroschéonie*. Ger., *Hodensackswasserbruch*. A scrotal hernia containing watery fluid. [A, 322.]

HYDROSCHONCUS (Lat.), n. m. Hid(hu6d)-ro2s-ko2n2-(ch2o2n2)'ku3s(ku4s). From ὕδωρ, water, ὄσχη, the scrotum, and ὄγκος, a tumor. Fr., *h.* Ger., *Wasseransammlung im Hodensack*. A collection of water in the scrotum. [L, 50 (α, 14).]

HYDROSCOPIC, adj. Hid-ro-sko2p'i2k. Gr., ὑδροσκοπικός (from ὕδωρ, water, and σκοπεῖν, to examine). Lat., *hydroscopicus*. Fr., *hydroscopique*. Pertaining to hydroscopy. [L, 50 (α, 14).]

HYDROSCOPY, n. Hid-ro^{2}s'ko-pi^2. Gr., ὑδροσκοπία (from ὕδωρ, water, and σκοπια, a lookout). Lat., *hydroscopia*. Fr., *hydroscopie*. Ger., *Wasseruntersuchung* (1st def.), *Hydromantia* (2d def.). It., *idroscopia* (1st def.). 1. Inspection of water, or hydrometry. 2. Divination from water. [L, 41, 44, 50 (*a*, 14).]

HYDROSÉLÉNIATE (Fr.), n. E-dro-sa-la-ne-a^{3}t. See SELENIDE.

HYDROSELENIC ACID, n. Hid-ro-se^{2}l-e^{2}n'i^{2}k. Fr., *acide hydrosélénique*. Ger., *Hydroselen*, *Hydroselensäure*. Hydrogen selenide or its aqueous solution. [B.]

HYDROSELINUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-sel(se^{2}l)-in-(en)'u^{3}m(u^{4}m). Gr., ὑδροσέλινον (from ὕδωρ, water, and σέλινον, parsley). 1. Of Appuleius, the marsh *Selinum*. 2. The *Apium graveolens*. [B, 114, 180 (*a*, 24).]

HYDROSEPSIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-se^{2}p(sap)'si^{2}s. Gen., *-seps'eos* (*-seps'is*). From ὕδωρ, water, and σῆψις, decay. Fr., *hydrosepsie*. Ger., *Wasserfäule*. A foul or turbid condition of water. [L, 50 (*a*, 14).]

HYDROSIDERUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-si^{2}d-e(a)'-ru^{3}m(ru^{4}m). From ὕδωρ, water, and σίδηρον, iron. Iron phosphide. [*a*, 38.]

HYDROSILICATE, n. Hid-ro-si^{2}l'i^2-kat. Fr., *h*. A hydrated silicate. [*a*, 38.]

HYDROSILICEOUS, adj. Hid-ro-si^{2}l-i^{2}sh'u^{3}s. Containing water and silica. [L, 116.]

HYDROSIN, n. Hid'ro^{2}s-i^{2}n. See BAREGINE.

HYDROSIS (Lat.), n. f. Hid(hu^{6}d)-ro'si^{2}s. Gen., *-ros'eos* (*-ros'is*). From ὕδωρ, water. See HIDROSIS.

HYDROSOMA (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-so'ma^3. Gen., *-om'atos* (*-atis*). From ὕδωρ, water, and σῶμα, the body. An entire organism or colony of a hydrozoon. [B, 28 (*a*, 27); L, 193.]

HYDROSORBIC ACID, n. Hid-ro-so^{2}rb'i^{2}k. Fr., *acide hydrosorbique*. Ger., *Hydrosorbinsäure*. *a*-propylacrylic acid, $C_6H_{10}O_2 = C_5H_9COOH = CH_3CH_2CH_2CH{:}CH.CO.OH$, a monobasic acid derived from sorbic acid by the addition of two atoms of hydrogen. It is liquid at ordinary temperature. Its density is 0·969 at 19° C., and it boils at 208° C., and does not solidify at —8° C. It is slightly soluble in water. and has an odor like that of sweat. [B, 3, 4 (*a*, 38); B, 46, 93 (*a*, 39).]

HYDROSPERMATIC, adj. Hid-ro-spu^{5}rm-a^{2}t'i^{2}k. Lat., *hydrospermaticus* (from ὕδωρ, water, and σπέρμα, seed). Fr., *hydrospermatique*. Pertaining to a watery state of the semen. [A, 322.]

HYDROSPHYGMOGRAPH, n. Hid-ro-sfi^{2}g'mo-gra^{3}f. Lat., *hydrosphygmographus*. Fr., *hydrosphygmographe*. Ger., *H*. It., *idro-sfigmografe*. Of François-Franck and Mosso, an instrument for inclosing an entire organ, or part of an entire limb. It is then filled with water, and by means of a registering apparatus the fluctuation in the volume of the inclosed organ due to the arterial diastole and systole is registered. [Baumgarten (J. 55).]

HYDROSPIRE, n. Hid'ro-spire. From ὕδωρ, water, and σπεῖρα, a spire. See HYDROPORE.

HYDROSPIROMETER, n. Hid-ro-spir-o^{2}m'e^{2}t-u^{6}r. From ὕδωρ, water, *spirare*, to breathe, and μέτρον, a measure. An instrument devised to take the place of the more expensive compressed-air spirometers. It consists of a small jar fitted with three tubes through one of which air is admitted and through another water, and through the third the patient breathes. The resistance to expiration is produced by the lifting of the column of water into a vessel on a higher level. [*a*, 40.]

HYDROSPIROYLIC ACID, n. Hid-ro-spi-ro-i^{2}l'i^{2}k. Fr., *acide hydrospiroylique*. Volatile oil of *Ulmaria*. [B. 38 (*a*, 38).]

HYDROSPONGUS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-spo^{2}n^2'gu^{3}s-(gu^{4}s). From ὕδωρ, water, and σπόγγος, a sponge. See HYGROMYCES.

HYDROSTATIC, adj. Hid-ro-sta^{2}t'i^{2}k. Fr., *hydrostatique*. Ger., *hydrostatisch*. Pertaining to hydrostatics or to liquid in a condition of equilibrium.

HYDROSTATICS, n. sing. Hid-ro-sta^{2}t'i^{2}ks. Lat., *hydrostatica* (from ὕδωρ, water, and στατική, statics). Fr., *hydrostatique*. Ger., *Hydrostatik*. The physics of liquids in a state of equilibrium. [B, 46 (*a*, 39).]

HYDROSTEON (Lat.), **HYDROSTEUM** (Lat.), n's n. Hid-(hu^{6}d)-ro^{2}st'e^2-o^{2}n, -u^{3}m(u^{4}m). From ὕδωρ, water, and ὀστέον, a bone. Ger., *Knochenwassersucht*. A deposit of serum in and around the extremities of the long bones, occurring in dropsy of the joints. [L, 30, 50 (*a*, 14).]

HYDROSTOMIE (Fr.), n. E-dro-sto-me. From ὕδωρ, water, and στόμα, the mouth. An excessive buccal secretion. [Hutchinson, "Sem. méd.," Jan. 30, 1889, p. 38 (*a*, 40).]

HYDROSUDOPATHY, n. Hid-ro-su^2-do^{2}p'a^{2}th-i^2. From ὕδωρ, water, *sudor*, sweat, and πάθος, a condition. Ger., *Hydrosudopathie*. The treatment of all diseases by the internal and external uses of water, and by sweating. [*a*, 40.]

HYDROSULFAT (Ger.), **HYDROSULFATE** (Fr.), n's. Hu^{6}d-ro-zu^{4}lf-a^{3}t', e-dro-zu^{6}l-fa^{3}t. See HYDROSULPHATE, and for other words in *Hydrosulf-*, not here given, see the corresponding words in *Hydrosulph-*.—**Hydrosulfatsäure** (Ger.). See *Sulphureted* HYDROGEN.

HYDROSULFURE (Fr.), n. E-dro-su^{6}l-fu^{6}r. See HYDROSULPHIDE.

HYDROSULFURÉ (Fr.), adj. E-dro-su^{6}l-fu^6-ra. Combined with hydrogen and sulphur. [B, 119.]

HYDROSULFUREUX (Fr.), adj. E-dro-su^{6}l-fu^6-ru^6. Hydrosulphurous. [*a*, 38.]

HYDROSULPHAS (Lat.), n. m. Hid(hu^{6}d)-ro(ro^3)-su^{3}l(su^{4}l)'-fa^{2}s(fa^{3}s). Gen., *-at'is*. See HYDROSULPHATE.—**H. stibicus.** Kermes mineral. [B, 92.]

HYDROSULPHATE, n. Hid-ro-su^{3}l'fat. Lat., *hydrosulphas*. Fr., *hydrosulfate*. 1. A salt of hydrosulphuric acid. 2. A hydrated sulphate. [B, 38 (*a*. 38).]

HYDROSULPHIDE, n. Hid-ro-su^{3}lf'i^{2}d(id). Lat., *sulpho-hydras*, *sulphydras*, *hydrosulfuratus* (agreeing with the name of the base). Fr., *sulfhydrate*, *hydrosulfure*, *hydrosulfate*. Syn.: *sulphydrate*. A compound of an element or radicle with hydrogen and sulphur. The h. of a univalent hydrocarbon is called a mercaptan. [B.]

HYDROSULPHOCARBONIC ACID, n. Hid-ro-su^{3}lf-o-ka^{3}rb-o^{2}n'i^{2}k. See THIOCARBONIC ACID.

HYDROSULPHOCYANIC ACID, n. Hid-ro-su^{3}lf-o-si-a^{2}n'-i^{2}k. See THIOCYANIC ACID.

HYDROSULPHURATUS (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-su^{3}lf-(su^{4}lf)-u^{2}r(u^{4}r)-at(a^{3}t)'u^{3}s(u^{4}s). Combined with hydrogen and sulphur. [B, 119.]

HYDROSULPHURET, n. Hid-ro-su^{3}lf'u^2-re^{2}t. See HYDROSULPHIDE.

HYDROSULPHURETED, adj. Hid-ro-su^{3}lf'u^2-re^{2}t-e^{2}d. Fr., *hydrosulfuré*. Combined with hydrogen and sulphur. [B.]

HYDROSULPHURETICO-ACIDULUS (Lat.), adj. Hid-(hu^{6}d)-ro(ro^3)-su^{3}l(su^{4}l)-fu^{3}r(fu^{4}r)-e^{2}t(at)''i^{2}k-o(o^3)-a^{2}s(a^{3}k)-i^{2}d'u^{2}l-(u^{4}l)-u^{3}s(u^{4}s). Acidulous and containing hydrogen sulphide. [B, 97.]

HYDRO-SULPHURETICUS (Lat.), adj. Hid(hu^{6}d)-ro(ro^3)-su^{3}lf(su^{4}lf)-u^{2}r(u^{4}r)-e^{2}t(at)'i^{2}k-u^{3}s(u^{4}s). Containing hydrogen sulphide. [B, 97.]

HYDROSULPHURETTED, adj. See HYDROSULPHURETED.

HYDROSULPHURETUM (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-su^{3}lf-(su^{4}lf)-u^{2}r(u^{4}r)-et(at)'u^{3}m(u^{4}m). See HYDROSULPHIDE.—**H. stibiosum.** Kermes mineral. [B. 119.]—**H. stibiosum cum sulphure.** Antimony pentasulphide. [B, 119.]

HYDROSULPHURIC ACID, n. Hid-ro-su^{3}lf-u^2'ri^{2}k. Fr., *acide hydrosulfurique*. Ger., *Hydrothionsäure*. Sulphureted hydrogen or its aqueous solution. [B.]—**Test solution of h. a.** [U. S. Ph.]. Distilled water freshly saturated with h.-a. gas obtained by treating ferrous sulphide with dilute sulphuric acid. [B, 5 (*a*, 38).]

HYDROSULPHUROUS ACID, n. Hid-ro-su^{3}lf'u^2-ru^{3}s. Fr., *acide hydrosulfureux*. An acid, H_2SO_2, supposed to be formed from anhydrous, sulphurous acid (dioxide of sulphur) by combination with hydrogen. It is the same as true hyposulphurous acid. [B.]

HYDROSULPHYL, n. Hid-ro-su^{3}lf'i^{2}l. The univalent radicle, SH'; also this radicle occurring in the free state with the double molecular formula, S_2H_2 (hydrogen persulphide). The symbol Hs is sometimes given it. [B, 159.]

HYDROTELLURATE, n. Hid-ro-te^{2}l'u^2-rat. A salt of hydrotelluric acid. [B, 38 (*a*, 38).]

HYDROTELLURIC ACID, n. Hid-ro-te^{2}l-u^2'ri^{2}k. Fr., *acide hydrotellurique*. Ger., *Hydrotellursäure*. Tellurhydric or telenhydric acid; tellureted hydrogen or its aqueous solution. [B.]

HYDROTELLUROCYANIC ACID, n. Hid-ro-te^{2}l-u^2-ro-si-a^{2}n'i^{2}k. Lat., *acidum hydrotellurocyanicum*. Fr., *acide hydrotellurocyanique*. An acid in which hydrogen, tellurium, and cyanogen are united. [B, 38 (*a*, 38).]

HYDROTHECA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-the(tha)'ka^3. From ὕδρα, a hydra, and θήκη, a chest. The cup-like chitinous receptacle which protects the hydranth in the calyptoblastic genera. [L, 193.]

HYDROTHEIONIC ACID, n. Hid-ro-thi-o^{2}n'i^{2}k. See HYDROTHIONIC ACID.

HYDROTHERAPEUSIS (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-the^{2}r-a^3-pu^2'si^{2}s. Gen., *-eus'eos* (*-is*). From ὕδωρ, water, and θεραπευσία, medical treatment. See HYDROTHERAPY.

HYDROTHERAPEUTIC, adj. Hid-ro-the^{2}r-a^3-pu^2'ti^{2}k. Fr., *hydrothérapique*. Of or pertaining to hydrotherapy. [B.]

HYDROTHERAPEUTICS, n. sing. Hid-ro-the^{2}r-a^3-pu^2'ti^{2}ks. See HYDROTHERAPY.

HYDROTHERAPIA (Lat.), n. f. Hid(hu^{6}d)-ro(ro^3)-the^{2}r-a^{2}p-(a^{3}p)-i(e)'a^3. See HYDROTHERAPY.

HYDROTHERAPY, n. Hid-ro-the^{2}r'a^2-pi^2. Lat., *hydrotherapia* (from ὕδωρ, water, and θεραπεια, medical treatment). Fr., *hydrothérapie*. Ger., *Hydrotherapie*. The systematic use of water as a curative agent. [A, 326 (*a*, 21); B.]

HYDROTHERMAL, adj. Hid-ro-thu^{3}rm'a^{2}l. From ὕδωρ, water, and θέρμη, heat. Of or pertaining to hot water. [L, 56.]

HYDROTHIOBENZENE, n. Hid-ro-thi-o-be^{2}nz'en. Ger., *Hydrothiobenzol*. Phenyl mercaptan. [B.]

HYDROTHIOCARBONATE, n. Hid-ro-thi-o-ka^{3}rb'o^{2}n-at. Fr., *h*. A thiocarbonate. [B, 38 (*a*, 14).]

HYDROTHIOCROCONIC ACID, n. Hid-ro-thi-o-kro-ko^{2}n'-i^{2}k. Fr., *acide hydrothiocroconique*. A reddish-yellow, gummy substance, $C_5H_4SO_4$, acting as a dibasic acid; derived from croconic acid by the action of sulphureted hydrogen. [B, 3.]

HYDROTHION (Lat.), n. n. Hid(hu^{6}d)-ro(ro^3)-thi(the)'o^{2}n. From ὕδωρ, water, and θεῖον, sulphur. Ger., *Schwefelwassertoff*. Sulphureted hydrogen. [B, 78 (*a*, 14).]—**H'luft** (Ger.). Sulphu-

reted-hydrogen gas. [L, 80.]—**H'säure** (Ger.). See HYDROSULPHURIC ACID.

HYDROTHIONÆMIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-thi(the)-o2n-em'(a3'e2m)-i2-a3. From ὕδωρ, water, θεῖον, sulphur, and αἷμα, blood. Ger., *Hydrothionämie.* A condition in which sulphureted hydrogen or hydrosulphide (*hydrothionammonæmia*) of ammonium enters the blood. These substances are produced in the stomach and intestines, or in the peritoneal cavity after perforation of the bowel. The symptoms are those which are produced by poisoning by these gases—viz., collapse, dizziness, frequent respirations, and small pulse. The disease is not infrequently fatal. [D, 3.]

HYDROTHIONAMMONÆMIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-thi(the)''o2n-a2m(a3m)-mon-em'(a3'e2m)-i2-a3. See under HYDROTHIONÆMIA.

HYDROTHIONATE, n. Hid-ro-thi'o2n-at. Fr., *h.* A salt of hydrothionic acid. [B, 38 (*a*, 14).]

HYDROTHIONCARBONSÄURE (Ger.), n. Hu6-dro-te-on'-ka3rb-on''zoir-e2. Thiocarbonic acid. [A, 324.]

HYDROTHIONIC ACID, n. Hi-dro-thi-o2n'i2k. Fr., *acide hydrothionique.* Ger., *Hydrothionsäure, Schwefelwasserstoffgas.* Hydrosulphuric acid. [B, 93 (*a*, 14).]

HYDROTHIONURIA (Lat.), n. f. Hid(hu6d)-ro(ro3)-thi(the)-o2n-u2(u)'ri2-a3. From ὕδωρ, water, θεῖον, sulphur, and οὖρον, urine. Fr., *hydrothionurie.* The presence of hydric sulphide (H_2S, sulphureted hydrogen) in the urine. Betz attributes it to either the intravesical decomposition of pus, blood, or albuminoid substances; intestinal absorption of this gas and its elimination by the kidney; or the passage of the gas from the intestine into the bladder. ["Rev. des sci. méd.," Apr. 15, 1889, p. 438 (*a*, 18).]

HYDROTHIUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-thi(the)'u3m-(u4m). See HYDROTHION.

HYDROTHORACIC, adj. Hi-dro-tho-ra2s'i2k. Pertaining to hydrothorax. [L, 50 (*a*, 14).]

HYDROTHORAX (Lat.), n. m. Hid(hu6d)-ro(ro3)-thor'a2x-(a3x). Gen., *-thor'acos (-acis).* From ὕδωρ, water, and θώραξ, the chest. Fr., *h.* Ger., *H., Brustwassersucht.* It., *idrotorace.* Sp., *hidrotórax.* Dropsy of one or both pleural cavities, not due to pleurisy; hence to be distinguished from pleuritic effusion.—**H. chylosus.** H. due to the establishment of a communication between the pleural cavity and the thoracic duct or the ductus lymphaticus dextra. [L, 128.]—**H. purulentus.** An accumulation of pus in the pleural cavity. [*a*, 40.]—**H. torpidus.** Chronic h. [L, 128.]

HYDROTIC ACID, n. Hid-ro2t'i2k. See HIDROTIC *acid.*

HYDROTICUS (Lat.), adj. Hid(hu6d)-ro2t(rot)'i2k-u3s(u4s). Gr., ὑδρωτικός. See HYDRAGOGUE.

HYDROTIMESIA (Lat.), n. f. Hi2d(hu6d)-ro2t-i2-me(ma)'si2-a3. See HYDROTIMETRY.

HYDROTIMETER, n. Hid-ro2t-i2m'e2t-u5r. Fr., *hydrotimètre.* An apparatus used in hydrotimetry. [L, 41 (*a*, 14).]

HYDROTIMETRIC, adj. Hid-ro2t-i2-me2t'ri2k. Fr., *hydrotimétrique.* Pertaining to hydrotimetry. [L, 41 (*a*, 14).]

HYDROTIMETRY, n. Hid-ro2t-i2m'e2t-ri2. From ὑδροτης, moisture, and μετρεῖν, to measure. Fr., *hydrotimétrie.* The determination, by means of soap, of the proportion of calcareous salts contained in water. [L, 41 (*a*, 14).]

HYDROTIS (Lat.), n. f. Hid(hu6d)-ro'ti2s. Gen., *-ot'idos (-idis).* From ὕδωρ, water, and οὖς, the ear. Fr., *hydrote, hydropisie de la caisse du tympane.* Ger., *Wassersucht des Mittelohres.* It., *idrote, idrope dell' orechio medio.* Sp., *hidropesia de la caja del timpano.* Dropsy of the ear; an accumulation of fluid, usually mucus or muco-pus, in the tympanic cavity. [F.]

HYDROTITANE (Lat.), n. f. Hid(hu6d)-ro(ro3)-ti2t'a2n(a3n)-e-(a). Gen., *-tit'anes.* From ὕδωρ, water, and τίτανος, probably gypsum. Fr., *hydrotitane.* Ger., *Kalkwasser.* Lime-water; of Hippocrates, a watery lime-paste. [L, 50 (*a*, 14).]

HYDROTITE (Fr.). n. E-dro-tet. See HYDROTIS.

HYDROTOMY, n. Hid-ro2t'o-mi2. Lat., *hydrotomia* (from ὕδωρ, water, and τομή, a cutting). Fr., *hydrotomie.* It., *idrotomia.* A method of dissection inaugurated by Lacauchie in 1844, which consisted in injecting water under a pressure of from 3 to 4 metres into the principal artery of the part to be examined, the infiltration increasing the transparency of the loose connective tissue and separating the resisting parts, such as the nerves, glands, etc. [L, 41, 44, 49, 50 (*a*, 14).]

HYDROTREMELLINÆ (Lat.), **HYDROTREMELLINEÆ** (Lat.), **HYDROTREMELLINI** (Lat.), n's f., f., and m. pl. Hid-(hu6d)-ro(ro3)-tre2m-e2l-lin(len)'e(a3-e2), -e2-e(a3-e2), -i(e). Fr., *hydrotrémellinées.* Names for all the aquatic cryptogams produced in the decomposition of animal substances. [B, 1, 170 (*a*, 24).]

HYDROTRISULPHATE, n. Hid-ro-tri-su3lf'at. Fr., *hydrotrisulfate.* A hydrated trisulphate. [B, 38 (*a*, 14).]

HYDROTRISULPHURET, n. Hid-ro-tri-su3lf'u2-re2t. Fr., *hydrotrisulfure.* A sulphide containing three times as much sulphur as hydrogen. [B, 38 (*a*, 38).]

HYDROTROPIC, adj. Hid-ro-tro2p'i2k. Fr., *hydrotrophique.* Ger., *hydrotropisch.* Exhibiting hydrotropism. [B.]

HYDROTROPISM, n. Hid-ro2t'ro2p-i2z'm. From ὕδωρ, water, and τρέπειν, to turn. Fr., *hydrotropisme.* A tendency to movement in the particles of protoplasm, induced by the presence of water in its vicinity. It is either *positive* or *negative*, according as the protoplasm tends to move toward or away from the source of moisture. ["Bot. Ztg.," 1884, pp. 145, 161, 187; "Proc. Roy. Micr. Soc.," 1884, p. 603 (B).]

HYDROTYMPANUM (Lat.), n. n. Hid(hu6d)-ro(ro3)-ti2m-(tu6m)'pa2n(pa3n)-u3m(u4m). From ὕδωρ, water, and τύμπανον, a drum. A mucous or serous exudation into the cavity of the middle ear, the result of an acute or chronic otitis media. [F, 39.]

HYDROUS, adj. Hid'ru3s. From ὕδωρ, water. Containing water. [L, 56.]

HYDROVARECTASIA (Lat.), **HYDROVARIUM** (Lat), n's f. and n. Hid(hu6d)-ro(ro3)-va2r(wa3r)-e2k-ta(ta3)'zi2(si2)-a3, -va2r-(wa3r)'i2-u3m(u4m). See HYDROARION.

HYDROVAROCÉLIE [Piorry] (Fr.), n. E-dro-va3-ro-sa-le. From ὕδωρ, water, ὠάριον, a small egg, and κήλη, a tumor. See *Ovarian* CYSTOMA.

HYDROXANTHATE, n. Hi-dro-za2n'that. Fr., *h.* A salt of hydroxanthic acid. [B, 38 (*a*, 14).]

HYDROXETHYLIDENE-TRIMETHYL-AMMONIUM, n. Hid-ro2x-e2th-i2l''i2d-en-tri-me2th-i2l-a2m-mon'i2-u3m. See NEURINE.

HYDROXIDE, n. Hid-ro2x'i2d(id). Lat., *hydroxydum.* Ger., *Hydroxyd.* A chemical compound of hydroxyl with a metal or an alcoholic radicle. In recent chemical nomenclature this word replaces hydrate, except for compounds supposed to contain water of combination or crystallization. [A, 1.]—**Ferrous h.** An unstable greenish-white salt, FeH_2O_2, obtained by precipitating a soluble ferrous salt with an alkalii. It is not found in nature. [B, 244 (*a*, 27).]

HYDROXYACETAL, adj. Hi-dro2x-i2-a2s'e2t-a2l. A liquid, $CH_2.OH.CH(OC_2H_5)_2$, obtained by treating vinylethyl ether with alcoholic potash, having an agreeable odor and boiling at 167° C. [B. 3 (*a*, 38).]

HYDROXYACETIC ACID, n. Hid-ro2x-i2-a2s-et'i2k. Ger., *Hydroxyessigsäure.* Glycollic acid, $C_2H_4O_3$, so called because it may be regarded as derived from acetic acid by the substitution of hydroxyl (OH) for hydrogen. [B, 4.]

HYDROXYADIPIC ACID, n. Hid-ro2x-i2-a2d-i2p'i2k. Fr., *acides hydroxyadipiques.* Acids formed from adipic acid, ($C_6H_{10}O_4$), by the substitution of hydroxyl, (OH), for an equivalent quantity of H. Of these there are: 1. *Monoxyadipic acid, adipomalic acid,* $C_6H_{10}O_5 = C_6H_9(OH)O_4$. 2. *Dioxyadipic acid,* $C_6H_{10}O_6 = C_6H_8(OH_2)O_4$, isomeric with adipotartaric acid. 3. *Trioxyadipic acid,* $C_6H_{10}O_7 = C_6H_7(OH)_3O_4$. [B, 2.]

HYDROXYANTHRAQUINONE, n. Hid-ro2x-i2-a2n-thra3-kwi2n'on. Ger., *Hydroxyanthochinon.* A substance, $C_{14}H_8O_8 = C_{14}H_7(OH).O_2$, known in two isomeric forms: 1. *Oxyanthroquinone,* which crystallizes in yellow needles or plates melting at about 271° C. 2. *Erythro-oxyanthroquinone,* which crystallizes in orange-yellow needles melting at about 180° C. [B, 4 (*a*, 38).]

HYDROXYAZOBENZENE, n. Hid-ro2x-i2-a2z-o-be2nz'en. A substance, $C_6H_5.N_2.C_6H_4.OH$, crystallizing in yellowish-red rhombic prisms, easily soluble in alcohol, slightly soluble in water, and melting at about 154° C. [B. 3 (*a*, 38).]—**H'sulphonic acid.** A crystalline acid, $C_6H_4(SO_3H)N_2C_6H_4.OH$, known in four varieties: (1) *α-h'sulphonic acid,* small reddish plates having a metallic lustre, and easily soluble in alcohol and water. (2) *β-h'sulphonic acid,* yellowish-red prisms having a blue surface lustre, and easily soluble in pure water. (3) *γ-h'sulphonic acid,* long, narrow pentagonal plates having a violet surface lustre, and easily soluble in water. (5) *δ-h'sulphonic acid,* precipitated by strong hydrochloric acid from a concentrated aqueous solution as small shining yellow plates, or deposited in gradual evaporation of the solution as large cherry-colored rhombic tablets or prisms. [B, 3 (*a*, 38).]

HYDROXYBENZENE, n. Hid-ro2x-i2-be2nz'en. Fr., *hydroxybenzine.* Ger., *Hydroxybenzol.* Carbolic acid. [B, 270.]—**H'tricarboxylic acid.** A tribasic acid, $C_6H_2(OH)(CO.OH)_3$, of which two varieties are known—*hydroxytrimesic* (*hydroxytrimesitic*) *acid,* crystallizing from a concentrated solution in hot water as an indistinctly prismatic or acicular mass containing one molecule of water, or from dilute alcohol as long silky needles containing two molecules of water; and *hydroxytrimellithic acid,* C_6[CO.OH,CO.OH, H,CO.OH,OH.H,], crystallizing from alcohol in transparent compact prisms, from hot water in smaller shining prisms containing two molecules of water. [B, 3 (*a*, 38).]

HYDROXYBENZOIC ACID, n. Hid-ro2x-i2-be2n-zo'i2k. Fr., *acide hydroxybenzoique.* Ger., *Hydroxybenzoësäure.* Syn.: *phenol-benzoic acid.* A monobasic acid, $C_6H_4(OH).COOH$, of the constitution of benzoic acid in which hydroxyl replaces hydrogen. Three isomeric varieties are known: (1) *salicylic acid,* or orthohydroxybenzoic acid; (2) *metahydroxybenzoic acid* (often called oxybenzoic acid); (3) *parahydroxybenzoic acid.* [B.]

HYDROXYBENZOL (Ger.), n. Hu6-drox-u6-be2ntz-ol'. See HYDROXYBENZENE.

HYDROXYBENZYL ALCOHOL, n. Hid-ro2x-i2-be2nz'i2l a2l'ko-ho2l. Ger., *Hydroxybenzylalkohol.* Syn.: *oxybenzol alcohol.* Benzyl alcohol in which hydroxyl replaces hydrogen. [B.] See ORTHOHYDROXYBENZYL ALCOHOL.

HYDROXYBENZYLURIC ACID, n. Hid-ro2x-i2-be2nz-i2l-ur'i2k. An acid, $C_{16}H_{21}NO_5$, occurring as a crystalline mass, which melts at about 70° C. [B, 3 (*a*, 38).]

HYDROXYBERNSTEINSÄURE (Ger.), n. Hu6-drox-u6-be2rn'stin-zoir-e2. Hydroxysuccinic acid, malic acid. [B.]

HYDROXYBRENZWEINSÄURE (Ger.), n. Hu6-drox-u6-bre2ntz'vin-zoir-e2. Hydroxypyrotartaric acid. [B.]

HYDROXYBUTYRIC ACID, n. Hid-ro2x-i2-bu2t-i2r'i2k. Fr., *acide hydroxybutyrique.* Ger., *Hydroxybuttersäure.* Syn.: *oxybutyric acid.* A monobasic acid, $C_4H_8O_3 = C_4H_7(OH)O_2$, of the lactic acid series, and bearing the same relation to butyric acid that lactic acid bears to propionic acid. There are 4 isomeric varie-

ties of h. a., viz.: (1) α-h. a., $CH_3.CH_2.CH(OH).CO.OH$. (2) β-h. a., $CH_3.CH(OH).CH_2.CO.OH$. (3) γ-h. a., $CH_2(OH).CH_2.CH_2.CO.OH$. (4) *α-hydroxyisobutyric acid*, $(CH_3)_2 : C(OH).CO.OH$, otherwise known as *acetonic* or *dimethyloxalic acid*. All are crystalline solids. An acid of this composition has been found in diabetic urine. Külz says that this acid does not agree in its properties with any of the known modifications of h. a., and he therefore calls it *pseudo-oxybutyric acid*. It, as well as its salts, is lævorotatory. [B, 3, 4; Minkowski, "Ctrlbl. f. d. med. Wissensch.," April 12, 1884, p. 242; Külz, "Ztschr. f. Biol.," xx, p. 165, cited in "Ctrlbl. f. d. med. Wissensch.," Sept. 20, 1884, p. 661.]

HYDROXYCAFFEINE, n. Hid-ro2x-i2-ka2f'fe2-en. A crystalline substance, $C_8H_9(OH).N_4O_2 = C_8H_{10}N_9O_3$, possessing acid properties and derived from caffeine by the substitution of a molecule of hydroxyl for an atom of hydrogen. [B, 3.]

HYDROXYCAMPHOR, n. Hid-ro2x-i2-ka2m'fo2r. A faint-yellow liquid, $C_{10}H_{16}O_2$, having a turpentine-like odor and boiling at 265° C. [B, 3 (α, 38).]

HYDROXYCAMPHORONIC ACID, n. Hid-ro2x-i2-ka2m-fo2r-o2n'i2k. An acid, $C_9H_{14}O_6$, formed as a side product in the manufacture of camphoronic acid. It occurs in large, irregular prisms, slightly soluble in cold water, freely soluble in hot water, and fusible at from 164° to 165° C. [α, 27.]

HYDROXYCAPROIC ACID, n. Hid-ro2x-i2-ka2p-ro'i2k. Fr., *acide hydroxycaproïque*. Ger., *Hydroxycapronsäure*. Syn.: *oxycaproic acid*. A monobasic acid, $C_6H_{12}O_3 = C_6H_{11}(OH)O_2$. Several isomeric varieties, which are all crystalline solids, are known, *e. g.*, (1) *leusic acid*, $CH_3.CH_2.CH_2.CH_2.CH(OH) - CO.OH$; (2) *hydroxisocaproic acid*, $(CH_3)_2 : CH.CH_2.CH(OH) - CO.OH$; (3) *diethoxalic acid, diethyloxyacetic acid*, $(C_2H_5)_2 : C(OH) - CO.OH$. [B, 3, 4.]

HYDROXYCAPRYLIC ACID, n. Hid-ro2x-i2-ka2p-ri2l'i2k. Fr., *acide hydroxy-caprylique*. Ger., *Hydroxycaprylsäure*. A monobasic acid, $C_8H_{16}O_3 = C_8H_{15}(OH)O_2$, being caprylic acid in which hydroxyl replaces hydrogen. The following isomeric varieties are known: 1. *Normal h. a.*, $C_6H_{13}CH(O-H) - CO.OH$, a crystalline solid. 2. *Oxyoctoic acid*, $(CH_3)_2 : C.CH_2.C(OH).CH_3 - CO.OH$, forming prismatic crystals. 3. *Dipropyloxalic acid, hydroxyisocaprylic acid*, $(C_3H_7)_2 : C(OH) - CO.OH$, forming colorless acicular or prismatic crystals. 4. *Diisopropyloxalic acid*, $[(CH_3)_2 : CH]_2 : C(OH) - CO.OH$, forming acicular crystals. 5. *Diethyloxybutyric acid*, $CH_3.CH(OH).C(C_2H_5)_2 - CO.OH$, a syrupy liquid. [B, 2, 3, 4.]

HYDROXYCINNAMIC ACID, n. Hid-ro2x-i2-si3n a2m'i2k. Fr., *acide hydroxycinnamique*. Ger., *Hydroxyzimmtsäure*. See COUMARIC ACID, PARACOUMARIC ACID, CAFFEIC ACID, and CAFFEOTANNIC ACID.

HYDROXY-COMPOUND, n. Hid-ro2x'i2-ko2m"pu5-u4nd. A chemical substance formed by the substitution of hydroxyl for hydrogen. [B.]

HYDROXYCOUMARIN, n. Hid-ro2x-i2-ku'ma2r-i2n. A substance, $C_{11}H_{10}O_3 = C_{11}H_9(OH)O_2$, being coumarin in which hydroxyl replaces hydrogen. The following isomeric varieties are known: 1. *Dimethylumbelliferone*, $C_6H_3(OH)\left\langle\begin{matrix} C(CH_3) : C.CH_3 \\ \quad\quad | \\ O — CO, \end{matrix}\right.$, occurring in crystalline needles melting at 256° C. 2. *Homomethylumbelliferone*, $CH_3.C_6H_2(OH)\left\langle\begin{matrix} C(CH_3) : CH \\ \quad\quad | \\ O — CO, \end{matrix}\right.$, also forming crystalline needles, melting and partially subliming at about 250° C. [B, 3 (α, 38).]

HYDROXYCUMINIC ACID, n. Hid-ro2x-i2-ku2-mi2n'i2k. An acid, $(CH_3)_2CH.C_6H_2(OH)CO.OH$, known in two isomeric forms: 1. *Orthohydroxycuminic acid*, crystallizing in flat needles or plates melting at 96° C. 2. *Metahydroxycuminic acid*, crystalling in long, thin needles, melting at 143° C. [B, 3 (α, 38).]

HYDROXYD (Ger.), n. Hu6-drox-u6d'. See HYDROXIDE.

HYDROXYDIETHACETIC ACID, n. Hid-ro2x-i2-di-e2th-a2s-et'i2k. Fr., *acide hydroxydiéthacétique*. Ger., *Hydroxydiäthylessigsäure*. Diethoxalic acid. [B.]

HYDROXYDIPHENYLAMINE, n. Hid-ro2x-i2-di-fe2n-i2l'-a2m-en. A hydroxyl substitution compound, $NH\left\langle\begin{matrix} C_6H_3.OH \\ | \\ C_6H_3.OH, \end{matrix}\right.$ of diphenylamine. [B.]

HYDROXYDUL (Ger.), n. Hu6d-rox-u6-dul'. That one of two different hydroxides of the same base which contains relatively to the amount of that base the smaller amount of hydroxyl. [B.]

HYDROXYDUM (Lat.), n. n. Hid(hu6d)-ro2x'i2d(u6d)-u3m-(u4m). See HYDROXIDE.

HYDROXYESSIGSÄURE (Ger.), n. Hu6d-rox-u6-e2s'i2g-zoir-e2. Hydroxyacetic acid, glycollic acid. [B.]

HYDROXYETHYLACETIC ACID, n. Hid-ro2x-i2-e2th-i2l-a2s-et'i2k. Ethylglycollic acid. [B, 3.]

HYDROXYISOCAMPHOR, n. Hid-ro2x-i2-i2s-o-ka2m'fo2r. A substance, $C_{10}H_{15}O(OH)$, occurring as a crystalline mass having a slight vanilla-like smell, and melting with decomposition at about 249° C. [B, 3 (α, 38).]

HYDROXYL, n. Hid-ro2x'i2l. Fr., *hydroxyle*. Ger., *H.* It., *idrossilo*. Syn.: *oxhydryl*. A univalent radicle, $-O.H$, being water deprived of one atom of hydrogen. It enters into the composition of all hydrates (hydroxides), including the alcohols, phenols, and oxygen acids, and of all other bodies formed upon the water type. Occurring in the free state as a double molecule, $HO - OH$, it constitutes a peroxide. [B.]—**H'amide.** Ger., *Hydroxylamid*. An amide in which h. replaces an equivalent amount of hydrogen. [B.]—**H'benzol.** See HYDROQUINONE.—**H'diphenyl.** See DIPHENOL.—**H'ethyloxide.** See ALDEHYDE *alcoholate*.—**H'irung** (Ger.). The process of combining with hydroxyl. [Salkenski, "Ctrlbl. f. d. med. Wssnsch.," June 3, 1882, p. 391 (B).]—**H'urée** (Fr.). A crystalline substance, $N_2CH_4O_2$, resulting from the union of h'amine and cyanic acid. It is very soluble in water and in boiling alcohol, and melts at about 130° C. [B, 38, 93 (α, 38).]

HYDROXYLAMINE, n. Hid-ro2x-i2l'a2m-en. Fr., *h.* Ger., *Hydroxylamin*. Syn.: *oxyammonia*. A substance, $N(OH)H_2 = NH_3O$, or ammonia in which a molecule of hydroxyl replaces an atom of hydrogen. It is known only in aqueous solution, the latter being colorless and devoid of odor, but possessing a strong alkaline reaction. It is used as a remedy in lupus vulgaris, trichophytosis capitis, and psoriasis. [B, 3, 270 (α, 38); "N. Y. Med. Jour.," April 20, 1889 (α, 40).]—**H.-disulphonic acid.** Fr., *acide h'disulfonique*. Sulphazotic acid; a substance, $N(OH)(HSO_3)_2 = NH_3S_2O_7$, acting as a dibasic acid, but known only through its salts, the *h'disulphonates*. It may be regarded as h. combined with a double molecule of sulphuric acid, the former replacing two molecules of hydroxyl in the latter, and itself losing two atoms of hydrogen. [B, 3.]—**H. hydrochloride.** A compound of h. and hydrochloric acid: recommended as a substitute for pyrogallic acid and chrysarobin in skin diseases, having the advantage of not staining the skin or linen. ["Proc. of the Am. Pharm. Assoc.," xxxvi, xxxvii (α, 14).]—**H'-monosulphonic acid.** Fr., *acide h. monosulfonique*. A monobasic acid, $NH(OH).(HSO_3)$. [B, 3.]

HYDROXYLATED, adj. Hid-ro2x'i2l-at-e2d. Fr., *hydroxylé*. Containing hydroxyl, forming a hydroxy compound. [B, 4.]

HYDROXYLIC, adj. Hid-ro2x-i2l'i2k. Containing hydroxyl; also of, pertaining to, or contained in hydroxyl. [B.]

HYDROXYMARGARIC ACID, n. Hid-ro2x-i2-ma3r-ga2r'-i2k. Fr., *acide hydroxymargarique*. Syn.: *oxymargaric acid*. An acid, $C_{17}H_{34}O_3$, occurring in crystalline plates which melt at 80° C. [B, 3 (α, 38).]

HYDROXYMETHYLPHENYLFORMIC ACID, n. Hid-ro2x"i2-me2th-i2l-fe2n-i2l-fo2rm'i2k. See under HYDROXYTOLUIC ACID.

HYDROXYNAPHTHOIC ACID, n. Hid-ro2x-i2-na2f-tho'-i2k. Fr., *acide hydroxy-naphtoïque*. Syn.: *carbonaphtholic acid*. An acid, $C_{10}H_6(OH)CO.OH$, existing in several isomeric forms which melt at varying points from 186° C. to 247° C. [B, 4 (α, 38).]

HYDROXYOCTOIC ACID, n. Hid-ro2x-i2-o2k-to'i2k. See HYDROXYCAPRYLIC ACID.

HYDROXYŒNANTHOIC ACID, HYDROXYŒNANTHYLIC ACID, n's. Hid-ro2x-i2-e2n-a2n-tho'i2k, -thi2l'i2k. Fr., *acide hydroxyœnanthoïque, hydroxyœnanthylique*. Syn.: *oxyœnanthylic acid*. A one-molecule hydroxyl substitution compound, $C_7H_{14}O_3 = C_6H_{11}.CH(OH)CO.OH$, ot œnanthoic acid. It is known in five isomeric forms: 1. *Normal h. a.*, or *oxyœnanthylic acid*, $C_5H_{11}.CH(OH)CO.OH$, forming prismatic crystals melting at 65° C. 2. *Amylhydroxalic acid*, or *hydroxyisœnanthoic acid*, $(CH_3) : CH.CH_2.CH_2.CH(OH).CO.OH$, occurring in prismatic scales, melting at 60·5° C. 3. *Methylethyloxybutyric acid*, or *hydroxy α-methylethylbutyric acid*, $CH_3.CH(OH).C\left\langle\begin{matrix} CH_3 \\ CO.OH, \\ C_2H_5 \end{matrix}\right.$ a syrupy liquid. 4. *Methylpropylethylenelactic acid*, $\begin{matrix} CH_3 \\ C_3H_7 \end{matrix}\rangle C(OH).CH_2.CO.OH$, a syrupy liquid. 5. *Diethylethylenelactic acid*, $(C_2H_5)_2.C(OH)CH_2.CO.OH$, forming crystalline needles, melting at about 73° C. [B, 3, 4 (α, 38).]

HYDROXYOLEIC ACID, n. Hid-ro2x-i2-o-le'i2k. Fr., *acide hydroxyoléique*. Ger., *Hydroxyölsäure*. See RICINOLEIC ACID.

HYDROXYPHENYLACETIC ACID, n. Hid-ro2x-i2-fe2n-i2l-a2s-et'i2k. A monobasic acid, $C_6H_4(OH)(CH_2 - CO.OH)$. Three isomeric varieties are known: 1. *Ortho-h. a.*, $C_6[OH,CH_2.CO.OH,H,H,H,H,]$, forming crystalline needles somewhat soluble in water, and melting at 137° C. 2. *Meta-h. a.*, $C_6[OH,CH_2.CO.OH,H,H,H,]$, so very soluble in water that evaporation to dryness is necessary to remove it from solution, and crystallizing from a hot mixture of petroleum spirit and benzene in fine needles, melting at 129° C. 3. *Para-h. a.*, $C_6[OH,H,H,CH_2.CO.OH,H,H,]$, crystallizing in brittle prismatic needles, soluble in cold water, very soluble in hot water, and melting at 148° C. [B, 3 (α, 38).]

HYDROXYPHENYLAMIDOPROPIONIC ACID, n. Hid-ro2x"i2-fe2n-i2l-a2m-i2d-o-pro-pi2-o2n'i2k. Tyrosine. [B.]

HYDROXYPICOLINE, n. Hid-ro2x-i2-pi2k'o-len. Fr., *h.* An artificial alkaloid, C_6H_9NO, homologous with pelletierine; a colorless oily liquid, boiling at 155° C. It acts as a strong base, combining with acids to form addition compounds. [Étard, "Compt rend. de l'acad des sci.," xcii, p. 460 (B).]

HYDROXYPICRIC ACID, n. Hid-ro2x-i2-pi2k'ri2k. Fr., *acide hydroxypicrique*. Ger., *Hydroxypikrinsäure*. Trinitroresorcin. [B.]

HYDROXYPROPIONIC ACID, n. Hid-ro2x-i2-pro-pi2-o2n'-i2k. Fr., *acide hydroxy-propionique*. Ger., *Hydroxypropionsäure*. See LACTIC ACID.

HYDROXYQUINOL, n. Hid-ro2x-i2-kwi2n'o2l. A substance, $C_6H_3(OH)_3$, crystallizing from ether in microscopic monoclinic plates or tablets, melting at 140·5° C. [B, 3 (α, 38).]

HYDROXYQUINOLINE, n. Hid-ro2x-i2-kwi2n'o-len. Fr., *hydroxyquinoléine*. Ger., *Hydroxychinolin*. See CARBOSTYRIL.

HYDROXYSALICYLIC ACID, n. Hid-ro2x-i2-sa2l-i2-si2l'i2k. Fr., *acide hydroxysalicylique*. Ger., *Hydroxysalicylsäure*. Oxysalicylic acid; a one-molecule substitution compound of salicylic acid, $C_6(H.OH,H.H,OH,CO.OH), = C_7H_6O_4$, one of the isomeric forms of dihydroxybenzoic acid, and forming shining acicular crystals, melting at 196° to 197° C. [B, 4.]

HYDROXYTOLUENE, n. Hid-ro2x-i2-to2l'u2-en. Fr., *hydroxytoluène*. Ger., *Hydroxytoluol*. Toluene in which hydroxyl replaces hydrogen. [B.] See CRESOL and DIHYDROXYTOLUENE.

HYDROXYTOLUIC ACID, n. Hid-ro2x-i2-to2l-u2'i2k. Fr., *acide hydroxy-toluique.* Ger., *Hydroxytoluylsäure.* An acid, $C_6H_3(OH){CH_3 \atop CO.OH}$, having numerous possible isomers, of which five are known, three isomeric varieties of cresotic acid and two others: α-oxytoluic acid, formed by treating sulphoparatoluic acid with caustic potash, and occurring in crystalline needles, which melt at about 203° C.; and β-oxytoluic acid, obtained from nitroparatoluic acid and occurring in crystalline needles grouped in stars, and melting at about 184° C. [B, 4 (α, 38).]

HYDROXYTOLUOL (Ger.), n. Hu6-dro3x-u6-to-lu-ol'. Hydroxytoluene. [B.]

HYDROXYVALERIANIC ACID, n. Hid-ro2x-i2-va2l-e-ri2-a2n'i2k. Fr., *acide hydroxy-valérianique.* Oxyvalerianic acid, a one-molecule substitution compound of valerianic acid, $CH_3.CH_2.CH_2$-$CH(OH).CO.OH = C_5H_{10}O_3$, homologous with lactic acid. [A. Menozzi, cited in "Ann di chim. medico-farmac. e di farmacol.," Feb., 1885, p. 141 (B).]

HYDROXYZIMMTSÄURE (Ger.), n. Hu6d-ro3x-u6-tsi2mt'-zoir-e2. Hydroxycinnamic acid. [B.]

HYDROZOON (Lat.), **HYDROZOUM** (Lat.), n's n. Hid-(hu6d)-ro(ro3)-zo'o2n, -u3m(u4m). From ὕδωρ, water, and ζῷον, an animal. Fr., *hydrozoaire.* An individual of the *Hydrozoa,* which are a class of the *Cœlenterata* having *Hydra* as the type. [B, 28 (α, 27).]

HYDRURE (Fr.), n. E-dru6r. See Hydride.

HYDRURESIS (Lat.), n. f. Hid(hu6d)-ru2(ru)-re(ra)'si2s. Gen., *-es'eos (-es'is).* From ὕδωρ, water, and οὔρησις, urination. See Hydruria.

HYDRURET, n. Hid'ru2-re2t. See Hydride.

HYDRURIA (Lat.), n. f. Hid(hu6d)-ru2(ru)'ri2-a3. From ὕδωρ, water, and οὖρον, urine. Fr., *hydrurie.* Ger., *Hydrurie.* A relative increase in the water and decrease in the solids of the urine. [K.]

HYDRYALOS (Lat.), n. m. Hid(hu6d)-ri(ru6)'a2l(a3l)-o2s. From ὕδωρ, water, and ὕαλος, glass. See *Water*-glass.

HYDRYMENITIS (Lat.), n. f. Hid(hu6d)-ri2(ru6)-me2n(man)-i-(e)'ti2s. Gen., *-it'idos (-idis).* From ὕδωρ, water, and ὑμήν, a membrane (see also *-itis**). Fr., *hydryménite.* Inflammation of a serous membrane. [L, 50 (α, 14).]

HYDURILIC ACID, n. Hid-u2-ri2l'i2k. Fr., *acide hydurilique.* Ger., *Hydurilsäure.* A strong, dibasic acid, $C_8H_6N_4O_6$, obtained by heating alloxanthine in a closed tube to 170° C., and in various other ways, and occurring in small crystals slightly soluble in alcohol and in cold water, more soluble in hot water. [B, 3, 270 (α, 38).]

HYEMAL, adj. Hi'e2-m'l. See Hiemal.

HYEPIGLOTTIC, adj. Hi-e2p-i2-glo2t'i2k. See Hyo-epiglottic.

HYÈRES (Fr.), n. E-e2r. A climatic winter resort in the department of Var, France. [L, 30, 41, 57, 87 (α, 14).]

HYETAL, adj. Hi'e2-t'l. From ὑετός, rain. Pertaining to rain. [L, 56.]

HYGEA (Lat.), **HYGEIA** (Lat.), n's f. Hi(hu6)-je(ga)'a3, -ji'-(ge2'e2)-a3. See Hygiea.

HYETOGRAPHY, n. Hi-e2t-o2g'ra2f-i2. Lat., *hyetographia* (from ὑετός, rain, and γραφή, a writing). 1. That portion of climatology which relates to rain. 2. The practice of recording facts about rainfall. [L, 107.]

HYGENDORF (Ger.), n. Hu6g'e2n-do2rf. A place in the province of Pomerania, Prussia, where there is a gaseous and ferruginous spring called Jacobsbrunnen. [L, 30 (α, 14).]

HYGIANSIS (Lat.), **HYGIASIS** (Lat.), n's f. Hi(hu6)-ji2(gi2)-a2n(a3n)'si2s, -ji2(gi2)-as(a3s)'i2s. Gen., *-ans'eos (-is), -as'eos (-i'asis).* Gr., ὑγίανσις (from ὑγιαίνειν, to be in health). Ger., *Genesung.* Convalescence. [A, 322.]

HYGIASMA (Lat.), n. n. Hij(hu6g)-i2-a2z(a3s)'ma3. Gen., *-as'matos (-atis).* Gr., ὑγίασμα (from ὑγίεια, health). Fr., *hygiasme.* Ger., *Heilmittel.* A means of cure. [A, 311; L, 50 (α, 14).]

HYGIASTIC, adj. Hi-ji2-a2st'i2k. Gr., ὑγιαστικός. Lat., *hygiasticus.* Curative. [L, 107.]

HYGIASTICS, n. sing. Hi-ji2-a2st'i2ks. Lat., *hygiastica.* See Hygiene.

HYGID, adj. Hi'ji2d. From ὑγιής, healthy. Fr., *hygide.* Pertaining to health. [A, 526.]

HYGIDIUM (Lat.), n. n. Hij(hu6g)-i2d'i2-u3m(u4m). Gr., ὑγίδιον. Of Paulus Ægineta, a certain collyrium. [L, 180.]

HYGIEA (Lat.), n. f. Hi(hu6)-ji2(gi2)-e(a)'a3. Gr., ὑγίεια. Fr., *santé* (1st def.). Ger., *Gesundheit* (1st def.). 1. Health. [L, 50 (α, 14).] 2. A medicine. [A, 311.] 3. The ancient goddess of health.

HYGIEASTICS, n. sing. Hi-je-a2st'i2ks. Lat., *hygiastica* (from ὑγίεια, health). Ger., *Heillehre.* See Hygiene.

HYGIEIA (Lat.), n. f. Hi(hu6)-ji2(gi2)-i'(e2'i2)-a3. See Hygiea.

HYGIEIOCOMIUM (Lat.), n. n. Hij(hu6g)-i2-i(e2-i2)-o(o3)-kom'i2-u3m(u4m). From ὑγίεια, health, and κομεῖν, to take care of. A house or residence for convalescents or for the preservation of health. [A, 322.]

HYGIEIOLOGY, n. Hij-i2-e-o2l'o-ji2. See Hygiene.

HYGIENE, n. Hi-jen'. From ὑγιεινός, good for the health. Fr., *hygiène.* Ger., *H., Hygieine, Gesundheitspflege, Gesundheitslehre.* The science and art of the preservation of health.—**Arbeiterh'** (Ger.). The hygiene of occupations; the science which is concerned with the prevention of the injurious effects of certain occupations. [D, 18.]—**Fabrikh'** (Ger.). The h. of workshops. [L.]—**Pædiatric h.** The h. of children. [D, 50.]

HYGIENIC, adj. Hi-je2n'i2k. Fr., *hygiénique.* Ger., *hygienisch.* 1. Pertaining to health or to hygiene. [D.] 2. In a wholesome state, calculated to preserve the health.

HYGIENICS, n. sing. Hi-je2n'i2ks. See Hygiene.

HYGIENISM, n. Hi-jen'i2z'm. See Hygiene.

HYGIENIST, n. Hi-jen'i2st. One who makes a business or a study of hygiene.

HYGIENOUS, adj. Hi-jen'u3s. Gr., ὑγιεινός (from ὑγίεια, health). Healthy. [L, 107.]

HYGIEOLOGY, n. Hi-je-o2l'o-ji2. From ὑγίεια, health, and λόγος, understanding. Fr., *hygiéologie.* See Hygiene.

HYGIESIS (Lat.), n. f. Hi(hu6)-ji2(gi2)-e(a)'si2s. Gen., *-es'eos (-es'is).* See Hygiene.

HYGIOCOMIUM (Lat.), n. n. Hi(hu6)-ji2(gi2)-o(o3)-kom'i2-u3m(u4m). See Hygieiocomium.

HYGIODYNAMICS, HYGIOLOGY, n's. Hi-ji2-o-di2n-a2m'-i2ks, -o2l'o-ji2. From ὑγίεια, health, and δύναμις, power, or λόγος, understanding. See Hygiene.

HYGIOSTATICS, n. sing. Hi-ji2-o-sta2t'i2ks. From ὑγίεια, health, and ἱστάναι, to cause to stand. See Hygiene.

HYGRANSIS (Lat.), n. f. Hig(hu6g)-ra2n(ra3n)'si2s. Gen., *rans'eos (-rans'is).* Gr., ὕγρανσις (from ὑγράζειν, to be wet). Ger., *Feuchtwerden, Feuchtmachen.* A moistening or becoming moist. [L, 50 (α, 14).]

HYGRASIA (Lat.), n. f. Hig(hu6g)-ra(ra3)'zi2(si2)-a3. Gr., ὑγρασία (from ὑγράζειν, to be wet). Fr., *hygrasie.* Moisture. [A, 311 (α, 21); L, 50 (α, 14).]

HYGRECHEMA (Lat.), n. n. Hig(hu6g)-re2k(rach2)-e(a)'ma3. Gen., *-em'atos (-atis).* From ὑγρός, moist, and ἤχημα, sound. Fr., *hygréchème.* Ger., *Flüssigkeitslaut.* A sound indicative of the presence of fluid, as in the chest. [A, 322.]

HYGREDON (Lat.), n. f. Hig(hu6g)-red(rad)'o2n(on). Gen., *-red'onos (-onis).* Gr., ὑγρηδών. See Humor.

HYGREMPLASTRUM (Lat.), n. n. Hig(hu6g)-re2m-pla2s-(pla3s)'tru3m(tru4m). Gr., ὑγρέμπλαστρον (from ὑγρός, wet, and ἔμπλαστρον, a plaster). Of Pliny, a soft, moist plaster. [A, 312; L, 50 (α, 14).]

HYGRINE, n. Hig'ren. From ὑγρός, wet. Fr., *h.* Ger., *Hygrin.* It., *igrina.* A volatile alkaloid, found along with cocaine in the leaves of *Erythroxylon coca.* It is a dense, yellowish, oily liquid, of burning taste, and an odor resembling that of trimethylamine, soluble in water, and still more readily so in alcohol and ether. According to Hesse, it is an individual alkaloid, $C_{12}H_{13}N$, and may be regarded as trimethylquinoline, but C. Liebermann finds that it is composed of a series of liquid alkaloids. One of these, having the lower boiling point, $C_8H_{15}NO$, has the sp. gr. of 0·940 at 19° C., and another, with a higher boiling point, $C_{14}H_{24}N_2O$, has the sp. gr. of 0·982 at 180° C. [Lossen, "Ann. di chim. medico-farmac. e di farmacol.," Feb., 1885, pp. 124, 127 (B); "Ber. der dtsch. chem. Gesllsch."; "Proc. of the Am. Pharm. Assoc.," xxxvii (α, 14); B, 270 (α, 38).]

HYGROBATÆ (Lat.), n. f. Hig(hu6g)-ro2b'a2t(a3t)-e(a3-e2). From ὑγρός, wet, and βατεῖν, to tread. Of Illiger and others, a family of wading birds, comprising those with very long legs. [L, 180 (α, 39).]

HYGROBIUS (Lat.), adj. Hig(hu6g)-rob(ro2b)'i2-u3s(u4s). Gr., ὑγρόβιος (from ὑγρός, moist, and βίος, life). Fr., *hygrobié.* Of plants, growing in wet ground. [L, 41.] The *Hygrobiæ,* or *Hygrobieæ,* are the *Halorageæ.* [B, 121, 170 (α, 35).]

HYGROBLEPHARICI (Lat.), n. m. pl. Hig(hu6g)-ro(ro3)-ble2f-a2r(a3r)'i2-si(ke). From ὑγρός, moist, and βλέφαρον, the eyelid. An old term for the excretory ducts of the lacrymal gland. [F.]

HYGROBLEPHARISMUS (Lat.), n. m. Hig(hu6g)-ro(ro3)-ble2f-a2r(a3r)-i2z(i2s)'mu3s(mu4s). See Epiphora (2d def.).

HYGROBLEPHARON (Lat.), **HYGROBLEPHARUM** (Lat.), n's n. Hig(hu6g)-ro(ro3)-ble2f'a2r(a3r)-o2n, -u3m(u4m). 1. A moist state of the eyelids. 2. Hydroblepharon. [L, 50 (α, 14).]

HYGROBRONCHIORRHONCHUS (Lat.), n. m. Hig(hu6g)-ro(ro3)-bro2n2-ki2(ch2i2)-o2r-ro2n2k(ro2n2ch2)'u3s(u4s). From ὑγρός, moist, βρόγχια, the bronchial tubes, and ῥόγχος, rhonchus. Fr., *râle bronchial humide.* Ger., *feuchtes Bronchialrasselgeräusch.* A humid bronchial rhonchus. [L, 50 (α, 14).]

HYGROCATARACTA (Lat.), n. f. Hig(hu6g)-ro(ro3)-ka2t-(ka3t)-a3r-a2kt(a3kt)'a3. From ὑγρός, moist, and καταράκτης, a cataract. Ger., *flüssiger Staar.* An old term for a fluid cataract. [F.]

HYGROCELE (Lat.), n. f. Hig(hu6g)-ro(ro3)-se(ka)'le(la); in Eng., hig'ro-sel. Gen., *-cel'es.* From ὑγρός, moist, and κήλη, a tumor. See Hydrocele and Hydrocirsocele.

HYGROCHARIS (Lat.), n. f. Hig(hu6g)-ro2k(roch2)'a2r(a3r)-i2s. Gen., *-char'itos (-itis).* From ὑγρός, wet, and χάρις, grace. The genus *Nephrophyllum.* [B, 121 (α, 24).]

HYGROCIRSOCELE (Lat.), n f. Hig(hu6g)-ro(ro3)-su5rs-(ki2rs)-o(o3)-se(ka)'le(la); in Eng., hig-ro-su5rs'o-sel. Gen., *-cel'es.* From ὑγρός, wet, κιρσός, a varix, and κήλη, a tumor. See Hydrocirsocele.

HYGROCNISSORRHONCHUS (Lat.), n. m. Hig(hu6g)-ro-(ro3)-ni2s(kni2s)-so2r-ro2n2'ku3s(ch2u4s). From ὑγρός, wet, κνισσᾶν, to crackle like burning fat, and ῥόγχος, a snoring sound. Fr., *râle crépitant humide.* Ger., *feuchtes knisterndes Rasselgeräusch.* A humid, crackling rhonchus. [L, 50 (α, 14).]

HYGROCOLLYRIUM (Lat.), n. n. Hig(hu^{6}g)-ro(ro^3)-ko^{2}l-li^{2}r-(hu^{6}r)'i^2-u^{3}m(u^{4}m). Gr., ὑγροκολλύριον, ὑγροκολλούριον. Fr., *hydrocollyre*. An ancient name for a liquid collyrium.

HYGROCROCIS (Lat.), n. f. Hig(hu^{6}g)-ro^{2}k'ro^2-si^{2}s(ki^{2}s). Gen., *-croc'idos (-idis)*. From ὑγρός, wet, and κρόκος, saffron. 1. Of Agardh, the genus *Typhoderma*. 2. The genus *Mycoderma* of Persoon (1st def.). The *Hydrocrocinæ* of Reichenbach are a subdivision of the *Oscillatoriæ*. [B, 121, 170 (α, 24).]

HYGROCYSTIS (Lat.), n. f. Hig(hu^{6}g)-ro(ro^3)-si^{2}st(ku^{6}st)'i^{2}s. Gen., *-cyst'eos (-cyst'is)*. From ὑγρός, wet, and κύστις, a bladder. See HYDROCYST.

HYGROCYSTORRHONCHUS (Lat.), n. m. Hig(hu'g)-ro-(ro^3)-si^{2}st(ku^{6}st)-o^{2}r-ro^{2}n^2'ku^{3}s(ch^{2}u^{4}s). From ὑγρός, wet, κύστις, a bladder, and ῥόγχος, a snoring sound. Fr., *râle vesiculaire humide*. Ger., *feuchtes Blasenrusselgeräusch*. A humid, vesicular rhonchus. [L, 50 (α, 14).]

HYGROGEOPHILUS (Lat.), adj. Hig(hu^{6}g)-ro(ro^3)-je(ga)-o^{2}f'i^{2}l-u^{3}s(u^{4}s). From ὑγρός, wet, γῆ, the earth, and φιλεῖν, to love. Fr., *hygrogéophile*. Living upon the earth and in the water (said of molluscs). [L, 41 (α, 14).]

HYGROGRAPH, n. Hig'ro gra^{3}f. From ὑγρός, wet, and γράφειν, to write. An instrument for recording automatically the variations of atmospheric humidity. [L, 56.]

HYGRO-HÆMATOCELE (Lat.), n. f. Hig(hu^{6}g)-ro(ro^3)-he^{2}m(ha^3-e^{2}m)-a^{2}t(a^{3}t)-o(o^3)-se(ka)'le(la); in Eng., hig-ro-he^{2}m'a^{2}t-o-sel. From ὑγρός, wet, αἷμα, blood, and κήλη, a tumor. Fr., *hygrohématocèle*. A hydrocele of the tunica vaginalis propria, around and communicating with which a hæmatocele has formed. [Bureau, "Gaz. méd. de Paris," May 1, 1886, p. 205 (α, 40).]

HYGROLOGY, n. Hig-ro^{2}l'o-ji^2. Lat., *hygrologia* (from ὑγρός, wet, and λόγος, understanding). Fr., *hygrologie*. Ger., *Feuchtigkeitslehre*. The science of the fluids of the body. [L, 41, 50 (α, 14).]

HYGROM (Ger.), n. Hu^{6}g-rom'. See HYGROMA.—**H. der Augenhöhle.** See HYGROMA *of the orbit*.—**Reisskörperchenenthaltendes H.** See *Rice-grain* CYST.—**Schleimbeutelh'.** A tumor of a bursa mucosa.—**Sehnenscheidenh'.** See *Rice-grain* CYST.

HYGROMA (Lat.), n. n. Hig(hu^{6}g)-ro'ma^3. Gen., *-om'atos (-atis)*. From ὑγρός, wet. Fr., *h.*, *hygrome*. Ger., *H.*, *Hygrom*, *Wassergeschwulst*, *wässerige Balggeschwulst*. 1. A serous effusion into a bursa mucosa. 2. A cystic tumor containing usually a serous fluid. [D, 4.] 3. A genus of the *Bothriocephalidæ*. [Schranck (L, 16).]—**Cystic h.** Lat., *h. cysticum*. A tumor composed of a more or less dense fibrous sac lined by epithelium and filled with serous fluid. [α, 40.]—**H. blennorrhagique** (Fr.). A serous effusion into a bursa due to gonorrhœal rheumatism. [L, 88 (α, 40).]—**H. cellulocysticum congenitale.** A congenital cystoid h., of rapid growth, occurring in the neck, axilla, perinæum, or sacral region. [A, 326 (α, 21).]—**H. colli cysticum congenitum.** See *Congenital* HYDROCELE *of the neck*.—**H. cysticum.** See *Cystic h.*—**H. duræ matris.** See MENINGOCELE.—**H. gangliodes.** A serous cyst formed between the layers of the sheaths of tendons which may or may not communicate with the cavity of the sheath. [α, 40.]—**H. gastrocnemii.** A h. situated on the inner side of the popliteal space. [Albert (A, 319 [α, 21]).]—**H. iliacum posterius.** Of Chassaignac, a h. situated between the posterior superior spine of the ilium and the fascia. [Albert (A, 319 [α, 21]).]—**H. infrapatellare profundum.** An elastic tumor anterior to the ligamentum patellæ, which may interfere with bending of the knee. [Albert (A, 319 [α, 21]).]—**H. of the neck.** See *Congenital* HYDROCELE *of the neck*.—**H. of the orbit.** Fr., *hygrome de l'orbite*. Ger., *Hygrom der Augenhöhle*. A variety of exudation cyst, first described by Hyrtl, consisting in dropsy of the bursa of the tendon of the superior oblique muscle of the eye or of the bursa sometimes found between the levator palpebræ superioris and the rectus superior muscle. [F.]—**H. olecrani.** A flat, roll-shaped, soft, elastic tumor, occurring on the inner side of the olecranon, sometimes containing, besides the synovial fluid, bodies like grains of rice. [Albert (A, 319 [α, 21]).]—**H. patellæ.** See *H. præpatellare*.—**H. poplitei.** See *H. bursæ mucosæ tendinis poplitei*.—**H. præpatellare.** Fr., *h. prérotulien*. A painful tumor in front of the patella, consisting of a subcutaneous, subfascial, or subaponeurotic enlarged bursa mucosa. [Albert (A, 319 [α, 21]); A. 326 (α, 21).]—**H. prætibiale.** A h. of the bursa prætibialis. [Albert (A, 319 [α, 21]).]—**H. prérotulien** (Fr.). See *H. præpatellare*.—**H. serrato-subscapulare.** A h. formed between the subscapularis and the serratus magnus muscles. [Albert (A, 319 [α, 21]).]—**H. subacromiale.** A cystic tumor developed by supersecretion or inflammation of the subacromial bursa. It lies between the acromion process, the coraco-acromial ligament, and the capsule of the joint. [α, 40.]—**H. subiliacum.** A bursal h., situated between the anterior surface of the pubic bone and the hip joint. [Albert (A, 319 [α, 21]).]—**H. suprageuuale.** A bursal h. situated just above the patella. [Albert (A, 319 [α, 21]).]—**H. trochantericum.** A little subcutaneous or a large subaponeurotic bursal h. situated over the great trochanter of the femur. [Albert (A. 319 [α, 21]).]—**Sacral h.** Fr., *hygrome sacré*. A cystic tumor developed by supersecretion of the sacro-coccygeal bursa, usually congenital. [α, 40.]—**Sub-hyoid h.** A bursal tumor situated just above the cricoid cartilage and varying in size from that of a small hazel-nut to that of a hen's egg. [α, 40.]—**Thyreo-hyoid h.** Fr., *h. thyréo-hyoïdien*, *kyste de Boyer*. A serous cyst formed by the distention of the bursa of the ligament of the thyreo-hyoid muscle. [Laurent, "Clinique," June 13, 1889 (α, 40).]

HYGROMATOUS, adj. Hig-ro^{2}m'a^{2}t-u^{3}s. Pertaining to or affected with hygroma. [L, 180.]

HYGROME (Fr.), n. E-grom. See HYGROMA.—**H. de l'orbite** (Fr.). See HYGROMA *of the orbit*.

HYGROMETER, n. Hig-ro^{2}m'e^{2}t-u^{3}r. Lat., *hygrometrum* (from ὑγρός, wet, and μέτρον, a measure). Fr., *hygromètre*. Ger., *H*. It., *igrometro*. Sp., *higrómetro*. An instrument for measuring the amount of moisture in the air, either by absorption (as with hygroscopic substances), by condensation (with dew-point instruments), or by evaporation (with wet-and-dry-bulb thermometers).

HYGROMÈTRE (Fr.), n. E-gro-me^{2}tr'. See HYGROMETER.

HYGROMETRIC, adj. Hig-ro-me^{2}t'ri^{2}k. Lat., *hygrometricus*. 1. Pertaining to hygrometry. [L, 49.] 2. In botany, possessing the property of moving under the influence of moisture, as in the spiral curving of the awns of certain grasses when moisture is absorbed; often used in the Latin as a specific name (*e. g.*, *Funaria hygrometrica*, *Lentinus hygrometricus*). [B, 229, 308 (α, 35).]

HYGROMETRICITY, n. Hig-ro-me^{2}t-ri^{2}s'i^{2}t-i^2. Fr., *hygrométricité*. The state of being hygrometric. [A, 301.]

HYGROMETRY, n. Hig-ro^{2}m'e^{2}t-ri^2. Fr., *hygrométrie*. Measurement of the moisture of the air. [L, 104.]

HYGROMYCES (Lat.), n. m. Hig(hu^{6}g)-ro^{2}m'i^{2}s(u^{6}k)-ez(as). Gen., *-et'os (-et'is)*. From ὑγρός, wet, and μύκης, a fungus. Ger., *Wasserschwamm*. Of Ritgen, a water-fungus. [B, 78 (α, 14).]

HYGROMYRON (Lat.), **HYGROMYRUM** (Lat.), n's n. Hig-(hu^{6}g)-ro^{2}m'i^{2}r(u^{6}r)-o^{2}n, -u^{3}m(u^{4}m). Gr., ὑγρόμυρον (from ὑγρός, wet, and μύρον, an ointment). A perfumed oil or nearly liquid ointment. [L, 50 (α, 14).]

HYGRON (Lat.), n. n. Hig(hu^{6}g)'-ro^{2}n. Gr., ὑγρόν. Moisture or a liquid. [Hippocrates (A, 311).]

HYGROPÆDOPHLYSIS (Lat.), n. f. Hig(hu^{6}g)-ro(ro^3)-pe^{2}d-(pa^3-e^{2}d)-o^{2}f'li^{2}s(lu^{6}s)-i^{2}s. Gen., *-lys'eos (-oph'lysis)*. From ὑγρός, moist, παῖς, a child, and φλύσις, an eruption. Ger., *feuchtende Kinderhitzblattern*. Moist eczema in children. [L, 50 (α, 14).]

HYGROPHANOUS, adj. Hig-ro^{2}f'a^{2}n-u^{3}s. From ὑγρός, moist, and φαίνειν, to appear. Of *Fungi*, having a watery, somewhat translucent appearance when moist, opaque when dry. The *Hygrophani* of Fries are a section of the *Pholiota* so characterized. [B, 121, 308 (α, 35).]

HYGROPHILA (Lat.), n. f. Hig(hu^{6}g)-ro^{2}f'i^{2}l-a^3. From ὑγρός, wet, and φιλεῖν, to love. Fr., *hygrophile*. A genus of the *Acanthaceæ*, tribe *Ruellieæ*. The *Hygrophileæ* of Bentham and Hooker are a subtribe of the same class and tribe. [B, 32, 42 (α, 24).]—**H. longifolia.** See *H. spinosa*.—**H. obovata.** A species found in the East Indies. The leaves are used to reduce œdematous swellings. [B, 180 (α, 24).]—**H. ringens.** A species found in Malabar, where the leaves are used, together with salt, as a depurative. [B, 173 (α, 24).]—**H. spinosa.** Ger., *langblättriger Sterndorn*. A prickly species found in the East Indies and Ceylon, where the root and leaves are considered tonic and diuretic, and the seeds diuretic and aphrodisiac. European investigators concur as to the powerful diuretic action of the plant. [B, 5, 42, 172, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxxvi (α, 14).]

HYGROPHILUS (Lat.), adj. Hig(hu^{6}g)-ro^{2}f'i^{2}l-u^{3}s(u^{4}s). From ὑγρόν, moisture, and φιλεῖν, to love. Fr., *hygrophile*. In botany and zoology, found naturally in moist places. [B, 121 (α, 24).]

HYGROPHOBIA (Lat.), n. f. Hig(hu^{6}g)-ro(ro^3)-fob(fo^{2}b)'i^2-a^3. From ὑγρόν, moisture, and φόβος, fear. See HYDROPHOBIA.

HYGROPHORUS (Lat.), n. m. Hig(hu^{6}g)-ro^{2}f'o^{2}r-u^{3}s(u^{4}s). From ὑγρός, moisture, and φορεῖν, to bear. A genus of *Fungi*, separated from *Agaricus* (*q. v.*, 36) because of their waxy gills and granular intermediate substance. [B, 19 (α, 24).]—**H. conicus.** Fr., *flèche rouge*. One of the commonest species, varying in color between yellow and scarlet, and turning black when bruised. [B, 19 (α, 24).]—**H. cossus.** A species having a strong odor; according to some, a variety of *H. eburneus*. [B, 61; B, 173 (α, 24).]—**H. eburneus.** Fr., *blanc d'ivoire*. Ger., *Elfenbeinschwamm*. A species eaten in Italy. [B, 61; B, 173 (α, 24).]—**H. involutus.** A species found in fields and woods, with a compact pileus, a fleshy pale stipe, and solid, firm lamellæ. [B, 148 (α, 24).]—**H. niveus.** A species found in northern Europe, having a whitish, gray, or yellow color, a fleshy pileus, and a short stipe. [B, 48 (α, 24).]—**H. pratensis.** A species found in open pastures in England and on the Continent, where it is eaten. [B, 61 (α, 24).]—**H. psittacinus.** A many-tinted species found in Europe and the United States. [B, 19 (α, 24).]—**H. virgineus.** Fr., *petite-oreille*. Ger., *Jungfernschwamm*. A very small, edible species, growing in England and on the Continent. [B, 49, 105.]

HYGROPHTHALMIA (Lat.), n. f. Hig(hu^{6}g)-ro^{2}f-tha^{2}l(tha^{3}l)'-mi^2-a^3. From ὑγρός, wet, and ὀφθαλμία, ophthalmia. Ger., *feuchte Ophthalmie*. An old term for irritation or inflammation of the eyeball or eyelids, accompanied by profuse lacrymation. [F.]

HYGROPHTHALMIC, adj. Hig-ro^{2}f-tha^{2}l'mi^{2}k. Pertaining to hygrophthalmia; as a n., a person affected with hygrophthalmia.

HYGROPISSA (Lat.), **HYGROPISSON** (Lat.), n's f. and n. Hig(hu^{6}g)-ro(ro^3)-pi^{2}s'sa^3, -so^{2}n. Gr., ὑγρόπισσα, ὑγρόπισσον (from ὑγρός, liquid, and πίσσα, pitch). Liquid pitch. [Galen (A, 311).]

HYGROPLASMA (Lat.), n. n. Hig(hu^{6}g)-ro(ro^3)-pla^{2}z(pla^{3}s)'-ma^3. Gen., *-plasm'atos (-atis)*. From ὑγρός, wet, and πλάσμα, formed matter. Of Naegeli, the fluid part of protoplasm. [α, 24.]

HYGRORRHONCHUS (Lat.), n. m. Hig(hu^{6}g)-ro^{2}r-ro^{2}n^{2}k-(ro^{2}n^{2}ch^2)'u^{3}s(u^{4}s). From ὑγρός, moist, and ῥόγχος, a rattle. Fr., *râle humide*. Ger., *feuchtes Rasselgeräusch*. A moist rhonchus. [A, 322.]

HYGROS (Lat.), adj. Hig(hu^{6}g)'ro^{2}s. Gr., ὑγρός. Moist, watery, liquid; of the bowels, loose. [Hippocrates (A, 311 [α, 17]).]

HYGROSARCA (Lat.), n. f. Hig(hu^{6}g)-ro(ro^3)-sa^{3}rk'a^3. Fr., *hygrosarque*. Œdema. [A. 385.]

HYGROSARCUS (Lat.), adj. Hig(hu^{6}g)-ro(ro^3)-sa^{3}rk'u^{3}s(u^{4}s). From ὑγρός, wet, and σάρξ, flesh. Pertaining to a soft or flabby condition of the flesh. [L, 50 (α, 21).]

HYGROSCOPE, n. Hig'ro-skop. Lat., *hygroscopium* (from ὑγρός, wet, and σκοπεῖν, to examine). Fr., *h.* Ger., *Hygroskop.* See HYGROMETER.

HYGROSCOPIC, adj. Hig-ro-sko2p'i2k. Lat., *hygroscopicus.* Fr., *hygroscopique.* Ger., *hygroskopisch.* Fit or adapted for giving evidence of moisture; hence, capable of readily absorbing moisture. [B.]

HYGROSCOPICITY, HYGROSCOPISM, n's. Hig-ro-skop-i2s'i2t-i2, -ro2s'kop-i2z'm. From ὑγρός, wet, and σκοπεῖν, to examine. The property possessed by plants or plant-organs by which one part either absorbs water more readily than another, or parts with it more quickly, causing rupture of the organ, or giving rise to movements which favor germination. [B, 19, 291 (α, 24).]

HYGROSCOPY, n. Hig-ro2s'ko-pi2. See HYGROMETRY.

HYGROSYPHILODOCHTHUS (Lat.), n. m. Ger., *feuchtes Knotensyphilid.* A moist tubercular syphilide. [L, 50 (α, 14).]

HYGROTES (Lat.), n. f. Hig(hu6g)'ro2t-ez(as). Gen., *-et'os (-et'is).* Gr., ὑγρότης. Fr., *hygrote.* Ger., *Feuchtigkeit.* 1. Humidity. 2. A humor. [L, 50 (α, 14).]

HYGRUM (Lat.), n. n. Hig(hu6g)'ru3m(ru4m). See HYGRON.

HYGRUSINA (Lat.), n. f. Hig(hu6g)-ru2(ru)-sin(sen)'a3. From ὑγρός, wet, and οὐσία, an essence. Fr., *hygrusine.* The fine part of essential oils (*i. e.*, the part which remains liquid at a zero temperature). [Bizio (L, 41, 180).]

HYLÆPYRRHYNCHI (Lat.), n. m. pl. Hil(hu6l)-e(a3-e2)-pi2r-(pu6r)-ri2n2(ru6n2)'ki(ch2e). From ὕλη, a wood, αἰπύς, high, and ῥύγχος, a snout. Of J. A. Ritgen, a family of sylvan birds comprising those which have their bills elevated. [L, 180 (α, 39).]

HYLE (Lat.), n. f. Hil(hu6l)'e(a). Gen., *hyl'es.* Gr., ὕλη. The primal matter, mass, or body in nature. [L, 30, 50 (α, 14).]—**H. iatrice.** Any medicinal substance. [A, 322.]

HYLEBATOUS, adj. Hil-e2b'a2t-u3s. Lat., *hylebatis* (from ὕλη, matter, and βαίνειν, to go). Fr., *hylébate.* Frequenting the woods; living in the underbrush. [L, 41 (α, 14).] The *Hylebata* of Vieillot are a family of sylvan birds comprising those which, owing to the peculiar arrangement of their feet, live only in the underwood. [L, 180 (α, 39).]

HYLISIS (Lat.), **HYLISMUS** (Lat.), n's f. and m. Hil(hu6l)'-i2-si2s, -i2z(i2s)'mu3s(mu4s). Gen., *-is'eos (hyli'sis), -is'mi.* Gr., ὕλισις, ὑλισμος. Filtering, percolation. [L, 50 (α, 14).]

HYLISTER (Lat.), **HYLISTERION** (Lat.), **HYLISTRION** (Lat.), **HYLISTRIUM** (Lat.), n's m., n., n., and n. Hil(hu6l)-i2st'-u6r(ar), -i2st-e(a)'ri2-o2n, -i2st'ri2-o2n, -u3m(u4m). Gr., ὑλιστήρ, ὑλιστήριον, ὑλίστριον. Ger., *Durchseiher.* A strainer or filter. [L, 135 (α, 39).]

HYLOCLASMOPTENOUS, adj. Hil-o-kla2z-mo2p-ten'u3s. From ὕλη, a wood, κλᾶν, to break, and πτηνός, winged. Of J. A. Ritgen, fitted to crush objects with the bill. The *Hyloclasmopteni* are a section of sylvan birds so characterized. [L, 180 (α, 39).]

HYLOGENESIS (Lat.), n. f. Hil(hu6l)-o(o3)-je2n(ge2n)'e2-si2s. Gen., *-es'eos (-gen'esis).* From ὕλη, matter, and γεννᾶν, to produce. Ger., *Stoffbildung, Massenbildung.* The origin or formation of matter. [L, 30, 50 (α, 14).]

HYLOGNOSIA (Lat.), n. f. Hil(hu6l)-o(o3)-no(gno)'zi2(si2)-a3. From ὕλη, matter, and γνῶσις, knowledge. See HYLOLOGY.

HYLOLOGY, n. Hil-o2l'o-ji2. From ὕλη, matter, and λόγος, understanding. Ger., *Stofflehre, Elementenkunde.* The science of elementary bodies or crude material. [L, 30, 50, 107 (α, 14).]

HYLOPATHISM, n. Hil-o2p'a2th-i2z'm. Lat., *hylopathismus.* From ὕλη, matter, and πάθος, disease. 1. The theory of the sentiency of matter. 2. Any disease due to excess, deficiency, or defective constitution of matter. [L, 30, 50, 56 (α, 14).]

HYLOPHAGOUS, adj. Hil-o2f'a3-gu3s. Gr., ὑλοφάγος (from ὕλη, wood, and φαγεῖν, to devour). Lat., *hylophagus.* Subsisting on wood. [L, 30 (α, 14).]

HYLOPTENOUS, adj. From ὕλη, a wood, and πτηνός, winged. Of J. A. Ritgen, living in the woods. The *Hylopteni* are sylvan birds. [L, 180 (α, 39).]

HYLORTHORRHYNCOUS, adj. Hil-o2rth-o2r-ri2n2k'u3s. From ὕλη, a wood, ὀρθός, straight, and ῥύγχος, a sword. Of J. A. Ritgen, having a straight beak or bill. The *Hylorthorrhynchi* are a class of sylvan birds so characterized. [L, 180 (α, 39).]

HYLOS, n. An old term for prolapse of the iris. [F.]

HYLOTROPIA (Lat.), n. f. Hil(hu6l)-o(o3)-trop(tro2p)'i2-a3. From ὕλη, matter, and τρέπειν, to turn. Fr., *hylotropie.* Ger., *Stoffwandel.* In chemistry, a conversion of matter. [L, 50 (α, 14).]

HYLOTRYPANOPTENOUS, adj. Hil-o-tri2p-a2n-o2p-ten'u3s. From ὕλη, wood, τρυπᾶν, to bore, and πτηνός, winged. Of J. A. Ritgen, having a bill fitted for boring or piercing. The *Hylotrypanopteni* are a section of sylvan birds so characterized. [L, 180 (α, 39).]

HYLOZOISM, n. Hil-o-zo'i2z'm. Lat., *hylozoismus* (from ὕλη, matter, and ζωή, life). Fr., *hylozoïsme.* A theory attributing to matter both primal existence and life as one of its original properties. [L, 30, 41, 49, 50 (α, 14).]

HYLUM (Lat.), **HYLUS** (Lat.), n's n. and m. Hil(hu6l)'u3m-(u4m), -u3s(u4s). See HILUM.

HYMEN (Lat.), n. m. Hi(hu6)'me2n(man). Gen., *hym'enos (-enis).* Gr., ὑμήν. Fr., *h.* Ger., *H., Scheidenklappe* (2d def.), *Jungfernhäutchen* (2d def.). It., *imene.* Sp., *himen.* 1. Any membrane. 2. A thin fold of mucous membrane, of varying shape, but usually crescentic, which, in the virgin, closes the ostium vaginæ more or less completely. It is commonly attached to the posterior portion of the vulvo-vaginal ring.—**Annular h.** See *H. annularis.*—**Bifenestrate h.** See *H. biperforatus.*—**Bilabiate h., Bilobate h.** Fr., *h. bilobé.* A h. separated into two parts by a slit. [α, 29.]—**Bridled h.** See *H. columnatus.*—**Cribriform h.** See *H. cribriformis.*—**Double h.** See *H. multiplex.*—**Fringed h.** See *H. fimbriatus.*—**Horseshoe h.** Fr., *h. en fer à cheval.* A h. which is disposed on three sides of the orifice of the vagina so as to be shaped like a horseshoe. [A, 38 (α, 29).]—**H. à bords déchiquetés** (Fr.). See *H. denticulatus.*—**H. annularis.** Fr., *h. (de forme) annulaire.* Ger., *ringförmiger H.* That form which is attached to the whole circumference of the ostium vaginæ, with an opening in the central portion. [A, 15.]—**H. biperforatus.** A h. which presents two openings. [α, 29.]—**H. columnatus.** Fr., *h. en bride.* That form in which the h. is divided by a median fleshy bridge which extends into the vagina, and is apparently the remains of the median sæptum between the two Müllerian ducts. [Dohrn, "Ztschr. f. Geb. u. Gyn.," xi, 1; "Ctrlbl. f. Gyn.," June 20, 1885, p. 390.]—**H. cribriformis.** Fr., *h. criblé.* Ger., *siebförmiger H.* A h. with a number of small openings in it. [Dohrn, *l. c.*]—**H. de forme annulaire** (Fr.). See *H. annularis.*—**H. de forme semilunaire** (Fr.). See *H. semilunaris.*—**H. denticulatus.** Fr., *h. à bords déchiquetés.* That form in which the free border is serrated. [Dohrn, *l. c.*]—**H. diaphratton.** Gr., ὑμὴν διαφράττων. A mediastinal membrane. [A, 322.]—**H. en bride** (Fr.). See *H. columnatus.*—**H. en fer à cheval** (Fr.). See *Horseshoe h.*—**H. fimbriatus.** That variety in which the free border and often the two surfaces are shaggy with delicate papillary outgrowths. [Dohrn, *l. c.*]—**H. hypertrophicus.** A hypertrophic state of the hymen, rarely affecting the whole structure, but affecting especially the part nearest the meatus urinarius. [Dohrn, *l. c.*]—**H. imperforatus.** See *Imperforate h.*—**H. infundibuliformis.** A h. which projects in the form of a funnel. [Dohrn, *l. c.*]—**H. linguiformis.** That malformation of the h. in which a polypoid outgrowth from its posterior portion projects between the labia majora. [Dohrn, *l. c.*]—**H. multiplex.** Syn: *double h.* The condition in which there is a membranous constriction of the vagina, resembling the h., above the latter. [Dohrn, *l. c.*]—**H. sæptus.** A form in which the opening is divided by a vertical median vaginal partition consisting of an extension of the posterior columna. [Dohrn, *l. c.*] Cf. *H. columnatus.*—**H. subsæptus.** A variety of h. septus in which two median partition-like structures, from the anterior and posterior columna, respectively, approach each other, but do not unite. [Dohrn, *l. c.*]—**H. semilunaris.** Fr., *h. (de forme) semi-lunaire.* That form of h. annularis in which the preponderance of the posterior portion is shown to an unusual degree. [Dohrn, *l. c.*]—**H. septus.** See *H. sæptus.*—**H. subseptus.** See *H. subsæptus.*—**Imperforate h.** Lat., *h. imperforatus.* Fr., *h. imperforé.* That form in which there is no opening, so that the ostium vaginæ is wholly occluded.—**Ringförmiger H.** (Ger.). See *H. annularis.*—**Semilunar h.** See *H. semilunaris.*—**Siebförmiger H.** (Ger.). See *H. cribriformis.*

HYMENÆA (Lat.), n. f. Hi(hu6)-me2n-e'(a3'e2)-a3. Fr., *hyménée.* Ger., *Lokustbaum, Heuschreckenbaum.* Of Linnæus, a genus of leguminous trees, of the *Amherstieæ*, suborder *Cæsalpinieæ.* [B, 19, 42, 173, 180 (α, 24).]—**H. candolliana, H. confertiflora.** Species found in Mexico and Brazil, having properties like those of *H. courbaril.* [B, 180 (α, 24).]—**H. courbaril.** Fr., *(hyménée) courbaril.* Ger., *gemeiner Lokustbaum* (oder *Heuschreckenbaum*). West Indian locust-tree; a species called *algarroba* in Panama, *jatai* in Brazil, *simiri* in Guiana, and *cuapinole* in Mexico. It furnishes a variety of copal (see *Brown American* ANIME) from which an excellent varnish is made, and which is also used in Brazil in pectoral disorders. The leaves are used as a vermifuge, and the inner bark is a mild purgative. The pulp of the pod, in which the seeds are imbedded, is eaten when ripe by the natives. [B, 5, 19, 173, 180, 185 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**H. hornemanniana.** The *Trachylobium hornemannianium.* [B, 42, 185 (α, 24).]—**H. latifolia.** A species found in Brazil. It yields a copal like that of *H. courbaril.* [B, 180 (α, 24).]—**H. martiana.** Fr., *hyménée de Martius.* A species found in Brazil, yielding copal. [B, 173, 180 (α, 24).]—**H. mozambicensis.** The *Trachylobium mozambicense.* [B, 5, 42 (α, 24).]—**H. olfersiana, H. sellowiana, H. stigonocarpa, H. stilbocarpa.** A species found in Brazil, yielding copal. [B, 180 (α, 24).]—**H. venosa.** A species found in Guiana, yielding copal. [B, 180 (α, 24).]—**H. verrucosa.** Fr., *hyménée verruqueuse.* The *Trachylobium verrucosum.* [B, 42, 185 (α, 24).]

HYMENAL, adj. Hi'me2n-a2l. Lat., *hymenicus.* Fr., *hyménal.* Pertaining to the hymen (2d def.). [A, 322.]

HYMÈNE (Fr.), n. E-me2n. See HYMENIUM.

HYMÉNÉE (Fr.), n. E-ma-na. 1. Of Persoon, see HYMENIUM. 2. See HYMENÆA.—**H. de Martius.** See HYMENÆA *martiana.*—**H. d'Occident.** See HYMENÆA *stilbocarpa.*

HYMENELYTROUS, adj. Hi-me2n-e2l'i2t-ru3s. Fr., *hyménélytre.* Having the wing-covers membranous. The *Hymenelytra* of Latreille and Eichwald are a family of *Hemiptera*, comprising those insects which have membranous elytra. [L, 180 (α, 39).]

HYMENIAL, adj. Hi-me'ni2-a2l. Fr., *hyménial.* Pertaining to the hymenium. [A, 385.]

HYMENIC, adj. Hi-me2n'i2k. See HYMENAL.

HYMENICOLAR, adj. Hi-me2n-i2k'ol-a3r. From ὑμένιον, the hymenium, and *colere*, to inhabit. Inhabiting the hymenium. [Cooke (α, 35).]

HYMÉNION (Fr.), n. E-ma-ne-o2n2. Of Noulet and Danier, see HYMENIUM.

HYMENITIS (Lat.), n. f. Hi(hu6)-me2n-i(e)'ti2s. Gen., *-it'idos (-idis).* From ὑμήν, a membrane (see also *-itis**). Inflammation of an internal free membrane, especially of the hymen (2d def.). [L, 30, 50, 107 (α, 14).]

HYMENIUM (Lat.), n. n. Hi(hu6)-men(me2n)'i2-u3m(u4m). Gr., ὑμένιον (dim. of ὑμήν, a membrane). Fr., *hymène, hyménée, hyménium, hyménion.* Ger., *Schlauchschichte, Sporenschichte.* The fructifying surface in *Fungi*, the layer of spore-bearing cells in or on a sporocarp. [B, 1, 19, 123, 291 (*a*, 24).]

HYMENOCALLIS (Lat.), n. f. Hi(hu6)-me2n-o(o3)-ka2l(ka3l)'-li2s. Ger., *Hautlilie.* Of Salisbury, a genus of the *Amaryllidaceæ*, tribe *Amarylleæ*. [B, 42, 180 (*a*, 24).]—**H. amœna, H. caribæa.** Species found in the West Indies. The bulbs are used as an emollient application to inflammatory swellings. [B, 180 (*a*, 24).]—**H. mexicana.** A species found in South America and Central America, by some botanists identified with *H. rotata.* The bulbs are used like squills. [B, 34, 180 (*a*, 24).]—**H. ovata, H. patens.** A species found in the West Indies having the same properties as *H. amœna.* [B, 180 (*a*, 24).]—**H. rotata.** A species found in marshes and low grounds, along streams, throughout the southern United States. Its bulb is used like squill. [B, 34, 180 (*a*, 24).]

HYMENOCARPOUS, adj. Hi-me2n-o-ka2rp'u3s. Having the apothecia borne on a membrane—that is, on a foliaceous thallus. The *Hymenocarpi* are: Of Meyer, an order (of Link, a suborder) of lichens consisting of *Parmelia* and other foliaceous lichens, and corresponding to the *Hymenothalami* of Link. [B, 121, 170 (*a*, 35).]

HYMENOCHONDRODES (Lat.), adj. Hi(hu6)-me2n-o(o3)-ko2n(ch2o2n)-drod'ez(as). From ὑμήν, a membrane, χόνδρος, cartilage, and εἶδος, resemblance. Fr., *hyménochondroïde.* Ger., *Hautknorpelgewebe.* Of Heusinger, partly membranous and partly cartilaginous. [A, 385; L. 50 (*a*, 14).]

HYMENODES (Lat.), adj. Hi(hu6)-me2n-od'ez(as). Gr., ὑμενώδης (from ὑμήν, a membrane, and εἶδος, resemblance). Fr., *hyménoïde.* Resembling a membrane; membranous in texture; as a n., (1) of Hippocrates, a substance, such as the blood in certain fevers and the urine in hectic states, which easily forms membranous deposits; (2) of P. de Beauvois, his fourth order of *Musci.* [B, 1, 19 (*a*, 24); L, 50 (*a*, 14).]

HYMENODICTYON (Lat.), n. n. Hi(hu6)-me2n-o(o3)-di2kt'i2-(u6)-o2n. From ὑμήν, a membrane, and δίκτυον, a net. A genus of the *Rubiaceæ*, tribe *Cinchoneæ.* [B, 42 (*a*, 24).]—**H. excelsum.** Tel., *pundaroo.* Bomb., *kara kurwah.* A species found in Ceylon and the East Indies. The inner bark, when fresh, is more bitter and astringent than cinchona-bark, for which it is locally substituted. It contains hymenodictyonine and a bitter neutral principle, $C_{22}H_{43}O_{10}$. [B, 5, 19, 172, 173, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxv, xxxi, xxxii (*a*, 14).]—**H. flaccidum.** A species found in the East Indies, said to furnish the cinchona of Sheopore. [B, 490.]—**H. horsfieldianum.** The *H. excelsum.* [B, 212.]—**H. obovatum.** A species known as *suffed kurwah* in Bombay, where the bark is used by the natives as a tonic. ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14).]—**H. thyrsiflorum.** The *H. excelsum.* [B, 212.]—**H. utile.** A species common in the Paulghaut jungles, India, and in Malabar. The wood is of a loose texture, soft and hygrometric. By some it is identified with *H. excelsum.* [B, 212; B, 19, 172 (*a*, 24).]

HYMENODICTYONINE [Naylor], n. Hi-me2n-o-di2k'ti2-o2n-en. An alkaloid allied to quinoidine, berberine, and paricine; found in the bark of *Hymenodictyon excelsum.* ["Brit. and Colon. Drug.," Sept. 4, 1886, p. 243; "Proc. of the Am. Pharm. Assoc.," xxxiii, xxxv (*a*, 14).]

HYMENOGANGLIITIS (Lat.), n. f. Hi(hu6)-me2n-o(o3)-ga2n2-(ga2n2)-gli2-l(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὑμήν, a membrane, and γαγγλίον, a ganglion (see also *-itis**). A mild form of sporadic cholera. [A, 322.]

HYMENOGASTEREÆ (Lat.), **HYMENOGASTEREI** (Lat.), **HYMENOGASTERES** (Lat.), **HYMENOGASTREÆ** (Lat), **HYMENOGASTREI** (Lat.), n's f., m., f., f., and m. Hi-hu6)-me2n-o(o3)-ga2s(ga3s)-te2r'e2-e(a3-e2), -i(e), -ga2s(ga3s)'te2r-ez-(e2s), -tre2-e(a3-e2), -tre2-i(e). From ὑμήν, a membrane, and γαστήρ, the stomach. A subdivision of *Fungi*, of the *Gasteromycetes*, resembling the truffles in habit. [B, 77, 121, 291 (*a*, 24).]

HYMENOGASTRIC, adj. Hi-me2n-o-ga2s'tri2k. Of birds, having a membranous stomach. [L, 107, 180.]

HYMENOGENY, n. Hi-me2n-o2j'e2n-i2. From ὑμήν, a membrane, and γεννᾶν, to produce. Fr., *hyménogénie.* The production of a pellicle by the simple contact of two liquids, as when a drop of liquid albumin falls into a liquid fat. [L, 41 (*a*, 14).]

HYMENOGRAPHY, n. Hi-me2n-o2g'ra2f-i2. From ὑμήν, a membrane, and γράφειν, to describe. Fr., *hyménographie.* Ger., *Hautbeschreibung.* See HYMENOLOGY.

HYMENOID, adj. Hi'me2n-oid. See HYMENODES.

HYMENOLICHENES (Lat.), n. m. pl. Hi(hu6)-me2n-o(o3)-lik(lech2)-en(an)'ez(e2s). From ὑμήν, a membrane, and λειχήν, a lichen. See HYMENOMYCETES.

HYMENOLOGY, n. Hi-me2n-o2l'o-ji2. Lat., *hymenologia* (from ὑμήν, a membrane, and λόγος, understanding). Fr., *hyménologie.* The anatomy, etc., of membranes. [A, 322.]

HYMENOLOPIS (Lat.), n. f. Hi(hu6)-me2n-o2l'o2p-i2s. Gen., *-op'idos* (*-idis*). A genus of the *Tæniadæ* in the larval state. [Weinland (L, 16).]—**H. flavopuncta.** See TÆNIA *flavopuncta.*

HYMENOMALACIA (Lat.), n. f. Hi(hu6)-me2n-o(o3)-ma2l-(ma3l)-a(a3)'si2(ki2)-a3. From ὑμήν, a membrane, and μαλακία, softness. Ger., *Hauterweichung.* Softening of the serous membranes. [L, 50, 107 (*a*, 14).]

HYMENOMYCETAL, adj. Hi-me2n-o-mi-set'a2l. See HYMENOMYCETOUS.

HYMENOMYCETES (Lat.), n. m. pl. Hi(hu6)-me2n-o(o3)-mi-(mu6)-set(kat)'ez(e2s). From ὑμήν, a membrane, and μύκης, a fungus. Fr., *hymenomycètes, hyméniés.* Ger., *Hautpilze, Hutpilze.* A division of the *Basidiomycetes*, in which the hymenium, when the spores ripen, occupies the outer surface of the sporocarpi, and including the *Agaricini, Polyporei, Hydnei, Auricularini,* and *Clavariei* (*i. e.*, all the edible mushroom [*Fungi*] and many of the poisonous species). They are generally of considerable size and non-parasitic. The *Hymenomyci* of Roques are the same. [B, 19, 77, 291 (*a*, 24); L, 164 (*a*, 27).]

HYMENOMYCETOUS, adj. Hi-me2n-o-mi-set'u3s. Of or pertaining to the *Hymenomycetes.* [B.]

HYMENONEMA (Lat.), n. n. Hi(hu6)-me2n-o(o3)-ne(na)'ma3. Gen., *-em'atos* (*-atis*). From ὑμήν, a membrane, and νῆμα, a thread. Fr., *hyménonème.* Of Cassini, a genus of the *Compositæ*, tribe *Cichoriaceæ.* [B, 42 (*a*, 24).]—**H. græcum, H. Tournefortii.** A species indigenous to the eastern Mediterranean regions, probably the ἱεράκιον μικρόν of Dioscorides; used in gastric disorders, and externally to reduce inflammation. [B, 42, 180 (*a*, 24).]

HYMENOPHORE, n. Hi-me2n'o-for. Lat., *hymenophorum* (from ὑμήν, a membrane, and φορεῖν, to bear). Ger., *Schlauchschichtträger, Sporenschichtträger, Schlauchschichtboden, Sporenschichtboden.* The part of a hymenomycetous fungus bearing the hymenium. [B. 1, 19, 123, 291 (*a*, 24).]

HYMENOPHOROUS, adj. Hi-me2n-o2f'o2r-u3s. Having a membranous covering (said of ferns in which the sori are inclosed in an indusium). The *Hymenophoreæ* of Presl are a family of indusiate ferns of the *Cathetogyratæ.* [B, 121, 170 (*a*, 35).]

HYMENOPHTHALMIA (Lat.), n. f. Hi(hu6)-me2n-o2f-tha2l-(tha3l)'mi2-a3. From ὑμήν, a membrane, and ὀφθαλμία, *ophthalmia.* An old term for membranous conjunctivitis. [F.]

HYMENOPHYLLUM (Lat.), n. n. Hi(hu6)-me2n-o(o3)-fi2l(fu6l)'-lu3m(lu4m). From ὑμήν, a membrane, and φύλλον, a leaf. A genus of the *Hymenophyllaceæ* (Fr., *hymenophyllacées*; Ger., *Hymenophyllaceen*), which are the film ferns, a family in which the annulus is transversal or oblique, and passes completely around the sporangeium. The *Hymenophylleæ* (Fr., *hyménophyllées*) of St. Vincent are the same; and the *Hymenophylloideæ* of Presl are a tribe of the same family. [B, 19, 104, 121 (*a*, 24); B, 121 (*a*, 35).]

HYMENOPODOUS, adj. Hi-me2n-o2p'o-du3s. From ὑμήν, a membrane, and πους, the foot. Having the toes partially joined by a membrane (said of birds). The *Hymenopoda* of Möhring are a family of birds having the above characteristics. [L, 180 (*a*, 39).]

HYMENOPOLYPUS (Lat.), n. m. Hi(hu6)-me2n-o(o3)-po2l'-i2p(u6p)-u3s(us). From ὑμήν, a membrane, and πολύπους, a polypus. A polypus of the hymen. [L, 50 (*a*, 14).]

HYMENOPTERA (Lat.), n. n. pl. Hi(hu6)-me2n-o2pt'e2r-a3. From ὑμήν, a membrane, and πτερόν, a wing. Ger., *Hautflügler, Aderflügler.* An order of the *Insecta*, including bees, ants, etc., having four membranous wings. [B, 28 (*a*, 27).]

HYMENOPTERAL, adj. Hi-me2n-o2p'te2-r'l. See HYMENOPTEROUS.

HYMENOPTERAN, n. Hi-me2n-o2p'te2-r'n. An individual of the *Hymenoptera.*

HYMENOPTEROLOGY, n. Hi-me2n-o2p-te2r-o2l'o-ji2. From ὑμήν, a membrane, πτερόν, a wing, and λόγος, understanding. That part of entomology which treats of the *Hymenoptera.* [L, 180 (*a*, 39).]

HYMENOPTEROUS, adj. Hi-me2n-o2pt'e2r-u3s. From ὑμήν, a membrane, and πτερόν, a wing. Fr., *hyménoptère.* Of, pertaining to, or of the nature of the *Hymenoptera.* [*a*, 17.]

HYMENOPTERYGIUM (Lat.), n. n. Hi(hu6)-me2n-o2p-te2r-i2j(u6g)'i2-u3m(u4m). From ὑμήν, a membrane, and πτερύγιον (see PTERYGIUM). Of Petrequin, a membranous or cellular pterygium. [L, 50 (*a*, 14).]

HYMENORRHAPHY, n. Hi-me2n-o2r'ra2f-i2. From ὑμήν, a membrane, and ῥάπτειν, to sew. Colporrhaphy at the situation of the hymen. [L, 107.]

HYMENORRHINUS (Lat.), adj. Hi(hu6)-me2n-o2r-rin(ren)'-u3s(u4s). From ὑμήν, a membrane, and ῥίς, the nose. Of birds, having a membranous covering over the nares. [L, 50 (*a*, 14).]

HYMENOSPOROUS, adj. Hi-me2n-o2s'po2r-u3s. Lat., *hymenosporus* (from ὑμήν, a membrane, and σπόρος, a seed). Of lichens, having a proligerous membrane. The *Hymenosporæ* are: Of Reichenbach, a group of the *Ascosporeæ*; of Fries, the *Hymenothalami.* [B, 121 (*a*, 24).]

HYMENOSTEATIS (Lat.), n. f. Hi(hu6)-me2n-o2s-te(te2)'a2t-(a3t)-i2s. Gen., *-at'idos* (*-idis*). From ὑμήν, a membrane, and στέαρ, fat. Of Heusinger, a membranous web containing fat in its cells. His hymenosteatides (Ger., *Hautspeckzellen*) are the cellules of the cutaneous adipose tissue. [L, 50 (*a*, 14).]

HYMENOTHALAMI (Lat.), n. m. pl. Hi(hu6)-me2n-o(o3)-tha2l(tha3l)'a2m(a3m)-i(e). From ὑμήν, a membrane, and θάλαμος, a chamber. Of Fries, a division of lichens. [B].

HYMENOTOME, n. Hi-me2n'o-tom. From ὑμήν, a membrane, and τέμνειν, to cut. Fr., *hyménotome.* An instrument for incising membranes. [L, 41 (*a*, 14).]

HYMENOTOMY, n. Hi-me2n-o2t'o-mi2. Lat., *hymenotomia* Fr., *hyménotomie.* Ger., *Häutezerlegung.* 1. Dissection of the membranes. 2. Section of the hymen. [L, 41, 50 (*a*, 14).]

HYMENULUM (Lat.), n. n. Hi(hu6)-me2n'u2l(u4l)-u3m(u4m). Dim. of ὑμήν, a membrane. A disc containing asci, but no excipulum. [B, 19 (*a*, 24).]

HYMNION (Lat.), n. n. Hi2m(hu6m)'ni2-o2n. Gr., ὑμνίον. See HYMENIUM and AMNION.

HYOBASIOGLOSSUS (Lat.), n. m. Hi(hu6)''o(o3)-bas(ba3s)-i2-o(o3)-glo2s(glos)'su3s(su4s). Of Albinus, see BASIOGLOSSUS.

HYO-CERATO-PHARYNGEUS [Douglas] (Lat.), n. m. Hi(hu^6)-o(o^3)-se^{2}r(ke^{2}r)″a^{2}t(a^{3}t)-o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From ὑώδης, hyoid, and φάρυγξ, the throat. See HYOPHARYNGEUS.

HYO-CERVICALIS (Lat.), n. m. Hi(hu^6)-o(o^3)-su^{5}r(ke^{2}r)-vi^2-(we)-ka(ka^3)′li^{2}s. From ὑώδης, hyoid, and *cervix*, the neck. See HYO-FASCIALIS.

HYOCHOLIC ACID, n. Hi-o-kol′i^{2}k. From υ, upsilon, and χόλος, bile. Fr., *acide hyocholalique* (ou *hyocholique*). Ger., *Hyocholalsäure*. A crystalline acid, $C_{25}H_{40}O_4$, obtained from pig's bile, insoluble in water, readily soluble in alcohol. [B, 4, 93 (α, 38).]

HYOCHONDROGLOSSUS (Lat.), n. m. Hi(hu^6)-o(o^3)-ko^{2}n-(ch^{2}o^{2}n)-dro(dro^3)-glo^{2}s(glos)′su^{3}s(su^{4}s). From υ, upsilon, χόνδρος, cartilage, and γλῶσσα, the tongue. Fr., *hyo-chondro-glosse*. See HYOGLOSSUS.

HYODEOGLOSSUS (Lat.), n. m. Hi(hu^6)-od-e^2-o(o^3)-glo^{2}s-(glos)′su^{3}s(su^{4}s). From υ, upsilon, εἶδος, resemblance, and γλῶσσα, the tongue. A more correct form of *hyoglossus* (*q. v.*). [A, 322 (α, 14).]

HYODEPIGLOTTIC, adj. Hi-od-e^{2}p-i^2-glo^{2}t′i^{2}k. Lat., *hyodepiglotticus* (from ὑώδης, hyoid, ἐπί, upon, and γλῶσσα, the tongue). A more correct form of *hyo-epiglottic* (*q. v.*).

HYODES (Lat.), adj. Hi(hu^6)-od′ez(as). Gr., ὑώδης (from υ, upsilon, and εἶδος, resemblance). See HYOID.

HYODYSLYSIN, n. Hi-o-di^{2}s′li^{2}s-i^{2}n. From υ, upsilon, and *dyslysin* (*q. v.*). Fr., *hyodyslysine*. Ger., *H.* A substance, $C_{25}H_{38}O_3$, obtained by long boiling of hyocholic acid with acids. [B, 4 (α, 38).]

HYO-EPIGLOTTIC, HYO-EPIGLOTTIDEAN, adj's. Hi-o-e^{2}p-i^2-glo^{2}t′i^{2}k, -glo^{2}t-i^{2}d′e^2-a^{2}n. Lat., *hyo-epiglotticus* (from υ, upsilon, ἐπί, upon, and γλῶσσα, the tongue). Fr., *hyo-épiglottique*. Ger., *Zungenbein und Stimmritze betreffend*. Pertaining to the hyoid bone and to the epiglottis. [A, 322.]

HYO-EPIGLOTTIDEUS (Lat.). adj. Hi(hu^6)-o(o^3)-e^{2}p-i^2-glo^{2}t-(glot)-ti^{2}d′e^2-u^{3}s(u^{4}s). See HYO-EPIGLOTTIC; as a n., an anomalous muscle in man (constant in other mammals) arising from the body of the hyoid bone and inserted into the epiglottis. [L, 332.]

HYO-FASCIALIS (Lat.), adj. Hi(hu^6)-o(o^3)-fa^{2}s(fa^{3}s)-si^2(ki^2)-a(a^3)′li^{2}s. An anomalous offshoot from the omo-hyoid muscle inserted into the cervical fascia. [L, 31.]

HYOGLOSSAL, adj. Hi-o-glo^{2}s′a^{2}l. From υ, upsilon, and γλῶσσα, the tongue. Pertaining to or connected with the hyoid bone and the tongue. [L.]

HYO-GLOSSE (Fr.), n. E-o-glos. See HYOGLOSSUS.—**Grand h.-g.** See BASIOGLOSSUS.—**Petit h.-g.** See HYOGLOSSUS *parvus*.

HYOGLOSSIAN, adj. Hi-o-glo^{2}s′i^2-a^{2}n. From υ, upsilon, and γλῶσσα, the tongue. Fr., *hyoglossien*. Pertaining to, connected with, or lying adjacent to the hyoid bone and the tongue. [L, 41.]

HYO-GLOSSO-BASI-PHARYNGIEN (Fr.), n. E-o-glos-o-ba^3-se-fa^3-ra^{2}n^2-zhe-a^{3}n^2. From υ, upsilon, γλῶσσα, the tongue, βάσις, a base, and φάρυγξ, the throat. See *Middle* CONSTRICTOR *of the pharynx*.

HYOGLOSSUS (Lat.), n. m. Hi(hu^6)-o(o^3)-glo^{2}s(glos)′su^{3}s(su^{4}s). From υ, upsilon, and γλῶσσα, the tongue. Fr., *hyo*(*chondro*)-*glosse*. Ger., *Zungengrundmuskel*, *Zungenbeinzungenmuskel*. A flat quadrangular muscle arising from the greater cornu, the anterior surface, and the lesser cornu of the hyoid bone, and inserted into the side of the tongue. Its action is to depress the tongue and elevate the hyoid bone. It was formerly regarded as consisting of three distinct muscles, the basioglossus. ceratoglossus, and chondroglossus. [L, 31, 332.]—**Great h., H. brevis.** See BASIOGLOSSUS.—**H. longus.** See STYLOGLOSSUS.—**H. magnus.** See BASIOGLOSSUS.—**H. parvus, Small h.** Fr., *petit hyo-glosse*. The analogue of the lingualis superior muscle of man, found in the lower animals. [L.]

HYOGLYCOCHOLATE, n. Hi-o-gli^{2}k-o-kol′at. Fr., *h.* A salt of hyoglycocholic acid. [L, 41.]

HYOGLYCOCHOLIC ACID, n. Hi-o-gli^{2}k-o-kol′i^{2}k. From ὗς, the swine, γλυκύς, sweet, and χολή, bile. Fr., *acide hyoglycocholique* (ou *hyocholalique*, ou *hyoglycocholalique*, ou *hyocholoïdique*). Ger., *Hyoglycocholsäure. Hyoglykocholsäure*. An amorphous, resinous substance, $C_{27}H_{43}NO_5$, obtained from pig's bile; readily soluble in alcohol, less soluble in ether or water. [B, 4, 270 (α, 38).]

HYOID, HYOIDEAL, HYOIDEAN, adj's. Hi′oid, hi-oid′-e-a^{2}l, -a^{2}n. Gr., ὑοειδής (from υ, upsilon, and εἶδος, resemblance). Lat., *hyoides*, *hyoideus*. Fr., *hyoïde*, *hyoïdien*. Shaped like the Greek letter υ; pertaining or adjacent to the hyoid bone, or to the tissues adjoining it; as a n., the h. bone. [C; α, 17.]

HYOIDES (Lat.), adj. and n. Hi(hu^6)-o(o^2)-id(ed)′ez(as). See HYOID.—**H. primus.** Of Columbus, the sterno-hyoid muscle. [L, 33 (α, 29).]

HYOIDEUS (Lat.), adj. Hi(hu^6)-o(o^3)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). See HYOID; as a n., a muscle connected with the hyoid bone.—**H. magnus.** See STYLO-HYOIDEUS.—**H. parvus.** See KERATO-HYOIDEUS.

HYOÏDIEN (Fr.), adj. E-o-e-de-a^{3}n^2. See HYOID.

HYOLARYNGIEN (Fr.), adj. E-o-la^3-ra^{2}n^2-zhe-a^{3}n^2. From ὑώδης, hyoid, and λάρυγξ, the larynx. Pertaining to or connected with the hyoid bone and the larynx. [L, 41.]

HYOMANDIBULAR, adj. Hi-o-ma^{2}n-di^{2}b′u^2-la^{3}r. Pertaining to or connected with the hyoid bone and the inferior maxilla. [L.] Cf. *H.* BONE.

HYOMENTAL, adj. Hi-o-me^{2}n′t′l. Pertaining to or connected with the hyoid bone and the chin or lower jaw. [L.]

HYOPHARYNGEUS (Lat.), n. m. Hi(hu^6)-o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From ὑώδης, hyoid, and φάρυγξ, the throat. Fr., *hyo-pharyngien* (1st def.). 1. The middle constrictor of the pharynx. 2. Of Douglas, the first middle constrictor (*i. e.*, that portion of the muscle arising from the cornua of the hyoid bone). By Winslow this muscle was divided into the *basiopharyngeus* and the *kerato-pharyngeus major* and *minor*. [L, 13.]

HYOPHTHALMOS (Lat.), **HYOPHTHALMUS** (Lat.), n's m. Hi(hu^6)-o^{2}f-tha^{2}l(tha^{3}l)′mo^{2}s, -mu^{3}s(mu^{4}s). From ὗς, a pig, and ὀφθαλμός, the eye. 1. Of Appuleius, the *Aster amellus*. [B, 114 (α, 24).] 2. A person with small eyes like a pig's. [A, 322.]

HYOPLASTRON (Lat.), n. n. Hi(hu^6)-o(o^3)-pla^{2}s(pla^{3}s)′tro^{2}n. The second lateral membrane bone of the thoracico-abdominal structure of the *Chelonia*. [L, 11 (α, 27).]

HYOSCATINA (Lat.), n. f. Hi(hu^6)-o(o^3)-ska^{2}t(ska^{3}t)-in(en)′a^3. From ὗς, a pig, and σκῶρ, ordure. Ger., *Hyoskatin*, *Schweinekothstoff*. The peculiar substance giving the special odor to pig's dung. [L, 50 (α, 14).]

HYOSCIAMUS (Lat.), n. m. Hi(hu^6)-o^{2}s-si(ki^2)′a^{2}m(a^{3}m)-u^{3}s-(u^{4}s). See HYOSCYAMUS.—**Emplastrum hyosciami** [Swiss Ph.]. See *Emplastrum* HYOSCYAMI.—**Extractum hyosciami** [Belg. Ph.] (**foliorum** [Hung. Ph.]). See *Extractum* HYOSCYAMI *alcoholicum*.—**Extractum hyosciami seminum** [Hung. Ph.]. Fr., *extrait de jusquiame* (*semences*) [Fr. Cod.]. Syn.: *extractum hyosciami seminum*. A preparation made by expressing the seeds of *H.* with dilute alcohol, then freeing from the spirit and bringing to a pilular consistence [Fr. Cod.] or, by adding dextrin. to the consistence of a dry extract [Hung. Ph.]. In the French preparation the seeds are freed of fatty oil after (in the Hung. preparation, before) treatment with alcohol. [B, 95 (α, 38).]—**Extractum hyosciami siccum** [Hung. Ph.]. See *Extractum* HYOSCYAMI *siccum*.—**Folia hyosciami** [Belg. Ph.]. The leaves of *Hyoscyamus niger*. [B, 95.]—**Oleum hyosciami** [Belg. Ph.]. See *Infusum* HYOSCYAMI *oleosum*.—**Semen hyosciami** [Belg. Ph.]. The seed of *Hyoscyamus niger*. [B, 95.]

HYOSCINE, n. Hi′os-en. Lat., *hyoscina*, *hyoscinum*. Fr., *h.* Ger., *Hyoscin*. A semi-fluid, amorphous alkaloid, $C_{17}H_{23}NO_3$, discovered by Ladenburg, isomeric with hyoscyamine and atropine, obtained from the *Hyoscyamus niger*. It is easily soluble in alcohol and in ether, slightly soluble in cold water. It is said to occur in duboisia, belladonna, stramonium, and the alcoholic extract of *Scopolia atropoides*. According to Schmidt, it is a different alkaloid that occurs in these drugs, and commercial h. is not of constant composition or properties. H. is a good soporific for the insane, and may be used instead of morphine when the latter is contra-indicated. It is also employed in nymphomania and allied affections, and controls excessive seminal emissions. Beneficial results have been obtained with it in the treatment of whooping-cough, asthma, and epilepsy, but its special value consists in its mydriatic effect. [B, 270 (α, 38); "Ann. di chim. e di farmacol.," July, 1890, pp. 36, 37, 38 (B); B, 5 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxx, xxxi, xxxvii (α, 14).]—**H. bromhydrate.** See *H. hydrobromide*.—**H. hydriodate, H. hydriodide.** Lat., *hyoscinum hydriodatum* (seu *hydrojodicum*). A crystalline salt having at 100° C. the composition $C_{17}H_{23}NO_3HI + \frac{1}{2}H_2O$, and occurring as small, slightly yellow, hemiedral prisms. [B, 5 (α, 38).]—**H. hydrobromate, H. hydrobromide.** Lat., *hyoscinum hydrobromicum*. A crystalline salt having, when dried at 100° C., the formula $C_{17}H_{23}NO_3HBr.\frac{1}{2}H_2O$. and occurring as large, colorless, transparent prisms, very soluble in water. [B, 5 (α, 38).]—**H. hydrochloride.** A crystalline compound formed by the action of hydrochloric acid on h. It is of the mydriatic type, and similar in physiological action to hyoscyamin. It dilates the pupil more rapidly, but less permanently, than atropine, and is free from the disagreeable dryness of the throat produced by the latter. Its sedative power over the insane is said to be great and its toxic properties slight. [L, 40.]

HYOSCINIC ACID, n. Hi-o^{2}s-i^{2}n′i^{2}k. Fr., *acide hyoscinique*. Ger., *Hyoscinsäure*. It., *acido ioscinico*. An acid, $C_9H_{10}O_3$, obtained along with hyoscine when hyoscyamine is treated with boiling baryta-water. [B, 5 (α, 38).]

HYOSCINUM (Lat.), n. n. Hi(hu^6)-o^{2}s-sin(ken)′u^{3}m(u^{4}m). See HYOSCINE.—**H. hydriodatum.** See HYOSCINE *hydriodide*.—**H. hydrobromicum.** See HYOSCINE *hydrobromide*.—**H. hydrojodicum.** See HYOSCINE *hydriodide*.

HYOSCIPICRIN, n. Hi-o^{2}s-i-pi^{2}k′ri^{2}n. From ὑοσκύαμος, hyoscyamus, and πικρός, bitter. Fr., *hyoscipicrine*. Ger., *H.* It., *ioscipicrina*. A bitter glucoside obtained by Höhn from hyoscyamus. [B, 10.]

HYOSCYAMIA (Lat.), n. f. Hi(hu^6)-o^{2}s-si(ku^6)-a^{2}m(a^{3}m)′i^2-a^3. See HYOSCYAMINE.

HYOSCYAMINA (Lat.), n. f. Hi(hu^6)-o^{2}s-si(ku^6)-a^{2}m(a^{3}m)-in-(en)′a^3. See HYOSCYAMINE.—**Hyoscyaminæ sulphas** [U. S. Ph.]. See HYOSCYAMINE *sulphate*.

HYOSCYAMINE, n. Hi-o^{2}s-sl′a^{2}m-en. Lat., *hyoscyamina*, *hyoscyamia*, *hyoscyaminum*. Fr., *h.*, *jusquiamine*. Ger., *Hyoscyamin*. It., *giusquiamina*. Sp., *hyosciamina*. 1. A crystalline alkaloid, $C_{17}H_{23}NO_3$, isomeric with hyoscine and atropine, obtained from the seeds of *Hyoscyamus niger* and also from *Atropa belladonna* and *Datura stramonium*; identical with the duboisine found in *Duboisia myoporoides*. The crystals are odorless, silky needles of very sharp taste, easily soluble in alcohol, in ether, and in chloroform, slightly soluble in cold water, and melt at 108·5° C. It is a soporific, and is used where opium is contra-indicated. Its action on the nervous system resembles that of atropine, and Ringer thinks it is equal to hyoscine in mania. As a mydriatic it is employed less frequently than any of the others. It is preferable to duboisine, since the

tendency to systemic poisoning is not so great. Its effects are shorter in duration than those of atropine. 2. An American concentration from *Hyoscyamus niger*. [B, 270 (a, 38); "Proc. of the Am. Pharm. Assoc.," xxxi, xxxiii, xxxvii (a, 14); B, 5, 173 (a, 24); "Jahresb. d. reinen Chem.," 1882, p. 512; F.]—**Amorphous h.** Fr., *h. amorphe*. Hyoscine. [B.]—**H. sulphate.** Lat., *hyoscyaminæ sulphas* [U. S. Ph.], *hyoscyaminum sulfuricum*. Fr., *sulfate d'h.* Ger., *schwefelsaures Hyoscyamin*. It., *solfato di giusquiamina*. A tasteless substance, $C_{34}H_{23}NO_6.SO_3HO$, having a sharp, bitter taste, and occurring as small yellow or yellowish crystals or as a yellowish-white amorphous powder. It is soluble in water and in alcohol, and has a neutral reaction. [B, 195 (a, 38).]

HYOSCYAMINUM (Lat.), n. n. Hi(hu⁶)-o²s-si(ku⁶)-a²m(a³m)-in(en)'u²m(u⁴m). See HYOSCYAMINE.—**H. sulfuricum.** See HYOSCYAMINE *sulphate*.

HYOSCYAMUS (Lat.), n. m. Hi(hu⁶)-o²s-si(ku⁶)'a²m(a³m)-u³s-(u⁴s). Gr., ὑοσκύαμος (from ὗς, a pig, and κύαμος, a bean). Fr., *jusquiame, chenille*. Ger., *Bilsenkraut*. It., *giusquiamo*. Sp., *beleño*. 1. Henbane; a genus of the *Solanaceæ*, tribe *Hyoscyameæ*. 2. Of the U. S. Ph., Austr. Ph., Hung. Ph., and Netherl. Ph., the leaves of *H. niger*. [B, 5, 42, 173, 180 (a, 24); B, 95 (a, 38).]—**Abstractum hyoscyami** [U. S. Ph.]. Syn.: *hyoscyami abstractum*. A preparation made by exhausting 200 parts of freshly dried h. in No. 60 powder with alcohol, evaporating, afterward treating with enough sugar of milk to make 100 parts of abstract, and reducing to a fine, uniform (green) powder. [B, 5, 95 (a, 38).]—**Adeps papavere, hyoscyamo, et belladonna medicatus.** See POMATUM *populeum*.—**Alcoholic extract of h.** See *Extractum hyoscyami alcoholicum*.—**Cataplasma hyoscyami.** Sp., *cataplasma de beleño* [Sp. Ph.]. A cataplasm consisting of 1 part each of powdered leaves of *Hyoscyamus niger* and flaxseed meal, and 6 parts of water. [B, 95 (a, 38).]—**Clyster of h.-leaves.** Ger., *Bilsenkraut-Klystier*. A preparation made by infusing 1 part of h.-leaves in a quantity of water sufficient to yield 100 parts of colature. [L, 57 (a, 21).]—**Electuarium hyoscyami opiatum.** Fr., *électuaire de jusquiame opiacé*. Sp., *electuario de beleño opiado* [Sp. Ph.], *filonis romano* [Mex. Ph.]. Syn.: *philonium romanum*. An electuary made by mixing well together 19 parts of white pepper, 9 of opium, 6 of *Cassia lignea*, 19 of seeds of *H. albus*, 4 of wild celery, 2½ each of Macedonian parsley, fennel, and *Athamanta cretensis*, 1½ of saffron, $\frac{9}{16}$ each of Indian nard, pellitory, and zedoary, 6 of cinnamon, 4 each of *Euphorbia*, myrrh, and castoreum, and 257 of honey; or 21 parts each of *H. seeds*, anise-seeds, fennel-seeds, myrrh, and castoreum, 18 of opium, 29 of cinnamon, 7 of saffron, 11 of chamomile flowers, and 690 of clarified honey. [B, 95, 119 (a, 38).]—**Emplastrum hyoscyami** [Ger. Ph., 1st ed., Belg. Ph., 1st ed., Finn. Ph., Gr. Ph., Netherl. Ph., Russ. Ph.]. Syn.: *emplastrum* HYOSCIAMI [Swiss Ph.]. H. plaster; a preparation consisting of 21 parts of plaster of Burgundy pitch, 3 of oil of h., and 6 of powdered extract of h. [Belg. Ph.]; or 6 of yellow wax, 24 of lithargyrum plaster, 1 part of yellow resin, and 4 parts of inspissated extract of h. [Finn. Ph.]; or 16 parts of yellow wax, 4 each of olive-oil and turpentine, and 8 of powdered leaves of h. [Ger. Ph.]; or 10 parts each of powdered herb of h. and yellow wax, and 5 each of colophony and olive-oil [Gr. Ph.]; or 10 parts each of yellow wax and powdered leaves of h., 3 of colophony, 2 of larch turpentine, and 5 of olive-oil [Swiss Ph.]; or 10 parts each of yellow wax, lithargyrum plaster, and powdered leaves of h., and 5 of olive-oil [Netherl. Ph.]; or 3 parts of yellow wax, 1 part of colophony, 20 parts of lithargyrum plaster, 2 of olive-oil, and 10 of powdered leaves of h. [Russ. Ph.]. Similar preparations were given in several of the older pharmacopœias. [B, 95, 119 (a, 38).]—**Essentia hyoscyami (nigri).** See *Tinctura hyoscyami*.—**Extractum hyoscyami.** Fr., *extrait de jusquiame* [Fr. Cod.] (1st def.). Ger., *Bilsenkrautextrakt*. Sp., *extracto de beleño* [Sp. Ph.] (1st def.). Syn.: *extractum* (*aquosum* [Netherl. Ph.]) *hyoscyami nigri* [Gr. Ph.]. 1. Of the Br. Ph., a preparation made by evaporating the juice (according to the Sp. Ph., also by evaporating the aqueous extract made from the dried leaves) of *H. niger* to a pilular [Br. Ph., Gr. Ph.] (or soft [Fr. Cod.] or thick [Sp. Ph., Netherl. Ph.]) consistence. 2. Of the Ger. Ph., Swiss Ph., Finn. Ph., Russ. Ph., Norw. Ph., Dan. Ph., Swed. Ph., see *Extractum hyoscyami alcoholicum*. [B, 95.]—**Extractum hyoscyami albi** [Gr. Ph.]. An extract made, like extractum hyoscyami (1st def.), from *H. albus*. [B, 95.]—**Extractum hyoscyami alcoholicum** [U. S. Ph.]. Fr., *extrait de jusquiame alcoolique*. Ger., *alkoholisches Bilsenkrautextrakt*. Sp., *extracto alcohólico de beleño* [Sp. Ph.]. Roum., *estractu de hyoscyamu* [Roum. Ph.]. Syn.: *extractum hyoscyami* [Ger. Ph., Swiss Ph., Finn. Ph., Russ. Ph., Norw. Ph., Dan. Ph., Swed. Ph.] (seu *hyoscyami spirituosum* [Netherl. Ph.], seu *hyoscyami foliorum* [Austr. Ph.], seu *hyosciami* [Belg. Ph.], seu *hyosciami foliorum* [Finn. Ph.]). A preparation made by exhausting the dried leaves of *H. niger* with alcohol and evaporating to a pilular consistence [U. S. Ph.] or to the consistence of a dry [Norw. Ph.] (or a thick [Dan. Ph., Finn. Ph., Swiss Ph., Sp. Ph., Roum. Ph., Swed. Ph.]) extract; or by evaporating the juice of *H. niger* mixed with alcohol to a dry [Hung. Ph.] (or a thick [Austr. Ph., Belg. Ph., Ger. Ph., Netherl. Ph.]) extract. According to the U. S. Ph., the plant should be of the second year's growth. [B, 95.]—**Extractum hyoscyami aquosum** [Netherl. Ph.]. See *Extractum hyoscyami* (1st def.).—**Extractum hyoscyami cum dextrino** [Russ. Ph.]. See *Extractum hyoscyami siccum*.—**Extractum hyoscyami fluidum** [U. S. Ph.]. Fr., *extrait liquide de jusquiame*. Ger., *flüssiges Bilsenkrautextrakt*. A preparation made by exhausting 100 grammes of finely powered leaves of h. in No. 60 powder with a mixture of 3 parts of alcohol and 1 part of water, and adding enough further alcohol to make 100 cubic ctm. of fluid extract. [B, 5, 95 (a, 38).]—**Extractum hyoscyami foliorum** [Austr. Ph.]. See *Extractum hyoscyami alcoholicum*.—**Extractum hyoscyami nigri** [Gr. Ph.]. See *Extractum hyoscyami* (1st def.).—**Extractum hyoscyami pulveratum** [Finn. Ph.]. See *Extractum hyoscyami siccum*.—**Extractum hyoscyami seminum.** See *Extractum* HYOSCIAMI *seminum*.—**Extractum hyoscyami siccum** [Swiss Ph., Swed. Ph.]. Syn.: *extractum hyoscyami pulveratum* [Finn. Ph.] (seu *cum dextrino* [Russ. Ph.]), *extractum hyoscyami siccum* [Hung. Ph.]. Extract of h. dried, with the addition of enough dextrin [Hung. Ph., Russ. Ph.] or licorice [Swed. Ph.] to double its weight; or enough milk sugar [Swiss Ph.] or milk sugar and licorice [Finn. Ph.] to triple its weight. [B, 95 (a, 38).]—**Extractum hyoscyami spirituosum** [Netherl. Ph.]. See *Extractum hyoscyami alcoholicum*.—**Fluid extract of h.** See *Extractum hyoscyami fluidum*.—**Folia hyoscyami** [Dan. A preparation made by boiling 7 parts of the leaves of *H. niger* with water sufficient to give 200 parts of colature [Belg. Ph.], or by infusing 3 parts of the leaves with 104 parts of water [Sp. Ph.]. [B, 95.]—**Glyceritum cum extracto hyoscyami** [Fr. Cod.] (seu **extracti hyoscyami**). See *Glycéré d'extrait de* JUSQUIAME.—**Herba hyoscyami** [Ger. Ph., Swiss Ph.]. The herb of *H. niger*. [B, 95.]—**Hyoscyami abstractum.** See *Abstractum hyoscyami*.—**Hyoscyami (nigri [Gr. Ph.]) folia** [Br. Ph., U. S. Ph., 1870]. The leaves, flowers, and branches of *H. niger*. [B, 95.]—**Hyoscyami (nigri [Gr. Ph.]) semen.** See *Semen hyoscyami*.—**H. agrestis.** A variety of *H. niger*. [B, 64 (a, 24).]—**H. albus.** Guz., *korásáni ajamo*. Sanscr., *khorásáni yamání*. Hind., *khorásáni ajaváne*. Bomb., *khorásáni ová*. Pers., *banja*. Ar., *bazr-ula-banja abiada*. Fr., *jusquiame blanche, fève de porc*. Ger., *weisses Bilsenkraut*. The ὑοσκύαμος of Dioscorides; a species found in southern Europe, with somewhat milder properties than those of *H. niger*. In Malta, where it is called *mamma teiga*, it is used, mixed with bread, as a poultice in tumors of the breasts. ["Proc. of the Am. Pharm. Assoc.," xxvi (a, 14); B, 5, 78, 173, 180 (a, 24).]—**H. aureus.** Fr., *jusquiame jaune* (ou *dorée*). Ger., *goldgelbes Bilsenkraut*. A species found in the Mediterranean region, resembling *H. niger* in its properties. It is one of the species known to Dioscorides as ὑοσκύαμος. [B, 173, 180 (a, 29).]—**H. betæfolius** [Lamarck]. Fr., *jusquiame à feuilles de bette*. A species found in Egypt, resembling *H. niger*. It is used as a soporific for children, and to make an infusion which is drunk as a beverage. By some authors it is identified with *H. insanus*. [B, 173 (a, 24).]—**H. bohemicus.** The *H. agrestis*. [B, 180 (a, 24).]—**H. canariensis.** A species growing in the Canaries very like *H. albus*. It seems to be an intermediate form between the latter and *H. aureus*. [B, 180 (a, 24).]—**H. datora.** The *H. insanus*. [B, 42 (a, 24).]—**H. indicus.** Tobacco. [B, 180 (a, 24).]—**H. insanus.** A species common in Beloochistan, where it is called *kohibung* (mountain hemp). It is smoked in small quantities and employed as a poison. [B, 18, 42, 172 (a, 24).]—**H. juice.** See *Succus hyoscyami*.—**H. leaves.** Lat., *h.* [U. S. Ph.], *hyoscyami folia* [Br. Ph.], *herba hyoscyami* [Ger. Ph.]. Fr., *feuilles de jusquiame noire* [Fr. Cod.]. Ger., *Bilsenkrautblätter*. It., *foglie di giusquiamo*. Sp., *hojas de beleño negro*. The leaves of *H. niger*. [B, 5 (a, 24).]—**H. luteus.** The *Nicotiana rustica*. [L, 116.]—**H. muticus.** The *H. insanus*. [B, 42 (a, 24).]—**H. niger.** Fr., *jusquiame noir* (ou *commune*), *careillade, herbe aux engelures* (ou *à la teigne*, ou *de Sainte Appoline*), *mort aux poules, porcelet, potelée*. Ger., *schwarzes* (oder *gemeines*) *Bilsenkraut, Teufelsauge, Zigeunerkraut, Todtenblumenkraut, Hühnertodtkraut, Schlafkraut, Giftkraut*. A coarse, erect herb found throughout Europe, Egypt, Asia Minor, Persia, Siberia, and Northern India. As a weed, it became naturalized in North America before 1672, and now grows wild in waste places throughout the United States, and especially around Detroit, Michigan. It exists under two varieties—the biennial, mostly used for medicinal purposes, and the annual (*H. niger*, var. *β-agrestis*), a smaller plant coming to maturity in a single season. The biennial variety is cultivated in England and India. The foliage and green tops of the last variety are most esteemed, and are official in the pharmacopœias of Europe and America (see *H. leaves*). Its active properties are dependent on two alkaloids—hyoscyamine and hyos-

HYOSCYAMUS NIGER. [A, 327.]

cine (*q. v.*). Both are used as sedatives, hypnotics, and mydriatics. [B, 5, 18, 137, 180 (*a*, 24).]—**H. pallidus.** A variety of *H. niger*. [B, 64 (*a*, 24).]—**H. peruvianus.** Tobacco-leaves. [B, 180 (*a*, 24).]—**H. physaloides.** Fr., *jusquiame physaloïde*. Ger., *schlutten-artiges Bilsenkraut*. Kite-flower, purple-flowered henbane; a species found in northern Asia, where the herb and root are used as an opiate and deliriant. They have been employed in syphilis, typhus fever, lung diseases, and dysentery, and the root is considered valuable in hæmorrhoids and hæmaturia. The seeds are said to be used in infusion in Asia as a substitute for coffee. [B, 173, 180 (*a*, 24).]—**H. pusillus, H. pygmæus.** Fr., *jusquiame pygmée*. Dog-henbane, a variety of *H. niger*. [B, 173 (*a*, 24).]—**H. reticulatus.** Egyptian henbane; a species found in southern Europe, resembling *H. albus* and *H. niger* and having like properties. [B, 180 (*a*, 24).]—**H. scopolia.** The *Scopolina atropoides*. [B, 180 (*a*, 24).]—**H. seeds.** See *Semen hyoscyami*.—**H. senecionis.** A species found in Egypt, resembling *H. reticulatus*. [B, 180 (*a*, 24).]—**H. tertius.** The *Nicotiana rustica*. [B, 121.]—**Infusum hyoscyami** [Russ. Ph.]. An infusion made by steeping the leaves of *H. niger* in boiling water and straining, 1 oz. of the colature representing 3 grains of the leaves. [B, 95.]—**Infusum hyoscyami oleosum** [Netherl. Ph.]. Fr., *huile de jusquiame* [Fr. Cod.]. Sp., *aceite de beleño* [Sp. Ph.]. Roum., *oleu de hyoscyamu coctu* [Roum. Ph.]. Syn.: *oleum hyoscyami* [Ger. Ph., Hung. Ph.] (seu *hyosciami* [Belg. Ph.], seu *hyoscyami coctum* [Gr. Ph., Swiss Ph.], seu *hyoscyami foliorum coctum* [Austr. Ph.], seu *hyoscyami infusum* [Dan. Ph., Norw. Ph., Russ. Ph., Swed. Ph.], seu *infusum hyoscyami* [Finn. Ph.]). A preparation made by macerating or digesting for some hours fresh or freshly dried leaves of h., generally with alcohol, adding olive-oil, then freeing from the spirit or from all the moisture and filtering. The Belg. preparation contains benzoin powder also. The Austr. and Hung. preparations take 250 parts, the Fr. and Sp. 500 parts, of fresh h. leaves, and 1,000 parts of olive-oil; the Belg. preparation, 125 parts of freshly dried leaves, 90 of alcohol, 30 of benzoin powder, and 1,000 of olive-oil; the Finn. preparation, 100 parts of leaves, 75 of alcohol, and 1,000 of olive-oil; the Swiss, 200 parts of herb of h., 100 of alcohol, and 1,000 of olive- or sesame-oil; the Dan., Norw., and Swed. preparations take 200 parts of h. leaves, 400 of alcohol, and 1,000 of olive-oil; the Ger. preparation takes 100 parts of herb of h., 75 of alcohol, and 1,000 of olive-oil; the Gr. preparation, 200 parts of h. leaves, a sufficient amount of water, and 1,000 parts of alcohol; the Dutch, 40 parts of h. leaves, alcohol enough, and 960 parts of olive-oil; the Roum., 50 parts each of h. leaves and alcohol and 1,000 parts of olive-oil; and the Russ. 160 parts of leaves, 120 of alcohol, and 960 of oil. [B, 95 (*a*, 38).]—**Infusum seminis hyoscyami** [Russ. Ph.]. An infusion made by steeping the seeds of *H. niger* in boiling water and straining, 1 oz. of the product representing 3 grains of the seeds. [B, 95.]—**Juice of h.** See *Succus hyoscyami*.—**Oil of h.** See *Oleum hyoscyami*.—**Oleum hyoscyami.** Of the Ger. Ph. and Hung. Ph., see *Infusum hyoscyami oleosum*.—**Oleum hyoscyami ammoniato-camphoratum.** Syn.: *linimentum anodynum* (seu *antispasticum*). A preparation consisting of 6 parts each of olive-oil and oil of h., 2 parts of ammonia, and 1 part of Sydenham's laudanum. [L, 85.]—**Oleum hyoscyami camphoratum** [Swiss Ph.]. A solution of 1 part of camphor in 9 parts of oleum hyoscyami. [B, 95 (*a*, 38).]—**Oleum hyoscyami coctum** [Gr. Ph., Swiss Ph.] (seu **hyoscyami foliorum coctum** [Austr. Ph.], seu **hyoscyami infusum** [Dan. Ph., Norw. Ph., Russ. Ph., Swed. Ph.], seu **infusum hyoscyami** [Finn. Ph.]). See *Infusum hyoscyami oleosum*.—**Semen hyoscyami** [Ger. Ph., 1st ed., Dan. Ph., Swiss Ph.], **Semina hyoscyami** [Norw. Ph., Russ. Ph.] Fr., *jusquiame noire* (*semence*) [Fr. Cod.]. Sp., *beleño* (*semilla*) [Sp. Ph.]. Syn.: *semen hyosciami* [Belg. Ph.], *hyoscyami nigri semen* [Gr. Ph.], *hyoscyami semen*. The seed of *H. niger*. Small, roundish, compressed, kidney-shaped seeds of a gray color. They have the odor of the plant, and are ten times as strong as the leaves. [B, 95.]—**Succus hyoscyami** [Br. Ph.]. A preparation made by crushing in a mortar the fresh leaves, flower-tops, and young branches of *H. niger*, expressing the juice, adding 1 part of alcohol for every 3 parts of juice, and, after allowing to stand for a week, filtering. [B, 95 (*a*, 38).]—**Syrupus hyoscyami.** Fr., *sirop d'extrait de jusquiame*. A preparation made by dissolving $1\frac{7}{10}$ part of extract of h. in 16 parts of water, adding 500 of boiling syrup, continuing the boiling a few moments, and straining. [B, 119 (*a*, 38).]—**Tinctura hyoscyami** [U. S. Ph., Br. Ph., Gr. Ph., Swiss Ph., Russ. Ph.]. Fr., *teinture de jusquiame* [Fr. Cod.]. Sp., *tintura alcoholica de beleño* [Sp. Ph.]. Syn.: *essentia hyoscyami* (*nigri*), *tinctura hyosciami* [Belg. Ph.] (seu *hyoscyami nigri*). A preparation made by digesting 1 part of leaves of *H. niger* in 5 parts [Belg. Ph., Fr. Cod., Sp. Ph., Swiss Ph.] (or 6 parts [Gr. Ph.], or 10 parts [Russ. Ph.]), of dilute alcohol for from 3 to 10 days and filtering; or by macerating in sufficient dilute alcohol to make 6[illegible] [U. S. Ph.] or 4[illegible] [Br. Ph.] parts of filtrate, and percolating. [B, 95.]—**Tinctura hyoscyami ætherea.** Fr., *teinture éthérée de jusquiame* [Fr. Cod.]. A preparation made by treating 1 part of dried leaves of h. with 4 or 6 parts (5 [Fr. Cod.]) of ether for eight days. [B, 95, 119 (*a*, 38).]—**Tinctura hyoscyami nigri.** See *Tinctura hyoscyami*.

HYOSCYPICRIN, n. Hi-o^{2}s-si^2-pi^{2}k'ri^{2}n. See Hyoscipicrin.

HYOSIRIS (Lat.), n. f. Hi(hu^6)-o^{2}s'i^{2}r-i^{2}s. Gen., *-ir'idos* (*-idis*), *-ir'eos* (*-os'iris*). Gr., ὑόσερις. 1. Of Pliny, the *Centaurea nigra*. 2. Of Tabermontanus, the *Lampsana pusilla* and the *Hypochœris glabra*. [B (*a*, 24).]

HYOSKORINA (Lat.), n. f. Hi(hu^6)-o^{2}s-ko^{2}r-in(en)'a^3. See Hyoscatina.

HYOSPONDYLOTOMY, n. Hi-o-spo^{2}n-di^{2}l-o^{2}t'o-mi^2. From ὑοειδής, hyoid, σπόνδυλος, a vertebra, and τομή, a cutting. Fr., *hyospondylotomie*. Of the veterinarians, puncture of the guttural sac. [L, 41 (*a*, 14).]

HYOSTERNAL, adj. Hi-o-stu^{6}rn'a^{2}l. From ὑοειδής, hyoid, and στέρνον, the sternum. Pertaining to the hyoid bone and the sternum. [L, 41 (*a*, 14).]

HYOSTYLIC, adj. Hi-o-stil'i^{2}k. From ὑοειδής, resembling the letter υ, and στύλος, a pillar. Pertaining to the skull (said of a sub-order [*Chondrostei*] of ganoid fishes having a separate suspensarium). [L, 207 (*a*, 39).]

HYOTAUROCHOLIC ACID, n. Hi-o-ta^4-ro-kol'i^{2}k. From ὗς, the swine, ταῦρος, the bull, and χολή, bile. Fr., *acide hyotaurocholique* (seu *hyotaurocolulique*). Ger., *Hyotaurocholsäure*. An unstable acid, $C_{27}H_{45}NSO_6$, occurring in small quantity in pig's bile. [B, 4, 93 (*a*, 38).]

HYOTHYREODES (Lat.), adj. Hi(hu^6)-o(o^3)-thi(thu^6)-re^2-od'-ez(as). See Hyodeothyreodes.

HYOTHYREOID, HYOTHYREOIDEAN, adj's. Hi-o-thi^{2}r-e'oid, -thi^{2}r-e-oid'e-a^{2}n. See Thyreo-hyoid.

HYOVERTEBROTOMY, n. Hi-o-vu^{6}rt-e^2-bro^{2}t'o-mi^2. From ὑοειδής, hyoid, *vertebra*, a vertebra, and τομή, a cutting. See Hyospondylotomy.

HYP, n. and v. tr. Hi^{2}p. Abbreviated from *hypochondriac*. 1. (N.) a hypochondriac. 2. (V. tn.) to render hypochondriacal; used especially in the p. p., *hypped*. [B.]

HYPACTIC, adj. Hi^{2}p-a^{2}k'ti^{2}k. Gr., ὑπακτικός (from ὑπάγειν, to carry downward). Lat., *hypacticos*, *hypacticus*. Fr., *hypactique*. Ger., *unterwegführend*. Slightly purgative. [L, 50 (*a*, 14).]

HYPACUSIA (Lat.), **HYPACUSIS** (Lat.), n's f. Hi^{2}p(hu^{6}p)-a^3-ku^2(ku)'si^2-a^3, -si^{2}s. Gen., *-us'iæ*, *-us'eos* (*-is*). From ὑπό, in small degree, and ἀκουή, hearing. Ger., *Hypakusie*. Impaired hearing. [A, 319 (*a*, 21).]—**H. hysterica.** An excessive and painful exaltation of the sense of hearing in hysterical patients. [*a*, 40.]

HYPÆMIA (Lat.), n. f. Hip(hu^{6}p)-em'(a^3'e^{2}m)-i^2-a^3. See Hyphæmia.—**H. oculi.** See under Hæmophthalmia.

HYPÆSTHESIA (Lat.), n. f. Hip(hu^{6}p)-e^{2}s(a^3-e^{2}s)-the(tha)'-zi^2(si^2)-a^3. From ὑπό, in small degree, and αἴσθησις, perception by the senses. Fr., *hypesthésie*. Ger., *Hypästhesie*. Partial anæsthesia; of Piachaud, obstetrical anæsthesia. [A, 104.]

HYPÆSTHETIC, adj. Hip-e^{2}s-the^{2}t'i^{2}k. From ὑπό, in slight degree, and αἰσθητικος, perceptive. Pertaining to or affected with hypæsthesia. [D.]

HYPAGOGE (Lat.), n. f. Hip(hu^{6}p)-a^{2}g(a^{3}g)-o'je(ga). Gen., *-og'es*. Gr., ὑπαγωγή, a leading on gradually. Ger., *gelinde Abführen*. Gentle purgation. [A, 322.]

HYPAGOGUE, adj. Hi^{2}p'a^3-go^{2}g. Gr., ὑπαγωγός. See Hypactic.

HYPAKUSIE (Ger.), n. Hu^6-pa^3-ku-ze'. See Hypacusia.

HYPALBUMINOSIS (Lat.), n. f. Hip(hu^{6}p)-a^{2}l(a^{3}l)-bu^2(bu)-mi^{2}n-o'si^{2}s. From ὑπό, in a slight degree, and *albumen*, the white of an egg. Gen., *-os'eos* (*-is*). Ger., *Hypalbuminose*. A condition in which the proportion of albumin in the blood is less than normal. [D, 3.]

HYPALEIMMA (Lat.), n. n. Hip(hu^{6}p)-a^3-lim'(le^2'i^{2}m)-ma^3. Gen., *-eim'matos* (*-atis*). Gr., ὑπάλειμμα. 1. An ointment, liniment. 2. See Hypaleipsis. [L, 50 (*a*, 14).]

HYPALEIPSIS (Lat.), n. f. Hip(hu^{6}p)-a^{2}l(a^{3}l)-ip'(e^2'i^{2}p)-si^{2}s. Gen., *-leip'seos* (*-is*). Gr., ὑπάλειψις (from ὑπαλείφειν, to anoint). An anointing. [L, 50 (*a*, 14).]

HYPALEIPTON (Lat.), **HYPALEIPTUM** (Lat.), n's n. Hip-(hu^{6}p)-a^3-lip'(le^2'i^{2}p)-to^{2}n, -tu^{3}m(tu^{4}m). Gr., ὑπάλειπτον. Of Hippocrates, a liniment. [L, 50 (*a*, 14).]

HYPALEIPTRIS (Lat.), **HYPALEIPTRON** (Lat.), **HYPALEIPTRUM** (Lat.), n's f., n., and n. Hip(hu^{6}p)-a^3-lip'(le^2'i^{2}p)-tri^{2}s, -tro^{2}n, -tru^{3}m(tru^{4}m). Gen., *-eip'tridos* (*-idis*), *-eip'tri*. Gr., ὑπαλειπτρίς, ὑπάλειπτρον. The implement or means by which an ointment is applied. [L, 50, 104 (*a*, 14).]

HYPALGESIA (Lat.), n. f. Hip(hu^{6}p)-a^{2}l(a^{3}l)-je(ga)'zi^2(si^2)-a^3. From ὑπό, in slight degree, and ἄλγησις, sensibility to pain. Ger., *Hypalgesie*. Of Eulenburg, diminished sensitiveness to painful impressions. [D, 35.]

HYPALGIA (Lat.), n. f. Hip(hu^{6}p)-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ὑπό, in slight degree, and ἄλγος, pain. Slight pain. [A, 322.]

HYPALGIC, adj. Hip-a^{2}l'ji^{2}k. Pertaining to hypalgia. [L, 107.]

HYPALIMMA (Lat.), n. n. Hip(hu^{6}p)-a^3-li^{2}m(lem)'ma^3. Gen., *-lim'matos* (*-atis*). See Hypaleimma.

HYPALIPTON (Lat.), **HYPALIPTRIS** (Lat.), **HYPALIPTRON** (Lat.), n's n., f., and n. Hip(hu^{6}p)-a^3-li^{2}p(lep)'to^{2}n, -tri^{2}s, -tro^{2}n. See Hypaleipton.

HYPAMAUROSIS (Lat.), n. f. Hip(hu^{6}p)-a^{2}m(a^{3}m)-a^4(a^3-u^4)-ro'si^{2}s. Gen., *-os'eos* (*-is*). From ὑπό, in slight degree, and ἀμαύρωσις, amaurosis. An old term for partial amaurosis. [F.]

HYPAMAUROTIC, adj. Hip-a^{2}m-a^4-ro^{2}t'i^{2}k. Pertaining to or affected with hypamaurosis. [L, 50 (*a*, 14).]

HYPAMBLYOPIA (Lat.), n. f. Hip(hu^{6}p)-a^{2}m(a^{3}m)-bli^2(blu^6)-op'i^2-a^3. From ὑπό, in slight degree, and ἀμβλυωπία, amblyopia. Slight amblyopia. [L, 50, 135 (*a*, 39).]

HYPAMBLYOPIC, adj. Hip-a^{2}m-bli^2-o^{2}p'i^{2}k. Pertaining to or affected with hypamblyopia. [A, 322.]

HYPANCONION (Lat.), **HYPANCONIUM** (Lat.), n's n. Hip-(hu^{6}p)-a^{2}n^2(a^{3}n^2)-kon'i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., ὑπαγκώνιον (from ὑπό, under, and ἀγκών, the elbow). Of Galen, a cushion for supporting the elbow. [E; L, 50 (*a*, 14).]

HYPANTHEROUS, adj. Hi^{2}p-a^{2}n-the'ru^{3}s. Gr., ὑπανθηρός (from ὑπό, under, and ἀνθηρός, blooming). Lat., *hypantherus*. Of Hippocrates, florid (said of sputa streaked with blood). [L, 50 (*a*, 14).]

HYPANTHIAL, adj. Hip-a2n'thi2-a2l. Situated under the calyx. [*a*, 35.]

HYPANTHIUM (Lat.), n. n. Hip(hu6p)-a2n(a3n)'thi2-u3m-(u4m). From ὑπό, under, and ἄνθος, a flower. Ger., *Unterkelch.* Of Link, an enlargement or other development of the torus under the calyx, as in *Calycanthus* and *Cactus.* [B, 19, 36, 123 (*a*, 24).]

HYPANTHODIUM (Lat.), n. n. Hip(hu6p)-a2n(a3n)-thod'i2-u3m(u4m). From ὑπό, under, and ἀνθώδης, flowery. Ger., *Blüthenfeige.* An inflorescence in which the receptacle is external and the flowers are inclosed in it, as in the fig. [B, 36, 123 (*a*, 24).]

HYPANTIMONITE, n. Hip-a2n-ti2m'o2n-it. See Hypoantimonite.

HYPAPHONOS (Lat.), **HYPAPHONUS** (Lat.), adj. Hi2p-(hu6p)-a2f(a3f)-on'o2s, -u3s(u4s). From ὑπό, somewhat, and ἄφωνος, dumb. Of Hippocrates, partially dumb. [L, 50 (*a*, 14).]

HYPAPOPHYSEAL, adj. Hip-a2p-o-fi2s'e2-a2l. Pertaining to or of the nature of a hypapophysis.

HYPAPOPHYSIS (Lat.), n. f. Hip(hu6p)-a2p(a3p)-o2f'i2(u6)-si2s. Gen., *-y'seos* (*-oph'ysis*). From ὑπό, under, and ἀπόφυσις, the process of a bone. In animals, a bony process from the lower side of a vertebra, sometimes very large, as in the loon. [L, 343.]

HYPAPOPLECTIC, adj. Hip-a2p-o-ple2k'ti2k. Lat., *hypapoplecticus* (from ὑπό, in slight degree, and ἀποπληγία, apoplexy). Pertaining to hypapoplexia. [A, 322.]

HYPAPOPLEXIA (Lat.), n. f. Hi2p(hu6p)-a2p(a3p)-o2-ple2x-(plax)'i2-a3. From ὑπό, in slight degree, and ἀποπληξία, apoplexy. A slight form of apoplexy. [L, 50, 135 (*a*, 39).]

HYPAR (Lat.), n. n. indecl. Hi(hu6)'pa3r. Gr., ὕπαρ. Of Hippocrates, a vision. [L, 50 (*a*, 14).]

HYPARTERIAL, adj. Hip-a3r-te'ri2-a2l. From ὑπό, under, and ἀρτηρία, an artery. Situated below the pulmonary artery (see *H.* bronchus).

HYPASTHENIA (Lat.), n. f. Hip(hu6p)-a2s(a3s)-the2n-i(e)'a3. From ὑπό, in slight degree, and ἀσθένεια, weakness. Weakness, slight loss of strength. [L, 50 (*a*, 14).]

HYPATE, n. A place in Greece where there is a sulphurous saline spring. [L, 49, 87 (*a*, 14).]

HYPATMISM, n. Hi2p'a2t-mi2z'm. Gr., ὑπατμισμός (from ὑπατμίζεσθαι, to fumigate). Lat., *hypatmismus.* Ger., *Räucherung.* Fumigation. [L, 50 (*a*, 14).]

HYPATMOS (Lat.), **HYPATMUS** (Lat.), n's m. Hi2p(hu6p)-a2t(a3t)'mo2s, -mu3s(mu4s). Gr., ὑπατμός (from ὑπό, under, and ἀτμός, vapor). Ger., *Rauch.* The vapor produced by a fumigation. [L, 50 (*a*, 14).]

HYPATONIA (Lat.), n. f. Hip(hu6p)-a2t(a3t)-on(o2n)'i2-a3. From ὑπό, in slight degree, and ἀτονία, languor. A slight degree of atony. [L, 50 (*a*, 14).]

HYPAUCHENION (Lat.), **HYPAUCHENIUM** (Lat.), n's n. Hip(hu6p)-a4k(a3-u4ch2)-en(an)'i2-o2n, -u3m(u4m). From ὑπό, under, and αὐχήν, the neck. Ger., *Nackenkissen.* Of Galen, a pillow for the neck. [L, 50 (*a*, 14).]

HYPAXIAL, adj. Hip-a2x'i2-a2l. From ὑπό, under, and *axis*, an axis. Of a structure, beneath or on the ventral side of the body axis or of the vertebræ. ["Amer. Nat.," 1890 (J).]

HYPECACUANHA (Lat.), n. f. Hi2p(hu6p)-e2k-a2k(a3k)-u2-(u4)-a2n(a2n)'ha3. See Ipecacuanha.

HYPECCAUMA (Lat.), n. n. Hip(hu6p)-e2k-ka4'(ka3'u4)-ma3. Gen., *-caum'atos* (*-atis*). Gr., ὑπέκκαυμα (from ὑπό, under, and ἔκκαυμα, wood for lighting fires). Ger., *Lebensnährung* (1st def.), *Feuerungsmittel* (2d def.). 1. Of Hippocrates, the pabulum vitæ. 2. The fuel with which fire is made. [L, 50 (*a*, 14).]

HYPECCHORESIS (Lat.), n. f. Hip(hu6p)-e2k-kor(ch2or)-e-(a)'si2s. Gen., *-es'eos* (*-es'is*). From ὑπό, down, and ἐκχώρησις, a going out. Of Hippocrates, a moderate alvine dejection. [L, 50 (*a*, 14).]

HYPECCHORETIC, adj. Hip-e2k-kor-e2t'i2k. Gr., ὑπεκχωρητικός. Lat., *hypecchoreticus.* Pertaining to or producing hypecchoresis. [A, 322.]

HYPECOUM (Lat.), n. n. Hi2p(hu6p)-ek(ak)'o(o2)-u3m(u4m). Gr., ὑπήκοον. Fr., *hypécoum, hypécoon.* Ger., *Lappenblume.* A genus of the suborder *Fumarieæ*, of the *Papaveraceæ.* The juice of the seed is said to have similar properties to those of opium. The *Hypecoeæ* (Fr., *hypécoées*) are a tribe of the *Fumariaceæ.* The *Hypecoideæ* of Prantl and Kündig are a suborder of the *Papaveraceæ.* The *Hypecoinæ* are the *Hypecoeæ.* [B, 19, 42, 180, 245 (*a*, 24).]—**H. littorale.** A species having the same properties as *H. procumbens.* [B, 121 (*a*, 35).]—**H. pendulum.** Fr., *hypécoon à fruits pendues.* A species found in Spain, in Languedoc, around Paris, and as far east as the Caspian Sea. [B, 64 (*a*, 24).]—**H. procumbens.** Fr., *hypécoon couché, cumin cornu.* A species found from Portugal to Astrachan in moist sands and maritime plains. The juice is said to furnish opium. [B, 121 (*a*, 24).]

HYPECTASIA (Lat.), **HYPECTASIS** (Lat.), n's f. Hip-(hu6p)-e2k-ta(ta3)'zi2(si2)-a3, -e2kt'a2-si2s. From ὑπό, in a slight degree, and ἔκτασις, a stretching. A moderate distention. [L, 50 (*a*, 14).]

HYPELÆON (Lat.), **HYPELÆUM** (Lat.), n's n. Hip(hu6p)-e2l-e'(a3'e3)-o2n, -u3m(u4m). Gr., ἔλαιον (from ὑπό, under, and ἔλαιον, oil). Ger., *Oelhefen, Oelsatz.* The dregs of oil. [A, 325.]

HYPELYTRUM (Lat.), n. n. Hip(hu6p)-e2l'i2t(u6t)-ru3m(ru4m). See Hypolytrum.

HYPÉMIE (Fr.), n. E-pa-me. From ὑπό, below measure, and αἷμα, blood. Of Andral, deficiency of blood. [D, 74.]

HYPEMPHRACTIC, adj. Hip-e2m-fra2k'ti2k. Pertaining to hypemphraxis. [L, 50 (*a*, 14).]

HYPEMPHRAXIS (Lat.), n. f. Hip(hu6p)-e2m-fra2x(fra3x)'-i2s. Gen., *-ax'eos* (*-is*). From ὑπό, in slight degree, and ἔμφραξις, a stoppage. An imperfect obstruction, especially constipation. [L, 50 (*a*, 14).]

HYPENANTIOMA (Lat.), **HYPENANTIOSIS** (Lat.), n's n. and f. Hip(hu6p)-e2n-a2n(a3n)-ti2-o'ma3, -si2s. Gen., *-om'atos* (*-atis*), *-os'eos* (*-is*). Gr., ὑπεναντίωμα (from ὑπό, under, and ἐναντίος, opposite). See Allopathy.

HYPENCEPHALIS (Lat.), n. f. Hip(hu6p)-e2n(e2n2)-se2f-(ke2f)'a2l(a3l)-i2s. Gen., *-al'idos* (*-idis*). From ὑπό, under, and ἐγκεφαλός, the brain. See Cerebellum.

HYPENDOSMOSE (Fr.), n. E-pa3n2-dos-moz. Defective endosmosis. [L, 41 (*a*, 14).]

HYPENE (Lat.), n. f. Hi(hu6)-pe(pa)'ne(na). Gen., *-en'es.* Gr., ὑπήνη. Of Lindenus, the beard under the chin. [L, 50 (*a*, 14).]

HYPENEMIUS (Lat.), adj. Hi(hu6)-pe(pa)-nem(ne2m)'i2-u3s-(u4s). Gr., ὑπηνέμιος (from ὑπό, under, and ἄνεμος, wind). 1. In physiology, windy. 2. Of Aldrovandus, sterile (said of eggs). [L, 50 (*a*, 14).]

HYPEPIDERMIDOCARPA (Lat.), n. n. pl. Hip(hu6p)-e2p-i2-du6rm(de2rm)-i2d-o(o3)-ka3rp'a3. From ὑπό, under, ἐπί, upon, δέρμα, the skin, εἶδος, resemblance, and καρπός, fruit. A class of cryptogams, comprising the *Algæ* and the *Tremellini.* [B, 121 (*a*, 35).]

HYPEPIGEOCARPUS (Lat.), adj. Hi2p(hu6p)-e2p-i2-je(ga)-o(o3)-ka3rp'u3s(u4s). From ὑπό, under, ἐπί, upon, γῆ, the earth, and καρπός, a fruit. Bearing fruit under and above the earth. [L, 50 (*a*, 14).]

HYPERABDUCTION, n. Hi-pu6r-a2b-du3k'shu3n. From ὑπέρ, over, and *abducere*, to lead. Ger., *H.* See Superabduction.

HYPERACANTHOSIS (Lat.), n. f. Hip(hu6p)-e2r-a2k(a3k)-a2n(a3n)-tho'si2s. Gen., *-os'eos* (*-os'is*). From ὑπέρ, over, and ἄκανθα, a thorn. Ger., *Hyperakanthose.* Hyperplasia of the prickle-cell layer of the epidermis. The *hyperacanthoses* (Ger., *Hyperakanthosen, einfache Akanthome*) in Auspitz's classification of skin diseases are a family of the *Acanthoses*, including *Verruca, Condyloma acuminatum*, and *Idrotadenoma.* [G, 4.]

HYPERACIDITY, n. Hip-u6r-a2s-i2d'i2t-i2. From ὑπέρ, over, and *acidus*, acid. Fr., *hyperacidité.* Ger., *Hyperacidität.* Excessive acidity; said especially of the gastric juice. [A, 326 (*a*, 21); "Sem. méd.," Nov. 20, 1889 (*a*, 18).]

HYPERACOE (Lat.), n. f. Hip(hu6p)-e2r-a2k(a3k)'o(o2)-e(a). Gen., *-ac'oes.* From ὑπέρ, over, and ἀκοή, the sense of hearing. See Hyperacusis.

HYPERACTION, n. Hi-pu6r-a2k'shu3n. From ὑπέρ, above measure, and *actio*, action. Excessive activity of a part or organ, which may or may not be pathological. [D, 1.]

HYPERACUSIA (Lat.), **HYPERACUSIS** (Lat.), n's f. Hip-(hu6p)-e2r-a2k(a3k)-u2(u)'si2-a3, -si2s. From ὑπέρ, above measure, and ἄκουσις, hearing. Excessive sensibility of the organ of hearing. [F.]—**H. willisiana.** Abnormally acute hearing. [Rosenthal (A, 319 [*a*, 21]).]

HYPERACUTE, adj. Hi-pu6r-a2k-u2t'. From ὑπέρ, above measure, and *acutus*, sharp. Excessively acute.

HYPERADENOMA (Lat.), n. n. Hip(hu6p)-u6r(e2r)-a2d(a3d)-e2n-o'ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, above measure, and ἀδήν, a gland. An enlarged gland. [L, 50 (*a*, 14).]

HYPERADENOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-a2d(a3d)-e2n-o'si2s. Gen., *-os'eos* (*-os'is*). Ger., *Drüsenwucherung.* Hypertrophy of a gland. [L, 50, 107 (*a*, 14).]

HYPERÆMATOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2m-(a3-e2m)-a2t(a3t)-o'si2s. Gen., *-os'eos* (*-os'is*). See Hyperæmosis.

HYPERÆMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-em'(a3'e2m)-i2-a3. From ὑπέρ, above measure, and αἷμα, blood. Fr., *hyperhémie, hyperémie.* Ger., *Hyperämie.* It., *iperemia.* Sp., *hiperemia, hiperhemia.* A superabundance of blood in any part of the body. [D.]—**Accumulation h.** Ger., *Stauungshyperämie.* See *Passive h.* and *Engorgement h.*—**Active h.** Lat., *h. activa.* See *Acute active h.*—**Active local h.** Ger., *active Hyperämie.* An increased and accelerated flow of blood into the arteries of a part, because either the blood-pressure of that part is increased, or the resistance of the part in proportion to the force of the blood is diminished. [D, 3.]—**Acute active h.** A rapidly developed h. of a part due to irritation. It consists in a relaxation of the muscular fibres of the arterioles consequent upon paresis of the vaso-motors, stimulation of the vaso-dilators, or paralysis of the muscular fibres themselves. [*a*, 40.]—**Acute passive h.** An abnormal distention of the venous capillaries of a part rapidly appearing and due to obstruction of the return-flow of blood from the part. [*a*, 40.]—**Arterial h.** Lat., *h. arterialis* (seu *activa*). Ger., *arterielle Hyperämie.* The active local h. arising from a relaxed condition of the coats of the arteries. [D, 3.]—**Asthenic h.** See *Relaxative h.*—**Atonic h.** Active local h.; so called with reference to the condition of the arteries resulting in h. [D.]—**Cerebral h.** Ger., *Gehirnhyperämie.* Of Hammond, the first stage in active cerebral congestion. [D.] See Cephalæmia.—**Chronic passive h.** Ger., *chronische passive Hyperämie.* A distention of the capillaries of a part by venous blood coming on gradually and without inclination to disappear; due to external or internal interference with the venous circulation of the part. [*a*, 40.]—**Collateral h., Compensatory h.** Ger., *collaterale* (oder *compensatorische*) *Hyperämie.* That form of h. which is compensatory to an anæmia in a near or distant area, through a transfer of the blood-pressure. It may be either arterial or venous. [D, 3.]—**Congestive h.** See *Passive local h.*—**Direct neuralgic h.**

H. with elevation of temperature and swelling of the affected parts, which appears during a neuralgia or remains after its disappearance. [D, 3.]—**Encephalic h.** See *Cerebral h.*—**Engorgement h.** Ger., *Stauungshyperämie.* H. due to engorgement. In Auspitz's classification of skin diseases, the engorgement h's and anæmias form the family of "engorgement dermatoses," including ischæmia of the skin, cyanosis, and effusions of blood (see HÆMORRHAGIA *cutis*), or of hæmoglobin (see HÆMOGLOBINORRHŒA *cutis*) due to venous engorgement of the skin. [G, 4.]—**Follicular h.** 1. A h. of the glandular system. 2. A congestion of the follicles in the pharynx occurring in the early stages of clergyman's sore throat. [α, 40.]—**Functional h.** H. due to or occasioning functional activity.—**Gravitative h.** See *Acute passive h.*—**General h.** The h. which occurs over more or less of the whole surface of the body under circumstances such as excitement or the reaction after fright. [α, 40.]—**H. abdominis.** See CŒLIÆMIA.—**H. activa.** See *Acute active h.*—**H. acuta of the middle ear.** Fr., *hyperémie aiguë de l'oreille.* Ger., *akute Hyperämie des Mittelohres.* Of De Rossi, an acute catarrhal inflammation of the cavity of the middle ear. [F.]—**H. arterialis.** See *Arterial h.*—**H. capitis** (seu **cerebri**). See CEPHALÆMIA.—**H. collateralis.** See *Collateral h.*—**Hyperæmiæ cutaneæ.** Cutaneous affections of which the most important feature is h. [G.]—**H. hepatica.** An abnormal distention of the liver with blood. It may be congestive h., as after a full meal or in the early stages of inflammation, or it may be passive, as in obstructive disorders of the circulatory system. [α, 40.]—**H. of fluxion.** Active h. [D.]—**H. of paralysis.** H. due to paralysis or section of the nerves of the part. [α, 40.]—**H. of stasis.** Passive h. [D.]—**H. passiva.** See *Venous h.*—**H. venosa.** See *Venous h.*—**Hypostatic h.** See *Chronic passive h.*—**Hysterical h.** H. as it occurs among hysterical subjects. It may lead to profuse and frequent menstruation. [D, 30.]—**Inflammatory h.** The increased vascularity which marks the first stage of an inflammatory process. [D.]—**Ischæmic h.** Ger., *ischämische Hyperämie.* Of O. Weber, those arrests of the blood in the veins which occur after closure of the arteries supplying them, especially in incomplete collateral circulation. [D, 3.]—**Local h.** The increase of the blood contained in more or less dilated, usually lengthened, vessels of any part of the body, so that the normal fluctuations, as to the quantity of blood contained, are exceeded. [D, 3.]—**Mechanical h.** See *Passive local h.*—**Neuro-paralytic h.** See *H. of paralysis.*—**Paralytic h.** See *H. of paralysis.*—**Partial h.** A h. of any single organ or part of an organ in the body. [α, 40.]—**Passive local h.** Ger., *passive Hyperämie.* That form of h. in which the principal cause is the increase of resistances, often by the interposition of a mechanical force. [D, 3.]—**Reflex neuralgic h.** H. of a reflex nature, which may arise from a transient or from a continuous cause, perhaps during the progress of a neuralgia. [D, 3.]—**Relaxative h.** Ger., *relaxative Hyperämie.* Active local h.; so called with reference to the condition of the arteries resulting in h. [D.]—**Retinal h.** Fr., *hypérémie rétinienne* (ou *de la rétine*). Ger., *Hyperämie der Netzhaut.* An engorgement or overfilling either of the larger retinal vessels or of the capillary vessels, the latter being most marked on the optic disc. [F.]—**Venous h.** Lat., *h. venosa.* The form of h. produced by pressure on the veins above. [D, 3.]

HYPERÆMIC, adj. Hip-u^{5}r-em'i^{2}k. Lat., *hyperœmicus.* Fr., *hypéremique.* Ger., *hyperämisch.* Pertaining to or affected with hyperæmia. [D.]

HYPERÆMOSIS (Lat.), n. f. Hip(hu^{6}p)-e^{2}r-em(a^3-e^{2}m)-o'si^{2}s. Gen., *-os'eos* (*-os'is*). Gr., ὑπεραίμωσις (from ὑπέρ, above measure, and αἷμα, blood). 1. A superabundance of blood. 2. An excessive activity or pressure of the blood. [L, 50 (α, 14).]

HYPERÆSTHESIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}s(a^3-e^{2}s)-the(tha)'zi^2(si^2)-a^3. From ὑπέρ, to excess, and αἴσθησις, perception by the senses. Fr., *hyperesthésie.* Ger., *Hyperästhesie, überspannte Empfindung.* It., *iperestesia.* Sp., *hiperestesia.* Morbidly acute sensitiveness to external impressions.—**Acoustic h., Auditory h.** See *H. acustica.*—**Cerebral h.** A h. of any part of the body due to disease of the brain. [α, 40.]—**Cutaneous h.** Lat., *h. cutanea.* Fr., *hyperesthésie cutanée.* H. of the skin.—**Cutaneous thermo-h.** Excessive sensibility of the skin to differences in temperature. [D, 35.]—**Epileptic chromatic h.** The state of nervous exaltation at the beginning of an attack of epilepsy, in which the subject sees with vividness more or fewer imaginary colors. According to H. Jackson, red is usually seen first, though the other primary colors may quickly follow. [D, 34.] See *Epileptic* AURA.—**General h.** H. affecting the whole body.—**Genital h.** An hysterical h. of the genital organs, especially seen in women, in which there is no excess of sexual desire, but pain during the act. [Wood (α, 40).]—**Gustatory h.** Lat., *h. gustatoria.* See HYPERGEUSIA.—**H. acustica.** Fr., *hyperesthésie acoustique.* Ger., *akustische Hyperästhesie.* A disorder which consists in an unpleasant, painful sensation in the ear caused by tones or noises. [F, 32.]—**H. cutanea.** See *Cutaneous h.*—**H. gustatoria, H. linguæ.** See HYPERGEUSIA.—**H. of the cardiac plexus.** Lat., *h. plexus cardiaci.* Of Romberg, angina pectoris.—**H. of the hypogastric plexus.** Hypogastric neuralgia. [D, 70.]—**H. of the mesenteric plexus.** Mesenteric neuralgia. [D, 70.]—**H. olfactoria.** See HYPEROSMIA.—**H. plexus cardiaci.** See *H. of the cardiac plexus.*—**H. psychica.** Hypochondriasis. [D, 70.]—**Lead h.** An affection incidental to lead poisoning, characterized by pain, especially in the lower limbs and trunk, and in the joints. [D, 34.]—**Local h.** H. affecting only a portion of the body.—**Muscular h.** Excessive sensitiveness of the muscles to pressure; distinct from cutaneous h. It sometimes occurs in spinal paralysis. [D, 34.]—**Neural h.** See NEURALGIA.—**Olfactory h.** Lat., *h. olfactoria.* See HYPEROSMIA.—**Optic h.** Exaggerated sensitiveness of the eye. [α, 29.]—**Organic h.** H. due to organic diseases of the nerve-centres. [Wood (α, 40).]—**Psychical h.** [Romberg]. Lat., *h. psychica.* Hypochondriasis. [D, 70.]—**Pulmonary h.** A morbid sensitiveness to pain or neuralgia of the lung substance not connected with any organic disease of the organ. [Walshe (α, 40).]—**Spinal h.** 1. An excessive sensitiveness of the cutaneous surface over areas supplied by nerves the posterior roots of which are involved in an acute or chronic spinal meningitis. 2. A form of local h. found in "spinal irritation" or "spinal anæmia." It consists in an excessively sensitive spot over some portion of the spinal vertebra, usually the dorsal, and is most frequently found in conjunction with general hysteria. [α, 40.]—**Thermo-h.** Exalted sensitiveness to impressions of heat and cold. [D, 35.]—**Urethral h.** A condition of abnormal sensitiveness of the urethra. [G.]—**Visceral h.** An abnormal consciousness of the presence and action of an abdominal or thoracic organ, usually accompanied with pain. [Seguin (α, 40).]

HYPERÆSTHESIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}s(a^3-e^{2}s), the(tha)'si^{2}s. Gen., *-es'eos* (*-is*). See HYPERÆSTHESIA; in the pl. *hyperœstheses*, diseases characterized by hyperæsthesia.

HYPERÆSTHETIC, adj. Hip-u^{5}r-e^{2}s-the^{2}t'i^{2}k. Lat., *hyperœstheticus.* Fr., *hyperesthétique.* Ger., *hyperästhetisch.* It., *iperestesico.* Sp., *hiperestético.* Pertaining to or affected with hyperæsthesia.

HYPERÆSTHETOSPASMUS (Lat.), n. m. Hip(hu^{6}p)-u^{5}r-(e^{2}r)-e^{2}s(a^3-e^{2}s)-the^{2}t-o(o^3)-spa^{2}z(spa^{3}s)'mu^{3}s(mu^{4}s). From ὑπέρ, to excess, αἴσθησις, sensation, and σπασμός, spasm. Ger., *Gefühlsüberreizungskrampf.* A spasm resulting from hyperæsthesia. [L, 50 (α, 14).]

HYPERAKANTHOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}k-(a^{3}k)-a^{2}n(a^{3}n)-tho'si^{2}s. Ger., *Hyperakanthose.* See HYPERACANTHOSIS.

HYPERAKUSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}k(a^{3}k)-u^2-(u)'si^{2}s. Gen., *-us'eos* (*-is*). See HYPERACUSIA.

HYPERALBUMINOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}l-(a^{3}l)-bu^2(bu)-mi^{2}n-o'si^{2}s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and *albumen* (see ALBUMIN). Fr., *hyperalbuminose.* Ger., *Hyperalbuminose.* The presence of an excess of albumin in the blood. [D, 3.]—**Absolute h.** A condition, not exactly demonstrable, in which there is an increase of the entire quantity of albumin in the blood. [D, 3.]—**Relative h.** A transient h. brought about by losses of water and salts from the blood that are greatly out of proportion to the losses of albumin during the same time, as in cholera and after taking drastic purgatives. [D, 3.]

HYPERALGESIA (Lat.), **HYPERALGIA** (Lat.), n's f. Hip-(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}l(a^{3}l)-je(ga)'zi^2(si^2)-a^3, -a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ὑπέρ, to excess, and ἄλγησις, a feeling of pain, or ἄλγος, pain. Fr., *hyperalgésie, hyperalgie.* Ger., *Hyperalgesie, Hyperalgie.* Excessive sensitiveness to painful impressions. [D.]—**Acoustic h., Auditory h.** See HYPERÆSTHESIA *acustica.*—**Cutaneous h., H. of the skin.** [D, 35.]—**Muscular h.** The sense of fatigue and prostration felt in the muscles in certain diseases; by Ross thought due to excessive irritability of the nerves of common muscular sensibility. [D, 35.]—**Olfactory h.** Painful sensitiveness of the Schneiderian membrane to certain odors. [α, 40.]—**Visceral h.** H. due to abnormal irritation, or increased irritability of the visceral sensory nerves. [D, 35.]

HYPERÄMIE (Ger.), n. Hu^{6}p-e^{2}r-a-me'. See HYPERÆMIA.—**Senkungsh'.** See HYPOSTASIS (4th def.).—**Stauungsh'.** 1. See *Engorgement* HYPERÆMIA. 2. See *Passive local* HYPERÆMIA.

HYPERÄMISCH (Ger.), adj. Hu^{6}p-e^{2}r-am'i^{2}sh. See HYPERÆMIC.

HYPERANARRHOPHESIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}n(a^{3}n)-a^{2}r(a^{3}r)-ro(ro^2)-fe(fa)'si^{2}s. Gen., *-cs'eos* (*-is*). From ὑπέρ, to excess, and ἀναῤῥόφησις, a gulping down again. Ger., *übermässige Einsaugung.* Excessive absorption. [L, 50 (α, 14).]

HYPERANARTHRIC, adj. Hip-u^{5}r-a^{2}n-a^{3}rth'ri^{2}k. Lat., *hyperanarthicus* (from ὑπέρ, to excess, α priv., and ἀρθρικός, pertaining to the joints). Having excessive imperfections of the joints and limbs. [L, 50 (α, 14).]

HYPERANTHERA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}n(a^{3}n)-the(tha)'ra^3. From ὑπέρ, over, and ἄνθος, a flower. Of Vahl, the genus *Moringa.* The *Hyperanthereœ* are the *Moringeœ.* [B, 121 (α, 24).]—**H. aptera.** See MORINGA *aptera.*—**H. moringa.** See MORINGA *pterygosperma.*

HYPERANTHRAXIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}n(a^{3}n)-thra^{2}x(thra^{3}x)'i^{2}s. Gen., *-ax'eos* (*-is*). From ὑπέρ, to excess, and ἄνθραξ, a coal. See *Asiatic* CHOLERA.

HYPERAORTOTROPHIE [Piorry] (Fr.), n. E-pe^{2}r-a^3-or-to-tro-fe. From ὑπέρ, to excess, ἀορτή, the aorta, and τροφή, nourishment. Aortic hypertrophy. [A, 250 (α, 21).]

HYPERAPHIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}f(a^{3}f)'i^2-a^3. From ὑπέρ, to excess, and ἁφή, a touching. Cutaneous hyperæsthesia. [L, 135 (α, 39).]

HYPERAPHIC, adj. Hip-u^{5}r-a^{2}f'i^{2}k. Pertaining to or affected with hyperaphia.

HYPERAPHRODISIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}f(a^{3}f)-ro(ro^2)-di^{2}z(di^{2}s)'i^2-a^3. From ὑπέρ, to excess, and ἀφροδίσια, aphrodisia. Ger., *übermässiger Geschlechtstrieb.* An inordinate venereal appetite. [L, 50 (α, 14).]

HYPERAPHY, n. Hi-pu^{5}r-a^{2}f-i^2. See HYPERAPHIA.

HYPERAPOPHYSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-a^{2}p(a^{3}p)-o^{2}f'i^{2}s(u^{6}s)-i^{2}s. Gen., *-ys'eos* (*-oph'ysis*). From ὑπέρ, above measure, and ἀπόφυσις, an apophysis. Of Mivart, a lateral backwardly projecting process of bone springing from the neural arch of each lumbar vertebra, on the side of the neural spine, in the *Mycetes* and other allied forms. ["Proc. of the Zool. Soc.," 1865 (α, 39).]

HYPERARITHMOUS, adj. Hip-u^{5}r-a^{2}r-i^{2}th'mu^{3}s. Gr., ὑπεράριθμος (from ὑπέρ, to excess, and ἀριθμός, a number). Supernumerary. [L, 50 (α, 14).]

HYPERARTERIELL (Ger.), adj. Hu^{6}p-e^{2}r-a^{3}r-ta-re-e^{2}l'. See OVER-ARTERIALIZED.

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

HYPERARTERIOARCTIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a3r-te(ta)-ri2-o(o3)-a3rk'shi2(ti2)-a3. From ὑπέρ, to excess, ἀρτηρία, an artery, and *arctare*, to press close together. Fr., *hyperarterioarctie* [Piorry]. Excessive arterial stenosis. [A, 322.]

HYPERARTERIOECTASIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a3r-te(ta)-ri2-o(o3)-e2kt'a3-si2s. Gen., *-as'eos* (*-ec'tasis*). From ὑπέρ, to excess, ἀρτηρία, an artery, and ἔκτασις, an extension. See ARTERIYPERECTASIS.

HYPERARTETISCUS (Lat.), n. m. Hip(hu6p)-u5r(e2r)-a3rt-e2t-i2sk'u3s(u4s). From ὑπέρ, to excess, and *artus*, a joint. 1. One who has some unusual imperfection of the limbs. 2. One who has more than the regular number of limbs or parts. [L, 50 (a, 14).]

HYPERARTHRIC, adj. Hip-u5r-a3rth'ri2k. Lat., *hyperarthricus* (from ὑπέρ, to excess, and ἄρθρον, a joint). Having supernumerary limbs or parts. [L, 50 (a, 14).]

HYPERARTHRITIC, adj. Hip-u5r-a3rth-ri2t'i2k. Lat., *hyperarthriticus*. Affected with hyperarthritis. [L, 50 (a, 14).]

HYPERARTHRITIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a3rth-ri-(re)'ti2s. Gen., *-it'idos* (*-idis*). From ὑπέρ, to excess, and ἀρθρῖτις, arthritis. Arthritis of great severity. [L, 50 (a, 14).]

HYPERARTHROPATHIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a3rth-ro(ro3)-pa2th(pa3th)-i(e)'a3. Fr., *hyperarthropathie* [Piorry]. See ARTHRYPERPATHIA.

HYPERARTHROSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a3rth-ro'-si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and ἄρθρον, a joint. Fr., *hyperarthrose*. Ger., *Ueberyliederung*. The state of having superfluous joints. [L, 50 (a, 14).]

HYPERASTHENIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a2s(a3s)-the2n-i(e)'a3. From ὑπέρ, to excess, and ἀσθένεια, weakness. Fr., *hyperasthénie*. Ger., *übermässige Schwäche*. Extreme debility. [L, 50, 107 (a, 14).]

HYPERASTHENIC, adj. Hip-u5r-a2s-the2n'i2k. Lat., *hyperasthenicus*. Pertaining to or affected with hyperasthenia. [L, 50 (a, 14).]

HYPERÄSTHESIE (Ger.), n. Hu6p-e2r-e2s-ta-ze'. See HYPERÆSTHESIA.—**Akustische H.** See HYPERÆSTHESIA *acustica*.

HYPERAUXESIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a4x(a3-u4x)-e(a)'si2s. Gen., *-es'eos* (*-is*). From ὑπέρ, to excess, and αὔξησις, increase. An extraordinary increase in the size of a part. [L, 50 (a, 14).]—**H. iridis.** H. of the iris by angeiectasia, causing it to appear very much darker, and resulting in contraction of the pupil. [L, 50 (a, 14) ; L, 135 (a, 39).]

HYPERAZOTURIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-a2z(a3z)-ot-u2(u)'ri2-a3. From ὑπέρ, to excess, α priv., ζωή, life, and οὖρον, urine. Azoturia of extreme severity. [D, 47.]

HYPERBARIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ba(ba3)'ri2-a3. From ὑπέρ, to excess, and βαρύς, heavy. An abnormally high specific gravity. [L, 50 (a, 14).]

HYPERBARIC, adj. Hip-u5r-ba2r'i2k. Lat., *hyperbaricus*. Pertaining to, or possessed of, hyperbaria. [L, 50 (a, 14).]

HYPERBIONARCE (Lat.), n. f. Hip(hu6p)-u5r(e2r)-bi(bi2)-o2n-a3r'se(ka). Gen., *-arc'es*. From ὑπέρ, to excess, βίος, life, and νάρκη, numbness. Excess of vitality with stupidity. [A, 322.]

HYPERBOLIC, adj. Hip-u5r-bo2l'i2k. Gr., ὑπερβολικός (from ὑπερβάλλειν, to throw beyond). Lat., *hyperbolicus*. 1. Exaggerated. 2. Having the form of a hyperbola. [A, 322.]

HYPERBOREAN, adj. Hip-u5r-bo-re'a2n. Gr., ὑπερβόρεος (from ὑπέρ, beyond, and Βορέας, Boreas). Lat., *hyperboreus*. Fr., *hyperboréen*. Ger., *nördlich*. Inhabiting northern regions. [B, 19 (a, 24).]

HYPERBRACHYCEPHALIC, adj. Hip-u5r-bra2k-i2-se2f-a3l'i2k. From ὑπέρ, above measure, βραχύς, short, and κεφαλικός, for the head. Lat., *hyperbrachycephalus*. Fr., *hyperbrachycéphale*. Ger., *hyperbrachycephal*. Of Topinard, having a length-breadth index greater than 85°; said of skulls. [L, 332.]

HYPERBRONCHITE [Piorry] (Fr.), n. E-pe2r-bro2n2-shet. From ὑπέρ, to excess, and βρόγχια, the bronchi (see also *-itis**). See *Suffocative* CATARRH.

HYPERBULIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-bu2(bu)'li2-a3. From ὑπέρ, to excess, and βουλή, the will. Exaggeration of the faculty of volition (*e. g.*, in the insane). [L, 135 (a, 39).]

HYPERBULIC, adj. Hip-u5r-bu2'li2k. Lat., *hyperbulicus*. Pertaining to or affected with hyperbulia. [D, 36.]

HYPERCARBONATE, n. Hip-u5r-ka3rb'o2n-at. See BICARBONATE.

HYPERCARDIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka3rd'i2-a3. From ὑπέρ, to excess, and καρδία, the heart. Hypertrophy of the heart. [a, 18.]

HYPERCARDIÉMIE [Piorry] (Fr.), n. E-pe2r-ka3r-de-a-me. See CARDIOPLETHORA.

HYPERCARDIODYNAMIE [Piorry] (Fr.), n. E-pe2r-ka3r-de-o-de-na3-me. From ὑπέρ, to excess καρδία, the heart, and δύναμις, power. An increase in the force of the cardiac contractions. [L, 82.]

HYPERCARDIOHÆMIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka3rd-i2-o(o3)-hem'(ha3'em)-i2-a3. From ὑπέρ, to excess, καρδία, the heart, and αἷμα, blood. Fr., *hypercardiohémie* [Piorry], *hypercardiémie* [Piorry]. See CARDIOPLETHORA.

HYPERCARDIONERVIE [Piorry] (Fr.), n. E-pe2r-ka3r-de-o-ne2r-ve. From ὑπέρ, to excess, καρδία, the heart, and νεῦρον, a nerve. An increase in the innervation of the heart. [A, 250 (a, 21).]

HYPERCARDIOSTHÉNIE [Piorry] (Fr.), n. E-pe2r-ka3r-de-o-sta-ne. From ὑπέρ, to excess, καρδία, the heart, and σθένος, strength. See HYPERCARDIODYNAMIE.

HYPERCARDIOTROPHY, n. Hip-u5r-ka3rd-i2-o2t'ro-fi2. Lat., *hypercardiotrophia* (from ὑπέρ, to excess, καρδία, the heart, and τροφή, nourishment). Fr., *hypercardiotrophie* [Piorry]. Hypertrophy of the heart. [L, 41, 50 (a, 14).]

HYPERCARPOSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka3rp-o'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and κάρπωσις, profit. Fr., *hypercarpose*. Ger., *Ueberfruchtung*. Of F. Simon, an increase in the number of the blood-corpuscles with diminution of the amount of fibrin, as in typhus. [L, 50 (a, 14).]

HYPERCATAPINOSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka2t-(ka3t)-a3-pi2n-o'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and καταπίνειν, to gulp. 1. An excessively developed power of deglutition. 2. See HYPERANARRHOPHESIS. [L, 50 (a, 14).]

HYPERCATHARSIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka2th-(ka3th)-a3rs'i2-a3. Fr., *hypercatharsie*. Ger., *Hyperkatharse*. 1. See HYPERCATHARSIS. 2. Of Paulus Ægineta, menorrhagia. [L, 41, 50 (a, 14).]

HYPERCATHARSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ka2th-(ka3th)-a3rs'i2s. Gen., *-ars'eos* (*-is*). From ὑπέρ, to excess, and κάθαρσις, a cleansing. Fr., *hypercatharsie*. Ger., *Hyperkatharse*. Excessive purging.

HYPERCATHARTIC, adj. Hip-u5r-ka2th-a3rt'i2k. Lat., *hypercatharticus* (from ὑπέρ, to excess, and καθαρτικός, cleansing). 1. Pertaining to hypercatharsis. 2. Excessively cathartic. [L, 41 (a, 14).]

HYPERCEDEMONIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-sed(kad)-e2m-on(o2n)'i2-a3. From ὑπέρ, to excess, and κηδεμονία, solicitude. 1. Extreme care or anxiety. 2. Excessive care of a patient. [L, 50 (a, 14).]

HYPERCEDEMONIC, adj. Hip-u5r-se2d-e2m-o2n'i2k. Lat., *hypercedemonicus*. Pertaining to or affected with hypercedemonia. [L, 50 (a, 14).]

HYPERCENOSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-se2n(ke2n)-os'i2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and κένωσις, evacuation. Fr., *hypercénose*. A copious or excessive evacuation (*e. g.*, of the blood, by bleeding, etc.). [L, 50 (a, 14).]

HYPERCENOTIC, adj. Hip-u5r-se2n-o2t'i2k. Pertaining to, caused by, or causing hypercenosis. [L, 50 (a, 14).]

HYPERCERATOSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-se2r(ke2r)-a3-to'si2s. Gen., *-os'eos* (*-os'is*). From ὑπέρ, to excess, and κέρας, a horn. Fr., *hypercératose*. Ger., *Hyperkeratosis*, *Hyperkeratose*, *Hornhautübernährung*. 1. Hypertrophy of the cornea. 2. Conical cornea. [L, 50 (a, 14).]

HYPERCHAMÆCÉPHALE (Fr.), adj. E-pe2r-ka-ma-sa-fa3l. From ὑπέρ, above measure, χαμαί, on the ground, and κεφαλή, the head. Having an extreme degree of chamæcephaly. ["Rev. d'anthrop.," 1889, p. 626 (a, 29).]

HYPERCHLORHYDRIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-klor(ch2lor)-hid(hu6d)'ri2-a3. From ὑπέρ, to excess, χλωρός (see CHLORINE), and ὕδωρ (see HYDROGEN). Fr., *hyperchlorhydrie*. The presence of an excessive amount of hydrochloric acid in the secretions of the stomach. ["Prog. méd.," July 21, 1888, p. 46 (a, 18) ; "Therap. Gaz.," Oct., 1890, p. 676.]

HYPERCHOLIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-koi(ch2o2l)'-i2-a3. From ὑπέρ, above measure, and χολή, bile. A superabundant secretion of bile. [a, 40.]

HYPERCHONDROMA (Lat.), n. n. Hip(hu6p)-u5r(e2r)-ko2n-(ch2o2n)-dro'ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, to excess, and χόνδρος, cartilage. Ger., *Knorpelgewächs*. A cartilaginous tumor or hypertrophic growth. [L, 50 (a, 14).]

HYPERCHONDROSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-ko2n-(ch2o2n)-dro'si2s. Gen., *-os'eos* (*-is*). Ger., *Knorpelwucherung*. The development of a hyperchondroma. [L, 50 (a, 14).]

HYPERCHROMA (Lat.), n. n. Hip(hu6p)-u5r(e2r)-kro(ch2ro)'-ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, to excess, and χρῶμα, color. 1. An old term for a red fleshy excrescence at the inner angle of the eye near the caruncle. 2. An incorrect term for the caruncle. [F.]

HYPERCHROMATISM, n. Hip-u5r-krom'a2t-i2z'm. A state of unusually increased or intensified coloration. [L, 343.]

HYPERCHROMATOPSIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-krom(ch2rom)-a2t(a3t)-o2ps'i2-a3. From ὑπέρ, to excess, χρῶμα, color, and ὄψις, vision. An old term for a defect of vision in which faulty ideas of color are attached to objects. [F.] Cf. ACHROMATOPSIA.

HYPERCHROMATOSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-krom(ch2rom)-a2t(a3t)-o'si2s. Gen., *-os'eos* (*-is*). Ger., *Hyperchromatose*. An abnormal increase of the coloring matter of any tissue ; excessive pigmentation. In Auspitz's classification of skin diseases, the *Hyperchromatoses* are a family of the *Chromatoses*, comprising the various forms of superpigmentation of the skin, both congenital and acquired. [G, 4.]—**H. verrucosa maligna.** It., *ipercromia verrucosa maligna*. A term first proposed by Manassei and adopted by Rasori for xeroderma pigmentosum. [E. Rasori and S. M. Zuco, "Gazz. degli ospit.," June 10, 1885, p. 362 (G).]

HYPERCHROMIA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-krom-(ch2rom)'i2-a3. See HYPERCHROMATOSIS.

HYPERCINESIA (Lat.), **HYPERCINESIS** (Lat.), n's f. Hip(hu6p)-u5r(e2r)-si2n(ki2n)-e(a)'zi2(si2)-a3, -si2s. Gen., *-es'iæ*, *-es'eos* (*-is*). From ὑπέρ, to excess, and κίνησις, motion. Fr., *hyperkinésie*. Ger., *Hyperkinesie*. 1. Excessive muscular motion or contraction ; hence spasm. 2. An abnormal excitability of certain groups of muscles, with a tendency to strong contractions, observed below the point at which a unilateral section of the spinal cord has been made. 3. An abnormal mobility of any part of the body. 4. A

term for hysteria and hypochondria, on account of the frequent and abrupt motions of the pat ent. [D ; Landois (K) ; L, 50 (α, 14).]—**Gastric h.** See Hypochondriasis.—**H. cordis.** Palpitation of the heart. [A, 326 (α, 21).]—**H. hysterica.** Hysterical convulsions. [α, 40.]—**H. nervosa.** Excessive nervous impressibility. [α, 40.]—**H. of the facial nerve.** See *Convulsive* tic.—**H. uterina.** Convulsive hysteria. [α, 40.]—**Professional h.** [Ross]. One of a large group of affections in which there are spasmodic movements of certain muscles continuously employed in the exercise of a trade or profession. [D, 35.] Cf. Anaperiatic and *Anaperiatic* paralysis.—**Reflex h.** A disorder of the reflex nervous mechanism indicated by excessive reaction to stimuli. [D, 35.]—**Spinal h.** Muscular spasm or convulsions due to disease of the spinal cord. [α, 40.]

HYPERCINETIC, adj. Hip-u^{5}r-si^{2}n-e^{2}t'i^{2}k. Pertaining to or affected with hypercinesia. [L, 50 (α, 14).]

HYPERCLOMAX (Lat.), n. m. Hip(hu^{6}p)-u^{5}r(e^{2}r)-klom'a^{2}x-(a^{3}x). Gen., *-clom'acos (-acis).* From ὑπέρ, to excess, and κλῶμαξ, a heap of stones. See Hyperchroma.

HYPERCOQUELUCHE (Fr.), n. E-pe^{2}r-ko-k'l-u^{6}sh. Severe whooping-cough.—**H. chronique.** Prolonged and severe whooping-cough.

HYPERCORACOID [Gill], n. Hip-u^{5}r-ko^{2}r'a^{2}k-oid. From ὑπέρ, over, and κόραξ (see Coracoid). The scapula of Gegenbaur. [L.]

HYPERCORYPHOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ko^{2}r-i^2(u^6)-fo'si^{2}s. Gen., *-os'eos (-is).* Gr., ὑπερκορύφωσις (from ὑπέρ, to excess, and κορύφωσις, a bringing to a point). 1. A protuberance, especially on the head. 2. Of Hippocrates, a projecting point or end (*e. g.*, on the lobes of the liver or lung). [L, 50, 107 (α, 14).]

HYPERCOUSIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ku'zi^2(si^2)-a^3. Fr., *hypercousie.* See Hyperacusia.

HYPERCRINIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-kri^{2}n'i^2-a^3. From ὑπέρ, to excess, and κρίνειν, to separate. Fr., *hypercrinie.* Ger., *Hyperkrinie.* 1. Of Andral, an incorrect term for *hypercrisis.* 2. An abnormally abundant secretion. [L, 41, 50 (α, 14).]

HYPERCRISIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)'kri^{2}s-i^{2}s. Gen., *-cris'eos (-per'crisis).* From ὑπέρ, to excess, and κρίσις, a crisis. Fr., *hypercrise.* 1. Of Galen, an abnormal and critical discharge. [L, 50 (α, 14).] 2. A crisis of extraordinary severity. [L, 41, 107.]

HYPERCRITICAL, adj. Hip-u^{5}r-kri^{2}t'i^2-k'l. Fr., *hypercritique.* Of or pertaining to a hypercrisis. [L. 41 (α, 14).]

HYPERCROMA (Lat.), **HYPERCROMAX** (Lat.), n's n. and m. Hip(hu^{6}p)-u^{6}r(e^{2}r)-kro'ma^3, -krom'a^{2}x(a^{3}x). Gen., *-crom'atos (-atis), -crom'acos (-acis).* From ὑπέρ, to excess, and κρῶμαξ, a heap of stones. See Hyperchroma.

HYPERCUSIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ku^2(ku)'si^2-a^3. See Hyperacusia.

HYPERCYESIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-si(ku^6)-e(a)'si^{2}s. Gen., *-es'eos (-is).* From ὑπέρ, to excess, and κύησις, conception. 1. Superfœtation. 2. The state in which conceptions follow each other rapidly. [L, 50, 107 (α, 14).]

HYPERCYETIC, adj. Hip-u^{5}r-si-e^{2}t'i^{2}k. Pertaining to hypercyesis. [L, 50, 107.]

HYPERCYRTOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-su^{5}rt(ku^{6}rt)-o'si^{2}s. Gen., *-os'eos (-is).* From ὑπέρ, to excess, and κύρτωσις, curvature. Ger., *übermässige Krümmung.* Excessive curvature. [L, 50 (α, 14).]

HYPERCYRTOTIC, adj. Hip-u^{6}r-su^{5}rt-ot'i^{2}k. Lat., *hypercyrtoticus.* Pertaining to or affected with hypercyrtosis. [L, 50 (α, 14).]

HYPERCYSTURONERVIE [Piorry] (Fr.), n. E-pe^{2}r-ses-tu^6-ro-ne^{2}r-ve. From ὑπέρ, to excess, κύστις, the bladder, οὖρον, urine, and νεῦρον, a nerve. Increased innervation of the bladder. [A, 250 (α, 21).]

HYPERCYSTUROTROPHIE [Piorry] (Fr.), n. E-per-ses-tu^6-ro-tro-pe. From ὑπέρ, to excess, κύστις, the bladder, οὖρον, urine, and τροφή, nourishment. Hypertrophy of the bladder. [L, 82.]

HYPERDACRYOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-da^{2}k-(da^{3}k)-ri^2(ru^6)-o'si^{2}s. Gen., *-os'eos (-is).* From ὑπέρ, exceeding, and δάκρυ, a tear. An abnormally great secretion of tears. [α, 29.]

HYPERDACTYLIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-da^{2}k(da^{3}k)-ti^{2}l(tu^{6}l)'i^2-a^3. From ὑπέρ, to excess, and δάκτυλος, a digit. Fr., *hyperdactylie.* Ger., *Hyperdactylie.* See Polydactylism.—**False h.** Ger., *falsche Hyperdactylie.* The condition of having an hereditary supernumerary finger formed by the division of one of the digits into two. [Albrecht, "Ctrlbl. f. Chir.," June 12, 1886 (α, 40).]

HYPERDERMATOMA (Lat.), n. n. Hip(hu^{6}p)-u^{6}r(e^{2}r)-du^{6}rm-(de^{2}rm)-a^{2}t(a^{3}t)-o'ma^3. Gen., *-om'atos (-atis).* From ὑπέρ, to excess, and δέρμα, the skin. Ger., *übernährte Hautstelle.* A growth consisting of hypertrophied skin. [L, 50 (α, 14).]

HYPERDERMATOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-du^{5}rm-(de^{2}rm)-a^{2}t(a^{3}t)-o'si^{2}s. Gen., *-os'eos (-is).* Ger., *Hautwucherung.* Hypertrophy of the skin. [L, 50 (α, 14).]

HYPERDERMOMA (Lat.), n. n. Hip(hu^{6}p)-u^{5}r(e^{2}r)-du^{6}rm-(de^{2}rm)-o'ma^3. Gen., *-om'atos (-atis).* See Hyperdermatoma.

HYPERDERMOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-du^{6}rm-(de^{2}rm)-o'si^{2}s. Gen., *-os'eos (-is).* See Hyperdermatosis.

HYPERDESMOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-de^{2}z(de^{2}s)-mo'si^{2}s. From ὑπέρ, to excess, and δεσμός, a bond. Ger., *Hyperdesmose.* Gen., *-os'eos (-os'is).* Hypertrophy of connective tissue. The *Hyperdesmoses* (Ger., *Hyperdesmosen*) in Auspitz's classification of skin diseases are a subdivision of the *Chorioblastoses.* [G, 4.]

HYPERDIACRISIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-di(di^2)-a^{2}k(a^{3}k)'ri^{2}s-i^{2}s. Gen., *-cris'eos (-ac'ris).* From ὑπέρ, to excess, and διάκρισις, a separating. Fr., *hyperdiacrisie.* Ger., *Hyperdiacrisie.* See Hypercrisis (2d def.).

HYPERDICROTIC, adj. Hip-u^{6}r-di-kro^{2}t'i^{2}k. Fr., *hyperdicrote.* Ger., *hyperdikrotisch.* See Hyperdicrotous.

HYPERDICROTISM, n. Hip-u^{5}r-di^{2}k'ro^{2}t-i^{2}z'm. A condition characterized by a hyperdicrotous pulse, usually associated with high fever and great exhaustion. [D, 68.]

HYPERDICROTOUS, adj. Hip-u^{5}r-di^{2}k'ro^{2}t-u^{3}s. From ὑπέρ, to excess, and δίκροτος, double-beating. Fr., *hyperdicrote.* Ger., *hyperdikrotisch.* Of the pulse, affected with retarded dicrotism ; of a pulse-tracing, having the descending dicrotic wave deferred until the beginning of the next ascending curve. [K.]

HYPERDISTENTION, n. Hip-u^{6}r-di^{2}s-te^{2}n'shu^{3}n. From ὑπέρ, to excess, and *distendere*, to distend. See Superdistention.

HYPERDIURESIS, n. Hip(hu^{6}p)-u^{5}r(e^{2}r)-di(di^2)-u^2(u)-re(ra)'-si^{2}s. From ὑπέρ, to excess, and διουρεῖν, to pass urine. See Polyuria.

HYPERDYNAMIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-di^{2}n(du^{6}n)-a(a^3)'mi^2-a^3. From ὑπέρ, to excess, and δύναμις, power. Fr., *hyperdynamie.* Ger., *Ueberkraft.* Excess of muscular power ; excessive muscular action. [L, 41, 50 (α, 14).]—**H. uteri.** Excessive labor pains. [A, 326 (α, 21).]

HYPERDYNAMIC, adj. Hip-u^{6}r-di^{2}n-a^{2}m'i^{2}k. Lat., *hyperdynamicus.* Pertaining to or affected with hyperdynamia. [L, 50, 107.]

HYPERDYNATOCRASIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-di^{2}n(du^{6}n)-a^{2}t(a^{3}t)-o(o^3)-kra(kra^3)'zi^2(si^2)-a^3. From ὑπέρ, to excess, δυνατός, strong, and κρᾶσις, a mixing. Ger., *Mischungsüberkraft.* An overtension of organic fibres, the *strictum* of ancient writers. [L, 50 (α, 14).]

HYPERECCRISIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}k'kri^{2}s-i^{2}s. Gen., *-cris'eos (-ec'crisis).* From ὑπέρ, to excess, and ἔκκρισις, a secretion. Ger., *Hyperekkrisie.* Excessive secretion or evacuation. [A, 311 (α, 17).]

HYPERECCRITIC, adj. Hip-u^{6}r-e^{2}k-kri^{2}t'i^{2}k. Lat., *hypereccriticus.* Pertaining to or affected with hypereccrisis. [A, 322.]

HYPERECHEMA (Lat.), **HYPERECHESIS** (Lat.), n's n. and f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-e^{2}k(ach^2)-e(a)'ma^3, -si^{2}s. Gen., *-em'atos (-atis), -es'eos (-is).* From ὑπέρ, to excess, and ἤχημα, or ἤχησις, a sounding. An abnormally loud sound. [L, 50 (α, 14).]

HYPERECHETIC, adj. Hip-u^{6}r-e-ke^{2}t'i^{2}k. Lat., *hyperecheticus.* Of or pertaining to a hyperechema. [L, 50 (α, 14).]

HYPERECRISIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}k'ri^{2}s-ez-(as). Gen., *-cris'eos (-ec'risis).* See Hypereccrisis.

HYPERECRITIC, adj. Hip-u^{5}r-e^2-kri^{2}t'i^{2}k. See Hypereccritic.

HYPEREKKRISIE (Ger.), n. Hu^5-pe^{2}r-e^{2}k-kre-ze'. See Hypereccrisis.

HYPERELASTIC, adj. Hip-u^{6}r-e^{2}l-a^{2}st'i^{2}k. Lat., *hyperelasticus* (from ὑπέρ, to excess, and ἐλαστός, elastic). Fr., *hyperélastique.* Excessively elastic. [L, 50 (α, 14).]

HYPERELASTICITY, n. Hip-u^{6}r-e^{2}l-a^{2}st-i^{2}s'i^{2}t-i^2. Lat., *hyperelasticitas.* Fr., *hyperélasticité.* Excessive elasticity. [L, 50 (α, 14).]

HYPEREMESIA (Lat.), **HYPEREMESIS** (Lat.), n's f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}m'e(e^2)'si^2-a^3, -e^{2}m'e^2-si^{2}s. Gen., *-es'iæ, -emes'eos (-em'esis).* From ὑπέρ, to excess, and ἔμεσις, vomiting. Fr., *hyperémésie, hyperémèsis.* Ger., *Hyperemese, übermässiges Erbrechen.* It., *iperemesia.* Sp., *hiperemesia.* Excessive or incessant vomiting. [L, 41, 44, 50, 95, 107 (α, 14).]—**H. gravidarum.** Fr., *hyperémèsis* (ou *vomissement incoercible*) *des femmes enceintes.* H. due to pregnancy.

HYPEREMETIC, adj. Hip-u^{6}r-e^{2}m-e^{2}t'i^{2}k. Lat., *hyperemeticus.* Fr., *hyperémétique.* Pertaining to or causing hyperemesis. [L, 41, 50 (α, 14).]

HYPEREMIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-em(e^{2}m)'i^2-a^3. 1. See Hyperemesis. 2. An incorrect form of *hyperæmia.*

HYPERÉMIE (Fr.), n. E-per-a-me. See Hyperæmia.

HYPERENCEPHALIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-e^{2}n-(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)'i^2-a^3. From ὑπέρ, to excess, and ἐγκέφαλος, the brain. Fr., *hyperencéphalie.* 1. A form of monstrosity in which a portion of the brain lies outside the skull, owing to absence of the vault of the cranium. 2. The development of a hyperencephalic monster. [L, 41 (α, 14) ; α, 34.] 3. See Hyperencephalus (n.)

HYPERENCEPHALIC, adj. Hip-u^{5}r-e^{2}n-se^{2}f-a^{2}l'i^{2}k. Lat., *hyperencephalus.* Affected with hyperencephalia. [α, 17.]

HYPERENCEPHALOPATHIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r-(e^{2}r)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^3)-pa^{2}th(pa^{3}th)-i(e)'a^3. From ὑπέρ, to excess, ἐγκέφαλος, the brain, and πάθος, disease. See Encephalyperpathia.

HYPERENCEPHALUS (Lat.), adj. and n. Hip(hu^{6}p)-u^{5}r-(e^{2}r)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). Fr., *hyperencéphalie* (2d def.). 1. (Adj.) see Hyperencephalic. 2. (N.) hypertrophy of the brain. [Farr (α, 18).]

HYPERENERGETIC, adj. Hip-u^{5}r-e^{2}n-u^{5}r-je^{2}t'i^{2}k. Lat., *hyperenergeticus.* Having or pertaining to hyperenergy. [L, 50 (α, 14).]

HYPERENERGY, n. Hip-u^{5}r-e^{2}n'u^{5}r-ji^2. Lat., *hyperenergia* (from ὑπέρ, to excess, and ἐνέργεια, action). Ger., *Ueberkraft, übermässige Energie.* Extraordinary energy or action. [L, 50, 107 (α, 14).]

HYPERENTÉRITE (Fr.), n. E-pe2r-a3n2-ta-ret. From ὑπέρ, to excess, and ἔντερον, an intestine (see also *-itis**). Acute enteritis. [L, 41 (*a*, 14).]

HYPERENTEROMA (Lat.), n. n. Hip(hu6p)-u6r(e2r)-e2n-te2r-o'ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, to excess, and ἔντερον, an intestine. Ger., *Eingeweidegewächs*. A growth or tumor of the intestines. [L, 50 (*a*, 14).]

HYPERENTEROPATHY, n. Hip-u6r-e2n-te2r-o2p'a2th-i2. Fr., *hyperentéropathie* [Piorry]. See ENTERYPERPATHIA.

HYPERENTEROSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2n-te2r-o'si2s. Gen., *-os'eos* (*-is*). Ger., *Eingeweidewucherung*. 1. The development of a hyperenteroma. 2. Intestinal hypertrophy. [L, 50 (*a*, 14).]

HYPEREPHIDROSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2f-i2d-ro'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and ἱδρώς, sweat. Continued and abnormal sweating. [L, 50, 107 (*a*, 14).] Cf. HYPERIDROSIS.

HYPEREPIDOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)e2p-i2d'o(o3)-si2s. Gen., *-os'eos* (*-id'osis*). From ὑπέρ, to excess, and ἐπίδοσις, growth. Fr., *hyperépidose*. An abnormal (excessive) growth or tension of any part of the body. [L, 41, 50 (*a*, 14).]

HYPEREPITHYMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2p-i2-thim(thu6m)'i2-a3. From ὑπέρ, to excess, and ἐπιθυμία, desire. Fr., *hyperépithymie*. Ger., *übermässige Begierde, übermässiges Verlangen*. Inordinate desire. [L, 50 (*a*, 14).]

HYPERERETHISIA (Lat.), **HYPERERETHISMUS** (Lat.), n's f. and m. Hip(hu6p)-u6r(e2r)-e2r-e2-thi2s'i2-a3, -thi2z(thi2s)'mu3s-(mu4s). From ὑπέρ, to excess, and ἐρεθίζειν, to excite. Extreme irritability. [L, 50 (*a*, 14).]

HYPERERETHISTIC, adj. Hip-u6r-e2r-e-thi2st'i2k. Lat., *hypererethisticus*. Pertaining to or affected with hypererethisia. [L, 50 (*a*, 14).]

HYPERERYTHRÆMOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2r-i2(u6)-thre(thra3-e2)-mo'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, ἐρυθρός, red, and αἷμα, blood. An excess of arterial blood. [L, 50 (*a*, 14).]

HYPERESOPHORIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2s-o-for(fo2r)'i2-a3. From ὑπέρ, over, ἔσω, into, and φορός, bearing. A tending of the right or left visual line in a direction upward and inward, but not sufficiently to produce strabismus. [G. T. Stevens, "Arch. of Ophthal.," 1887, p. 158 (*a*, 29).]

HYPERESTHÉSIE (Fr.), n. E-pe2r-e2s-ta-ze. See HYPERÆSTHESIA.—**H. acoustique.** See HYPERÆSTHESIA *acustica*.—**H. de la peau.** See *Cutaneous* HYPERÆSTHESIA.—**H. douloureuse.** An hysterical affection consisting in such exaggerated sensitiveness of the skin that the mere touch of a pointed instrument gives violent pain. [L, 88 (*a*, 40).]—**H. hypnotique.** An extreme sensitiveness of the muscular sense by which somnambulists are guided in their walks. [L, 40.]

HYPERETHISMUS (Lat.), n. m. Hip(hu6p) e2r-e2-thi2z(thi2s)'-mu3s(mu4s). From ὑπό, below measure, and ἐρεθισμός, irritation. Mild erethism. [A, 322.]

HYPEREXCITABILITY, n. Hip-u6r-e2x-sit-a-bi2l'i2-ti2. From ὑπέρ, to excess, and *excitare*, to rouse. Fr., *hyperexcitabilité*. See OVER-EXCITABILITY.

HYPEREXOPHORIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-e2x-o(o3)-fo(fo2)'ri2-a3. From ὑπέρ, over, ἔξω, outward, and φορός, bearing. A tending of the right or left visual line in a direction upward and outward, but not to the extent of strabismus. [G. T. Stevens, "Arch. of Ophthal.," 1887, p. 158 (*a*, 29).]

HYPEREXTENSION, n. Hip-u6r-e2x-te2n'shu3n. See SUPEREXTENSION.

HYPERFECUNDATION, n. Hip-u6r-fe-ku3nd-a'shu3n. See SUPERFECUNDATION.

HYPERFIBRINATION, n. Hip-u6r-fi-bri2n-a'shu3n. From ὑπέρ, to excess, and *fibrinum*, fibrin. See HYPERINOSIS.

HYPERFLEXION, n. Hip-u6r-fle2x'yu3n. From ὑπέρ, to excess, and *flectere*, to bend. See SUPERFLEXION.

HYPERGANGLIONITROPHIA (Lat.), n. f. Hip(hu6p)-u6r-(e2r)-ga2n2(ga3n2)-gli3-o2n-i2-tro(tro2)'fi2-a3. From ὑπέρ, to excess, γάγγλιον, a lymphatic gland, and τροφή, nourishment. Fr., *hyperganglionitrophie* [Piorry]. See LYMPHADENYPERTROPHIA.

HYPERGASTRITIS (Lat.), n. f. Hip(hu6p)-ur(e2r)-ga2s(ga3s)-tri(tre)'ti2s. Gen., *-it'idos* (*-idis*). From ὑπέρ, to excess, and γαστήρ, the stomach (see also *-itis**). Fr., *gastrite très aiguë* [Piorry]. Very acute gastritis. [L, 50 (*a*, 14).]

HYPERGASTROPATHIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-ga2st(ga3st)-ro(ro3)-pa2th(pa3th)-i(e)'a3. See GASTRYPERPATHIA.

HYPERGENESIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-je2n(ge2n)'-e2-si2s. Gen., *-es'eos* (*-gen'esis*). From ὑπέρ, to excess, and γένεσις, generation. Fr., *hypergénèse*. Excessive development of parts or tissues. [L, 50, 107 (*a*, 14).]

HYPERGENETIC, adj. Hip-u6r-je2n-e2t'i2k. Lat., *hypergeneticus*. Pertaining to hypergenesis. [L, 50, 107.]

HYPERGÉNIE (Fr.), n. E-pe2r-zha-ne. Malformation by excess of development. [Serres (A, 385).]

HYPERGEUSIA (Lat.), **HYPERGEUSIS** (Lat.), **HYPERGEUSTIA** (Lat.), n's f. Hip(hu6p)-u6r(e2r)-ju2(gu2)'zi2(si2)-a3, -si2s, -ju2st(gu2st)'i2-a3. Gen., *-geus'iæ*, *-geus'eos* (*-is*), *-geust'iæ*. From ὑπέρ, to excess, and γεῦσις, the sense of taste. Fr., *hypergeustie*. Ger., *Hypergeusie*. Excessive delicacy or acuteness of the sense of taste; an occasional symptom of hysteria. [A, 326 (*a*, 21); L, 41, 50 (*a*, 14).]

HYPERGLOBULIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-glo2b-u2l-(u4l)'i2-a3. From ὑπέρ, to excess, and *globulus*, a globule. Ger., *Hyperglobulie*. See PLETHORA *polycythæmica*.

HYPERGLUCOGÉNIE (Fr.), n. E-pe2r-glu6-ko-zha-ne. From ὑπέρ, to excess, γλυκύς, sweet, and γεννᾶν, to engender. Of G. Sée, an exaggerated production of glycogen. ["Sem. méd.," May 22, 1889, p. 173 (*a*, 18).]

HYPERHÆMATOSIA (Lat.), **HYPERHÆMATOSIS** (Lat.), n's f. Hip(hu6p)-u6r(e2r)-he2m(ha3-e2m)-a2t(a3t)-o-zi2(si2)-a3, -si2s. Gen., *-o'siæ*, *-os'eos* (*-is*). See HYPERÆMATOSIS.

HYPERHÆMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-hem'(ha3'e2m)-i2-a3. See HYPERÆMIA.

HYPERHEDONIE (Ger.), n. Hu6-pe2r-ha-do-ne'. From ὑπέρ, over, and ἡδονή, pleasure. Excessive satisfaction or delight occasioned by the gratification of an appetite or desire. [L, 40.]

HYPERHEMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-hem(ham)'i2-a3. See HYPERÆMIA.

HYPERHÉMIE (Fr.), n. E-pe2r-a-me. See HYPERÆMIA.

HYPERHÉMIÉ (Fr.), adj. E-pe2r-a-me-a. See HYPERÆMIC.

HYPERHEXAPODOUS, adj. Hip-u6r-he2x-a2p'o2d-u3s. From ὑπέρ, over, ἕξ, six, and πούς, the foot. Of Latreille, having more than six feet. [L.]

HYPERHIDROSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-hi2d-ro'si2s. Gen., *-os'eos* (*-is*). See HYPERIDROSIS.

HYPERHYDRÆMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-hi2d-(hu6d)-rem'(ra3'e2m)-i2-a3. From ὑπέρ, to excess, ὕδωρ, water, and αἷμα, blood. Excess of serum in the blood. [L, 40.]

HYPERHYPNOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-hi2p(hu6p)-no'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, over, and ὕπνος, sleep. A condition of excessively prolonged sleep. [L, 40.]

HYPERICOIDES (Lat.), adj. Hip(hu6p)-u6r(e2r)-i2(e)-ko(ko2)-id(ed)'ez(as). From ὑπέρικον, St. John's wort, and εἶδος, resemblance. Resembling the genus *Hypericum*; as a n., of Plumier and Adanson, see ASCYRUM. [B, 170 (*a*, 24).]

HYPERICON (Lat.), **HYPERICUM** (Lat.), n's n. Hip(hu6p)-e2r'i2k-o2n, -u3m(u4m). -pu6r(pe2r)-i(e)'ko2n, -u3m(u4m). Gr., ὑπέρικον, ὑπέρεικον (from ὑπό, beneath, and ἐρείκη, heath). Fr., *hypericum, millepertuis*. Ger., *Hartheu, Johanniskraut*. Sp., *hipericón* [Mex. Ph.]. 1. Of the ancient Greek writers, the *H. crispum*. 2. St. John's wort; the typical genus of the *Hypericaceæ* or hypericaceous plants (Fr., *hypericacées*; Ger., *Hypericaceen*), which are an order of polypetalous herbs or shrubs, comprising the *Hypericeæ*, *Cratoxyleæ*, and *Vismieæ*. The *Hypericarieæ* of Dumortier are an order of the *Toropetales*, including the *Hypericaceæ*, *Camellieæ*, *Guttifereæ*, *Pirolaceæ*, *Chlenaceæ*, and *Marcgravieæ*. The *Hypericeæ* (Fr., *hypericées*; Ger., *Hypericeen*) are a tribe of the *Hypericineæ* (an order of the *Columnifloræ*), comprising *Ascyrum* and *Hypericum*. 3. Of the Sp. Ph., the *H. perforatum*. [B, 34, 42, 121, 180 (*a*, 24).]—**Balsamum hyperici simplex.** See BALSAMUM *Apparitii*.—**Flores hyperici.** The flowers of *H. perforatum*. [B, 121 (*a*, 24).]—**Herba cum floribus hyperici.** The herb and flowers of *H. perforatum*. [B, 180 (*a*, 24).]—**Herba hyperici** [Belg. Ph., 1st ed.]. The herb of *H. perforatum*. [B, 95.]—**H. anagalloides.** A medicinal species found in California. ["Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]—**H. androsæmum.** Fr., *millepertuis androsème, herbe des grands bois, par cœur, toute saine*. Ger., *gebräuchliches Blutheil, Mannsblut, Conradskraut*. Park-leaves, sweet amber, tutsan; a species found in southern Europe and England, where the leaves were formerly used as a styptic and in infusion, as a purgative and vermifuge. [B, 19, 173, 180, 275 (*a*, 24).]—**H. ascyron.** See ASCYRON.—**H. bacciferum.** 1. Of Linnæus, the *Vismia guianensis*. 2. Of Lamarck, the *H. androsæmum*. [B, 173, 180 (*a*, 24).]—**H. Buckleyi.** A species found in the mountains of North America, resembling the *Ascyrum crux Andreæ*. [B, 34 (*a*, 24).]—**H. canadense.** A species found in Illinois having pectoral, styptic, and vulnerary properties, and used also in diarrhœa, dysentery, mania, hypochondriasis, and croup. ["Proc. of the Am. Pharm. Assoc." (*a*, 14).]—**H. cayennense.** The *Vismia cayennensis*. [*a*, 24.]—**H. ciliatum.** Hair-fringed St. John's wort, the ἀνδρόσαιμον of Dioscorides; found in southern Europe. The herb was anciently used in burns and wounds, and the seed as a cholagogue. [B, 180, 275 (*a*, 24).]—**H. commutatum.** The *H. perforatum*, var. *latifolium*. [B, 64 (*a*, 24).]—**H. connatum.** Fr., *millepertuis à feuilles connées*. A species found in Brazil, used in decoction in sore throat. [B, 173, 180 (*a*, 24).]—**H. coris.** Fr., *millepertuis verticillé*. Heath-leaved St. John's wort, the κόρις of Dioscorides; found in southern Europe and the East. The seeds were used as a diuretic and emmenagogue. [B, 173, 180 (*a*, 24).]—**H. corymbosum.** Spotted St. John's wort, flux-weed; a species growing in the Indian Territory, where it is used by the Cherokees in diarrhœa and dysentery. ["Proc. of the Am. Pharm. Assoc.," viii (*a*, 14).]—**H. crispum.** A species found in southern Europe, especially in Greece, the ὑπέρικον of Hippocrates and Dioscorides, still used in dysmenorrhœa, leucorrhœa, and pulmonary complaints. [B, 180 (*a*, 24).]—**H. delphinense.** Fr., *millepertuis douteux*. St. Peter's wort, imperforate St. John's wort; a species found in Europe, used in Russia in hydrophobia, and elsewhere like *H. perforatum*. [A, 511; B, 173, 180 (*a*, 24).]—**H. Drummondii.** A species found in the southern United States. [B, 34 (*a*, 24).]—**H. dubium.** See *H. delphinense*.—**H. graveolens.** A species found in the mountains of North Carolina having a strong odor. [B, 34 (*a*, 24).]—**H. guianense.** The *Vismia guianensis*. [B, 173 (*a*, 24).]—**H. hircinum.** Goat-scented St. John's wort, the τράγιον of Dioscorides; a species found in middle and southern Europe; used in dysmenorrhœa, strangury, etc. [B, 180 (*a*, 24).]—**H. humifusum.** A species used in Germany as a vulnerary. [B, 64, 180 (*a*, 24).]—**H. lanceolatum.** Fr., *millepertuis lancéolé, ambaville, bois de fleurs jaunes*. A species found in the Mascarene Islands and the Isle of Bourbon. At the latter

place its gum resin (Fr., *baume de fleurs* [*jaunes*]) is used in syphilis and as a depurative of the milk in nursing-women. [B, 121, 173, 180 (*a*, 24).]—**H. laricifolium.** Fr., *millepertuis à feuilles de pin.* A species used in Quito to dye yellow. [B, 173 (*a*, 24).]—**H. lasianthus.** See GORDONIA *lasianthus.*—**H. latifolium.** Fr., *millepertuis à larges feuilles.* 1. A variety of *H. perforatum.* 2. Of Aublet, the *Vismia latifolia.* [B, 14, 173, 180 (*a*, 24).]—**H. laxiusculum.** Fr., *millepertuis à feuilles écartées.* A species found in Brazil, where it is used in snake-bites. [B, 173, 180 (*a*, 24).]—**H. maculatum.** See *H. delphinense.*—**H. majus.** See ARNICA *montana.*—**H. medium.** The *H. perforatum*, var. *latifolium.* [B, 64 (*a*, 24).]—**H. montanum.** A species found in the mountains of Europe having properties like those of *H. perforatum.* The flowers were once considered vermifuge. [B, 180 (*a*, 24).]—**H. multicaule.** See *H. coris.*—**H. officinale, H. officinarum.** See *H. perforatum.*—**H. oil.** See *Oleum hyperici.*—**H. origanifolium.** A species found in southern Europe, doubtfully identified with the πάνακες χειρώνιον of Dioscorides. [B, 180 (*a*, 24).]—**H. perfoliatum.** 1. A species growing in North Carolina and Kansas; used like *H. perforatum.* ["Proc. of the Am. Pharm. Assoc.," xxiii, xxix (*a*, 14).] 2. Of Linnæus, see *H. ciliatum.*—**H. perforatum.** Fr., *millepertuis* [Fr. Cod.] *officinale, herbe Saint-Jean* (ou *aux piqûres*, ou *à mille pertuis* [ou *trous*]), *chasse-diable, trucherau jaune.* Ger., *gemeines Hartheu, Johanniskraut, Johannisblut, Hexenkraut, Konradskraut.* Sp., *hipericón* [Sp. Ph.], *corazoncillo* [Sp. Ph.]. St. John's wort; a species found in Europe, Africa, and the United States. The leaves, which are covered with pellucid dots like perforations (whence its specific name), are balsamic in odor and bitter and astringent in taste. The whole plant, including the seed, yields a resin and an oil resembling turpentine, and was formerly used as a vulnerary, diuretic, astringent, and vermifuge, and in pectoral complaints and mania. It is now confined to domestic use. [B, 5, 173, 180 (*a*, 24).]—**H. penticasia.** See *H. lanceolatum.*—**H. quadrangulare.** 1. Of Linnæus, see *H. delphinense.* 2. Of Smith, see *H. tetrapterum.*—**H. quadrangulum.** See *H. delphinense.*—**H. quadrialatum.** See *H. tetrapterum.*—**H. sarothra.** Bastard-gentian, orange-grass, pine-weed; a species found in North America, used as a vulnerary. [B, 34, 42, 180, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]—**H. saxatile.** Probably the *H. coris.* [*a*, 24.]—**H. scabrum.** A variety of *H. montanum.* [B, 64 (*a*, 24).]—**H. Scouleri.** A medicinal species found in California. ["Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]—**H. sessilifolium.** The *Vismia sessilifolia.* [B, 173 (*a*, 24).]—**H. tetrapterum.** A species found in Europe having milder properties than those of *H. perforatum.* [B, 180 (*a*, 24).]—**H. virginicum.** A species growing in ditches and swamps in the United States and Canada. The whole plant is of a purplish hue. A tincture made from the flowers is used as an expectorant and stomachic. [B, 34, 180 (*a*, 24).]—**H. vulgare.** See *H. perforatum.*—**Oil of h., Semen et summitates hyperici.** The seed and flowering tops of *H. perforatum.* [B, 180 (*a*, 24).]

HYPERIDROSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-i^{2}d-ro′si^{2}s. Gen., *-os′eos* (*-is*). From ὑπέρ, to excess, and ἱδρώς, sweat. Fr., *éphidrose spontanée, sudation morbifique.* Ger., *Hyperidrose, Schweissfluss.* It., *iperidrosi.* Sp., *hiperidrosis.* Syn.: *sudatio morbosa, ephidrosis profusa* (seu *spontanea*, seu *idiopathica*). 1. Excessive sweating. 2. A cutaneous disease characterized by excessive sweating under conditions in which it is normally absent or very slight. 3. In the pl., *Hyperidroses* (Ger., *Hyperidrosen*), a family of the *Idroses* in Auspitz's classification of skin diseases, consisting of the disease *H. idiopathica.* [G, 4.]—**Blepharo-h.** See the major list.—**Colliquative h.** Lat., *h. colliquativa.* Exhausting h. associated with fatty degeneration of the epithelia of the sweat glands. [A, 326 (*a*, 21).]—**H. idiopathica.** Idiopathic h. See *H.* (2d def.).—**H. localis.** Syn.: *ephidrosis partialis.* H. affecting a limited portion of the skin. [G.]—**H. oleosa capitis.** Probably seborrhœa oleosa. ["Mntsch. f. prakt. Dermat.," 1888, p. 148 (G).]—**H. unilateralis.** Ger., *halbseitiges Schwitzen.* H. affecting the skin of one lateral half of the body. [A, 326 (*a*, 21).]—**Idiopathic h.** See *H.* (2d def.).—**Local h.** See *H. localis.*—**Unilateral h.** See *H. unilateralis.*—**Universal h.** Lat., *h. universalis.* Ger., *Schweissucht.* H. affecting the entire skin. [G.]

HYPERINESIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-i^{2}n-e(a)′si^{2}s. Gen., *-es′eos* (*-es′is*). Gr., ὑπερίνησις (from ὑπερινᾶν, to purge violently). Of Hippocrates, hypercatharsis. [A, 311 (*a*, 17).]

HYPERINOS (Lat.), adj. Hi(hu^5)-pe^{2}r′i^{2}n-o^{2}s. Gr., ὑπέρινος (from ὑπερινᾶν, to purge violently). Violently purged. [Hippocrates (A, 311 [*a*, 17]).]

HYPERINOSÆMIA (Lat.), n. f. Hip(hu^{5}p)-u^{5}r(e^{2}r)-i^{2}n-o^{2}s-em′(a^3′e^{2}m)-i^2-a^3. From ὑπέρ, to excess, ἲς, a muscle or fibre, and αἷμα, blood. See HYPERINOSIS (2d def.).

HYPERINOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-i^{2}n-o′si^{2}s. Gen., *-os′eos* (*-os′is*). From ὑπέρ, to excess, and ἲς, a muscle or fibre. Fr., *hypérinose.* Ger., *H., Hyperinose.* 1. Excessive muscular development or activity. [A, 322.] 2. An abnormal abundance of fibrin in the blood. [D, 3.]

HYPERINOTIC, adj. Hip-e^{2}r-i^{2}n-o^{2}t′i^{2}k. Lat., *hyperinoticus.* Fr., *hypérinotique.* Ger., *hyperinotisch.* Of or pertaining to hyperinosis. [K.]

HYPERINUS (Lat.), adj. Hip(hu^{6}p)-e^{2}r′i^{2}n-u^{2}s(u^{4}s). See HYPERINOS.

HYPERINVOLUTION, n. Hip-u^{6}r-i^{2}n-vo-lu^2′shu^{3}n. From ὑπέρ, to excess, and *involvere*, to roll in. An improper term for atrophy of the uterus (which is not excessive involution) after delivery.

HYPERIODATE, n. Hip-u^{5}r-i′od-at. See PERIODATE.

HYPERIODIC ACID, n. Hip-u^{5}r-i-o^{2}d′i^{2}k. See PERIODIC ACID.

HYPERIODIDE, n. Hip-u^{5}r-i′od-i^{2}d(id). See PERIODIDE.

HYPERKÉRATINISATION (Fr.), n. E-pe^{2}r-ka-ra^3-te-ne-sa^3-se-o^{2}n^2. From ὑπέρ, to excess, and κέρας, a horn. An excessive keratinization, producing thickening and hardening of the epithelial structures (*e. g.*, the nails, hair, etc.). [*a*, 18.]

HYPERKERATOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-ke^{2}r-a^{2}t-(a^{3}t)-o′si^{2}s. Gen., *-os′eos* (*-is*). From ὑπέρ, to excess, and κέρας, a horn. Fr., *hyperkératose.* Ger., *Hyperkeratose* (2d def.). 1. Of Himly and others, see KERATOCONUS and KERATOGLOBUS. 2. Hypertrophy of the corneous layer of the epidermis. The *Hyperkeratoses* (Ger., *Hyperkeratosen*) in Auspitz's classification of skin diseases are a family of the *Keratoses.* [G, 4; "N. Y. Med. Jour.," July 23, 1887, p. 112.]

HYPERKINESIA (Lat.), **HYPERKINESIS** (Lat.), n's f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ki^{2}n-e(a)′zi^2(si^2)-a^3, -si^{2}s. See HYFERCINESIA.

HYPERKINETIC, adj. Hip-u^{5}r-ki^{2}n-e^{2}t′i^{2}k. See HYPERCINETIC.

HYPERLACTATION, n. Hip-u^{5}r-la^{2}k-ta′shu^{3}n. From ὑπέρ, to excess, and *lactare*, to give suck. See SUPERLACTATION.

HYPERLEUCOMATIE (Fr.), n. f. E-pe^{2}r-lu^6-ko-ma^3-te. From ὑπέρ, to excess, and λευκός, white. Of A. Guber, an excess of albumin in the blood-serum. [B, 46.]—**H. sanguine.** See *H.*

HYPERLOGIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-loj(lo^{2}g)′i^2-a^3. From ὑπέρ, to excess, and λόγος, speech. Morbid loquacity. [L, 30 (*a*, 14).]

HYPERLYMPHATIC, adj. Hip-u^{5}r-li^{2}m-fa^{2}t′i^{2}k. From ὑπέρ, to excess, and *lymphaticus*, distracted. Fr., *hyperlymphatique.* Excessively lymphatic. [L, 41 (*a*, 14).]

HYPERLYMPHATISME (Fr.), n. E-pe^{2}r-la^{2}n^2-fa^3-tez-m′. An extremely lymphatic temperament. [L, 41 (*a*, 14).]

HYPERLYMPHIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-li^{2}m(lu^{6}m)′-fi^2-a^3. From ὑπέρ, to excess, and *lympha*, lymph. Fr., *hyperlymphie.* An increase in the normal amount of lymph. [K.]

HYPERMANGANAS (Lat.), n. m. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ma^{2}n^2-(ma^{3}n^2)′ga^{2}n(ga^{3}n)-a^{2}s(a^{3}s). Gen., *-at′is.* A permanganate. [B.]—**H. kalicus** [Dan. Ph., Finn. Ph. (1885), Norw. Ph., Swed. Ph.], **H. potassicus.** Potassium permanganate. [B, 95.]

HYPERMANGANATE, n. Hip-u^{6}r-ma^{2}n^2′ga^{2}n-at. See PERMANGANATE.

HYPERMANGANIC, adj. Hip-u^{5}r-ma^{2}n^2-ga^{2}n′i^{2}k. Lat., *hypermanganicus.* See PERMANGANIC.

HYPERMASTIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-ma^{2}st(ma^{3}st)′-i^2-a^3. From ὑπέρ, to excess, and μαστός, the breast. Fr., *hypermastie.* General hypertrophy of the mammary gland. [A, 385.]

HYPERMEGALIA (Lat.), n. f. Hip(hu^{6}p)-u^{5}r(e^{2}r)-meg(me^{2}g)-al(a^{3}l)′i^2-a^3. From ὑπέρ, to excess, and μέγας, large. Fr., *hypermégalie.* 1. Excessive development or increase in the size of a part. 2. Of Orsini, pseudo-hypertrophic muscular paralysis. [D; L, 44 (*a*, 14).]

HYPERMEGETHUS (Lat.), n. m. Hip(hu^{6}p)-u^{5}r(e^{2}r)-me^{2}g′-e^{2}th-u^{3}s(u^{4}s). From ὑπέρ, to excess, and μέγεθος, greatness. Excessive development of a part. [L, 50 (*a*, 14).]

HYPERMEGASTHENIC, adj. Hip-u^{6}r-me^{2}g-a^{2}s-the^{2}n′i^{2}k. From ὑπέρ, exceeding, μέγας, large, and σθένος, strength. Of Zoja, unusually strong. [J.]

HYPERMNESIA (Lat.), n. f. Hip(hu^{6}p)-e^{2}r-ne(mna)′zi^2(si^2)-a^3. From ὑπέρ, to excess, and μνήσιος, of memory. Fr., *hypermnésie.* Ger., *Hypermnesie.* Abnormal development of the power of memory. [L, 49 (*a*, 14); *a*, 40.]

HYPERMETAMORPHOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-me^{2}t-a^3-mo^{2}rf-o′si^{2}s. Gen., *-os′eos* (*-is*). From ὑπέρ, to excess, and μεταμόρφωσις, a transformation. Fr., *hypermétamorphose.* It., *ipermetamorfosi.* A metamorphosis (as of an insect) involving a very striking transformation. [L, 44, 49 (*a*, 14); "Am. Nat.," v, p. 49 (*a*, 32).]

HYPERMETROPATHY, n. Hip-u^{6}r-me^{2}t-ro^{2}p′a^{2}th-i^2. Lat., *hypermetropathia* (from ὑπέρ, to excess, μήτρα, the womb, and πάθος, disease). Fr., *hypermétropathie* [Piorry]. See METRYPERPATHIA.

HYPERMETROPE, n. Hi′pu^{6}r-me^{2}t-rop. Fr., *hypermétrope.* A person affected with hypermetropia. [L, 41 (*a*, 14).]

HYPERMETROPIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-me^{2}t-rop-(ro^{2}p)′i^2-a^3. From ὑπέρ, over, μέτρον, a measure, and ὄψ, vision. Fr., *hypermétropie.* Ger., *Hypermetropie.* Far-sightedness; an ocular affection in which the parallel rays from a distant luminous point are focused (*i. e.*, an image is formed) behind the retina. [K.]—**Absolute h.** Fr., *hypermétropie absolue.* Ger., *absolute Hypermetropie.* A variety of h. in which the eye, with its greatest power of accommodation, can not adjust itself for parallel light, but only for rays which converge toward a point behind and more or less distant from it. The whole range of its accommodation lies beyond infinity. [F.]—**Axial h.** Ger., *Axenhypermetropie.* A form of h. due to a shortening of the antero-posterior axis of the eye. Here the second principal focal distance and the radius of the refracting surface are normal, but the distance of the fovea centralis from the second principal point of the eye is too short. This distinguishes it from curvature h. [F.]—**Curvature h.** Fr., *hypermétropie de courbure.* H. due to flattening of the cornea or of the crystalline lens. [F, 24 (*a*, 29).]—**Facultative h.** Fr., *hypermétropie facultative.* Ger., *facultative Hypermetropie.* That form of h. in which the binocular near-point lies at a definite distance. Distinct distant vision with parallel visual axes, and near vision with a proper convergence, are both possible. [F.]—**Latent h.** Fr., *hypermétropie latente.* Ger., *latente* (oder *larvirte*) *Hypermetropie.* A variety or degree of h. which is masked or concealed under ordinary circumstances. It amounts to the interval between the manifest and the absolute far-point of distinct vision. [F.]—**Manifest h.** Fr., *hypermétropie manifeste.* Ger., *offenbare* (oder *mani-*

feste) *Hypermetropie.* The degree of h. which is expressed by the strongest convex lens with which distinct vision is possible, without paralyzing the accommodation. [F.]—**Relative h.** Fr., *hypermétropie relative.* Ger., *relative Hypermetropie.* A condition in which the eye can adjust itself for parallel and even diverging light, but only when the visual axes converge upon a distance which is less than that upon which the accommodation is adjusted. [F.]

HYPERMETROPIC, adj. Hip-u6r-me2t-ro2p'i2k. Lat., *hypermetropicus.* Fr., *hypermétropique.* Ger., *hypermetropisch.* Pertaining to or affected with hypermetropia. [K.]

HYPERMÉTROPIE (Fr.), n. E-pe2r-ma-tro-pe. See HYPERMETROPIA.—**H. de courbure.** See *Curvature* HYPERMETROPIA.

HYPERMETROPIE (Ger.), n. Hu5-pe2r-ma-tro-pe'. See HYPERMETROPIA.—**Larvirte H.** See *Latent* HYPERMETROPIA.—**Offenbare H.** See *Manifest* HYPERMETROPIA.

HYPERMETROTROPHY, n. Hip-u6r-me2t-ro2t'ro-fi2. Lat., *hypermetrotrophia* (from ὑπέρ, to excess, μήτρα, the uterus, and τροφή, nourishment). Fr., *hypermétrotrophie* [Piorry]. See METRYPERTROPHIA.

HYPERMYELOHÆMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-mi-(mu6)-e2l-o(o3)-hem'(ha2'e2m)-i2-a3. From ὑπέρ, to excess, μυελός, marrow, and αἷμα, blood. See MYELYPERÆMIA.

HYPERMYOPIE (Fr.), n. E-pe2r-me-o-pe. From ὑπέρ, over, and μυωπία, a mouse-hole. Excessive myopia. [L, 41 (*a*, 14).]

HYPERMYOSISMIE [Piorry] (Fr.), n. E-pe2r-me-o-zes-me. From ὑπέρ, to excess, μῦς, a muscle, and σεισμός, a shaking. See HYPERCINESIS (1st def.).

HYPERMYOTROPHIE [Piorry] (Fr.), n. E-pe2r-me-o-trofe. From ὑπέρ, to excess, μῦς, a muscle, and τροφή, nourishment. Muscular hypertrophy. [L, 82.]

HYPERNEPHROTROPHY, n. Hip-u6r-ne2f-ro2t'ro-fi2. Lat., *hypernephrotrophia* (from ὑπέρ, to excess, νέφρος, the kidney, and τροφή, nourishment). See NEPHRYPERTROPHIA.

HYPERNERVIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-nu6r(ne2r)'-vi2(wi2)-a3. Fr., *hypernervie* [Piorry]. See HYPERNEURIA.

HYPERNERVIE [Piorry] (Fr.), n. E-pe2r-ne2r-ve. See HYPERNEURIA.—**H. angibromique.** Hyperneuria of the digestive tract. [A, 250 (*a*, 21).]—**H. priapique.** Hyperneuria of the penis. [L, 82.]

HYPERNERVISMIE [Piorry] (Fr.), n. E-pe2r-ne2r-vez-me. See HYPERNEURIA.

HYPERNEURIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-nu2'ri2-a3. From ὑπέρ, to excess, and νεῦρον, a nerve. Fr., *hypernervie, hypernervisme.* Ger., *übermässige Nerventhätigkeit.* Excessive nervous action. [L, 50 (*a*, 14).]

HYPERNEUROMA (Lat.), n. n. Hip(hu5p)-u6r(e2r)-nu2-ro'ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, to excess, and νεῦρον, a nerve. Ger., *Nervenschwamm, Nervenmassengewächs.* An exuberant or fungous growth of nervous tissue. [L, 50 (*a*, 14).]

HYPERNEUROSIS (Lat.), n. f. Hip(hu6p)-u5r(e2r)-nu2-ro'si2s. Gen., *-os'eos* (*-os'is*). Hypertrophy of nervous tissue. [L, 50 (*a*, 14).]

HYPERNÉVRAXOTROPHIE [Piorry] (Fr.), n. E-pe2r-navra3x-o-tro-pe. From ὑπέρ, to excess, νεῦρον, a nerve, *axis*, an axis, and τροφή, nourishment. Hypertrophy of the nervous axes. [L, 82.]

HYPERNÉVRESTHÉSIE [Piorry] (Fr.), n. E-pe2r-na-vre2s-ta-ze. From ὑπέρ, to excess, νεῦρον, a nerve, and αισθησις, perception. See HYPERÆSTHESIA.

HYPERNIDATION, n. Hip-u6r-nid-a'shu3n. From ὑπέρ, to excess, and *nidus*, a nest. More properly, *supernidation* ; of J. H. Aveling, excessive proliferation of the menstrual decidua, with its discharge in gross masses, sometimes causing membranous dysmenorrhœa. [" Obst. Jour. of Gr. Brit. and Ire.," July, 1874, p. 209.]

HYPERNŒA (Lat.), **HYPERNOIA** (Lat.), n's f. Hip(hu6p)-e2r-ne'(no2'e2)-a3, -noi'a3. From ὑπέρ, to excess, and νοεῖν, to perceive. Of Leupoldt, an excessive and abnormal mental activity. [L, 50 (*a*, 14).]

HYPEROA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-o'a2. Gr., ὑπερῷα, ὑπερῴη. The hard palate. [A, 311, 325.]

HYPEROARITROPHIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o-a2r(a3r)-i2-trof(tro2f)'i2-a3. From ὑπέρ, to excess, ὠάριον, an ovule, and τροφή, nutrition. Fr., *hyperoaritrophie* [Piorry]. Enlargement of the ovary. [*a*, 40.]

HYPEROCHA (Lat.), **HYPEROCHE** (Lat.), n's f. Hip(hu5p)-e2r'o2k(o2ch2)-a3, -e(a). Gr., ὑπεροχή (from ὑπερέχειν, to be above). Ger., *Hervorragung.* A projection or prominence, especially that of the cervix uteri. [L, 50 (*a*, 14).]

HYPEROE (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o'e(a). Gen., *-o'es.* See HYPEROA.

HYPEROIC, adj. Hip-u6r-o'i2k. Lat., *hyperoicus* (from ὑπερώα, the palate). Pertaining to the palate. [L, 50 (*a*, 14).]

HYPEROITIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὑπερώα, the palate (see also *-itis**). Fr., *inflammation du palais.* Ger., *Gaumenentzündung, Gaumenbräune.* Inflammation of the palate. [E.]

HYPERONCOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o2n2-ko'si2s. Gen., *-os'eos, -os'is.* From ὑπέρ, to excess, and ὄγκος, a tumor. Excessive swelling.—**H. iridis.** See IRIDONCOSIS.

HYPERONYCHIA (Lat.), **HYPERONYCHOSIS** (Lat.), n's f. Hi2p(hu6p)-e2r-o2n-i2k(u6ch2)'i2-a3, -o2n-i2(u6)-ko(ch2o)'si2s. Gen., *-ych'iæ, -os'eos, -os'is.* From ὑπέρ, to excess, and ὄνυξ, the nail. Hypertrophy of the nails, usually associated with more or less deformity. The *Hyperonychoses* (Ger., *Hyperonchosen*), in Auspitz's classification of skin diseases, are a family of the *Onychoses.* [G, 4.]

HYPEROOCHASMA (Lat.), n. n. Hip(hu5p)-u6r(e2r)-o-o(o3)-ka2z(ch2a3s)'ma3. Gen., *-asm'atos* (*-atis*). From ὑπερώα, the palate, and χάσμα, a yawning. Ger., *Wolfsrachen.* Fissure of the palate. [E.]

HYPEROPHARYNGEAN, adj. Hip-e2r-o-fa2r-i2n'je-a2n. Lat., *hyperopharyngeus* (from ὑπερώα, the palate, and φάρυγξ, the pharynx). Pertaining to the palate and the pharynx. [*a*, 14.]

HYPEROPIA (Lat.), n. f. Hip(hu5p)-u6r(e2r)-op(o2p)'i2-a3. From ὑπέρ, to excess, and ὄψ, vision. Fr., *hypéropie.* 1. Great acuteness of vision. 2. See HYPERMETROPIA.

HYPEROPIC, adj. Hip-u6r-o2p'i2k. Affected with hyperopia.

HYPEROPSIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o2ps'i2-a3. 1. Exposure of the eyes to too great light. 2. See OXYOPIA. [L, 50, 107 (*a*, 14).]

HYPEROPTIC, adj. Hip-u6r-o2p'ti2k. From ὑπέρ, over, and ὀπτικός, for sight. See HYPERMETROPIC.

HYPERORÉXIQUE (Fr.), adj. E-pe2r-o-rax-ek. From ὑπέρ, to excess, and ὄρεξις, the appetite. Increasing the appetite. [A, 385.]

HYPERORGANEMA (Lat.), n. n. Hip(hu5p)-u6r(e2r)-o2rg-a2n(a3n)-e(a)'ma3. Gen., *-em'atos* (*-atis*). From ὑπέρ, to excess, and ὀργανοῦσθαι, to be organized. Malformation by redundancy. [A, 322.]

HYPERORGOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o2rg-o'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, to excess, and ὀργᾶν, to be in heat. 1. An excessive orgasm. 2. Excessive desire, satyriasis. [L, 50 (*a*, 14).]

HYPERORTHOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o2r-tho'si2s. Gen., *-os'eos* (*-is*). From ὑπέρ, exceeding, and ὄρθωσις, a making straight. 1. Extreme tension or erection. 2. Tetanus. [L, 50 (*a*, 14).]

HYPEROS (Lat.), n. m. Hi2p(hu5p)'e2r-o2s. Gr., ὕπερος. 1. A pestle. 2. A lever for making traction in cases of dislocation. [Hippocrates (A, 311).]

HYPEROSMIA (Lat.), n. f. Hip(hu5p)-u6r(e2r)-o2z(o2s)'mi2-a3. From ὑπέρ, to excess, and ὀσμή, the sense of smell. Ger., *Hyperosmie.* Increased sensitiveness of the sense of smell ; an occasional symptom of hysteria and of pregnancy. [A, 319, 326 (*a*, 21) ; Horwitz, " Ztschr. f. Geburtsh. u. Gynäk.," ix, 1 (D).]

HYPEROSPHRESIA (Lat.), **HYPEROSPHRESIS** (Lat.), n's f. Hip(hu5p)-ur(e2r)-o2s-fre(fra)'zi2(si2)-a3, -si2s. Gen., *-es'iæ, -es'eos* (*-es'is*). From ὑπέρ, to excess, and ὄσφρησις, the sense of smell. See HYPEROSMIA.

HYPEROSTEOGENY, n. Hip-u6r-o2st-e-o2j'e2n-i2. From ὑπέρ, above, ὀστέον, a bone, and γεννᾶν, to produce. Hypertrophy of bone producing exostosis. [*a*, 40.]

HYPEROSTEON (Lat.), n. n. Hip(hu5p)-u6r(e2r)-o2st'e2-o2n. From ὑπέρ, to excess, and ὀστέον, a bone. See EXOSTOSIS (1st def.).

HYPEROSTEOPATHY, n. Hip-u6r-o2st-e2-o2p'a2th-i2. Lat., *hyperosteopathia* (from ὑπέρ, to excess, ὀστέον, a bone, and πάθος, a disease). Fr., *hyperostéopathie* [Piorry]. A highly diseased condition of the bone. [L, 50 (*a*, 14).]

HYPEROSTOMA (Lat.), n. n. Hip(hu5p)-u6r(e2r)-o2st-o'ma3. Gen., *-om'atos* (*-atis*). From ὑπέρ, to excess, and ὀστέον, a bone. 1. An exostosis. 2. The product of a hyperostosis (1st def.). [L, 50 (*a*, 14).]

HYPEROSTOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-o2st-o'si2s. Gen., *-os'eos* (*-is*). Fr., *hypérostose.* Ger., *Knochenwucherung* (1st def.). *Knochenvergrösserung* (1st def.), *Ueberbein* (2d def.). 1. An abnormal growth, hyperplasia, or general swelling of a bone. 2. An exostosis (1st def.), especially on the sheath of a tendon. [L, 41, 50 (*a*, 14).]

HYPEROVARITROPHY, n. Hip-u6r-o-va2r-i2t'ro-fi2. Lat., *hyperovaritrophia* (from ὑπέρ, to excess, ὠάριον, an ovule, and τροφή, nourishment). Fr., *hyperovaritrophie* [Piorry]. Hypertrophy of the ovary. [*a*, 14.]

HYPEROXIDE, n. Hip-u6r-o2x'i2d(id). Lat., *hyperoxydum.* See PEROXIDE.

HYPEROXYGENATED, adj. Hip-u6r-o2x'i2-je2n-at-e2d. Fr., *hyperoxygéné.* Ger., *übersauerstofft.* Combined with or containing an excess of oxygen. [L, 50 (*a*, 14).]

HYPEROXYS (Lat.), adj. Hip(hu5p)-u6r(e2r)-o2x'i2s(u6s). Gr., ὑπέροξυς (from ὑπέρ, to excess, and ὀξύς, sharp). Ger., *sehr hitzig.* Of Hippocrates, very acute. [L, 50 (*a*, 14).]

HYPERPATHES (Lat.), adj. Hip(hu6p)-u5r(e2r)'pa2th(pa3th)-ez(as). Gr., ὑπερπαθής (from ὑπέρ, to excess, and πάθος, a disease). Ger., *überempfindlich.* Excessively sensitive. [L, 50 (*a*, 14).]

HYPERPATHIA (Lat.), n. f. Hip(hu5p)-u5r(e2r)-pa2th(pa3th)-i(e)'a3. Ger., *Ueberempfindlichkeit* (1st def.). *Empfindelei* (2d def.). 1. Extreme sensibility. 2. Extreme illness. [L, 50 (*a*, 14).]

HYPERPERISTROPHIK (Ger.), n. Hu5-pe2r-pa-re-stro-fek'. From ὑπέρ, to excess, περί, around, and στροφή, a turning. An exaggerated, abnormal movement of rotation (as of the fœtus during labor). [A, 91.]

HYPERPERITONITIS (Lat.), n. f. Hip(hu5p)-u6r(e2r)-pe2r-i2t-o2n-i(e)'ti2s. Gen., *-it'idos* (*-idis*). From ὑπέρ, to excess, and περιτόναιον, the peritonæum (see also *-itis**). Violent peritonitis. [L, 50 (*a*, 14).]

HYPERPERITROPE (Lat.), n. f. Hip(hu6p)-u6r(e2r)-pe2r-i2t'-ro(ro2)-pe(pa). Gen., *-it'ropes.* From ὑπέρ, to excess, and περιτροπή, a revolution. Of Grossi, excessive changeableness of the organic actions. [A, 322.]

HYPERPHAES (Lat.), adj. Hip(hu6p)-u6r(e2r)'fa3-ez(as). Gr., ὑπερφαής (from ὑπέρ, to excess, and φάος, light). 1. Abnormally clear or light. 2. Of some modern authors, produced by excessive light. [L, 50 (*a*, 14).]

HYPERPHASIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fa(fa^3)′zi^2-(si^2)-a^3. From ὑπέρ, over, and φάσις, a saying. The inordinate talking of the insane. [a, 40.]

HYPERPHLEBOECTASY, n. Hip-u^{6}r-fle^{2}b-o-e^{2}k′ta^{2}s-i^2. Lat., *hyperphleboectasia* (from ὑπέρ, to excess, φλέψ, a vein, and ἔκτασις, a swelling). Fr., *hyper-phléboëctasie* [Piorry]. See PHLEBYPERECTASIS.

HYPERPHLEBOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fle^{2}b-o′-si^{2}s. Gen., *-os′eos* (*-is*). From ὑπέρ, to excess, and φλέψ, a vein. Fr., *hyperphlébose.* Ger., *übergrosse Venosität.* An excessive development of the venous system. [L, 50 (a, 14).]

HYPERPHLEGMA (Lat.), n. n. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fle^{2}g′ma^3. Gen., *-phleg′matos* (*-atis*). From ὑπέρ, to excess, and φλέγμα, phlegm. An excessive secretion of phlegm. [L, 50.]

HYPERPHLEGMASIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fle^{2}g-ma(ma^3)′zi^2(si^2)-a^3. From ὑπέρ, to excess, and φλέγμα, inflammation. Excessive inflammation. [L, 50 (a, 14).]

HYPERPHLOGOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-flo^{2}g-o′-si^{2}s. Gen., *-os′eos* (*-is*). From ὑπέρ, to excess, and φλόγωσις, a burning. Fr., *hyperphlogose.* Of Lobstein, violent inflammation, with indurated swelling and fever. [L, 41, 50 (a, 14).]

HYPERPHORIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fo(fo^2)′ri^2-a^3. From ὑπέρ, over, and φορός, bearing. Of G. T. Stevens, an upward tendency of the visual axis of one eye, but not to the extent of strabismus.—**Compensatory h.** Of Claiborne, a compensatory over-extension of the superior rectus of an eye which is situated on a lower plane in the skull than the other eye, in order to accomplish and maintain single binocular vision. ["N. Y. Med Jour.," Mar. 3, 1888, p. 229 (a, 29).]—**Vicious h.** Of Claiborne, a tendency of the visual line of one eye to deviate upward, when both eyes lie in the same horizontal plane. ["N. Y. Med. Jour.," Mar. 3, 1888, p. 229 (a, 29).]

HYPERPHRENIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-fren(fran)′-i^2-a^3. From ὑπέρ, to excess, and φρήν, the mind. Fr., *hyperphrénie.* Ger., *Tobsucht.* Of Guislain, intense mental excitement, mania. [L, 50 (a, 14).]

HYPERPHYSICAL, adj. Hip-u^{6}r-fi^{2}z′i^2-k′l. Lat., *hyperphysicus.* Fr., *hyperphysique.* Ger., *hyperphysisch, übernatürlich.* Preternatural, pertaining to the preternatural. [A, 322.]

HYPERPHYSICS, n. sing. Hip-u^{6}r-fi^{2}z′i^{2}ks. Lat., *hyperphysica* (from ὑπέρ, beyond, and φύσις, nature). Ger., *Hyperphysik.* The attempted science of preternatural phenomena. [L, 50 (a, 14).]

HYPERPICROUS, adj. Hip-u^{6}r-pi^{2}k′ru^{3}s. Gr., ὑπέρπικρος (from ὑπέρ, over, and πικρός, pungent). Lat., *hyperpicrus.* Extremely bitter. [L, 50 (a, 14).]

HYPERPIGMENTATION, n. Hip-u^{6}r-pi^{2}g-me^{2}n-ta′shu^{3}n. From ὑπέρ, exceeding, and *pigmentum*, pigment. Excessive pigmentation. [G.]

HYPERPIMELE (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pi^{2}m′e^{2}l-e(a). Gen., *-pim′eles.* From ὑπέρ, to excess, and πιμελής, fat. Fr., *hyperpimélie.* Obesity. [L, 50 (a, 14).]

HYPERPIMELIC, adj. Hip-u^{6}r-pi^{2}m′e^{2}l-i^{2}k. Lat., *hyperpimelicus.* Pertaining to hyperpimele. [L, 50 (a, 14).]

HYPERPIRA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pi(pe)′ra^2. See BULIMIA.

HYPERPLASIA (Lat.). n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pla(pla^3)′zi^2-(si^2)-a^3. From ὑπέρ, to excess, and πλάσις, formation. Fr., *hyperplasie.* Ger., *Hyperplasie.* It., *iperplasia.* A form of progressive metamorphosis in which a part becomes enlarged or condensed by a numerical increase of its elements. [D.] Cf. *Numerical* HYPERTROPHY.—**Areolar h. of the uterus.** Of T. G. Thomas, excessive growth of the connective tissue of the uterus with congestion and resulting hyperæsthesia. [a, 40.]—**Fibrous (indurative) h. of the lymphatic glands.** A hyperplastic process or condition the result of chronic or repeated inflammation. The glands become hardened and enlarged. By Ziegler two varieties—the interstitial, or trabecular, and the diffuse, or reticular—are distinguished. [D, 48.]—**Glandular h.** Of Virchow, increase of the cellular elements without increase of the connective tissue of a gland.—**H. cystica vaginæ.** See COLPOHYPERPLASIA *cystica.*—**H. of the brain** [Virchow]. Hypertrophy of the brain. [D, 70.]—**Inflammatory h.** An excessive growth or increase in one or more component elements of a part due to inflammation. It is usually the connective tissue that is increased. [a, 40.]—**Large-celled (indurative) h. of the lymphatic glands.** A chronic hyperplastic process or condition in which there is a transformation of the gland-tissue into a large-celled tissue showing none of the characters of the original structure. It consists partly of closely packed, rounded, or polygonal cells, and partly of spindle cells, and may contain patches of fibrous tissue. The lymphadenoid tissue, if any remains, is seen in the form of reticulated bands which pervade the large-celled tissues. [D, 48.]—**Leucæmic h.** Splenic or lymphatic h. associated with leucæmia. [D, 48.]—**Lymphatic h.** H. of more or fewer of the elements of the lymphatic system. It is associated either with leucæmia or with pseudoleucæmia. [D, 48.]—**Nodular h. (of the liver).** A h. of the liver in which there are hard nodules over the surface and throughout the substance of the organ due to atheroma of the arteries. [a, 40.]—**Pseudoleucæmic h.** See *Leucœmic h.*

HYPERPLASIC, adj. Hip-u^{6}r-plaz′i^{2}k. See HYPERPLASTIC.

HYPERPLASIE (Fr., Ger.), n. E-pe^{2}r-pla^3-ze, hu^6-pe^{2}r-pla^3-ze′. See HYPERPLASIA.—**H. conjonctive** (Fr.). An exaggerated development of round cells in the interstitial or connective tissue of an organ, followed by a fibrous transformation of the tissue. ["Rev. des sci méd.," Apr. 15, 1889, p. 404 (a, 18).]

HYPERPLASMA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pla^{2}z(pla^{3}s)′-ma^3. Gen., *-plas′matos* (*-atis*). From ὑπέρ, to excess, and πλάσμα, anything molded. See HYPERINOSIS.

HYPERPLASTÉMIE [Piorry] (Fr.), n. E-pe^{2}r-pla^{3}s-ta-me. From ὑπέρ, to excess, πλαστός, molded, and αἷμα, blood. See HYPERINOSIS.

HYPERPLASTIC, adj. Hip-u^{6}r-pla^{2}st′i^{2}k. Fr., *hyperplastique.* Ger., *hyperplastisch.* Pertaining to or of the nature of hyperplasia. [D.]

HYPERPLASTY, n. Hip′u^{6}r-pla^{2}st-i^2. Fr., *hyperplastie.* See HYPERPLASIA.

HYPERPLEROSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-ple(pla)-ro′si^{2}s. Gen., *-os′eos* (*-os′is*). From ὑπέρ, to excess, and πλήρωσις, a filling up. Fr., *hyperplérose.* Ger., *Ueberfüllung.* Extreme repletion. [L, 50 (a, 14).]

HYPERPLEROTIC, adj. Hip-u^{6}r-ple^{2}r-o^{2}t′i^{2}k. Lat., *hyperpleroticus.* Pertaining to, caused by, or affected with, hyperplerosis. [A, 322.]

HYPERPLEXY, n. Hi′pu^{6}r-ple^{2}x-i^2. Lat., *hyperplexia* (from ὑπέρ, to excess, and πλῆξις, a stroke. Fr., *hyperplexie* [Guislain]. Ecstasy. [L, 50 (a, 14).]

HYPERPNÉE (Fr.), n. E-pe^{2}r-na. See HYPERPNŒA.

HYPERPNEUMOPATHY, n. Hip-u^{6}r-nu^2-mo^{2}p′a^{2}th-i^2. Lat., *hyperpneumopathia* (from ὑπέρ, to excess, πνεύμων, the lung, and πάθος, disease. Fr., *hyperpneumopathie* [Piorry]. Any extremely severe pulmonary disease. [A, 322.]

HYPERPNEUSIS (Lat.), **HYPERPNEUSTIA** (Lat.), n's f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-nu^2(pnu^2)′si^{2}s, -sti^2-a^3. Gen., *-pneus′eos* (*-is*), *-pneust′iæ.* From ὑπέρ, to excess, and πνεῦσις, a blowing. Excessive flatulence. [L, 50 (a, 14).]—**H. gastrica.** Ger., *Blähsucht.* Gastric flatulence. [L, 50 (a, 14).]

HYPERPNŒA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-ne′(pno^2′e^2)-a^3. From ὑπέρ, to excess, and πνοή, a blowing. Fr., *hyperpnée.* A condition, between eupnœa and dyspnœa, in which the blood is moderately deficient in oxygen, and respiration is correspondingly accelerated. [J, 18.]

HYPERPOROSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-por-o′si^{2}s. Gen., *-os′eos* (*-os′is*). Gr., ὑπερπώρωσις. Of Paulus Ægineta, an excessive formation of callus. [L, 50 (a, 14).]

HYPERPRACTICAL, adj. Hip-u^{6}r-pra^{3}kt′i^2-k′l. Lat., *hyperpracticus* (from ὑπέρ, to excess, and πρακτικός, fit for action). Ger., *überthätig.* Extraordinarily active. [L, 50 (a, 14).]

HYPERPRAXIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pra^{2}x(pra^{3}x)′-i^2-a^3. From ὑπέρ, exceeding, and πρᾶξις, a doing. Uncontrollable activity, such as walking and swinging of the hands, observed in certain forms of mania. [a, 40.]

HYPERPRESBYOPIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pre^{2}z-(pre^{2}s)-bi^2(bu^6)-op(o^{2}p)′i^2-a^3. From ὑπέρ, to excess, πρέσβυς, an old man, and ὤψ, vision. Fr., *hyperpresbyopie.* Extreme presbyopia. [L, 41 (a, 14).]

HYPERPRESBYTIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pre^{2}z-(pre^{2}s)-bi^2(bu^6)′shi^2(ti^2)-a^3. From ὑπέρ, to excess, and πρέσβυς, an old man. Of Gaub, see HYPERPRESBYOPIA.

HYPERPSELAPHESIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-se^{2}l-(psal)-a^3-fe(fa)′zi^2(si^2)-a^3. From ὑπέρ, to excess, and ψηλάφησις, a feeling. Ger., *Hyperpselaphesie.* Of Eulenburg, abnormal acuteness of tactile sensibility. [D, 35.]

HYPERPYRETIC, adj. Hip-u^{6}r-pi^{2}r-e^{2}t′i^{2}k. Fr., *hyperpyrétique.* Ger., *hyperpyretisch.* Of or pertaining to hyperpyrexia; exceedingly feverish. [D.]

HYPERPYREXIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-pi^{2}r(pu^{6}r)-e^{2}x′i^2 a^3. From ὑπέρ, to excess, and πυρεξία, feverishness. Fr., *hyperpyrexie.* Excessively high fever. [D.]—**Tropical h.** Sunstroke associated with insensibility, high temperature, and occasional convulsions. ["Brit. Med. Jour.," Mar. 10, 1883, p. 463 (D).]

HYPERPYREXIAL, adj. Hip-u^{6}r-pi^{2}r-e^{2}x′i^2-a^{2}l. See HYPERPYRETIC.

HYPERRESONANCE, n. Hip-u^{6}r-re^{2}s′o-na^{2}ns. From ὑπέρ, exceeding, and *resonare*, to resound. Abnormal resonance over a part such as is seen in emphysema or tympanites. [a, 40.]

HYPERRHINÉMIE [Piorry] (Fr.), n. E-pe^{2}r-re-na-me. From ὑπέρ, to excess, ῥίς, the nose, and αἷμα, blood. Engorgement of the nasal mucous membrane. [L, 82.]

HYPERRHINENCEPHALIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-rin(ren)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)′i^2-a^3. From ὑπέρ, over, ῥίς, the nose, and ἐγκέφαλος, the brain. ["Dtsch. Med.-Ztg.," Dec. 20, 1886, p. 1145.] Ger., *Hyperrhinencephalie.* A congenital deformity in which there is excessive development of the olfactory bulbs and frontal protuberance of the skull. [a, 40.]

HYPERSARCIA (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-sa^{3}r′si^2(ki^2)-a^3. See HYPERSARCOSIS and OBESITY.

HYPERSARCOMA (Lat.), n. n. Hip(hu^{6}p)-u^{6}r(e^{2}r)-sa^{3}r-ko′-ma^3. Gen., *-om′atos* (*-atis*). See FUNGOSITY.

HYPERSARCOSÉ (Fr.), adj. E-pe^{2}r-sa^{3}r-ko-sa. Affected with hypersarcosis.

HYPERSARCOSIS (Lat.), n. f. Hip(hu^{6}p)-u^{6}r(e^{2}r)-sa^{3}r-ko′-si^{2}s. Gen., *-os′eos* (*-os′is*). Gr., ὑπερσάρκωσις (from ὑπέρ, to excess, and σάρξ, flesh). Fr., *hypersarcose.* Ger., *wildes Fleisch* (1st def.), *übermassiger Fleischansatz* (2d def.). 1. An excessive growth of vascular granulations in wounds or ulcers. 2. Obesity. 3. Muscular hypertrophy. [A, 319 (a, 21); L, 50 (a, 14).]—**H. cordis.** Hypertrophy of the muscles of the heart without change in its cavities. [a, 40.]—**H. oculi.** See *Lacrymal* CARUNCLE.—**H. testiculi.** See SARCOCELE.

HYPERSARXIS (Lat.), n. f. Hip(hu^{6}p)-e^{2}r-sa^{3}rx′i^{2}s. Gen., *-sarx′eos* (*-is*). See HYPERSARCOSIS (1st def.).

HYPERSÉCRÉTEUR (Fr.), adj. E-pe^{2}r-sa-kra-tu^{6}r. Productive of increased secretion.

HYPERSECRETION, n. Hip-u6r-se-kre'shu3n2. From ὑπέρ, to excess, and *secernere*, to secrete. Fr., *hypersécrétion*. Ger., *H.* See SUPERSECRETION.

HYPERSÉCRÉTION (Fr.), n. E-pe2r-sa-kra-se-o2n2. See SUPERSECRETION.—**H. adipeuse.** Of Cruveilhier, a condition in which some of the connective-tissue cells appear to have been filled with fat. [D, 4.]

HYPERSIALORRHÉE [Piorry] (Fr.), n. E-pe2r-se-a3-lor-ra. From ὑπέρ, to excess, and σίαλον, saliva. A profuse flow of saliva. [L, 82.]

HYPERSOMNIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-so2m'ni2-a3. From ὑπέρ, to excess, and *somnium*, a dream. Excessive sleep. [α, 40.]

HYPERSPADIÆUS (Lat.), **HYPERSPADIAS** (Lat.), n's m. Hip(hu6p)-u6r(e2r)-spad(spa3d)-i2-e'(a3'e2)-u3s(u4s), -spad(spa3d)'-i2-a2s(a3s). From ὑπέρ, over, and σπᾶν, to draw. See EPISPADIA.

HYPERSPASMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-spa2z(spa3s)'-mi2-a3. From ὑπέρ, to excess, and σπασμός, spasm. Fr., *hyperspasmie* [Guislain]. A convulsion. [L, 50 (α, 14).]

HYPERSPLENOTROPHY, n. Hip-u6r-splen-o2t'ro-fi2. Lat., *hypersplenotrophia* (from ὑπέρ, to excess, σπλήν, the spleen, and τροφή, nourishment. Fr., *hypersplénotrophie* [Piorry]. Ger., *Milzgeschwulst* (2d def.). Hypertrophy of the spleen. [L, 41, 50, 82 (α, 14).]

HYPERSPONGIA (Lat.), **HYPERSPONGOSIS** (Lat.), n's f. Hip(hu6p)-e2r-spo2n(spo2n2)'ji2(gi2)-a3, -spo2n2-go'si2s. Gen., *-spong'iæ, -spongos'eos (-os'is)*. From ὑπέρ, to excess, and σπόγγος, a sponge. See FUNGOSITY (2d def.).

HYPERSTEATOSIS (Lat.), n. f. Hip(hu6p)-e2r-ste(ste2)-a2t-(a3t)-o'si2s. Gen., *-os'eos (-os'is)*. From ὑπέρ, to excess, and στέαρ, suet. Ger., *Hypersteatose*. Seborrhœa. The *Hypersteatoses*, in Auspitz's classification of skin diseases, are a family of the *Steatoses*, including the various forms of seborrhœa. [G, 4.]

HYPERSTHENIA (Lat.), n. f. Hip(hu6p)-e2r-sthe2n-i(e)'a3. From ὑπέρ, to excess, and σθένος, strength. Fr., *hypersthénie*. Ger., *Hypersthenie, Lebensüberkraft*. See HYPERDYNAMIA.

HYPERSTHENIC, adj. Hip-u6r-sthe2n'i2k. Ger., *hypersthenisch*. Excessively violent (said of a febrile movement). [D, 18.]

HYPERSTHENIE (Ger.), n. Hu6p-e2r-ste2n-e'. See HYPERDYNAMIA.—**H. der Gebärmutter.** Of Wigand, abnormally strong and continuous action of the uterus during labor. [A, 88.]

HYPERSTOMIC, adj. Hip-u6r-sto2m'i2k. From ὑπέρ, above, and στόμα, an aperture. Fr., *hyperstomique*. Literally, above the mouth (applied to the insertion of stamens when they are borne on the limb of the calyx above the throat). [α, 35.]

HYPERSTYLIC, adj. Hip-u6r-stil-i2k. From ὑπέρ, above, and στῦλος, a pillar. Fr., *hyperstylique*. Above the style (said of the insertion of the stamens when they are borne upon the calyx-tube prolonged above the ovary, as in *Fuchsia* and the evening primrose). [B, 1, 291 (α, 35).]

HYPERSULPHOCYANIDE, HYPERSULPHOCYANOGEN, n's. Hip-u6r-su3l-fo-si'a2n-i2d(id), -si-a2n'o-je2n. Lat., *hypersulphocyanidium, hypersulphocyanogenium*. Fr., *hypersulfocyanide, hypersulfocyanogène*. A compound of cyanogen with an excess of sulphur. [L, 41 (α, 14).]

HYPERSULPHURICUS (Lat.), adj. Hip(hu6p)-e2r-su3l(su4l)-fu2(fu4)'ri2k-u3s(u4s). Containing or combined with an excess of sulphuric acid. [B.]

HYPERSYNERGIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-si2n(su6n)-u6rj(e2rg)'i2-a3. From ὑπέρ, to excess, and συνεργία, a working together. Excessive co-operative work; of Grossi, undue activity of the various parts of the body in spreading disease through the system. [A, 322.]

HYPERSYSTOLE (Lat.), n. f. Hip(hu6p)-u6r(e2r)-si2s(su6s)'to2l-e(a). Gen., *-syst'oles*. From ὑπέρ, to excess, and συστολή, systole. Fr., *hypersystolie*. Ger., *übermässige Zusammenziehung*. An overstrong systole. [L, 50 (α, 14).]

HYPERTENSION, n. Hip-u6r-te2n'shu2n. From ὑπέρ, to excess, and *tendere*, to stretch. See SUPERTENSION.

HYPERTHELIC, adj. Hip-u6r-the'li2k. Lat., *hyperthelicus* (from ὑπέρ, over, and θηλή, the nipple). 1. Situated above the nipple. 2. Situated upon a mucous membrane. [L, 50 (α, 14).]

HYPERTHERMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-thu6rm-(the2rm)'i2-a3. From ὑπέρ, to excess, and θέρμη, heat. Fr., *hyperthermie*. Excessive rise of the bodily heat.

HYPERTHERMIC, adj. Hip-u6r-thu6rm'i2k. Fr., *hyperthermique*. Of or pertaining to hyperthermia. [D.]

HYPERTHYMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-thi2m(thu6m)'-i2-a3. From ὑπέρθυμος, vehemently angry. Of Leupoldt, a form of insanity characterized by acts of foolhardy daring. [A, 322.]

HYPERTONIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-ton(to2n)'i2-a3. From ὑπέρ, to excess, and τόνος, a stretching. Ger., *Hypertonie*. Excessive tonicity; irritability. [L, 50 (α, 14).]—**H. musculorum pseudo-hypertrophica.** Of Eulenburg, a variety of Thomsen's disease accompanied with hypertrophic rigidity of certain muscles of the limbs. ["Neurol. Ctrlbl.," No. 17, 1884; "Dtsch. med. Ztg.," Jan. 29, 1885, p. 100.]

HYPERTONIC, adj. Hip-u6r-to2n'i2k. Pertaining to hypertonia.

HYPERTONICITY, n. Hip-u6r-ton-i2s'i2t-i2. See HYPERTONIA.

HYPERTONUS (Lat.), n. m. Hi(hu6)-pe2r'to2n-u3s(u4s). From ὑπέρ, to excess, and τόνος, a straining. Fr., *hypertonie*. Ger., *Hypertonie*. That condition of the eye in which the intra-ocular tension is increased, sometimes without any organic disease being present. It is usually accompanied by dilatation of the pupil. [F.]

HYPERTRICHIASIS, HYPERTRICHOSIS (Lat.), n's f. Hip(hu6p)-e2r-tri(tri2)-ki2(ch2i2)-a(a3)'si2s, -ho(ch2o)'si2s. Gen., *-as'eos (-is), -os'eos (-is)*. From ὑπέρ, to excess, and θρίξ, a hair. Fr., *hypertrophie des poils*. Ger., *Hypertrichosis, Hypertrophie der Haare*. It., *ipertrichosi*. An excessive growth of hair; hirsuties. The *Hypertrichoses* (Ger., *Hypertrichosen*), in Auspitz's classification of skin diseases, are a family of the *Trichoses*. [G, 4; L, 150.]—**H. acquisita.** H. developed after birth as a result of a nervous (or other) disorder of the skin. [G.] Cf. *H. neurotica* and *H. irritativa*.—**H. circumscripta.** See *H. localis*.—**H. congenita.** H. that is congenital or due to inherited tendency. [G.]—**H. heterotopica localis.** H. affecting a portion of the skin usually free of hair. It may be of idiopathic or neurotic origin, or it may be an h. irritativa. It is sometimes associated with an abnormal arrangement of the teeth. [Behrend (A, 319 [α, 21]).]—**H. indoles hereditaria** [Michelson]. See *H. congenita*.—**H. irritativa.** H. caused by cutaneous irritation. [A, 326 (α, 21).]—**H. localis.** H., especially the congenital form, affecting only a limited area of the skin. The hair of the head or the beard may show increased growth (simple h.). It may occur elsewhere in circumscribed patches, in connection with hypertrophy and pigmentation of the skin (nævus pilosus). [G.]—**H. neurotica.** H. resulting from neurotic causes. [A, 326 (α, 21).]—**H. partialis.** See *H. localis*.—**H. universalis.** H. affecting the entire surface of the body, making the person so affected resemble a hairy animal. [G.]—**Hypertrophic h.** See under *H. localis*.—**Simple h.** See under *H. localis*.

HYPERTROMOS (Lat.), n. m. Hip(hu6p)-u6r(e2r)'tro2m-o2s. From ὑπέρ, to excess, and τρόμος, a trembling. Excessive tremor. [A, 322.]

HYPERTROPHÆMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-trof-(tro2f)-em'(a3'e2m)-i2-a3. From ὑπέρ, over, τροφή, nourishment, and αἷμα, blood. Excessive increase of the fluid without increase of the corpuscular elements of the blood. [Piorry (α, 40).]

HYPERTROPHIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-tro(tro2)'-fi2-a3. See HYPERTROPHY.

HYPERTROPHIC, adj. Hip-u6r-tro2f'i2k. Lat., *hypertrophicus*. Fr., *hypertrophique*. Ger., *hypertrophisch*. Pertaining to hypertrophy. [D.]

HYPERTROPHIE (Fr.), n. E-pe2r-tro-fe. See HYPERTROPHY.—**H. angibrômique** [Piorry]. Hypertrophy of the walls of the digestive tract. [L, 82.]—**H. éléphantiasique.** Hypertrophy of the nature of or resembling elephantiasis arabica. [G.]

HYPERTROPHIE (Ger.), n. Hu6-pe2r-tro-fe'. See HYPERTROPHY.—**Adjunktive H.** See HYPERPLASIA.—**Exzentrische H.** See *Eccentric* HYPERTROPHY.—**Konzentrische H.** See *Concentric* HYPERTROPHY *of the heart*.—**Numerische H.** See HYPERPLASIA.

HYPERTROPHIED, HYPERTROPHOUS, adj's. Hip-u6r'-tro2f-i2d, -u3s. In a state of hypertrophy.

HYPERTROPHY, n. Hip-u6r'tro2f-i2. Lat., *hypertrophia* (from ὑπέρ, to excess, and τροφή, nutrition). Fr., *hypertrophie*. Ger., *Hypertrophie, Uebernährung*. Enlargement of a part brought about by an excess of nutrition. To be distinguished from hyperplasia (*q. v.*). [D, 3.]—**Acquired h.** H. induced by over-exercise or action of a part or organ. [α, 40.]—**Adjunctive h.** See HYPERPLASIA.—**Cardiac h.** See *H. of the heart*.—**Centripetal h.** See *Concentric h. of the heart*.—**Compensatory h.** H. of an organ or part whereby it is enabled to do more work than before, so as to compensate for a defect (*e. g.*, h. of the left ventricle of the heart in consequence of aortic insufficiency, also of one organ of a pair when the other has been lost or rendered functionally inadequate). [Samuel (A, 319 [α, 21]); D, 70.]—**Concentric h. of the heart** [Bouillaud]. Ger., *konzentrische Hypertrophie*. H. of the heart causing contraction of its cavities. [D, 1.]—**Condensing h. of bone.** A form of inflammatory h. of bone which consists in the centric deposition of callus in the cancellous tissue and even filling up the medullary canal without increasing the circumference of the bone. [α, 40.]—**Congenital h.** Excessive growth of one or more parts of the body beginning in intra-uterine life. [α, 40.]—**Congestive h.** The enlargement of a part due to a persistent hyperæmia.—**Diathetic h.** H. of certain parts of the body induced by constitutional diathesis, such as the rheumatic, sorofulous, and phthisical diathesis. [α, 40.]—**Diffuse h. of bone.** See OSTEITIS *interna osteoplastica*.—**Diffused h. of the connective tissue of the brain** [Griesinger]. Diffused cerebral sclerosis. [D.]—**Eccentric h.** Ger., *exzentrische Hypertrophie*. H. of the walls of a hollow organ accompanied by dilatation. [A, 326 (α, 21).]—**Epidermic h.** An abnormal growth of the superficial layers of the skin, the foundation of several cutaneous diseases, such as cornu cutaneum. [α. 40.]—**False h.** 1. Hyperplasia. 2. Enlargement with degeneration.—**Fatty muscular h.** Of Bergeron and Lutz, spinal paralysis. [D, 40.]—**Follicular h.** Follicular postnasal catarrh. [α, 40.]—**Functional h.** The enlargement of an organ brought about by increased physiological activity. [α, 40.]—**Fusiform h.** Hypertrophic cervical pachymeningitis. [Cornil and Ranvier (α, 40).]—**General h.** Fr., *hypertrophie générale*. A condition in which the whole of an organ or part partakes of excessive growth; the term is especially used with reference to the heart and brain. [α, 40.]—**Glandular h.** Of Lebert, ademonia. [α, 40.]—**H. of the brain.** Lat., *hypertrophia cerebri*. Fr., *hypertrophie du cerveau*. Ger., *Hypertrophie des Gehirns, Gehirnhypertrophie*. A congenital or acquired disease belonging to childhood, which consists in a thickening and enlargement of the brain, due to an increase in the neuroglia, but not in the nerve elements. The disturbance of the circulation within the skull due to increase of pressure often causes cerebral irritation, paralysis, etc. [D, 1.]—**H. of the heart.** Lat., *hypertrophie cordis*. Fr., *hypertrophie du cœur*. Ger., *Hypertrophie des Herzens, Herzübernährung*. A pathological increase

in the dimensions of the muscular structure of the heart, affecting the entire organ, or one or more of its chambers, most commonly the left ventricle. It is almost always compensatory to the errors caused by diseased valves. [D, 1.] See also *Active* ANEURYSM and COR *bovinum*.—**Inflammatory h.** H. of a part due to prolonged inflammation. [a, 40.]—**Irritative h.** H. of a part produced by hyperæmia due to local irritation of the part. [a, 40.]—**Muscular h., Muscular pseudo-h.** Fr., *hypertrophie musculaire.* Ger., *Muskelhypertrophie.* Of Griesinger and Wernich, the pseudo-hypertrophic muscular paralysis of Duchenne. [P. Bourdel, "Rev. mens. des mal. de l'enfance," Feb., 1885, p. 54.]—**Neurotic h.** H. of a part due to disorder of its trophic nervous mechanism. [D, 35.]—**Numerical h.** See HYPERPLASIA.—**Partial h.** A term used to describe enlargement of some individual portion of a part or organ. [a, 40.]—**Physiological h.** H. due to normal physiological functions, such as the enlargement of the liver after a full meal. [a, 40.]—**Progressive glandular h.** See LYMPHADENOSIS.—**Reflex h.** The overgrowth of a part due to a hyperæmia induced by nervous irritation or vaso-motor paralysis at a distant point. [a, 40.]—**Simple h. of the heart.** A form in which the cavities of the heart retain their normal relations of capacity to each other. [D, 1.]—**Spontaneous h.** H. developing without any observable cause. [a, 40.]—**Transparent h. of the gums.** Of Salter, a slow h. of the extreme edge of the gum, forming a pale-pink, semi-transparent projection, almost destitute of sensibility and scarcely bleeding when cut. [Heath (A, 63).]—**Unilateral h.** Partial h. [a, 40.]

HYPERURESIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-u2(u)-re(ra)'-si2s. Gen., *-es'eos (-es'is).* From ὑπέρ, to excess, and οὔρησις, urination. Polyuria; in Young's classification of diseases, a genus of the *Apocenoses.* [L, 290.]—**H. aquosa** [Cullen]. See POLYURIA.—**H. saccharina.** See DIABETES *mellitus.*

HYPERUROCRINIE [Piorry] (Fr.), n. E-pe2r-u6-ro-kre-ne. From ὑπέρ, to excess, ουρον, urine, and κρίνειν, to separate. See POLYURIA.

HYPERURORRHŒA (Lat.), n. f. Hip(hu6p)-u5r(e2r)-u2(u)-o2r-re'(ro2'e2)-a3. Fr., *hyperurorrhée* [Piorry]. See POLYURIA.

HYPERUTERHÉMISME [Piorry] (Fr.), **HYPERUTÉRRHAGISME** [Piorry] (Fr.), n's. E-pe2r-u6-ta-re-mez-m', -e-pe2r-u6-te2r-ra3-rhez-m'. From ὑπέρ, to excess, *uterus*, the womb, and ῥεῖν, to flow, or ῥηγνύναι, to burst forth. See METRORRHAGIA.

HYPERVENOSITY, n. Hip-u6r-ven-o2s'i2t-i2. From ὑπέρ, to excess, and *vena*, a vein. Fr., *hypervénosité.* Prominence or excess of the venous system in the bodily development. [L, 41 (a, 14).]

HYPERVENTILATION, n. Hip-u6r-ve2n-ti2-la'shu3n. From ὑπέρ, exceeding, and *ventilare*, to fan. The treatment of ulcers, wounds, etc., by exposing them to currents of air, either natural or artificial (produced by bellows). The method has been applied to general diseases. [a, 40.]

HYPERYMENOMA (Lat.), n. n. Hip(hu6p)-u6r(e2r)-i(u6)-me2n-o'ma3. Gen., *-om'atos (-atis).* From ὑπέρ, to excess, and ὑμήν, a membrane. A membranous tumor. [L, 50 (a, 14).]

HYPERYMENOSIS (Lat.), n. f. Hip(hu6p)-u6r(e2r)-i(u6)-me2n-o'si2s. Gen., *-os'eos (-os'is).* 1. Hypertrophy of a membrane. 2. The development of a hyperymenoma. [L, 50 (a, 14).]

HYPERZOODYNAMIA (Lat.), n. f. Hip(hu6p)-u6r(e2r)-zo-o-(o3)-di2n(du6n)-a2m(a3m)'i2-a3. From ὑπέρ, to excess, ζῷον, an animal, and δύναμις, power. See HYPERDYNAMIA (1st def.).

HYPESTHESIA (Lat.), n. f. Hi2p(hu6p)-e2s-the(tha)'zi2(si2)-a3. See HYPÆSTHESIA.

HYPEXODOS (Lat.), **HYPEXODUS** (Lat.), n's m. Hi2p-(hu6p)-e2x'o2d-o2s, -u3s(u4s). Gr., ὑπέξοδος (from ὑπό, under, ἐξ, out, and ὁδός, a way. Of Hippocrates, an involuntary stool. [A, 311 (a, 21).]

HYPEZOCOS (Lat.), n. m. Hi2p(hu6p)-e2-zok'o2s(os). Gr., ὑπεζωκώς (from ὑποζωννύναι, to undergird). See PLEURA.

HYPHA (Lat.), n. f. Hif(hu6f)'a3. Gr., ὑφή. Fr., *hyphe.* Ger., *Hyphe, Pilzfadensaite.* The filamentous body, consisting of one or more elongated cells, which, either singly or united with other similar bodies, forms the mycelium of *Fungi.* [B, 35, 54.]

HYPHÆMA (Lat.), n. n. Hif(hu6f)-em'(a3'e2m)-a3. Gen., *-æm'atos (-atis).* Gr., ὕφαιμα (from ὑπό, under, and αἷμα, blood). 1. Anæmia. 2. An extravasation of blood; a suggillation. [L, 50, 107 (a, 39).] 3. See HÆMOPHTHALMIA. 4. See HYPHÆMIA (3d def.).—**H. oculi.** See HÆMOPHTHALMIA.

HYPHÆMATOSIS (Lat.), n. f. Hif(hu6f)-em(a3-e2m)-a2t(a3t)-o'si2s. Gen., *-os'eos (-is).* From ὑπό, short of, and αἷμα, blood. Fr., *hypo-hématose.* 1. Deficient sanguification. 2. Impaired vascular action or activity. [L, 50 (a, 14).] 3. Of Maurel, a morbid condition dependent on defective respiration, allied to anæmia and chlorosis, but distinguished by a diminished susceptibility to the action of poisons and of iron; attributed to congenital narrowness of the chest. ["Prog. méd.," May 18, 1889, p. 377.]

HYPHÆMIA (Lat.), n. f. Hif(hu6f)-em'(a3'e2m)-i2-a3. Fr., *hyphémie.* Ger., *Hyphæmie.* 1. Oligæmia. 2. Ecchymosis, especially of the conjunctiva. 3. An old term for an extravasation of blood into the anterior chamber of the eye. [F.]—**Intertropical h.** Fr., *hypohémie intertropicale.* In Brazil, a peculiar anæmia due to the presence of the *Anchylostoma duodenale.*

HYPHÆMITIS (Lat.), n. f. Hif(hu6f)-e2m(a3-e2m)-i(e)'ti2s. Gen., *-it'idos (-idis).* From ὑπό, short of, and αἷμα, blood (see also *-itis**). A slight inflammation of the blood. [L, 50 (a, 14).]

HYPHÆMORRHAGIA (Lat.), n. f. Hif(hu6f)-e2m(a3-e2m)-o2r-raj(ra3g)'i2-a3. From ὑπό, short of, αἷμα, blood, and ῥηγνύναι, to burst. Slight hæmorrhage. [L, 50 (a, 14).]

HYPHÆMOS (Lat.), **HYPHÆMUS** (Lat.), adj's. Hif(hu6f)-em'(a3'e2m)-o2s, -u4s(u4s). Gr., ὕφαιμος. 1. Suggillated. 2. Slightly bloody. [L, 50 (a, 14).]

HYPHÆNE (Lat.), n. f. Hif(hu6f)-en'(a3'e2n)-e(a). Gen., *-æn'es (-æ).* From ὑφαίνειν, to weave. Fr., *hyphène.* Ger., *Dum-Palme.* Of Gärtner, a genus of the *Borasseæ.* [B, 42, 180 (a, 24).]—**H. crinita, H. cucifera, H. thebaica.** Ar., *dum.* Fr., *palmier de la Thébaïde.* Ger., *ægyptische Dum-Palme.* The doom or doum palm, or gingerbread tree; the *cuci* of Pliny, the *Cucifera* of Theophrastus; a species indigenous to Upper Egypt, Nubia, Abyssinia, and adjacent countries. It furnishes a sort of bdellium (see *Egyptian* BDELLIUM). The pulp of the fruit forms a part of the food of the lower classes in Egypt. [B, 19, 42, 121, 170, 180, 185 (a, 24).]

HYPHAL, adj. Hi'f'l. From ὑφή, a web. Of or pertaining to hyphæ, composed of hyphæ. [a, 35.]

HYPHALODUM (Lat.), **HYPHALOIDUM** (Lat.), n's n. Hif-(hu6f)-a2l(a3l)-od'u3m(u4m), -o(o2)-id(ed)'u3m(u4m). From ὕφαλος, somewhat salt, and εἶδος, resemblance. Schweigger's proposed term for a subchloride. [B, 78 (a, 14).]

HYPHASMA (Lat.), n. n. Hif(hu6f)-a2z(a3s)'ma3. Gen., *-as'matos (-atis).* Gr., ὕφασμα. The mycelium of molds. [B, 19 (a, 24).]

HYPHE (Lat.), n. f. Hif(hu6f)'e(a). Gen., *hyph'es.* See HYPHA.

HYPHEAR (Lat.), n. n. Hif(hu6f)'e2-a3r. Gr., ὕφεαρ. An old name for the *Viscum album.* [B, 88 (a, 39).]

HYPHÉMIE (Fr.), n. E-fa-me. See HYPHÆMIA.

HYPHIDROSIS (Lat.), n. f. Hif(hu6f)-i2d-ro'si2s. Gen., *-os'eos (-os'is).* From ὑπό, short of, and ἱδρωσις, a sweating. Scantiness of the perspiration. [a, 14.]

HYPHOGENOUS, adj. Hif-o2j'e2n-u3s. From νφή, a web, and γεννᾶν, to engender. Of P. G. Unna, due to parasitic hyphæ (said of a form of sycosis). ["Mntsh. f. prakt. Dermat.," 1888, 5, 6; "N. Y. Med. Jour.," July 28, 1888, p. 108.]

HYPHOLOGY, n. Hif-o2l'o-ji2. From ὑφή, a web, and λόγος, understanding. Fr., *hyphologie.* See HISTOLOGY.

HYPHOLOMA (Lat.), n. m. Hif(hu6f)-o2l-o'ma3. Gen., *-om'atos (-atis).* From ὑφή, a web, and λῶμα, a fringe. See AGARICUS, subgenus 32.

HYPHOMYCETES (Lat.), n. m. pl. Hif(hu6f)-o(o3)-mi(mu6)-set(kat)'ez(e2s). From ὑφή, a web, and μύκης, a fungus. Fr., *hyphomycètes.* Ger., *Fadenpilze, Hyphomyceten.* Of Martius, a family of *Fungi*, embracing the sections *Mucedines, Inomycetes*, and *Mucores*; of Fries, a class of *Fungi.* comprising the *Phylleriaceæ, Inomycetes, Stilboïdei* (and in 1832 the *Cephalotrichiei*), *Mucorini, Dematiei, Mucedines*, and *Sepedoniei*, and in 1849 a series of *Haplomycetes*, embracing the orders *Mucorinei, Mucidinei*, and *Sepedoniaceæ*; of Lindley, an order of *Fungi*, comprising the same suborders as Fries's in 1832. The *H.* of Berkley include the orders *Isariacei, Stilbacei, Dematiei, Mucedines*, and *Sepedoniei.* More recently the *H.* have been mostly included under *Ascomycetes* (*q. v.*). [B, 19, 77, 170 (a, 24).]

HYPHOPODIUM (Lat.), n. n. Hif(hu6f)-o(o3)-pod(po2d)'i2-u3m(u4m). From ὑφή, a web, and πούς, the foot. See SETA (2d def.).

HYPHOSPORÆ (Lat.), n. f. pl. Hi(hu6)-fo2s'po2r-e(a3-e2). From ὑφή, a web, and σπόρος, a seed. Fr., *hyphosporés.* Ger., *Fadenflechten.* A division of *Fungi* with spores, variously shaped, simple or compound, borne on a filamentous receptacle. [B, 104 (a, 24).]

HYPHOSPORE, n. Hi'fo-spor. From ὑφή, a web, and σπόρος, a sowing. A spore borne at the extremity of an isolated filament, as in the bread-mold (*Penicillium*). [B, 121, 291 (a, 35).]

HYPHOSPOREÆ (Lat.), n. f. pl. Hi(hu6)-fo(fo3)-spor(spo2r)'-e2-e(a3-e2). See HYPHOSPORÆ.

HYPHOSTROMA (Lat.), n. n. Hi(hu6)-fo(fo3)-stro'ma3. Gen., *-om'atos (-atis).* From ὑφή, a web, and στρῶμα, a bed. The mycelium of *Fungi.* [B, 19 (a, 24).]

HYPHOTOMY, n. Hi-fo2t'o-mi2. From ὑφή, a web, and τομή, a cutting. Fr., *hyphotomie.* The dissection of tissues. [A, 385.]

HYPHYDRÆMIA (Lat.), n. f. Hif(hu6f)-id(u6d)-rem'(ra3'-e2m)-i2-a3. From ὑπό, short of, ὕδωρ, water, and αἷμα, blood. Fr., *hyphydrémie.* 1. Moderate hydræmia. 2. Hydræmia induced experimentally in the lower animals by filling the blood-vessels with water. [K.]

HYPHYDROS (Lat.), **HYPHYDRUS** (Lat.), adj's. Hif(hu6f)'-i2d(u6d)-ro2s, -ru3s(ru4s). From ὑφή, a web, and ὕδωρ, water. Dropsical. [Hippocrates (A, 311).]

HYPINOSIS (Lat.), n. f. Hip(hu6p)-i2n-os'i2s. Gen., *-os'eos (-is).* From ὑπό, short of, and ἴς, a fibre. Fr., *hypinose.* Ger., *Hypinose.* A condition of the blood in which there is a deficiency of fibrin, and hence of coagulating power (*e. g.*, in hæmophilia). [D.]

HYPINOTIC, HYPINOTICAL, adj's. Hip-i2n-o2t'i2k, -i2-k'l. Lat., *hypinoticus.* Pertaining to hypinosis. [K.]

HYPNÆSTHESIS (Lat.), n. f. Hi2p(hu6p)-ne2s(na3-e2s)-the-(tha)'si2s. Gen., *-es'eos (-is).* From ὕπνος, sleep, and αἴσθησις, perception. Ger., *Schläfrigkeit.* Of L. Martini, drowsiness. [L, 50, 107 (a, 14).]

HYPNAGOGIC, adj. Hi2p-na2-goj'i2k. From ὕπνος, sleep, and ἄγειν, to lead. Fr., *hypnagogique.* Inducing sleep or pertaining to the induction of sleep. [A, 385.]

HYPNAL, n. Hi2p'na2l. From ὕπνος, sleep. Of Bardet, a compound of 45 per cent. of chloral hydrate and 55 of antipyrine, named by Reuter *trichloraldehydphenyldimethylpyrazol* and alleged by him to be without therapeutic value. Bardet finds it valuable for inducing sleep, and having the same anodyne effect as

antipyrine, when the insomnia is caused by pain. ["Proc. of the Am. Pharm. Assoc.," xxxviii (*a*, 14)]

HYPNE (Fr.), n. Ep-n'. See HYPNUM.—**H. commun.** See HYPNUM *brevirostre.*—**H. crépu.** See HYPNUM *crispum.*

HYPNELOS (Lat.), **HYPNELUS** (Lat.), adj's. Hi^{2}p(hu^{6}p)-nel-(nal)'o^{2}s, -u^{3}s(u^{4}s). Gr., ὑπνηλός. Somnolent. [A, 325.]

HYPNENERGIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-ne^{2}n-u^{6}r(e^{2}r)-ji(ge)'a^3. From ὕπνος, sleep, and ἐνέργεια, energy. Somnambulism. [L, 50 (*a*, 14).]

HYPNIATER (Lat.), n. m. Hi^{2}p(hu^{6}p)-ni^2-at(a^{3}t)'u^{6}r(ar). Gen., *-er'os* (*-is*). From ὕπνος, sleep, and ἰατήρ, a surgeon. Fr., *hypniatre.* A person who professes to diagnosticate diseases and direct treatment for their cure while in a state of somnambulism. [A, 385.] Cf. CLAIRVOYANT.

HYPNIC, adj. Hi^{2}p'ni^{2}k. Gr., ὑπνικός. Lat., *hypnicus.* 1. Pertaining to sleep. [L, 107.] 2. Inducing sleep. [A, 311.]

HYPNOBADES (Lat.), n. m. Hi^{2}p(hu^{6}p)no^{2}b'a^{2}d(a^{3}d)-ez(as). From ὕπνος, sleep, and βαίνειν, to go. A somnambulist. [L, 116.]

HYPNOBADICUS (Lat.), adj. Hi^{2}p(hu^{6}p)-no(no^3)-ba^{2}d(ba^{3}d)'-i^{2}k-u^{3}s(u^{4}s). Pertaining to somnambulism. [L, 116.]

HYPNOBADISIS (Lat.), **HYPNOBASIS** (Lat.), **HYPNOBATESIS** (Lat.), **HYPNOBATIA** (Lat.), n's f. Hi^{2}p(hu^{6}p)-no-(no^3)-ba^{2}d(ba^{3}d)'i^{2}s-i^{2}s, -no^{2}b'a^{2}s(a^{3}s)-i^{2}s, -no(no^3)-ba^{2}t(ba^{3}t)-e-(a)'-si^{2}s, -ba(ba^3)'shi^2(ti^2)-a^3. Gen., *-is'eos* (*-bad'isis*), *-bas'eos* (*-nob'asis*), *-es'eos* (*-is*), *-bat'iæ.* From ὕπνος, sleep, and βαίνειν, to go. Ger., *Nachtwandeln.* Somnambulism. [L, 50 (*a*, 14).]

HYPNOCYST, n. Hi^{2}p'no-si^{2}st. From ὕπνος, sleep, and κύστις, a sac. A resting cyst ; one that does not give rise to spores. [L, 121.]

HYPNODES (Lat.), adj. Hi^{2}p(hu^{6}p)-nod'ez(as). Gr., ὑπνώδης (from ὕπνος, sleep, and εἶδος, resemblance). Ger., *schläfrig.* Sleepy. [L, 50, 107 (*a*, 14).]

HYPNODIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-nod'i^2-a^3. Gr., ὑπνωδία. Ger., *Schläfrigkeit.* Somnolence, drowsiness. [L, 50, 107 (*a*, 14).]

HYPNOGENIC, HYPNOGENOUS, adj's. Hi^{2}p-no-je^{2}n'i^{2}k, -no^{2}j'e^{2}n-u^{3}s. From ὕπνος, sleep, and γεννᾶν, to engender. Fr., *hypnogène.* Producing sleep. [A, 385.]

HYPNOGRAPHY, n. Hi^{2}p-no^{2}g'ra^{2}f-i^2. From ὕπνος, sleep, and γράφειν, to write. Fr., *hypnographie.* See HYPNOLOGY.

HYPNOLEPSY, n. Hi^{2}p'no-le^{2}p-si^2. From ὕπνος, sleep, and λῆψις, a seizure. Ger., *Hypnolepsie.* Morbid sleepiness. [A, 521.]

HYPNOLOGY, n. Hi^{2}p-no^{2}l'o-ji^2. Lat., *hypnologia* (from ὕπνος, sleep, and λόγος, understanding). Fr., *hypnologie.* Ger., *Lehre vom Schlaf.* 1. The doctrine or science of sleep. [L, 41, 50, 107 (*a*, 14).] 2. The science and art of hypnotism. ["Sem. méd.," Oct. 20, 1889, p. 433 (*a*, 18).]

HYPNONE, n. Hi^{2}p'non. Lat., *hypnonum.* Fr., *hypnone.* Ger., *Hypnon.* Of Dujardin-Beaumetz, acetophenone, methylphenylacetone, phenylmethyl ketone ; an acrid, colorless, mobile liquid, $C_6H_5.CO.CH_3$, employed as a hypnotic. [S. Limousin, "Arch. de pharm.," i, 1 ; "Am. Jour. of Pharm.," Apr., 1886, p. 185 ; P. Vigier, "Gaz. hebd. de méd. et de chir." ; "N. Y. Med. Jour.," Dec. 19, 1885, p. 704, Feb. 6, 1886, p. 172 ; "Proc. of the Am. Pharm. Assoc.," xxxvi (*a*, 14).]

HYPNONERGIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-no-nu^{6}r(ne^{2}r)-ji(ge)'a^3. See HYPNENERGIA.

HYPNONUM (Lat.), n. n. Hi^{2}p(hu^{6}p)-non'u^{3}m(u^{4}m). See HYPNONE.

HYPNOPATHY, n. Hi^{2}p-no^{2}p'a^{2}th-i^2. From ὕπνος, sleep, and πάθος, disease. See HYPNOLEPSY.

HYPNOPHILOUS, adj. Hi^{2}p-no^{2}f'i^{2}l-u^{3}s. From ὕπνον, moss, and φιλεῖν, to love. In botany, growing among mosses. [L, 116.]

HYPNOPHOBIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-no(no^3)-fob(fo^{2}b)'-i^2-a^3. From ὕπνος, sleep, and φόβος, fear. Ger., *Schlaffurcht.* A fear or dread occurring during sleep ; nightmare. [L, 50 (*a*, 14).] Cf. EPHIALTES.

HYPNOPHOBIC, adj. Hi^{2}p-no-fob'i^{2}k. Pertaining to hypnophobia ; as a n., a person afraid of going to sleep (*e. g.*, a sufferer from hydrothorax). [L, 50 (*a*, 14).]

HYPNOPHRENOSES (Lat.), n. f. pl. Hi^{2}p(hu^{6}p)-no(no^3)-fre^{2}n-o'sez(se^{2}s). From ὕπνος, sleep, and φρήν, the mind. Fr., *hypnophrénoses.* Ger., *Schlafirrungen.* Of C. H. Schultz. morbid conditions characterized by disturbances of sleep, such as somnambulism, delirium, lethargy, etc. [L, 50 (*a*. 14).]

HYPNOPŒOS (Lat.), **HYPNOPŒUS** (Lat.), adj's. Hi^{2}p-(hu^{6}p)-no(no^3)-pe'(po^3'e^2)-o^{2}s, -u^{3}s(u^{4}s). Gr., ὑπνοποιός (from ὕπνος, sleep, and ποιεῖν, to cause). Causing sleep. [A, 311, 322.]

HYPNOS (Lat.), n. Hi^{2}p(hu^{6}p)'no^{2}s. Gr., ὕπνος. Fr., *h.* Ger., *Schlaf.* Sleep. [L, 50 (*a*, 14).]

HYPNOSIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-no(no^2)'si^2-a^3. From ὕπνος, sleep. See *Sleeping* DROPSY.—**Biomagnetic h.** Hypnotism. [*a*, 40.]

HYPNOSCOPE, n. Hi^{2}p'no-skop. From ὕπνος, sleep, and σκοπεῖν, to examine. Ger., *Hypnoskop.* An instrument used to determine whether or not a patient is in the hypnotic state. [Ochorowicz, "Lumière électrique" ; "St. Petersb. med. Woch.," July 27 (Aug. 8), 1885, p. 253 (*a*, 40).]

HYPNOSIS (Lat.), n. f. Hi^{2}p(hu^{6}p)-no'si^{2}s. Gen., *-os'eos* (*-is*). Ger., *Hypnose, Einschläferung.* 1. The induction of sleep. [A, 322.] 2. See HYPNOTISM.

HYPNOTERION (Lat.), n. n. Hi^{2}p(hu^{6}p)-not-e(a)'ri^2-o^{2}n. Gr., ὑπνωτήριον. A certain hepatic epithem mentioned by Aetius. [Gorræus (A, 325).]

HYPNOTIC, adj. Hi^{2}p-no^{2}t'i^{2}k. Gr., ὑπνωτικός (from ὕπνος, sleep). Lat., *hypnoticus.* Fr., *hypnotique.* Ger., *hypnotisch.* 1. Pertaining to sleep or to hypnotism. [D.] 2. Tending to induce sleep.

HYPNOTICON (Lat.), n. n. Hi^{2}p(hu^{6}p)-no^{2}t(not)'i^{2}k-o^{2}n. The *Hyoscyamus albus.* [B. 121 (*a*, 35).]

HYPNOTISANT (Fr.), adj. Ep-no-te-za^{3}n^2. See HYPNOTIC.

HYPNOTISM, n. Hi^{2}p'no^{2}t-i^{2}z'm. Lat., *hypnotismus* (from ὕπνος, sleep). Fr., *hypnotisme, sommeil somnambulique provoqué* (ou *artificiel*). Ger., *Hypnotismus.* It., *ipnotismo.* Sp., *hipnotismo.* Syn.: *braidism.* An abnormal state into which some persons may be thrown, either by a voluntary act of their own, such as gazing continuously and with fixed attention on some small bright object held close to the eyes, or by the exercise of another person's will ; characterized by suspension of the will and consequent obedience to the promptings of "suggestions" from without (see SUGGESTION). The activity of the organs of special sense, except the eye, may be heightened, and the power of the muscles increased. Perfect insensibility to pain may be induced by h., and it has been used as an anæsthetic. It is apt to be followed by severe headache of long continuance and by various nervous disturbances. On emerging from h., the hypnotized person usually has no remembrance of what happened during its continuance, but in many persons such a remembrance may be induced by "suggestion." About one person in three is susceptible of h., and those of an hysterical or neurotic tendency (but rarely the insane) are the most readily hypnotized. [J. Braid, "Month. Jour. of Med. Sci.," July, 1853 (D.); A. 385, 528 ; D, 35.]—**Galvanic h.** See GALVANO-HYPNOTISM.—**Telepathic h.** Fr., *sommeil à distance.* The production of sleep or other hypnotic phenomena by the will, or mental suggestion, of a person at a distance from the subject. [Myers, "Proc. Soc. Psych. Research," 1886–'87, iv, 127 (*a*, 40).]

HYPNOTIZATION, n. Hi^{2}p-no-ti^2-za'shu^{3}n. Fr., *hypnotisation.* Ger., *Hypnotisirung.* It., *ipnotizzazione.* Sp., *hipnotización.* The induction of hypnotism.

HYPNOTIZED, adj. Hi^{2}p'no^{2}t-izd. In a state of hypnotism.

HYPNOTYPHUS (Lat.), n. m. Hi^{2}p(hu^{6}p)-no(no^3)-tif(tu^{6}f)'-u^{3}s(u^{4}s). From ὕπνος, sleep, and τῦφος, stupor. Ger., *Schlaffieber.* Typhus characterized by excessive sleepiness. [L, 50, 107 (*a*, 14).]

HYPNUM (Lat.), n. n. Hi^{2}p(hu^{6}p)'nu^{3}m(nu^{4}m). Fr., *hypne.* Ger., *Astmoos.* A genus of pleurocarpous mosses. [B, 19, 180 (*a*, 24).]—**H. antipyreticum.** The *Fontinalis antipyretica.* [B, 173, 180 (*a*, 24).]—**H. brevirostre.** Fr., *hypne commun.* A species found in Europe ; used like *H. crispum.* [B. 173 (*a*, 24).]—**H. crispum.** Fr., *hypne crépu.* A species used in Europe in lieu of oakum. [B, 173 (*a*, 24).]—**H. loreum.** One of the larger species formerly used, under the name of *muscus vulgaris*, as a remedy in whooping-cough and menstrual disorders. [B, 180 (*a*, 24).]—**H. musaforme.** One of the species generally forming part of the so-called Corsican moss. ["Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]—**H. rutabulum.** See *H. brevirostre.*—**H. Schreberi.** One of the larger species formerly known under the name of *muscus vulgaris* and used like *H. loreum.* [B, 180 (*a*, 24).]—**H. sericeum.** The *Leskea sericea.* [B, 180 (*a*, 24).]—**H. squarrosum.** See *H. Schreberi.*—**H. triquetrum.** A large species growing in grassy places in groves and orchards ; employed like *H. loreum.* [B, 180 (*a*, 24).]

HYPNUS (Lat.), n. m. Hi^{2}p(hu^{6}p)'nu^{3}s(nu^{4}s). See HYPNOS.

HYPOACANNA, n. See IPECACUANHA.

HYPOACIDITÉ (Fr.), n. E-po-a^3-se-de-ta. From ὑπό, short of, and *aciditas*, acidity. A state of defective acidity (especially of the gastric juice). [*a*, 18.]

HYPOÆMA (Lat.), n. n. Hip(hu^{6}p)-o(o^3)-e'(a^3'e^2)-ma^3. Gen., *-œm'atos* (*-atis*). See HYPHÆMA.

HYPOÆMIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-em'(a^3'e^{2}m)-i^2-a^3. See HYPHÆMIA.

HYPOALBUMINOSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-a^{2}l(a^{3}l)-bu^{2}m(bum)-i^{2}n-os'i^{2}s. Gen., *-os'eos* (*-is*). From ὑπό, short of, and *albuminum*, albumin. A deficiency of albuminous constituents of the blood. [K.]—**Primary h.** A deficient quantity of albuminous elements in the blood due to hæmorrhage or any cause which suddenly reduces the volume of blood in the body. [*a*, 40.]—**Secondary h.** A decreased amount of albuminous elements in the blood due to prolonged fasting, wasting disease, or chronic constitutional disturbance. [*a*, 40.]

HYPOÄMIE (Ger.), n. Hu^6-po-a-me'. See HYPHÆMIA.

HYPOANTIMONATE, n. Hip-o-a^{2}n-ti^{2}m'o^{2}n-at. A compound of antimony tetroxide with the oxide of another element or with a radicle. These compounds were formerly called antimonites. [B, 3, 98, 142.]

HYPOANTIMONITE, n. Hip-o-a^{2}n-ti^{2}m'o^{2}n-it. Also written *hypantimonite.* An old name for a compound of antimony trioxide with the oxide of another element or with a radicle ; an antimonite. [B, 98, 142.]

HYPOARCTIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-a^{3}rk'shi^2(ti^2)-a^3. From ὑπό, short of, and *arctare*, to constrict. Fr., *hypo-arctie* [Piorry]. See HYPOSTENOSIS.

HYPOARIA (Lat.), n. f. Hi^{2}p(hu^{6}p)-o(o^2)-a(a^3)'ri^2-a^3. The "lobi inferiores" ; two small nodules or lobes projecting from the anterior inferior surface of the optic lobes in fishes ; their significance is unknown. [*a*. 40.]

HYPOAZOTATE, n. Hip-o-a^{2}z'o-tat. See NITRITE.

HYPOAZOTIC ACID, n. Hip-o-a^{2}z-o^{2}t'i^{2}k. Nitrogen tetroxide. [B, 38.]

HYPOAZOTIDE, n. Hip-o-a^{2}z'ot-i^{2}d(id). Nitryl. [B.]

HYPOAZOTURIA (Lat.), n. f. Hip(hu6p)-o(o2)-a2z(a3z)-ot-u2-(u)'ri2-a3. A deficient quantity of nitrites in the urine. [α, 40.]

HYPOBASAL, adj. Hip-o-ba's'l. From ὑπό, under, and βάσις, a base. Under the base (applied to the lower posterior cell or cells developed in the fertilized oosphere of *Hepaticæ* and other cryptogams). [B, 67 (α, 24).] Cf. EPIBASAL.

HYPOBLAST, n. Hip'o-bla2st. From ὑπό, under, and βλαστός, a germ. Fr., *hypoblaste, feuillet blastodermique inférieur, feuillet intestino-glandulaire.* Ger., *Schleimblatt* [Pander] (1st def.), *Darmdrüsenblatt* [Remak] (1st def.), *Keimtrager* (2d def.), *Keimhalter* (2d def.). 1. Of Balfour, the epithelio-glandular or mucous layer of the blastoderm; the entoderm; the innermost of the three layers into which the blastoderm divides at the area germinativa. [A, 8; L, 12, 353.] 2. Of Richard and Nees, the axis of the embryo in grasses; the cotyledon of Brown, Kunth, and others; the scutellum of Gärtner and Sachs. [B, 19, 104, 167 (α, 24).]—**Digestive h., Gut-h., Intestinal h.** Ger., *Darmentoblast.* The hypoblastic or entodermal cells giving rise to the lining of the alimentary canal in the embryo. [J, 89.]—**Yolk h.** That portion of the mesoblast which surrounds the yolk. [α, 39.]

HYPOBLASTIC, adj. Hip-o-bla2st'i2k. Lat., *hypoblasticus.* Fr., *hypoblastique.* Ger., *hypoblastisch.* Of or pertaining to the hypoblast.

HYPOBLEPHARON (Lat.), **HYPOBLEPHARUM** (Lat.), n's n. Hip(hu6p)-o(o2)-ble2f'a2r(a3r)-o2n, -u3m(u4m). From ὑπό, under, and βλέφαρον, an eyelid. 1. An old term for a tumefaction or swelling under one or both eyelids. 2. An artificial eye. [F.]

HYPOBRANCHIAL, adj. Hip-o-bra3n2'ki2-a2l. Situated in or connected with the lower portion of a branchial arch; as a n., see *H.* BONE. [L, 107.]

HYPOBRANCHIATE, adj. Hip-o-bra3n2'ki2-at. Having the gills projecting from the lower surface of the body. The *Hypobranchiata,* or *Hypobranchia* of Fischer, Eichwald, and others, are a class of molluscs so characterized. [L, 180 (α, 39).]

HYPOBROMITE, n. Hip-o-brom'it. Lat., *hypobromis.* A salt of hypobromous acid. [B.]

HYPOBROMOUS ACID, n. Hip-o-brom'u3s. Fr., *acide hypobromeux.* Ger., *Unterbromigsäure, unterbromige Säure.* A monobasic acid, HBrO, known only in aqueous solution. The latter is a light, straw-colored, unstable liquid of powerful oxidizing properties. [B, 3.]

HYPOBRONCHITE [Piorry] (Fr.), n. E-po-bro2n2-shet. From ὑπό, short of, and βρόγχια, the bronchial tubes (see also *-itis**). Slight bronchitis. [A, 250 (α, 21).]

HYPOBRYCHIOS (Lat.), adj. Hip(hu6p)-o(o2)-bri2k(bru6ch2)'-i2-o2s. Gr., ὑποβρύχιος. 1. Submerged, buried. 2. Deep-seated. 3. Latent, hidden. [A, 311, 322.]

HYPOBULIA (Lat.), n. f. Hip(hu6p)-o(o2)-bu2(bu)'li2-a3. From ὑπό, short of, and βουλή, will. A form of mental disease in which the patient has partially or wholly lost control of will-power. [α, 40.]

HYPOCAFFEINE, n. Hip-o-ka2f'e2-en. A crystalline body, $C_6H_7N_3O_3$, derived from caffeine. It acts as an acid. [B, 3.]

HYPOCALYCIOUS, adj. Hip-o-ka2l-i2s'i2-u3s. Lat., *hypocalycius* (from ὑπό, under, and κάλυξ, the calyx). Situated beneath the calyx. [L, 107.]

HYPOCAPNISMA (Lat.), n. n. Hip(hu6p)-o(o3)-ka2p(ka3p)-ni2z(ni2s)'ma3. Gr., ὑποκάπνισμα (from ὑπό, under, and καπνός, smoke). A preparation used for fumigation. [L, 50, 84 (α, 14).]

HYPOCAPNISMUS (Lat.), n. m. Hip(hu6p)-o(o2)-ka2p(ka3p)-ni2z(ni2s)'mu3s(mu4s). Gr., ὑποκαπνισμός. See FUMIGATION.

HYPOCARDIA (Lat.), n. f. Hip(hu6p)-o(o2)-ka3rd'i2-a3. From ὑπό, under, and καρδία, the heart. Ger., *Hypocardie.* Of Alvarenga, downward dislocation of the heart and the diaphragm. [A, 319 (α, 21).]

HYPOCARDIODYNAMIE [Piorry] (Fr.), n. E-po-ka3r-de-o-de-na3-me. From ὑπό, short of, καρδία, the heart, and δύναμις, power. Defective cardiac power. [A, 250 (α, 21).]

HYPOCARDIONERVIE [Piorry] (Fr.), n. E-po-ka3r-de-o-ne2r-ve. From ὑπό, short of, καρδία, the heart, and νεῦρον, a nerve. Defective cardiac innervation. [A, 250 (α, 21).]

HYPOCARDIOTOPIE [Piorry] (Fr.), n. E-po-ka3r-de-o-to-pe. From ὑπό, under, καρδία, the heart, and τόπος, place. Displacement of the heart downward. [A, 250 (α, 21).]

HYPOCARDIOSTHÉNIE [Piorry] (Fr.), n. E-po-ka3r-de-o-sta-ne. From ὑπό, short of, καρδία, the heart, and σθένος, strength. See HYPOCARDIODYNAMIE.

HYPOCARODES (Lat.), adj. Hip(hu6p)-o(o2)-ka2r(ka3r)-od'-ez(as). Gr., ὑποκαρώδης (from ὑπό, short of, and καροῦν, to stupefy), Ger., *etwas schlafsüchtig.* Somewhat lethargic. [A, 311.]

HYPOCARPIEÆ (Lat.), n. f. pl. Hip(hu6p)-o(o2)-ka3rp-i(i2)'-e2-e(a3-e2). From ὑπό, under, and καρπός, a fruit. Fr., *hypocarpiées.* Of Allioni and Gleditsch, plants of which the fruit is superior. [B, 1 (α, 24).]

HYPOCARPIOUS, adj. Hip-o-ka3rp'i2-u3s. Lat., *hypocarpius* (from ὑπό, under, and καρπός, a fruit). Ger., *unterfrüchtig.* See HYPOGYNOUS.

HYPOCARPIUM (Lat.), n. n. Hip(hu6p)-o(o2)-ka3rp'i2-u3m-(u4m). From ὑπό, under, and καρπός, fruit. Of Bernhardi, the base of the fruit or place of attachment to the stem. [α, 35.]

HYPOCARPOGEUS (Lat.), adj. Hip(hu6p)-o(o2)-ka3rp-o(o3)-je(ga)'u3s(u4s). From ὑπό, under, καρπός, fruit, and γῆ, the earth. Fr., *hypocarpagé.* Subterranean (said of plants with fruit underground). [B, 1 (α, 24).]

HYPOCARUS (Lat.), n. m. Hip(hu6p)-o2k'a2r(a3r)-u3s(u4s). From ὑπό, short of, and καροῦν, to stupefy. Ger., *leichte Schlafsucht.* Somnolence. [L, 50 (α, 14).]

HYPOCATALEPSIS (Lat.), n. f. Hip(hu6p)-o(o2)-ka2t(ka3t)-a3-le2ps(laps)'i2s. Gen., *-eps'eos* (*-is*). From ὑπό, short of, and κατάληψις, catalepsy. Ger., *unvollständige Catalepsie.* Slight catalepsy. [L, 50 (α, 14).]

HYPOCATHARSIS (Lat.), n. f. Hip(hu6p)-o(o2)-ka2th(ka3th)-a3r'si2s. Gen., *-arse'os* (*-is*). Gr., ὑποκάθαρσις (from ὑπό, down or short of, and κάθαρσις, purging). Fr., *hypocatharsie.* Ger., *schwacher Stuhlgang* (1st def.), *Ausleerung nach unten* (2d def.). 1. Slight purging. [L, 41, 84 (α, 14).] 2. Purging downward (by the bowels). [A, 311, 322.]

HYPOCATHARTIC, adj. Hip-o-ka2th-a3rt'i2k. Lat., *hypocatharticus.* Fr., *hypocathartique.* Ger., *mild abführend.* Slightly purgative. [L, 41, 50 (α, 14).]

HYPOCAUSIS (Lat.), n. f. Hip(hu6p)-o(o2)-ka4s'(ka3'u4s)-i2s. Gen., *-caus'eos* (*-is*). Gr., ὑπόκαυσις. 1. A burning from beneath. 2. A slight burning. [A, 311, 322.]

HYPOCAUSTICUM (Lat.), n. n. Hip(hu6p)-o(o2)-ka4st'(ka3'-u4st)-i2k-u3m(u4m). See HYPOCAUTERIUM.

HYPOCAUSTUM (Lat.), n. n. Hip(hu6p)-o(o2)-ka4st(ka3'u4st)-u3m(u4m). Gr., ὑπόκαυστον. Fr., *hypocauste.* See CALDARIUM.

HYPOCAUTERIUM (Lat.), n. n. Hip(hu6p)-o(o2)-ka4t(ka3-u4t)-e(a)'ri2-u3m(u4m). From ὑπό, short of, and καυτήριον (see CAUTERY). Ger., *Brennmittel.* A mild and gradually acting caustic. [L, 50 (α, 14).]

HYPOCEPHALÆON (Lat.), **HYPOCEPHALÆUM** (Lat.), n's n. Hip(hu6p)-o(o2)-se2f(ke2f)-a2l(a3l)-e'(a3'e2)-o2n, -u3m(u4m). Gr., ὑποκεφάλαιον (from ὑπό, under, and κεφαλή, the head). Ger., *Kopfkissen.* A cushion for the head. [L, 50 (α, 14).]

HYPOCERCHNALEON (Lat.), n. n. Hip(hu6p)-o(o2)-su5rk-(ke2rch2)-na(na3)'le2-o2n. Gr., ὑποκερχναλέον. Ger., *gelinde Heiserkeit.* Slight hoarseness. [A, 322.]

HYPOCHÆRIS (Lat.), n. f. Hi(hu6)-po(po2)-ker'(ka3'e2r)-i2s. See HYPOCHŒRIS.

HYPOCHIL, n. Hip'o-ki2l. Lat., *hypochilium* (from ὑπό, under, and χεῖλος, the lip). Ger., *Unterlippchen.* The basal portion of the labellum of an orchid. [B, 1, 36 (α, 24).]

HYPOCHLORATE, n. Hip-o-klor'at. A salt of hypochloric acid. [B, 38 (α, 14).]

HYPOCHLORIC ACID, n. Hip-o-klor'i3k. Fr., *acide hypochlorique.* See CHLORINE *peroxide.*

HYPOCHLORIN, n. Hip-o-klor'i2n. From ὑπό, short of, and χλωρός, green. Fr., *hypochlorine.* Of Pringsheim, a waxy substance which he professes to have found as the first product of assimilation in certain plants. It is, he says, extruded from chlorophyll granules under the influence of certain agents. ["Jahrb. f. wiss. Bot.," xii, 1879–1881, p. 288; B, 167, 229 (α, 24).]

HYPOCHLORIS (Lat.), n. m. Hip(hu6p)-o(o2)-klor(ch2lor)'i2s. Gen., *-chlorit'is.* See HYPOCHLORITE.—**H. calcicus** [Fr. Cod.]. Fr., *chlorure de chaux sec.* Chlorinated lime. [B.]—**H. calcicus aqua solutus** [Fr. Cod.]. See *Liquor* CALCIS *chloratæ* (under CALX).—**H. sodicus aqua solutus** [Fr. Cod.]. See *Liquor* SODÆ *chloratæ.*

HYPOCHLORITE, n. Hip-o-klor'it. Fr., *h.* A salt of hypochlorous acid. The h's are unstable bodies, which are readily decomposed by acids, giving up their chlorine, and so acting as bleaching agents. [B, 3.]—**H. calcique** (Fr.). See CALX *chlorata.*

HYPOCHLOROMELAS (Lat.), adj. Hip(hu6p)-o(o2)-klor-(ch2lor)-o2m'e2l-a2s(a3s). Gen., *-mel'anos* (*-anis*). Gr., ὑποχλωρομέλας (from ὑπό, short of, χλωρός, green, and μέλας, black). Having a dark and sallow skin. [A, 322.]

HYPOCHLOROUS ACID, n. Hip-o-klor'u3s. From ὑπό, under, and chlorous (*q. v.*). Lat., *acidum hypochlorosum.* Fr., *acide hypochloreux.* Ger., *unterchlorige Säure, Unterchlorigsäure.* An unstable compound, HClO. It is known only in aqueous solution. It readily parts with its oxygen, and so acts as an oxidizing and bleaching agent. By replacement of its hydrogen by a metal, it forms a series of salts called hypochlorites. [B, 3.]

HYPOCHNUS (Lat.), n. m. Hip(hu6p)-o2k(o2ch2)'nu3s(nu4s). A genus of *Fungi.* The *Hypochni* are a section of the *Mucedines.* [B, 180 (α, 24); B, 121 (α, 35).]—**H. nigrocinctus.** A species found on red and yellow cinchona-bark. [B, 180 (α, 24).]—**H. rubrocinctus.** A species found on the red cinchona-bark, the *Cortex china regius* and the *Cortex adstringens brasiliensis spurius.* [B, 180 (α, 24).]

HYPOCHŒRIS (Lat.), n. f. Hip(hu6p)-o(o2)-ker'(ch2o2'e2r)-i2s. Fr., *hypochéride, porcelle.* Ger., *Ferkelkraut, Saukraut.* A genus of *Compositæ,* typical of the *Hypochœrideæ.* The *Hypochœrideæ* (Fr., *hypochœridées;* Ger., *Hypochoerideen*) are: Of Schultes, a group of composite plants; of Bentham and Hooker, a subtribe of the *Cichoriaceæ.* [B, 19, 42, 64, 173, 180 (α, 24).]—**H. adscendens** (seu **dimorpha,** seu **glabra**). A species found in Europe, formerly thought to be medicinal. [B, 64, 180 (α, 24).]—**H. maculata.** Fr., *porcelle tachetée.* Ger., *Ferkelkraut, Saukraut.* A species found in the woods of Europe and the Caucasus. The herb and flowers (*herbe costæ,* vel *costi nostratis,* vel *vulgaris*) were once official, but are now disused. The Laplanders eat it like cabbage. [α, 24.]—**H. radicata.** Fr., *porcelle à longues racines, salade de porc, herbe à l'épervier, herbe au fauçon.* Australian cape-weed, long-rooted cat's-ear; a species the herb and flowers of which, *herba et flores costæ vulgaris* (seu *hieracei macrorrhizi*), were once used like taraxacum in abdominal obstructions, etc. The roots are eaten, fried, by the French peasants. [B, 19, 173, 180, 275 (α, 24).]

HYPOCHOLODES (Lat.), adj. Hip(hu⁶p)-o(o²)-kol(ch²o²l)-od'ez(as). Gr., ὑποχολώδης (from ὑπό, short of, χολή, bile, and εἶδος, resemblance). Slightly bilious. [L, 50 (α, 14).]

HYPOCHONDER (Lat.), n. m. Hip(hu⁶p)-o(o²)-ko²nd(ch²o²nd)'-u⁶r(e²r). See HYPOCHONDRIUM.

HYPOCHONDRIA (Lat.), n. f. Hip(hu⁶p)-o(o²)-ko²n(ch²o²n)'-dri²-a³. Fr., *hypochondrie, hypocondrie.* Ger., *Hypochondrie, Milzsucht.* See HYPOCHONDRIASIS.—**H. verminosa.** H. due to the patient having, or believing himself to have, a tape-worm. [A, 319 (α, 40).]

HYPOCHONDRIAC, adj. and n. Hip-o-ko²n²'dri²-a²k. Gr., ὑποχονδριακός (from ὑπό, under, and χόνδρος, a cartilage). Lat., *hypochondriacus.* Fr., *hypochondriaque.* Ger., *hypochondrisch* (adj.), *milzsüchtig* (adj.) (2d def.), *Hypochonder* (n.), *Milzsuchtiger* (n.). 1. Situated beneath the ribs (see *H.* REGION). 2. Pertaining to hypochondriasis; as a n., a person affected with hypochondriasis. [D.]

HYPOCHONDRIACAL, adj. Hip-o-ko²n-dri'a²-k'l. See HYPOCHONDRIAC.

HYPOCHONDRIACISM, n. Hip-o-ko²n-dri'a²-si²z'm. See HYPOCHONDRIASIS.

HYPOCHONDRIALGIA (Lat.), n. f. Hip(hu⁶p)-o(o²)-ko²n-(ch²o²n)-dri²-a²l(a³l)'ji²(gi²)-a³. From ὑπό, under, χόνδρος, a cartilage, and ἄλγος, pain. Ger., *Milzschmerz, hypochondrischer Schmerz.* Pain in the hypochondriac region. [L, 30 (α, 14).]

HYPOCHONDRIASIS (Lat.), n. pl. Hip(hu⁶p)-o(o²)-ko²n-(ch²o²n)-dri²-a(a³)'si²s. Gen., *-as'eos (-is).* From ὑπό, under, and χόνδρος, a cartilage. Fr., *hypochondrie.* A mental disorder which does not amount to insanity, and which takes its name from the hypochondriac region, to which feelings of distress and uneasiness are often referred. In all cases the characteristic feature is an apprehension either that some serious disease has attacked one or is about to do so; hence there is a morbid concern about one's physical condition. It is by some called the analogue of hysteria, the latter affecting principally women, the former men. [D, 5.]—**Delirious h.** Fr., *hypochondrie délirante.* Excessive h. with a low form of delirium. [α, 40.]—**H. sine materia.** H. without good cause. [D.]—**H. cum materia.** H. induced by actual disturbance of greater or less severity in some part of the body, especially the hypochondrium. [D, 70.]—**Syphilitic h.** Lat., *h. syphilitica.* H. in which the subject continually imagines that he is a victim of syphilis. [D, 36.]

HYPOCHONDRIASM, n. Hip-o-ko²n'dri²-a²z'm. See HYPOCHONDRIASIS.

HYPOCHONDRICISMUS (Lat.), n. m. Hip(hu⁶p)-o(o²)-ko²nd-(ch²o²nd)-ri²-si²z(ki²s)'mu³s(mu⁴s). See HYPOCHONDRIASIS.

HYPOCHONDRIE (Fr.), **HYPOCHONDRIE** (Ger.), n's. E po-ko²n²-dre, hu⁶-po-ch²on-dre'. See HYPOCHONDRIASIS.—**H. cérébrale** (Fr.). H. with sensations of pressure upon the head, with hallucinations and forebodings of apoplectic attacks. [α, 40.]—**H. délirante** (Fr.). See *Delirious* HYPOCHONDRIASIS.—**H. morale** (Fr.). Of Z. Falret, simple melancholia.

HYPOCHONDRISM, n. Hip-o-ko²nd'ri²z'm. See HYPOCHONDRIASIS.

HYPOCHONDRIUM (Lat.), n. n. Hip(hu⁶p)-o(o²)-ko²n-(ch²o²n)'dri²-u³m(u⁴m). From ὑπό, under, and χόνδρος, a cartilage. The upper lateral region of the abdomen on either side of the epigastrium. [L, 49, 50, 56 (α, 14).]

HYPOCHONDROPHTHISIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-ko²n(ch²o²n)-dro²t(dro²f)'i²(thi²)-si²s. Gen., *-is'eos (-oph'thisis).* From ὑπό, under, χονδρος, a cartilage, and φθίσις, consumption. Emaciation with hypochondriasis. [L, 50 (α, 14).]

HYPOCHONDRY, n. Hip'o-ko²nd-ri². See HYPOCHONDRIASIS.

HYPOCHOREMA (Lat.), n. n. Hip(hu⁶p)-o(o²)-kor(ch²or)-e-(a)'ma³. Gen., *-em'atos (-atis).* Gr., ὑποχώρημα (from ὑπό, under, and χωρεῖν, to withdraw). Of Lindenus, excrement. [L, 50 (α, 14).]

HYPOCHORESIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-kor(ch²or)-e-(a)'si²s. Gen., *-es'eos (-is).* Gr., ὑποχώρησις (from ὑπό, under, and χωρεῖν, to withdraw). Defecation. [L, 50 (α, 14).]

HYPOCHORETICUS (Lat.), adj. Hi²p(hu⁶p)-o(o²)-kor(ch²or)-e²t(at)'i²k-u³s(u⁴s). Gr., ὑποχωρητικός. Lat., *hypochoreticus.* Pertaining to hypochoresis. [L, 50 (α, 14).]

HYPOCHROSIS (Lat.), n. f. Hi(hu⁶)-po(po²)-kro(ch²ro)'si²s. Gen., *-chro'seos (-chros'is).* From ὑπό, short of, and χρῶσις, a coloring. Abnormal paleness (*e. g.*, of the red blood-corpuscles). [A. Duane, "N. Y. Med. Jour.," Dec., 1881, p. 576.]

HYPOCHYMA (Lat.), n. n. Hip(hu⁶p)-o²k(o²ch²)'i²(u⁶)-ma³. Gen., *-ym'atos (-atis).* Gr., ὑπόχυμα (from ὑπό, under, and χύμα, a liquid). 1. Of Galen, a cataract. [F.] 2. Hæmophthalmia. 3. Glaucoma. [L, 50 (α, 14).]

HYPOCHYSIS (Lat.), n. f. Hip(hu⁶p)-o²k(o²ch²)'i²(u⁶)-si²s. Gen., *-ys'eos (-och'ysis).* From ὑπό, down, and χύσις, a pouring. An old term for cataract. [F.]—**H. hæmatodes.** See HÆMOPHTHALMIA.

HYPOCINESIA (Lat.), **HYPOCINESIS** (Lat.), n's f. Hip-(hu⁶p)-o(o²)-si²n(ki²n)-e(a)'zi²(si²)-a³, -si²s. Gen., *-es'iæ* or *-es'os (-is).* From ὑπό, less, and κίνησις, motion. Of Eulenburg, diminution of motor reaction to excitation. [D, 35.]

HYPOCINETIC, adj. Hip-o si²n-e²t'i²k. Pertaining to or affected with hypocinesia.

HYPOCIST (Ger.), n. Hu⁶-po-tsest'. The genus *Cytinus.* [B, 180 (α, 24).]—**Gewöhnlicher H.** See CYTINUS *hypocistis.*—**H'ensaft.** Succus hypocistidis (*q. v.* under CYTINUS *hypocistis*). [B, 180 (α, 24).]

HYPOCISTIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-si²st'i²s. Gen., *-ist'idos (-idis).* Gr., ὑποκιστίς (from ὑπό, under, and κιστίς, a little box). Fr., *hypociste.* Ger., *Hypocist.* The *Cytinus h.* [B, 180 (α, 24).]—**Herba hypocistidis.** Sp., *hipocistido* [Sp. Ph.]. The herb of *Cytinus h.* [B, 95.]—**Succus hypocistidis.** See under CYTINUS *hypocistis.*

HYPOCLEIDIUM (Lat.), n. n. Hip(hu⁶p)-o(o²)-klid'(kle²'i²d)-i²-u³m(u⁴m). From ὑπό, under, and κλειδίον, a little key (see CLAVICLE). A median process frequently developed from the interclavicular part of the furculum in birds, and united with the carina of the sternum by strong fibrous tissue or by continuous ossification. [L, 12 (α, 27).]

HYPOCLEPSIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-kle²p'si²s. Gen., *-cleps'eos (-is).* From ὑπό, under, and κλέψις, theft. 1. A gradual and almost imperceptible diminution. 2. Of Hildebrand, transudation. [L, 50 (α, 14).]

HYPOCLEPTICUS (Lat.), adj. Hip(hu⁶p)-o(o²)-kle²p'ti²k-u³s-(u⁴s). Pertaining to hypoclepsis; as a n., in the n., *hypoclepticum,* see VITRUM *hypoclepticum.* [A, 322.]

HYPOCLYSIS (Lat.), **HYPOCLYSMOS** (Lat.), n's f. and m. Hip(hu⁶p)-o²k'li²(lu⁶)-si²s, -o²k-li²z(li²s)'mo²s. Gen., *-lys'eos (-oc'lysis), -ys'mi.* Gr., ὑπόκλυσις (from ὑπό, under, and κλύσις, a drenching), and ὑποκλυσμός (from ὑπό, under, and κλυσμός, a clyster). A purging from below; the administration of an enema. [A, 311 (α, 17); L, 50 (α, 14).]

HYPOCŒLION (Lat.), **HYPOCŒLIUM** (Lat.), n's n. Hip-(hu⁶p)-o(o²)-sel'(ko²'e²l)-i²-o²n, -u³m(u⁴m). Gr., ὑποκοίλιον (from ὑπό, under, and κοιλία, the belly). The abdomen. [L, 50 (α, 14).]

HYPOCŒLIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-sel'(ko²'e²l)-i²s. Gen., *-cœl'idos (-idis).* Gr., ὑποκοιλίς. An old term for the lower eyelid. [F.]

HYPOCŒLON (Lat.), **HYPOCŒLUM** (Lat.), n's n. Hip-(hu⁶p)-o(o²)-sel'(ko²'e²l)-o²n, -u³m(u⁴m). Gr., ὑπόκοιλον. An old term for the hollow under the lower eyelid. [L, 50.]

HYPOCONE, n. Hi²p'o-kon. From ὑπό, under, and κῶνος, a pine-cone. Of Osborne, the secondary cusp which appears in the molars of the upper jaw as the postero-internal, or sixth cusp. ["Nature," Mar. 20, 1890, p. 46 (α, 39).]

HYPOCOPHOS (Lat.), adj. Hip(hu⁶p)-o(o²)-ko'fo²s. See HYPOCOPHOUS.

HYPOCOPHOSIS (Lat.), n. f. Hip(hu⁶p)-o(o²)-ko-fo'si²s. Gen., *-os'eos (-is).* From ὑπό, somewhat, and κώφωσις, deafness. Fr., *hypocophose.* Ger., *Schwerhörigkeit.* Moderate deafness. [A, 322.]

HYPOCOPHOUS, adj. Hip-o-ko'fu³s. Gr., ὑπόκωφος (from ὑπό, somewhat, and κωφός, deaf). Lat., *hypocophos.* 1. Slightly deaf. 2. Semi-vocal. [A, 311 (α, 11).]

HYPOCOROLLATE, adj. Hip-o-ko²r-o²l'at. From ὑπό, under, and *corolla* (*q. v.*). Having an hypogynous corolla (said of plants). [α, 35.]

HYPOCOROLLIA (Lat.), n. n. pl. Hip(hu⁶p)-o(o²)-ko²r-o²l'-li²-a³. From ὑπό, under, and *corolla* (*q. v.*). Fr., *hypocorollies.* In Jussieu's classification, the eighth class, comprising monopetalous dicotyledons having hypogynous stamens and corolla. [B, 1, 104 (α, 24).]

HYPOCOTYL, n. Hip-o-ko²t'i²l. From ὑπό, under, and κοτύλη, a cup. Fr., *hypocotyle.* See CAULICLE.

HYPOCOTYLEDONARY, HYPOCOTYLEDONOUS, adj's. Hip-o-ko²t-i²l-e²d'o²n-a-ri², -o²n-u³s. From ὑπό, under, and κοτυληδών, a cup-shaped hollow. Fr., *hypocotylé.* Situated below the cotyledons. [B, 64, 291 (α, 24).]

HYPOCRANEOUS, adj. Hip-o-kran'e-u³s. From ὑπό, under, and κρανίον, the upper part of the head. Fr., *hypocranien.* Ger., *unter dem Schädel befindlich.* Situated beneath the cranium. [L, 41, 50 (α, 14).]

HYPOCRANIUM (Lat.), n. n. Hip(hu⁶p)-o(o²)-kran(kra³n)'-i²-u³m(u⁴m). From ὑπό, under, and κρανίον, the cranium. An abscess or swelling between the dura mater and the cranium. [E.]

HYPOCRATERIFORM, HYPOCRATERIMORPHOUS, HYPOCRATEROID, adj's. Hip-o-kra²t-e²r'i²-fo²rm, -e²r-i²-mo²rf'u³s, -kra²t'e²r-oid. Lat., *hypocrateriformis, hypocraterimorphus, hypocraterodes* (from ὑποκρατήριον, the stand of a mixing-vessel, and *forma,* or μορφή, form, or εἶδος, resemblance). Fr., *hypocratériforme, hypocratérimorphe.* Ger., *tellerförmig, präsentirtellerförmig, untertassenförmig.* Salver-shaped (said of a corolla, etc., with a slender tube abruptly expanded into a flat limb). [B, 1, 19, 123, 291 (α, 24).]

HYPOCRATOUS, adj. Hip-o²k'ra²t-u³s. Lat., *hypocrates* (from ὑπό, short of, and κράτος, strength. Ger., *unterkräftig.* Deficient in strength. [A, 322.]

HYPOCRINIA (Lat.), n. f. Hip(hu⁶p)-o(o²)-kri²n'i²-a³. From ὑπό, short of, and κρίνειν, to separate. Fr., *hypocrinie.* Of Andral, defective secretion. [A, 322, 385.]

HYPOCRINIC, adj. Hip-o-kri²n'i²k. Fr., *hypocrinique.* Pertaining to hypocrinia. [A, 385.]

HYPOCUPHISMUS (Lat.), n. m. Hip(hu⁶p)-o(o²)-ku²(ku⁴)-fi²z(fi²s)'mu³s(mu⁴s). From ὑποκουφίζειν, to feel easier. Ger., *mässige Erleichterung.* A sense of partial relief. [L, 50 (α, 14).]

HYPOCUPHOS (Lat.), adj. Hip(hu⁶p)-o(o²)-ku²(ku)'fo²s. Gr., ὑπόκουφος. Slightly relieved. [L, 50 (α, 14).]

HYPOCYPHOS (Lat.), adj. Hip(hu⁶p)-o(o²)-si(ku⁶)'fo²s. Gr., ὑπόκυφος. See HYPOCYRTOS.

HYPOCYRTOS (Lat.), adj. Hip(hu⁶p)-o(o²)-su⁶rt(ku⁶rt)'o²s. Gr., ὑπόκυρτος (from ὑπό, somewhat, and κυρτός, curved). Slightly humped. [Hippocrates (A, 311 [α, 17]).]

HYPOCYSTEOTOMY, HYPOCYSTOTOMY, n's. Hip-o-si2st-e2-o2t'o-mi2, -si2st-o2t'o-mi2. From ὑπό, under, κύστις, the bladder, and τομή, a cutting. Ger., *Hypocystotomie.* Perineal cystotomy.

HYPODACTYLUM (Lat.), n. n. Hip(hu6p)-o(o2)-da2k(da3k)'-ti2l(tu6l)-u3m(u4m). From ὑπό, under, and δάκτυλος, a digit. In a bird, the plantar surface of a toe. [L, 343.]

HYPODERIS (Lat.), n. f. Hip(hu6p)-o2d'e2r-i2s. Gen., *-der'idos (-idis).* Gr., ὑποδερίς (from ὑπό, under, and δέρις, the neck). 1. The lower part of the neck. 2. See Clitoris. 3. The præputium clitoridis. [L, 50, 135 (a, 39).]

HYPODERM, n. Hi'po-du5rm. From ὑπό, under, and δέρμα, the skin. Fr., *hypoderme.* The subcutaneous tissue. [A, 385.]

HYPODERMA (Lat.), n. n. Hip(hu6p)-o(o2)-du6rm(de2rm)'a3. Gen., *-der'matos (-atis).* From ὑπό, under, and δέρμα, the skin. Fr., *hypoderme.* 1. In plants, layers of collenchyma, or of sclerotic or fibrous tissue, lying immediately beneath and strengthening the epidermis. 2. A genus of ascomycetous *Fungi*, of the *Discomycetes.* [B, 104, 229, 291 (a, 24).] 3. The genus *Œstrus.*—**Aqueous h.** In *Bromeliaceæ* and some species of the genus *Tradescantia*, a watery tissue lying beneath the epidermis, consisting of large, thin-walled cells with contents clear as water, and often developed to an enormous thickness. [Sachs (a, 35).] See *Aqueous* tissue.—**H. bovis.** See Œstrus *bovis.*

HYPODERMAL, HYPODERMATIC, adj's. Hip-o-du6r'-m'l, -du5rm-a2t'i2k. Lat., *hypodermaticus* (from ὑπό, under, and δέρμα, the skin). See Hypodermic.

HYPODERMATOMY, n. Hip-o-du6rm-a2t'o-mi2. From ὑπό, under, δέρμα, the skin, and τομή, a cutting. The subcutaneous section of parts. [E.]

HYPODERME (Fr.), adj. E-po-de2rm. 1. See Hypodermic. 2. As a n., any subcutaneous structure (of Besnier, the subcutaneous connective tissue). [G.] 3. As a n., a subcutaneous parasite, such as the *Œstrus bovis.* [A, 301.] See Hypoderma.

HYPODERMIA (Lat.), n. f. Hip(hu6p)-o(o2)-du6rm(de2rm)'-i2-a3. Of Ehrenberg, a group of *Fungi;* of Fries, an order of the *Coniomycetes*, consisting of the *Æcidinei, Ustilaginei*, and *Uredinei.* The *Hypodermiæ* of DeBary are an order of *Fungi*, including the *Uredineæ* and *Ustilagineæ*, so called because developing within the tissues of living plants, and making their way from within through the epidermis of the latter. The *Hypodermieæ* are the same. The *Hypodermii* of Pfeiffer are a tribe of the *Coniomycetes*, order *Haplomycetes*, comprising the *Ustilaginei, Uredinei*, and *Æcidinei.* [B, 77, 121, 167, 170 (a, 24).]

HYPODERMIC, adj. Hip-o-du6rm'i2k. Lat., *hypodermicus* (from ὑπό, under, and δέρμα, the skin). Fr., *hypodermique.* Ger., *hypodermatisch, unterhäutig, Unterhaut-.* It., *ipodermico.* Sp., *hipodérmico.* 1. Situated beneath the skin, subcutaneous; pertaining to subcutaneous parts or tissues. 2. Administered by subcutaneous injection (said of drugs and of the impregnation of some leeches); designed for giving such injections (see *H.* syringe).

HYPODERMICALLY, adv. Hip-o-du6rm'i2k-a2l-li2. By means of hypodermic injections. [D.]

HYPODERMICUS (Lat.), adj. Hip(hu6p)-o(o2)-du5rm(de2rm)'-i2k-u3s(u4s). See Hypodermic.

HYPODERMIS (Lat.), n. f. Hip(hu6p)-o(o2)-du6rm(de2rm)'i2s. Gen., *-derm'is.* From ὑπό, under, and δέρμα, the skin. 1. See Hypoderma. 2. See Clitoris. 3. See Præputium *clitoridis.* 4. The epidermal or epithelial layer of the skin of insects and many other invertebrates. It excretes the cuticula. ["Proc. of the Am. Assoc. for the Adv. of Sci.," 1884 (J, 11, 97).]

HYPODERMOCLYSIS (Lat.), n. f. Hip(hu6p)-o(o2)-du6rm-(de2rm)-o2k'li2(lu6)-si2s. Gen., *-lys'eos (-oc'lysis).* From ὑπό, under, δέρμα, the skin, and κλύσις, a drenching by a clyster. Fr., *hypodermoclysie.* Ger., *Hypodermoklyse.* It., *ipodermoclisi.* 1. The employment of a hypodermic injection. 2. See Hypodermoclysm.

HYPODERMOCLYSM, n. Hip-o-du6rm'o-kli2z'm. Lat., *hypodermoclysma* (from ὑπό, under, δέρμα, the skin, and κλυσμός, a clyster). Ger., *Hypodermoklysma.* It., *ipodermoclismo.* Treatment (as of cholera) by large hypodermic injections of water or saline solutions. [K; "Ann. di. chim. appl. alla. farm. ed alla. med.," Nov., 1884, p. 268 (B).]

HYPODERMOTHÉRAPIE (Fr.), n. E-po-de2r-mo-ta-ra3-pe. From ὑπό, under, δέρμα, the skin, and θεραπεία, medical treatment. Hypodermic medication. [L, 41 (a, 14).]

HYPODERRHIS (Lat.), n. f. Hi(hu6)-po(po2)-de2r'ri2s. Gen., *-der'rheos (-is).* From ὑπό, under, and δέῤῥις, a leathern coat. See Hypoderis.

HYPODESIS (Lat.), n. f. Hip(hu6p)-o2d'e2-si2s. Gen., *-es'eos (-od'esis).* Gr., ὑπόδεσις (from ὑποδεῖν, to fasten under). An old term for ligation or the application of a constricting bandage. [A, 311, 225.]

HYPODESMA (Lat.), n. Hip(hu6p)-o(o2)-de2z(de2s)'ma3. Gen., *-des'matos (-atis).* See Hypodesmis.

HYPODESMEUS (Lat.), n. m. Hip(hu6p)-o(o2)-de2z(de2s)'-me2-u3s(u4s). From ὑπό, under, and δεσμεύειν, to fetter. Syn.: *subligator.* Ger., *Unterbinder.* An instrument for making constriction to restrain hæmorrhage. [L, 50 (a, 14).]

HYPODESMIS (Lat.), n. f. Hip(hu6p)-o(o2)-de2z(de2s)'mi2s. Gen., *-es'midos (-idis).* Gr., ὑποδεσμίς. Of Galen, a constricting or supporting bandage. [A, 530.]

HYPODESMOLYTER (Lat.), n. m. Hip(hu6p)-o(o2)-de2z-(de2s)-mol'i2t(u6t)-u5r(ar). Gen., *-er'os (-is).* From ὑποδεσμός, footgear, and λυτήρ, a loosener. Ger., *Unterbindungslöser.* An instrument for loosening a ligature. [L, 50 (a, 14).]

HYPODESMUS (Lat.), n. n. Hip(hu6p)-o(o2)-de2z(de2s)'mu3s-(mu4s). See Hypodesmis.

HYPODIAPHRAGMATIC, adj. Hi-po-di-a3-fra2g-ma2t'i2k. From ὑπό, under, and διάφραγμα, the diaphragm. Ger., *hypodiaphragmatisch.* Situated beneath the diaphragm. [A, 528.]

HYPODICARPÆ (Lat.), n. f. pl. Hip(hu6p)-o(o2)-di(di2)-ka3rp'e(a3-e2). From ὑπό, under, δίς, through, and καρπός, a fruit. Of Agardh, a class of the dicotyledons, comprising the *Rubiaceæ, Caprifolieæ, Loranthaceæ*, etc. [B, 121 (a, 35).]

HYPODICROTOUS, adj. Hi-po-di2k'ro2t-u3s. From ὑπό, short of, and δίκροτος, double-beating. Slightly or barely dicrotous (said of the pulse).

HYPODRYS (Lat.), n. m. Hip(hu6p)'o(o2)-dri2s(dru6s). Gen., *-ry'os (-is).* From ὑπό, under, and δρῦς, a tree. 1. A genus of *Fungi.* 2. The *Boletus hepaticus.* [B, 88 (a, 39), 173 (a, 24).]—**H. buglossoides, H. hepaticus.** The *Fistulina buglossoides.* [B, 173 (a. 24).]

HYPODYMA (Lat.), n. n. Hip(hu6p)-o2d'i2m(u6m)-a3. Gen., *-ym'atos (-atis).* Gr., ὑπόδυμα. Of Cælius Aurelianus, the pleura and mediastinum. [L, 50 (a, 14).]

HYPODYNAMIC, adj. Hip-o-di2n-a2m'i2k. Lat., *hypodynamicus* (from ὑπο, short of, and δυναμικός, efficacious). See Adynamic.

HYPODYNIA (Lat.), n. f. Hip(hu6p)-o(o2)-di2n(du6n)'i2-a3. From ὑπό, a little, and ὀδύνη, pain. Slight pain. [L, 50 (a, 14).]

HYPO-ECTASIA (Lat.), n. f. Hi(hu6)-po(po2)-e2k-taz(ta3s)'i2-a3. See Hypectasia.

HYPO-ENTEROPATHIA (Lat.), n. f. Hip(hu6p)-o(o2)-e2n-te2r-o(o3)-pa2th(pa3th)-i(e)'a3. From ὑπό, a little, εντερον, the intestine, and πάθος, disease. Fr., *hypo-entéropathie* [Piorry]. See Enterypopathia.

HYPOESTES (Lat.), n. f. Hip(hu6p)-o(o2)-e2st'ez(as). Gen., *-oest'is.* Of R. Brown, a genus of the *Acanthaceæ*, tribe *Justicieæ.* [B, 42 (a, 24).]—**H. triflora.** A species growing in the mountains of Arabia; used in coughs and in eye diseases. [B, 180 (a, 24).]

HYPOFESSE (Fr.), n. E-po-fe2s. See Hypoglutis.

HYPOFOSFIT (Ger.), n. Hu6-po-fos-fet'. See Hypophosphite.

HYPOGÆAL, HYPOGÆAN, adj's. Hip-o-je'a2l, -a2n. See Hypogæous.

HYPOGÆIC ACID, n. Hip-o-je'i2k. Fr., *acide hypogéique.* Ger., *Hypogäasäure.* A monobasic acid, $C_{16}H_{30}O_2$, occurring in colorless, acicular crystals, soluble in alcohol, less soluble in ether. It is found in peanut (*Arachis hypogæa*) oil, and also in the oil of *Physeter macrocephalus.* [B, 4; B, 46 (a, 39); "Proc. of the Am. Pharm. Assoc.," xvi (a, 14).]

HYPOGÆOCARPUS (Lat.), adj. Hip(hu6p)-o(o2)-je(ga3-e2)-o-(o3)-ka3rp'u3s(u4s). A more correct form of *hypocarpogeus* (*q. v.*).

HYPOGÆOUS, adj. Hip-o-je'u3s. Gr., ὑπόγαιος (from ὑπό, under, and γῆ, the earth. Lat., *hypogæus, hypogeus.* Fr., *hypogé.* Ger., *unterirdisch.* In botany, subterranean. Cf. Geoblastus. The *Hypogæi* (Fr., *hypogées*) are an order of the *Gasteromycetes.* [B, 1, 19, 123 (a, 24).]

HYPOGALA (Lat.), n. n. Hip(hu6p)-o2g'a2l(a3l)-a3. Gen., *-galact'os (-act'is).* From ὑπό, under, and γάλα, milk. Ger., *Milchauge.* An old term for a supposed effusion of a milky fluid into the anterior chamber of the eye. [F.] See Hypopyon.

HYPOGALLIC ACID, n. Hip-o-ga2l'i2k. Fr., *acide hypogallique.* A crystalline acid, $C_7H_6O_4$, produced by distilling hemipinic acid with concentrated hydriodic acid; slightly soluble in cold water, freely soluble in ether and in alcohol. [B, 46 (a, 39).]

HYPOGASTER (Lat.), n. f. Hip(hu6p)-o(o2)-ga2st(ga3st)'u6r-(ar). Gen., *-gast'eros (-is), -gast'ri.* See Hypogastrium.

HYPOGASTRALGIA (Lat.), n. f. Hip(hu6p)-o(o2)-ga2s(ga3s)-tra2l(tra3l)'ji2(gi2)-a3. From ὑπό, short of, γαστήρ, the belly, and ἄλγος, pain. Fr., *hypogastralgie.* Ger., *Unterleibsschmerz.* 1. Pain in the hypogastrium. [L, 50, 107 (a, 14).] 2. See Gastrypalgia.

HYPOGASTRECTASIA (Lat.), **HYPOGASTRECTASIS** (Lat.), n's f. Hip(hu6p)-o(o2)-ga2st(ga3st)-re2k-ta(ta3)'zi2(si2)-a3, -re2k'ta3-si2s. Gen., *-as'iæ, -as'eos (-ec'tasis).* From ὑπό, under, γαστήρ, the belly, and ἔκτασις, a stretching. Fr., *hypogastrectasie.* Ger., *Unterleibsausdehnung.* Distension of the hypogastrium. [L, 50 (a, 14).]

HYPOGASTRIALGIA (Lat.), n. f. Hip(hu6p)-o(o3)-ga2st-(ga3st)-ri2-a2l(a3l)'ji2(gi2)-a3. See Hypogastralgia.

HYPOGASTRIC, adj. Hip-o-ga2st'ri2k. Gr., ὑπογάστριος (from ὑπό, under, and γαστήρ, the stomach). Lat., *hypogastricus.* Fr., *hypogastrique.* Ger., *hypogastrisch.* Of, pertaining to, or situated in the hypogastrium. [C.]

HYPOGASTRION (Lat.), n. n. Hip(hu6p)-o(o2)-ga2st(ga3st)'-ri2-o2n. See Hypogastrium.

HYPOGASTRIORRHEXIS (Lat.), n. f. Hip(hu6p)-o(o2)-ga2st(ga3st)-ri2-o2r-re2x(rax)'i2s. Gen., *-rhex'eos (-rhexis).* See Hypogastrorrhexis.

HYPOGASTRIOTOMY, n. Hip-o-ga2s-tri2-o2t'o-mi2. Lat., *hypogastriotome* (from ὑπογάστριος, hypogastric, and τομή, a cutting). Ger., *Unterbauchschnitt.* The operation of opening the abdomen in the hypogastric region. [L, 50, 107 (a, 14).]

HYPOGASTRITIS (Lat.), n. f. Hip(hu6p)-o(o2)-ga2s(ga3s)-tri-(tre)'ti2s. Gen., *-it'idos (-idis).* From ὑπό, short of, and γαστήρ, the stomach (see also *-itis**). Fr., *hypogastrite.* Of Piorry, slight gastritis. [L, 50, 107 (a, 14).]

HYPOGASTRIUM (Lat.), n. n. Hip(hu6p)-o(o2)-ga2s(ga3s)'-tri2-u3m(u4m). Gr., ὑπογάστριον (from ὑπό, under, and γαστήρ, the stomach). Fr., *hypogastre, bas ventre.* Ger., *Unterbauchgegend.* It., *basso ventre, ipogastrio.* Sp., *hipogastro.* 1. The lower me-

dian portion of the abdomen (see *Hypogastric* REGION). 2. Of Sprengel, see AMPHIGASTRUM.

HYPOGASTRIUS (Lat.), adj. Hip(hu^{6}p)-o(o^2)-ga^{2}s(ga^{3}s)'tri^2-u^{3}s(u^{4}s). Gr., ὑπογάστριος. See HYPOGASTRIC.

HYPOGASTROARCTIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-a^{3}rk'shi^2(ti^2)-a^3. From ὑπό, under, γαστήρ, the stomach, and *arctare*, to constrict. Fr., *hypogastro-arctie* [Piorry]. See GASTRYPOSTENOSIS.

HYPOGASTROCELE (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s(ga^{4}s)-tro(tro^3)-se(ka)'le(la); in Eng., hi-po-ga^{2}s'tro-sel. Gen., *-cel'es*. From ὑπό, under, γαστήρ, the stomach, and κήλη, a tumor. Hernia through the lower part of the linea alba. [E.]

HYPOGASTRODIDYMUS (Lat.), n. m. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-di^{2}d'i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From ὑπό, under, γαστήρ, the stomach, and δίδυμος, twin. Fr., *hypogastrodidyme*. A form of double monstrosity in which the two bodies are joined at the hypogastrium. [L, 41 (*a*, 14).]

HYPOGASTROECTASIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-e^{2}k-ta(ta^3)'zi^2(si^2)-a^3. From ὑπό, short of, γαστήρ, the stomach, and ἔκτασις, a stretching. Fr., *hypogastroëctasie* [Piorry]. See GASTRYPECTASIA.

HYPOGASTROHÆMIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-hem'(ha^3'e^{2}m)-i^2-a^3. From ὑπό, short of, γαστήρ, the stomach, and αἷμα, blood. Fr., *hypogastrohémie* [Piorry]. See GASTRYPORRHAGIA.

HYPOGASTRONERVIA (Lat.), **HYPOGASTRONEURIA** (Lat.), n's. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s(ga^{3}s)-tro(tro^3)-nu^{5}r(ne^{2}r)'vi^2(wi^2)-a^3, -nu^2'ri^2-a^3. From ὑπό, short of, γαστήρ, the stomach, and νεῦρον, a nerve. Fr., *hypogastronervie* [Piorry]. See GASTRYPONEURIA.

HYPOGASTROPATHIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-pa^{2}th(pa^{3}th)-i(e)'a^3. From ὑπό, under, γαστήρ, the stomach, and πάθος, a disease. Fr., *hypogastropathie*. 1. Any disease of the hypogastrium. [A, 322.] 2. Of Piorry, see GASTRYPOPATHIA.

HYPOGASTRORRHAGIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro^{2}r-raj(rag)'i^2-a^3. Fr., *hypogastrorhagie*. See GASTRYPORRHAGIA.

HYPOGASTRORRHEXIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro^{2}r-re^{2}x(rax)'i^{2}s. Gen., *-rhex'eos* (*-is*). From ὑπό, under, γαστήρ, the stomach, and ῥῆξις, a breaking. Ger., *Bauchfellszerreissung*. Rupture of the hypogastrium. [*a*, 14.] Cf. EVENTRATION (1st def.).

HYPOGASTRORRHŒA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro^{2}r-re'(ro^2'e^2)-a^3. Fr., *hypogastrorhée*. See GASTRYPORRHŒA.

HYPOGASTROSTENOSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ga^{2}s-(ga^{3}s)-tro(tro^3)-ste^{2}n-o'si^{2}s. Gen., *-os'eos* (*-os'is*). From ὑπό, under, γαστήρ, the stomach, and στένωσις, stenosis. Fr., *hypogastrosténose*. Ger., *Unterbauchsverengerung* (1st def.). 1. Contraction of the hypogastrium. [L, 50 (*a*, 17).] 2. See GASTRYPOSTENOSIS.

HYPOGÉ (Fr.), adj. E-po-zha. From υπόγαιος, under the earth. 1. See HYPOGÆOUS. 2. As a n., in the f. pl., *h'es*, see HYPOGÆI, under HYPOGÆOUS.

HYPOGEAL, HYPOGEAN, adj's. Hip-o-je'a^{2}l, -je'a^{2}n. See HYPOGÆOUS.

HYPOGEIC ACID, n. Hip-o-je'i^{2}k. See HYPOGÆIC ACID.

HYPOGENESIA (Lat.), n. f. Hi(hu^6)-po(po^2)-je^{2}n(ge^{2}n)-ez(e^{2}s)'-i^2-a^3. From ὑπό, short of, and γένεσις, production. Fr., *hypogénésie*. Malformation by defect. [A, 385, 526.]

HYPOGENESIS (Lat.), n. f. Hi(hu^6)-po(po^2)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-es'eos* (*-gen'esis*). Fr., *hypogénèse*. Insufficient production. [A, 526.]

HYPOGENOUS, adj. Hip-o^{2}j'e^{2}n-u^{3}s. From ὑπό, under, and γένος, a race. Growing beneath. [B, 308 (*a*, 35).]

HYPOGEOCARPOUS, adj. Hip-o-je-o-ka^{3}rp'u^{3}s. See HYPOGÆOCARPUS.

HYPOGEOUS, adj. Hip-o-je'u^{3}s. See HYPOGÆOUS.

HYPOGEUSIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-gu^2'zi^2(si^2)-a^3. From ὑπό, short of, and γεῦσις, the sense of taste. Fr., *hypogéusie*. Ger., *Hyporgeusie*. Diminution of the sense of taste. [Landois (K).]

HYPOGLOBULIE (Fr.), n. E-po-glo-bu^6-le. From ὑπό, short of, and *globulus*, a globule. Deficiency of the red blood-corpuscles. [K.]

HYPOGLOBULIQUE (Fr.), adj. E-po-glo-bu^6-lek. Deficient in blood-corpuscles. [A. Gubler (B, 46).]

HYPOGLOSSA (Lat.), n. n. pl. Hi(hu^6)-po(po^2)-glo^{2}s(glos)'sa^3. See HYPOGLOSSIA.

HYPOGLOSSAL, adj. Hip-o-glo^{2}s'a^{2}l. Gr., ὑπογλώσσιος (from ὑπό, under, and γλῶσσα, the tongue). Lat., *hypoglossus*. Fr., *hypoglosse*. Ger., *h.*, *Unterzungen-*. Situated in, on, or adjacent to the lower part of the tongue. [L, 107.]

HYPOGLOSSE (Fr.), adj. and n. E-po-glos. 1. See HYPOGLOSSAL. 2. See RANULA. 3. The hypoglossal nerve. 4. The *Ruscus hypoglossum*. [B, 121 (*a*, 24).]—**H. moteur.** The motor fibres of the hypoglossus. Also known as the proper fibres of the hypoglossus. [L, 87 (*a*, 29).]—**H. sensible.** The sensory fibres of the hypoglossus. [L, 87 (*a*, 29).]—**H. vaso-moteur.** The vaso-motor fibres of the hypoglossus. [L, 87 (*a*, 29).]

HYPOGLOSSIA (Lat.), n. n. pl. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'-si^2-a^3. An old term for certain medicated globules to be placed beneath the tongue. [L, 50 (*a*, 14).]

HYPOGLOSSIADENITIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glo^{2}s-(glos)-si^2-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὑπό under, γλῶσσα, the tongue, and ἀδήν, a gland (see also *-itis**). Inflammation of the sublingual gland. [*a*, 40.]

HYPOGLOSSIDE (Fr.), n. E-po-glos-sed. See HYPOGLOSSIS.

HYPOGLOSSION (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'si^2-o^{2}n. Gr., ὑπογλώσσιον. The sublingual region. [A, 311.]

HYPOGLOSSIOUS, adj. Hip-o-glo^{2}s'i^2-u^{3}s. See HYPOGLOSSAL.

HYPOGLOSSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'si^{2}s. Gen., *-gloss'idos* (*-idis*). Gr., ὑπογλωσσίς (from ὑπό, under, and γλῶσσα, the tongue). 1. The lower surface of the tongue. 2. See RANULA.

HYPOGLOSSITIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glo^{3}s(glos)-i(e)'-ti^{2}s. Gen., *-it'idos* (*-idis*). Fr., *hypoglossite*. Inflammation beneath the tongue. [A, 385.]

HYPOGLOSSIUM (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'si^2-u^{3}m(u^{4}m). See HYPOGLOSSION.

HYPOGLOSSOCYNANCHE (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)''so(so^3)-si^{2}n(ku^{6}n)-a^{2}n^2(a^{3}n^2)'ke(ch^{2}a). Gen., *-anch'es*. From ὑπό, under, γλῶσσα, the tongue, and κυνάγχη, cynanche. See ANGINA *Ludovici*.

HYPOGLOSSUM (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'-su^{3}m(su^{4}m). Gr., ὑπόγλωσσον (from ὑπό, under, and γλῶσσα, the tongue). 1. See RANULA. 2. A genus of *Algæ*, of the *Florideæ*, in which the thallus assumes the contour of stalked leaves. [B, 167 (*a*, 24).] 2. See RUSCUS *h.*

HYPOGLOSSUS (Lat.), adj. Hip(hu^{6}p)-o(o^2)-glo^{2}s(glos)'su^{3}s-(su^{4}s). Gr., ὑπόγλωσσος (from ὑπό, under, and γλῶσσα, the tongue). See HYPOGLOSSAL; as a n., the hypoglossal nerve. [A, 322.]

HYPOGLOTTIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glo^{2}t(glot)'ti^{2}s. Gen., *-glot'tidos* (*-idis*). Gr., ὑπογλωττίς. Fr., *hypoglottide*. 1. See RANULA. 2. A medicine to be held under the tongue until it is dissolved (see HYPOGLOSSIA). [L, 84.]

HYPOGLUTIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-glu^2(glu)'ti^{2}s. Gen., *-glut'idos* (*-idis*). Gr., ὑπογλουτίς (from ὑπό, under, and γλουτός, the rump). Fr., *hypofesse*. The fleshy prominence at the junction of the buttock and the thigh. [A, 322.]

HYPOGNATHADEN (Lat.), n. m. Hip(hu^{6}p)-o(o^2)-na^{2}th-(gna^{3}th)'a^{2}d(a^{3}d)-e^{2}n(an). Gen., *-ad'enos* (*-enis*). From ὑπό, under, γνάθος, the jaw, and ἀδήν, a gland. The submaxillary gland. [L, 50 (*a*, 14).]

HYPOGNATHADENITIS (Lat.), n. f. Hip(hu^{6}p)-o^{2}g-na^{2}th-(gna^{3}th)-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). Ger., *Unterkinnbackendrüsenentzündung*. Inflammation of the submaxillary gland. [L, 50 (*a*, 14).]

HYPOGNATHOUS, adj. Hip-o^{2}g'nath-u^{3}s. Lat., *hypognathus*. Fr., *hypognathe*. Having the lower mandible longer than the upper. [L, 341 (*a*, 27).]

HYPOGNATHUS (Lat.), adj. Hip(hu^{6}p)-o^{2}g'na^{2}th(na^{3}th)-u^{3}s-(u^{4}s). From ὑπό, under, and γνάθος, the jaw. Fr., *hypognathe*. See HYPOGNATHOUS; as a n., a rare form of double monster, in which a rudimentary head is attached to the inferior maxilla of the principal head. It occurs mostly in calves. [L, 41, 87 (*a*, 39).]

HYPOGONIUM (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-gon(go^{2}n)'i^2-u^{3}m-(u^{4}m). From ὑπό, under, and γεννᾶν, to engender. Fr., *hypogone*. In botany, a membranous part situated beneath the organs of fructification. [B, 38 (*a*, 14); L, 180.]

HYPOGRAPHE (Lat.), n. f. Hip(hu^{6}p)-o^{2}g'ra^{2}f(ra^{3}f)-e(a). Gen., *-graph'es*. From ὑπό, short of, and γραφή, a delineation. In empiricism, an incomplete definition of disease. [L, 50 (*a*, 14).]

HYPOGYNIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-ji^{2}n(gu^{6}n)'i^2-a^3. From ὑπό, under, and γυνή, a woman. Fr., *hypogynie*. The state or condition of being hypogynous; a hypogynous insertion. [B, 1, 104 (*a*, 24).]

HYPOGYNIC, HYPOGYNOUS, adj's. Hip-o-ji^{2}n'i^{2}k, -o^{2}j'-i^{2}n-u^{3}s. Lat., *hypogynus*. Fr., *hypogyne*, *hypogynique*. Ger., *hypogynisch*, *unterweibig*, *bodenständig*. 1. Situated beneath the pistil (said of floral organs). 2. Characterized by an infloration so arranged (said of plants). The *Hypogynæ* of Sachs and others are a division of gamopetalous phanerogams so characterized. [B, 1, 19, 123, 167, 291 (*a*, 24).] Cf. EPIGYNOUS and PERIGYNOUS.

HYPOGYNY, n. Hip-o^{2}j'i^2-ni^2. See HYPOGYNIA.

HYPOHÆMA (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-hem'(ha^3'e^{2}m)-a^3. Gen., *-hæm'atos* (*-atis*). See HYPHÆMA.

HYPOHÆMATOSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-he^{2}m(ha^3-e^{2}m)-a^{2}t(a^{3}t)-o'si^{2}s. Gen., *-os'eos* (*-is*). Fr., *hypo-hématose*. See HYPHÆMATOSIS.

HYPOHÆMIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-hem'(ha^3'e^{2}m)-i^2-a^3. See HYPHÆMIA.

HYPOHÆMIC, adj. Hip-o-he^{2}m'i^{2}k. See HYPHÆMIC.

HYPOHÆMITIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-he^{2}m(ha^3-e^{2}m)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). Fr., *hypohémite*. See HYPHÆMITIS.

HYPOHIDROSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-hi(he)-dro'si^{2}s. Gen., *-os'eos* (*-is*). See HYPHIDROSIS.

HYPO-HYAL, adj. Hip-o-hi'a^{2}l. From ὑπό, under, and ὑώδης, hyoid. Situated beneath the hyoid bone.

HYPOHYDRÆMIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-hi(hu^6)-drem'(dra^3'e^{2}m)-i^2-a^3. From ὑπό, short of, ὕδωρ, water, and αἷμα, blood. Fr., *hypohydrémie* [Piorry]. See ANÆMYDRIA.

HYPOHYPNOSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-hi^{2}p(hu^{6}p)-nos'-i^{2}s. Gen., *-os'eos* (*-is*). See HYPHYPNOSIS.

HYPOIODIC ACID, n. Hip-o-i-o^{2}d'i^{2}k. Iodine tetroxide. [B.]

HYPOKINESIA (Lat.), **HYPOKINESIS** (Lat.), n's f. Hip(hu^{6}p)-o(o^2)-ki^{2}n-e(a)'zi^2(si^2)-a^3, -e(a)'si^{2}s. Gen., *-es'iæ*, *-es'eos* (*-is*). See HYPOCINESIS.

HYPOKINETIC, adj. Hi-po-ki^{2}n-e^{2}t'i^{2}k. See Hypocinetic.

HYPOLAMPROUS, adj. Hi-po-la^{2}mp'ru^{3}s. Lat., *hypolamprus* (from ὑπό, under, and λαμπρός, radiant). Fr., *hypolampre.* Of leaves, shining on the lower surface. [L, 180.]

HYPOLAMPSIA (Lat.), **HYPOLAMPSIS** (Lat.), n's f. Hip(hu^{6}p)-o(o^2)-la^{2}mp(la^{3}mp)'si^2-a^3, -si^{2}s. Gen., *-lamps'iæ, -lamps'eos* (*-lamps'is*). Gr., ὑπόλαμψις (from ὑπό, short of, and λάμψις, a shining). 1. A slight degree of contraction or palpitation of the limbs. 2. Of Hippocrates, the slight lustre of the surface observed in dropsical affections. [L, 50 (α, 14).]

HYPOLEMMAL, adj. Hi-po-le^{2}m'a^{2}l. From ὑπό, under, and λέμμα, a husk. Ger., *H.* Situated on the ental side of a sheath (said of that part of the nerve in a motorial end-plate which is within the sarcolemma). ["Ztschr. f. Biol.," 1884 (J); Kühne, "Ztschr. d. Biol.," 1886, p. 111 (J, 83).]

HYPOLEPSIOMANIA (Lat.), **HYPOLEPSIS** (Lat.), n's f. Hip(hu^{6}p)-o(o^2)-le^{2}p(lap)-si^2-o(o^3)-man(ma^{3}n)'i^2-a^3, -le^{2}p(lap)'si^{2}s. Gen., *-man'iæ, -eps'eos* (*-is*). From ὑπόληψις, a taking up, and μανία, madness. See Monomania.

HYPOLEUCOMATIE (Fr.), n. E-po-lu^5-ko-ma^3-te. From ὑπό, short of, and λεύκωμα, anything whitened. A deficiency of albumin in the tissues or circulating fluids. [A. Gubler (B, 46).]

HYPOLOGIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-loj(lo^{2}g)'i^2-a^3. From ὑπό, short of, and λόγος, understanding. Mental deterioration of the insane in which the understanding is slow, the ideas are incongruous and devoid of proper association, and words are incorrectly used to express them. [α, 40.]

HYPOLYMPHA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-li^{2}m(lu^{6}m)'fa^3. From ὑπό, under, and *lympha*, water. An effusion of plastic lymph into the anterior chamber of the eye. [F.]

HYPOLYMPHIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-li^{2}m(lu^{6}m)'-fi^2-a^3. From ὑπό, short of, and *lympha*, water. Fr., *hypolymphie.* Of Andral, a deficiency of lymph. [L, 50 (α, 14).]

HYPOLYSIS (Lat.), n. f. Hip(hu^{6}p)-o^{2}l'i^2(u^6)-si^{2}s. Gen., *-ys'eos* (*-ol'ysis*). Gr., ὑπόλυσις (from ὑπό, a little, and λύσις, a loosing). Slight paralysis. [L, 50 (α, 14).]

HYPOMANIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-man(ma^{3}n)'i^2-a^3. From ὑπό, a little, and μανία, madness. Of Mendel, a mild form of mania characterized by extravagance, egotism, dissipated habits, and intolerance of correction or reproof, but without furor or hallucinations. [D, 36.]

HYPOMBROUS, adj. Hip-o^{2}m'bru^{3}s. Gr., ὕπομβρος (from ὑπό, a little, and ὄμβρος, a storm). Slightly infiltrated with pus (said of bone). [Galen (A, 325).]

HYPOMELANCHOLIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-me^{2}l-a^{2}n^2(a^{3}n^2)-kol(ch^{2}o^{2}l)'i^2-a^3. From ὑπό, in a slight degree, and μελαγχολία, melancholia. Syn.: *melancholia sine delirio.* Reasoning melancholia; of Spitzka, a form of mania in which the melancholic character is the only discoverable symptom. [D, 36.]

HYPOMENOUS, adj. Hi-po^{2}m'e^{2}n-u^{3}s. Lat., *hypomeneus* (from ὑπό, under, and μένειν, to remain). Fr., *hypomène.* Free; arising from below an organ without adhering to it. [B, 121 (α, 35).]

HYPOMERE, n. Hip'o-mer. From ὑπό, under, and μέρος, a part. Of Van Whyte, the ventral part of a somite in a developing embryo. ["Arch. f. Mikr. Anat.," xxxiii, p. 464 (J).]

HYPOMETROPIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-me^{2}t-rop(ro^{2}p)'-i^2-a^3. From ὑπό, short of, μέτρον, a measure, and ὤψ, vision. Myopia. [L, 107.]

HYPOMIA (Lat.), n. f. Hip(hu^{6}p)-om'i^2-a^3. Gr., ὑπωμία (from ὑπό, under, and ὦμος, the shoulder). The axilla. [L, 50, 84 (α, 14).]

HYPOMNESTIC, adj. Hip-o^{2}m-ne^{2}st'i^{2}k. Gr., ὑπομνηστικός (from ὑπομνεία, memory). Lat., *hypomnesticus.* Pertaining to or serving to aid the memory. [L, 50 (α, 14).]

HYPOMOCHLION (Lat.), **HYPOMOCHLIUM** (Lat.), n's n. Hip(hu^{6}p)-o(o^2)-mok(mo^{2}ch^2)'li^2-o^{2}n, -u^{3}m(u^{4}m). Gr., ὑπομόχλιον (from ὑπό, under, and μοχλίον, a little lever). See Fulcrum.

HYPOMORIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-mo'ri^2-a^3. From ὑπόμωρος, rather stupid. Fr., *hypomorie.* Of Swediaur, a slight form of mental weakness or of delirium. [L, 50, 135 (α, 14).]

HYPOMUQUEUX (Fr.), adj. E-po-mu^6-ku^6. From ὑπό, under, and *mucus*, mucus. See Submucous.

HYPOMYOSTHÉNIE [Piorry] (Fr.), n. E-po-me-os-ta-ne. From ὑπό, short of, μῦς, a muscle, and σθένος, strength. Muscular weakness. [A, 250 (α, 21).]

HYPOMYOTROPHIE [Piorry] (Fr.), n. E-po-me-o-tro-fe. From ὑπό, short of, μῦς, a muscle, and τροφή, nourishment. Muscular atrophy. [L, 82.]

HYPOMYSAROUS, adj. Hip-o-mi^{2}s'a^{2}r-u^{3}s. Gr., ὑπομύσαρος (from ὑπό, a little, and μυσαρός, dirty). Lat., *hypomysaros.* Slightly fœtid. [L, 50 (α, 14).]

HYPOMYXON (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-mi^{2}x(mu^{6}x)'o^{2}n. From ὑπόμυξος, somewhat charged with mucus. 1. A slightly mucous part. 2. A part covered with mucus. [L, 50 (α, 14).]

HYPOMYXOUS, adj. Hip-o-mi^{2}x'u^{3}s. Gr., ὑπόμυξος (from ὑπό, somewhat, and μύξα, phlegm). Lat., *hypomyxus.* See Submucous.

HYPONARTHECIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-na^{3}r-the-(tha)'si^2(ki^2)-a^3. From ὑπό, under, and νάρθηξ, a splint. Fr., *hyponarthécie.* Ger., *Unterschienung.* Of Mayor, a method of treating fractures by suspending the limb on a splint (planchette). [L 50 (α, 14).]

HYPONASTIC, adj. Hip-o-na^{2}st'i^{2}k. Of De Vries, having the quality of hyponasty. [B, 167 (α, 24).]

HYPONASTY, n. Hip'o-na^{2}st-i^2. From ὑπό, under, and ναστός, close-pressed. Fr., *hyponastie.* Ger., *Hyponastie.* A curvature produced by disproportionate growth on the lower side of an extended plant-organ. [B, 167, 291 (α, 24).] Cf. Epinasty.

HYPONÉPHROTROPHIE [Piorry] (Fr.), n. E-po-na-fro-tro-fe. From ὑπό, short of, νεφρός, the kidney, and τροφή, nutrition. Renal atrophy. [L, 82.]

HYPONERVIA (Lat.), **HYPONEURIA** (Lat.), n's f. Hip-(hu^{6}p)-o(o^2)-nu^{5}r(ne^{2}r)'vi^2(wi^2)-a^3, -nu^2'ri^2-a^3. From ὑπό, short of, and νεῦρον, a nerve. Fr., *hyponervie, hyponervismie.* 1. Nervous atony. 2. A partial paralysis. [L, 50, 107 (α, 14).]

HYPONÉVRAXÈMIE [Piorry] (Fr.), n. E-po-na-vra^{3}x-a-me. From ὑπό, short of, νεῦρον, a nerve, *axis*, an axis, and αἷμα, blood. Of Piorry, anæmia of the central nervous system. [L, 82.]

HYPONÉVROSTHESIE [Piorry] (Fr.), n. E-po-na-vro-ste^2-ze. From ὑπό, short of, νεῦρον, a nerve, and θέσις, a placing. Decrease of nervous action. [L, 82.]

HYPONITRIC ACID, n. Hip-o-nit'ri^{2}k. Fr., *acide hypoazotique.* Nitrogen tetroxide, NO_2. [B.]

HYPONITRITE, n. Hip-o-nit'rit. A salt of hyponitrous acids. [B.]

HYPONITROUS, adj. Hip-o-nit'ru^{3}s. Fr., *hyponitreux.* Containing nitrogen combined with less oxygen than in the case of the nitrous compounds. [B.]—**H. acid.** A monobasic acid, HNO, known only through its salts. [B, 3.]

HYPONOETICO-KINETIC, adj. Hip-o-no-e^{2}t''i^{2}k-o-ki^{2}n-e^{2}t'-i^{2}k. From ὑπό, under, νοητικός, understanding, and κινητικός, moving or acting. Of Ferrier, of nerve-centres, functional activity under the dominion of consciousness. [J.]

HYPONOMOS (Lat.), adj. Hip(hu^{6}p)-o^{2}n'o^{2}m-o^{2}s. See Hyponomous.

HYPONOMOUS, adj. Hip-o^{2}n'o-mu^{3}s. Gr., ὑπονομός (from ὑπό, under, and νομός, a pasture). Lat., *hyponomos, hyponomus.* Spreading beneath the surface. [A, 311 (α, 17).]

HYPONOMUS (Lat.), adj. Hip(hu^{6}p)-o^{2}n'o^{2}m-u^{3}s(u^{4}s). See Hyponomous; as a n., an undermining ulcer or fistula. [E.]

HYPONOS (Lat.), **HYPONUS** (Lat.), n's m. Hip(hu^{6}p)'o^{2}n-o^{2}s, -u^{3}s(u^{4}s). From ὑπό, under, and ὄνος, a pulley. Of Hippocrates, an apparatus for making upward extension. [L.]

HYPONYCHIAL, adj. Hip-o^{2}n-i^{2}k'i^2-a^{2}l. From ὑπό, under, and ὄνυξ, the nail. Pertaining to the tissues beneath the nail. [α, 29.]

HYPONYCHION (Lat.), n. n. Hip(hu^{6}p)-o^{2}n-i^{2}k(u^{6}ch^2)'i^2-o^{2}n. From ὑπό, under, and ὀνύχιον, a little nail. Of Ranvier, an embryonic human nail in the state in which it appears to be imbedded in the cuticle. [J, 31.]

HYPONYCHON (Lat.), **HYPONYCHUM** (Lat.), n's n. Hip-(hu^{6}p)-o^{2}n'i^{2}k(u^{6}ch^2)-o^{2}n, -u^{3}m(u^{3}m). A collection of blood or pus under a nail. [L, 30, 50 (α, 14).]

HYPOPATHIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-pa^{2}th(pa^{3}th)-i(e)'a^3. From ὑπό, short of, and πάθος, disease. Ger., *mässiges Leiden.* Any mild disease. [L, 50 (α, 14).]

HYPOPATOS (Lat.), **HYPOPATUS** (Lat.), n's m. Hip-(hu^{6}p)-o^{2}p'a^{2}t(a^{3}t)-o^{2}s, -u^{3}s(u^{4}s). From ὑπό, under, and πατεῖν, to walk. See Apopatos.

HYPOPEDIUM (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-ped(pe^{2}d)'i^2-u^{3}m-(u^{4}m). Fr., *hipopédium.* See Hypopodium (2d def.).

HYPOPERIPSYCHON (Lat.), adj. Hip(hu^{6}p)-o(o^2)-pe^{2}r-i^2-si(psu^6)'ko^{2}n(ch^{2}on). Gr., ὑποπεριψύχων (from ὑποπεριψύχειν, to shiver a little). Becoming or feeling slightly cold. [L, 50 (α, 14).]

HYPOPETALIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-pe^{2}t-al(a^{3}l)'i^2-a^3. Fr., *hypopétalie.* The state of being hypopetalous; in Jussieu's classification, a class containing polypetalous, dicotyledonous plants with hypogynous stamens. [B, 1 (α, 24).]

HYPOPETALOUS, adj. Hip-o-pe^{2}t'a^{2}l-u^{3}s. Lat., *hypopetalus* (from ὑπό, under, and πέταλον, a leaf). Fr., *hypopétalé.* Having the petals inserted below the ovary. [A, 385.]

HYPOPETALY, n. Hip-o-pe^{2}t'a^{2}l-i^2. See Hypopetalia.

HYPOPHACODES (Lat.), adj. Hip(hu^{6}p)-o(o^2)-fa(fa^3)-kod'-ez(as). Gr., ὑποφακώδης (from ὑπό, short of, and φακώδης, lentil-like). Slightly lentil-colored. [Hippocrates (A, 311 [α, 17]).]

HYPOPHÆSTON (Lat.), n. n. Hip(hu^{6}p)-o(o^3)-fe^{2}s'(fa^3'e^{2}s)-to^{2}n. Of Dioscorides, the *Centaurea calcitrapa, Rhamnus oleoides,* and *Salsola tragus.* [B, 121 (α, 35).]

HYPOPHARYNGEAL, adj. Hip-o-fa^{2}r-i^{2}n'je-a^{2}l. From ὑπό, under, and φάρυγξ, the throat. Situated beneath the pharynx. As a n., see *H.* bones.

HYPOPHARYNX (Lat.), n. f. Hip(hu^{6}p)-o^{2}f'a^{2}r(a^{3}r)-i^{2}n^{2}x-(u^{6}n^{2}x). Gen., *-yn'gos* (*-yngis*). In certain insects, a median projection on the internal surface of the lower lip. [L, 353 (α, 39).]

HYPOPHASIA (Lat.), **HYPOPHASIS** (Lat.), n's f. Hip-(hu^{6}p)-o(o^2)-fa(fa^3)'zi^2(si^2)-a^3, -o^{2}f'a^3-si^{2}s. Gen., *-phas'iæ, -phas'eos* (*-is*). Gr., ὑπόφασις (from ὑπό, short of, and φάσις, an appearance). Fr., *hypophase.* Ger., *Hypophasie.* Lit., a being half-seen; an old term for an affection of the eyes in which the white sclera only is seen through the opening of the eyelids, which are sometimes nearly closed. [F.] Cf. Lagophthalmia.

HYPOPHAULOS (Lat.), adj. Hip(hu^{6}p)-o(o^2)-fa^{4}l'(fa^3'u^{4}l)-o^{2}s. Gr., ὑπόφαυλος (from ὑπό, short of, and φαῦλος, low). Of diet, somewhat low. [Hippocrates (A, 311 [α, 17]).]

HYPOPHLEBOARCTIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-fle^{2}b-o(o^3)-a^{3}rk'ti^2-a^3. Fr., *hypophléboarctie* [Piorry]. See Phlebypostenosis.

HYPOPHLEGMASIA (Lat.), n. f. Hip(hu6p)-o(o2)-fle2g-ma(ma3)'zi2(si2)-a3. From ὑπό, short of, and φλεγμασία, phlegmasia. Fr., *hypophlegmasie*. A slight inflammation. [L, 41, 50 (a, 14).]

HYPOPHLEGMATODES (Lat.), adj. Hip(hu6p)-o(o2)-fle2g-ma2t(ma3t)-od'ez(as). Gr., ὑποφλεγματώδης (from ὑπό, slightly, φλέγμα, phlegm, and εἶδος, resemblance). Suffering slightly from phlegm. [Hippocrates (A, 311 [a, 17]).]

HYPOPHLŒODAL, HYPOPHLOEODIC, HYPOPHLŒOUS, adj's. Hip-o-fle-od'a2l, -i2k, -fle'u3s. Lat., *hypophlœodes* (from ὑπό, under, φλοιός, the inner bark of trees, and εἶδος, resemblance). Fr., *hypophléode*. Ger., *unterrindig*. Living in the periderm (said of certain lichens). [B, 123 (a, 24).]

HYPOPHŒSTUM (Lat.), n. n. Hip(hu6p)-o(o2)-fe2st'(fo2'e2st)-u3m(u4m). See HYPOPHÆSTON.

HYPOPHONESIS (Lat.), n. f. Hip(hu6p)-o(o2)-fon-e(a)'si2s. Gr., ὑποφώνησις (from ὑπό, under, and φωνή, the voice). Phonation, use of the voice. [D.]

HYPOPHORA (Lat.), n. f. Hip(hu6p)-o2f'o2r-a3. Gr., ὑποφορά (from ὑποφέρειν, to carry away under). Ger., *Hohlgeschwür* (1st def.), *Fistel* (1st def.). 1. A fistulous ulcer. [E.] 2. Of Hippocrates, a purging. [A, 311 (a, 17).]

HYPOPHOROS (Lat.), adj. Hip(hu6p)-o2f'o2r-o2s. Gr., ὑπόφορος. Fistulous. [Galen (A, 311 [a, 17]).]

HYPOPHOSPHATE, n. Hip-o-fo2s'fat. A salt of hypophosphoric acid. [L, 41, 56 (a, 14).]

HYPOPHOSPHIS (Lat.), n. m. Hip(hu6p)-o(o2)-fo2s'fi2s. Gen., *-phos'phitis*. See HYPOPHOSPHITE.—**H. calcicus** [Fr. Cod.]. See CALCIUM *hypophosphite*.—**H. ferricus**. Ferric hypophosphite. [B.]—**H. kalicus**. See *H. potassicus*.—**H. natricus** [Netherl. Ph.]. See SODIUM *hypophosphite*.—**H. potassicus**. Potassium hypophosphite. [B.]—**H. sodicus** [Fr. Cod.]. Sodium hypophosphite. [B.]—**Syrupus cum hypophosphite calcico** [Fr. Cod.]. See *Sirop d'hypophosphite de* SOUDE.—**Syrupus hypophosphitum** [U. S. Ph.]. A preparation made up of 35 parts of calcium hypophosphite, 12 each of potassium hypophosphite and sodium hypophosphite, 1 part of citric acid, 2 parts of spirit of lemon, 500 of sugar, and water up to 1,000 parts. [B.]—**Syrupus hypophosphitum cum ferro** [U. S. Ph.]. A preparation consisting of 1 part of iron lactate and 99 parts of syrupus hypophosphitum. [B.]

HYPOPHOSPHITE, n. Hip-o-fo2s'fit. Lat., *hypophosphis*. Fr., *h*. Ger., *Hypophosphit*. A salt of hypophosphorous acid. [B.]—**Syrup of hypophosphites** [U. S. Ph.]. See *Syrupus* HYPOPHOSPHITUM.—**Syrup of hypophosphites with iron** [U. S. Ph.]. See *Syrupus* HYPOPHOSPHITUM *cum ferro*.

HYPOPHOSPHOREUX (Fr.), adj. E-po-fos-fo-ru8. Hypophosphorous. [B.]

HYPOPHOSPHOROSUS (Lat.), adj. Hip(hu6p)-o(o2)-fo2s(fos)-fo2r-os'u3s(u4s). Hypophosphorous; containing hypophosphorous acid; with the name of a base, the hypophosphite of that base. [B.]

HYPOPHOSPHOROUS, adj. Hip-o-fo2s'fo2r-u3s. Lat., *hypophosphorosus*. Fr., *hypophosphoreux*. Ger., *unterphosphorig*. Containing phosphorus combined with a less amount of oxygen than occurs in the phosphorous compounds. [B.]—**H. acid**. Lat., *acidum hypophosphorosum*. Fr., *acide hypophosphoreux*. Ger., *Unterphosphorigsäure*. A monobasic acid, $H_3PO_2 = PH(OH)_2$, a white crystalline substance melting at 17·4° C. to a strongly acid, syrupy liquid. It forms a series of salts called hypophosphites. According to Savitsch and Buchheim, it acts therapeutically like phosphorous acid. [B, 3; Bernatzik (A, 319).]

HYPOPHRASIA (Lat.), n. f. Hip(hu6p)-o(o2)-fra(fra3)'zi2(si2)-a3. From ὑπό, under, and φράσις, speech. 1. Quietude and unwillingness to speak in melancholia. [a, 40.] 2. Progressive loss of control over the power of speech seen in general paresis. [a, 40.]

HYPOPHRAXIA (Lat.), n. f. Hip(hu6p)-o(o2)-fra2x(fra3x)'-i2-a3. From ὑποφράττειν, to block up. Inactivity and inclination to sit or lie in one position for a long time, as seen in melancholia. [a, 40.]

HYPOPHRENIC, adj. Hip-o-fre2n'i2k. From ὑπό, under, and φρήν, the diaphragm. Ger., *hypophrenisch*. Situated under the diaphragm. [A, 528.]

HYPOPHTHALMIA (Lat.), n. f. Hip(hu6p)-o2f-tha2l(tha3l)'-mi2-a3. From ὑποφθάλμιος, under the eyes. Fr., *hypophthalmie*. Ger., *Hypophthalmie*. An old term for hypopyon. [F.]

HYPOPHTHALMION (Lat.), n. n. Hip(hu6p)-o2f-tha2l(tha3l)'-mi2-o2n. From ὑποφθάλμιος, under the eyes. Of the old writers, including Hippocrates, the parts under the eye where œdema generally begins in some chronic diseases and in cachexiæ. [F.]

HYPOPHYLLIUM (Lat.), n. n. Hip(hu6p)-o(o2)-fi2l(fu6l)'li2-u3m(u4m). From ὑπό, short of, and φύλλον, a leaf. An abortive leaf or scale growing under another leaf. [B, 19, 215 (a, 24).]

HYPOPHYLLOCARPOUS, adj. Hip-o-fi2l-o-ka2rp'u3s. Lat., *hypophyllus* (from ὑπό, under, φύλλον, a leaf, and καρπός, a fruit). Having the fruit beneath, or on the under surface of, the leaf. The *Hypophyllocarpa* of Luhneman are the ferns. The *Hypophyllocarpi* of Bridel are his 6th class of mosses, distinguished by the sheathed fruit (*fructus vaginulatus*) arising beneath an accessory leaf or tegmen, and the *Hypophyllocarpia* of Reichenbach (the *Hypophyllocarpiæ* of Schultz) are a division of bryaceous mosses also thus characterized. [B, 1, 19, 121, 170, 291 (a, 35).]

HYPOPHYLLOUS, adj. Hip-o-fi2l'u3s. Lat., *hypophyllus* (from ὑπό, under, and φύλλον, a leaf). Disposed or growing upon the lower aspect of a leaf. [B, 7; B, 19, 123 (a, 24).]

HYPOPHYLLUM (Lat.), n. n. Hip(hu6p)-o(o2)-fi2l(fu6l)'lu3m-(lu4m). From ὑπό, under, and φύλλον, a leaf. See AGARICUS.—**H. anguinum**. See AGARICUS *viperinus*.—**H. aromaticum**. See AGARICUS *albellus*.—**H. aureo-sulfureum**. See AGARICUS *bufonius*.—**H. citrino-album**. See AGARICUS *mappa*.—**H. citrinum**. See AGARICUS *sulfureus*.—**H. corvinum**. See AGARICUS *umbratilis*.—**H. cucullatum**. See AGARICUS *coccola*.—**H. equisetum**. See AGARICUS *campestris*.—**H. globoso-cameratum**. See AGARICUS *procerus*.—**H. globosum**. See AGARICUS *campestris*.—**H. ianthinum**. See AGARICUS *nudus*.—**H. lactiferum**. The *Lactarius volemum*. [B, 105.]—**H. lateritium**. See AGARICUS *fascicularis*.—**H. latum**. See AGARICUS *vaginatus*.—**H. margantiferum**. See AGARICUS *pantherinus* and AGARICUS *spissus*.—**H. odoratum**. The *Marasmius oreades*. [B, 105.]—**H. palumbinum**. See AGARICUS *amethystinus* (1st def.).—**H. polymyces**. See AGARICUS *melleus*.—**H. provinciale**. See AGARICUS *scruposus*.—**H. prunulum**. See AGARICUS *graveolens*.—**H. ruthense**. See AGARICUS *fascicularis*.—**H. sulfuratum**. According to some, the *Agaricus fascicularis*; according to others, a variety of the latter. [B, 105; B, 173 (a, 24).] Cf. AGARICUS *sulfureus*.—**H. testudo**. See AGARICUS *brevipes*.—**H. torminosum**. See LACTARIUS *torminosus*.—**H. tricuspidatum**. See AGARICUS *echinocephalus*.—**H. ulmicola**. See AGARICUS *ulmarius*.—**H. umbilicatum**. See AGARICUS *leucocephalus*.—**H. vinosum**. See AGARICUS *rubescens* (1st def.).—**H. zonatum**. See LACTARIUS *torminosus*.

HYPOPHYLLUS (Lat.), adj. Hip(hu6p)-o(o2)-fi2l(fu6l)'lu3s(lu4s). See HYPOPHYLLOUS.

HYPOPHYSE (Fr., Ger.), n. E-po-fez, hu6p-o-fu6'ze2. See HYPOPHYSIS.—**H. pituitaire** (Fr.). See HYPOPHYSIS *cerebri*.

HYPOPHYSIS (Lat.), n. f. Hip(hu6p)-o2f'i2(u6)-si2s. Gen., *-ys'eos* (*-oph'ysis*). Gr., ὑπόφυσις (from ὑπό, under, and φύσις, a growing). Fr., *hypophyse*. Ger., *H.*, *Hypophyse*. Lit., an undergrowth. 1. Of Galen, a process (in the anatomical sense). [A, 311 (a, 17).] 2. An old term for cataract. [F.] 3. Of Wilder, the h. cerebri. [K.] 4. Of Hanstein, the cell and cellular tissue from which the radicle of the embryo is formed in angeiosperms and gymnosperms. It is usually the lowest cell of the suspensor. [B, 77, 167 (a, 24).]—**H. cerebralis, H. cerebri, H. diencephali** [Spitzka]. Fr., *hypophyse pituitaire*. Ger., *Hirnanhang*. Syn.: *glandula*. The pituitary body, sac, or gland; a small ellipsoid projection caudad of the optic chiasm, resting on the sella turcica, and continuous by the infundibulum with the tubercinereum. It consists of an anterior and posterior lobe. The former prehypophysis is the larger; it is originally developed from the ectoderm of the mouth, and consists histologically of convoluted tubules lined with epithelium, numerous blood-vessels, and frequently vesicles which result from the obliteration of the tubes. The posterior lobe (posthypophysis, the *lobus infundibuli* of the lower animals) is an outgrowth from the embryonic diencephalon ventricle. It consists of connective tissue inclosing pigmented cells, with but few traces of nerve-substance in man. [I, 15 (K).]

HYPOPICROTOXIC ACID, n. Hip-o-pi2k-ro-to2x'i2k. From ὑπό, under, πικρός, bitter, and τοξικόν, a poison. Fr., *acide hypopicrotoxique*. Ger., *Hypopikrotoxinsäure*, *Unterpikrotoxinsäure*. An acid, $C_{11}H_{13}O_4$, obtained from the fruit of *Anamirta cocculus*; a brown, tough, amorphous substance, softening without dissolving in water and in ether, soluble in alkalies. [B, 48 (a, 14).]

HYPOPION (Lat.), n. n. Hip(hu6p)-op'i2-o2n. Gr., ὑπώπιον (from ὑπό, under, and ὤψ, the eye). 1. Of Hippocrates, the part of the face below the eye. 2. Of Galen, a subocular bloody effusion or suggillation; an ecchymosis of the lower lid. 3. An erroneous spelling of *hypopyon*. [L, 58, 84 (a, 14); J. Tweedy, "Lancet," Jan. 9, 1886, p. 85.]

HYPOPITYS (Lat.), n. f. Hip(hu6p)-o2p'i2t-i2s(u6s). Gen., *-pit'yos* (*-yis*). From ὑπό, under, and πίτυς, the pine-tree. Fr., *h*. Ger., *Fichtenspargel*. A small genus of fir-rapes parasitic on firs and beeches. [B, 19, 38, 42, 48 (a, 24).]—**H. lanuginosa**. False beech-drops, pine-sap, bird's-nest; a species found in North America and Europe, often having the odor of musk. In Europe it is sometimes used as a remedy for cough in sheep. [B, 19, 34, 104, 275 (a, 24).]

HYPOPIUM (Lat.), n. n. Hip(hu6p)-op'i2-u3m(u4m). See HYPOPION.

HYPOPLASIA [Virchow] (Lat.), n. f. Hip(hu6p)-o(o2)-pla(pla3)'-zi2(si2)-a3. From ὑπό, short of, and πλάσσειν, to mold. Fr., *hypoplasie*. Ger., *Hypoplasie*. 1. A deficient formation of tissue. 2. Incomplete (arrested) development of an organ in respect to size and weight. [A, 326 (a, 21); a, 18.] Cf. HYPERPLASIA.

HYPOPLASMA (Lat.), n. n. Hip(hu6p)-o(o2)-pla2z(pla3s)'ma3. Gen., *-plas'matos* (*-atis*). From ὑπό, short of, and πλάσμα, formed matter. See HYPINOSIS.

HYPOPLASTÉMIE (Fr.), **HYPOPLASTICÉMIE** (Fr.), n's. E-po-pla3s-ta-me, -pla3s-te-sa-me. From ὑπό, short of, πλάσσειν, to mold, and αἷμα, blood. Of Piorry, a state of diminished plasticity of the blood. [A, 250 (a, 21).]

HYPOPLASTRON (Lat.), n. n. Hip(hu6p)-o(o2)-pla2s(pla3s)'-tro2n. From ὑπό, under, and πλάσσειν, to mold. The third lateral membrane-bone of the thoracico-abdominal structure of the *Chelonia*. [L, 11 (a, 27).]

HYPOPLASTY, n. Hip'o-pla2st-i2. From ὑπό, short of, and πλάσσειν, to mold. Fr., *hypoplastie*. A state of diminished formative activity. [A, 385.]

HYPOPLEURIOS (Lat.), **HYPOPLEURIUS** (Lat.), adj's. Hip(hu6p)-o(o2)-plu3'ri2-o2s, -u3s(u4s). From ὑπό, under, and πλευρά, a rib. 1. Placed beneath the ribs, subcostal. 2. As n's, *hypoplurion*, *hypopleurium*, of Galen, the pleura. [L, 50, 84 (a, 14).]

HYPOPNOIC, adj. Hip-o2p-no'i2k. Lat., *hypopnoicus* (from ὑπό, short of, and πνεῖν, to breathe). Producing diaphoresis. [B.]

HYPOPODION (Lat.), **HYPOPODIUM** (Lat.), n's n. Hip(hu6p)-o(o2)-pod(po2d)'i2-o2n, -u3m(u4m). Gr., ὑποπόδιον (from ὑπό,

under, and πούς, the foot). 1. The foot-rest of a surgical apparatus, especially of a hanging apparatus for fractures of the leg. 2. A cataplasm or other remedy to be applied to the sole of the foot. [L, 50 (α, 14).] 3. The stalk of the carpels. [B, 19 (α, 24).]

HYPOPSAPHAROUS, adj. Hip-o-sa^{2}f'a^{2}r-u^{3}s. Gr., ὑποψάφαρος (from ὑπό, short of, and ψαφαρός, rough). Somewhat dry and rough. [L, 50 (α, 14).]

HYPOPSARAPHONE (Lat.), n. f. Hip(hu^{6}p)-o^{2}p-sa^{2}r(sa^{3}r)-a^{2}f(a^{3}f)-on'e(a). Gen., *-phon'es.* From ὑπό, somewhat, ψαφαρός, rough, and φωνή, the voice. A dry, harsh, somewhat hoarse voice. [L, 50 (α, 14).]

HYPOPSATHYROS (Lat.), adj. Hip(hu^{6}p)-o^{2}p-sa^{2}th(sa^{3}th)'-i^{2}r(u^{6}r)-o^{2}s. Gr., ὑποψάθυρος (from ὑπό, somewhat, and ψαθυρός, friable). Somewhat crumbling or friable. [Hippocrates (A, 311 [α, 17]).]

HYPOPSELAPHESIA (Lat.), **HYPOPSELAPHESIS** (Lat.), n's f. Hip(hu^{6}p)-o^{2}p-se^{2}l(sal)-a^3-fez(fas)'i^2-a^3, -i^{2}s. Gen., *phes'iæ, -phes'eos (-is).* From ὑπό, somewhat, and ψηλάφησις, a handling or tickling. Fr., *hypopsélaphésie.* Ger., *Hypopselaphesie.* Impaired tactile sensibility. [A, 528.]

HYPOPSOPHESIS (Lat.), n. f. Hip(hu^{6}p)-o^{2}p-so^{2}f-e(a)'si^{2}s. Gen., *-es'eos (-is).* From ὑποψοφεῖν, to make a slight noise. Of Hippocrates, the noise made by liquids passing through the œsophagus. [L, 50 (α, 14).]

HYPOPSYCHISMIE [Piorry] (Fr.), n. E-po-se-kez-me. From ὑπό, short of, and ψυχή, the soul. A state of diminished intelligence. [A, 250 (α, 21).]—**H. étiohypémique** [Piorry]. Dementia due to hyphæmia. [A, 250 (α, 21).]—**H. gérontique** [Piorry]. Senile dementia. [A, 250 (α, 21).]

HYPOPTERATE, adj. Hip-o^{2}p'te^{2}r-at. Lat., *hypopteratus* (from ὑπό, under, and πτερόν, a wing.) Fr., *hypoptéré.* In botany, having a wing at the base. [B, 1, 19 (α, 24).]

HYPOPTERIES (Lat.), n. m. Hip(hu^{6}p)-o^{2}p-te(te^2)'ri^2-ez(as). Gen., *-pter'idos (-idis).* From ὑπό, under, and πτερόν, a wing. Fr., *hypoptérié.* A membranous expansion or wing growing from below any plant-organ, as in the seed of the fir-tree. [B, 1, 19 (α, 24).]

HYPOPTERUM (Lat.), n. n. Hip(hu^{6}p)-o^{2}pt'e^{2}r-u^{3}m(u^{4}m). From ὑπό, under, and πτερόν, a wing. Of Audouin, the parapterum of hexapodous insects. [α, 39.]

HYPOPTILUM (Lat.), n. n. Hi^{2}p(hu^{6}p)-o^{2}pt'i^{2}l-u^{3}m(u^{4}m). The supplementary or accessory plume springing from the barrel of a main feather. It is wanting in many families of birds, and always on the quills of the wings and tail. [L, 343.]

HYPOPTYALISMUS (Lat.), n. m. Hi^{2}p(hu^{6}p)-o(o^2)-ti(ptu^6)-a^{2}l(a^{3}l)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From ὑπό, falling short of, and πτυαλισμός, a spitting much. A slight degree of ptyalism, such as is seen in some persons after a single dose of calomel. It rapidly disappears. [α, 40.]

HYPOPTYCHTHEIS (Lat.), adj. Hip(hu^{6}p)-o^{2}p-ti^{2}k(tu^{6}ch^2)'-this(the^2-i^{2}s). Gr., ὑποπτυχθείς (from ὑποπτύσσειν, to wrinkle slightly). Corrugated. [Hippocrates (A, 311, 325).]

HYPOPYGIUM (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-pi^{2}j(pu^{6}g)'i^2-u^{3}m-(u^{4}m). From ὑπό, under, and πυγή, the rump. Of Kirby, the last ventral segment of the abdomen in insects. [L, 180 (α, 39).]

HYPOPYON (Lat.), n. n. Hip(hu^{6}p)-op(o^{2}p)'i^2(u^6)-o^{2}n. Gr., ὑπόπυον (from ὑπό, under, and πύον, pus). Fr., *h.* Ger., *H., Eiterauge.* It., *ipopio.* Sp., *hipopión.* 1. Of Hippocrates, a purulent infiltration. 2. Of Galen, a collection of pus in the eye. 3. Of some later writers, an incorrect term for onyx (pus in the cornea) and for a collection of pus in the posterior chamber. 4. Properly, a collection of pus in the anterior chamber of the eye, derived from suppuration in the cornea, the iris, or the ciliary body. [A, 326 (α, 21); J. Tweedy, "Lancet," Jan. 9, 1886, p. 85 (α, 17); F.]—**H. intermittens.** A periodic h. due to malaria. [A, 319 (α, 40).]

HYPOPYOUS, adj. Hip-o'pi^2-u^{3}s. Gr., ὑπόπυος. 1. Suppurating; tending to suppuration. 2. Mixed with pus. [Hippocrates, Galen (A, 311 [α, 17]); L, 50 (α, 14).]

HYPOPYRRHOUS, adj. Hip-o-pi^{2}r'ru^{3}s. Lat., *hypopyrrhus* (from ὑπό, somewhat, and πυῤῥός, flame-colored). Having the sides flame-colored, as in the *Ampelis hypopyrra,* whose flanks are reddish-orange in color. [L, 180 (α, 39).]

HYPOPYUM (Lat.), n. n. Hip(hu^{6}p)-o^{2}p'i^2(u^6)-u^{3}m(u^{4}m). See Hypopyon.

HYPOQUEBRACHINE, n. Hip-o-kwe^2-bra^{2}ch'en. Lat., *hypoquebrachina.* Fr., *h., hypoquébrachine.* An alkaloid, $C_{21}H_{26}N_2O_2$, found in white quebracho-bark; a yellowish, varnish-like substance, melting at about 80° C., freely soluble in alcohol, in ether, and in chloroform, nearly insoluble in water. [B, 93 (α, 14); Harnack and Hoffmann, "Ztschr. f. kl. Med.," viii, 6, 1884; "Gaz. hebd. de méd. et de chir.," Feb. 13, 1885, p. 113; Hesse, "Ann. d. Chem.," ccxi; "Pharm. Jour. and Trans.," Mar. 25, 1882, p. 781; "Am. Jour. of Pharm.," July, 1882, p. 366.]

HYPORADIUS (Lat.), n. m. Hip(hu^{6}p)-o(o^2)-rad(ra^{3}d)'i^2-u^{3}s-(u^{4}s). From ὑπό, under, and *radius* (*q. v.*). One of the barbs of the hypoptilum. [L, 343.]

HYPORISMA (Lat.), n. n. Hip(hu^{6}p)-o^{2}r-i^{2}z(i^{2}s)'ma^3. Gen., *-is'matos (-atis).* See Aneurysm.

HYPORRHACHIS (Lat.), n. f. Hip(hu^{6}p)-o^{2}r'ra^{2}k(ra^{3}ch^2)-i^{2}s. Gen., *-rhach'ios (-is).* Gr., ὑπόῤῥαχις (from ὑπό, under, and ῥάχις, the back). 1. Of Pollux, the hollow of the back above the hips. [A, 311 (α, 17).] 2. The aftershaft, stem, or scape of a supplementary plume. 3. As generally, but less correctly, used, the hypoptilum (*q. v.*). [L, 343.]

HYPORRHAGIA (Lat.), n. f. Hip(hu^{6}p)-o^{2}r-raj(ra^{3}g)'i^2-a^3. From ὑπό, under, and ῥηγνύναι, to burst forth. 1. A bursting forth of any fluid from beneath. 2. Hyphæmorrhagia. [L, 50 (α, 14).]

HYPORRHINION (Lat.), **HYPORRHINIUM** (Lat.), n's n. Hip(hu^{6}p)-o^{2}r-ri^{2}n(ren)'i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., ὑποῤῥίνιον (from ὑπό, under, and ῥίς, the nose). 1. Of Hippocrates, the region immediately under the nose. 2. Of Pollux, the mustache. [A, 311 (α, 17).]

HYPORRHINOS (Lat.), **HYPORRHINUS** (Lat.), adj's. Hip-(hu^{6}p)-o^{2}r-rin(ren)'o^{2}s, -u^{3}s(u^{4}s). Gr., ὑπόῤῥινος. 1. Under the nose. 2. Speaking through the nose; as a n., a person so speaking. [L, 50 (α, 14).]

HYPORRHODII (Lat.), n. m. pl. Hip(hu^{6}p)-o^{2}r-rod(ro^{2}d)'i^2-i-(e). From ὑπό, under, and ῥόδον, a rose. See under Agaricus (Series B).

HYPORRHŒA (Lat.), n. f. Hip(hu^{6}p)-o^{2}r-re'(ro^2'e^2)-a^3. Gr., ὑπόῤῥοια (from ὑπό, short of, and ῥεῖν, to flow). A slight discharge. [L, 50 (α, 14).]

HYPORRHOUS (Lat.), n. m. Hip(hu^{6}p)-o^{2}r'ro(ro^2)-u^{3}s(u^{4}s). Gr., ὑπόῤῥοος (from ὑπό, under, and ῥεῖν, to flow). A channel for the escape of water used in fomentations. [Hippocrates (A, 311 (α, 17).]

HYPORRHYSIS (Lat.), n. f. Hip(hu^{6}p)-o^{2}r'ri^2(ru^6)-si^{2}s. Gen., *-rhys'eos (-or'rhysis).* Gr., ὑπόῤῥυσις (from ὑπό, under, and ῥεῖν, to flow). 1. Of Hippocrates, a falling away of flesh. [A, 311 (α, 17).] 2. See Prolapsus. 3. A slight flowing down; a slight prolapse. [L, 50 (α, 14).]

HYPOSALPETERSÄURE (Ger.), n. Hu^6-po-sa^{3}l-pat'e^{2}r-zoir-e^2. Nitrogen tetroxide.

HYPOSAPROUS, adj. Hip-o-sa^{2}p'ru^{3}s. Gr., ὑπόσαπρος (from ὑπό, somewhat, and σαπρός, putrid). Lat., *hyposapros, hyposaprus.* Putrescent. [Hippocrates (A, 311 [α, 17]).]

HYPOSARCA (Lat.), n. f. Hip(hu^{6}p)-o(o^3)-sa^{3}rk'a^3. From ὑπό, under, and σάρξ, flesh. Fr., *hyposarque.* Ger., *H.* 1. See Anasarca. 2. A collection of fluid beneath a muscle or between two muscles. [L, 50 (α, 14).]—**H. aqua interca.** See Anasarca.

HYPOSARCIDIOUS, adj. Hip-o-sa^{3}r-si^{2}d'i^2-u^{3}s. Gr., ὑποσαρκίδιος (from ὑπό, under, and σάρξ, flesh). Lat., *hyposarcidios.* Situated under the flesh or skin. [L, 50 (α, 14).]

HYPOSARCIDIUM (Lat.), n. Hip(hu^{6}p)-o(o^2)-sa^{3}r-si^{2}d(ki^{2}d)'-i^2-u^{3}m(u^{4}m). See Anasarca.

HYPOSARCOSIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-sa^{3}rk-o'si^{2}s. Gen., *-os'eos (-is).* From ὑπό, somewhat, and σάρκωσις, a fleshy excrescence. Ger., *Fleischwärzchen.* A moderate sarcosis. [L, 50 (α, 14).]

HYPOSATHRIA (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-sa^{2}th(sa^{3}th)'ri^2-a^3. From ὑπό, somewhat, and σαθρός, decayed. See Bletting.

HYPOSCHEOTOMY, n. Hip-o^{2}sk-e^2-o^{2}t'o-mi^2. Lat., *hyposcheotomia* (from ὑπό, under, ὄσχεον, the scrotum, and τομή, a cutting). Fr., *hyposchéotomie.* Ger., *Unterhodensackschnitt.* Daumont's method of puncturing a hydrocele at the bottom of the tunica vaginalis. [E, 24; L, 50 (α, 14).]

HYPOSCLEROUS, adj. Hip-o-skler'u^{3}s. From ὑπό, short of, and σκληρός, hard. Fr., *hyposcléreux.* Rather hard in texture. [A, 385.]

HYPOSEISMA (Lat.), n. n. Hip(hu^{6}p)-o(o^2)-sis'(se^2-i^{2}s')-ma^3. Gen., *-seis'matos (-atis).* Gr., ὑπόσεισμα. Sifted matter. [Galen (A, 311).]

HYPOSEISMUS (Lat.), n. m. Hip(hu^{6}p)-o(o^2)-se(se^2)-i^{2}z(i^{2}s)'-mu^{3}s(mu^{4}s). Gr., ὑποσεισμός (from ὑπό, short of, and σεισμός, a shaking). Slight concussion. [L, 50 (α, 14).]

HYPOSIAGON (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-si(si^2)-a(a^3)'go^{2}n-(gon). Gen., *-ag'onis (-onis).* From ὑπό, under, and σιαγών, the jaw-bone. The inferior maxilla. [L, 50 (α, 14).]

HYPOSIAGONARTHRITIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-si-(si^2)-a^{2}g(a^{3}g)-o^{2}n-a^{3}rth-ri(re)'ti^{2}s. Gen., *-it'idos (-idis).* From ὑπό, under, σιαγών, the jaw-bone, and ἀρθρῖτις, arthritis. Ger., *Unterkiefergelenksentzündung.* Inflammation of the temporo-maxillary articulation. [E.]

HYPOSIALADEN (Lat.), n. m. and f. Hip(hu^{6}p)-o(o^2)-si(si^2)-a^{2}l(a^{3}l)'a^{2}d(a^{3}d)-e^{2}n(an). Gen., *-ad'enos (-enis).* From ὑπό, under, σίαλον, saliva, and ἀδήν, a gland. Ger., *Unterkennbackenspeicheldrüse.* The submaxillary salivary gland. [L, 50 (α, 14).]

HYPOSIALADENITIS (Lat.), n. f. Hip(hu^{6}p)-o(o^2)-si(si^2)-a^{2}l-(a^{3}l)-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* Ger., *Unterkinnbackenspeicheldrüsenentzündung.* Inflammation of the submaxillary salivary gland. [L, 50 (α, 14).]

HYPOSKELETAL, adj. Hip-o-ske^{2}l'e^2-t'l. From ὑπό, under, and σκελετόν, a skeleton. Lying beneath the endoskeleton. [L, 12.]

HYPOSMIA (Lat.), n. f. Hip(hu^{6}p)-o^{2}z(o^{2}s)'mi^2-a^3. From ὑπό, short of, and ὀσμή, the sense of smell. Ger., *Hyposmie.* A state of impaired acuteness of the sense of smell. [A, 319 (α, 21).]

HYPOSPADE (Fr.), n. E-po-spa^{3}d. See Hypospadian.

HYPOSPADIÆOUS, adj. Hip-o-spa^{2}d-i^2-e'u^{3}s. Gr., ὑποσπαδιαῖος. Lat., *hypospadiæos, hypospadiæus.* Affected with hypospadias. [α, 17.]

HYPOSPADIAN, n. Hip-o-spad'i^2-a^{2}n. Lat., *hypospadiæos, hypospadiæus.* Fr., *hypospade.* A person affected with hypospadias. [L, 50 (α, 14).]

HYPOSPADIAS (Lat.), n. m. Hip(hu^{6}p)-o(o^2)-spad(spa^{3}d)'i^2-a^{3}s(a^{3}s). Gr., ὑποσπαδίας (from ὑπό, under, and σπᾶν, to draw). Fr., *h.* Ger., *Hypospadie.* 1. Of Galen, a deformity of the penis in which the glans is retracted in consequence of insufficient length of the frenum. 2. Of Galen and subsequent writers, a congenital deformity of the male urethra characterized by its external opening being situated on the lower surface of the penis or on the scrotum or perinæum. [A, 530; Englisch (A, 319).] 3. In women, a deformity in which more or less of the urethra is lacking, and the urine is dis-

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

charged into the vagina. [A, 326 (α, 21).]—**Balanic h., Glandular h.** Lat., *h. balanalis* (seu *glandis*, seu *glandularis*). Fr., *h. balanique.* A variety in which the opening is situated on the lower aspect of the glans. [Englisch (A, 319 [α, 21]).]—**H. pénien** (Fr.). See *Penile h.*—**Penile h.** Lat., *h. penialis.* Fr., *h. pénien.* A variety in which the opening is situated on the body of the penis.—**Peno-scrotal h.** A variety in which the opening occupies partly the scrotum and partly the penis.—**Perineo-scrotal h.** Lat., *h. perinæo-scrotalis.* A variety in which the opening is partly in the scrotum and partly in the perinæum. [Englisch (A, 319).]—**Perineal h.** Lat., *h. perinæalis.* Fr., *h. périnéal.* A variety in which the opening is in the perinæum. [Englisch (A, 319).]

HYPOSPADIASIS (Lat.), n. f. Hip(hu6p)-o(o2)-spad(spa3d)-i2-a(a3)'si2s. Gen., *-as'eos* (*-as'is*). See HYPOSPADIAS (2d def.).

HYPOSPADIC, adj. Hip-o-spad'i2k. Lat., *hypospadicus.* Pertaining to or affected with hypospadias. [L, 50 (α, 14).]

HYPOSPADICIA (Lat.), n. f. Hip(hu6p)-o(o2)-spa2d(spa3d)-i2s(i2k)'i2-a3. See HYPOSPADIAS.

HYPOSPASM, n. Hip'o-spa2z'm. Lat., *hypospasmus* (from ὑπό, short of, and σπασμός, a spasm). A slight spasm. [L, 50 (α, 14).]

HYPOSPATHISMOS (Lat.), **HYPOSPATHISMUS** (Lat.), n's m. Hip(hu6p)-o(o2)-spa2th(spa3th)-i2z(i2s)'mu3s(mu4s). Gr., ὑποσπαθισμός. Fr., *hypospathisme.* An ancient operation which consisted in making three incisions through the skin of the forehead and passing a spatula under the skin; used in cases of chronic eye-diseases and chronic headache. [A, 530; E, 6, 24; L, 135 (α, 39).]

HYPOSPHAGMA (Lat.), n. n. Hip(hu6p)-o(o2)-sfa2g(sfa3g)'-ma3. Gen., *-sphag'matos* (*-atis*). Gr., ὑπόσφαγμα. Fr., *hyposphagme.* 1. The blood of an animal, mixed with other materials, used as a food. [A, 311.] 2. An extravasation of blood beneath the ocular conjunctiva from rupture of a small blood-vessel. [F.] See under HÆMOPHTHALMIA.

HYPOSPHÉNAL (Fr.), n. E-po-sfa-na3l. From ὑπό, under, and σφήν, a wedge. 1. The pre-sphenoid bone in fishes. 2. The basi-sphenoid bone in fishes and the crocodile. [L, 14.]

HYPOSPHINXIS (Lat.), n. f. Hip(hu6p)-o(o2)-sfi2n2x'i2s. Gen., *-inx'eos* (*-is*). Gr., ὑπόσφιγξις (from ὑπό, under, and σφίγξις, a constriction). Ger., *Umschnürung, Unterbindung.* Subligation. [L, 50 (α, 14).]

HYPOSPLENIC, adj. Hip-o-sple2n'i2k. Gr., ὑπόσπληνος. Lat., *hyposplenicus, hyposplenus.* Affected with a splenic disorder. [L, 50 (α, 14).]

HYPOSPORANGEIUM (Lat.), n. n. Hip(hu6p)-o(o2)-spor-(spo2r)-a2n(a3n2)-ji'(ge2'i2)-u3m(u4m). From ὑπό, under, σπόρος, a seed, and ἀγγεῖον, a vessel. In ferns, the indusium when it is below the spore-cases. [B, 19 (α, 24).]

HYPOSTAMINIA (Lat.), n. f. Hip(hu6p)-o(o2)-sta2m(sta3m)-i2n'i2-a3. Fr., *hypostaminie.* Of Desvaux and of Jussieu, a class of plants comprising the monopetalous dicotyledons having hypogynous stamens. [B, 1 (α, 24).]

HYPOSTAPHYLE (Lat.), **HYPOSTAPHYLITIS** (Lat.), n's f. Hip(hu6p)-o(o2)-sta2f(sta3f)'i2l(u6l)-e(a), -sta2f(sta3f)-i2l(u6l)-i(e)'-ti2s. Gen., *-staph'yles* (*-æ*), *-it'idos* (*-idis*). From ὑπό, under, and σταφυλίς, the uvula. 1. See STAPHYLŒDEMA. 2. Slight staphylitis. [L, 50.]

HYPOSTAS (Lat.), n. m. Hip(hu6p)-o2st'a2s(a3s). Gen., *-stat'is.* See HYPOSTASIS (5th def.).

HYPOSTASIS (Lat.), n. f. Hip(hu6p)-o2st'a3-si2s. Gen., *-as'eos* (*-ost'asis*). Gr., ὑπόστασις (from ὑπό, under, and στάσις, a placing). Fr., *hypostase.* Ger., *Hypostase, Senkungshyperämie* (4th def.). It., *ipostasi.* Sp., *hipostasis.* 1. Of Hippocrates, a suppression of morbid humors (from escape at the surface); an abscess. 2. A sediment, especially a urinary sediment, which falls to the bottom. Cf. ENÆOREMA. 3. A morbid deposit in any part of the body. 4. Venous hyperæmia, due chiefly to the action of gravity. It occurs in places where the tissues are relaxed (*e. g.*, under the skin of the back, in the scrotum, in the posterior and inferior parts of the lungs, at the posterior surface of the kidneys, etc.). 5. In botany, the suspensor of an embryo. [A, 311 (α, 17); B, 1, 19 (α, 24), 117; D, 2, 20, 22.]—**Cadaveric h.** H. (4th def.) occurring in a corpse. [D, 70.]—**H. pulmonum.** See *Pulmonary h.*—**H. urinæ.** See *H.* (2d def.).—**Pulmonary h.** Lat., *h. pulmonum.* Ger., *Lungenhypostase.* Hypostatic congestion of the lungs.

HYPOSTATE. Hip-o2s'tat. Lat., *hypostata* (from ὑπό, under, and ἱστάναι, to stand). Of Dutrochet, a minute cellular process (observed especially in cucurbitaceous and rosaceous plants) originating at the base of the embryo-sac and stretching toward the base of the nucleus; regarded by Lindley as a mere appendage of the embryo-sac and not as a medium of nutrition to the latter, as in many cases it does not reach the base of the nucleus. [Lindley (α, 35).]

HYPOSTATHME (Lat.), n. f. Hip(hu6p)-o(o2)-sta2th(sta3th)'-me(ma). Gen., *-ath'mes* (*-æ*). Gr., ὑποστάθμη. See HYPOSTASIS (2d def.).

HYPOSTATIC, HYPOSTATICAL, adj's. Hip-o-sta2t'i2k, -sta2t'i2-k'l. Gr., ὑποστατικός. Lat., *hypostaticus.* Fr., *hypostatique.* Ger., *hypostatisch.* Pertaining to, or of the nature of, hypostasis. [D.]

HYPOSTEMA (Lat.), n. n. Hip(hu6p)-o(o2)-ste(sta)'ma3. Gen., *-em'atos* (*-atis*). Gr., ὑπόστημα. See HYPOSTASIS (2d def.). [Hippocrates (A, 311 [α, 17]).]

HYPOSTENOMA (Lat.), n. n. Hip(hu6p)-o(o2)-ste2n-o'ma3. Gen., *-om'atos* (*-atis*). From ὑπό, short of, and στένωμα, a narrow place. A state of moderate contraction. [L, 50 (α, 14).]

HYPOSTENOSIS (Lat.), n. f. Hip(hu6p)-o(o2)-ste2n-o'si2s. Gen., *-os'eos* (*-is*). From ὑπό, short of, and στένωσις, a being straightened. The development or course of hypostenoma. [L, 50 (α, 14).]

HYPOSTERNAL, adj. Hip-o-stu6r'n'l. From ὑπό, under, and στέρνον, the sternum. Situated beneath the sternum; as a n., the epihyal bone in fishes. [L, 14.]

HYPOSTERNUM (Lat.), n. n. Hip(hu6p)-o(o2)-stu6rn(ste2rn)'-u3m(u4m). See HYPOPLASTRON.

HYPOSTHENIA (Lat.), n. f. Hip(hu6p)-o(o2)-sthe2n-i(e)'a3. From ὑπό, short of, and σθένος, strength. Fr., *hyposthénie.* Ger., *Hyposthenie.* A state of diminished strength. [L, 41, 50 (α, 14).]

HYPOSTHENIC, adj. Hip-o-sthen'i2k. Lat., *hyposthenicus* (from ὑπό, short of, and σθένος, strength). Fr., *hyposthénique.* 1. Of or pertaining to hyposthenia. [α, 17.] 2. See SEDATIVE.

HYPOSTHENIZANT, adj. Hip-o-sthe2n'i2-z'nt. Fr., *hyposthénisant.* Diminishing the strength. [L, 41 (α, 14).]

HYPOSTOMA (Lat.), n. n. Hip(hu6p)-o2s-to'ma3 (1st def.), -o2s'to2m-a3 (2d def.). Gen., *-om'atos* (*-atis*). From ὑπό, under, and ὀστέον, a bone (1st def.), or ὑπό, beneath, and στόμα, mouth (2d def.). 1. An osseous tumor on the lower side of a bone. [L, 50 (α, 14).] 2. The face of insects, or that part which extends between the eyes and the base of the antennæ; also the upper lip or "labrum" of certain *Crustacea* (*trilobites*) and the distal prolongation of the hydranth which carries the mouth on its summit. [B, 28 (α, 27); L, 180, 193 (α, 39).]

HYPOSTOME, n. Hip'o-stom. See HYPOSTOMA (2d def.).

HYPOSTOSIS (Lat.), n. f. Hip(hu6p)-o2st-o'si2s. Gen., *-os'eos* (*-is*). From ὑπό, under, and ὀστέον, a bone. The development or course of a hypostoma (1st def.). [L, 50 (α, 14).]

HYPOSTROMA (Lat.), n. n. Hip(hu6p)-o(o2)-stro'ma3. Gen., *-om'atos* (*-atis*). From ὑπό, under, and στρῶμα, a mattress. Ger., *Unterlage.* Of Martius, the mycelium of certain *Fungi.* [B, 19, 78, 123 (α, 24).]

HYPOSTROPHE (Lat.), **HYPOSTROPHIA** (Lat.), n's f. Hip(hu6p)-o2st'ro(ro2)-fe(fa), -o2st-ro(ro2)'fi2-a3. Gen., *-ost'rophes, -oph'iæ.* Gr., ὑποστροφή (from ὑπό, under, and στροφή, a turning). 1. Of Hippocrates, a recurrence or relapse. 2. Restlessness, jactitation. 3. Retroversion (as of the uterus). [L, 50, 56 (α, 14).]

HYPOSTROPHIC, adj. Hip-o-strof'i2k. Lat., *hypostrophicus.* Pertaining to hypostrophe. [L, 50 (α, 14).]

HYPOSTRYPHNOS (Lat.), adj. Hip(hu6p)-o(o2)-stri2f(stru6f)'-no2s. Gr., ὑπόστρυφνος (from ὑπό, short of, and στρυφνός, astringent). Mildly astringent. [Hippocrates (A, 311 [α, 17]).]

HYPOSTYPSIS (Lat.), n. f. Hip(hu6p)-o(o2)-sti2p(stu6p)'si2s. Gen., *-yp'seos* (*-is*). Gr., ὑπόστυψις (from ὑπό, short of, and στῦψις, a contracting). Mild astringency. [Theophrastus (A, 311 [α, 17]).]

HYPOSTYPTIC, adj. Hip-o-sti2p'ti2k. Lat., *hypostypticus* (from ὑπό, short of, and στυπτικός, astringent). Slightly astringent. [L, 50 (α, 14).]

HYPOSULFATE (Fr.), n. E-po-su6l-fa3t. See HYPOSULPHATE.

HYPOSULFIS (Lat.), n. m. Hip(hu6p)-o(o2)-su3l(su4l)'fi2s. See HYPOSULPHITE.—**H. sodicus** [Fr. Cod.]. Sodium hyposulphite. [B.]

HYPOSULFUREUX (Fr.), adj. E-po-su6l-fu6-ru6. See HYPOSULPHUROUS.

HYPOSULFURIQUE (Fr.), adj. E-po-su6l-fu6-rek. Hyposulphuric. [α, 14.]

HYPOSULFUROSUS (Lat.), adj. Hip(hu6p)-o(o2)-su3l(su4l)-fu2(fu4)-ros'u3s(u4s). Hyposulphurous; with the name of a base the hyposulphite (thiosulphate) of the base. [B.]

HYPOSULPHANTIMONITE, n. Hip-o-su3lf-a2n-ti2m'o2n-it. Fr., *hyposulfantimonite.* A thioantimonite. [B, 98, 142.]

HYPOSULPHARSENIOUS (Lat.), adj. Hip-o-su3lf-a3r-se2n'-i2-u3s. Containing arsenic combined directly with 2 atoms of sulphur.—**H. acid.** A term improperly applied to arsenic disulphide, As_2S_2, because it combines with basic sulphides to form salts termed *hyposulpharsenites.* [B, 2.]

HYPOSULPHARSENITE, n. Hip-o-su3lf-a3r'se2n-it. Fr., *hyposulfarsénite.* See HYPOTHIOARSENITE.

HYPOSULPHATE, n. Hip-o-su3lf'at. Fr., *hyposulfate.* A salt of hyposulphuric acid. [B, 38 (α, 14).]

HYPOSULPHINDIGOTATE, n. Hip-o-su3lf-i2n-di2g'ot-at. Fr., *hyposulfindigotate.* A salt of hyposulphindigotic acid. [B, 38 (α, 14).]

HYPOSULPHINDIGOTIC ACID, n. Hip-o-su3lf-i2n-di2-go2t'i2k. Fr., *acide hyposulfindigotique* (ou *hyposulfoindigotique*). An amorphous substance, soluble in water, formed, according to Berzelius, along with phœniconsulphuric and sulphindigotic acids by the action of fuming sulphuric acid on indigo. [B, 2.]

HYPOSULPHIS (Lat.), n. m. Hip(hu6p)-o(o2)-su3l(su4l)'fi2s. Gen., *-sulphit'is.* See HYPOSULPHITE.—**H. natricus** [Netherl. Ph., Swed. Ph.]. See SODIUM *thiosulphate.*—**H. sodicus.** See SODIUM *thiosulphate.*

HYPOSULPHITE, n. Hip-o-su3lf'it. Lat., *hyposulphis, hyposulfis.* Fr., *hyposulfite.* Ger., *Hyposulfit.* It., *iposolfito.* Sp., *hiposulfito.* 1. See THIOSULPHATE. 2. One of the salts of true hyposulphurous acid. These h's are very unstable bodies, and decompose readily with the formation of the corresponding thiosulphates. They also form normal hyposulphites, which have the general formula $R'_2(SO_2)$ and $R''(SO_2)$, and acid hyposulphites, whose general formula is $R(HSO_2)n$, where R is a radicle of the quantivalence *n.* [B, 3.]

HYPOSULPHOBENZOIC ACID, n. Hip-o-su3lf-o-be2n-zo'-i2k. Fr., *acide hyposulfobenzoïque.* An acid formed by the action of anhydrous sulphuric acid on benzoic acid. [B, 38 (α, 14).]

HYPOSULPHURIC, adj. Hip-o-su3l-fu2'ri2k. Fr., *hyposulfurique.* Containing sulphur combined with a smaller relative amount of oxygen than occurs in the sulphuric compounds. [B.]—**H. acid.** 1. An old name for dithionic acid. 2. Thiosulphuric acid. [B.]

HYPOSULPHUROUS, adj. Hip-o-su3l'fu2-ru3s. Lat., *hyposulphurosus, hyposulfurosus.* Fr., *hyposulfureux.* Ger., *unterschweflig.* Containing sulphur combined with a smaller relative amount of oxygen than is found in the sulphurous compounds.—**H. acid.** Lat., *acidum hyposulphurosum* (seu *hyposulfurosum*, seu *subsulfurosum*). Fr., *acide hyposulfureux.* Ger., *Unterschwefligsäure.* 1. As commonly used, thiosulphuric acid. 2. Properly, an unstable substance, H_2SO_2, known in aqueous solution. It readily undergoes decomposition with the formation of thiosulphuric acid, and from its strong affinity for oxygen acts as a powerful reducing and bleaching agent. Both acids are dibasic, and form a series of salts called hyposulphites. [B, 3.]

HYPOSYNERGIA (Lat.), n. f. Hip(hu6p)-o(o2)-si2n(su6n)-u6r-(e2r)'ji2(gi2)-a. From ὑπό, short of, and συνεργία, co-operation. Lit., weak co-operation; deficient co-ordination. [L, 50 (α, 14).]

HYPOSYSTOLIE (Fr.), n. E-po-ses-to-le. From ὑπό, short of, and συστολή, systole. A state of weakness of the cardiac systole. [Huchard, "Sem. méd.," July 31, 1889, p. 259 (α, 18).]

HYPOSYSTOLIQUE (Fr.), adj. E-po-ses-to-lek. Pertaining to or affected with hyposystolie.

HYPOTARSUS (Lat.), n. m. Hip(hu6p)-o(o2)-ta3r'su3s(su4s). From ὑπό, under, and ταρσός, the tarsus. In birds, the so-called calcaneum. [L, 296 (α, 39).]

HYPOTASIS (Lat.), n. f. Hip(hu6p)-o2t'a3-si2s. Gen., *-as'eos* (*-ot'asis*). Gr., ὑπότασις (from ὑποτείνειν, to stretch under). Ger., *Unterspannen.* A spreading out beneath, as of a sheet under a sick person. [L, 50 (α, 14).]

HYPOTAURIUM (Lat.), n. n. Hip(hu6p)-o(o2)-ta4'(ta3'u4)-ri2-u3m(u4m). Gr., ὑποταύριον. The perinæum. [L, 50 (α, 14).]

HYPOTHALLINE, adj. Hip-o-tha2l'in. Lat., *hypothallinus.* Ger., *hypothallinisch, unterlagerig.* Pertaining to the hypothallus. [B, 77, 123 (α, 24).]

HYPOTHALLODES (Lat.), adj. Hip(hu6p)-o(o2)-tha2l(tha3l)-lod'ez(as). From ὑπό, under, θαλλός, a young shoot, and εἶδος, resemblance. Ger., *hypothallodisch.* Formed or proceeding from a hypothallus. [B, 19, 123 (α, 24).

HYPOTHALLUS (Lat.), n. m. Hip(hu6p)-o(o2)-tha2l(tha3l)'lu3s-(lu4s). From ὑπό, under, and θαλλός, a young shoot. Fr., *hypothalle.* Ger., *Unterlager.* 1. In crustaceous lichens, a horizontal stratum of interlacing filaments or elongated, short, or rounded cellules, developed upon the prothallus. 2. In the *Coniomycetes*, delicate filaments constituting the vegetation. [B, 19, 77, 123, 167 (α, 24).]

HYPOTHECIUM (Lat.), n. n. Hip(hu6p)-o(o2)-the(tha)'si2(ki2)-u3m(u4m). From ὑπό, under, and θήκη, a sheath. Fr., *hypothèque.* Ger., *Shlauchboden, Scheidenboden.* The conceptacle of the apothecia of lichens, composed of hyphal tissue lying just beneath the hymenium (thecium). It corresponds to the hypothallus. [B, 19, 77, 123 (α, 24).]

HYPOTHELE (Lat.), n. f. Hip(hu6p)-o(o2)-the(tha)'le(la). Gen., *-thel'es.* From ὑπό, under, and θηλή, the nipple. See Hydnum.

HYPOTHEMA (Lat.), n. n. Hip(hu6p)-o(o2)-the(tha)'ma3. Gen., *-em'atos* (*-atis*). Gr., ὑπόθημα (from ὑπό, under, and θῆμα, a chest). Of Wallroth, the hypothallus (1st def.). [B, 123 (α, 24).]

HYPOTHENAR (Lat.), n. n. Hip(hu6p)-o2th'e2n-a3r. Gen., *-then'aros* (*-aris*). Gr., ὑπόθεναρ (from ὑπό, under, and θέναρ, the palm of the hand). Fr., *hypothénar.* Ger., *H.* 1. The prominent portion of the palm of the hand running across the hand near the bases of the fingers. 2. The eminence at the ulnar border of the palm of the hand. [A, 385.]—**H. auriculare.** See *H. minimi digiti.*—**H. majus.** Ger., *grosses H.* The h. eminence. [α, 29.]—**H. minimi digiti, H. minus.** The abductor minimi digiti. [L, 1 (α, 29).]—**H. pollicis.** A muscle very briefly described by Heister, but probably corresponding to the abductor pollicis. [α, 29.]—**H. Riolani.** The mass of muscle on the inner side of the palm of the hand arising from the third and fourth bones of the second row of the carpus. It includes the abductor minimi digiti and portions of the flexor brevis minimi digiti and of the flexor ossis metacarpi minimi digiti. [α, 29.]

HYPOTHERMAL, adj. Hip-o-thu6r'm'l. Gr., ὑπόθερμος (from ὑπό, short of, and θερμός, hot. Fr., *h.* Moderately warm. [A, 385.]

HYPOTHERMANTER (Lat.), n. m. Hip(hu6p)-o(o2)-thu6r-(the2r)-ma2n(ma3n)'tu6r(tar). Gen., *-ter'os* (*-is*). Gr., ὑποθερμαντήρ (from ὑπό, under, and θερμαντήρ, a kettle for boiling water). Ger., *Unterwärmer* (1st def.), *Wärmflasche* (2d def.). 1. A means of warming from beneath. 2. A hot-water bottle for the bed. [L, 50 (α, 14).]

HYPOTHERMANTERION (Lat.), n. n. Hip(hu6p)-o(o2)-thu6r(the2r)-ma2n(ma3n)-te(ta)'ri2-o2n. A small hypothermanter. [L, 50 (α, 14).]

HYPOTHERMIC, adj. Hip-o-thu6rm'i2k. See Hypothermal.

HYPOTHERMIE (Fr.), n. E-po-te2r-me. The condition of having a subnormal temperature.

HYPOTHESIS (Lat.), n. f. Hip(hu6p)-o2th'e2-si2s. Gen., *-the'seos* (*-oth'esis*). Gr., ὑπόθεσις (from ὑπό, under, and τιθέναι, to place). Fr., *hypothèse.* Ger., *Hypothese, Voraussetzung.* A supposition.—**Discharge h.** Ger., *Entladungshypothese.* A theory of Du Bois-Reymond's in which an electric discharge is supposed to occur in the terminal filaments of nerves, whereby the corresponding muscles are stimulated. [K, 35.]—**Emission h.** The h. that luminous phenomena are due to the emission of particles from the surface of bodies, which particles, impinging upon the retina, excite there the impression of light. [B.]—**Undulatory h.** The wave theory. [B.]

HYPOTHETON (Lat.), **HYPOTHETUM** (Lat.), n's n. Hip-(hu6p)-o2th'e2t-o2n, -u3m(u4m). Gr., ὑπόθετον (from ὑπό, under, and τιθέναι, to place). See Suppository.

HYPOTHIONIC, adj. Hip-o-thi-o2n'i2k. From ὑπό, short of, and θεῖον, sulphur. Ger., *unterschwefelsauer.* Hyposulphuric. [B, 38, 78 (α, 14).]

HYPOTHRONIA (Lat.), n. f. Hip(hu6p)-o(o2)-thron(thro2n)'-i2-a3. See Hyptis.

HYPOTHYMIAMA (Lat.), n. n. Hip(hu6p)-o(o2)-thi2m(thu6m)-i2-a(a3)'ma3. Gen., *-am'atos* (*-atis*). From ὑπό, under, and θυμίαμα, a preparation for fumigating. Ger., *Räucherung.* A suffumigation. [L, 50 (α, 14).]

HYPOTHYMIASIS (Lat.), n. f. Hip(hu6p)-o(o2)-thi(thu6)-mi2-a(a3)'si2s. Gen., *-ace'os* (*-iasis*). From ὑποθυμιᾶν, to fumigate. The process of fumigation. [L, 50 (α, 14).]

HYPOTION (Lat.), **HYPOTIUM** (Lat.), n's n. Hip(hu6p)-ot'-i2-o2n, -u3m(u4m). From ὑπό, under, and οὖς, the ear. Ger., *Ohrpflaster.* A plaster to be applied behind or under the ear. [F, 40; L, 50 (α, 14).]

HYPOTONUS (Lat.), n. m. Hip(hu6p)-o2t'o2n-u3s(u4s). From ὑπό, short of, and τόνος, tension. Fr., *hypotonie.* Ger., *Hypotonie.* That condition of the eye in which the intra-ocular tension is below normal, without being of necessity accompanied by any organic disease of the eyeball. It is always accompanied by contraction of the pupil and sometimes by increase of the refraction and by local changes of temperature. [F.]

HYPOTONY, n. Hip-o2t'o2n-i2. See Hypotonus.

HYPOTRICHA (Lat.), n. n. pl. Hip(hu6p)-o2t'ri2k(ri2ch2)-a3. From ὑπό, beneath, and θρίξ, a hair. A suborder of *Ciliata*, class *Protozoa*, having the convex dorsal surface usually naked and the ventral surface covered with cilia and beset with styles and processes. [L, 353 (α, 39).]

HYPOTRICHOUS, adj. Hip-o2t'ri2k-u3s. Having cilia on the lower portion of the body. [B.]

HYPOTRIMMA (Lat.), n. n. Hip(hu6p)-o(o2)-tri2m'ma3. Gen., *-trim'matos* (*-atis*). Gr., ὑπότριμμα (from ὑπό, under, and τρίβειν, to rub). Fr., *hypotrimme.* Ger., *Tunke, Würzbrühe.* A kind of ancient sauce containing many ingredients rubbed together. [L, 50 (α, 14).]

HYPOTROPE (Lat.), n. f. Hip(hu6p)-o2t'ro(ro2)-pe(pa). Gen., *-ot'ropes.* From ὑπό, under, and τρέπειν, to turn. Ger., *Rückfall, Rückkehr.* A relapse. [L, 50 (α, 14).]

HYPOTROPHIA (Lat.), n. f. Hip(hu6p)-o(o2)-tro(tro2)'fi2-a3. From ὑπό, under, and τρέφειν, to nourish. Fr., *hypotrophie.* Ger., *schwache Ernährung.* Hypotrophy; a state of insufficient nutrition. [L, 50 (α, 14).]

HYPOTROPIASMUS (Lat.), n. m. Hip(hu6p)-o(o2)-trop-(tro2p)-i2-a2z(a3s)'mu3s(mu4s). Gr., ὑποτροπιασμός (from ὑπό, under, and τρέπειν, to turn). A relapse. [L.]

HYPOTROPIC, adj. Hip-o-tro2p'i2k. Gr., ὑποτροπικός. Lat., *hypotropicus.* Ger., *rückkehrend.* Of Hippocrates, relapsing, intermittent. [L, 50 (α, 14).]

HYPOTRYGUS (Lat.), adj. Hip(hu6p)-o2t'ri2g(ru6g)-u3s(u4s). Gr., ὑπότρυγος (from ὑπό, under, and τρύξ, new wine). Containing lees. [Hippocrates (A, 311).]

HYPOTYMPANIC, adj. Hip-o-ti2m-pa2n'i2k. From ὑπό, under, and τύμπανον, the tympanum. Lying beneath the tympanum (see *H.* bone). [B.]

HYPOTYPOSIS (Lat.), n. f. Hip(hu6p)-o(o2)-ti(tu6)-po'si2s. Gen., *-ose'os* (*-is*). Gr., ὑποτύπωσις (from ὑπό, short of, and τύπωσις, a molding). 1. An outline or sketch. 2. A pattern. [A, 311; L, 50 (α, 14).]

HYPO-UROCRINIE [Piorry] (Fr.), **HYPO-URRHÉE** [Piorry] (Fr.), n's. E-po-u6-ro-kre-ne, -u6r-ra. From ὑπό, short of, οὖρον, urine, and κρίνειν, to decide, or ῥεῖν, to flow. A diminution in the secretion of urine. [A, 250 (α, 21).]

HYPO-UTÉROTOPIE [Piorry] (Fr.), n. E-po-u6-ta-ro-to-pe. From ὑπό, under, *uterus*, the womb, and τόπος, place. Prolapse of the uterus. [A, 250 (α, 21).]

HYPO-UTERRHAGISMIE [Piorry] (Fr.), n. E-po-u6-te2r-ra3-zhes-me. From ὑπό, short of, *uterus*, the womb, and ῥηγνύναι, to break forth. Scanty menstruation. [A, 250 (α, 21).]

HYPOVANADATE, n. Hip-o-va2n'a2d-at. Fr., *h.* A compound of vanadium tetroxide (hypovanadic oxide) with a basic oxide. [B, 3.]

HYPOVANADIC, adj. Hip-o-va2n-a2d'i2k. Containing vanadium as a tetrad radicle. [B.]—**H. oxide.** Vanadium tetroxide. [B.]

HYPOVANADIOUS, adj. Hip-o-va2n-ad'i2-u3s. Containing vanadium as a bivalent radicle. [B.]—**H. oxide.** Vanadium dioxide. [B.]

HYPOVENOSITY, n. Hip-o-ve2n-o2s'i2-ti2. From ὑπό, under, and *venosus*, venous. Of Gay, a condition in which there is a diminution in the size and number of the veins in a given area, and in which atrophy and fatty degeneration of the muscles are developed. [L, 20 (α, 39).]

HYPOXÆMIA (Lat.), n. f. Hip(hu6p)-o2x-em'(a3'e2m)-i2-a3. From ὑπό, short of, ὀξύς, sharp (see Oxygen), and αἷμα, blood. Fr., *hypoxémie* [Piorry]. A state of defective oxygenation of the blood. [A, 250 (α, 21).]

HYPOXANTHINE, n. Hip-o-za[2]n'then. From ὑπό, under, and *xanthine* (*q. v.*). Fr., *h.* Ger., *Hypoxanthin.* Syn.: *sarcine.* A leucomaine, $C_5H_4N_4O$, or $C_{10}H_4N_4O_2$, occurring in the spleen, in muscular tissue, in the brain, in the thymus gland, in the suprarenal capsules, in bone marrow, and probably in normal blood. Pathologically, it occurs in the blood, liver, and urine in cases of leucocythæmia, and probably in other diseases. It is a crystalline powder, soluble with difficulty in water, still less soluble in alcohol. [E. D. Ferguson, "N. Y. Med. Jour.," Aug. 4, 1888, p. 113; B, 3, 4, 9, 12, 13.]—**H. hydrochlorate, H. hydrochloride.** A crystalline substance, $C_5H_4N_4O.HCl + H_2O$. [B, 3.]

HYPOXIDACEÆ (Lat.), **HYPOXIDEÆ** (Lat.), n's f. pl. Hip(hu[6]p)-o[2]x-i[2]d-a(a[3])'se[2](ke[2])-e(a[3]-e[2]), -i[2]d'e[2]-e(a[3]-e[2]). From *Hypoxis*, one of the genera. Fr., *hypoxidacées, hypoxidées.* The hypoxids; of Lindley and others, an order of epigynous monocotyledons; of Kunth, a family of plants corresponding in part to the *Asphodeleæ* and in part to the *Amaryllideæ*; of Bentham and Hooker, a tribe of the *Amaryllideæ.* [B, 142, 170 (α, 24).]

HYPOXIS (Lat.), n. f. Hip(hu[6]p)-o[2]x'i[2]s. From ὑπό, under, and ὀξύς, sharp. Star-grass, the representative genus of the *Hypoxideæ.* [B, 34, 42 (α, 24).]—**H. erecta.** American star-grass; a species common in Canada and the United States. Its roots or bulbs have been used by the Indians in low fevers and applied to ulcers. [B, 19, 34, 104, 180, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxix (α, 14).]

HYPOZOA (Lat.), n. n. pl. Hip(hu[6]p)-o(o[3])-zo'a[3]. From ὑπό, beneath, and ζῷον, animal. See PROTOZOA.

HYPOZOMA (Lat.), n. n. Hip(hu[6]p)-o(o[2])-zo'ma[3]. Gen., *-om'atos* (*-atis*). Gr., ὑπόζωμα (from ὑπό, under, and ζωννύναι, to gird). See DIAPHRAGM.

HYPPEACANNA (Lat.), n. f. Hi[2]p(hu[6]p)-pe[2]-a[3]-ka[2]n(ka[3]n)'na[3]. See IPECACUANHA.

HYPSERYSIPELAS (Lat.), n. n. Hi[2]ps(hu[6]ps)-e[2]r-i[2](u[6])-si[2]p-(se[2]p)'e[2]l-a[2]s(a[3]s). Gen., *-el'atos* (*-atis*). From ὕψι, high, and *erysipelas* (*q. v.*). Ger., *erhobene Rose.* Violent erysipelas. [L, 50 (α, 14).] Cf. ECPHORERYSIPELAS.

HYPSICRANIUM (Lat.), n. n. Hi[2]ps(hu[6]ps)-i[2]-kran(kra[3]n)'i[2]-u[3]m(u[4]m). From ὕψι, high, and κρανίον, the skull. Fr., *crâne en Tourelle.* Of Lissauer, a skull having a high cranial vault, the cerebellar sector of which is from 21° to 27·5°. ["Arch. f. Anthrop.," xv (α, 39).]

HYPSILODES (Lat.), adj. Hi[2]p(hu[6]p)-si[2]l(sel)-od'ez(as). Gr., ὑψιλοειδής (from ὕψιλον, the letter υ, and εἶδος, resemblance). See HYOID.

HYPSILOGLOSSUS (Lat.), n. m. Hi[2]p(hu[6]p)-si[2]l(sel)-o(o[3])-glo[2]s-(glos)'su[3]s(su[4]s). From ὕψιλον, the letter υ, and γλῶσσα, the tongue. See HYOGLOSSUS.

HYPSILOID, adj. Hi[2]p-sil'oid. See HYOID.

HYPSOCEPHALIC, HYPSOCEPHALOUS, adj's. Hi[2]ps-o-se[2]f-a[2]l'i[2]k, -sef'a[2]l-u[3]s. From ὕψος height, and κεφαλή, the head. Having an elevated skull. [L, 149 (α, 39).]

HYPSOCEPHALY, n. Hi[2]ps-o-ke[2]f'a[2]l-i[2]. A deformity of the skull characterized by an elevated vault. [L, 149 (α, 39).]

HYPSOMETER, n. Hi[2]ps-o[2]m'e[2]t-u[6]r. From ὕψος, height, and μέτρον, a measure. See *Boiling-point* BAROMETER.

HYPSONOSOS (Lat.), **HYPSONOSUS** (Lat.), n's f. Hi[2]ps-(hu[6]ps)-o[2]n'o[2]s-o[2]s, -u[3]s(u[4]s). From ὕψος, height, and νόσος, disease. Fr., *hypsonose.* Ger., *Bergkrankheit.* A disease seen in mountainous districts, affecting chiefly those unaccustomed to such elevation. It is characterized by nausea, vomiting, excessive headache, and fullness of the superficial veins. [α, 40.]

HYPSOPHOBIA (Lat.), n. f. Hi[2]ps(hu[6]ps)-o(o[3])-fob(fo[2]b)'i[2]-a[3]. From ὕψος, height, and φόβος, fear. Excessive fear of being in high places, such as buildings, bridges, towers, etc. [α, 40.]

HYPSOPHONOS (Lat.), **HYPSOPHONUS** (Lat.), adj's. Hi[2]ps(hu[6]ps)-o(o[3])-fon'o[2]s, -u[3]s(u[4]s). Gr., ὑψόφωνος (from ὕψι, on high, and φωνή, the voice). Having a high, clear voice. [L, 50 (α, 14).]

HYPSOPHYLL, n. Hi[2]ps'o-fi[2]l. From ὕψος, height, and φύλλον, a leaf. Lat., *hypsophyllum.* Ger., *Hochblatt.* Literally, a high leaf; a bract or bracteole. [B, 136, 291 (α, 24).]

HYPSOPHYLLARY, adj. Hi[2]ps-o-fi[2]l'a[2]r-i[2]. Relating to the bracts or hypsophylla. [B, 77 (α, 24).]

HYPSOPISTHIUS (Lat.), adj. Hi[2]ps(hu[6]ps)-o(o[3])-pi[2]s'thi[2]-u[3]s-(u[4]s). From ὕψος, height, and ὄπισθε, behind. In craniotomy, having the parietal angle ranging between 33·5° and 41°. [Lissauer (α, 39).]

HYPSOS (Lat.), n. n. Hi[2]ps(hu[6]ps)'o[2]s. Gen., *hyps'eos* (*-is*). Ger., *Spitze, Höhe.* A height, elevation. [L, 50 (α, 14).]

HYPSOSIS (Lat.), n. f. Hi[2]ps(hu[6]ps)-o'i[2]s. Gen., *-os'eos* (*-is*). Gr., ὕψωσις (from ὕψος, height). Of Galen, a raising high (as of the arms). [A, 311 (α, 21).]

HYPSOTHERMOMETER, n. Hi[2]ps-o-thu[6]r-mo[2]m'e[2]t-u[6]r. From ὕψος, height, θερμή, heat, and μέτρον, a measure. See *Boiling-point* THERMOMETER.

HYPTIASMOS (Lat.), **HYPTIASMUS** (Lat.), n's m. Hi[2]p-(hu[6]p)-ti[2]-a[2]z(a[3]s)'mo[2]s, -mu[3]s(mu[4]s). Gr., ὑπτιασμός (from ὕπτιος, bent back). 1. Of Hippocrates, the dorsal decubitus. [A, 311.] 2. Of Galen, violent nausea. [L, 50, 84 (α, 14).]

HYPTIS (Lat.), n. f. Hi[2]p(hu[6]p)'ti[2]s. From ὕπτιος, supine. A genus of the *Labiatæ*, tribe *Ocimoideæ.* Several species in Brazil and Uruguay, called *ovechá-caá*, are used in the treatment of syphilis. The *Hyptidæ* of Lindley are a tribe of the *Ocimeæ.* The *Hyptideæ* of Endlicher and others are a subtribe or section of the *Ocimoideæ.* ["Proc. of the Am. Pharm. Assoc.," xxxviii (α, 14); B, 34, 42, 170 (α, 24).]—**H. capitata.** A West Indian species. The flower-heads and leaves are employed in infusion like balm and peppermint and externally in aromatic fomentations. [B, 180 (α, 24).]—**H. ebracteata.** West Indian spikenard. It has a strong odor of balm, and is employed medicinally in the West Indies. [B, 180, 275 (α, 24).]—**H. radiata.** A species growing in the West Indies and in the United States in damp fields from the Carolinas southward. In the West Indies the leaves are said to be applied as a detergent to old ulcers. [B, 34, 173 (α, 24).]—**H. suaveolens.** See *H. ebracteata.*

HYPULOS (Lat.), **HYPULUS** (Lat.), adj's. Hi[2]p(hu[6]p)-u[2]l(ul)'o[2]s, -u[3]s(u[4]s). Gr., ὕπουλος (from ὑπό, under, and οὐλή, a scar). Of Hippocrates, badly cicatrized (said of wounds, ulcers, etc.). [L, 50 (α, 14).]

HYPURAL, adj. Hip-u[2]r'a[2]l. From ὑπό, under, and οὐρά, the tail. Situated under the tail (see *H.* BONE).

HYPURGESIS (Lat.), **HYPURGIA** (Lat.), n's f. Hip(hu[6]p)-u[6]r(ur)-je(ga)'si[2]s, -u[6]r(u[4]r)'ji[2](gi[2])-a[3]. Gr., ὑπούργησις, ὑπουργία. Ger., *Hülfsleistung.* Of Hippocrates, medical service. [L, 50 (α, 14).]

HYPURGIC, HYPURGOUS, adj's. Hip-ur[6]'ji[2]k, -gu[3]s. Gr., ὑπουργικός, ὑπουργός. Lat., *hypurgicus, hypurgus.* Ger., *helfend.* Serviceable, assisting. [L, 50 (α, 14).]

HYRACEUM (Lat.), n. n. Hi(hu[6])-ra(ra[3])'se[2](ke[2])-u[3]m(u[4]m). From ὕραξ, a mouse. Ger., *Dachsharn.* The dried fæces and urine of *Hyrax capensis*; at one time official as a substitute for castor in hysteria. It is a hard, tenacious, inflammable substance with a castor-like odor and taste, and contains vegetable tissue, animal hair, sand, and resin or oil. It is partly soluble in alcohol and in water. [A, 319 (α, 21); B, 4, 5 (α, 24).]

HYRACLEIA (Lat.), n. f. Hi(hu[6])-ra[3]-kli'(kle[2]'i[2])-a[3]. The *Parietaria officinalis.* [B, 88 (α, 39).]

HYRAX (Lat.), n. m. Hi(hu[6])'ra[2]x(ra[3]x). Gen., *hyr'acos* (*-acis*). Gr., ὕραξ. A genus of African mammals constituting the order *Hyracoidea.* [A, 385; "Am. Nat.," v, p. 530 (α, 32).]—**H. capensis.** Fr., *blaireau, taisson.* Ger., *Klippendachs.* The Cape rabbit, or Cape badger, from which hyraceum is obtained; found in South Africa. [B, 5, 77 (α, 24).]—**H. syriaca.** The cony of the Scriptures. [J.]

HYSCA (Lat.), n. f. Hi[2]s(hu[6]s)'ka[3]. 1. Food (see ESCA). 2. The *Polyporus igniarius.* [L, 50 (α, 14).]

HYSGE (Lat.), n. f. Hi[2]s(hu[6]s)'je(ga). Gen., *hys'ges.* Gr., ὕσγη. Ger., *Scharlachkraut.* Of ancient authors, a certain shrub that yielded a scarlet dye. [B, 78 (α, 14).]

HYSGINE (Lat.), n. f. Hi[2]s(hu[6]s)-ji(ge)'ne(na). Gen., *hys'gines.* From ὑσγινόεις, scarlet. Scarlet fever. [L, 50 (α, 14).]

HYSGINECPHLOGIOIS (Lat.), n. f. Hi[2]s(hu[6]s)-ji[2]n(gen)-e[2]k-floj(flo[2]g)'i[2]-o[2]-i[2]s. From ὕσγινον, a scarlet dye, and *ecphlogiois* (*q. v.*). Ger., *scharlachähnliche Varioloide.* Varioloid resembling scarlatina. [L, 50 (α, 14).]

HYSGINOS (Lat.), adj. Hi[2]s(hu[6]s)-ji(ge)'no[2]s. Gr., ὕσγινος. Scarlet. [L, 50 (α, 14).]

HYSON, n. Hiz'n. A fragrant species of green tea. [L, 56.]

HYSONSKIN, n. Hiz'n'ski[2]n. Ger., *Haysanskin.* A variety of green tea. [B, 180 (α, 24).]

HYSOP (Ger.), n. Hu[6]-zop'. See HYSSOP.—**Feldh'.** The *Helianthemum vulgare.* [B, 180 (α, 24).]

HYSOPE (Fr.), n. E-sop. See HYSSOP and HYSSOPUS.—**Eau d'h.** See *Aqua* HYSSOPI.—**Eau distillée d'h** [Fr. Cod.], **Hydrolat d'h.** A preparation made by distilling hyssop tops with water until the distillate equals in weight the amount of the plant employed. [B.]—**H. de haie.** The *Gratiola officinalis* and the *Helianthemum vulgare.* [B, 173 (α, 24).]—**H. des garigues.** The *Helianthemum vulgare.* [B, 173 (α, 24).]—**H. de Salomon.** According to some, a species of moss. [B, 121 (α, 35).] Cf. HYSSOP *of Scripture.*—**Tisane d'h.** [Fr. Cod.]. Sp., *infusion de hisopo* [Sp. Ph.]. An infusion made from the herb of *H. officinalis*, 1 part of the latter furnishing 200 [Fr. Cod.] or 69 [Sp. Ph.] parts of infusion. [B, 95.]

HYSOPINE (Fr.), n. E-so-pen. See HYSSOPINE.

HYSSEN (Ger.), n. Hu[6]s'se[2]n. Hyson tea. [B, 180 (α, 24).]

HYSSOP, n. Hi[2]s'su[3]p. See HYSSOPUS.—**Anise-h.** The *Lophanthus anisatus.* [B, 275 (α, 24).]—**Bastard h.** The *Teucrium pseudo-hyssopus.* [B, 19, 275 (α, 24).]—**Common h.** The *Hyssopus officinalis.* [B, 275 (α, 24).]—**Giant-h.** The genus *Lophanthus.* [B, 275 (α, 24).]—**Hedge-h.** The genus *Gratiola*, especially the *Gratiola officinalis*; also the *Scutellaria minor* and *Helianthemum vulgare.* [B, 5, 71, 173, 275 (α, 24).]—**H. of Dioscorides.** The *Satureia juliana* (*Micromeria juliana*); according to Kühn, the *Origanum smyrnæum.* [A, 510; B, 180 (α, 24).]—**H. of Scripture.** The *ézôb* of the Hebrews, a plant used in the Hebrew sprinklings and purifications, erroneously identified by Celsius and others with the *Hyssopus officinalis*; according to Kühn, the *Origanum ægyptiacum* or *Origanum syriacum*; according to Bochart, marjoram or some similar plant; according to Tristram, Royle, and others, the *Capparis spinosa*; according to Smith ("History of Bible Plants"), any common article in the form of a brush or broom; according to Thenius, the *Orthotrichum saxatile*; according to Carruthers and more recent authorities, several plants of *Thymus*, *Origanum*, *Satureia* and allied genera, especially *Satureia thymus*, which occurs frequently in Syria and Palestine and has taste, odor, and medicinal properties like those of the common hyssop. [B, 19, 77, 185; A, 500, 511 (α, 24).]—**Mountain-h.** See HYSSOPUS *montana.*—**Nettle-leaved giant-h.** The *Lophanthus urticæfolius.* [B, 275 (α, 24).]—**Oil of h.** Lat., *oleum* (seu *essentia* [Belg. Ph.]) *hyssopi.* A colorless or yellowish volatile oil of sp. gr. 0·889–0·986, derived from the *Hyssopus officinalis.* [B, 95.]—**Small hedge-h.** The *Lythrum hyssopifolium.* [A, 511 (α, 24).]—**Square-stalked h.**

The *Lophanthus nepetoides.* [B, 34 (*a*, 24).]—**Stitch-h.** The *Genista anglica.* [A, 505 (*a*, 21).]—**Water-h.** The *Herpestis monniera.* [B, 275 (*a*, 24).]—**Wild h.** The *Verbena hastata.* [B, 275 (*a*, 24).]

HYSSOPE (Fr.), n. Es-sop. See HYSSOPUS.—**H. à feuilles de myrte.** See HYSSOPUS *myrtifolius.*—**H. des garigues.** The *Cistus helianthemum.* [B, 88 (*a*, 39).]—**H. des Grecs.** The *Origanum* of Syria. [B, 88 (*a*, 39).]

HYSSOPINE, n. Hi^{2}s'sop-en. Fr., *h.* A salifiable base said to have been discovered in hyssop by Herberger and Chevallier, but which Frommsdoeff considers to be but calcium sulphate mixed with a bitter principle. [B, 38, 48, 93 (*a*, 14).]

HYSSOPITES (Lat.), n. m. Hi^{2}s(hu^{6}s)-sop-i(e)'tez(tas). Gen., *-pit'u* (*-œ*). Gr., ὑσσωπίτης (from ὕσσωπος, hyssop). Ger., *Ysopwein.* Wine impregnated with hyssop. [L, 50, 84 (*a*, 14).]

HYSSOPUS (Lat.), n. m. Hi^{2}s(hu^{6}s)-sop'u^{3}s(u^{4}s). Gr., ὕσσωπος. Fr., *hysope* [Fr. Cod.], *hyssope.* Ger., *Ysop.* It., *issopo, isope.* Sp., *hisopo.* A genus of labiate plants, consisting of small bushy herbs, with a tubular calyx and 5 exserted stamens. The *Hyssopeæ* or *Hyssopidæ* are, of Reichenbach, a division of the *Schizogynæ*, and subsequently of the *Origaneæ;* of Endlicher, a subtribe of the *Satureineæ.* [B, 19, 34, 121, 170, 173, 180 (*a*, 24).]—**Essentia hyssopi.** See *Oil of* HYSSOP.—**Herba hyssopi** [Belg. Ph., Finn. Ph. (3d ed.), Russ. Ph., Swed. Ph.]. The herb of *H. officinalis.* [B, 95.]—**H. agrestis.** The *Satureia hortensis.* [B, 180 (*a*, 24).]—**H. angustifolius.** A variety of the *H. officinalis.* [B, 214 (*a*, 35).]—**H. montana.** The mountain hyssop, the *Thymbra verticillata.* [B, 310 (*a*, 35).]—**H. myrtifolius.** Fr., *hysope à feuilles de myrte.* A variety of *H. officinalis.* [B, 173 (*a*, 24).]—**H. officinalis.** Hind., Bom., *juphá.* Pers., *zuph-i-yabisa.* Fr., *hysope* [Fr. Cod.], *hysope* (*ou hyssope*) *officinale.* Ger., *gebräuchlicher Ysop.* Sp., *hisopo* [Sp. Ph.]. Hyssop; a native of southern Europe and middle Asia, formerly official and still used domestically as a gentle aromatic stimulant, in elderly subjects, as an expectorant and sudorific, etc. [A, 479 (*a*, 21); B, 5, 173, 180 (*a*, 24).]—**H. officinalis decussatus.** See *H. myrtifolius.*—**H. officinarum.** See *H. officinalis.*—**H. orientalis.** See *H. officinalis.*—**H. ruber.** See *H. myrtifolius.*—**Infusum hyssopi.** See *Tisane d'*HYSOPE.—**Oleum hyssopi.** See *Oil of* HYSSOP.—**Summitates hyssopi.** The tops of *H. officinalis.* [*a*, 21.]

HYSTERA (Lat.), n. f. Hi^{2}s(hu^{6}s)'te^{2}r-a^3. Gr., ὑστέρα, ὑστέρη. The uterus. [L, 50, 107 (*a*, 14).]—**H. diadelpha.** A double or twin uterus. It may have a common or two separate cervical canals. [*a*, 40.]

HYSTERALGES (Lat.), adj. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}l(a^{3}l)'jez(gas). Gr., ὑστεραλγής. Causing uterine pain. [Hippocrates (A, 311).]

HYSTERALGIA (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From ὑστέρα, the womb, and ἄλγος, pain. Fr., *hystéralgie.* Ger., *Gebärmutterschmerz, Mutterkrebs, Hysteralgie.* 1. Uterine pain. [A, 322.] 2. Neuralgia of the uterus. [A, 326 (*a*, 21).]—**H. adhæsiva.** H. from defective development of the uterus in consequence of adhesions. [L, 135 (*a*, 39).]—**H. calculosa.** H. caused by a concretion in the wall or cavity of the uterus. [L, 135 (*a*, 39).]—**H. cancrosa.** The pain of uterine cancer.—**H. catarrhalis.** H. due to endometritis. [L, 135 (*a*, 40).]—**H. ectopica.** H. from displacement of the uterus. [L, 135 (*a*, 39).]—**H. erethistica.** Spasmodic h. [L, 135 (*a*, 39).]—**H. febricosa.** H. occurring in the course of intermittent fever and due to the same cause as the fever. [Sauvage (*a*, 40).]—**H. galactica.** See PHLEGMASIA *alba dolens.*—**H. hæmorrhoidalis.** H. due to hæmorrhoidal disease. [L, 135 (*a*, 40).]—**H. inflammatoria.** H. due to inflammation in the womb or some nearly associated part. [L, 135 (*a*, 40).]—**H. lactea.** H. caused by nursing. [L, 135 (*a*, 39).]—**H. lochialis.** Dyslochia. [L, 135 (*a*, 40).]—**H. menstrualis.** See DYSMENORRHŒA.—**H. parturientium.** The uterine pain of parturition.—**H. physconica.** H. due to abdominal dropsy. [L, 135 (*a*, 40).]—**H. plethorica.** H. due to general plethora. [L, 135 (*a*, 40).]—**H. pruriginosa.** H. due to or associated with severe pruritus vulvæ. [*a*, 40.]—**H. puerperarum.** H. occurring in the gravid uterus. [*a*, 40.]—**H. rheumatica.** Rheumatism of the uterus. [L, 135 (*a*, 40).]—**H. rigida.** H. due to abnormal development of connective tissue in the womb. [*a*, 40.]—**H. scirrhosa.** See *H. cancrosa.*—**H. spasmodica.** See *H. erethistica.*—**H. syphilitica.** H. due to syphilitic disease of the uterus itself or to syphilophobia. [L, 135 (*a*, 40.)]—**H. ulcerosa.** H. due to ulceration of the uterine cervix. [*a*, 40.]

HYSTERALGIC, adj. Hi^{2}s-te^{2}r-a^{2}l'ji^{2}k. Gr., ὑστεραλγής. Lat., *hysteralgicus.* Fr., *hystéralgique.* Pertaining to, causing, or affected with hysteralgia. [L, 50, 107 (*a*, 14).]

HYSTERANDRIA (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}n(a^{3}n)'dri^2-a^3. Fr., *hystérandrie.* Of Richard, a class of plants having an inferior ovary and more than 20 stamens, such as the *Cacti*, etc. [B, 1 (*a*, 24).]

HYSTERANDRIC, HYSTERANDRIOUS, adj's. Hi^{2}s-tu^{6}r-a^{2}n'dri^{2}k, -dri^2-u^{3}s. Fr., *hystérandrique.* Belonging to or having the characteristics of the *Hysterandria.* [*a*, 35.]

HYSTERANESIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}n(a^{3}n)'e^{2}s-si^{2}s. From ὑστέρα, the womb, and ἄνεσις, a relaxing. Gen., *-es'eos* (*-an'esis*). Ger., *Fruchthaltererschlaffung.* Of Kopp, relaxation of the fundus uteri. [L, 50 (*a*, 14).]

HYSTERANTHIOUS, HYSTERANTHOUS, adj's. Hi^{2}s-te^{2}r-a^{2}n'thi^2-u^{3}s, -a^{2}n'thu^{3}s. Lat., *hysteranthius* (from ὕστερος, later, and ἄνθος, a flower). Fr., *hystéranthé.* Of leaves, appearing after the flowers. [B, 1, 19, 123 (*a*, 24).]

HYSTERANTHY, n. Hi^{2}s'te^{2}r-a^{2}n-thi^2. Fr., *hysteranthie.* The appearance of leaves of plants later than the flowers. [B, 121 (*a*, 35).]

HYSTERAPOPNIXIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}p(a^{3}p)-o^{2}p-ni^{2}x'i^{2}s. Gen., *-pnix'eos* (*-pnix'is*). From ὑστέρα, the womb, and ἀποπνίγειν, to choke. See GLOBUS *hystericus.*

HYSTERATOME, n. Hi^{2}s'te^{2}r-a^{2}t-om. See HYSTEROTOME.

HYSTERATRESIA (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-a^{2}t(a^{3}t)-re(ra)'-zi^2(si^2)-a^3. From ὑστέρα, the womb, and *atresia* (*q. v.*). Ger., *Muttermundverschluss.* Atresia of the uterus. [L, 135 (*a*, 39).]

HYSTERECTOMY, n. Hi^{2}s-te^{2}r-e^{2}k'to-mi^2. From ὑστέρα, the womb, ἐκ, out, and τέμνειν, to cut. Fr., *hysterectomie.* Ger., *Uterusausschneidung.* Removal of the uterus by a cutting operation. [E.]—**Abdominal h.** Fr., *hysterectomie abdominale.* H. through the abdominal wall.—**Cæsarean h.** Fr., *opération de Porro, amputation utéro-ovarienne avec taille césarienne.* Ger., *Kaiserschnitt nach Porro.* Syn.: *utero-ovarian amputation* as completive of the *Cæsarean operation, Porro's operation, oophoro-* (or *ovario-*) *h.* A modification of the Cæsarean operation in which the uterus and the ovaries are removed, as well as the contents of the first-mentioned organ. The section is made through the cervix uteri, the stump of which is clamped with an écraseur or some similar constrictor, and treated like a clamped ovariotomy pedicle. See also *Porro-Müller* OPERATION.—**Supravaginal h.** Fr., *hystérectomie supravaginale.* Supravaginal amputation of the uterus.—**Vaginal h.** Fr., *hystérectomie vaginale.* Ger., *vaginale Totalexstirpation des Uterus* (oder *Hysterektomie*). H. through the vagina.

HYSTERELCOSIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-e^{2}l-ko'si^{2}s. Gen., *-os'eos* (*-relcos'is*). From ὑστέρα, the womb, and ἕλκωσις, ulceration. Ger., *Gebärmutterverschwärung.* Ulceration of the womb. [L, 50, 107 (*a*, 14).]

HYSTEREMPHYSEMA (Lat.), n. n. Hi^{2}s(hu^{6}s)-te^{2}r-e^{2}m-fi(fu^6)-se(sa)'ma^3. Gen., *-em'atos* (*-atis*). From ὑστέρα, the womb, and ἐμφύσημα, an inflation. See PHYSOMETRA.

HYSTERERGIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-u^{6}rj(e^{2}rg)'i^2-a^3. From ὕστερος, later, and ἔργον, work. Ger., *Nachwirkung.* The after-effects of a drug or course of treatment. [A, 322.]

HYSTERETIC, adj. Hi^{2}s-te^{2}r-e^{2}t'i^{2}k. Gr., ὑστερητικός. Lat., *hystereticus.* Of febrile paroxysms, postponing. [L, 50 (*a*, 14).]

HYSTERIA (Lat.), n. f. Hi^{2}s(hu^{6}s)-te(te^2)'ri^2-a^3. From ὑστέρα, the womb. Fr., *hystérie.* Ger., *Hysterie.* It., *isterismo, isteria.* Sp., *histeria, histerismo.* 1. A functional affection of the nervous system, which is almost limited to women, and more frequently to young, unmarried women, who have no settled occupation or aim in life. It was long supposed to proceed from some disturbance of the uterus (hence the name). Latterly competent investigators have referred the source of the trouble to the ovary. Hammond expresses the opinion that ungratified sexual desire is not an exciting cause. The affection consists in a voluntary or involuntary imitation of some pathological condition, and the field covers the entire range of diseases susceptible of imitation. No lesion of the brain, spinal cord, or sympathetic system has ever been found to account for the phenomena, but from the character of those phenomena Hammond classes h. as a cerebro-spinal disease. [D.] See *Hysterical* CONVULSION. 2. A genus of the *Orchideæ*, tribe *Neottieæ.* 3. Of Ehrenberg, a cohort of *Fungi*, including *Placentium, Hysterium, Solenarium, Triblidium,* and *Phacidium.* The *Hysteracei* are: Of Rabenhorst, a subtribe of the *Phacidiacei;* of Bonorden, a family of the *Pyrenomycetes*, including *Hysterium, Phacidium,* etc. The *Hysteriaceæ* of Corda are a family of *Sclergasteres*, including the *Stegiaceæ, Hysteriaceæ,* etc. [B, 42, 170 (*a*, 24).]—**Abdominal h.** An hysterical affection characterized by swelling and tenderness of the abdomen and fever. Its relation to menstruation, the absence of increased pain from continued pressure on the abdomen, the history of the patient, the improvement under appropriate treatment, etc., may be required to diagnosticate it from peritonitis. [D, 25.]—**Cerebral h.** Lat., *h. cephalica.* H. which simulates apoplexy or some other form of cerebral disease. Da Costa reports a case which was associated with ovarian disease. [D, 47.]—**Epidemic h.** H. or h.-like disturbances apparently acquired by association with hysterical patients. [D.]—**Epileptiform h., Epileptoid h.** Hystero-epilepsy. [A, 42.]—**Feigned h.** A simulation of the "whims and vagaries" of h. to elicit sympathy or procure compliance with wishes or caprices. [D, 47.]—**H. cataleptica.** H. in which the patient, instead of suffering from the ordinary convulsions of h., is seized with catalepsy, and remains in the position placed until the attack is relieved. [*a*, 40.]—**H. febricosa.** See FEBRIS *tertiana asthmatica.*—**H. libidinosa.** Of Sauvages, a form of hystero-epilepsy in which the body rapidly alternates between opisthotonos and the ordinary dorsal decubitus. [D, 34.]—**H. major.** Fr., *grande hystérie.* It., *grande isterismo.* See HYSTERO-EPILEPSY.—**H. vaga.** See *H.* (1st def.).—**Intermittent h.** H. associated with the typical phenomena of intermittent fever. [D, 70.]—**Masked h.** Fr., *hystérie fruste.* A form of h. occurring principally in men, and in which the symptoms so much resemble those of organic diseases, such as tuberculosis and cerebral lesions, that the real cause is very difficult to diagnosticate. [Debove, "Bull. gen. de thérap.," Dec. 15, 1882, p. 525 (*a*, 40).]—**Toxic h.** Fr., *hystérie toxique.* H. due to poisoning, as with carbon disulphide, lead, mercury, etc. [*a*, 18.]—**Traumatic h.** Fr., *hystérie traumatique, hystéro-traumatisme.* H. due to traumatism. [Bitot and Lamarque, "Jour. de méd. de Bordeaux," Dec. 9, 1888 (*a*, 18).]—**Visceral h.** Fr., *hystérie viscérale.* H. resulting in functional or organic visceral disease in consequence of perverted nervous action. ["Arch. de neurol.," Jan., 1885, p. 139.]

HYSTERIAS (Lat.), **HYSTERIASIS** (Lat.), n's m. and f. Hi^{2}s(hu^{6}s)-te^{2}r'i^2-a^{2}s(a^{3}s), -te^{2}r-i^2-a(a^3)'sis. Gen., *-i'ados* (*-adis*), *-as'eos* (*-is*). See HYSTERIA.

HYSTERIC, HYSTERICAL, adj's. Hi^{2}s-te^{2}r'i^{2}k, -i^2-k'l. Gr., ὑστερικός. Lat., *hystericus.* Fr., *hystérique.* Ger., *hysterisch.* Pertaining to, affected with, of the nature of, or due to hysteria. [D.]

HYSTERICISM, n. Hi^{2}s-te^{2}r'i^2-si^{2}z'm. Lat., *hystericismus* (from ὑστέρα, the womb). Fr., *hystéricisme.* The state of being affected with hysteria; the hysterical condition. [D.]

HYSTERICŒDEMA (Lat.), n. n. Hi^{2}s(hu^{6}s)-te^{2}r-i^2-se^{2}d(ko^2-e^{2}d)-em(am)'a^3. Gen., *-em'atos* (*-atis*). From ὑστερικός, hysterical, and οἴδημα, œdema. Hysterical œdema. [L, 50 (*a*, 14).]

HYSTERICS, n. sing. Hi^{2}s-te^{2}r'i^{2}ks. See HYSTERIA.

HYSTÉRIE (Fr.), n. Es-ta-re. See HYSTERIA.—**Grande h.** See HYSTERO-EPILEPSY.—**H. convulsive.** Hysteria in which the attacks are accompanied with convulsions. [D, 72.]—**H. de retour.** Hysteria occurring at the time of the menopause.—**H. fruste.** See *Masked* HYSTERIA.—**H. inhibitoire.** See *H. suspensive.*—**H. précoce.** The hysteria of young persons.—**H. saturnine.** H. due to lead poisoning. [Dutil, "Gaz. méd.," Oct. 27, 1888 (*a*, 18).]—**H. suspensive.** Syn.: *h. inhibitoire.* A form of hysteria in which the manifestations are due to a suspension of one or more of the functions of vegetative life (*e. g.*, that in which vomiting results from failure of the gastric secretions to be formed). ["Arch. de neurol.," Jan., 1885, p. 139.]—**H. tabagique.** A variety of toxic hysteria due to the excessive use of tobacco. ["Sem. méd.," Aug. 30, 1889, p. 408 (*a*, 18).]

HYSTERIENCEPHALITIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-te^{2}r-i^2-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὑστέρα, the womb, and ἐγκέφαλος, the brain (see also *-itis**). Hysterical meningitis. [L, 50 (*a*, 14).]

HYSTERIFORM, HYSTERIOID, adj. Hi^{2}s-te^{2}r'i^2-fo^{2}rm, -te'ri^2-oid. From ὑστέρα, the womb, and *forma*, form, or εἶδος, resemblance. Fr., *hystériforme.* Resembling hysteria. [D, 34.]

HYSTERIONICA (Lat.), **HYSTERONICA** (Lat.), n's f. His-(hu^{6}s)-te^{2}r-i^2-o^{2}n'i^{2}k-a^3, -te^{2}r-o^{2}n'i^{2}k-a^3. Of Willdenow, a genus of the *Compositæ*, tribe *Asteroideæ.* [B, 42 (*a*, 24).]—**H. baylahuen.** A species indigenous to Chile ; according to Baille, valuable in gastro-intestinal complaints and diseases of the respiratory passages andin cystitis ; also used in collodion as a dressing for varices. ["N. Carolina Med. Jour.," May, 1890, p. 320 (*a*, 24) ; "Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]

HYSTERIOTOMY, n. Hi^{2}s-te-ri^2-o^{2}t'o-mi^2. See HYSTEROTOMY.

HYSTÉRIQUE (Fr.), adj. and n. Es-ta-rek. From ὑστέρα, the womb. Hysterical ; as a n., a person affected with hysteria. [D, 72].

HYSTERISM, n. Hi^{2}s'te^{2}r-i^{2}z'm. It., *isterismo.* See HYSTERICISM.

HYSTERITES (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-i(e)'tez(tas). See HYDROMETRA.

HYSTERITIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὑστέρα, the womb (see also *-itis**). See METRITIS.

HYSTEROBUBONOCELE (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-bu^2(bu)-bo^{2}n(bon)-o(o^3)-se(ka)'le(la) ; in Eng., hi^{2}st-e^{2}r-o-bu^2-bo^{2}n'-o-sel. Gen., *cel'es* (*-œ*). From ὑστέρα, the womb, and βουβωνοκήλη, an inguinal hernia. See *Inguinal* HYSTEROCELE.

HYSTEROCARCINOMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-ka^{3}r-si^{2}n(ki^{2}n)-o'ma^3. Gen., *-om'atos* (*-atis*). From ὑστέρα, the womb, and καρκίνωμα, a cancer. Carcinoma of the uterus. [L, 50, 107 (*a*, 14).]

HYSTERO-CATALEPSY, n. Hi^{2}st-e-ro-ka^{2}t'a^3-le^{2}ps-i^2. Gen., *-ep'seos* (*-is*). Lat., *hystero-catalepsis* (from ὑστέρα, the womb, and κατάληψις, a seizing). Fr., *hystéro-catalepsie.* Ger., *Krampfhysterie.* See under CATALEPSY.

HYSTEROCELE (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-sel(kal)'e(a); in Eng., hi^{2}st'e^{2}r-o-sel. Gen., *-cel'es.* From ὑστέρα, the uterus, and κήλη, a hernia. Fr., *hystérocèle.* Ger., *Gebärmutterbruch, Mutterbruch.* A hernia containing the uterus. [A, 528.]—**Crural h.** Lat., *hernia uteri cruratis.* A femoral hernia containing the whole or a portion of the uterus.—**H. nuda.** Procidentia of the uterus. [*a*, 40.]—**H. ventralis.** See *Ventral h.*—**Inguinal h.** Lat., *hernia uteri inguinalis.* Fr., *hystérocèle inguinale.* Ger., *Mutterleistenbruch.* An inguinal hernia containing the uterus.—**Ventral h.** Lat., *h. ventralis, hernia uteri ventralis.* A ventral h. containing the uterus.

HYSTEROCHLOASMA (Lat.), n. n. Hi^{2}s(hu^{6}s)-te^{2}r-o-(o^3)-klo(ch^{2}lo^2)-a^{2}z(a^{2}s)'ma^3. Gen., *-as'matos* (*-atis*). From ὑστέρα, the womb, and χλόασμα, chloasma. Chloasma due to a uterine disorder. [L, 50 (*a*, 14).]

HYSTEROCLEISIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-klis'-(kle^2'i^{2}s)-i^{2}s. Gen., *-cleis'eos* (*-is*). From ὑστέρα, the womb, and κλεῖσις, a closure. Jobert's method of operating for vesico-uterine fistula by sewing together the lips of the womb. [*a*, 40.]

HYSTEROCNESMUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}k-ne^{2}z-(nas)'mu^{3}s(mu^{4}s). From ὑστέρα, the womb, and κνησμός, itching. See PRURITUS *pudendi.*

HYSTEROCOLICA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-kol'i^{2}k-a^3. From ὑστέρα, the womb, and κωλική, colic. See *Uterine* COLIC.

HYSTEROCRANION (Lat.), **HYSTEROCRANIUM** (Lat.), n's n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-kran(kra^{2}n)'i^2-o^{2}n, -u^{3}m(u^{4}m). From ὕστερος, behind, and κρανίον, the upper part of the head. Ger., *Hinterkopf.* The occiput. [L, 50 (*a*, 14).]

HYSTEROCYESIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-si(ku^6)-e-(a)'si^{2}s. Gen., *-es'eos* (*-is*). From ὑστέρα, the womb, and κύησις, gestation. Ger., *Gebärmutterschwangerschaft.* Uterine pregnancy. [L, 50, 107 (*a*, 14).]

HYSTEROCYSTIC, n. Hi^{2}st-e^{2}r-o-si^{2}st'i^{2}k. Lat., *hysterocysticus* (from ὑστέρα, the womb, and κύστις, the bladder). Fr., *hystéro-cystique.* Pertaining to the bladder and the uterus. [L, 41.]

HYSTEROCYSTOCELE (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-si^{2}st(ku^{6}st)-o(o^3)-se(ka)'le(la) ; in Eng., hi^{2}s-te^{2}r-o-si^{2}st'o-sel. Gen., *-cel'es* (*-œ*). From ὑστέρα, the womb, and κήλη, a hernia. Fr., *hystérocystocèle.* Ger., *Mutterblasenbruch.* A hernia containing the bladder and the uterus. [L, 41, 50 (*a*, 14).]

HYSTERO-DEMONOPATHY, n. Hi^{2}st-e^{2}r-o-de-mo^{2}n-o^{2}p'-a^{2}th-i^2. From ὑστέρα, the womb, δαίμων, a demon, and πάθος, a disease. Fr., *hystéro-démonopathie.* Dæmonopathia of hysterical origin. Cf. *Demonopathic* HYSTERO-EPILEPSY.

HYSTERO-DYNAMOMETER, n. Hi^{2}st-e^{2}r-o-di^{2}n-a^{2}m-o^{2}m'-e^{2}t-u^{6}r. From ὑστέρα, the womb, δύναμις, power, and μέτρον, a measure. A long tube with a spring inclosed in one end attached to a recording dial, to measure the number, intensity, and variations of uterine contractions. [*a*, 40.]

HYSTERODYNIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-di^{2}n(du^{6}n)'-i^2-a^3. From ὑστέρα, the womb, and ὀδύνη, pain. Fr., *hystérodynie.* Ger., *Gebärmutterschmerz.* Pain in the uterus. [L, 50, 107 (*a*, 14).]

HYSTERŒDEMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-e^{2}d(o^3-e^{2}d)-e-(a)'ma^3. Gen., *em'atos* (*-atis*). From ὑστέρα, the womb, and οἴδημα, œdema. Œdema of the substance of the uterus. To be distinguished from dropsy of the uterus (hydrometra). [L, 50 (*a*, 14).]

HYSTERO-EPILEPSY, n. Hi^{2}st''e^{2}r-o-e^{2}p'i^2-le^{2}p-si^2. From ὑστέρα, the womb, and ἐπίληψις (see EPILEPSY). Fr., *hystéro-épilepsie, grande hystérie.* Ger., *Hystero-Epilepsie.* A disease which has been most vividly described by French authors (Charcot, Richer, *et al.*). During the intervals between its attacks the patient suffers from incomplete hysterical hemianæsthesia, ovarian hyperæsthesia, and other hysterical symptoms. The attack is ushered in with an aura, which is of the nature of a globus hystericus, and seems to proceed from the affected ovary. The patient shrieks and falls insensible, and tonic spasm results ; this is quickly followed by clonic spasms, and these are succeeded by muscular relaxation, stertorous respiration, and coma. The second stage (*phase des grands mouvements*) consists of movements which may be rhythmical or disordered, and which are sometimes violent and ludicrous. They have been termed "*attaques de clownisme.*" The next stage (*phase des attitudes passionelles*) is marked by a rapid succession of attitudes and gestures which suggest the term *phase of lubricity.* Hallucinations of terror, sorrow, joy, etc., follow, after which the individual recovers consciousness. The paroxysms may recur frequently and may be provoked by slight pressure upon the region of the ovary or upon certain other hyperæsthetic parts. Sudden and firm compression of the ovary will at once arrest a paroxysm. [D, 35.]—**Demonopathic h.-e.** It., *istero-epilessia demonopatica.* H.-e. in which simple hysteria develops into mania with destructive or murderous tendencies. [*a*, 40.]

HYSTERO-EPILEPTOGENOUS, adj. Hi^{2}st-e^{2}r-o-e^{2}p-i^2-le^{2}p-to^{2}j'e^{2}n-u^{3}s. From ὑστέρα, the womb, ἐπίληψις, a taking hold, and γεννᾶν, to engender. Fr., *hystéro-épileptogène.* Productive of hystero-epilepsy. [*a*, 40.]

HYSTEROGENES (Lat.), adj. Hi^{2}s(hu^{6}s)-te^{2}r-oj(og)'e^{2}n-ez(as). Gr., ὑστερογενης (from ὕστερος, later, and γεννᾶν, to engender). Not occurring until after birth. [Aristotle (A, 311).]

HYSTEROGENIC, HYSTEROGENOUS, adj's. Hi^{2}s-te^{2}r-o-je^{2}n'i^{2}k, -o^{2}j'e^{2}n-u^{3}s. Gr., ὑστερογενής (from ὑστέρα, the womb [1st def.], or ὕστερος, later [2d def.], and γεννᾶν, to engender). 1. Causing a hysterical attack. 2. In botany, formed in older tissues (said of intercellular spaces in plants). [B, 229 (*a*, 24).] Cf. PROTOGENIC.

HYSTÉROGRAPHIE (Fr.), n. Es-ta-ro-gra^3-fe. From ὑστέρα, the womb, and γραφή, a writing. See HYSTEROLOGY.

HYSTEROID, adj. Hi^{2}st'e^{2}r-oid. See HYSTERIOID.

HYSTERO-LAPAROTOMY, n. Hi^{2}st-e^{2}r-o-la^{2}p-a^{2}r-o^{2}t'o-mi^2. From ὑστέρα, the womb, λαπάρα, the abdominal wall, and τομή, a cutting. See *Abdominal* HYSTERECTOMY.

HYSTEROLITH, n. Hi^{2}st'e^{2}r-o-li^{2}th. See HYSTEROLITHOS and *Uterine* CALCULUS.

HYSTEROLITHIASIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-li^{2}th-i^2-a(a^3)'si^{2}s. Gen., *-as'eos* (*-is*). From ὑστέρα, the womb, and λίθος, a stone. Fr., *hystérolithiase.* Ger., *Steinbildung in der Gebärmutter.* The formation of a uterine calculus. [L, 50, 107 (*a*, 14).]

HYSTEROLITHOS (Lat.), **HYSTEROLITHUS** (Lat.), n's m. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}l'i^{2}th-o^{2}s, -u^{3}s(u^{4}s). From ὑστέρα, the womb, and λίθος, a stone. Fr., *histérolithe.* Ger., *Mutterstein* (1st def.). 1. See *Uterine* CALCULUS. 2. See *H. hystericus.*—**H. hystericus, H. vulvaris.** A fossil shell or, of Schlotheim, the nucleus of *Spirifer speciosus*, formerly suspended between the thighs as an amulet to prevent hysteria, dysmenorrhœa, etc. [B, 88 (*a*, 39); L, 30 (*a*, 14).]

HYSTEROLOGY, n. Hi^{2}s-te^{2}r-o^{2}l'o-ji^2. Lat., *hysterologia* (from ὑστέρα, the womb, and λόγος, understanding). Fr., *hystérologie.* Ger., *Gebärmutterlehre.* The anatomy, etc., of the uterus.

HYSTEROLOXIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-lo^{2}x'i^2-a^3. From ὑστέρα, the womb, and λοξός, slanting. Fr., *hystéroloxie.* Ger., *Gebärmutterumbeugung.* Obliquity of the uterus. [L, 41, 50, 84 (*a*, 14).]

HYSTEROLYMPHANGEITIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-li^{2}m(lu^{6}m)-fa^{2}n(fa^{3}n^2)-je^2(ge^2)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ὑστέρα, the womb, *lympha*, water, and ἀγγεῖον, a vessel (see also *-itis**). Inflammation of the lymphatics of the uterus. [L, 50 (*a*, 14).]

HYSTEROMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o'ma^3. Gen., *-om'atos* (*-atis*). From ὑστέρα, the womb. Fr., *hystérome.* A fibrous tumor of the uterus. [A, 58.]

HYSTEROMALACIA (Lat.), **HYSTEROMALACOMA,** n's f. and n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-mal(ma^{3}l)-a(a^3)'si^2(ki^2)-a^3, -a^{2}k(a^{3}k)-o'ma^3. Gen., *-ac'iæ, -acom'atos* (*-atis*). From ὑστέρα, the womb, and μαλακία, softness. Fr., *hystéromalacie.* A state of softening of the uterus. [L, 41 (*a*, 14).]

HYSTEROMALACOSIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-ma^{2}l(ma^{3}l)-a^{2}k(a^{3}k)-o'si^{2}s. Gen., *-os'eos* (*-is*). The production of hysteromalacia. [A, 322.]

HYSTÉROMANE (Fr.), n. Es-ta-ro-ma^{3}n. A person affected with nymphomania. [L, 41 (*a*, 14).]

HYSTEROMANIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-man-(ma^{3}n)′i^2-a^3. From ὑστέρα, the womb, and μανία, a madness. Fr., *hystéromanie*. Ger., *Mutterwuth*. An old term for nymphomania. [A, 42.]

HYSTÉROMATOCIE (Fr.), n. Es-ta-ro-ma^3-to-se. See *Cæsarean* OPERATION.

HYSTEROMETER (Lat.), n. m. Hi^{2}st-e^{2}r-o^{2}m′e^{2}t-u^{5}r. Lat., *hysterometrum* (from ὑστέρα the womb, and μέτρον, a measure). Fr., *hystéromètre*. Ger., *Muttermesser*. An instrument (*e. g.*, a sound) for measuring the length of the uterine canal.

HYSTEROMETRY, n. Hi^{2}st-e^{2}r-o^{2}m′e^{2}t-ri^2. Measurement of the uterus or of its canal.

HYSTEROMOCHLION (Lat.), **HYSTEROMOCHLIUM** (Lat.), n's n. Hi^{2}st-e^{2}r-o(o^3)-mok(mo^{2}ch^2)′li^2-o^{2}n, -u^{3}m(u^{4}m). From ὑστέρα, the womb, and μοχλίον, a lever. See VECTIS.

HYSTEROMORPHOUS, adj. Hi^{2}st-e^{2}r-o-mo^{2}rf′u^{3}s. From ὑστέρα, the womb, and μορφή, form. Womb-shaped. [*a*, 40.]

HYSTEROMYOMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-mi-(mu^6)-om′a^3. Gen., *-om′atos* (*-atis*). From ὑστέρα, the womb, and μῦς, a muscle. A myoma of the womb. [*a*, 40.]

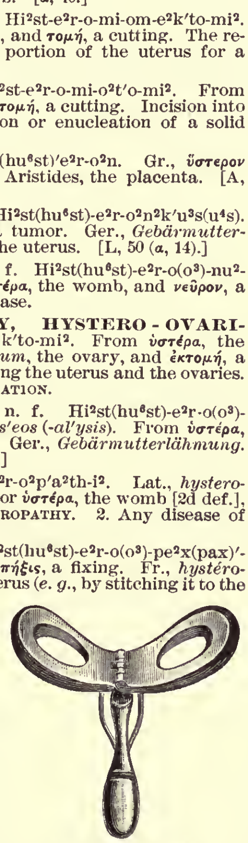
HYSTEROMYOMECTOMY, n. Hi^{2}st-e^{2}r-o-mi-om-e^{2}k′to-mi^2. From ὑστέρα, the womb, μῦς, a muscle, and τομή, a cutting. The removal of the whole or supravaginal portion of the uterus for a myoma of that organ. [*a*, 40.]

HYSTEROMYOTOMY, n. Hi^{2}st-e^{2}r-o-mi-o^{2}t′o-mi^2. From ὑστέρα, the womb, μῦς, a muscle, and τομή, a cutting. Incision into the body of the womb for the excision or enucleation of a solid tumor. [*a*, 40.]

HYSTERON (Lat.), n. n. Hi^{2}st(hu^{6}st)′e^{2}r-o^{2}n. Gr., ὕστερον (from ὕστερος, later). Of Galen and Aristides, the placenta. [A, 311 (*a*, 17).]

HYSTERONCUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}n^{2}k′u^{3}s(u^{4}s). From ὑστέρα, the womb, and ὄγκος, a tumor. Ger., *Gebärmuttergeschwulst*. A swelling or tumor of the uterus. [L, 50 (*a*, 14).]

HYSTERO-NEUROSIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-nu^2-ro′si^{2}s. Gen., *-os′eos* (*-is*). From ὑστέρα, the womb, and νεῦρον, a nerve. A neurosis due to uterine disease.



HYSTERO-OOPHORECTOMY, HYSTERO-OVARIOTOMY, n's. Hi^{2}st-e^{2}r-o-o-o-fo^{2}r-e^{2}k′to-mi^2. From ὑστέρα, the womb, ὠόφορος, egg-bearing, or *ovarium*, the ovary, and ἐκτομή, a cutting out. The operation of removing the uterus and the ovaries. —**Cæsarean h.-o.** See *Porro's* OPERATION.

HYSTEROPARALYSIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-pa^{2}r(pa^{3}r)-a^{2}l(a^{3}l)′i^2(u^6)-si^{2}s. Gen., *-ys′eos* (*-al′ysis*). From ὑστέρα, the womb, and παράλυσις, paralysis. Ger., *Gebärmutterlähmung*. Paralysis of the uterus. [L, 50 (*a*, 14).]

HYSTEROPATHY, n. Hi^{2}st-e^{2}r-o^{2}p′a^{2}th-i^2. Lat., *hysteropathia* (from ὕστερος, later [1st def.], or ὑστέρα, the womb [2d def.], and πάθος, a disease). 1. See DEUTEROPATHY. 2. Any disease of the womb.

HYSTEROPEXIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-pe^{2}x(pax)′-i^2-a^3. From ὑστέρα, the womb, and πῆξις, a fixing. Fr., *hystéropexie*. An operation for fixing the uterus (*e. g.*, by stitching it to the anterior abdominal wall). ["Prog. méd.," Jan. 26, 1889, p. 73; "Union méd.," Dec. 11, 1888, p. 849.]

HYSTEROPHORE, n. Hi^{2}st′-e^{2}r-o-for. From ὑστέρα, the womb, and φορός, bearing. Ger., *Hysterophor*, *Gebärmutterträger*. An apparatus for sustaining the uterus in its normal position, used in uterine version and prolapse. [A, 326 (*a*, 21).] —**Zwank and Schilling's h.** A h. consisting of two plates in the form of a butterfly's wings, which can be laid together or spread apart by means of a screw running through a stem or handle to which they are attached. [L, 20.]

A HYSTEROPHORE.

HYSTEROPHTHISIS (Lat.), **HYSTEROPHTHOE** (Lat.), n's f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}t(o^{2}f)′i^{2}s(thi^{2}s)-i^{2}s, -o^{2}f′tho(tho^2)-e(a). Gen., *-is′eos* (*-oph′thisis*), *-oph′thoes*. From ὑστέρα, the womb, and φθίσις, a wasting. Ger., *Gebärmutterschwindsucht*. Emaciation due to uterine disease.

HYSTEROPHYMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-fi(fu^6)′-ma^3. Gen., *-phym′atos* (*-atis*). From ὑστέρα, the womb, and φῦμα, a growth. Ger., *Gebärmuttergeschwulst*. A tumor of the uterus. [L, 50 (*a*, 14).]

HYSTEROPHYSA (Lat.), **HYSTEROPHYSE** (Lat.), **HYSTEROPHYSEMA** (Lat.), n's f., f., and n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-fi(fu^6)′sa^3, -se(sa), -fi^{2}s(fu^{6}s)-e(a)′ma^3. Gen., *-phy′sæ*, *-phys′es*, *-physem′atos* (*-atis*). From ὑστέρα, the womb, and φῦσα, gas. Fr., *hystérophyse*. See PHYSOMETRA.

HYSTEROPHYTAL, adj. Hi^{2}st-e^{2}r-o^{2}f′i^2-t'l. Pertaining to or having the qualities of a hysterophyte. [L, 107.]

HYSTEROPHYTE, n. Hi^{2}st′e^{2}r-o-fit. From ὕστερος, behind, and φυτόν, a plant. Fr., *hystérophyte*. An individual of the *Hysterophyta* (Fr., *hystérophytes*; Ger., *Nachsprosser*), which are: Of Endlicher, a section of the *Thallophyta*; in more recent classifications, a cohort of the *Gymnospermeæ*, province of thallogens, comprising the *Fungi*. [B, 34; B, 104, 170 (*a*, 24).]

HYSTEROPLASMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-pla^{2}z-(pla^{3}s)′ma^3. Gen., *-plas′matos* (*-atis*). A plastic model of the uterus, for use as a phantom in connection with a dried or an artificial pelvis. [A, 85.]

HYSTEROPLEGY, n. Hi^{2}st′e^{2}r-o-plej-i^2. Lat., *hysteroplegia* (from ὑστέρα, the womb, and πληγή, a blow. See HYSTEROPARALYSIS.

HYSTEROPNIX (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}p′ni^{2}x(nex). Gen., *-pni′gos* (*-pni′gis*). From ὑστέρα, the womb, and πνίξ, suffocation. See GLOBUS *hystericus*.

HYSTEROPOLYPUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-po^{2}l′-i^{2}p(u^{6}p)-u^{3}s(us). From ὑστέρα, the womb, and πολύπους, a polypus. A uterine polypus.

HYSTEROPSELLISMUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-se^{2}l(se^{3}l)-i^{2}z(i^{2}s)′mu^{3}s(mu^{4}s). From ὕστερος, behind, and ψελλισμός, a stammering. Fr., *bégaiement postérieur* [Malbouche]. Stammering from spasm of the larynx. [L, 50 (*a*, 14).]

HYSTEROPSOPHY, n. Hi^{2}st-e^{2}r-o^{2}ps′o-fi^2. Lat., *hysterosophia* (from ὑστέρα, the womb, and ψόφος, any inarticulate sound). The sound of an escape of air from the uterus. [A, 322.]

HYSTEROPSYCHOSIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-si-(psu^6)-ko(cho^2)′si^{2}s. Gen., *-os′eos* (*-es*). From ὑστέρα, the womb, and ψυχή, the mind. Mania or other mental disorder due to uterine disease. [*a*, 40.]

HYSTEROPTOSIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}p-to′si^{2}s. Gen., *-pto′seos* (*-ptos′is*). From ὑστέρα, the womb, and πτῶσις, a falling. Fr., *hystéroptose*. Ger., *Mutterumstülpung*. Inversion of the uterus. [A, 88.]

HYSTERORRHAGIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}r-raj-(ra^{3}g)′i^2-a^3. From ὑστέρα, the womb, and ῥηγνύναι, to burst through. Fr., *hystérorrhagie*. Ger., *Gebärmutterblutung*. See METRORRHAGIA.

HYSTERORRHAPHY, n. Hi^{2}st-e^{2}r-o^{2}r-ra^{2}f-i^2. From ὑστέρα, the womb, and ῥαφή, a seam. Fr., *suture de l'utérus*. Ger., *Hysterorrhaphie*, *Uterusnaht*. 1. The operation of closing a uterine incision with sutures, as after the Cæsarean operation. 2. See HYSTEROPEXIA.

HYSTÉRORRHÉE (Fr.), n. Es-ta-ror-ra. See HYSTERORRHŒA.

HYSTERORRHEXIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-ro^{2}r-re^{2}x-(rax)′i^{2}s. Gen., *-rhex′eos* (*-rhex′is*). From ὑστέρα, the womb, and ῥῆξις, a breaking. Ger., *Gebärmutterzerreissung*. Rupture of the uterus. [L, 50, 107 (*a*, 14).]

HYSTERORRHŒA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}r-re′(ro^2′e^2)-a^3. From ὑστέρα, the womb, and ῥοία, a flowing. Fr., *hystérorrhée*. Ger., *Gebärmutterfluss*. A discharge from the uterus. [L, 30, 50, 107 (*a*, 14).]

HYSTERORRHOIC, adj. Hi^{2}st-e^{2}r-o^{2}r-ro′i^{2}k. Lat., *hysterorrhoicus*. Pertaining to hysterorrhœa. [L, 50 (*a*, 14).]

HYSTERORRHOISCHESIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}r-ro(ro^2)-i^{2}sk(i^{2}sch^2)′e^{2}s-i^{2}s. Gen., *-es′eos* (*-is′chesis*). From ὑστέρα, the womb, ῥοία, a flowing, and σχέσις, retention. The suspension of a hysterorrhœa. [L, 50 (*a*, 14).]

HYSTERORRHOISCHETIC, adj. Hi^{2}st-e^{2}r-o^{2}r-ro-i^{2}s-ke^{2}t′-i^{2}k. Lat., *hysterorrhoischeticus*. Referring to or caused by hysterorrhoischesis. [L, 50 (*a*, 14).]

HYSTEROSALPINX (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-sa^{2}l-(sa^{3}l)′pi^{2}n^{2}x. Gen., *-salpin′gos* (*-in′gis*). From ὑστέρα, the womb, and σάλπιγξ, a tube. Ger., *Muttertrompete*. The oviduct. [L, 50 (*a*, 14).]

HYSTEROSCIRRHUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-si^{2}r-(ski^{2}r)′ru^{3}s(ru^{4}s). From ὑστέρα, the womb, and σκιῤῥός, scirrhus. Cancer of the uterus. [L, 50, 107 (*a*, 14).]

HYSTÉROSCOPE (Fr.), n. Es-ta-ro-skop. From ὑστέρα, the womb, and σκοπεῖν, to examine. Of Colombat, a speculum with a reflector for throwing light into the uterus. [*a*, 40.]

HYSTEROSPASM, n. Hi^{2}st′e^{2}r-o-spa^{2}z'm. Lat., *hysterospasmus* (from ὑστέρα, the womb, and σπασμός, a spasm). Ger., *Mutterkrampf*. Spasm of the uterus. [L, 30, 50, 107 (*a*, 14).]

HYSTEROSTOMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o^{2}st′o^{2}m-a^3. Gen., *-stom′atos* (*-atis*). From ὑστέρα, the womb, and στόμα, the mouth. Ger., *Muttermund*. The os uteri externum. [L, 50 (*a*, 14).]

HYSTEROSTOMATOME, n. Hi^{2}st-e^{2}r-o-stom′a^3-tom. Lat., *hysterostomatomus* (from ὑστέρα, the womb, στόμα, the mouth, and τομή, a cutting). Fr., *hystérostomatome*. A knife for performing hystero-stomatotomy. [L, 41.]

HYSTEROSTOMATOTOMY, n. Hi^{2}st″e^{2}r-o-stom-a^{2}t-o^{2}t′o-mi^2. From ὑστέρα, the womb, στόμα, the mouth, and τομή, a cutting. The operation of enlarging the os uteri by incision. [A, 322.]

HYSTEROSTOMIUM (Lat.), n. n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-stom-(sto^{2}m)′i^2-u^{3}m(u^{4}m). From ὑστέρα, the womb, and στόμα, the mouth. See Os *uteri*.

HYSTEROSYNIZESIS (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-si^{2}n-(su^{6}n)-i^2-ze(za)′si^{2}s. Gen., *-es′eos* (*-esis*). From ὑστέρα, the womb, and συνίζησις, a collapse. 1. Occlusion of the uterus. 2. Adhesion of the uterus to some adjacent structure. [L, 50 (*a*, 14).]

HYSTEROTOKOTOMY, n. Hi^{2}st-e^{2}r-o-tok-o^{2}t′o-mi^2. Lat., *hysterotokotomia*, *hysterotomatocia* (from ὑστέρα, the womb, τόκος, a bringing forth, and τομή, a cutting). See *Cæsarean* OPERATION.

HYSTEROTOME, n. Hi^{2}st′e^{2}r-o-tom. Lat., *hysterotomion*, *hysterotomium* (from ὑστέρα, the womb, and τομή, a cutting). Fr., *hystérotome*. Ger., *Kaiserschnittsmesser*. A knife for incising the cervix uteri. [L, 30, 41, 49, 50 (*a*, 14).]—**Peaslee's h.** A long

tube flattened and tapering at the end so as to be introduced into the uterine cervix and carrying a concealed knife which is made to follow the probe-point into the cervix, incising it as it enters. [*a*, 40.]—**Stohlmann's h.** A scissor-shaped instrument

STOHLMANN'S HYSTEROTOME.

with the cutting edges reversed. It is introduced into the womb, and the blades, being separated, incise both sides of the cervix upon its withdrawal. [*a*, 40.]—**White's h.** An instrument shaped like a

WHITE'S HYSTEROTOME.

uterine sound but carrying concealed knives, which are thrown out from the shaft after the instrument is introduced into the womb, and the incising done by withdrawing it. [*a*, 40.]

HYSTEROTOMIA (Lat.), n. f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-tom(to^{2}m)'-i^2-a^3. See HYSTEROTOMY.—**H. vaginalis.** See HYSTEROSTOMATOTOMY.

HYSTEROTOMION (Lat.), **HYSTEROTOMIUM** (Lat.), n's n. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-tom(to^{2}m)'i^2-o^{2}n, -u^{3}m(u^{4}m). See HYSTEROTOME.

HYSTEROTOMOTOCIA (Lat.), **HYSTEROTOMOTOKIA** (Lat.), n's f. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-tom(to^{2}m)-o(o^3)-to(to^2)'si^2(ki^2)-a^3, -to(to^2)'ki^2-a^3. Of Rousset, the Cæsarean operation. [A, 43.]

HYSTEROTOMY, n. Hi^{2}st-e^{2}r-o^{2}t'o-mi^2. Lat., *hysterotomia* (from ὑστέρα, the womb, and τομή, a cutting). Fr., *hystérotomie.* Ger., *Hysterotomie, Gebärmutterschnitt.* 1. An incision into the uterus. 2. Dissection of the uterus.—**Abdominal h., Cæsarean h.** See *Cæsarean* OPERATION.—**Cervical h.** Fr., *hystérotome cervicale.* Uterine tracheotomy. [*a*, 40.]—**Igneous h.** Dieulafoy's method for the enucleation of solid tumors of the womb, especially fibroids, with a knife heated to a red heat. [Barnes (*a*, 40).]—**Laparo-h.** Ger., *Bauchgebärmutterschnitt.* See *Cæsarean* OPERATION.—**Supravaginal h.** Incision into the uterus in Cæsarean section. [*a*, 40.]—**Vaginal h.** Syn.: *dilatation of the cervix by incisions* (2d def.). 1. The operation of making one or more incisions into the lower segment of the uterus by way of the vagina in cases of real or apparent occlusion of the os uteri. 2. The same operation for the purpose of enlarging the mouth of the womb. [A, 29, 40.]

HYSTERO-TRACHELORRHAPHY, n. Hi^{2}st-e^{2}r-o-tra^{2}k-e^{2}l-o^{2}r'ra^{2}f-i^2. From ὑστέρα, the womb, τράχηλος, the neck, and ῥαφή, a seam. Syn.: *trachelorrhaphy* [Dudley]. Of P. F. Mundé, Emmet's operation for the repair of laceration of the cervix uteri.

HYSTERO-TRACHELOTOMY, n. Hi^{2}st-e^{2}r-o-tra^{2}k-e^{2}l-o^{2}t'-o-mi^2. From ὑστέρα, the womb, τράχηλος, the neck, and τομή, a cutting. Incision of the neck of the uterus.

HYSTÉRO-TRAUMATISME (Fr.), n. Es-ta-ro-tro-ma^3-tez-m'. From ὑστέρα, the womb, and τραῦμα, a wound. See *Traumatic* HYSTERIA.

HYSTEROTRISMUS (Lat.), n. m. Hi^{2}st(hu^{6}st)-e^{2}r-o(o^3)-tri^{2}z-(tri^{2}s)'mu^{3}s(mu^{4}s). From ὑστέρα, the womb, and τρισμός, a chirping. Ger., *Muttermundskrampf.* Spasm of the os uteri. [L, 50, 107 (*a*, 14).]

HYSTERUM (Lat.), n. n. Hi^{2}st(hu^{6}st)'e^{2}r-u^{3}m(u^{4}m). Gr., ὕστερον. See HYSTERON.

HYSTREMPHYSEMA (Lat.), n. n. Hi^{2}st(hu^{6}st)-re^{2}m-fi(fu^6)-se-(sa)'ma^3. Gen., *-em'atos* (*-atis*). From ὑστέρα, the womb, and ἐμφύσημα, an inflation. See PHYSOMETRA.

HYSTRIACIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-tri(tri^2)'a^3-si^{2}s(ki^{2}s). From ὕστριξ, the porcupine. Ichthyosis hystrix. [G.]

HYSTRICIASIS (Lat.), n. f. Hi^{2}s(hu^{6}s)-tri^2-si(ki^2)-a(a^3)'si^{2}s. Gen., *-as'eos* (*-i'asis*). From ὕστριξ, the hedgehog. Ger., *Stachelschweinkrankheit.* 1. Ichthyosis hystrix. 2. A disease of the hairs, in which they become rigid like the quills of a porcupine. [G.] See TRICHOSIS *setosa.*

HYSTRICINUS (Lat.), adj. Hi^{2}st(hu^{6}st)-ri^2-si(ke)'nu^{3}s(nu^{4}s). Of or pertaining to a porcupine. [B.]

HYSTRICISM, n. Hi^{2}s'tri^2-si^{2}z'm. Lat., *hystricismus* (from ὕστριξ, the hedgehog). Ichthyosis hystrix. [G.]

HYSTRICITES (Lat.), n. m. Hi^{2}s(hu^{6}s)-tri^2-sit(ket)'ez(as). See BEZOAR *histricinum.*

HYSTRIX (Lat.), n. m. and f. Hi^{2}s(hu^{6}s)'tri^{2}x. Gen., *-rich'os* (*-rich'is*). Gr., ὕστριξ. 1. The porcupine. 2. Ichthyosis hystrix. [G.] 3. Of Mönch, the genus *Asprella.* [B, 42 (*a*, 24).]—**H. cristata.** The common or crested porcupine. Its flesh and liver are considered purgative and diuretic, and the fat is used in incarcerated hernia. The hollow viscera furnish bezoar hystricinum. [B, 180 (*a*, 24).]—**H. frutex.** See BARLERIA *prionitis.*

HYTHE, n. Hith^2. A sea-bathing resort near Dover, Kent, England. [L, 30, 41 (*a*, 14).]

I

IABORANDI, n. Ya^{3}b-o^{2}r-a^{3}nd'e. See JABORANDI.

IACA (Lat.), n. f. I(i^2)-a(a^3)'ka^3. The *Artocarpus integrifolia.* [B, 121 (*a*, 24).]—**I. indica.** See *I.*

IACEA (Lat.), n. f. I(i^2)-a^3-se(ka)'a^3. The *Viola tricolor.* [A, 322.]

IACINTHUS (Lat.), n. m. I(i^2)-a^3-si^{2}nth(ki^{2}nth)'u^{3}s(u^{4}s). See HYACINTHUS.

IACTURA (Lat.), n. f. I(i^2)-a^{2}k(a^{3}k)-tu^2(tu)'ra^3. See JACTURA.

IALEMOS (Lat.), **IALEMUS** (Lat.), adj's. I(i^2)-a^{2}l(a^{3}l)'e^{2}m-o^{2}s, -u^{3}s(u^{4}s). Gr., ἴαλεμος (from ἰαλεμίζειν, to bewail). Fr., *ialème.* Ger., *heulend.* Melancholy; as a n., hypochondriacal complaining. [L, 50 (*a*, 14).]

IAMA (Lat.), n. n. I^2-a(a^3)'ma^3. Gr., ἴαμα (from ἰᾶσθαι, to heal). 1. A remedy. [L, 50, 135 (*a*, 39).] 2. See IASIS.

IAMA IMO, n. In Japan, the *Dioscorea japonica.* The decorticated root is there used in diarrhœa. ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

IAMATOLOGY, n. I^2-a^{2}m-a^3-to^{2}l'o-ji^2. Lat., *iamatologia* (from ἴαμα, a remedy, and λόγος, understanding). Fr., *iamatologie.* Ger., *Heilmittellehre.* The science of materia medica and therapeutics. [B, 88 (*a*, 39).]

IAMATOSYNTAXIOLOGIA (Lat.), n. f. I^2-a^{2}m(a^{3}m)''a^{2}t-(a^{3}t)-o(o^3)-si^{2}n(su^{6}n)-ta^{2}x(ta^{3}x)-i^2-o(o^3)-loj(lo^{2}g)'i^2-a^3. From ἴαμα, a remedy, σύνταξις, a putting together, and λόγος, understanding. Ger., *Heilmittelverordnungslehre.* The science of prescribing medicines. [L, 50 (*a*, 14).]

IAMATOSYNTAXIS (Lat.), n. f. I^2-a^{2}m(a^{3}m)'a^{2}t(a^{3}t)-o(o^3)-si^{2}n(su^{6}n)-ta^{2}x(ta^{3}x)'i^{2}s. Gen., *-tax'eos* (*-tax'is*). From ἴαμα, a remedy, and σύνταξις, a putting together. Ger., *Arzneibereitung.* The preparation of medicines. [L, 50 (*a*, 14).]

IAMATOTAXIOLOGIA (Lat.), n. f. I^2-a^{2}m(a^{3}m)''a^{2}t(a^{3}t)-o-(o^3)-ta^{2}x(ta^{3}x)-i^2-o(o^3)-loj(lo^{2}g)'i^2-a^3. See IAMATOSYNTAXIOLOGIA.

IAMMAUCO (Jap.), n. A fresh-water fish found in Japan. Dried and powdered, it is supposed to be remedial in mammary diseases. [B, 88 (*a*, 39).]

IANTHINUS (Lat.), adj. I^2-a^{2}n(a^{3}n)'thi^{2}n-u^{3}s(u^{4}s). Gr., ἰάνθινος, violet-colored; as a n., in the n., *ianthinum*, the color violet. [A, 311, 312.]

IASIS (Lat.), n. f. I^2-a(a^3)'si^{2}s. Gen., *-as'eos. -ia'sis.* Gr., ἴασις (from ἰᾶσθαι, to cure). A healing, a mode of treatment, a cure. [L, 50 (*a*, 14).]

IASMELÆON (Lat.), n. n. I^2-a(a^{3}s)-me^{2}l-e'(a^3'e^2)-o^{2}n. Gr., ἰασμέλαιον. 1. Of Dioscorides, a Persian perfume, perhaps oil of jasmin. [A, 311 (*a*, 21).] 2. An ointment having a sweet odor; jasmin ointment. [L, 50 (*a*, 14).]

IASPIS (Lat.), n. f. I^2-a^{2}s(a^{3}s)'pi^{2}s. Gen., *-asp'idos* (*-idis*). See JASPIS.

IATER (Lat.), n. m. I^2-a(a^3)'tu^{6}r(tar). Gen., *-at'ros* (*-ris*). Gr., ἰατήρ. A physician. [A, 311 (*a*, 17).]

IATERIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-e(a)'ri^2-a^3. Gr., ἰατήρια. Therapeutics. [L, 50 (*a*, 14).]

IATERION (Lat.), n. n. I^2-a^2(a^{3}t)-e(a)'ri^2-o^{2}n. Gr., ἰατήριον. Ger., *Iaterie.* See IASIS. [L, 50 (*a*, 14).]

IATERIOUS, adj. I-a^{2}t-e'ri^2-u^{3}s. Gr., ἰατήριος. Lat., *iaterius.* Healing. [L, 50 (*a*, 14).]

IATICOS (Lat.), adj. I^2-a^{2}t(a^{3}t)'i^{2}k-o^{2}s. Gr., ἰατικός. Healing. [Dioscorides (A, 311 [*a*, 17]).]

IATORIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-o(o^2)'ri^2-a^3. Gr., ἰατορία. Therapeutics. [A, 311 (*a*, 17).]

IATOS (Lat.), adj. I^2-a(a^3)'to^{2}s. Gr., ἰατός. Curable. [A, 311 (*a*, 17).]

IATRALEIPTES (Lat.), n. m. I^2-a^{2}t(a^{3}t)-ra^3-lip'(le^2'i^{2}p)-tez-(tas). Gr., ἰατραλείπτης. A practitioner of inunction, friction, etc. [A. 311.]

IATRALEIPTIC, adj. I-a^{2}t-ra^3-lip'ti^{2}k. See IATRALIPTIC.

IATRALEIPTICE (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ra^3(ra)-lip'(le^2'i^{2}p)-ti^2-se(ka). Gen., *-eip'tices* (*-œ*). Gr., ἰατραλειπτική (from ἰατρός, a surgeon, and ἀλείφειν, to anoint with oil). The treatment of disease by inunctions, fomentations, and other external medicinal applications. [G.]

IATRALEPTES (Lat.), n. m. I(e)-a^{2}t(a^{3}t)-ra^4-le^{2}pt(lapt)'ez(as). Gen., *-ep'tu* (*-œ*). See IATRALEIPTES.

IATRALEPTIC, adj. I-a^{2}t-ra^3-le^{2}p'ti^{2}k. Fr., *iatraleptique.* See IATRALIPTIC.

IATRALEPTICA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ra^2(ra^3)-le^{2}pt(lapt)'-i^{2}k-a^3. See IATRALEIPTICE.

IATRALIPTA (Lat.), n. m. I^2-a^{2}t(a^{3}t)-ra^3-li^{2}p(lep)'ta^3. See IATRALEIPTES.

IATRALIPTIC, adj. I-a^{2}t-ra^3-li^{2}p'ti^{2}k. Fr., *iatraliptique.* Pertaining to iatraleiptice.

IATRALIPTICS, n. sing. I-a^{2}t-ra^3-li^{2}p'ti^{2}ks. See IATRALEIPTICE.

IATREIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-re'(re^2'i^2)-a^3. Gr., ἰατρεία (from ἰατρεύειν, to treat medically). Medical treatment. [A, 311 (*a*, 17).]

IATREION (Lat.), **IATREIUM** (Lat.), **IATREON** (Lat.), **IATREUM** (Lat.), n's n. I^2-a^{2}t(a^{3}t)-re'(re^2'i^2)-o^{2}n, -u^{3}m(u^{4}m), -re(ra)'o^{2}n, -u^{3}m(u^{4}m). Gr., ἰατρεῖον. 1. A surgeon's place of business. 2. The expense of medical treatment. [A, 311 (*a*, 21).]

IATREUSIOLOGY, n. I-a^{2}t-ru^2-si^2-o^{2}l'o-ji^2. Lat., *iatreusiologia* (from ἰάτρευσις, medical treatment, and λόγος, understanding). Ger., *Heilkunst.* The science of therapeusis. [L, 50 (*a*, 14); L, 135 (*a*, 39).]

IATREUSIS (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ru^2'si^{2}s. Gen., *-eus'eos* (*-eus'is*). Gr., ἰάτρευσις. See IATREIA.

IATRIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ri(re)'a^3 (1st def.), -a^{2}t(a^{3}t)'ri^2-a^3 (2d def.). Gr., ἰατρεία (1st def.), ἰάτρια (2d def.). 1. Healing, medical treatment; the art of healing or curing. 2. A female physician or surgeon. [A, 311 (*a*, 17); L, 107.]

IATRIC, adj. I-a^{2}t'ri^{2}k. Gr., ἰατρικός. Lat., *iatricus.* Fr., *iatrique.* Of, pertaining to, or for the use of a physician; medical. [A, 311 (*a*, 17).]

IATRICA (Lat.), n. f. I^2-a^{2}t(a^{3}t)'ri^{2}k-a^3. See IATREIA.

IATRICAL, adj. I-a^{2}t'ri^2-k'l. See IATRIC.

IATRICE (Lat.), n. f. I^2-a^{2}t(a^{3}t)'ri^2-se(ka). Gr., ἰατρική. See IATREIA.

IATRINE (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ri(re)'ne(na). See IATRIA (2d def.).

IATROBULÆOLOGIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)''ro(ro^3)-bu^{2}l-(bul)-e^2(a^3-e^2)-o^{2}l-oj(o^{2}g)'i^2-a^3. From ἰατρός, a surgeon, βουλαῖος, advisory, and λόγος, understanding. Of V. D. Hagen, the process of deducing a therapeutical indication. [A, 322.]

IATROCHEMIA (Lat.), n. f. I(e)-a^{2}t(a^{3}t)-ro(ro^3)-ke^{2}m(ch^{2}am)-i(e)'a^3. From ἰατρός, a surgeon, and χημεία, chemistry. 1. Medical chemistry. 2. See CHEMIATRY. [L, 50, 135 (*a*, 39).]

IATROCHEMICUS (Lat.), adj. I^2-a^{2}t(a^{3}t)'ro(ro^3)-ke^{2}m-(ch^{2}am)'i^{2}k-u^{3}s(u^{4}s). See CHEMIATRIC; as a n., see CHEMIATER.

IATROCHEMIST, n. I-a^{2}t-ro-ke^{2}m'i^{2}st. See CHEMIATER.

IATROCHYMIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)'ro(ro^3)-ki^{2}m(ch^{2}u^{6}m)'-i^2-a^3. See CHEMIATRY.

IATROCHYMICUS (Lat.), adj. I^2-a^{2}t(a^{3}t)'ro(ro^3)-ki^{2}m(ch^{2}u^{6}m)'-i^{2}k-u^{3}s(u^{4}s). See CHEMIATRIC; as a n., see CHEMIATER.

IATROGNOMONICS, n. sing. I-a^{2}t''ro-no-mo^{2}n'i^{2}ks. Lat., *iatrognomica, iatrognomonice* (from ἰατρός, a surgeon, and γνώμη, understanding). Ger., *Iatrognomik.* Of C. W. Hufeland, the science of the objects or purposes for which various remedies are used. [L, 50 (*a*, 14).]

IATROLEIPTICS, n. sing. I-a-tro-lip'ti^{2}ks. See IATRALEIPTICE.

IATROLIPTIC, adj. I-a^{2}t-ro-li^{2}p'ti^{2}k. See IATRALIPTIC.

IATROLOGIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ro^{2}l-oj(o^{2}g)'i^2-a^3. Gr., ἰατρολογία (from ἰατρός, a physician, and λόγος, understanding). The science of medicine. [L, 50 (*a*, 14).]

IATROMANTIA (Lat.), n. f. I^2-a^{2}t(a^{3}t)-ro(ro^3)-ma^{2}n(ma^{3}n)-ti(te)'a^3. From ἰατρός, a physician, and μαντεία, divination. Medical divination. [L, 50 (*a*, 14).]

IATROMANTIC, adj. I-a^{2}t-ro-ma^{2}n'ti^{2}k. Fr., *iatromantique.* Pertaining to iatromantia. [D.]

IATROMANTIS (Lat.), n. m. I^2-a^{2}t(a^{3}t)-ro(ro^3)-ma^{2}n(ma^{3}n)'-ti^{2}s. Gen., *-mant'eos* (*-is*). Gr., ἰατρόμαντις (from ἰατρός, a physician, and μάντις, a seer). A physician and seer. [L, 50, 135 (*a*, 39).]

IATROMATHEMATICS, n. sing. I-a^{2}t-ro-ma^{2}th-e^2-ma^{2}t'i^{2}ks. From ἰατρός, a surgeon, and μαθηματική, mathematics. Ger., *Iatromathematik.* The theory that physiology and medicine are based on mathematical principles. [L, 50 (*a*, 14).]

IATROMATHEMATICUS (Lat.), n. m. I(e)-a^{2}t(a^{3}t)-ro(ro^3)-ma^{2}th(ma^{3}th)-e^2(a)-ma^{2}t(ma^{3}t)'i^{2}k-u^{3}s(u^{4}s). Gr., ἰατρομαθηματικός. Fr., *iatromathématicien.* 1. Of Greek writers, a physician and an astrologer. 2. In modern phraseology, a believer in *iatromathematics.* [L, 50 (*a*, 14).]

IATROMECHANICIAN, n. I-a^{2}t-ro-me^{2}k-a^{2}n-i^{2}sh'a^{2}n. Lat., *iatromechanicus.* See IATROMATHEMATICUS.

IATROMECHANICS, n. sing. I-a^{2}t-ro-me^{2}k-a^{2}n'i^{2}ks. See IATROMATHEMATICS.

IATROMECHANICUS (Lat.), n. m. I^2-a^{2}t(a^{3}t)-ro(ro^3)-me^{2}k-(mach^2)-a^{2}n(a^{3}n)'i^{2}k-u^{3}s(u^{4}s). See IATROMATHEMATICUS.

IATROMECHANISM, n. I-a^{2}t-ro-me^{2}k'a^{2}n-i^{2}z'm. See IATROMATHEMATICS.

IATROPHA (Lat.), n. f. I^2-a^{2}t(a^{3}t)'ro^{2}f-a^3. See JATROPHA.

IATROPHIC, adj. I^2-a^3-trof'i^{2}k. See JATROPHIC.

IATROPHYLACTA (Lat.), **IATROPHYLACTES** (Lat.), n's m. I^2-a^{2}t(a^{3}t)-ro(ro^3)-fi^{2}l(fu^{6}l)-a^{2}k(a^{3}k)'ta^3, -tez(tas). From ἰατρεία, medical treatment, and φυλακτήρ (= φύλαξ), a sentinel. Ger., *Arzneienfreund.* One who is fond of taking drugs and always thinking of preserving his health. [A, 322.]

IATROPHYSICS, n. sing. I-a^{2}t-ro-fi^{2}z'i^{2}ks. From ἰατρός, a physician, and φυσική, physics. Fr., *iatrophysique.* Ger., *Iatrophysik.* Physics applied to medicine. [A, 322.]

IATROPHYSICUS (Lat.), n. m. I^2-a^{2}t(a^{3}t)-ro(ro^3)-fi^{2}z(fu^{6}s)'-i^{2}k-u^{3}s(u^{4}s). Fr., *iatrophysicien.* Of Marcus Florentinius, one who believes in or practices in conformity with iatrophysics. [L, 50 (*a*, 14).]

IATROS (Lat.), n. m. I^2-a^{2}t(a^{3}t)'ro^{2}s. Gr., ἰατρός. A physician or surgeon. [L, 50 (*a*, 14).]

IATROSOPHIST, n. I-a^{2}t-ro-so^{2}f'ist. Gr., ἰατροσοφιστής (from ἰατρός, a physician, and σοφιστής, a master of one's craft). Lat., *iatrosophista.* A physician expert in the theory of his art, or one who also belonged to the sophists. [*a*, 39.]

IATROTECHNA (Lat.), **IATROTECHNES** (Lat.), n's m. I^2-a^{2}t(a^{3}t)-ro(ro^3)-te^{2}k(te^{2}ch)'na^3, -nez(nas). Gen., *-tech'næ, -tech'nu* (*-æ*). Gr., ἰατροτέχνης (from ἰατρός, a physician, and τέχνη, art). A practical physician. [L, 50 (*a*, 14).]

IATROTECHNIC, adj. I-a^{2}t-ro-te^{2}k'ni^{2}k. Lat., *iatrotechnicus.* Fr., *iatrotechnique.* Ger., *heilkünstlerisch.* Pertaining to iatrotechnics. [A, 322.]

IATROTECHNICS, n. sing. I-a^{2}t''ro-te^{2}k'ni^{2}ks. Lat., *iatrotechnica.* Fr., *iatrotechnique.* Ger., *praktische Heilkunst.* The art of medicine. [A, 322.]

IATRUS (Lat.), n. m. I^2-a^{2}t(a^{3}t)'ru^{3}s(ru^{4}s). See IATROS.

IAXTFELD (Ger.), n. Ya^{3}kst'fe^{2}ld. A place in Würtemberg, Germany, where there are saline springs and a bathing establishment. [L, 30, 49 (*a*, 14).]

IBA, n. In the Gaboon country, Africa, the fat of the cotyledons of *Irvingia gabonensis*, called gaboon-chocolate; used as food by resident Europeans. [B, 121 (*a*, 35); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]

IBBENMOOSBAD (Ger.), n. I^{2}b'be^{2}n-mos-ba^{3}d. A place in the canton of Lucerne, Switzerland, where there is a spring containing calcium and aluminium carbonates, also a bathing establishment. [L, 30 (*a*, 14).]

IBÉRIDE (Fr.), n. E-ba-red. See IBERIS.—**I. amère.** See IBERIS *amara.*—**I. à tige nue.** See IBERIS *nudicaulis.*—**I. de Perse.** See IBERIS *semperflorens.*

IBERIS (Lat.), n. f. I^{2}b-e(a)'ri^{2}s. Gen., *-er'idos* (*-idis*). Gr., ἰβηρίς (2d def.). Fr., *ibéride.* Ger., *Bauernsenf.* 1. Candytuft; a genus of the *Cruciferæ*, tribe *Thlaspideæ.* 2. Of Dioscorides, the *Lepidium.* The *Iberideæ* of Webb and Berth and of Meissner, and the *Iberidineæ* (Fr., *iberidinées*) of Baillon, are divisions of the same order and tribe. [A, 479 (*a*, 21); B, 34, 42, 64, 121, 170, 173, 180 (*a*, 24).]—**I. amara.** Fr., *ibéride amère, thlaspi de montagne.* Clown's mustard, sciatica-cress, wild (or bitter) candytuft; a species thought to have been used by the ancients in rheumatism and gout. The leaves, stem, root, and especially the seed, possess medicinal properties, and have been used in hypertrophy of the heart, also in asthma, bronchitis, and dropsy. The leaves are antiscorbutic, and are eaten as salad. [B, 5, 19, 34, 173, 275 (*a*, 24).]—**I. bursa pastoris.** See CAPSELLA *bursa pastoris.*—**I. campestris.** See LEPIDIUM *campestre.*—**I. nudicaulis.** Fr., *ibéride à tige nue.* A species indigenous to Europe, said to have the same properties as the *I. amara.* [B, 173 (*a*, 24).]—**I. semperflorens, I. umbellata.** Fr., *corbeille d'argent, ibéride de Perse.* Broad-leaved and purple (or common) annual candytuft; species found in southern Europe. The seeds (*semen thlaspeos cretici*) were formerly used as a diuretic and expectorant. [B, 19, 121, 180, 275 (*a*, 24).]

IBEX (Lat.), n. m. I(e)'be^{2}x. Gen., *ib'icis.* Fr., *i., bouquetin.* Ger., *Steinbock.* A species of *Capra.* Its blood, mixed with wine, was formerly used in lithiasis, and its dung in arthritic and ischiadic pains. [L, 30, 41, 94 (*a*, 14).]

IBI ARIBA, n. The *Andira inermis.* [B, 88 (*a*, 39).]

IBIRAREMA (Port.), n. E-ba^3-ra^3-ra'ma^3. In Brazil, a name for two plants, species of *Alliaria*, called *pao d'alho* and *ptii*, respectively. A mucilaginous decoction made from them is used in the constipation of low fevers and as a remedy for painful joints. [B, 88, 121 (*a*, 39).]

IBISCHA (Lat.), n. f. I^{2}b-i^{2}s'ka^3(ch^{2}a^3). From ἰβίσκος, hibiscus. Ger., *Ibisch.* An old term for the *Althæa officinalis.* [B, 18, 180 (*a*, 24).]

IBISCOS (Lat.), **IBISCUS** (Lat.), n's m. I^{2}b-i^{2}sk'o^{2}s, -u^{3}s(u^{4}s). Gr., ἰβίσκος. See HIBISCUS and ALTHÆA *officinalis.*

IBIXUMA (Port.), n. E-be-shu'ma^3. In Brazil, the *Sapindus saponaria.* [B, 121 (*a*, 35).]

IBOGA, n. In the Gaboon country, Africa, the *Tabernæmontana ventricosa.* [B, 121 (*a*, 35).]

IBOTIN, n. I^{2}b'o^{2}t-i^{2}n. A glucoside obtained from the seeds of *Ligustrum ibotu.* It forms a tough, resinous mass, reducible to a white powder, nearly insoluble in cold water and in ether, readily soluble in alcohol. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

IBUKI YOMOGI (Jap.), n. The *Artemisia vulgaris.* [B, 121 (*a*, 35).]

ICACINA (Lat.), n. f. I^{2}c-a^3-sin(ken)'a^3. Fr., *i., icacine.* Of Jussieu, and of Bentham and Hooker, a genus of the *Icacinaceæ*, which are, of Miers, a tribe of the *Olacineæ.* The *Icacineæ* are, of Bentham and Hooker (or of Miers), a tribe of the *Icacinaceæ.* [B, 19, 42, 104, 170, (*a*, 24).]—**I. senegalensis.** Fr., *i. du Sénégal.* A species the fruit of which is eaten by the natives of Senegal. [B, 173 (*a*, 24).]

ICAJA, n. An African ordeal poison resembling akazga and containing icajine. [B, 5.]

ICAJINE, n. I^{2}k'a^3-jen. A toxic alkaloid obtained from icaja, soluble in water and in alcohol. It differs materially from strychnine, and more nearly resembles brucine. [B, 93 (*a*, 14); Rabuteau

and Peyre, "Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).] Cf. Akazgin.

ICE, n. Is. Gr., κρύσταλλος. Lat., *glacies*. Fr., *glace*. Ger., *Eis*. Frozen water; used for making cooling drinks, reducing the temperature of parts, checking nausea, etc.—**I. cap.** A rubber bag shaped to fit the head and partially filled with broken i. [*a*, 40.]—**I. cataplasm, I. compress, I. poultice.** An i.-bag or poultice bound firmly to a part in order to get the joint effect of cold and compression. Used especially in hernias. [*a*, 40.]—**I.-plant.** See the major list.

ICE-PLANT, n. Is'pla3nt. 1. The *Mesembryanthemum crystallinum*. 2. In the pl., *ice-plants*, the *Mesembryaceæ*. [B, 34, 185, 275 (*a*, 24).]—**New Zealand i.-p.** The *Tetragonia expansa* and the *Mesembryanthemum australe*. [B, 275 (*a*, 24).]—**Small i.-p.** The *Mesembryanthemum sessiliflorum album*. [B, 275 (*a*, 24).]—**Tasmanian i.-p.** The *Tetragonia implexicoma*. [B, 275 (*a*, 24).]

ICESIA (Lat.), n. f. I(i2)-sez(ke2s)'i2-a3. See Hicesia.

ICHNOCARPUS (Lat.), n. m. I2k(i2ch2)-no(no3)-ka3rp'u3s(u4s). From ἴχνος, a track, and καρπός, a fruit. Fr., *ichnocarpe*. Of R. Brown, a genus of the *Apocynaceæ*, tribe *Echitideæ*. [B, 38, 42 (*a*, 24).]—**I. Afzelii, I. frutescens.** A species common in hedges in India; purgative and alterative and sometimes used in place of sarsaparilla. [B, 127, 180 (*a*, 24).]

ICHNOS (Lat.), n. n. I2k(i2ch2)'no2s. Gen., *-ich'neos*. Gr., ἴχνος. 1. Lit., a footstep, track, or trace. 2. Of Galen, the sole of the foot; of Hippocrates, that of a shoe. 3. The foot; the lower part or base of a body. [A, 311 (*a*, 17); L, 50 (*a*, 14).]

ICHOR (Lat.), n. m. I(e)'ko2r(ch2or). Gen., *-or'os* (*-is*). Gr., ἰχώρ. Fr., *i*. Ger., *I.*, *Jauche* (3d def.), *Gauche* (3d def.), *Eiterjauche* (3d def.). It., *icore*. Sp., *icor*. 1. Of Greek writers, the watery part of any of the animal juices or fluids; serum; the sap of plants; of Hippocrates, pus. 2. Of Lancisius, a juice or humor supposed to stagnate in the spleen and other glands. 3. Of modern writers, a thin, watery, and acrid discharge from a wound or ulcer; an infected or putrid animal fluid. [A, 311 (*a*, 17); L, 41, 50, 107 (*a*, 14).]—**I'ähnlich** (Ger.). See Ichoroid and Ichorous.

ICHORIZATION, n. I2k-o2r-i-za'shu3n. From ἰχώρ, ichor. The changing of tissue into or formation of ichor. [*a*, 40.]

ICHOROID, adj. I2k'o2r-oid. Gr., ἰχωροειδής (1st def.) (from ἰχώρ, ichor, and εἶδος, resemblance). Lat., *icoroides*, *ichorodes*. Fr., *ichoreux*. Ger., *jauchenähnlich*, *ichorähnlich* (2d def.). 1. Of Hippocrates, serous. 2. Resembling ichor; like pus. [A, 311 (*a*, 17); L, 50, 107 (*a*, 14).]

ICHORHÆMIA (Lat.), n. f. I(e)-ko2r(ch2o2r)-em'(a3'e2m)-i2-a3. From ἰχώρ, ichor, and αἷμα, blood. Fr., *ichorrhémie*. Ger., *Ichorrhämie*. 1. A constitutional disturbance due to the absorption of septic matters into the blood. [D, 4.] 2. Of Virchow, a morbid condition produced by contamination of the blood with ichorous products of phlegmonous inflammation not of a septic character. [A, 24.]

ICHORHÆMIC, adj. I2ko2r-e2m'i2k. Ger., *ichorrhämisch*, *ichorhämisch*. Pertaining to ichorrhæmia. [D.]

ICHORORRHŒA (Lat.), n. f. I(e)-ko2r(ch2o2r)-o2r-re'(ro2'e2)-a3. Gr., ἰχωροῤῥόια (from ἰχώρ, ichor, and ῥεῖν, to flow). An excessive ichorous discharge from a wound or inflamed surface. [*a*, 40.]

ICHOROUS, adj. I2k'o2r-u3s. Fr., *ichoreux*. Resembling ichor.

ICHTHIASIS (Lat.), n. f. I2k(i2ch2)-thi2-a(a3)'si2s. Gen., *-as'eos* (*-ias'is*). See Ichthyosis.—**I. cornigera.** See Ichthyosis *hystrix*.

ICHTHIDINE (Fr.), n. Ek-te-den. See Ichthydin.

ICHTHIN, n. I2k'thi2n. From ἰχθύς, a fish. Fr., *ichthine*, *ichthyne*. Ger., *I.* The chief proteid element in the egg-yolks of various fishes, especially the rays; a transparent, granular, homogeneous substance, soluble in hydrochloric, in phosphoric, and in acetic acids and in alkaline solutions, insoluble in water, alcohol, or ether. [B, 46, 93 (*a*, 39).]

ICHTHULINE (Fr.), n. Ek-tu6-len. See Ichthylin.

ICHTHYDIN, n. I2k'thi2d-i2n. From ἰχθύς, a fish. Fr., *ichthidine*. Of Frémy and Valenciennes, the principal nitrogenous substance found in the mature eggs of the *Cyprinoidæ*. It is soluble in acetic and in phosphoric acids. [B, 46, 93 (*a*, 39).]

ICHTHYEMATA (Lat.), n. n. pl. I2k(i2ch2)-thi2(thu6)-e2m-(am)'a2t(a3t)-a3. Gr., ἰχθυήματα. Lit., fish-scales; hence, any small, scale-like objects. [A, 311, 325.]

ICHTHYIASIS (Lat.), n. f. I2k(i2ch2)-thi2(thu6)-i2-a(a3)'si2s. Gen., *-as'eos* (*-as'is*). See Ichthyosis.

ICHTHYIC, adj. I2k'thi2-i2k. Ger., ἰχθυικός (from ἰχθύς, a fish). Of or pertaining to fishes; fishy. [L.]

ICHTHYLIN, n. I2k'thi2l-i2n. From ἰχθύς, a fish, and ὕλη, matter. Fr., *ichthuline*. An albuminous, viscid substance resembling glutin, found in the eggs of the *Cyprinoidæ*; soluble in hydrochloric, phosphoric, and acetic acids. [B, 46 (*a*, 39).]

ICHTHYOCHOLIN (Ger.), n. Ech2-tu6-o-ch2ol-en'. Of Gmelin, a crystallizable substance obtained from the bile of various species of the *Cyprineæ*. It has a sweetish, afterward very bitter, taste, and is soluble in water and in alcohol, insoluble in ether. [B, 48 (*a*, 14).]

ICHTHYOCOLLA (Lat.), n. f. I2k(i2ch2)-thi2(thu6)-o(o3)-ko2l'la3. From ἰχθύς, a fish, and κόλλα, glue. Fr., *ichthyocolle* [Fr. Cod.], *colle de poisson* [Fr. Cod.]. Ger., *Hausenblase*, *Fischleim*. It., *colla di pesce*. Sp., *ictiocola*, *cola de pescado* [Sp. Ph.]. Roum., *ichthyocola* [Roum. Ph.]. Syn.: *colla piscium* [Dan. Ph., Ger. Ph., 1st ed., Russ. Ph., Swiss Ph.]. 1. Of the U. S., Belg., Austr., Hung., and Gr. Ph's, isinglass, fish-glue, a gelatinous substance prepared from the swimming bladders of *Acipenser huso* and other species of *Acipenser*; used to clarify liquors, to give lustre to fabrics, as a basis for jellies, and for court-plaster. 2. An old name for the *Acipenser huso*. [B, 5, 77 (*a*, 24), 88 (*a*, 39).]

ICHTHYOGRAPHY, n. I2k-thi2-o2g'ra2f-i2. From ἰχθύς, a fish, and γράφειν, to describe. See Ichthyology.

ICHTHYOID, adj. I2k'thi2-oid. Gr., ἰχθυοειδής (from ἰχθύς a fish, and εἶδος, resemblance). Lat., *ichthyoides*. Resembling or having many characteristics of a fish. [L.]

ICHTHYOL, n. I2k'thi2-o2l. Lat., *ichthyoleum* (from ἰχθύς, a fish, and *oleum*, oil). Fr., *i*. Ger., *I.* It., *ittiolo*. Sp., *ictiol*. Syn.: *sodium ichthyolsulphonate* (2d def.). 1. A transparent, yellow-brown oil, of sea-green fluorescence, prepared by distillation from a bituminous shale found in the Tyrol, containing semi-fossilized remains of fishes; introduced into dermatological practice by Unna in 1882. It has been used externally in rheumatism, and internally in rheumatism, innutrition, eczema, etc., and as a discutient. 2. A sulphureted product of i. (1st def.), $C_{28}H_{36}S_3Na_2O_6$, the disodic salt of i'sulphonic acid, used as a local application in skin diseases where sulphur is indicated, and regarded as equivalent to a 10-per-cent. sulphur ointment. [Baumann and Schotten "Monatschr. f. prakt. Dermatol.," 1883, I, 9; "N. Y. Med. Jour.," Jan. 9, 1886, p. 56; "Pharm. Jour. and Trans.," Apr. 17, 1886; "Therap. Gaz.," May, 1886, p. 342.]—**I'sulphonic acid.** Ger., *I'sulfonsäure*. An acid, $C_{28}H_{38}S_3O_6$, derived from i. (1st def.). I. (2d def.) is its disodic salt. [B.]

ICHTHYOLOGICAL, adj. I2k-thi2-o-lo2j'i2-k'l. Pertaining to ichthyology. [L, 50, 56 (*a*, 14).]

ICHTHYOLOGY, n. I2k-thi2-o2l'o-ji2. Lat., *ichthyologia* (from ἰχθύς, a fish, and λόγος, understanding). Fr., *ichthyologie*. Ger., *Fischlehre*. The zoology of fishes. [L, 50 (*a*, 14).]

ICHTHYOLUM (Lat.), n. n. I2k(i2ch2)-thi(thu6)'o2l-u3m(u4m). See Ichthyol.

ICHTHYOPHAGIST, n. I2k-thi2-o2f'a3-ji2st. Gr., ἰχθυοφάγος, (from ἰχθύς, a fish, and φαγεῖν, to devour). Lat., *ichthyophagus*. Fr., *ichthyophage*. Ger., *Ichthyophag*. One who subsists largely on fish. [L, 56.]

ICHTHYOPHAGOUS, adj. I2k-thi2-o2f'a3-gu3s. Gr., ἰχθυοφάγος. Lat., *ichthyophagus*. Eating, or subsisting on fish. [L, 50, 56 (*a*, 14).]

ICHTHYOPHAGY, n. I2k-thi2-o2f'a3-ji2. The habit of subsisting largely on fish.

ICHTHYOSE (Fr.), n. Ek-te-oz. See Ichthyosis.—**I. ansérine des scrofuleux.** Seborrhœa universalis in scrofulous persons. [G.]—**I. blanche.** Of Devergie, ichthyosis simplex in which the scales are not discolored. [G.]—**I. brune.** See Ichthyosis *brunea*.—**I. congénitale (linéaire).** See Ichthyosis *congenita*.—**I. nacrée.** See Ichthyosis *nitida*.—**I. noire.** See Ichthyosis *nigra*.—**I. noire cornée.** See Ichthyosis *sebacea* (1st def.).—**I. pellagre.** Of Alibert, pellagra.—**I. porc-épic.** See Ichthyosis *hystrix*.

ICHTHYOSIS (Lat.), n. I2k(i2ch2)-thi2(thu6)-o'si2s. Gen., *-os'eos* (*-os'is*). Gr., ἰχθυώσις (from ἰχθύς, a fish). Fr., *ichthyose*. Ger., *Ichthyose*, *Fischschuppenausschlag*, *Fischschuppenkrankheit*, *Fischschuppenaussatz*. It., *ittiosi*. Sp., *ictiosis*. Fish-skin disease; a cutaneous affection, beginning usually shortly after birth, characterized by a partial or general thickening of the epidermis, together with more or less elongation of the papillæ. The surface of the skin may be simply dry, harsh, and more or less scaly, or it may be marked by horny masses of epidermis, which are usually dark-colored, and in the form of polygonal areas of varying size and thickness, separated by a network of striations or furrows corresponding to the natural lines of the skin. [G.]—**False i.** Lat., *i. spuria*. See *I. sebacea* (1st def.).—**I. alba.** See Ichthyose *blanches*.—**I. brunea.** Fr., *ichthyose brune*. I. cornea in which the scales are of a grayish-brown. [G, 50.]—**I. circumscripta.** I. affecting limited areas of the skin. [G.]—**I. congenita.** Fr., *ichthyose congénitale (linéaire)*. Ger., *universales diffuses* (oder *congenitales*) *Keratom der menschlichen Haut*. Congenital i.; a diffuse keratosis of the skin in new-born infants, due to a malformation of the epidermis during intra-uterine life. The skin is covered by thick, horny, firmly adherent plates, usually symmetrically arranged upon the two halves of the body, and separated by furrows or intervals of thin, red, and often fissured epidermis. In all cases the infants thus affected die within a few days after birth. [G.]—Cf. *I. sebacea*.—**I. cornea.** Fr., *ichthyose cornée*. 1. I. characterized by rough, thick, horny scales, usually discolored from admixture of dirt. Cf. *I. hystrix*. 2. Cornu cutaneum. [G, 12.] 3. See *I. hystrix*.—**I. cornea acuminata.** See *I. hystrix*.—**I. cornea verrucosa.** See *I. cornea*.—**I. cyprina.** See *H. serpentina*.—**I. diffusa.** I. affecting the entire skin. [A, 326 (*a*, 39).]—**I. fœtalis.** See *I. congenita*.—**I. follicularis.** Fr., *acné sébacée cornée*. I. occurring about the sebaceous follicles in the form of more or less prominent, sometimes spine-like, projections that are firmly adherent, and produce a roughness of the surface compared to that of a nutmeg-grater. The disease resembles lichen pilaris, but differs in that the epidermic accumulations are more prominent, and more horny in character. [G.]—**I. furfuracea.** I. characterized by furfuraceous desquamation, especially on the eyelids and about the mouth, the neck, or the flexures of the joints. [G.]—**I. glossæ.** See *I. linguæ*.—**I. hystrix.** Fr., *ichthyose porc-épic*. 1. Porcupine disease; a form of i. or of i. cornea associated with the production of horny excrescences in the form of spines, sometimes corresponding to the distribution of a cutaneous nerve. [G.] 2. See *I. cornea*.—**I. linguæ.** A morbid condition of the tongue associated with hypertrophy of the papillæ, thickening and often whitening of the epithelium, and the production of deep grooves or fissures; usually the result of prolonged syphilitic or other inflammation. [G.] Cf. Leucoplakia *buccalis*.—**I. mitis, I. mollis.** See *I. simplex*.—

I. nacrea. Fr., *ichthyose nacrée.* See *I. nitida.*—**I. neonatorum.** Of Auspitz, a temporary form of i. observed in new-born infants, and characterized by rough, dark-colored, and easily detached scales. ["Arch. f. Dermatol. u. Syph.," 1869, p. 253 (G).] Cf. *I. congenita* and *I. sebacea neonatorum.*—**I. nigra, I. nigricans.** I. cornea with dark-colored horny plates. [G.]—**I. nitida.** Fr., *ichthyose nacrée.* It., *ittiosi madre perlacea.* I. attended with the formation of epidermic scales that have a glistening appearance, resembling mother of pearl. [G, 7.]—**I. of the tongue.** See *I. linguæ.*—**I. palmarum.** I. of the palms. [G.]—**I. palpebrarum** [Arnold]. I. affecting the eyelids. [F.]—**I. pellagra.** Fr., *ichthyose pellagre.* Of Alibert, pellagra.—**I. pergamenta.** A cutaneous disease characterized by degeneration of the skin, which becomes stiff, parchment-like, and devoid of sensation, as though the body were incased in armor. [G, 33.]—**I. plantaris.** I. of the soles. [G.] Cf. KERATOMA *palmare et plantare hereditarium.*—**I. reticulata.** I. in which the thickened epidermis is marked by a network of deepened lines or furrows. [G.]—**I. sauroderma.** See *I. sebacea* (1st def.).—**I. scutellata, I. scutulata.** I. characterized by polygonal scales slightly depressed in the centre. [G, 10.]—**I. sebacea.** Fr., *ichthyose noire cornée.* 1. A form of seborrhœa in which horny crusts form upon the skin over surfaces of greater or less extent, divided by lines corresponding to the furrows of the skin into separate plates looking like those of true i. [G, 15.] 2. Of Wilson, see *I. cornea.*—**I. sebacea neonatorum.** A condition sometimes observed in new-born children in which the skin is incrusted with a firmly adherent layer, chiefly composed of sebaceous matter, which, after a few days, is exfoliated, leaving the epidermis intact. [G, 3.]—**I. sebacea spinosa.** See *I. hystrix.*—**I. sebacea squamosa.** A term applied to a squamous form of i. sebacea, used probably in contradistinction to i. sebacea spinosa. [G, 1.]—**I. serpentina.** Fr., *ichthyose serpentine.* I. characterized by small scales or areas of thickened epidermis, usually of a dark color, occurring especially upon the extremities, and bearing some resemblance to the scales of a serpent or of a fish (especially those of the carp). [G, 7.]—**I. simplex.** Syn.: *xeroderma ichthyoides.* A mild form of i. characterized by simple roughness of the skin or by thin scales. [G.] Cf. *I. cornea.* —**I. spuria.** See *I. sebacea.*—**I. vera.** Of E. Wilson, xeroderma ichthyoides. [G.]—**I. vulvæ.** See ELEPHANTIASIS *vulvæ.*—**I. xeroderma.** See XERODERMA.—**Intra-uterine i.** See *I. congenita.*—**Spurious i.** Lat., *i. spuria.* See *I. sebacea.*

ICHTHYOSMA (Lat.), n. n. I^{2}k(i^{2}ch^2)-thi^2(thu^6)-o^{2}z(o^{2}s)'ma^3. Gen., *-os'matos* (*-atis*). From ἰχθύς, a fish, and ὀσμή, a smell. See SARCOPHYTE.

ICHTHYOTIC, adj. I^{2}k-thi^2-o^{2}t'i^{2}k. Of or pertaining to persons affected with ichthyosis. [Duhring (a, 39).]

ICHTHYOTOMY, n. I^{2}k-thi^2-o^{2}t'o-mi^2. Lat., *ichthyotomia* (from ἰχθύς, a fish, and τέμνειν, to cut). Ger., *Fischanatomie, Fischzerlegung.* The dissection, anatomy, or study of fishes. [L, 50 (a, 14); Owen (L).]

ICHTHYSMUS (Lat.), n. m. I^{2}k(i^{2}ch^2)-thi^{2}z(thu^{6}s)'mu^{3}s(mu^{4}s). Ger., *Fischvergiftung.* Poisoning by the ingestion of fish. [A, 528.]

ICHTYOSE (Fr.), n. Ek-te-oz. See ICHTHYOSIS.

ICICA (Lat.), n. f. I^{2}s(i^{2}k)'i^{2}k-a^3. Fr., *i., iciquier.* Ger., *I.* Of Aublet, a genus of the *Burseraceæ*; of Bentham and Hooker, a subgenus of *Bursera.* [B, 19, 42, 173, 180 (a, 24).]—**I. abilo** [Blanco]. Sp., *árbol de brea.* A tree of undetermined genus growing in the province of Batangas, in the island of Luzon, where it is called *ábilo.* It yields elemi. [B, 18 (a, 24).] Cf. CANARIUM *commune.*—**I. à dix étamines** (Fr.). See *I. decandra.*—**I. altissima.** Fr., *iciquier très élevé, cèdre blanc* (ou *rouge*). Cedar-wood of Guiana, bastard Guiana cedar; a tree growing from 60 to 100 feet high. It yields Brazilian elemi, or caraña (see these words). [B, 18, 19, 173, 180, 185 (a, 24).]—**I. ambrosiaca.** A species furnishing coumia resin, perhaps the *I. heptaphylla.* [B, 197 (a, 24).] Cf. *I. tacamahaca.* —**I. aracouchini.** Ger., *verschiedenblättrige I.* Balsam-of-acouchi tree; a species found in Guiana, yielding a sort of elemi called *aracouchini*, or *acouchi balsam*, which is used as a balsamic medicine, and externally as a vulnerary. [B, 18, 19, 77, 180 (a, 24).] —**I. caranna.** A species growing in New Granada, where it yields an exudation similar to Brazilian elemi, known as American balm of Gilead, or *caranna.* [B, 18, 19, 180, 185, 197 (a, 35).]—**I. cuspidata.** Fr., *iciquier aigu.* A South American species yielding a resin used as glue. [B, 173 (a, 24).]—**I. decandra.** Fr., *i. à dix étamines.* A species found in Guiana, yielding American olibanum (*q. v.*). [B, 173, 180 (a, 24).]—**I. elemigera.** A species abundant in French Guiana, where it is known as the elemi-tree. [B, 77 (a, 24).] Cf. *I. icicariba* and *I. guianensis.*—**I. guianensis, I. guyanensis.** Fr., *bois d'encens.* A medium-sized tree found in South America and the West Indies, furnishing the South American incense-wood, and American olibanum or elemi. [B, 18, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xiv (a, 14).]—**I. heptaphylla.** Fr., *arbre* (ou *bois*) *d'encens, balsamier à odeur d'ambrosie.* Sp., *tacamaca* [Sp. Ph.]. The incense-wood of Guiana; a species growing in Surinam, furnishing a resin known in Guiana as *ashyana*, and used there in dysentery, coughs, and gonorrhœa. According to the Fr. Cod., it furnishes tacamahac resin (see TACAMAHACA); according to other authorities, a form of Brazilian elemi. [B, 18, 19, 113, 173, 180 (a, 24).] Cf. *I. tacamahaca.*—**I. heterophylla.** See *I. aracouchini.*—**I. icicariba.** Ger., *Elemibaum, brasilianische I.* The icicariba of Marcgrav, a lofty Brazilian tree, one of the chief sources of elemi. [B, 5, 18 (a, 24).]—**I. indica.** See BURSERA *serrata* (in Supplement).—**I. tacamahaca.** Coumia-resin plant; according to some, a species identical with *I. heptaphylla*; according to others, a distinct species. It yields tacamahac resin. [B, 173, 180, 275 (a, 24).] Cf. *I. heptaphylla.*—**I. viridiflora.** See *I. guianensis.*

ICICANE, n. I^{2}s'i^{2}k-an. Fr., *i. bréane.* A crystallizable substance obtained from the resins of *Icica.* [A, 385, 526.]

ICMACRATIA (Lat.), n. f. I^{2}k-ma^{2}k(ma^{3}k)-ra^{2}t(ra^{3}t)-i(e)'a^3. From ἰκμάς, moisture, and ἀκρατία, impotence. 1. A devitalized (asthenic) condition of the fluids of the body. 2. Inability to retain them in their normal state. [L, 50 (a, 14).]

ICMADOPHILOUS, adj. I^{2}k-ma^2-do^{2}f'i^{2}l-u^{3}s. Lat., *icmadophilus* (from ἰκμάς, moisture, and φιλεῖν, to love). Growing especially in moist situations; used in the Latin as a botanical species name (*e. g., Lichen icmadophila*). [a, 35.]

ICMALEOS (Lat.), **ICMALEUS** (Lat.), adj's. I^{2}k-mal(ma^{3}l)'e^2-o^{2}s, -u^{3}s(u^{4}s). Gr., ἰκμαλέος (from ἰκμάς, moisture). 1. Of Hippocrates, moist or wet. 2. Pertaining to moisture. [L, 50 (a, 14).]

ICMANE (Lat.), n. f. I^{2}k'ma^{2}n(ma^{3}n)-e(a). Gen., *ic'manes.* The *Nerium laurifolium.* [B, 121 (a, 35).] The *Nerium oleander.* [B, 88 (a, 39).]

ICMAR (Lat.), **ICMAS** (Lat.), **ICMASIA** (Lat.), n's n., f., and f. I^{2}k'ma^{3}r, -ma^{2}s(ma^{3}s), i^{2}k-maz(ma^{3}s)'i^2-a^3. Gr., ἴκμαρ, ἰκμάς, ἰκμασία. Moisture. [A. 322.]

ICMASTIC, adj. I^{2}k-ma^{2}s'ti^{2}k. Lat., *icmasticus* (from ἰκμάς, moisture). Pertaining to the bodily fluids or to the lymph. [L, 50 (a, 14).]

ICONANTIDIPTYCHON (Lat.), n. n. I(e)-kon-a^{2}n(a^{3}n)-ti^2-di^{2}p'ti^2(tu^6)-ko^{2}n(ch^{2}o^{2}n). From εἰκών, an image, ἀντί, opposite, and δίπτυχος, double-folded. A lens giving a double image of an object, but with one of the images inverted. [L, 50 (a, 14).]

ICOSAHEDRON (Lat.), n. n. I(e)-ko^{2}s-a^3-hed(he^{2}d)'ro^{2}n. See ICOSEDRON.

ICOSANDER (Lat.), adj. I(e)-ko^{2}s-a^{2}nd(a^{3}nd)'u^{6}r-(e^{2}r). See ICOSANDROUS.

ICOSANDRIC, ICOSANDRIOUS, ICOSANDROUS, adj's. I^{2}k-o^{2}s-a^{2}nd'ri^{2}k, -ri^2-u^{3}s, -ru^{3}s. Lat., *icosandrus* (from εἴκοσι, twenty, and ἀνήρ, a man). Fr., *icosandre.* Ger., *zwanzigmännig.* Having 20 or more perigynous stamens. *Icosandria* (Fr., *icosandrie*), so characterized, was Linnæus's 12th class of plants. The *Icosandræ* are: Of Scopoli, a tribe of plants comprising *Hypericum, Androsæmum, Citrus, Glabraria, Zygophyllum, Plumbago,* etc.; of Agardh, a class of the *Phanerocotyledoneæ*, comprising the *Potentilleæ, Rosaceæ, Spiræoideæ, Calycantheæ, Myrtoideæ, Pomaceæ, Amygdaleæ,* and *Chrysobalaneæ.* [B, 1, 34, 123, 170 (a, 24).]

ICOSEDRON (Lat.), n. n. I^{2}k(ek)-o^{2}s ed(e^{2}d)'ro^{3}n. From εἴκοσι, twenty, and ἕδρα, a base. A solid body having 20 equal triangular facets. [A, 322.]

ICTÈRE (Fr.), n. Ek-te^{2}r. See ICTERUS.—**I. ataxique grave.** See ICTERUS *gravis.*—**I. atrophique.** The jaundice of acute yellow atrophy of the liver. [a, 40.]—**I. biliphéique.** See *Hepatogenous* ICTERUS.—**I. bleu.** See CYANOSIS.—**I. des femmes enceintes.** *Icterus gravidarum.* [a, 40.]—**I. des nouveaux-nés.** See ICTERUS *neonatorum.*—**I. émotif.** A form of i. described as due to mental anxiety. ["Progr. méd.," Aug. 21, 1886, p. 689 (a, 40).]—**I. gris** [Piorry]. A coloration of the blood of the spleen by bile. [A, 250 (a, 21).]—**I. hémaphéique.** See *Hæmatogenous* ICTERUS.—**I. hémorrhagique.** See *I. atrophique.*—**I. hémorrhagique essentiel.** See ICTERUS *gravis.*—**I. malin.** See ICTERUS *gravis.*—**I. noire.** See *Black* ICTERUS.—**I. par rétention.** See *Hepatogenous* ICTERUS.—**I. puerpéral.** See ICTERUS *gravidarum.*—**I. rouge.** See *Red* ICTERUS.

ICTERENCEPHALOTYPHUS (Lat.), n. m. I^{2}k-te^{2}r-e^{2}n-(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o(o^3)-ti(tu^6)'fu^{3}s(fu^{4}s). From ἴκτερος, jaundice, ἐγκέφαλος, the brain, and τῦφος, typhus. Ger., *Hirntyphus mit Gelbsucht.* Cerebral typhus with jaundice. [L, 50 (a, 14).]

ICTEREPATITIS (Lat.), n. f. I^{2}k-te^{2}r-e^{2}p(ap)-a^{2}t(a^{3}t)-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἴκτερος, jaundice, and ἧπαρ, the liver (see also *-itis**). Inflammation of the liver with jaundice. [A, 322.]

ICTERIAS (Lat.), n. m. I^{2}k-te(te^2)'ri^2-a^{2}s(a^{3}s). Gr., ἰκτερίας. Ger., *Gelbstein, Gelbsuchtstein.* Of Pliny, a certain precious stone said to have been used as a remedy for jaundice. [A, 311, 312, 322.]

ICTERIC, adj. I^{2}k-te^{2}r'i^{2}k. Gr., ἰκτερικός, ἰκτερώδης (from ἴκτερος, jaundice). Lat., *ictericus, icteroides, icteritia laborans* (1st def.). Fr., *ictérique.* Ger., *ikterisch, gelbsüchtig.* It., *itterico, icterico.* Sp., *ictérico.* Syn.: *icterical, icteroid, icteritious.* 1. Affected with icterus; jaundiced. 2. Pertaining to or resembling icterus. 3. Good against the jaundice [Johnson]. 4. As a n., a remedy for icterus. [G, 30.]

ICTERICIA (Lat.), n. f. I^{2}k-te^{2}r-i^{2}s(i^{2}k)'i^2-a^3. Fr., *ictéricie.* See ICTERUS.

ICTERICUS (Lat.), adj. I^{2}k-te^{2}r'i^{2}k-u^{3}s(u^{4}s). See ICTERIC.

ICTERINUS (Lat.), adj. I^{2}k-te^{2}r-in(en)'u^{3}s(u^{4}s). In botany, yellow or yellowish. [L, 50 (a, 14).]

ICTERITIA (Lat.), n. f. I^{2}k-te^{2}r-i^2'shi^2(ti^2)-a^3. Fr., *ictéricie, ictéritie.* Ger., *Gelbsucht* (1st def.). It., *itterizia.* Sp., *ictericia.* 1. See ICTERUS. 2. Any morbid discoloration of the skin. [G, 17.]—**I. alba.** See ICTERUS *albus.*—**I. flava.** See ICTERUS.—**I. laborans.** Troubled with jaundice; icteric.—**I. rubea.** Erysipelas.

ICTÉRITIE (Fr.), n. I^{2}k-ta-re-se. Jaundice; in the pl., *ictérities*, discolorations of the skin (see CHROMATOSES). [G, 17.]

ICTERITIOUS, ICTERITOUS, adj's. I^{2}k-te^{2}r-i^{2}sh'u^{3}s, -te^{2}r'-i^2-tu^{3}s. From *icteritia* (*q. v.*). Yellow; having the color of the skin in jaundice. [G, 30.]

ICTEROID, adj. I^{2}k'te^{2}r-oid. Gr., ἰκτερώδης (from ἴκτερος, jaundice, and εἶδος, resemblance). Lat., *icterodes, icteroides.* It., *itteroide.* Resembling icterus.

ICTEROPHTHISIS (Lat.), n. f. I^{2}k-te^{2}r-o^{2}t(o^{2}f)'i^{2}s(thi^{2}s)-i^{2}s. Gen., *-this'eos* (*-oph'thisis*). From ἴκτερος, jaundice, and φθίσις, a wasting. Ger., *Schwindsucht mit Gelbsucht.* Phthisis associated with jaundice. [L, 50, 107 (a, 14).]

ICTEROPORPHYROTYPHUS (Lat.), n. m. I^{2}k-te^{2}r-o(o^3)-po^{3}r-fi^2(fu^6)-ro(ro^3)-ti(tu^6)'fu^{3}s(fu^{4}s). From ἴκτερος, jaundice, πόρφυρος, dark-gleaming, and τῦφος, typhus. Ger., *Scharlachtyphus mit Gelbsucht.* Scarlatinous typhus associated with jaundice. [L, 50 (α, 14).]

ICTERUS (Lat.), n. m. I^{3}k'te^{2}r-u^{3}s(u^{4}s). Gr., ἴκτερος. Fr., *ictère, ictéricie* (1st def.), *ictéritie* (1st def.). Ger., *I., Gelbsucht* (1st and 2d def's), *gelbe Sucht* (1st and 2d def's), *Königskrankheit* (1st def.), *Hautgallung* (1st def.). It., *ittero, itterizia* (1st def.). Sp., *ictericia* (1st def.). 1. Jaundice (so called because ἴκτερος was the name of a certain yellow bird the sight of which, it was anciently thought, would cure the disease); a yellow coloration of the skin, mucous membrane, and sclerotica due to the retention of yellow coloring-matter, particularly bile pigment, in the blood. [B; G, 8.] 2. In wheat and some other plants, a yellowness caused by wet and cold weather. [B, 19 (α, 24).] 3. The *Oriolus galbula.* [B, 88 (α, 39).]—**Black i.** Gr., μέλας ἴκτερος. Lat., *i. niger, melas i., melanicterus, melanchlorosis.* Fr., *ictère noire.* Ger., *schwarzer I.* It., *itterizia nera.* Sp., *ictericia negra.* 1. Black jaundice; i. attended with a very dark coloration of the skin. 2. Melæna. 3. Melanæmia.—**Blood i.** Ger., *Bluti'.* See *Hæmatogenous i.*—**Catarrhal i.** Lat., *i. catarrhalis.* Ger., *catarrhalischer* (oder *katarrhalischer*) *I.* Jaundice due to catarrhal inflammation of the gall-bladder and gall-ducts; often developed from a similar process in the stomach or intestines. Its phenomena are intense jaundice, clay-colored stools, and a slow pulse. Among individuals who are in middle or advanced life, it is apt to be associated with gout or syphilis. [D, 25.]—**Chemical i.** Ger., *chemischer I.* See *Hæmatogenous i.*—**Essential hæmorrhagic i.** Fr., *i. hémorrhagique essentiel.* Of Monneret, see *I. gravis.*—**Febrile i.** Fr., *ictère fébrile.* See *Weil's* DISEASE.—**Gastro-duodenal i.** I. resulting from closure of the common bile duct by a gastro-duodenal catarrh. [α, 40.]—**Hæmatogenic i., Hæmatogenous i.** Ger., *hämatogener* (oder *chemischer*) *I., Bluti'.* I. due, not to mechanical hindrance to the escape of bile from the liver (see *Hepatogenous i.*), but either to an abnormal production of bile or its coloring matter in the blood, or else to a morbid accumulation in the blood of bile secreted from the liver and afterward absorbed from the intestine.—**Hepatic i., Hepatogenic i., Hepatogenous i.** Lat., *i. hepatogenus.* Ger., *hepatogener* (oder *mechanischer*) *I., Resorptionsi', Stauungsi'.* I. due to reabsorption of bile from the liver in consequence of some mechanical hindrance to its escape into the intestine.—**I. albus.** See CHLOROSIS.—**I. ataxicus.** Fr., *ictère ataxique grave.* See *I. gravis.*—**I. autumnalis.** See *I. vernalis.*—**I. cæruleus.** Fr., *ictère bleu.* Blue jaundice. See CYANOSIS.—**I. calculosus.** I. due to impaction of gall-stones in the biliary passages. [Hooper (α, 40).]—**I. catarrhalis.** See *Catarrhal i.*—**I. cholicus.** See *Hepatogenous i.* [α, 40.]—**I. cum febribus intermittentibus.** I. resulting from congestion of the liver during or due to an attack of malarial intermittent fever. [L, 135 (α, 40).]—**I. flavus.** See JAUNDICE.—**I. gravidarum.** Fr., *atrophie jaune aiguë du foie des femmes enceintes* (2d def.), *ictère puerpéral* (ou *gravidique*). It., *itterizia nella gravidanza.* Syn.: *acute yellow atrophy of the liver* (2d def.). 1. A general term for any form of i. occurring during pregnancy. 2. Malignant jaundice due to puerperal septicæmia. [A, 15.] See *I. gravis.*—**I. gravis.** Fr., *ictère grave, typhisation cholémique* [Peter]. A grave form of i., especially marked by severe nervous symptoms and not infrequently fatal; due usually to acute yellow atrophy of the liver. [D.] See also CHOLÆMIA.—**I. hæmatogenes, I. hæmatogenus.** See *Hæmatogenous i.*—**I. hepaticus, I. hepatogenes, I. hepatogenus.** See *Hepatogenous i.*—**I. infantilis, I. infantum.** See *I. neonatorum.*—**I. letalis, I. lethalis.** Of Franciscus Rubæus, see *I. gravis.*—**I. malignus.** See *I. gravis.*—**I. mechanicus.** See *Hepatogenous i.*—**I. melas.** See *Black i.*—**I. menstrualis.** I. caused apparently by vicarious hyperæmia of the liver in suppressed or deficient menstruation. [A, 326 (α, 21).]—**I. mucosus.** I. without pain, gall-stone, or spasm, and relieved by discharge of tough mucus in the stools. [Hooper (α, 40).]—**I. neogonorum, I. neonatorum.** Fr., *ictère des nouveaux-nés.* It., *itterizia dei neonati.* Syn.: *neotocicterus, pædicterus, ephelis lutea, aurigo neophytorum, yellow gum* (or *gown*). A form of i. met with in new-born infants during the first or second weeks. The patient is deeply jaundiced and constipated, the liver enlarged, and the digestion impaired. [α, 40.]—**I. niger.** See *Black i.*—**I. of absorption, I. of obstruction.** See *Hepatogenous i.*—**I. of pregnancy.** See *I. gravidarum.*—**I. of retention.** Ger., *Retentionsi'.* See *Hepatogenous i.*—**I. perniciosus.** See *I. gravis.*—**I. saburralis.** See *I. calculosus.*—**I. saturninus.** See *Lead* JAUNDICE.—**I. spasticus.** I. from hypochondriasis or melancholia following vehement mental excitement. [L, 135 (α, 40).]—**I. symptomaticus.** I. occurring as a symptom of some general disease.—**I. traumaticus.** I. due to traumatism of the intestinal tract (*e. g.*, wounds or surgical operations). [L, 135 (α, 40).]—**I. typhoides.** See *I. gravis.*—**I. verminosus.** I. associated with or caused by parasites in the intestine either by reflex spasm or obstruction of the common bile duct, as when a worm finds its way into the mouth of the duct. [L, 135 (α, 40).]—**I. vernalis.** A mild form of catarrhal i. occurring more frequently in spring or fall because the atmospheric changes are greater at those seasons. [α, 40.]—**I. viridis.** See *Green* JAUNDICE.—**Leberi'** (Ger.). See *Hepatogenous i.* [D, 4.]—**Malignant i.** Fr., *ictère malin.* See *I. gravis.*—**Mechanical i.** Lat., *i. mechanicus.* Ger., *mechanischer I.* See *Hepatogenous i.*—**Melas i.** See *Black i.*—**Paradoxical i.** Fr., *ictère paradoxal.* Addison's disease. [α, 40.]—**Pernicious i.** Lat., *i. perniciosus.* Fr., *ictère pernicieux.* See *I. gravis.*—**Red i.** Erythema. [α, 40.]—**Resorptionsi'** (Ger.), **Retentionsi'** (Ger.), **Stauungsi'** (Ger.). See *Hepatogenous i.*—**Symptomatic catarrhal i.** I. resulting from catarrh of the biliary passages. [L, 20 (α, 40).]—**Typhoid i.** Lat., *i. typhoides.* Fr., *ictère typhoïde.* See *I. gravis.*

ICTIÓCOLE [Mex. Ph.] (Sp.), n. I^{2}k-te-o'ko-la^3. See ICHTHYOCOLLA.

ICTODES (Lat.), n. m. I^{2}k-tod'ez(as). Of Bigelow, the genus *Symplocarpus.* [B, 42 (α, 24).]—**I. fœtidus.** The *Symplocarpus fœtidus.* [B, 5, 34 (α, 24).]

ICTUS (Lat.), n. m. I^{2}kt'u^{3}s(u^{4}s). Gen., *ict'us.* From *icere,* to strike. Gr., πληγή. Fr., *i.* Ger., *Schlag.* 1. A blow, a stroke, a sudden attack of disease. 2. A pulsation, especially the pulse-beat. [K.] 3. A stab. [A, 312.] 4. A sting or bite. [A, 322.]—**I. apoplectique** (Fr.). A stroke of apoplexy. [D, 72.]—**I. arteriæ.** An arterial pulsation. [A, 322.]—**I. cordis.** The cardiac impulse.—**I. epilepticus.** An attack of epilepsy. [D, 72.]—**I. laryngé** (Fr.). 1. See LARYNGISMUS. 2. See *Laryngeal* VERTIGO.—**I. sanguinis.** Apoplexy. [α, 40.]—**I. solis.** Sunstroke. [D.]

IDAHO SPRINGS, n. Id'a^{3}ho. A place in Clear Creek County, Colorado, where there is a hot spring containing sodium and magnesium sulphates and carbonates, iron and calcium carbonate, and sodium silicate; a warm alkaline chalybeate spring, called Drinking Spring, and a cold saline spring of which no analysis has been made. [A, 363; Anderson, "Med. News," Sept. 14, 1889 (α, 14).]

IDEAL, adj. I-de'a^{3}l. Lat., *idealis* (from ἰδέα, an idea). Fr., *idéal.* Ger., *ideell.* Of diseases, imaginary. [A, 322.]

IDEALITY, n. I-de-a^{3}l'i^{2}t-i^2. Fr., *idéalité.* Ger., *Idealität.* The psychological formation of a model or standard which exists in the imagination only, but may be considered a factor in artistic conception. [α, 43.]

IDEATION, n. I-de-a'shu^{3}n. From ἰδέα, an idea. Fr., *idéation.* The action of the brain in forming an idea. [A, 385.]

IDEATIONAL, adj. I-de-a'shu^{3}n-a^{2}l. From ἰδέα, an idea. Pertaining to ideation.

IDEO-DYNAMIC, adj. I-de"o-di^{2}n-a^{2}m'i^{2}k. From ἰδέα, an idea, and δύναμις, power. See IDEO-MOTOR.

IDEOPHRENIA (Lat.), n. f. Id(i^{2}d)-e(e^2)-o(o^3)-fren(fre^{2}n)'i^2-a^3. From ἰδέα, an idea, and φρήν, the mind. Of Guislain, disorder of the intellect. [α, 40.]

IDEOGRAPHY, n. I-de-o^{2}g'ra^{3}f-i^2. Lat., *ideographia* (from ἰδέα, an idea, and γραφή, a writing). 1. A description of ideas. 2. A printing or writing of ideas, or rendering of words by signs, not letters, as with the Chinese and hieroglyphic characters. [L, 50 (α, 14).]

IDEOLOGY, n. I-de-o^{2}l'o-ji^2. Lat., *ideologia* (from ἰδέα, an idea, and λόγος, understanding). Fr., *idéologie.* The doctrine or science of thought or of the mind. [L, 41, 50, 107 (α, 14).]

IDEO-MOTOR, adj. Id-e"o-mot'o^{2}r. From ἰδέα, an idea, and *movere,* to move. Fr., *idéo-moteur.* Of movements of the body, semi-automatic and resulting from concentration of the mind on one idea. [L, 107.]

IDEOPEGMA (Lat.), n. n. I^{3}d-e^3-o(o^3)-peg(pag)'ma^3. Gen., *-peg'matos* (*-atis*). From ἰδέα, an idea, and πῆγμα, anything fastened. A fixed idea. [A, 322.]

IDEOSYNCHYSIS (Lat.), n. f. Id(i^{2}d)-e^2-o(o^3)-si^{2}n^2(su^{6}n^2)'ki^2-(ch^{2}u^6)-si^{2}s. Gen., *-y'seos* (*-synch'ysis*). From ἰδέα, an idea, and σύγχυσις, a mixing together. Fr., *idéosynchisie.* Ger., *Wahnwitz.* Delirium. [L, 50 (α, 14).]

IDIACOROIRIS (Lat.), n. f. I^{3}d-i^2-a^3-kor(ko^{2}r)-o(o^3)-i(e)'ri^{2}s. Gen., *-roir'idos* (*-idis*). From ἴδιος, one's own, κόρη, the pupil, and ἶρις, the iris. Of G. P. Poggi, the formation of an artificial pupil. [L, 50 (α, 14).]

IDIAPOCAUSIS (Lat.), n. f. I^{2}d-i^2-a^{3}p(a^{3}p)-o(o^3)-ka^4'(ka^3'u^4)-si^{3}s. Gen., *-aus'eos* (*-is*). From ἴδιος, one's own, and ἀπόκαυσις, a burning. Ger., *Selbstentzündung.* Spontaneous ignition. [L, 50 (α, 14).]

IDIEMPRESIS (Lat.), n. f. I^{2}d-i^2-e^{3}m-pre(pra)'si^{3}s. Gen., *-pre'seos* (*-is*). From ἴδιος, one's own, and ἐμπρησις, a conflagration. Spontaneous combustion. [A, 322.]

IDIOBLASTS, n. I^{3}d'i^2-o-bla^{3}sts. From ἴδιος, one's own, and βλάστη, a sprout. Fr., *idioblastes.* Ger., *Idioblasten.* Of Sachs, vegetable cells developing unlike their neighbors in the same tissue as to form, size, and contents. [B, 229 (α, 24).]

IDIOCRASIA (Lat.), n. f. I^{2}d-i^2-o(o^3)-kra(kra^3)'zi^2(si^2)-a^3. Gr., ἰδιοκρασία (from ἴδιος, one's own, and κρᾶσις, a mixing). See IDIOSYNCRASY.

IDIOCTONIA (Lat.), n. f. I^{3}d-i^2-o^{3}k-ton(to^{2}n)'i^2-a^3. From ἴδιος, one's own, and κτόνος, murder. Suicide. [L, 50 (α, 14).]

IDIOCTONOS (Lat.), n. m. I^{3}d-i^2-o^{2}k'to^{2}n-o^{2}s. A person who commits suicide. [L, 50 (α, 14).]

IDIOCY, n. I^{3}d'i^2-o-si^2. Gr., ἰδιοτισμός, ἰδιοτεία (from ἴδιος, one's own). Lat., *idiotismus.* Fr., *simplicité, idiotie.* Ger., *Dummheit, Verrücktheit, Blödsinn.* Congenital weak-mindedness; a condition in which mental weakness exists from birth or the earliest years, the psychical development is arrested, and the intelligence is more or less below the average commonly developed at a given age. [A, 326 (α, 21).]—**Congenital i.** [Ireland]. See *Genetous i.*—**Cretinic i.** [Ireland]. I. which obtains with cretins. Its phenomena are those of ordinary i. [D, 36.]—**Cretinoid i.** [Ireland]. I. in which the cretinic features are marked. Some of the subjects retain a small degree of intelligence. [α, 40.]—**Cretinoid i. with pachydermic cachexia.** A form of i. described by Fagge in which the general features resemble those of cretinism. [α, 40.]—**Developmental i.** I. due to arrested brain development. [Hammond (α, 40).]—**Eclampsic i.** [Ireland]. I. produced by convulsions in early life from teething or injury to the head at birth. [α, 40.]—**Emotional i.** Of Shuttleworth, that form of i. resulting from nervous shock or fright at an early age. ["Brit. Med. Jour.," 1886 (α, 40).]—**Epileptic i.** [Ireland]. I. the cause of which seems to be epilepsy. [α, 40.]—**Genetous i.** I. in which the diseased condition entailing deficient mentality is complete at birth. [α, 40.]—**Hydrocephalic i.** [Ireland]. I. due to

congenital or acquired hydrocephalus. [α, 40.]—**Hypertrophic i.** One of the forms of inflammatory i. associated with hypertrophy of the brain. [α, 40.]—**I. by deprivation.** That condition of mind in a child that has been deprived of two or more special senses (*e. g.*, sight and hearing). [Ireland (α, 40).]—**Inflammatory i.** [Ireland]. I. due to inflammation of the brain, either congenital or acquired. [α, 40.]—**Kalmuck i.** Of Mitchell and Fraser, i. in which the facial or cranial appearance suggests a reversion to, or imitation of, an ethnic type differing from that to which the patient belongs; *e. g.*, a Caucasian idiot may have features that are strikingly Mongolian. [D, 36.]—**Microcephalic i.** [Ireland]. I. due to or associated with microcephalus. [α, 40.]—**Mongol-like i.** Kalmuck i. [α, 40.]—**Negro-like i.** A form of i. in which the African features are reproduced in those of Caucasian birth. [α, 40.]—**Paralytic i.** [Ireland]. A form of i. associated with paralysis due to intra-uterine brain lesion. [α, 40.]—**Plagiocephalic i.** I. associated with or resulting from cranial distortion, the face and parietal bones being twisted entirely out of their normal positions. [Shuttleworth (α, 40).]—**Scaphocephalic i.** A form of i. in which the head is boat-shaped. [α, 40.]—**Sensorial i.** I. in which there is deficient appreciation of the special senses. [α, 40.]—**Toxic i.** A form of i. resulting from the administration of opium, alcohol, or other toxic drugs in early life. [Shuttleworth (α, 40).]—**Traumatic i.** [Ireland]. I. due to direct injury to the brain by traumatism and not to subsequent inflammation. [α, 40.]

IDIOELECTRIC, adj. I^{2}d-i^2-o-e-le^{2}k'tri^{2}k. From ἴδιος, one's own, and ἤλεκτρον, amber. Electric by virtue of its own peculiar properties (said especially of substances that acquire electricity by friction). [L, 30, 41, 56 (α, 14).]

IDIOGLOSSIA (Lat.), n. f. I^{2}d-i^2-o(o^3)-glo^{2}s(glos)'si^2-a^3. From ἴδιος, one's own, and γλῶσσα, the tongue. A name proposed by White and Bird for extreme cases of defective articulation in which the sounds made were unlike those of any known language, but the same sound was always used to express the same word. ["Brit. Med. Jour.," Mar. 14, 1891, p. 581 (α, 29).]

IDIOGNOMON (Lat.), adj. I^{2}d-i^2-o^{2}g-no'mo^{2}n(mon). Gr., ἰδιογνώμων (from ἴδιος, one's own, and γνώμη, an opinion). Holding to one's own opinion. [Hippocrates (A, 311).]

IDIOGYNOUS, adj. I^{2}d-i^2-o^{2}j'i^{2}n-u^{3}s. Lat., *idiogynus* (from ἴδιος, one's own, and γυνή, a woman). Fr., *idiogyne.* Ger., *eigenweibig.* Destitute of a pistil, or having the stamens isolated from the pistils. [B, 1, 19 (α, 24).]

IDIOGYNY, n. I^{2}d-i^2-o^{2}j'i^{2}n-i^2. The state of being idiogynous.

IDIOMETALLIC, adj. I^{2}d-i^2-o-me^{2}t-a^{2}l'i^{2}k. From ἴδιος, one's own, and μεταλλικός, of metal. Fr., *idiométallique.* Of electrical phenomena, produced by the simple contact of two metals. [L, 41 (α, 14).]

IDIOMETRITIS (Lat.), n. f. I^{2}d-i^2-o(o^3)-me^{2}t(mat)-ri(re)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἴδιος, one's own, and μήτρα, the womb (see also *-itis**). Inflammation of the parenchymatous tissue of the uterus. [α, 40.]

IDIOMIASM, n. I^{2}d'i^2-o-mi-a^{2}z'm. From ἴδιος, one's own, and μίασμα, defilement. A miasm proceeding from one's own person. [Eberle.]

IDIO-MUSCULAR, adj. I^{2}d-i^2-o-mu^{3}s'ku^{2}l-a^{3}r. From ἴδιος, one's own, and *musculus*, a muscle. Fr., *idio-musculaire.* Ger., *idio-muskulös.* Of Schiff, peculiar to a muscle; of a local contraction, caused in a nearly exhausted muscle by a sharp blow when other irritative agents produce no effect. [K, 3.]

IDIONEUROSIS (Lat.), n. f. I^{2}d-i^2-o(o^3)-nu^2-ro'si^{2}s. Gen., *-os'eos* (*-is*). From ἴδιος, one's own, and νεῦρον, a nerve. Ger., *Idioneurose.* A neurosis proper; a neurosis pure and simple. Auspitz's idioneuroses of the skin are a class of functional anomalies of the cutaneous nerves without trophic changes in the skin, comprising "sensory" and "motor" neuroses of the skin. [G, 4.]

IDIOPATHIC, adj. I^{2}d-i^2-o^{2}p'a^{2}th-i^{2}k. Gr., ἰδιοπαθής (from ἴδιος, one's own, and πάθος, a condition). Fr., *idiopathique.* Ger., *idiopathisch.* It., *idiopatico.* Sp., *idiopático.* Occurring independently (said of diseases). [A, 326 (α, 21).]

IDIOPATHY, n. I^{2}d-i^2-o^{2}p'a^{2}th-i^2. Gr., ἰδιοπάθεια (from ἴδιος, one's own, and πάθος, a condition). Lat., *idiopatheia.* Fr., *idiopathie.* Ger., *Idiopathie.* 1. The state of being idiopathic. [A, 322.] 2. See IDIOSYNCRASY.

IDIOPHRENIC, adj. I^{2}d-i^2-o-fre^{2}n'i^{2}k. From ἴδιος, one's own, and φρήν, the mind. Of Tuke, resembling or pertaining to insanity from brain disease. [α, 40.]

IDIOPLASM, n. I^{2}d'i^2-o-pla^{2}z'm. Lat., *idioplasma* (from ἴδιος, one's own, and πλάσμα, anything formed). Ger., *Idioplasma.* Of Nägeli (1884), a substance of peculiar and complex chemical and molecular constitution which he supposes to be present in cells. That of the nucleus (nucleus-idioplasma) is supposed to be the controlling and active agent in cell-division and in the perpetuation of the species, while that of the cell-body (cyto-idioplasma) controls the tissue-change and nutrition of the cell itself. [J.]

IDIOPTCY, n. I^{2}d'i^2-o^{2}pt-si^2. From ἴδιος, one's own, and ὄψ, sight. An obsolete provincialism for achromatopsia. [F.]

IDIOSOMNAMBULISMUS (Lat.), n. m. I^{2}d-i^2-o(o^3)-so^{2}m-na^{2}m(na^{3}m)-bu^{2}l(bu^{4}l)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From ἴδιος, one's own, *somnus*, sleep, and *ambulare*, to walk. Of Succow, individual animal magnetism. [L, 50 (α, 14).]

IDIOSPASMUS (Lat.), n. m. I^{2}d-i^2-o(o^3)-spa^{2}z(spa^{3}s)'mu^{3}s-(mu^{4}s). From ἴδιος, one's own, and σπασμός, a spasm. A convulsion occurring only in one part of the body. [L, 50 (α, 14).]

IDIOSPASTIC, adj. I^{2}d-i^2-o-spa^{2}st'i^{2}k. Lat., *idiospasticus* (from ἴδιος, one's own, and σπαστικός, stretching). Pertaining to idiospasm. [L, 50 (α, 14).]

IDIOSTHENIA (Lat.), n. f. I^{2}d-i^2-o(o^3)-sthe^{2}n-i(e)'a^3. From ἴδιος, one's own, and σθένος, strength. Fr., *idiosthénie.* A force having an innate existence, without regard to its origin, such as electricity, nerve-force, etc. [L, 49 (α, 14).]

IDIOSTHENIC, adj. I^{2}d-i^2-o-sthe^{2}n'i^{2}k. Fr., *idiosthénique.* Pertaining to or having the quality of idiosthenia. [L, 41 (α, 14).]

IDIOSYNCRASIA (Lat.), n. f. I^{2}d-i^2-o(o^3)-si^{2}n^2(su^{6}n)-kra-(kra^3)'zi^2(si^2)-a^3. See IDIOSYNCRASY.—**I. hæmorrhagica.** See HÆMOPHILIA.—**I. olfactoria.** A perverted sense of smell whereby the patient is rendered exceedingly susceptible to certain odors. [α, 40.]

IDIOSYNCRASIQUE (Fr.), adj. E-de-o-sa^{2}n^2-kra^3-zek. See IDIOSYNCRATIC.

IDIOSYNCRASY, n. I^{2}d-i^2-o-si^{2}n^2'kra^2-si^2. Gr., ἰδιοσυγκρασία (from ἴδιος, one's own, and σύγκρασις, a blending). Lat., *idiosyncrasia.* Fr., *idiosyncrasie, idiosyncrase.* Ger., *Idiosynkrasie, Empfindungseigenheit.* An individual peculiarity which renders one susceptible to certain effects not produced in others. [D.]

IDIOSYNCRATIC, adj. I^{2}d-i^2-o-si^{2}n-kra^{2}t'i^{2}k. Lat., *idiosyncraticus.* Fr., *idiosyncrasique.* Pertaining to or of the nature of an idiosyncrasy. [D.]

IDIOSYNCRITICUS (Lat.), adj. I^{2}d-i^2-o(o^3)-si^{2}n(su^{6}n^2)-kri^{2}t'-i^{2}k-u^{3}s(u^{4}s). See IDIOSYNCRATIC.

IDIOT, n. I^{2}d'i^2-u^{3}t. From ἰδιώτης, an ignorant person. Lat., *idiota.* Fr., *i.* Ger., *I.*, *Blödsinniger.* A person affected with idiocy.—**Cretinoid i.** A cretin. [α, 40.]

IDIOTCY, n. I^{2}d'i^2-u^{3}t-si^2. See IDIOCY.

IDIOTHALAMOUS, adj. I^{2}d-i^2-o-tha^{2}l'a^{2}m-u^{3}s. Lat., *idiothalmus* (from ἴδιος, one's own, and θάλαμος [see THALAMUS]). Fr., *idiothalame.* In lichenography, having the receptacles different in color or texture from the thallus. The i. lichens (the *Idiothalamæ* [Wahlenberg], *Idiothalameæ* [Gray], *Idiothalami* [Acharius], *Idiothalamia* [Lühnemann], or *Idiothalamii* [Ritgen]; Fr., *idiothalames*) are a division or class of *Lichenes*, consisting of the genera *Gyromium*, *Opegrapha*, *Lecidea*, and *Calicium*, according to the first author; or, according to Acharius, comprising the divisions *Homogenei* (the genera *Opegrapha*, *Spiloma*, etc.), *Heterogenei* (the genera *Graphis*, *Verrucaria*, etc.), and *Hyperogenei* (the genera *Glyphis*, etc.); or, according to Fries and Endlicher, consisting of the tribes *Pyxineæ*, *Glyphideæ*, *Graphideæ*, and *Lemborinæ* (*Pyxinidæ*, *Glyphidæ*, *Graphidæ*, and *Limboridæ* of Lindley); or, according to Gray, the divisions *Rhizomorphidæ*, *Variolaridæ*, *Porinidæ*, *Verrucaridæ*, and *Opegraphidæ*. Lühnemann makes them an order of the *Aspidocarpa*, consisting of the *Opegrapha*, *Lecidea*, etc., and Ritgen an order of the *Choriophyta*, consisting of the genera of Acharius. [B, 1, 19, 170 (α, 24).]

IDIOTIA (Lat.), n. f. I^{2}d-i^2-o^{2}t(ot)-i(e)'a^3. Gr., ἰδιωτεία. See IDIOCY.—**I. endemica.** See CRETINISM.

IDIOTIC, adj. I^{2}d-i^2-o^{2}t'i^{2}k. Gr., ἰδιωτικός. Lat., *idioticus.* Fr., *idiotique.* Ger., *idiotisch, dumm, blödsinnig.* Affected with idiocy. [D.]

IDIOTISM, n. I^{2}d'i^2-u^{3}t-i^{2}z'm. Gr., ἰδιωτισμός. Lat., *idiotismus.* Fr., *idiotisme.* Ger., *Idiotismus, Idiotie.* See IDIOCY.

IDIOTISMUS (Lat.), n. m. I^{2}d-i^2-o^{2}t(ot)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). See IDIOCY.—**I. endemicus.** See CRETINISM.

IDIOTROPHOUS, adj. I^{2}d-i^2-o^{2}t'ro-fu^{3}s. Gr. ἰδιοτρόφος (from ἴδιος, peculiar, and τροφή, nourishment). Subsisting on a peculiar kind of food. [L, 50 (α, 14).]

IDIOTROPIA (Lat.), n. f. I^{2}d-i^2-o(o^3)-trop(tro^{2}p)'i^2-a^3. Gr., ἰδιοτροπία (from ἴδιος, peculiar, and τροπή, a turning). 1. A peculiar manner of existence. [L, 50 (α, 14).] 2. See IDIOSYNCRASY.

IDOLUM (Lat.), n. n. Id(ed)-ol'u^{3}m(u^{4}m). Gr., εἴδωλον. A spectre, an hallucination. [A, 322.]

IDORGAN, n. I^{2}d-o^{2}rg'u^{3}n. From ἴδιος, one's own, and ὄργανον, an organ. Of Haeckel, a morphological unit consisting of two or more plastids, which does not possess the positive character of the person or stock. [L, 121.]

IDOS (Lat.), n. n. Id(ed)'o^{2}s. Gr., ἶδος. Sweating. [Hippocrates (A, 311).]

IDOU-MOULLI, n. In India, a species of *Bridelia* found on the coast of Malabar. The resin, flowers, and fruit are used, in many preparations, in pleurisy and mania. [B, 88 (α, 39); B, 121 (α, 35).]

IDRIALIN, n. I^{2}d'ri^2-a^{2}l-i^{2}n. Fr., *idrialine.* Ger., *I.* A white crystalline substance, $C_{40}H_{28}O$, obtained by distillation alone or with naphtha of a brownish-black, bituminous schist from Idria, containing 18 per cent. of cinnabar. It fuses with decomposition at 250° to 300° C., is insoluble in water, slightly soluble in alcohol and in ether, soluble in boiling oil of turpentine, in carbon disulphide, in acetone, and very soluble in boiling xylene. [B, 46, 48, 93 (α, 39).]

IDRIS YÀGHI (Turk.), n. Geranium-oil, the volatile oil of *Andropogon schœnanthus*, used to adulterate attar of rose. [B, 18 (α, 24).]

IDROSADENITIS (Lat.), n. f. I(e)-dros-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). See HIDROSADENITIS.

IDROSIS (Lat.), n. f. I(e)-dro'si^{2}s. Gen., *-os'eos* (*-os'is*). Ger., *Idrose.* See HYDROSIS; in the pl., *idroses* (Ger., *Idrosen*), a suborder of the *Keratonoses* in Auspitz's classification of skin diseases, embracing *Hyperidroses*, *Paridroses*, and *Anidroses.* [G, 4.]

IDROTADENOMA (Lat.), n. n. I(e)-drot-a^{2}d(a^{3}d)-e^{2}n-o'ma^3. From ἱδρώς, sweat, and ἀδήν, a gland (see also *-oma**). See HIDROSADENITIS.

IDRYL, n. Id'ri^{2}l. Fr., *idryle.* Ger., *I.* See FLUORANTHENE.

IDUNIUM (Lat.), n. n. I(e)-du^2(du)'ni^2-u^{3}m(u^{4}m). A new metal, discovered by Websky in lead vanadate. It resembles vanadium

in several respects, and the only oxide hitherto examined appears to possess acid properties, and forms stable salts. Its formula is probably Id_2O_5, its general character and reactions corresponding to those of vanadic acid. ["Pharm. Jour. and Trans.," Dec. 27, 1884; "Proc. of the Am. Pharm. Assoc.," xxxiii (a, 14).]

IDUS (Lat.), n. n. Id(ed)'u^{3}s(u^{4}s). Gen., *id'eos.* Gr., ἴδος. Sweat. [A, 311 (a, 17).]

IETICA, n. In Brazil, the potato (*Ipomœa batatas*). [Marcgraf (B, 121 [a, 35]).]

IETREON (Lat.), n. n. I^2-e^{2}t(at)-re(ra)'o^{2}n. See LATREION.

IF (Fr.), n. Ef. From *ivus*, the yew-tree. The *Taxus baccata.* [B, 19, 173 (a, 24).]—**I. à amande.** The *Taxus nucifera.* [B, 173 (a, 24).]—**I. commun, I. d'Europe.** See *I.*—**I. nucifère.** The *Podocarpus nucifera.* [B, 19, 121 (a, 24).]—**I. verticillé.** The *Taxus verticillata.* [B, 173 (a, 24).]

IFERTEN (Ger.), **IFFERTEN** (Ger.), n's. Ef'e^{2}rt-e^{2}n, ef'-fe^{2}rt-e^{2}n. See YVERDUN.

IFFIDES, n. Of the alchemists, cerussa. [Ruland, Johnson (A, 325).]

IFINE (Fr.), n. E-fen. A poisonous principle contained in the yew-tree (*Taxus baccata*). [B, 38, 93 (a, 14).]

IFRETEAU (Fr.), n. E-fre^2-to. The *Taxus baccata.* [B, 121 (a, 35).]

IGASUR (Malay), n. The *Strychnos Ignatii* or its seed. [B, 18 (a, 24).]—**Noix I.** (Fr.). See IGNATIA.

IGASURATE, n. I^{2}g-a^{2}s-u^{2}r'at. A salt of igasuric acid. [B, 38 (a, 14).]

IGASURIA (Lat.), n. f. E-ga^3-su^2(su)'ri^2-a^3. See IGASURINE.

IGASURIC ACID, n. I^{2}g-a^{2}s-u^{2}r'i^{2}k. Fr., *acide igasurique.* Ger., *Igasursäure.* A special acid with which, according to Pelletier and Caventou, the alkaloids are combined in nux vomica and St. Ignatius's bean. Berzelius considered it lactic acid; Winckler, a variety of gallic acid; but Hölm, a tannic acid that turned iron green. [B, 270.]

IGASURINE, n. I^{2}g-a^{2}s-u^2'ren. Lat., *igasurina, igasurinum.* Fr., *i.* Ger., *Igasurin.* It., Sp., *igasurina.* An alkaloid found, according to Desnoix, along with strychnine and brucine in nux vomica, but the existence of which can not be regarded as definitely established. According to Schützenberger, it consists of nine different alkaloids, which he separated by means of their different solubility in boiling water. It is a more active poison than brucine. [B, 93 (a, 14), 270.]

IGDE (Lat.), n. f. I^{2}g'de(da.) Gen., *ig'des.* Gr., ἴγδη. See IGDIS.

IGDION (Lat.), n. n. I^{2}g'di^2-o^{2}n. Gr., ἰγδίον. Ger., *Mörserchen.* A small mortar. [L, 50 (a, 14).]

IGDIS (Lat.), n. f. I^{2}g'di^{2}s. Gen., *ig'dis.* Gr., ἴγδις. A mortar. [L, 50 (a. 14).]

IGDIUM (Lat.), n. n. I^{2}g'di^2-u^{3}m(u^{4}m). See IGDION.

IGDOCOPANON (Lat.), **IGDOCOPANUM** (Lat.), n's n. I^{2}g-do(do^3)-kop(ko^{2}p)'a^{2}n(a^{3}n)-o^{2}n, -u^{3}m(u^{4}m). Gr., ἰγδοκόπανον. Ger., *Mörserkeule.* A pestle. [L, 50 (a, 14).]

IGEL (Ger.), n. Eg'e^{2}l. See ECHINUS (2d def.).—**Gemeiner I.** The *Erinaceus europæus.* [B, 180 (a, 24).]—**I'bezoar.** See BEZOAR *hystricinum.*—**I'bezoar aus Malacca.** See BEZOAR *porci malaccense.*—**I'borste.** See ECHINUS (1st def.).—**I'borstig.** See ECHINATE.—**I'förmig.** See ECHINEUS.—**I'füssig.** See ECHINIPES.—**I'ig.** See ECHINATE.—**I'knospe.** 1. See BUTOMUS. 2. The genus *Sparganium.* [B, 180 (a, 24).]—**I'kraut.** 1. The *Geum urbanum.* 2. The *Ecballium elaterium.* [B, 48 (a, 14), 180 (a, 24).]—**I'liebend.** See ECHINOPHILUS.—**I'mundig.** See ECHINOSTOMATUS.—**I'schwamm.** The *Hydnum erinaceum.* [B, 180 (a, 24).]—**I'schwänzig.** See ECHINURUS.—**I'shuf.** A disease in horses in which a cyst forms under the skin at the border of the hoof, and the overlying hair becomes bristly. [L, 30 (a,14).]—**I'skolbe.** The *Datura stramonium.* [B, 48 (a, 14).]—**I'sschottensüssholz.** The *Glycyrrhiza echinata.* [B, 88 (a, 39).]—**I'stachel.** See ECHINUS (1st def.).—**I'stachelig.** See ECHINATE.—**I'stein.** See BEZOAR *hystricinum.*—**I'weizen.** The *Triticum muticum.* [B, 180 (a, 24).]—**I'wollblume.** The *Anthyllis erinacea.* [L, 80.]—**Malakkischer I.** The *Erinaceus malaccensis.* [L, 80.]

IGELKOLBE (Ger.), n. Eg'e^{2}l-kolb-e^2. 1. See BUTOMUS. 2. The genus *Sparganium.* 3. The *Datura stramonium.* [B, 180 (a, 24).]—**Aestige I.** The *Sparganium ramosum.* [B, 180 (a, 24).]—**Einfache I.** The *Sparganium simplex.* [B, 180 (a, 24).]—**I'nblätter.** The leaves of *Datura stramonium.* [B, 180 (a, 24).—**I'nsamen.** The seed of *Datura stramonium.* [B, 180 (a, 24).]

IGIR (Hind.), n. The *Acorus calamus.* [B, 172 (a, 24).]

IGNAMA (Lat.), n. f. I^{2}g-na(na^3)'ma^3. Fr., *igname.* See DIOSCOREA.

IGNAME (Fr.), n. En-ya^{3}m. See DIOSCOREA.—**I. à feuilles ternées.** See DIOSCOREA *triphylla.*—**I. ailée.** See DIOSCOREA *alata.*—**I. à racines blanches.** See DIOSCOREA *eburnea* (in Supplement).—**I. blanche.** See DIOSCOREA *cliffortiana.*—**I. bulbeuse.** See DIOSCOREA *bulbifera.*—**I. commune, I. cultivée.** See DIOSCOREA *cliffortiana.*—**I. de Chine.** The *Dioscorea batatas.* [B, 121 (a, 24).]—**I. du Japon.** See DIOSCOREA *japonica.*—**I. jaune.** See DIOSCOREA *lutea.*—**I. nummulaire.** See DIOSCOREA *nummularia.*—**I. rouge.** 1. See DIOSCOREA *alata.* 2. In Egypt, the resin of *Colocasia antiquorum.* [B, 88 (a, 39).]

IGNATIA (Lat.), n. f. I^{2}g-na(na^3)'shi^2(ti^2)-a^3. From *Ignatius*, the founder of the Society of Jesus. Fr., *fève de Saint-Ignace* [Fr. Cod.] (1st def.). Ger., *Ignatiusbohne* (1st def.). Sp., *haba de San Ignacio* [Sp. Ph.] (1st def.). Syn.: *faba Sancti Ignatii* [Belg. Ph.], *ignatiæ semen* [Gr. Ph.] (1st def.). 1. Of the U. S. Ph., see *Saint Ignatius's* BEAN. 2. A genus made by the younger Linnæus, but suppressed by Bentham and Hooker because having the leaves and flowers of a species of *Posoqueria*, and the fruit of a *Strychnos.* [B, 5, 18, 19, 42, 173, 180 (a, 24).]—**Abstractum ignatiæ** [U. S. Ph.]. A preparation made by exhausting 2 parts of i. in No. 60 powder with a mixture of alcohol and water, drying the resulting extract, and mixing it with enough sugar of milk to make 1 part. [B, 95.]—**Extractum ignatiæ alcoholicum.** Fr., *extrait alcoolique de fève Saint-Ignace.* Syn.: *extractum fabæ Ignatii alcoholicum.* A preparation made by exhausting i. with dilute alcohol and evaporating to the desired consistence. [B, 119.]—**I. amara.** Of the younger Linnæus, a plant formerly identified with *Strychnos Ignatii*, but now referred to *Posoqueria longiflora.* [B, 5, 18, 19, 173, 180 (a, 24).]—**Ignatiæ semen** [Gr. Ph.]. See *I.* (1st def.).—**I. philippinica.** See STRYCHNOS *Ignatii.*—**Tinctura ignatiæ** [U. S. Ph.]. Fr., *teinture de fève de Saint-Ignace.* Ger., *Ignazbohnentinktur.* A preparation made by exhausting i. in No. 60 powder with dilute alcohol, so that 10 parts of the tincture represent 1 part of i. [B, 81.]

IGNATIANA (Lat.), n. f. I^{2}g-na(na^3)-shi^2(ti^2)-an(a^{3}n)'a^3. Of Loureiro, the genus *Strychnos* (a, 24).]—**I. philippinica.** The *Strychnos Ignatii.* [B, 18, 173 (a, 24).]

IGNATIUSBAUM (Ger.), n. Eg-na^3'tsi^2-u^{4}s-ba^3-u^{4}m. See IGNATIA (2d def.).—**Bitterer I.** The *Strychnos Ignatii.* [a, 24.]

IGNAVIA (Lat.), n. f. I^{2}g-na(na^3)'vi^2(wi^2)-a^3. From *ignavus*, inactive. Sluggishness. [E.]—**I. partium genitalium.** See IMPOTENCE.

IGNEAL, IGNEOUS, adj's. I^{2}g'ne-a^{2}l, -u^{3}s. Lat., *igneus* (from *ignis*, fire). Fr., *igné.* 1. Pertaining to or produced or effected by fire. 2. Of a fiery red. [B, 19, 123 (a, 24).]

IGNESCENT, adj. I^{2}g-ne^{2}s'se^{2}nt. Lat., *ignescens* (from *ignescere*, to take fire). Beginning to take fire or emit sparks. [a, 38.]

IGNIARIUM (Lat.), n. n. I^{2}g-ni^2-a(a^3)'ri^2-u^{3}m(u^{4}m). From *igniarius*, belonging to fire. See AMADOU.

IGNICOLOR (Lat.), adj. I^{2}g-ni^{2}k'o^{2}l-o^{2}r. From *ignis*, fire, and *color*, color. See IGNEOUS (2d def.).

IGNIPEDITES (Lat.), n. m. I^{2}g-ni^2-pe^{2}d-it(et)'ez(as). From *ignis*, fire, and *pes*, the foot. Hot-foot; a disease in which the soles of the feet burn excessively. It is seen in people who walk a great deal, particularly in soldiers, and is said to be rheumatic. [a, 40.]

IGNIPUNCTURE, n. I^{2}g'ni^2-pu^{3}n^{2}k-tu^{2}r. From *ignis*, fire, and *puncture*, a puncture. Fr., *i.* Ger., *Ignipunktur.* It., Sp., *ignipuntura.* A method of treatment which consists in making punctures with a cautery. [A, 326 (a, 21).]—**Intradermic I.** I. into the thickness of the skin with Paquelin's cautery. [Chalot, "Paris méd.," Nov., 1881; quoted in "London Med. Record.," Dec., 1881.]

IGNIS (Lat.), n. m. I^{2}g'ni^{2}s. Gen., *ig'nis.* Gr., αἴγλη, αἰγλαός. Fr., *feu.* Ger., *Feuer.* It., *fuoco.* Sp., *fuego.* Fire; of the old writers, anything fiery.—**I. actualis.** See *Actual* CAUTERY.—**I. amoris.** See ARDOR *venereus.*—**I. animalis.** Animal heat. [A, 322.]—**I. calidus.** Violent inflammation just preceding the stage of gangrene. [Quincy (a, 40).]—**I. Columellæ.** Erysipelas. [G.]—**I. frigidus.** Dry gangrene. [*l. c.*, a, 40.]—**I. herba.** The herb of *Muscus pyxidatus.* [L, 135 (a, 39).]—**I. musci.** The *Bœomyces cocciferus.* [B, 121 (a, 35).]—**I. occultus.** Lit., hidden fire; an old term for anthrax. [G.]—**I. persicus.** Fr., *feu persique.* Persian fire; an old term the original signification of which is uncertain, having been applied sometimes to herpes zoster and sometimes to different forms of anthrax, especially contagious anthrax. [G.]—**I. philosophicus.** An old name for phosphorus. [A, 322.]—**I. potentialis.** A potential cautery. [A, 222.]—**I. sacer.** Fr., *feu sacré.* It., *fuoco sacro.* 1. Sacred fire; an old term for a variety of diseases of the skin, including zoster, erysipelas, and a gangrenous form of inflammation which prevailed as an epidemic in France during the tenth, eleventh, and twelfth centuries. [G.] Cf. ERYSIPELAS *pestilens.* 2. An old term for aphthæ.—**I. Sancti Antonii.** Fr., *feu de Saint-Antoine.* It., *fuoco di San Antonio.* An old term for anthrax or gangrenous erysipelas, also for a malignant contagious disease which ravaged France in the seventeenth century, being regarded by some as a gangrenous form of erysipelas, and by others as a malignant variety of scarlet fever. The name is said to have arisen from the custom of invoking the aid of St. Anthony for relief from the disease. [G.] Cf. ERYSIPELAS *pestilens.*—**I. Sancti Ignatii.** See ERYSIPELAS.—**I. sapientum.** An old term for warm horse-dung. [A, 325.]—**I. silvaticus, I. silvestris.** Fr., *feu sauvage* (ou *volage*, ou *volant*), *flamboise.* Ger., *Wiebeln.* Wildfire rash; an old term for certain simple inflammatory skin eruptions, probably of an erythematous or an eczematous character. [G.] Cf. STROPHULUS *volaticus.*—**I. vitalis.** Animal heat. [A, 322.]—**I. volagrius, I. volaticus.** See *I. silvaticus.*—**Persicus I.** [Avicenna]. See *I. persicus.*—**Sacer i.** See *I. sacer.*

IGNITED, adj. I^{2}g-nit'e^{2}d. Lat., *ignitus* (from *ignire*, to set on fire). Kindled; set on fire. [a, 38.]

IGNITION, n. I^{2}g-ni^{2}sh-u^{2}n. From *ignire*, to set on fire. Fr., *i.* Ger., *Anzünden.* It., *ignizione.* Sp., *ignición.* The act or process of setting fire or taking fire.

IGNYA (Lat.), **IGNYE** (Lat.), **IGNYS** (Lat.), n's f. I^{2}g'ni^2-(nu^6)-a^3, -e(a), -ni^{2}s(nu^{6}s). Gen., *ig'nyæ, ig'nyes, ig'nyos* (*-yis*). Gr., ἰγνύα, ἰγνύη, ἰγνύς. Ger., *Kniekehle.* See *Popliteal* SPACE.

IGPECAYA, n. An old term for a drug, probably ipecac, used in Brazil, in dysentery. [B, 18 (a, 24).]

IGREUSINE, n. I^{2}g-ru^{2}s'en. See ELAIODON.

IGUANA (Lat.), n. f. I^{2}g-u^2(u^4)-a(a^3)'na^3. The *Iguana* proper. A genus of *Iguanidæ* having the body and tail covered with implicated scales. Along the back is a range of raised scales, compressed and pointed; and under the neck a compressed and pendant cuticular appendage the edge of which is sustained by a car-

tilaginous prolongation of the hyoid bone. [L, 28 (*a*, 39).] The *Iguanidæ* are a family of pleurodont lizards confined to the warmer parts of America. The body is more or less laterally compressed and supplied by limbs which are designed for arboreal life. [L, 28, 292, 351 (*a*, 39).]—**I. delicatissima, I. nudicollis.** The naked-neck *I.*; a species resembling the common form, especially in the dorsal crest, but having no large plate under the tympanum and no tubercles scattered over the sides of the neck. [L, 28 (*a*, 39).]

IHLANG-IHLANG, n. The *Unona odorata.* [B, 5, 275 (*a*, 24).]

IK (Hind.), n. The *Saccharum officinarum.* [B, 172 (*a*, 24).]

IKAJA, n. See Akazga.

IKAN (Chin.), n. The root of an undetermined plant used in Chinese medicine. [B, 121 (*a*, 35).]

IKARA-MOULI, n. A root found in India, having a strong odor and a pungent taste; used as an antidote to poisons and in indigestion; supposed to be the same as cardamom-root. [B, 88 (*a*, 39.]

IKERA (Jap.), n. The *Atractylis ovata.* ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

IKLEEL-UL-MALIK (Hind.), n. In Bombay, a drug, the fruit of a species of *Melilotus*, used in various disorders. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

IKSHOO (Beng.), n. The *Saccharum officinarum.* [B, 172 (*a*, 24).]

IKTERISCH (Ger.), adj. I[2]k-tar′i[2]sh. See Icteric.

IKTERUS (Lat.), n. m. I[2]k′te[2]r-u[3]s(u[4]s). See Icterus.

ILACHI (Hind.), n. In southern India, the *Elettaria cardamomum.* [B, 18, 172 (*a*, 24).]

ILAIK-KALLI (Tam.), n. The root of *Euphorbia ligularia* Mixed with the juice of the plant and black pepper, it is used in snake-bites. ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

ILANG-ILANG, n. See Ihlang-ihlang.

ILANGO, n. An orchid found in the Gaboon country, said to be poisonous. [B, 121 (*a*, 35).]

ILAPHIS (Lat.), n. f. I[2]l′a[2]f(a[3]f)-i[2]s. See Lappa *major.*

ILÁYACHI (Hind.), n. See Elettaria *cardamomum.*

ÎLE (Fr.), n. El. See Insula.

ILEITIC, adj. I[2]l-e-i[2]t′i[2]k. Lat., *ileiticus.* Pertaining to or affected with ileitis. [L, 50 (*a*, 14).]

ILEITIS (Lat.), n. f. I[2]l(el)-e[2]-i(e)′ti[2]s. Gen., *-it′idos* (*-idis*). From *ileum* (*q. v.*, see also *-itis**). Fr., *iléite.* Ger., *Krummdarmsentzündung.* Inflammation of the ileum, often characterized by swelling of the solitary and agminated follicles. [D, 48.]—**I. pustulosa** [Hufeland]. Typhoid fever. [L, 50 (*a*, 14).]

ILEO-CÆCAL, adj. I[2]l-e[2]-o-se′k′l. From *ileum* (*q. v.*), and *cœcus*, devoid of light. Fr., *ileo-cœcal.* Pertaining to or connected with the ileum and the cæcum. [C.]

ILEOCHOLOSIS (Lat.), n. f. I[2]l(el)-e[2]-o(o[3])-ko[2]l(ch[2]o[2]l)-o′si[2]s. Gen., *-os′eos* (*-is*). From *ileum* (*q. v.*), and χόλος, bile. Of Eisenmann, (1) bilious diarrhœa; (2) cholera morbus. [L, 50 (*a*. 14).]

ILEOCLEISIS (Lat.), n. f. I[2]l(el)-e[2]-o(o[3])-klis′(kle[2]′i[2]s)-i[2]s. Gen., *-cleis′eos* (*-is*). From *ileum* (*q. v.*), and κλεῖσις, a closing. Ger., *Krummdarmverschliessung.* Occlusion of the ileum. [L, 50 (*a*, 14).]

ILEO-COLIC, adj. I[2]l-e[2]-o-kol′i[2]k. From *ileum* (*q. v.*), and κόλον, the colon. Fr., *iléo-colique.* Sp., *ileo-cólico.* Relating to the ileum and the colon.

ILEO-COLITIS (Lat.), n. f. I[2]l(el)-e[2]-o(o[3])-kol(ko[2]l)-i(e)′ti[2]s. Gen., *-it′idos* (*-idis*). From *ileum* (*q. v.*), and κόλον, the colon (see also *-itis**). Enteritis involving both the ileum and the colon. [*a*, 40.]

ILEO-COLOSTOMY, n. I[2]l-e[2]-o-kol-o[2]s′tom-i[2]. From *ileum* (*q. v.*), κόλον, the colon, and στόμα, a mouth. Fr., *iléo-colostomie.* The operation of making an artificial communication between the ileum and the colon. [Jesset, "Sem. méd.," Mar. 20, 1889, p. 94 (*a*, 18).]

ILEO-DICLIDITIS (Lat.), n. f. I[2]l(el)-e[2]-o(o[3])-di[2]k-li[2]d-i(e)′ti[2]s. Gen., *-it′idos* (*-idis*). From *ileum* (*q. v.*), and δικλίς, folding two ways (see also *-itis**). Fr., *iléo-diclidite* [Piorry]. Inflammation of the ileum and of the ileo-cæcal valve. [L, 41 (*a*, 14).]

ILEOGRAPHY, n. I[2]l-e[2]-o[2]g′ra[2]f-i[2]. From *ileum* (*q. v.*), and γραφή, a writing. See Ileology.

ILEO-ILEOSTOMY, n. I[2]l-e[2]-o-i[2]l-e[2]-o[2]s′tom-i[2]. From *ileum* (*q. v.*), and στόμα, an aperture. Fr., *iléo-iléostomie.* The operation of making an artificial communication between two segments of the ileum. [Jesset, "Sem. méd.," Mar. 20, 1889, p. 94 (*a*, 18).]

ILEOLOGY, n. I[2]l-e[2]-o[2]l′o-ji[2]. From *ileum* (*q. v.*), and λόγος, understanding. Fr., *iléologie.* The physiology, anatomy, pathology, etc., of the small intestine. [L, 41 (*a*, 14).]

ILEON (Lat.), n. n. I[2]l(el)′e[2]-o[2]n. See Ileum.

ILEO-PARASITICUS (Lat.), adj. I[2]l(el)-e[2]-o(o[3])-pa[2]r(pa[3]r)-a[2]s(a[3]s)-i[2]t(et)′i[2]k-u[3]s(u[4]s). From *ileum* (*q. v.*), and παράσιτος, a parasite. Parasitic in the ileum. [L.]

ILEO-PARIETAL, adj. I[2]l-e[2]-o-pa-ri′e[2]t-a[2]l. From εἰλεός, a hole, and *paries*, a wall. Pertaining to the walls of the ileum. [*a*, 29.]

ILEO-PECTINEAL, adj. I[2]l″e[2]-o-pe[2]k-ti[2]n-e′a[2]l. See Ilio-pectineal.

ILÉOPISOLITE [Piorry] (Fr.), n. E-la-o-pe-so-let. Inflammation of Peyer's patches. [A, 250 (*a*, 21).]

ILEO-POLYMELIUS (Lat.), n. m. I[2]l(el)-e[2]-o(o[3])-po[2]l-i[2]-mel-(me[2]l)′i[2]-u[3]s(u[4]s). From *ileum* (*q. v.*), πολύς, many, and μέλος, a limb. A monstrosity having a double or even triple ileum. [Hilaire (*a*, 40).]

ILEO-PROCTOSTOMY, n. I[2]l″e[2]-o-pro[2]k-to[2]s′to[2]m-i[2]. From *ileum* (*q. v.*), πρωκτός, the rectum, and στόμα, an aperture. The operation of establishing an artificial communication between the ileum and the rectum. [A, 484.]

ILÉO-PUBIEN (Fr.), adj. E-la-o-pu[6]-be-a[3]n[2]. See Ilio-pubic.

ILEOPYRA (Lat.), n. f. I[2]l(el)-e[2]-o[2]p′i[2]r(u[6]r)-a[3]. From εἰλεός (see Ileum), and πῦρ, fire. Of Eisenmann, typhoid fever. [L, 50 (*a*, 14).]

ILEO-RECTOSTOMY, n. I[2]l-e[2]-o-re[2]k-to[2]s′tom-i[2]. From *ileum* (*q. v.*), *rectum* (*q. v.*), and στόμα, an aperture. See Ileo-proctostomy.

ILEOSIS (Lat.), n. f. I[2]l(el)-e[2]-o′si[2]s. Gen., *-os′eos* (*-is*). Fr., *iléose.* See Ileus.

ILÉOSPILOSES [Piorry] (Fr.), n. pl. E-la-o-spe-los. From εἰλεός (see Ileum), and σπῖλος, a spot. Perforations of the small intestine from ulceration of Peyer's patches. [A, 250 (*a*, 21).]

ILÉO-SPLÉNO-MACROSIE (Fr.), n. E-la-o-spla-no-ma[3]-kro-se. Of Piorry, typhoid fever. [*a*, 40.]

ILEOSTOMY, n. I[2]l-e[2]-o[2]s′to[2]m-i[2]. From *ileum* (*q. v.*), and στόμα, an aperture. The operation of making a communication between the lumen of the small intestine and that of another hollow organ or the external surface.

ILEOTYPHUS (Lat.), n. m. I[2]l(el)-e[2]-o(o[3])-ti(tu[6])′fu[3]s(fu[4]s). From *ileum* (*q. v.*), and τῦφος, typhus. Ger., *I.* It., *ileo-tifo.* Sp., *ileo-tifus.* Typhoid fever. The term is used especially by German writers. [D, 1.]

ILEUM (Lat.), n. n. I[2]l(el)′e[2]-u[3]m(u[4]m). From εἰλεῖν, to twist, because of its convoluted shape. Fr., *iléon.* Ger., *Krummdarm.* It., *ileo.* Sp., *ileon.* The lower three fifths of the small intestine, between the jejunum and the ileo-cæcal valve. It occupies chiefly the umbilical and hypogastric regions and the right iliac fossa. [C.]

ILEUS (Lat.), n. m. I[2]l(el)′e[2]-u[3]s(u[4]s). Gr., εἰλεός (from εἰλεῖν, to twist). Fr., *iléus.* Ger., *I.* Sp., *ileo.* The condition of severe colic, with or without vomiting, incident to intestinal obstruction. Cf. Volvulus.—**I. flavus, I. icteroides.** See Icterus.—**I. inflammatorius.** Enteritis limited to the small intestine. [*a*, 40.]—**I. of the Indies.** In Cullen's classification of diseases, a variety of spasmodic colic. [D, 13.]—**I. paralyticus.** I. resulting from coprostasis in a portion of the large intestine, and dependent on chronically retarded peristalsis (a condition which may finally become a general paralysis of the intestine). [A, 326 (*a*, 21).]—**I. physodes.** Of Cullen, one of the varieties of spasmodic colic with marked tympanites. [D, 13.]—**I. volvulus.** See Volvulus.

ILEX (Lat.), n. f. I(e)′le[2]x. Gen., *il′icis.* Fr., *houx* (2d def.). Ger., *I.*, *Hülsen* (2d def.). 1. Of the ancients, the *Quercus i.* 2. The holly, a genus of the *Ilicineæ.* [B, 19, 34, 42, 173, 180 (*a*, 24).]—**Folia ilicis.** The leaves of *I. aquifolium.* [B, 180 (*a*, 24).]—**Fructus (seu glandes) ilicis.** Acorns (the fruit of *Quercus robur*). [B, 180 (*a*, 24).]—**I. acutangula.** A species used, like *I. paraguaiensis*, for making *maté.* ["Proc. of the Am. Pharm. Assoc.," x (*a*, 14).]—**I. amara.** A species found in Paraguay, and used like *I. paraguaiensis.* ["Proc. of the Am. Pharm. Assoc.," x (*a*, 14).]—**I. aquifolia, I. aquifolium** [Linnæus]. Fr., *houx-*

ILEX AQUIFOLIA. (A, 327.)

commun, agrefous, agrifous, agrion, bois franc, épine de Christ (ou *toujours verte*), *grand pardon, gréou, housson, meslier épineux.* Ger., *gemeine Hülsen, Stechpalme, Christdorn, Stecheiche.* 1. Christmas (or European, or common) holly, holm, a shrub (sometimes a tree) from the inner bark of which bird-lime is extracted. The leaves contain ilixanthin, and were formerly used as a diaphoretic, and lately in intermittent fevers, their febrifuge quality depending on the ilicin they contain. In Corsica the seeds are used as a substitute for coffee. [B, 5, 34, 173, 180 (*a*, 24).] 2. Of Walter, see *I. opaca.*—**I. cassena, I. cassine.** Fr., *houx purgatif* (ou *apalachine*, ou *vomitif*). 1. Of Walter and Aiton, cassena tea, the

yaupon of the American Indians ; a species found along the Atlantic coast of the southern United States. The leaves contain a volatile oil and some caffeine. A decoction of them constituted the *black drink* of the American Indians, used as a medicine and as a drink of etiquette in their councils. 2. Of Willdenow, the *I. dahoon.* [B, 5, 34, 173, 180 (a, 24).]—**I. crassifolia.** Fr., *houx à feuilles épaisses.* A variety of *I. aquifolium.* [B, 173 (a, 24).]—**I. curitibensis.** A South American species used largely in preparing *maté.* [B, 77 (a, 24); "Proc. of the Am. Pharm. Assoc.," x (a, 14).]—**I. da-**

ILEX OPACA. [A, 327.]

hoon. Dahoon-holly ; a shrub from 5 to 12 feet high, found in the swamps of Virginia and Florida. The leaves are said to be used, together with those of *I. cassena*, by the Indians in making their *black drink.* [B, 5, 180 (a, 24).]—**I. decidua.** Deciduous holly ; a species growing in Kansas. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 14).]—**I. dipysena.** A species the leaves of which are used as tea. [B, 197 (a, 35).]—**I. dodonæa.** The *Comocladia angulosa.* [B, 173 (a, 24).]—**I. ferox.** Fr., *houx hérisson.* Hedgehog holly ; a variety of *I. aquifolium.* [B, 173, 175 (a, 24).]—**I. gigantea.** Of Bonpland, one of the species used in South America in preparing *maté.* [B, 77, 121 (a, 24).]—**I. glabra.** Ger., *kahle Winterbeere.* Ink-berry ; a North American shrub from 3 to 4 feet high, found in swamps, having black, shining berries. The leaves are used to make tea, and the bark is employed as a tonic and febrifnge. [B, 19, 34, 42, 180 (a, 24).]—**I. gongonha.** The *gongonha* of Brazil, where its leaves are used for making tea, and are said to be diaphoretic and diuretic. [B, 19 (a, 24).]—**I. humboldtiana.** Of Bonpland, a South American species used in preparing *maté.* [B, 77 (a, 24); "Proc. of the Am. Pharm. Assoc.," x (a, 14).]—**I'kraut** (Ger.). The leaves of *I. aquifolium.* [B, 180 (a, 24).]—**I. lævigata.** The *Prinos lævigata.* [A, 35.]—**I. laxiflora.** Of Lamarck, an American species identified by some with the *I. opaca* and used like the latter. [B, 34, 173, 180 (a, 24).]—**I. ligustrina.** 1. Of Elliott, a variety of *I. dahoon.* 2. Of Jacquin, the *I. vomitoria.* [B, 34, 180 (a, 24).]—**I. macoucoua.** A Brazilian spe-

ILEX VERTICILLATA. [A, 327.]

cies. The unripe fruits are rich in tannin, and, bruised in a ferruginous mud, are used as a dye. [B, 19 (a, 24).]—**I. maté.** See *I. paraguaiensis.*—**I. myrtifolia.** A large shrub, 12 to 20 feet high, with small, linear-oblong, glabrous leaves, growing on the borders of ponds, in pine barrens, from Maryland to Florida. [B, 34 (a, 24).]—**I. nigropunctata.** A species used in South America to adulterate *maté.* [B, 77 (a, 24); "Proc. of the Am. Pharm. Assoc.," x (a, 14).]—**I. obcordata.** Fr., *houx dentelé.* A species found in Cuba, where the bark is used to make glue. [B, 173 (a, 24).]—**I. opaca.** Fr., *houx opaque.* The American holly ; a tree found throughout the United States, and having properties like those of *I. aquifolium.* The leaves contain a glucoside not yet fully investigated. [B, 5, 34, 173 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxxv (a, 14); "Nouv. rém.," Jan. 24, 1889, p. 41.]—**I. ovalifolia.** A South American species. The leaves form a part of the *maté* of commerce. [B, 77 (a, 24); "Proc. of the Am. Pharm. Assoc.," x (a, 14).]—**I. paraguaiensis, I. paraguayiensis.** Fr., *herbe de Saint-Barthélemy* (ou *de Paraguay*), *thé des jésuites* (ou *du Paraguay*). Ger., *Paraguay-Thee.* Sp., *maté, matté, yerba maté, yerba de Palos.* Native Brazilian, *caacuys, caa-mini, gaaguaza.* Paraguay tea ; a small plant cultivated for its leaves. the *maté* (ou *thé*) *du Paraguay* of the Fr. Cod., which are used (entire or in powder [*cha-maté*]) in infusion as tea. They contain a volatile oil, tannin, and caffeine. [B, 5, 173, 180 (a, 24).]—**I. quercifolia.** See *I. opaca.*—**I'säure** (Ger.). See Ilicic acid.—**I. serrata.** Fr., *houx en scie.* 1. Of Desfontaines, a variety of *I. aquifolium.* 2. Of Humboldt, the *I. obcordata.* [B, 173 (a, 24).]—**I. theezans.** A species used like *I. gongonha.* [B, 19 (a, 24).]—**I. variegata.** Fr., *houx panaché.* A variety of *I. aquifolium.* [B. 173 (a, 24).]—**I. verticillata.** Ger., *heilsame Winterbeere.* Black alder, winterberry ; a North American species growing in low, wet places. Its bark, the *prinos* of the U. S. Ph., is tonic and astringent, and has been used in intermittent fever, in diarrhœa, etc., and both internally and as an external wash or poultice in gangrene and in chronic skin eruptions. [B. 5, 19, 180 (a, 24).]—**I. vomitoria.** A North American species, generally identified with and used like *I. cassine* (1st def.). [B, 5, 173, 180 (a, 24).]

ILIA (Lat.), n. n. pl. I^{2}l(el)′i^2-a^3. Fr., *iles.* 1. The two iliac bones. 2. The flanks, the lower lateral portions of the abdomen. 3. Anciently, the viscera, also the pudenda.

ILIAC, adj. I^{2}l′i^2-a^{2}k. Lat., *iliacus* (from εἰλεός, a hole). Fr., *iliaque, ilien.* Ger., *iliak.* It., *iliaco.* Sp., *iliaco.* Of, pertaining to, or adjacent to the ilium. [C.]

ILIACO-FEMORAL, adj. I^{2}l i″a^{2}k-o-fe^{2}m′o-r′l. For deriv., see Ilium and Femur. Of, pertaining to, or in relation with the ilium and the femur or the thigh.

ILIACO-MUSCULAR, adj. I^{2}l-i″a^{2}k-o-mu^{3}s′ku^2-la^{3}r. From *iliacus* (*q. v.*), and *musculus*, a muscle. Fr., *iliaco-musculaire.* Pertaining to the iliac muscles. [L, 41 (a, 14).]

ILIACO-PSOAS (Lat.), n. m. I^{2}l(el)-i(i^2)″a^{2}k(a^{3}k)-o(o^3)-so(pso^2)′-a^{2}s(a^{3}s). For deriv., see Ilium and Psoas. The iliacus internus and psoas muscles considered as one.

ILIACO-TROCHANTERICUS (Lat.), adj. I^{2}l(el)-i(i^2)″a^{2}k-(a^{3}k)-o(o^3)-tro(tro^2)-ka^{2}n(ch^{2}a^{3}n)-te^{2}r(tar)-i^{2}k-u^{3}s(u^{4}s). For deriv., see Ilium and Trochanter. Fr., *iliaco-trochanterien.* Pertaining to the iliacus internus muscle ; as a n., the muscle itself. [A, 385.]

ILIACO-TROCHANTIN (Fr.), n. E-le-a^3-ko-tro-ka^{3}n^2-ta^{2}n^2. That portion of the iliacus muscle which is attached to the lesser trochanter of the femur. [L, 41 (a, 14).]

ILIACUS (Lat.), adj. I^{2}l(el)-i(i^2)′a^{2}k(a^{3}k)-u^{3}s(u^{4}s). See Iliac ; as a n., the iliac muscle (Ger., *grosser Darmbeinmuskel*).—**I. externus.** 1. See Glutæus *medius.* 2. Of Riolan, see Pyriformis.—**I. internus.** A flat, radiated muscle which arises from the upper half of the iliac fossa, the inner margin of the crest of the ilium, the ilio-lumbar ligament, the ala of the sacrum, the anterior border of the ilium, and by a few fibres from the capsule of the hip joint. The fibres pass downward and inward, converge, and unite for the most part with the tendon of the psoas, to be inserted into the small trochanter of the femur. A few fibres are inserted separately into a triangular surface in front of and below the small trochanter. [L, 31, 142, 172, 332 (a, 29).]—**I. minor.** A small detached portion of the i. It arises from the anterior inferior spine of the ilium and is inserted into the lower part of the anterior intertrochanteric line or into the ilio-femoral ligament. [L, 142 (a, 29).]

ILIADELPHUS (Lat.), adj. I^{2}l(el)-i(i^2)-a^{2}d(a^{3}d)-e^{2}lf′u^{3}s(u^{4}s). From εἰλεός (see Ilium), and ἀδελφός, a brother. Of monsters, double above and united at and below the pelvis. [L, 107.]

ILIADUM [Paracelsus], **ILIADUS** [Paracelsus], n's. Original matter consisting of salt, mercury, and sulphur. [a, 40.]

ILIAL, adj. I^{2}l′i^2-a^{2}l. See Iliac.

ILIASTER [Paracelsus], **ILIASTUM** [Paracelsus]. n's. The occult virtue of nature, whence all things were said to have their increase. [a, 40.]

ILICEÆ (Lat.), n. f. pl. I(e)-li^{2}s(li^{2}k)′e^2-e(a^3-e^2). From *ilex* (*q. v.*). Of Dumortier (1822), a family of the *Thalamitubia*, or (1827) of the *Calicungulia*, or (1829) of the *Jasminarieæ*, having as a type the genus *Ilex.* [B, 170 (a, 24).]

ILICIC ACID, n. I^{2}l-i^{2}s′i^{2}k. Fr., *acide ilicique.* Ger., *Ilexsäure.* A crystalline acid found, with ilixanthin, in the leaves of *Ilex aquifolium* ; a colorless. syrupy liquid. similar to malic acid, readily soluble in water. ["Proc. of the Am. Pharm. Assoc.," vii (a, 14).]

ILICIN, n. I^{2}l′i^2-si^{2}n. Fr., *ilicine.* Ger., *I.* A bitter, crystallizable principle obtained from holly-leaves. soluble in water and in alcohol, insoluble in ether ; used as a substitute for quinine. [B, 5, 173 (a, 24).]

ILICINÆ (Lat.), n. f. pl. I(e)-li^{2}s(li^{2}k)-in(en)′e(a^3-e^2). From *ilex* (*q. v.*). 1. Of Lindley, an order of the *Monopetalæ*, and subsequently of the *Primulales.* 2. Of Reichenbach, a division of the *Sapotaceæ*, consisting of the *Aquifoliaceæ, Olacinæ*, and *Brexieæ.* The *Ilicineæ* (Fr., *ilicinées* ; Ger., *Ilicineen*) are : Of Endlicher and others, the *Aquifoliaceæ*, and of Reichenbach the *Ilicinæ* (2d def.). [B, 42, 104, 170 (a, 24).]

ILIDJAH, n. A place in Bosnia where there is a warm sulphurous and saline spring. [L, 49 (*a*, 14).]

ILIEN (Fr.), adj. E-le-a3n2. See ILIAC.

ILINGOS (Lat.), **ILINGUS** (Lat.), n's m. I2l(el)-i2n2'go2s, -gu3s(gu4s). Gr., ἴλιγγος (from ἰλλειν, to roll). Ger., *Schwindel, Drehkrankheit.* An old name for vertigo. [L, 50 (*a*, 14).]

ILIO-ABDOMINALIS (Lat.), n. f. I(e)-li2-o(o3)-a2b(a3b)-do2m-i2n-a(a3)'li2s. From *ilium* (*q. v.*), and *abdomen*, the abdomen. Fr., *ilio-abdominal.* The analogue of the obliquus internus abdominis muscle of man, found in the lower mammals. [L.]

ILIO-APONEUROSI-FEMORALIS (Lat.), n. m. I(e)-li2-o(o3)-a2p(a3p)-o-nu2-ro-si(si2)-fe2m-o2r-a(a3)'li2s. Fr., *ilio-aponévrosi-fémoral.* See TENSOR *vaginæ femoris.*

ILIO-APONEUROTICUS (Lat.), adj. I2l(el)"i2-o(o3)-a2p(a3p)-o2-nu2-rot'i2k-u3s(u4s). Fr., *ilio-aponévrotique.* Pertaining to the ilium and to the fascia lata; as a n., the analogue of the tensor vaginæ femoris of man, found in the lower animals. [L.]

ILIO-CAPSULARIS (Lat.), **ILIO-CAPSULO-TROCHANTERICUS** (Lat.), n's m. I2l(el)"i2-o(o3)-ka2p(ka3p)-su2(su4)-la(la3)'-ri2s,-ka2p(ka3p)-su2l(su4l)-o(o3)-tro(tro2)-ka2n(ka3n)-te2r(tar)'i2k-u3s-(u4s). Fr., *ilio-capsulo-trochantin.* See OBTURATOR *internus.*

ILIO-CAUDAL, adj. I2l-i2-o-ka4'd'l. From *ilium* (*q. v.*), and *cauda*, the tail. Pertaining to the ilium and to the coccyx.

ILIO-COCCYGEUS (Lat.), n. m. I2l(el)-i2-o(o3)-ko2k-si2j(ku6g)'-e2-u3s(u4s). For deriv., see ILIUM and COCCYX. The rhachidian muscle of the frog. [L, 50 (*a*, 14).]

ILIO-COSTALIS (Lat.), n. and adj. I2l(el)-i2-o(o3)-ko2st-a(a3)'-li2s. For deriv., see ILIUM and COSTA. Fr., *ilio-costal* [Chaussier]. 1. See SACRO-LUMBALIS. 2. The portion of the quadratus lumborum muscle extending between the crest of the ilium and the 12th rib. [L, 31.]—**I. cervicis.** See CERVICALIS.—**I. dorsi.** An accessory portion of the sacro-lumbalis arising from the angles of the six lower ribs and inserted into the angles of the six upper ribs. [L, 332.]—**I. lumborum.** A portion of the sacro-lumbalis arising from the lower margin of the 12th rib, and inserted into the 11th to the 4th ribs. [L, 332.]

ILIO-COSTO-CERVICALIS (Lat.), n. f. I2l(el)-i2-o(o3)-ko2st-o(o3)-su5r(ke2r)-vi2(we)-ka(ka3)'li2s. For deriv., see ILIUM, COSTA, and CERVIX. See SACRO-LUMBALIS.

ILIO-CRÊTI-TIBIAL (Fr.), n. See SARTORIUS.

ILIO-DORSAL, adj. I2l-i2-o-do2r's'l. From *ilium* (*q. v.*), and *dorsum*, the back. Pertaining to the dorsal surface of the ilium. [*a*, 29.]

ILIO-FEMORAL, adj. I2l-i2-o-fe2m'o2-r'l. Lat., *ilio-femoralis* (from *ilium* [*q. v.*], and *femur* [*q. v.*]). Fr., *ilio-fémoral.* Pertaining to, connected with, or adjacent to the ilium and the femur. [L, 41, 50 (*a*, 14).]

ILIO-FEMORALIS (Lat.), adj. I2l(el)-i2-o(o3)-fe2m-o2r-a(a3)'-li2s. Ilio-femoral; as a n., a muscle attached to the ilium and to the femur.—**I.-f. gracilis.** See GRACILIS *anterior.*

ILIO-HYPOGASTRIC, adj. I2l-i2-o-hi2p-o-ga2st'ri2k. For deriv., see ILIUM and HYPOGASTRIUM. Lat., *ilio-hypogastricus.* Fr., *ilio-hypogastrique.* Ger., *den Krummdarm* (oder *die Weichen*) *und den Unterbauch betreffend.* Pertaining or adjacent to the ilium and the hypogastrium. [L, 50 (*a*, 14).]

ILIO-INGUINAL, adj. I2l-i2-o-i2n2'gwi2-n'l. From *ilium* (*q. v.*), and *inguen*, the groin. Fr., *i.-i.* 1. Pertaining to the ilium and the groin. 2. Occupying partly the iliac and partly the inguinal region.

ILIO-LOMBI-COSTAL (Fr.), n. E-le-o-lo2n2-be-kos-ta3l. Lat., *ilio-lumbo-costalis.* See QUADRATUS *lumborum.*

ILIO-LUMBALIS (Lat.), adj. I2l(el)"i2-o(o3)-lu3m(lu4m)-ba-(ba3)'li2s. See ILIO-LUMBAR; as a n., see QUADRATUS *lumborum.*

ILIO-LUMBAR, adj. I2l"i2-o-lu3m'ba3r. Lat., *ilio-lumbalis.* Fr., *ilio-lombaire.* Pertaining to or connected with the ilium or the adjacent tissues and the tissues of the lumbar region; situated in the iliac and lumbar regions. [L, 41 (*a*, 14).]

ILIO-LOMBO-COSTO-ABDOMINAL (Fr.), adj. E-le-o-lo2n2-bo-kos-to-a3b-do-me-na3l. Of Dumas, common to, connected with, or related to the iliac, lumbar, costal, and abdominal regions (*e. g.*, the internal oblique muscle). [Blandin (*a*, 39).]

ILIO-LUMBO-VERTEBRAL, adj. I2l-i2-o-lu3m-bo-vu6rt'e2-br'l. Pertaining to or connected with the iliac and lumbar regions or structures and the vertebral columns. [L.]

ILION (Lat.), n. n. I2l(el)'i2-o2n. See ILIUM.

ILIO-PECTINEAL, adj. I2l-i2-o-pe2k-ti2n-e'a2l. Lat., *ilio-pectinæus* (see ILIUM and PECTEN). Fr., *ilio-pectiné.* Pertaining to the ilium and to the pubic bone. [A, 385.]

ILIO-PELVIC, adj. I2l-i2-o-pe2l'vi2k. For deriv., see ILIUM and PELVIS. Pertaining to the ilium and to the pelvic cavity.

ILIO-PERONEAL, adj. I2l-i2-o-pe2r-o-ne'a2l. Lat., *ilio-peroneus* (see ILIUM and PERONE). Pertaining to the ilium and to the peroneal region.

ILIO-PRÆTIBIALIS (Lat.), n. m. I2l(el)-i2-o(o3)-pre(pra3-e2)-ti2b(teb)-i2-a(a3)'li2s. From *ilium* (*q. v.*), *præ*, before, and *tibia* (*q. v.*). Fr., *ilio-prétibial.* See SARTORIUS.

ILIO-PSOAS (Lat.), n. m. I2l(el)"i2-o(o3)-so(pso2)'a2s(a3s). See ILIACO-PSOAS.

ILIOPSOITIS (Lat.), n. f. I2l(el)-i2-o(o3)-so(pso2)-i(e)'ti2s. Gen., *-it'idos* (*-idis*). Fr., *ilio-psoïte.* Inflammation of the iliacus internus and psoas muscles. [L, 107.]

ILIO-PUBERAL, ILIO-PUBIC, adj's. I2l-i2-o-pu2b'e2-r'l, -i2k. Lat., *ilio-pubicus* (see ILIUM and PUBES). Fr., *ilio-pubien.* Pertaining to or connected with the ilium and the pubic bone or region. [L, 41 (*a*, 14).]

ILIO-PUBI-COSTO-ABDOMINALIS (Lat.), n. m. I2l(el)-i2-o(o3)-pu2(pu)-bi(bi2)-ko2st-o(o3)-a2b(a3b)-do2m(dom)-i2n-a(a3)'li2s. From *ilium* (*q. v.*), *pubes*, the private parts, *costa*, a rib, and *abdomen*, the abdomen. Fr., *ilio-pubi-costo-abdominal* [Dumas].

ILIO-ROTULEUS (Lat.), n. m. I2l(el)"i2-o(o3)-rot(ro2t)-u2l(ul)'-e2-u3s(u4s). For deriv., see ILIUM and ROTULA. Fr., *ilio-rotulien.* Of Gerard, the triceps cruris muscle. [L, 13.]—**Anterior i.-r.** [Leyh]. See *I.-r.*—**Internal i.-r.** See *Long* ADDUCTOR *of the leg.*

ILIO-ROTULIEN (Fr.), n. E-le-o-ro-tu6-le-a3n2. The rectus muscle of the thigh. [L, 41 (*a*, 14).]

ILIO-SACRAL, adj. I2l-i2-o-sak'r'l. Fr., *ilio-sacré.* See SACRO-ILIAC.

ILIO-SACRO-FEMORALIS (Lat.), n. f. I2l(el)"i2-o(o3)-sak-(sa3k)-ro(ro3)-fe2m-o2r-a(a3)'li2s. For deriv., see ILIUM, SACRUM, and FEMUR. Fr., *ilio-sacro-fémoral.* See GLUTÆUS *maximus.*

ILIO-SCIATIC, adj. I2l-i2-o-si-a2t'i2k. For deriv., see ILIUM and ISCHIUM. Fr., *ilio-sciatique.* Pertaining to or connected with the ilium and the ischium. [L, 41 (*a*, 14).]

ILIO-SCROTAL, adj. I2l-i2-o-skro't'l. For deriv., see ILIUM and SCROTUM. Pertaining to the ilium and the scrotum. [*a*, 14.]

ILIO-SPINAL, adj. I2l-i2-o-spi'n'l. Lat., *ilio-spinalis* (see ILIUM and SPINA). Fr., *i.-s.* 1. Pertaining to the ilium and to the spine; as a n., the longissimus dorsi muscle. 2. A muscle in the lower animals corresponding to the longissimus dorsi and transversalis colli muscles of man, regarded by Cuvier as the combination of the longissimus dorsi, transversalis cervicis, semispinalis dorsi, and semispinalis colli muscles, and by Bourgelat, of the long dorsal, short transversal, and long spinous muscles. [L, 13.]

ILIO-TIBIAL, adj. I2l-i2-o-ti2b'i2-a2l. From *ilium* (*q. v.*), and *tibia*, the large shin-bone. Pertaining to the ilium and the tibia. [*a*, 29.]

ILIO-TROCHANTERIC, adj. I2l-i2-o-tro-ka2n-te2r'i2k. Lat., *ilio-trochantericus* (see ILIUM and TROCHANTER). Pertaining to the ilium and the trochanter. [*a*, 29.]

ILIO-TROCHANTÉRIEN (Fr.), n. E-le-o-tro-ka3n2-ta-re-a3n2. See ILIO-TROCHANTERIUS.—**Grand i.-t.** See ILIO-TROCHANTERIUS *magnus.*—**Moyen i.-t.** See ILIO-TROCHANTERIUS *medius* and *parvus.*—**Petit i.-t.** See ILIO-TROCHANTERIUS *parvus.*

ILIO-TROCHANTERIUS (Lat.), n. m. I2l(el)-i2-o(o3)-tro(tro2)-ka2n(ch2a3n)-te(ta)'ri2-u3s(u4s). See ILIACUS.—**I.-t. externus.** See *I.-t. medius.*—**I.-t. magnus.** Fr., *grand fessier* (ou *ilio-trochantérien*). Ger., *grosser Kruppenmuskel* (oder *Gesässmuskel*), *grosser* (oder *mittlerer*) *Darmbein-Umdreher.* The analogue of the glutæus medius muscle of man, found in the lower animals. [L.]—**I.-t. medius.** Fr., *moyen ilio-trochantérien, petit fessier, fessier superficiel* (ou *moyen*). Ger., *äusserer Kruppenmuskel* (oder *Gesässmuskel*, oder *Backenmuskel*, oder *Darmbeinumdrehermuskel*), *oberer Darmbeinumdrehermuskel.* The analogue of the glutæus maximus muscle of man, found in lower animals. [L, 13.]—**I.-t. parvus.** Fr., *moyen* (ou *petit*) *ilio-trochantérien* (ou *fessier*), *fessier profond.* Ger., *mittlerer Kruppenmuskel* (oder *Gesässmuskel*, oder *Darmbeinumdrehermuskel*, oder *Backenmuskel*). The deep glutæus, the analogue of the glutæus minimus muscle of man, found in the lower animals. [L, 13.]

ILIO-TROCHANTINEUS (Lat.), n. m. I2l(el)-i2-o(o3)-tro-(tro2)-ka2n(ch2a3n)-ti2n'e2-u3s(u4s). See ILIACUS (2d def.).

ILIUM (Lat.), n. n. I2l(el)'i2-u3m(u4m). Fr., *os iliaque* (ou *de l'hanche*, ou *de l'île*, ou *coxal* [1st def.]). Ger., *Darmbein* (1st def.). It., *ileo, osso ileo.* Sp., *iliaco.* Syn.: *os ilii.* 1. Originally the flank or haunch; hence the haunch-bone or superior expanded portion of the innominate bone. By its inferior extremity it forms a part of the acetabulum, while its upper part forms a broad expanse for the support of the abdominal viscera and for the attachment of the gluteal muscles. The external surface, or dorsum, is smooth, convex in front, deeply concave behind, and crossed by three curved lines which limit the areas of attachment of the gluteal muscles. The superior curved line commences about two inches in front of the posterior extremity of the crest and curves downward and forward toward the posterior part of the great sciatic notch; the middle curved line commences about an inch or an inch and a half behind the anterior superior spine of the i. and arches backward and downward to the upper margin of the great sciatic notch; the inferior curved line commences at the upper part of the anterior inferior spinous process and terminates at the middle of the great sciatic notch. Between the inferior curved line and the upper margin of the acetabulum is a rough surface for the attachment of the posterior head of the rectus femoris. The internal surface presents anteriorly a smooth, concave surface, occupied by the iliacus muscle, and known as the iliac fossa; posteriorly a smooth surface, which enters into the formation of the true pelvis, separated from the iliac fossa by the ilio-pectineal line, an uneven auricular surface for articulation with the sacrum, and above this a less rough surface for the attachment of the sacro-iliac ligament, and of the erector and multifidus spinæ muscles. The crest is the superior border of the bone. It is convex in general outline, bent inward anteriorly, outward posteriorly. Its surface is broadest at the posterior extremity, narrowest in the centre, and is divided into an external and an internal lip and an intermediate space, or ridge, for muscular attachments. It terminates at either end in the anterior superior and posterior superior spinous processes of the ilium. The anterior border is concave and forms the incisura iliaca minor, terminated at either end by the anterior superior and anterior inferior spinous processes. The posterior border also presents two projections, the posterior superior and posterior inferior spinous processes separated by a concavity, the great sciatic notch. [L, 31, 142, 172, 332 (*a*, 29).] 2. An old term for the ileum.

ILIXANTHIN, n. I-li^{2}x-a^{2}n'thi^{2}n. From *ilex* (*q. v.*), and ξανθός, yellow. A pale-yellow crystalline extractive substance obtained from the leaves of *Ilex aquifolium*; soluble in water and in alcohol, and used as a dye. [B, 5 (α, 24), 46 (α, 39); "Proc. of the Am. Pharm. Assoc." (α, 14).]

ILKESTON, n. I^{2}l'ke^{2}s-t'n. A place in Derbyshire, England, where there is a ferruginous spring. [L, 49 (α, 14).]

ILLACRIMATIO (Lat.), n. f. I^{2}l-la^{2}k(la^{3}k)-ri^2-ma(ma^3)'shi^2-(ti^2)-o. Gen., *-o'nis*. See EPIPHORA.

ILLAQUEATIO (Lat.), n. f. I^{2}l-la^{2}k(la^{3}k)-we^2-a(a^3)'shi^2(ti^2)-o. From *illaqueare*, to ensnare. Of Celsus, an operation for restoring the position and direction of a single cilium in distichiasis by passing a fine needle and thread through the border of the lid and around the misplaced follicle, and drawing it into its normal position through the puncture made by the needle. [A, 326 (α, 21); F.]

ILLECEBRA (Lat.), n. f. I^{2}l-le^{2}s(le^{2}k)'e^{2}b-ra^3. Lit., a bait; the *Sedum acre*. The *Illecebraceæ* (Fr., *illécebracées*) are: Of Lindley, an order of the *Silenales*, consisting of the genera of Endlicher's *Paronychieæ*, or (Torrey and Gray) of the tribes *Illecebreæ* and *Sperguleæ*; of Bentham and Hooker, an order of the *Curvembryeæ*, including the *Scleranthaceæ*, *Pollichieæ*, *Paronychieæ*, and *Pterantheæ*. The *Illecebreæ* (Fr., *illécebrées*; Ger., *Illecebreen*) are: Of R. Brown and others, an order of plants, essentially the *Illecebraceæ*, and of De Candolle and others, a tribe of the *Paronychieæ* (*Illecebraceæ*). The *Illecebrineæ* are: Of Dumortier, a family of the *Amarantharieæ*, and of Endlicher, Wood, and others, a suborder of the *Caryophyllaceæ*, consisting of the *Sperguleæ* and *Paronychieæ*. [B, 1, 34, 42, 170, 180 (α, 24).]—**I. major.** The *Sedum telephium*. [B, 307 (α, 35).]

ILLECEBRUM (Lat.), n. n. I^{2}l-le^{2}s(le^{2}k)-eb(e^{2}b)'ru^{3}m(ru^{4}m). Fr., *illécèbre*. Ger., *Knorpelblume*. A genus of the *Illecebraceæ*, tribe *Pollichieæ*. [B, 19, 42 (α, 24).]—**I. achyrantha.** Sp., *tianguipepetla* [Mex. Ph.]. The *Achyranthes repens* (*q. v.*). In Mexico the flowers are used as an astringent. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (α, 24).]—**I. lanatum.** The *Achyranthes lanata*. [B, 173 (α, 35).] See also ÆRUA *lanata*.—**I. minor.** The *Sedum acre*. [B, 180 (α, 24).]—**I. paronychia.** The *Paronychia argentea*. [B, 180 (α, 24).]—**I. sessile.** The *Paronychia sessilis*. [B, 173 (α, 24).]—**I. vermiculare.** See SEDUM *acre*.—**H. verticillatum.** Fr., *herbe au panaris*. A mildly astringent species used in whitlow. [B, 19, 42, 173 (α, 24).]

ILLEGITIMACY, n. I^{2}l-le-ji^{2}t'i^2-ma-si^2. Fr., *illégitimité*. The state of being illegitimate. [α, 18.]

ILLEGITIMATE, adj. I^{2}l-le^{2}j-i^{2}t'i^{2}m-at. Gr., νόθος. Lat., *illegitimus* (from *in*, neg., and *legitimus*, according to law). Fr., *illégitime*. Ger., *illegitim*. Not according to law; of a child, born out of wedlock.

ILLICIUM (Lat.), n. n. I^{2}l-li^{2}s(li^{2}k)'i^2-u^{3}m(u^{4}m). From *illicere*, to entice. Fr., *badiane*. Ger., *Sternanis*. 1. Star-anise; of Linnæus, a genus of the *Magnoliaceæ*, tribe *Wintereæ* (*Illicieæ*), exhaling, when bruised, the odor of anise. The *Illiceæ*, or *Illicieæ* (Fr., *illiciées*; Ger., *Illicieen*), are a tribe of magnoliads, the *Wintereæ* of Bentham and Hooker. The *Illicineæ* of Spach are a section of the *Illicieæ*. [B, 5, 19, 34, 42, 170, 173, 180, 275 (α, 24).] 2. Of the U. S. Ph. and Br. Ph., the fruit of *I. anisatum* (1st def.). [B.]—**Fructus illicii.** Star-anise fruit. See under *I. anisatum*.—**I. anisatum.** Fr., *badiane anisée* (1st def.), *anis étoilé* (ou *de la Chine*, ou *de Sibérie*) (1st def.), *bois d'anis* (1st def.). Ger., *wahrer* (oder *gebräuchlicher*) *Sternanis* (1st def.). 1. Of Linnæus and of Loureiro, yellow-flowered aniseed-tree, star-anise, a highly aromatic species, indigenous to Cochin-China, where it is used as a condiment, stomachic, and carminative. In Europe it is used to flavor liquors, and in medicine. It contains a volatile oil, having anethol as its chief constitutent. According to some, it is poisonous in large doses, its action resembling that of *I. religiosum*. The bark, *cortex badiana* (seu *lavola*, seu *anisi stellati*), resembles cinnamon, has the taste and odor of the fruit, and was formerly used. [B, 5, 18, 19, 173, 180, 185 (α, 24).] 2. Of Bartram, see *I. parviflorum*.—**I. floridanum.** Fr., *badiane de la Floride*. Poison bay, Florida stink-bush (or anise-tree), a species growing in swamps in Florida and Alabama. The bark and seed have a spicy odor, and the leaves are bitter and are said to be poisonous. The capsules have been proposed as a substitute for star-anise. [B, 5, 19, 34, 180, 185 (α, 24).]—**I. japonicum** [Siebold]. See *I. religiosum*.—**I. parviflorum** [Michaux]. Fr., *badiane à petites fleurs*. Syn.: *I. anisatum*. A species growing on river banks in the southern United States. The bark and leaves are highly aromatic and resemble anise. The root has the odor and properties of sassafras. [B, 5, 34, 173, 180 (α, 24).]—**I. religiosum.** Of Siebold, a species found in Japan, where it is called *shikimi* or *skimmi*, and the bark is used as incense; a tree from 25 to 30 feet high (twice to three times the height of *I. anisatum*, and differing also in the formation of its leaves and fruit, although by many botanists identified with or made a variety of the *I. anisatum*). The fruit has the odor of bay-leaves, and contains a crystalline principle, *sikimin*, which produces vomiting, convulsions, and, in sufficient doses, death; its essential oil, according to Eykman, contains safrol and eugenol. [B, 5, 18, 19, 180, 185 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxix (α, 14).]—**I. verum** [Sir Jos. Hooker]. A species cultivated in the botanical gardens of Kew from a seedling of the true star-anise plant, and considered by Hooker as quite different from *I. anisatum*. ["Proc. of the Am. Pharm. Assoc.," xxxvii (α, 14).]

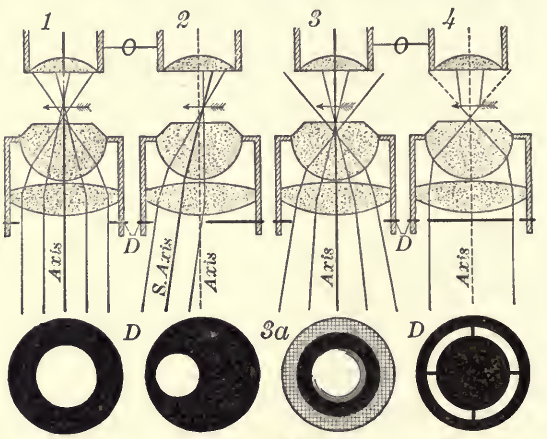
ILLINCTUS (Lat.), n. m. I^{2}l-li^{2}n^{2}k'tu^{3}s(tu^{4}s). Gen., *-linct'us*. From *in*, in, and *linctus*, a licking. See ECLEGMA.

ILLIPÉ (Fr.), n. El-le-pa. See BASSIA *butyracea*.—**Huile d'I.** See *Oil of* BASSIA.—**I. à beurre.** See BASSIA *butyracea*.—**I. à larges feuilles.** See BASSIA *latifolia*.—**I. à longues feuilles.** See BASSIA *longifolia*.

ILLIS (Lat.), n. f. I^{2}l'li^{2}s. Gen., *il'lidos* (*-idis*), *illi*. Gr., ἰλλίς. Of Galen, one who squints. [L, 50 (α, 14).]

ILLISIO (Lat.), n. f. I^{2}l-li^{2}z(les)'i^2-o. Gen., *-on'is*. From *illidere*, to strike against. Fr., *illision*. See ENTHLASIS.

ILLITION, n. I^{2}l-li^{2}sh'u^{3}n. Lat., *illitio* (from *illinere*, to smear). Inunction. [α, 14.]



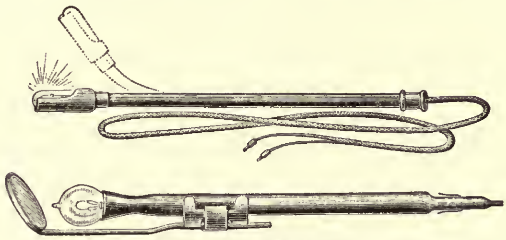
ILLNESS, n. I^{2}l'ne^{2}s. Fr., *maladie*. Ger., *Erkrankung* (1st def.), *Krankheit*. 1. The state of being out of health. 2. A disease. [D.]

ILLOS (Lat.), n. m. I^{2}l'lo^{2}s. Gr., ἰλλός. See ILLIS.

ILLOSIS (Lat.), n. f. I^{2}l-lo'si^{2}s. Gen., *-os'eos* (*-is*). Gr., ἰλλωσις (from ἴλλειν, to roll). See STRABISMUS and HELOSIS.

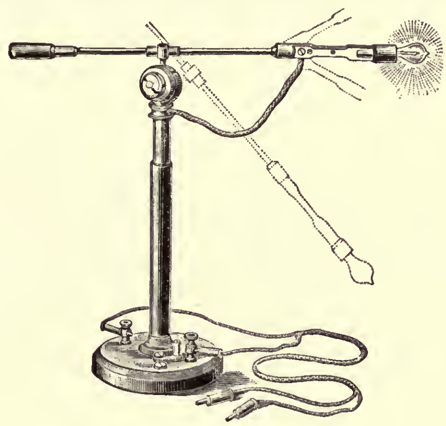
ILLUMINATION, n. I^{2}l-lu^2-mi^{2}n-a'shu^{3}n. Lat., *illuminatio*. Fr., *i*. Ger., *Beleuchtung*. The act or process of lighting; the state of being lighted.—**Axial i.** In microscopy, i. in the line of the axis of the instrument.—**Focal i.** Fr., *i. focale*. Ger., *focale Beleuchtung*. It., *illuminazione focale*. Sp., *iluminación focal*. The concentration of the flame of a lamp in a darkened room, by means of a convex lens of 2 or 2½ inches focal distance, upon the point which is the special object of examination. [F.]—**Lateral i.**, **Oblique i.** Fr., *oblique*. Ger., *schiefe* (oder *seitliche*) *Beleuchtung*. 1. A form of focal i. employed in ascertaining the condition of the structures of the anterior half of the eyeball. A lamp is placed somewhat in front and to one side of the patient, at a distance of about two feet and on a level with his eye, and the light is concentrated upon the cornea or crystalline lens by a strong bi-convex lens of 2 to 2½ inches focus. By shifting the cone of light from one portion of the cornea to another, the whole expanse may be thoroughly examined. 2. In microscopy, i. at an angle to the axis of the instrument.

ILLUMINATOR (Lat.), n. m. I^{2}l-lu^2(lu)-mi^{2}n-a(a^3)'to^{2}r; in Eng., i^{2}l-u^{2}m'i^{2}n-at-o^{2}r. A device for producing illumination.—**Abbé's i.** An i. of very wide aperture for the microscope, de-



ABBÉ'S ILLUMINATOR.

1, section of the illuminator with central parallel rays; 2, illuminator receiving oblique parallel rays; 3, section of illuminator showing that a central converging beam is brought to a focus within or at the surface of the front lens, and that the object is lighted with widely diverging rays; 4, section of illuminator showing the production of dark-ground illumination, by the use of a diaphragm shutting off all but the marginal rays, the angle of which is so great that, as shown by the dotted lines, they can not enter the objective unless changed in direction by a suitable object. The appearance is that of a self-luminous object in a dark field; 3*a*, the upper, front or end view of the illuminator; *D*, *D*, *D*, *D*, diaphragms, seen in section in the illuminator, face views below; *O*, *O*, front of the microscopic objective. As shown in the figures, the illuminator is centred when its axis coincides with the axis of the microscope.



vised by Abbé. It is not achromatic; the form of 1·20 numerical aperture consists of two, while the form of 1·40 numerical aperture consists of three, lenses. As shown by the arrows in the figures, the object should be placed in or very near the focus and, except for low powers, parallel or approximately parallel rays should be reflected on it from a plane mirror. For refraction images, as in studying histology, a diaphragm with small opening is used, but for color images, as in studying stained microbes, either a large-holed diaphragm or none at all is used. In employing the best high-angled objectives a drop of water or homogeneous immersion fluid is placed between the i. and the slide. ["Arch. f. mikr. Anat.," ix, 1873, p. 469 (J); J, 113, 156.]—**Black-** (or **dark-**) **ground i.** An optical instrument in which an opaque surface is introduced behind the object, while illuminating rays are directed around and about it. [α, 40.]—**Electric i.** Any device in which electricity is used for illuminating the cavities of the body. A small Edison lamp, suitably mounted, is generally employed. [α, 25.]—**Hemispherical i.** Of Wenham, a hemispherical lens attached to the under side of the slide for projecting rays of great obliquity upon the object. [J, 113, 199.]—**Iris i.** Of R. H. Ward, an attachment devised by him for the microscope, to be used with oblique as well as with axial illumination. It consists of a slit diaphragm mounted under the object glass, with a decentering screw. [Ward, "Am. Monthl. Micr. Jour.," Jan., 1885, p. 14.]—**Microscopic i.** A small electric lamp supported on a stand fitted with a universal joint. The incandescent electric lamp is thus made use of, giving a steady and powerful light in close proximity to objects under microscopical investigation. [α, 25.]—

Parabolic i. A cylinder of glass one end of which is ground in the form of a paraboloid. The top of the paraboloid is then hollowed out so that the totally reflected rays from the paraboloid pass without refraction toward the focus of the paraboloid. A central disc is used to cut off the rays of moderate angle. This i. is used mostly for dark-ground illumination. [J, 113, 200.]—**Side i.** A small concave mirror for throwing light upon opaque microscopic objects. [J, 199.]—**Smith's vertical i.** An i. devised by H. L. Smith for illuminating opaque objects for high powers. It consists of an annular silver reflector placed at an angle of 45° just above the

ELECTRIC ILLUMINATORS.

back combination of the objective. The light passes through an opening in the tube of the microscope or special piece holding the reflector, and is reflected down through the objective to the object. [J, 113.]—**Tolles's vertical i.** A vertical i. consisting of a small rectangular prism placed above the front combination of the objective and totally reflecting the light entering the end of the prism which projects laterally through the objective. This form has been found especially excellent for investigating fine rulings on metal surfaces.

A MICROSCOPIC ILLUMINATOR.

[J, 113.]—**Vertical i.** A reflector or prism within a microscope by which light entering the side of the tube above the objective is reflected down through the objective upon the object. The first successful form was devised by H. L. Smith. [J, 113.] Cf. *Smith's vertical illuminator.*—**White-cloud i.** A surface of plaster of Paris or ground glass for reflecting light upon microscopic objects and thus obtaining the effect of illumination from a white cloud. [J, 113.]

ILLUMINISM, n. I^{2}l-lu^{2}m'i^{2}n-i^{2}z'm. A cerebral excitation during which the subject fancies that he sees or converses with supernatural beings. [L, 107.]

ILLUPIE-TREE, n. The *Bassia longifolia.* [B, 19 (*a*, 24).]

ILLUS (Lat.), n. m. I^{2}l'lu^{3}s(lu^{4}s). See ILLIS.

ILLUSION, n. I^{2}l-lu^2'zhu^{3}n. Lat., *illusio* (from *illudere*, to play with anything). Fr., *i.* Ger., *I. Täuschung.* The misapprehension or false interpretation of external objects which really exist. [D, 21.] Cf. DELUSION.

ILLUSIONAL, adj. I^{2}l-lu^2'zhu^{3}n'l. Pertaining to, of the nature of, or affected with illusions. [D, 36.]

ILLUTAMENTUM (Lat.), **ILLUTATIO** (Lat.), n's n. and f. I^{2}l-lu^{2}t(lu^{4}t)-a^3-me^{2}nt'u^{3}m(u^{4}m), -a(a^3)'shi^2(ti^2)-o. Gen., *-ment'i, -ion'is.* From *in*, in, and *lutare*, to besmear with mud. Fr., *illutation.* Ger., *Schlammbad.* Lit., a besmearing with mud, the external application of mud containing medicinal agents. [L, 41, 44 (*a*, 14); "Nouv. rém.," Sept. 24, 1889, p. 491.] See *Mud* BATH.

ILMENAU (Ger.), n. I^{2}l'ma-na^3-u^4. A place in Weimar, Germany, where there is a hydrotherapeutic establishment. [L, 30 (*a*, 14).]

ILOSIS (Lat.), n. f. I^{2}l-o'si^{2}s. Gen., *-os'eos* (*-is*). See ILLOSIS.

ÎLOT (Fr.), n. E-lo. Lit., an islet. In the pl., *i's*, bits of ingrafted skin (see *Skin*-GRAFTING).

ILYS (Lat.), n. f. Il(el)'i^{2}s(u^{6}s). Gen., *il'yos.* Gr., *ἰλύς.* Of Hippocrates, dregs, sediment. [A, 311 (*a*, 21).]

IMAGE, n. I^{2}m'aj. Gr., *εἰκών.* Lat., *imago.* Fr., *i.* Ger., *Bild.* An optical or mental representation of a body.—**Accidental i.** See *After-i.*—**Actual ophthalmoscopic-i.** Fr., *i. actuelle ophthalmoscopique.* Ger., *virtuelles ophthalmoscopisches Bild* (oder *Augenspiegelbild*). See *Indirect* IMAGE.—**Aerial i.** The i. of an object when it appears suspended in the air. [L, 108.]—**After-i.** An i. perceived by the retina after the exciting stimulus has been withdrawn. When these images are simply continuations of the sensation they are known as positive a.-i's; when they are of a complementary color they are known as negative a.-i's. [F, 25; L, 253 (*a*, 29).]—**Catoptric i's.** I's reflected from polished surfaces. [*a*, 29.]—**Consecutive i's.** I's which follow one another in regular succession. [*a*, 29.]—**Crossed i's.** Fr., *i's croisées.* Ger., *gekreuzte Doppelbilder.* I's of objects existing in crossed diplopia, due to divergence of the visual axes. [F.]—**Demi-i.** (Fr.). See *Half-i.*—**Diffusion i's.** I's formed by rays of light from an object passing through a lens and falling upon a surface not at the focus. [*a*, 29.]—**Erect i.** See *Upright i.*—**Half-i.** Fr., *demi-i.* Ger., *Halb-Bild.* Of Helmholtz, one of the two double i's, cast by the same object, but not seen singly by the two eyes. [F.]—**Homonymous i's.** Fr., *i's homonymes.* Ger., *gleichnamige Bilder.* Those double i's occurring on the side corresponding to the eyes; the right i. is corresponding to the right eye, and the left i. to the left eye. This form of diplopia is caused by convergence of the visual axes. [F.]—**I's croisées** (Fr.). See *Crossed i's.*—**I's hymonymes** (Fr.). See *Homonymous i's.*—**I. renversée.** See *Inverted i.*—**I. virtuelle.** See *Virtual i.*—**Indirect i., Inverted i.** Fr., *i. renversée.* Ger., *umgekehrtes Bild.* A real, magnified i. of the fundus of an eye, in which the emerging rays are focused by means of a convex glass before entering the eye of the observer. [F.]—**Multiple i's.** Fr., *i's multiples.* Ger., *vielfache Bilder.* It., *imagini multipli.* Sp., *imágenes multáplices.* See under POLYOPIA.—**Real i.** Fr., *i. réelle.* An i. formed by the convergence of reflected or refracted rays after their emergence from the reflecting source or the refracting medium; so called because actually existing at the spot at which it is seen, and capable of being thrown upon a screen placed at this spot. The i's formed by concave mirrors or concave lenses and the inverted ophthalmoscopic i. are real. [B.]—**Retinal i.** Fr., *i. rétinien.* The i. formed upon the retina by rays of light which pass from an external object through the dioptric mechanism of the eye. [*a*, 29.]—**Stereoscopic i.** Fr., *i. stéréoscopique.* Ger., *stereoskopisches Bild.* The i. produced on the retina of the two eyes by uniting stereoscopically the i. of two photographs taken from one and the same negative. This gives an undeniable impression of solidity, although it is simply an optical illusion. [F.]—**Upright i.** Fr., *i. droite.* Ger., *aufrechtes Bild.* An enlarged i. of the fundus of the eye, seen with the ophthalmoscope by aid of the dioptric apparatus of the eye, without the interposition of a bi-convex lens. [F.]—**Virtual i.** Fr., *i. virtuelle.* Ger., *virtuelles Bild.* An i. formed by the prolongation of reflected or refracted rays back behind the reflecting surface or the refracting medium; so called because not actually existing at the spot at which it appears. The i. in a looking-glass, the i's formed by concave lenses and convex mirrors, and the ophthalmoscopic i. are examples. [B.]

IMAGINAL, adj. I^{2}m-a^{2}j'i^2-n'l. Of or pertaining to the *imago*, or adult insect. [L, 11 (*a*, 39).]

IMAGINATION, n. I^{2}m-a^{2}j-i^{2}n-a'shu^{3}n. From *imaginare*, to give an image of. Fr., *i.* Ger., *Einbildung.* It., *immaginazione.* Sp., *imaginación.* The creative and inventive faculty of the mind. [L, 107.]

IMAGO (Lat.), n. f. I^{2}m-a(a^3)'go. Gen., *-ag'inis.* The adult insect after it has completed its transformations and has become capable of reproduction. [L, 196 (*a*, 39).]

IMASATIC ACID, n. I^{2}m-a^{2}s-a^{2}t'i^{2}k. Fr., *acide imasatique.* Ger., *Imasatinsäure.* Syn.: *isamic acid.* A crystalline, very unstable substance, $C_{16}H_{13}N_3O_4$, resulting from the action of potassium hydrate on isatine; soluble in ether and in hydrochloric acid, less soluble in water and in boiling alcohol. [B, 93 (*a*, 14).]

IMASATINE, n. I^{2}m-a^{2}s'a^{2}t-en. Fr., *imasatine.* Ger., *I.* A grayish or greenish-yellow substance, $C_{16}H_{11}N_3O_3$, obtained by boiling a solution of isatine in ammonia; insoluble in water and in ether, soluble in solutions of potash, slightly soluble in boiling alcohol. [B, 46, 93 (*a*, 39).]—**I'säure** (Ger.). See IMASATIC ACID.

IMBECILE, n. I^{2}m'be^2-si^{2}l. Lat., *imbecillus.* Fr., *imbécile.* Of feeble mind; having only rudimentary intelligence remaining; nearly idiotic; as a n., a person so affected (usually congenitally, or as a result of age or cerebral or other disease). [D, 36.]

IMBECILITY, n. I^{2}m-be^{2}s-i^{2}l'i^{2}t-i^2. Lat., *imbecillitas.* Fr., *imbécilité.* Ger., *Imbecilität.* The state of being imbecile.—**Eclampsic i.** I. due to structural alteration of the brain from convulsions coming on soon after birth and continuing some years. [Beach, "Med. Times and Gaz.," Apr. 8, 1882.]—**Epileptic i.** I. due to epilepsy. [Beach, *l. c.*]—**Hydrocephalic i.** I. due to hydrocephalus. [Beach, *l. c.*]—**Hypertrophic i.** I. due to hypertrophy of the brain. [Beach, *l. c.*]—**Inflammatory i.** I. "which has come on after some illness, such as measles, typhoid fever, whooping-cough, etc., as a result or complication of which there may be inflammation of the brain or membranes, not sufficiently grave to be fatal, but serious enough to cause mental impairment." [Beach, *l. c.*]—**Intellectual i.** One of the forms of mental abnormity in which only the intellectual faculties are deficient. [*a*, 40.]—**Moral i.** [Spitzka]. See *Moral* INSANITY.—**Paralytic i.** I. coming on soon after birth, from repeated fits, infantile paralysis, cerebral apoplexy, or atrophy of the brain. [Beach, *l. c.*]—**Senile i.** General weakness of the mind and body in old age. [*a*, 40.]—**Traumatic i.** I. from an injury to the head. [Beach, *l. c.*]

IMBER (Ger.), n. Emb'e^{2}r. Ginger-root. [B, 180 (*a*, 24).]

IMBERBIS (Lat.), adj. I^{2}m-bu^{5}r(be^{2}r)'bi^{2}s. From *in*, neg., and *barba*, a beard. Fr., *imberbe.* Ger., *unbebärtet, bartlos.* Unbearded; destitute of hairs. [B, 1, 123 (*a*, 24).]

IMBIBITION, n. I^{2}m-bi^2-bi^{2}sh'u^{3}n. Lat., *imbibitio* (from *imbibere*, to drink in). Fr., *i.* Ger., *Durchtränkung, Einsaugung.* The absorption of liquids or gases by solid bodies. [Munk (A, 319 [*a*, 21]).]—**Cadaveric i.** I. due to post-mortem decrease of tension. [*a*, 29.]—**Capillary i.** Ger., *capilläre I., I. ohne Volumzunahme.* I. occurring without increase of volume. [Munk (A, 319 [*a*, 21]).]—**Double i.** See ENDOSMOSIS.—**I. with increase of volume.** Ger., *I. mit Volumzunahme.* I. in which water and watery solutions penetrate not only into the porous cavities, but into the molecular interstices. [Munk (A, 319 [*a*, 21]).]

IMBREX (Lat.), n. f. I^{2}m'bre^{2}x. Gen., *imb'ricis.* A tile.—**I. narium.** The sæptum narium. [A, 312.]

IMBRICAIRE (Fr.), n. A^{2}n^2-bre-ke^{2}r. See IMBRICARIA.—**I. de Bourbon.** See IMBRICARIA *borbonica.*

IMBRICANT, adj. I^{2}m'bri^2-ka^{2}nt. Lat., *imbricans.* Fr., *imbriquant.* Of Mirbel, lapping (said of the folioles of a compound leaf, as in the sensitive plant during rest). [B, 1 (*a*, 24).]

IMBRICARIA (Lat.), n. f. I^{2}m-bri^2-ka(ka^3)'ri^2-a^3. From *imbrex*, a hollow tile. Fr., *imbricaire.* 1. Of De Candolle, Fries, and Acharius, a genus of lichens typical of the *Imbricarieæ;* now referred to *Parmelia.* 2. Of Jussieu, a small genus of sapotaceous trees, natives chiefly of the Mascarene Islands. 3. Of Smith, a genus of *Mrytaceæ*, referred to *Bæckea.* The *Imbricarieæ* of Theobald are a family of foliaceous lichens of the *Parmeliaceæ.* [B, 19, 38, 42, 48, 170, 173, 180 (*a*, 24).]—**I. borbonica.** Fr., *imbricaire de Bourbon, bardothier, bois de natte, nattier.* A species of *I.* (2d def.) the fruits of which are eaten in Bourbon and Madagascar. [B, 19, 173 (*a*, 24).]—**I. malabarica.** A species of *I.* (2d def.) the fruits of which are eaten in Malabar. [B, 19 (*a*, 24).]—**I. maxima.** See *I. borbonica.*—**I. retiruga, I. saxatilis.** See PARMELIA *saxatilis.*

IMBRICATE, IMBRICATED, adj's. I^{2}m'bri^2-kat, -e^{2}d. Lat., *imbricatus* (from *imbrex*, a hollow tile). Fr., *imbriqué.* Ger., *ziegeldachförmig, ziegeldachig, dachziegelig, dachig, schindelig, geschindel.* Overlapping like tiles. The *Imbricatæ* of Reichenbach are a formation of the *Enerviæ*, consisting of the families *Lycopodiaceæ, Balanophoreæ*, and *Cytineæ.* [B, 123, 229 (*a*, 24); G; L.] See *I.* ÆSTIVATION.—**Bifariously i.** I. in two series or rows (said of buds, the scales on involucre of flowers, etc.). [B, 1, 229 (*a*, 24).]

IMBRICATIF (Fr.), adj. A^{2}n^2-bre-ka^3-tef. See IMBRICATED.

IMBRICATION, n. I^{2}m-bri^2-ka'shu^{3}n. The state of being imbricated.

IMBRICATIVE, adj. I^{2}m'bri^2-ka-ti^{2}v. Lat., *imbricativus.* Fr., *imbricatif.* Ger., *ziegeldachig, geschindelt.* See IMBRICATED.

IMBRICATUS (Lat.), adj. I^{2}m-bri^{2}k-at(a^{3}t)'u^{3}s(u^{4}s). See IMBRICATED.—**Sursum i.** Ger., *aufwärts dachziegelig.* See INCUBOUS.

IMBRIQUANT (Fr.), adj. A^{2}n^2-bre-ka^{3}n^2. See IMBRICANT.

IMBRIQUÉ (Fr.), adj. A^{2}n^2-bre-ka. See IMBRICATED.

IMBROCATIO (Lat.), n. f. I^{2}m-bro-ka(ka^3)'shi^2(ti^2)-o. Gen., *-o'nis.* See EMBROCATION.

IMÉRACHISME (Fr.), n. E-ma-ra^3-kezm'. A form of mania observed among the Samoieds in Northern Russia, characterized by an uncontrollable propensity to imitate. [L, 49 (*a*, 14).]

IMGARA (Ar.), n. Asafœtida. [B, 121 (*a*, 35).]

IMIDBASE (Ger.), n. E-med'ba^{3}z-e^2. A secondary amine. [B.]

IMIDOXANTHINE, n. I^{2}m-i^{2}d-o-za^{2}n'then. See GUANINE.

IMIRACENE, n. I^{2}m-i^{2}r'a^{2}s-en. Ger., *Imiracen.* See *Brazilian* CHICLE.

IMITATION, n. I^{2}m-i^{2}t-a'shu^{3}n. Gr., *μίμησις.* Lat., *imitatio.* Fr., *i.* Ger., *Nachahmung.* The act or process of behaving like another individual or object taken as a model; of a disease, assuming the appearances of another disease.—**Moral i.** The communication by mental reflex phenomena of the passions and sentiments prompting an act in one individual to the witness of such an act, and leading him to reproduce it. [*a*, 40.]—**Morbid i.** An attempt by the insane to reproduce the sounds, motions, and actions of the lower animals. [*a*, 40.]

IMLI (Hind.), n. The *Tamarindus indica.* [B, 172 (*a*, 24).]

IMMACULATE, adj. I^{2}m-ma^{2}k'u^{2}l-at. Lat., *immaculatus* (from *in*, neg., and *macula*, a spot). Fr., *immaculé.* Ger., *ungefleckt.* Unspotted, not maculate. [B, 123 (*a*, 24).]

IMMANENCE, n. I^{2}m'ma^{2}n-e^{2}ns. From *immanere*, to remain in. Fr., *i.* Ger., *Immanenz, Innewohnen.* The state of being inherent. According to the theory of i., the vital properties are inherent in organized matter, and the manner and intensity of their manifestations are correlative, but act independently of the intervention of extraneous forces. [L, 41, 44, 49 (*a*, 14).]

IMMARGINATE, adj. I^{2}m-ma^{2}rj'i^{2}n-at. Lat., *immarginatus* (from *in*, neg., and *margo*, a border). Fr., *immarginé.* Ger., *unberandet, unberändert.* Borderless (said of seed-receptacles, scales, etc.). [B, 1, 123, 291 (*a*, 24).] Cf. MARGINATE.

IMMATURE, adj. I^{2}m-ma^{2}t-u^{2}r'. Lat., *immaturus* (from *in*, not, and *maturus*, ripe). Fr., *i.* Ger., *unreif.* Not having yet assumed final size, shape, color, or other conditions of the adult. [L, 343.]

IMME (Ger.), n. I^{2}m'me^2. See APIS.—**I'nkraut.** The *Thymus vulgaris* and the genus *Melittis.* [B, 180 (*a*, 24).]

IMMEDIATE, adj. I^{2}m-med'i^2-at. Lat., *immediatus* (from *in*, neg., and *medius*, middle). Fr., *immédiat.* Ger., *unmittelbar.* 1. Direct, without the intervention of anything. 2. Occurring with little if any delay. 3. In botany, free, except at its point of attachment (said of the insertion of an organ). [B, 1 (*a*, 24).]

IMMEDICABLE, adj. I^{2}m-me^{2}d'i^{2}k-a^2-b'l. From *in*, neg., and *medicare*, to cure. Incurable. [L, 56.]

IMMENBLATT (Ger.), n. I^{2}m'me^{2}n-bla^{3}t. The genus *Melittis.* [B, 180 (*a*, 24).]—**Melissenblättriges I.** The *Melittis melissophyllum.* [B, 180 (*a*, 24).]

IMMERGED, adj. I^{2}m-mu^{6}rjd'. Fr., *immergé.* See IMMERSED.

IMMERGRÜN (Ger.), adj. and n. I^{2}m'me^{2}r-gru^{6}n. See EVERGREEN and SEMPERVIRENS; as a n., the *Daphne laureola*, the *Hedera helix*, and the genera *Sempervivum* and *Vinca.* [B, 48 (*a*, 14); B, 123, 180 (*a*, 24).]—**I'beeren, I'blätter.** The berries and leaves of *Hedera helix.* [B, 180 (*a*, 24).]

IMMERSCHÖN (Ger.), n. I^{2}m'me^{2}r-shu^{6}n. The genus *Gnaphalium.* [B, 48 (*a*, 14).]—**Gelbes I.** The *Helichrysum arenarium.* [B, 180 (*a*, 24).]—**I'kraut.** The *Calluna vulgaris.* [B, 180 (*a*, 24).]

IMMERSED, adj. I^{2}m-mu^{6}rst'. Lat., *immersus* (from *in*, in, and *mergere*, to sink). Fr., *immergé.* Ger., *eingetaucht, eingesenkt.* 1. Under water (said of plants or their organs). 2. Sunk into (said of an organ partly depressed in the substance of another). [B, 1, 123, 291 (*a*, 24).] See IMPRESSED (3d def.).

IMMERSION, n. I^{2}m-mu^{6}r'zhu^{3}n. Lat., *immersio* (from *in*, and *mergere*, to sink). Fr., *i.* Ger., *Eintauchung, I., Untertauchung, Tauchbad* (2d def.). It., *immersione.* Sp., *immersión.* 1. The act of immersing, or the state of being immersed. 2. A kind of bath which consists in plunging the body, or the affected part, into water, usually cold and often salty, for an instant at short intervals. It is a tonic stimulant, and has been used as a remedy for rabies, fevers, cutaneous affections, and diseases of the mind and nervous system. [B, 58; L, 135 (*a*, 39).] 3. In microscopy, the act of immersing the objective (then called an i. lens) in water, oil, etc., which prevents the total reflection of the rays falling obliquely upon the peripheral portions of the objective. [B.]—**Homogeneous i.** Ger., *homogene I.* In microscopy, a system of i. in which the stratum of air between the objective and the cover-glass is replaced by a medium which deflects as little as possible the rays of light passing through the cover-glass, *i. e.*, by one which, like oil of cedarwood, has the same refraction and dispersing power as crown glass. [B; B, 164.]—**Oil I.** In microscopy, homogeneous i. by means of an oil.

IMMERSUS (Lat.), adj. I^{2}m-mu^{6}rs(me^{2}rs)'u^{3}s(u^{4}s). See IMMERSED; as a n., see SUBSCAPULARIS.

IMMICTIO (Lat.), n. f. I^{2}m-mi^{2}k'shi^2(ti^2)-o. Gen., *-on'is.* See ENURESIS.

IMMINENCE, n. I^{2}m'i^2-ne^{2}ns. From *imminere*, to overhang. Fr., *i.* Ger., *Imminenz.* The menacing of disease. [L, 49.]

IMMINUTIO (Lat.), n. f. I^{2}m-mi^{2}n-u^2(u)'shi^2(ti^2)-o. Gen., *-on'is.* From *in*, intens., and *minuere*, to lessen. Ger., *Verminderung, Verkleinerung.* A diminution, as of flesh. [L, 50 (*a*, 14).]

IMMISCIBILITY, n. I^{2}m-mi^{2}s-si^2-bi^{2}l'i^2-ti^2. The state or quality of being immiscible.

IMMISCIBLE, adj. I^{2}m-mi^{2}s'si^2-b'l. From *in* neg., and *miscere*, to mix. Incapable of being mixed. [L, 56.]

IMMISSIO (Lat.), n. f. I^{2}m-mi^{2}s'shi^2(si^2)-o. Gen., *-on'is.* From *in*, in, and *mittere*, to send. Insertion, introduction.—**I. catheteris.** See CATHETERISM.

IMMISSOR (Lat.), n. m. I^{2}m-mi^{2}s'so^{2}r(sor). Gen., *-or'is.* One who inserts or introduces anything. [A, 322.]

IMMISSORIUM (Lat.), n. n. I^{2}m-mi^{2}s-so'ri^2-u^{3}m(u^{4}m). An instrument to be inserted, especially a catheter. [A, 322.]

IMMOBILE, adj. I^{2}m-mob'i^{2}l. Lat., *immobilis* (from *in*, not, and *movere*, to move). Fr., *i.* Ger., *unbeweglich.* Fixed, immovable. [B, 1, 123 (*a*, 24).]

IMMOBILISATION (Fr.), n. I^{2}m-mo-be-le-za^3-se-o^{2}n^2. See IMMOBILIZATION.

IMMOBILITAS (Lat.), n. f. I^{2}m-mob-i^{2}l'i^{2}t-as(a^{3}s). Gen., *-at'is.* See IMMOBILITY.—**I. pupillæ.** Immobility of the pupil. [L, 135 (*a*, 39).]

IMMOBILITY, n. I^{2}m-mob-i^{2}l'i^2-ti^2. Lat., *immobilitas.* Fr., *immobilité.* Ger., *Unbeweglichkeit.* It., *immobilità.* Sp., *inmovilidad.* The state of being immovable.

IMMOBILIZATION, n. I^{2}m-mob-i^{2}l-i^2-za'shu^{3}n. From *immobilis*, immovable. Fr., *immobilisation.* Ger., *Immobilisation, Immobilisirung, Unbeweglichmachung.* It., *immobilizzazione.* Sp., *inmovilización.* The act of rendering a part immovable. [L, 107.]

IMMONDICE (Fr.), n. I^{2}m-mo^{2}n^2-des. See IMMUNDITIES.

IMMORTAL-FLOWER, n. I^{2}m-mo^{2}rt'a^{2}l-flu^6''u^4-u^{6}r. See IMMORTELLE (1st and 3d def's).

IMMORTELLE (Fr., Ger.), n. I^{2}m-mo^{2}r-te^{2}l. -te^{2}l'le^2. From *in* neg., and *mortalis*, mortal. 1. The genera *Helichrysum, Xeranthemum*, and *Helipterum;* also *Gomphrena globosa, Anaphalis margaritacea*, and other plants. 2. The wood of *Erythrina glauca.* 3. In the pl., *i's*, see under ANAPHALIS *margaritacea.* [B, 19, 173, 180, 275 (*a*, 24).]—**Blutrothe I.** (Ger.). The *Helichrysum sanguineum.* [B, 180 (*a*, 24).]—**I. annuelle** (Fr.). The *Xeranthemum annuum.* [B, 173 (*a*, 24).]—**I. blanche** (Fr.). The *Anaphalis margaritacea.* [B, 19 (*a*, 24).]—**I. de La Malmaison** (Fr.). The *Helichrysum bracteatum.* [B, 19 (*a*, 24).]—**I. des champs** (Fr.). See GNAPHALIUM *arvense.*—**I. des sables** (Fr.). See GNAPHALIUM *arenarium.*—**I. de Virginie** (Fr.). The *Anaphalis margaritacea.* [B, 19 (*a*, 24).]—**I. dioïque** (Fr.). The *Antennaria dioica.* [B, 173 (*a*, 24).]—**I.-flower.** See *I.* (1st and 3d def's).—**I. jaune** (Fr.). The *Helichrysum orientale.* [B, 19 (*a*, 24).]—**I. jaune-blanche** (Fr.). See GNAPHALIUM *conglobatum.*—**I. naine** (Fr.). See GNAPHALIUM *minor.*—**I. stœchas.** The *Helichrysum stœchas.* [B, 173 (*a*, 24).]—**I. violette** (Fr.). The *Gomphrena globosa.* [B, 19 (*a*, 24).]—**I. vira-vira.** See GNAPHALIUM *vira vira.*—

Italienische I. (Ger.). The *Helichrysum stœchas.* [B, 180 (α, 24).]—**Rothe I.** (Ger.). See GOMPHRENA *globosa.*—**Sand-I.** (Ger.). The *Helichrysum arenarium.* [B, 180 (α, 24).]—**Schmalblättrige I.** (Ger.). The *Helichrysum angustifolium.* [B, 180 (α, 24).]

IMMOTIVE, adj. I^{2}m-mo'ti^{2}v. Lat., *immotivus.* Of L. C. Richard, occurring without displacing the episperm (said of germination). [B, 1 (α, 35).]

IMMUNDITIES (Lat.), n. f. I^{2}m-mu^{3}n(mu^{4}n)-di^2'shi^2(ti^2)-ez(as). Gen., *-itie'i.* From *in,* neg., and *mundus,* clean. Fr., *immondice.* Ger., *Unreinlichkeit.* Uncleanliness. [L, 50 (α, 14).]

IMMUNE, adj. I^{2}m-mu^{2}n'. Gr., ἀτελής. Lat., *immunis.* Fr., *i.* Ger., *immun.* Endowed with immunity.

IMMUNITY, n. I^{2}m-mu^{2}n'i^2-ti^2. Fr., *immunité.* Ger., *Immunität, Unansteckbarkeit.* It., *immunità.* Sp., *inmunidad.* The property which the organism may acquire of being safe from attacks of certain infectious diseases, either in consequence of a former attack or from any other cause. [L, 164 (α, 27).]

IMMUTANS (Lat.), adj. I^{2}m-mu^{2}t(mut)'a^{2}nz(a^{3}ns). From *immutare,* to change. See ALTERATIVE.

IMNAU (Ger.), n. I^{2}m'na^3-u^4. A place in the principality of Hohenzollern-Sigmaringen, Prussia, where there is a gaseous spring containing sodium chloride and calcium carbonate. [L, 30, 49 (α, 14).]

IMPACTED, adj. I^{2}m-pa^{2}kt'e^{2}d. Lat., *impactus* (from *in,* in, and *pangere,* to fix). Fr., *enclavé.* Ger., *eingekeilt.* Driven in and held tight. [L, 107.]

IMPACTION, n. I^{2}m-pa^{2}k'shu^{3}n. Lat., *impactio.* Fr., *i.* Ger., *Einkeilung.* The state of being impacted or of containing impacted material.

IMPAIRE (Fr.), adj. A^{2}n^2-pa^{2}r. See IMPAR.

IMPALEMENT, n. I^{2}m-pal'me^{2}nt. Syn.: *empalement.* The state of being injured by some shaft-like object which passes completely through the body.

IMPALPABLE, adj. I^{2}m-pa^{2}lp'a^2-b'l. Lat., *impalpabilis* (from *in,* neg., and *palpare,* to feel). Fr., *i.* Ger., *unfühlbar, staubartig.* Incapable of being felt; of a powder, so fine that the single particles can not be felt. [L, 107.]

IMPALUDATION (Fr.), n. I^{2}m-pa^{3}l-u^6-da^3-se-o^{2}n^2. The action of marsh miasm. [L, 41 (α, 14).]

IMPALUDISM, n. I^{2}m-pa^{2}l'u^{3}d-i^{2}z'm. From *in,* in, and *palus,* a marsh. Fr., *impaludisme.* The state of being poisoned with malaria. [α, 18.]

IMPAR (Lat.), adj. I^{2}m'pa^{3}r. Gen., *imp'aris.* From *in,* neg., and *par,* equal. Fr., *impaire.* Ger., *unpaarig, ungepaart, ungleich.* Unequal, odd; as a n., an azygous part. [α, 24.]—**I. pharyngis.** See *Middle* CONSTRICTOR *of the pharynx.*

IMPARIDACTYLOUS, adj. I^{2}m-pa^{3}r-i^2-da^{2}k'ti^{2}l-u^{3}s. From *in,* neg., *par,* equal, and δάκτυλος, a digit. Of birds, having three digits in front and one behind. [L, 180 (α, 39).]

IMPARIDIGITATE, adj. I^{2}m-pa^{2}r-i^2-di^{2}j'i^{2}t-at. From *in,* neg., *par,* equal, and *digitus,* a digit. Having an odd number of fingers or toes. [L, 56.]

IMPARINERVATE, IMPARINERVED, adj's. I^{2}m-pa^{2}r-i^2-nu^{5}rv'at, -nu^{5}rvd'. Lat., *imparinervatus* (from *in,* neg., *par,* equal, and νεῦρον, a nerve). Fr., *imparinervé.* Unequally nerved (said of the pales of some grasses). [B, 1 (α, 24).]

IMPARIPINNATE, adj. I^{2}m-pa^{2}r-i^2-pi^{2}n'at. Lat., *imparipinnatus* (from *in,* neg., *par,* equal, and *pinna,* a feather). Fr., *imparipinné, imparipenné.* Ger., *unpaarig-* (oder *ungleichpaarig-*) *gefiedert.* Pinnate with an odd terminal leaf. [B, 1, 123 (α, 24).]

IMPARTIBLE, adj. I^{2}m-pa^{3}rt'i^2-b'l. Lat., *impartibilis* (from *in,* neg., and *pars,* a part). Of Mirbel, not capable of spontaneous separation (said of a cremocarp which does not divide into two, *e. g.,* that of Maryland sanicle). [B, 1 (α, 35).]

IMPASTATION, n. I^{2}m-pa^{2}s-ta'shu^{3}n. Lat., *impastatio* (from *in,* into, and *pasta,* paste). Fr., *i.* Ger., *Einknetung.* In pharmacy, the making of a paste. [L, 41, 50 (α, 14).]

IMPATIENS (Lat.), n. f. I^{2}m-pa(pa^3)'shi^2(ti^2)-e^{2}nz(ans). Gen., *-ent'is.* From *in,* neg., and *pati,* to suffer. Fr., *balsamine.* Ger., *Springkraut.* Touch-me-not; a genus of geraniaceous herbs of the tribe *Balsamineæ;* so called because the capsules are irritable. [B, 19, 34, 42, 173, 180 (α, 24).]—**I. balsamina.** Fr., *herbe impatiente, jalousie.* Balsamine, garden-balsam, snap-weed; a native of the East Indies and widely cultivated. The Japanese are said to use the juice of the plant to dye their nails red. It is like the other species in its properties. [B, 5, 19, 34, 173 (α, 24).]—**I. fulva.** Orange-flowered balsam, spotted jewel-weed; indigenous to North America. An ointment, prepared by boiling the plant in lard, has been used in hæmorrhoids. The properties are probably like those of *I. noli-me-tangere.* [B, 5, 34, 275 (α, 24).]—**I. hortensis.** See *I. balsamina.*—**I. lutea, I. maculata, I. noli-me-tangere.** Fr., *noli-me-tangere, herbe de sainte-Cathérine.* Ger., *gemeines Springkraut.* Common yellow balsam, touch-me-not; found in Europe and Northern Asia. Its stem and leaves, which are emetic, cathartic, and diuretic, were formerly used in medicine, especially as a diuretic, and as an external application to sores and hæmorrhoids. [B, 5, 19, 173, 180, 185, 275 (α, 24).]—**I. pallida.** Pale touch-me-not, the jewel-weed of Michigan and Kansas; an acrid species employed as an emetic, cathartic, and diuretic. [B, 5, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxix, (α, 14).]—**I. palustris.** See *I. noli-me-tangere.*

IMPATIENS BALSAMINA. [A, 327.]

IMPATIENTIA (Lat.), n. f. I^{2}m-pa(pa^3)-shi^2(ti^2)-e^{2}n'shi^2(ti^2)-a^3. From *impatiens,* impatient. Irritability. [α, 40.]—**I. vesicæ.** Irritability of the bladder. [α, 40.]

IMPATIINIDE (Fr.), n. A^{2}n^2-pa^3-te-e-ned. From *impatiens* (*q. v.*). Of Müller, a bitter emetic resin extracted from *Impatiens noli-me-tangere.* [B, 46, 93 (α, 14).]

IMPEDITUS (Lat.), adj. I^{2}m-pe^{2}d-i(e)'tu^{3}s(tu^{4}s). From *impedire,* to impede. Ger., *gehemmt, verhindert.* Impeded, checked (said of a plant or plant-organ remaining undeveloped). [B, 123 (α, 24).]

IMPELLUCID, adj. I^{2}m-pe^{2}l-lu^2'si^{2}d. Lat., *impellucidus* (from *in,* neg., *per,* through, and *lucidus,* clear). Ger., *undurchsichtig.* Not pellucid. [B, 123 (α, 24).]

IMPENNATE, adj. I^{2}m-pe^{2}n'nat. Lat., *impennis* (from *in,* not, and *penna,* a feather). Having short wings covered with small scaly feathers, as in the penguin. The *Impennes* of Eichwald, Illiger, and others are an order of swimming birds, including only the penguins. [L, 180 (α, 39).]

IMPENNOUS, adj. I^{2}m-pe^{2}n'u^{3}s. Having no wings (said of insects). [L, 180 (α, 39).]

IMPÉRATOIRE (Fr.), n. A^{2}n^2-pa-ra^3-twa^{3}r. 1. See IMPERATORIA. 2. In the Fr. Cod., the *Imperatoria ostruthium.* [α, 24.]—**I. des Alpes.** The *Peucedanum ostruthium.* [B, 173 (α, 24).]—**I. sauvage.** The *Angelica silvestris.* [B, 173 (α, 24).]

IMPERATOR (Lat.), n. m. I^{2}m-pe^{2}r-at(a^{3}t)'o^{2}r. Gen., *or'is.* From *imperare,* to command. The *Imperatoria ostruthium.* [B, 180 (α, 24).]

IMPERATORIA (Lat.), n. f. I^{2}m-pe^{2}r-a^{2}t(a^{3}t)-o'ri^2-a^3. From *imperare,* to command. Fr., *impératoire.* Ger., *Meisterwurz, Meisterwurzel.* A genus of the *Umbelliferæ,* made by Bentham and Hooker a section of *Peucedanum.* [B, 42, 64, 180 (α, 24).]—**I. alba.** The *I. ostruthium.* [B, 180 (α, 24).]—**I. angelica.** See ANGELICA *silvestris.*—**I. lucida.** The *Ligusticum actæifolium.* [B, 173 (α, 24).]—**I. major.** See *I. ostruthium.*—**I. nigra.** The *Astrantia major.* [B, 180 (α, 24).]—**I. nodiflora.** See LIGUSTICUM *nodiflorum.*—**I. ostruthium.** Fr., *impératoire des Alpes, benjoin français* (ou *de montagne*), *ostrute.* Ger., *gemeine Meisterwurz, Kaiserwurz, Ostranz.* False pellitory of Spain, fellow-grass, (great) masterwort; a species growing in southern and central Europe. The root proper and the rhizome, *radix imperatoriæ* (seu *imperatoriæ albæ,* seu *imperatoriæ ostruthii,* seu *radix ostruthii,* seu *magistrantiæ,* etc.), was once used in a great variety of diseases, and was known as *divinum remedium,* though it is merely an aromatic stimulant inferior to angelica. It contains two crystallizable principles, imperatorine and ostruthine, and a volatile oil. It is rarely used in American medicine. [B, 5, 18, 121, 173, 180, 275 (α, 35).]—**I. pratensis major, I. silvestris.** See ANGELICA *silvestris.*—**Radix imperatoriæ (albæ).** The root of *I. ostruthium.* [B, 180 (α, 24).]—**Rhizoma imperatoriæ** [Ger. Ph.]. Ger., *Meisterwurzel.* The rhizome of *I. ostruthium.* [A, 319 (α, 21).]

IMPERATORINE, n. I^{2}m-pe^{2}r-a^{2}t-or'en. Fr., *impératorine.* Ger., *Imperatorin.* An alkaloid found in the root of *Imperatoria ostruthium.* ["Proc. of the Am. Pharm. Assoc.," xxxviii (α, 14).]

IMPERFECT, adj. I^{2}m-pu^{5}r'fe^{2}kt. Lat., *imperfectus* (from *in,* neg., and *perficere,* to accomplish). Fr., *imparfait.* Ger., *unvollkommen.* Abnormal, irregular, undeveloped, wanting some part or organ. The *Imperfectæ* of Lindley are a cohort of endogens, comprising the *Pandales, Arales, Typhales, Smilales,* and *Fluviales.* [B, 170 (α, 24).]

IMPERFECTIBRANCHIA (Lat.), n. f. I^{2}m-pu^{5}r(pe^{2}r)-fe^{2}kt-i^2-bra^{2}n^2(bra^{3}n^2)'ki^2(ch^{2}i^2)-a^3. From *imperfectus,* imperfect, and βράγχια, gills. Of Hogg, see ATELEOBRANCHIA.

IMPERFOLIATE, adj. I^{2}m-pu^{5}r-fol'i^2-at. Lat., *imperfoliatus* (from *in,* neg., *per,* through, and *folium,* a leaf). Having leaves that are not perfoliate. [L, 107.]

IMPERFORATE, adj. I^{2}m-pu^{5}r'for-at. Gr., ἄτρητος. Lat., *imperforatus* (from *in,* neg., and *perforare,* to perforate). Fr., *imperforé.* Ger., *undurchbohrt, undurchlöchert.* Not perforated. closed. [B, 123 (α, 24).] The *Imperforata* are a subclass of the *Reticularia* having the shell substance perforated with only one or two apertures or in branched forms with a small number of apertures. [L, 121.]

IMPERFORATION, n. I^{2}m-pu^{5}r-fo-ra'shu^{3}n. Lat., *imperforatio.* Fr., *i.* Ger., *Undurchbohrtheit, Verschliessung, Verschlossensein.* It., *imperforazione.* Sp., *imperforación.* See ATRESIA.

IMPERIAL, adj. I^{2}m-pe'ri^2-a^{2}l. Lat., *imperialis.* Pertaining to an emperor or to an empire; as a n., an acid refrigerant drink made by dissolving cream of tartar in boiling water and adding sugar and fresh lemon-peel. [B, 5 (α, 24).]

IMPÉRIALE (Fr.), n. A^{2}n^2-pa-re-a^{3}l. The *Fritillaria imperialis.* [B, 173 (α, 24).]

IMPERIALINE, n. I^{2}m-pe'ri^2-a^{2}l-en. An alkaloid, $C_{35}H_{60}NO_4$, obtained by K. Fragner from the bulbs of *Fritillaria imperialis.* The pure base crystallizes in short colorless needles, is spar-

ingly soluble in cold water, soluble in cold alcohol, more soluble in hot alcohol, and particularly soluble in ether. Heated, it becomes yellow at 240° C. and melts perfectly at 254° C. It acts upon the heart. ["Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]

IMPERIALIS (Lat.), n. f. I^{2}m-pe^{2}r-i^{2}-a(a^{3})'li^{2}s. A genus of the *Liliaceæ* made by Jussieu, by Bentham and Hooker referred to *Fritillaria*. [B, 42 (*a*, 24).]—**I. comosa, I. coronata.** The *Fritillaria i.* [B, 173 (*a*, 24).]

IMPERMEABILITY, n. I^{2}m-pu^{5}r-me^{2}-a^{2}b-i^{2}l'i^{2}t-i^{2}. From *in* neg., and *permeare*, to pass through. Fr., *imperméabilité*. Ger., *Undurchdringlichkeit*. The state of being impermeable.

IMPERMEABLE, adj. I^{2}m-pu^{5}r'me-a^{3}b'l. Fr., *imperméable*. Ger., *undurchdringlich*. Incapable of being passed through (said especially of strictures that will not admit an instrument and of fabrics that are water-tight).

IMPERVIOUS, adj. I^{2}m-pu^{5}r'vi^{2}-u^{3}s. Lat., *impervius* (from *in* neg., and *perviare*, to pass through). Ger., *unzugänglich*, *unwegsam*, *verrammelt*. Not pervious.

IMPETIGINES (Lat.), n., f. pl. of *impetigo* (*q. v.*). I^{2}m-pe^{2}t-i^{2}j(eg)'i^{2}n-ez(as). In Schönlein's nosology, a generic term for the more superficial diseases of the skin; the superficial dermatoses. [G.] See IMPETIGO (3d def.).

IMPETIGINODES (Lat.), adj. I^{2}m-pe^{2}t-i^{2}j(eg)-i^{2}n-od'ez(as). See IMPETIGINOUS.

IMPETIGINOSITAS (Lat.), n. f. I^{2}m-pe^{2}t-i^{2}j(eg)-i^{2}n-os'i^{2}-ta^{2}s(ta^{3}s). Gen., *-tat'is*. See IMPETIGO.

IMPETIGINOSUS (Lat.), adj. I^{2}m-pe^{2}t-i^{2}j(eg)-i^{2}n-os'u^{3}s(u^{4}s). See IMPETIGINOUS; as a n., a person affected with impetigo. [G, 49.]

IMPETIGINOUS, adj. I^{2}m-pe^{2}t-i^{2}j'i^{2}n-u^{3}s. Lat., *impetiginosus*, *impetiginodes*. Fr., *impétigineux*, *impétiginoïde*. Ger., *impetiginös*, *flechtenartig*. It., *impetiginoide*. Sp., *impetiginoso*. Related to or resembling impetigo. [G.]

IMPETIGO (Lat.), n. f. I^{2}m-pe^{2}t-i(e)'go. Gen., *-ig'inis*. From *impetere*, to attack. Gr., λειχήν. Fr., *impétigo*, *dartre humide*, *mélitagro*, *gourme*. Ger., *Krustenflechte*, *feuchter* (oder *nässender*) *Grind*. It., *impetigine*, *impetiggine*. 1. A dermatological term employed by different writers and at different periods with varying significations. Of the four varieties of the disease described under this name by Celsus, the first, characterized by pimples (*vari*), pustules, vesicles, and scales, may have included, besides eczema, i. in the modern sense of the term (*v. infra*); the second, or "red," variety was probably eczema; the third, or "black," variety, which was "thicker, harder, and more swollen," "produces fissures and corrodes violently," and was attended with the production of a spreading black scale or crust, may have been either impetiginous eczema or a gangrenous affection; the fourth variety, "not curable" and characterized by white scales the removal of which sometimes caused blood to appear, was probably psoriasis. 2. Peter Frank designated as "impetigines" (pl. of *i.*) all chronic forms of skin disease, the acute forms being termed "exanthemata." 3. Schönlein limited the term "impetigines" to those forms of skin disease that were superficial in character, corresponding nearly to the "eczematoses" of Fuchs. 4. Plenck employed the term for a red, dry, itching eruption that tended to become general over the whole body, and terminated with the formation of "furfures," or "light scales." 5. In its modern sense, as first defined by Willan, the term signifies a disease of the skin characterized by an eruption of small, yellow, itching pustules, occurring often in groups, and ending with the production of thin, scaly, yellowish crusts. By Hebra and by many recent writers the term has been discarded as implying a disease *sui generis*, the eruption being regarded simply as a form of pustulation incident to eczema. [G, 9, 11, 13, 18.] See *Impetiginous* ECZEMA.—**I. achor.** Fr., *impétigo du cuir chevelu*. Ger., *feuchter Kopfgrind*. Of Fuchs, impetiginous eczema of the scalp. [G, 5.]—**I. achor granulatus.** See ACHOR *granulatus* and ECZEMA *impetiginosum*.—**I. achor mucosus.** 1. Impetiginous eczema. [G, 5.] 2. See ACHOR *mucifluus* (2d def.).—**I. acneiformis.** See IMPÉTIGO *acniforme*.—**I. a pediculis.** I. associated with and due to the presence of pediculi, especially pediculi capitis. [G.]—**I. capitis.** I. of the scalp.—**I. conferta.** See *I. figurata*.—**I. confluens.** Of Fuchs, i. sparsa. [G, 5.]—**I. contagiosa.** Syn.: *i. parasitaria*. Of T. Fox, an acute, pustular, contagious disease of the skin, often beginning with fever, characterized by vesico-pustules appearing first, usually, on the face or hands, and thence extending to other parts, followed by the formation of yellowish, granular crusts. [G, 69.]—**I. eczematodes.** Fr., *impétigo eczémateux*. See ECZEMA *impetiginosum*.—**I. erysipelatodes, I. erythematica.** Fr., *impétigo érysipélateux*. I. resembling erysipelas: impetiginous eczema of a decidedly inflammatory character. [G, 12.]—**I. exedens.** See *I. rodens*.—**I. faciei.** Impetiginous eczema of the face. [G.]—**I. faciei lactea.** See ACHOR *in facie*.—**I. favosa.** I. attended with favus-like crusts. [G.]—**I. figurata.** Syn.: *i. conferta*. Fr., *impétigo figuré*. Figured scall; i. in which the efflorescences occur in clusters, forming irregular figures. [G, 12, 28.] Cf. *I. sparsa*.—**I. granulata.** Fr., *impétigo granulé*. I. characterized by friable and granular crusts, owing to the decidedly purulent character of the secretion. [G.]—**I. herpetiformis.** Fr., *impétigo herpétique*. A chronic pustular or vesico-pustular disease of the skin occurring in pregnant women during the latter months of gestation, and attended with grave general symptoms, often ending fatally. It is characterized by "efflorescences filled with a yellow, purulent fluid (pustules) disposed in groups or rings, which, drying, form flat, yellow scabs, beneath which the surface is red and excoriated, as in eczema rubrum, while new groups and rings of pustules appear at their periphery." [Hebra (G. 3); "N. Y. Med. Jour.," July 23, 1887, p. 112.] Cf. HERPES *gestationis*.—**I. indica.** See COURAP.—**I. larvalis.** Fr., *impétigo larvé*. Impetiginous eczema of the face with crusts covering the skin like a mask. [G, 20.]—**I. localis.** I. limited to a special region, such as the face. [G.]—**I. mercurialis.** Impetiginous eczema due to mercurial poisoning. [G, 41.]—**I. parasitaria.** A name given to i. contagiosa by Kaposi, who found a fungus in the efflorescences which he regarded as the cause of the disease. [G, 47.]—**I. pilaris.** A pustular eruption, occurring usually in men, and most commonly on the legs, each pustule being traversed by a hair: regarded by Devergie as a suppurative form of lichen pilaris. [G, 50.]—**I. puriffluens.** A form of pustular eruption peculiar to a "pale, opaline, thick, and oily skin" (Devergie), the pustules breaking and leaving a red, uneven, eroded surface, from which a very abundant muco-purulent fluid of a yellowish-white color is discharged. [G, 50.]—**I. rodens.** Fr., *impétigo rongeant*. A chronic ulcerative disease of the skin, especially of the face, of uncertain character. According to Devergie, there are three varieties. In the first, or "diffuse," form, little efflorescences, varying in size from that of a pin-head to that of a lentil, occur at various points on the face, especially the cheeks, characterized by the formation of crusts, beneath which slightly depressed erosions or ulcers form, followed by scars. In the second, or "aggregated" (*ramassée*) form, the little crusts appear upon the nose and near the inner angle of the eye. These fall off and are followed by cicatrices, but the disease extends by the development, at their periphery, of other similar crusts, which pursue a like course (lupus erythematosus). In the third, or "ulcerating," form, the disease affects principally the alæ nasi, or the angles of the eye, and is attended with abundant purulent or sanious discharge and with considerable ulceration. Most writers refer i. rodens to cancer or syphilis. [G, 12, 50.]—**I. rodens syphilitica.** A serpiginous form of i. syphilitica attended with ulceration. [G.]—**I. scabida.** Fr., *impétigo rupiforme* (ou *scabieux*). I. attended with much crusting. See ECZEMA *impetiginodes*.—**I. scrophulosa.** Fr., *impétigo scrofuleux*. I. associated with scrofula; according to Bazin, one of the ætiological divisions of i. [G.]—**I. simplex.** I. of the common and simple form. [G.] Cf. *I. contagiosa*. **I. sparsa.** Fr., *impétigo épars*. Scattered running scall; i. in which the efflorescences (or pustules) are scattered over the surface at comparatively wide intervals, and without determinate arrangement. The pustules afterward break and give rise to a discharge that dries and produces yellowish laminated scales. [G, 12, 28.] See ECZEMA *impetiginodes*.—**I. sycosiformis.** Fr., *impétigo sycosiforme*. A pustular affection (or an impetiginous eczema) of the upper lip, in which the pustules are deeper seated than in ordinary i., but not so deep-seated as those of sycosis. Two varieties are described, one of which occurs as the sequel of a long-continued muco-purulent discharge from the nostrils, and is most common in young persons; the other occurs only in men, and is due to the irritation of shaving. [Devergie (G, 50); "Mntsh. f. prakt. Dermat.," 1888, 3, p. 143.]—**I. syphilitica.** Fr., *impétigo syphilitique*. See *Impetiginous* SYPHILODERM.—**I. ulcerata.** See *I. rodens*.—**I. variolosa.** An eruption of i. pustules occasionally observed during the declining period of variola. [G, 13.]

IMPÉTIGO (Fr.), n. A^{2}n^{2}-pa-te-go. See IMPETIGO.—**I. acniforme.** A chronic pustular eruption of the region of the beard. The pustules are small (miliary), rounded, and discrete, and are of short duration, drying up and forming small crusts that drop off, leaving purplish spots. Succeeding crops appear, and the disease is often very persistent. It differs from *i. de la barbe* in that the pustules do not form confluent crusts. [G, 51.]—**I. aigu.** An acute skin disease of animals which manifests itself in small red papules which proceed to pustulation in a very short time and dry up, leaving a brown crust. [*a*, 40.]—**I. bénin.** A benign, scrofulous form of impetigo. [B, 46 (*a*, 39).]—**I. chronique.** A cutaneous disease in animals which is characterized by successive pustular eruptions which extend from place to place, coalescing and discharging a sero-purulent fluid of exceedingly fœtid odor. [L, 41 (*a*, 40).]—**I. de la barbe.** Syn.: *i. sycosiforme*. An impetiginous eczema of the beard, characterized by the development of pustules about the hairs, followed by yellowish or greenish crusts that tend to mat the hairs together. [G, 51.] See ECZEMA *barbæ* and IMPETIGO *sycosiformis*.—**I. disseminé.** Impetigo with pustules scattered over the surface of the body. [G.]—**I. du cuir chevelu.** See IMPETIGO *achor*.—**I. ecthymatiforme.** A pustular skin eruption described as intermediate between impetigo and ecthyma. The pustules are larger than those of impetigo, and do not form yellowish, confluent crusts, but are not so deep-seated as those of ecthyma, are more closely aggregated (sometimes confluent), and are less apt to leave scars. [G.]—**I. épars.** See IMPETIGO *sparsa*.—**I. malin.** A scrofulous, pustular form of i. [B, 46 (*a*, 39).]—**I. rongeant.** See IMPETIGO *rodens*.—**I. rupiforme, I. scabieux.** See IMPETIGO *scabida*.—**I. scrofuleux.** See IMPETIGO *scrophulosa*.—**I. syphilitique bénin.** Superficial or benign impetigo syphilitica. [L, 87 (*a*, 39).]—**I. syphilitique malin.** Profound or malignant syphilitic impetigo. [L, 87 (*a*. 39).]—**I. trichophytique.** Impetigo contagiosa supposed to be due to tricophytous tonsurans. [G.]

IMPETIOLAR, adj. I^{2}m-pe^{2}t-i'ol-a^{3}r. Lat., *impetiolaris* (from *in*, neg., and *petiolus*, a little foot). Of leaves, without a petiole. [L, 107.]

IMPETIX, n. I^{2}m-pe^{2}t-i^{2}ks. An old term for impetigo.

IMPETUS (Lat.), n. m. I^{2}m'pe^{2}t-u^{3}s(u^{4}s). Gen., *-imp'etus*. From *impetere*, to attack. Gr., ἐπιδρομή. Ger., *Anfall*, *Angriff*. 1. An attack, onset, or paroxysm (of a disease). [A, 322.] 2. The force with which a body moves.—**Impetum faciens.** See ENORMON.—**I. febris.** Ger., *Fieberanfall*. The onset of a fever. [A, 322.]—**I. sanguinis.** Ger., *Blutandrang*. Sanguineous congestion. [A, 322.]

IMPFANSTALT (Ger.), n. I^{2}mpf'a^{3}n-sta^{3}lt. An institution for public vaccination. [*a*, 14.]

IMPFARZT (Ger.), n. I^{2}mpf'a^{3}rtzt. A vaccinator. [E.]

IMPFBAR (Ger.), adj. I^{2}mpf'ba^{3}r. 1. Inoculable. 2. Capable of, or susceptible to, vaccination. [*a*, 14.]—**I'keit.** 1. Inoculability. 2. Susceptibility to vaccination. [*a*, 14.]

IMPFER (Ger.), n. I^{2}mpf'e^{2}r. See Impfarzt.

IMPFGEGNER (Ger.), n. I^{2}mpf'gag-ne^{2}r. An opponent of vaccination. [*a*, 14.]

IMPFGESETZ (Ger.), n. I^{2}mpf'ge^2-ze^{2}tz. A law or ordinance concerning public vaccination. [*a*, 14.]

IMPFLING (Ger.), n. I^{2}mpf'li^{2}n^2. A child that has just been vaccinated or is about to be vaccinated. [A, 521.]

IMPFPFLICHT (Ger.), n. I^{2}mpf'pfli^{2}ch^{2}t. Obligation to undergo vaccination. [*a*, 14.]

IMPFPFLICHTIG (Ger.), adj. I^{2}mpf'pfli^{2}ch^{2}t-i^{2}g. Under legal obligation to be vaccinated. [A, 521.]

IMPFSCHEIN (Ger.), n. I^{2}mpf'shin. A certificate of vaccination. [A, 521.]

IMPFSCHUTZ (Ger.), n. I^{2}mpf'shutz. Protection against small-pox by vaccination. [*a*, 14.]

IMPFSTELLE (Ger.), n. I^{2}mpf'ste^{2}l-le^2. The site of vaccination. [A, 521.]

IMPFSTOFF (Ger.), n. I^{2}mpf'sto^{3}f. Vaccine virus. [*a*, 14.]

IMPFUNG (Ger.), n. I^{2}mpf'un^2. See Vaccination and Inoculation.

IMPFWUNDE (Ger.), n. I^{2}mpf'vund-e^2. An inoculated wound. [L, 80.]

IMPFZWANG (Ger.), n. I^{2}mpf'tswa^{3}n^2. Compulsory vaccination. [*a*, 14.]

IMPIA (Lat.), n. f. I^{2}m'pi^2-a^3. From *impius*, irreverent. 1. In Italy, the *Erigeron canadense*. 2. A genus of the *Compositæ*; of Bentham and Hooker, the genus *Filago*. [B, 121; B, 42 (*a*, 24).]—**I. germanica.** The *Filago germanica*. [B, 180 (*a*, 24).]

IMPINGUATIO (Lat.), n. f. I^{2}m-pi^{2}n^2-gu^2(gu^4)-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *impinguare*, to make or become fat. See Pinguefaction.

IMPLACENTAL, adj. I^{2}m-pla^2-se^{2}n't'l. From *in*, neg., and *placenta* (*q. v.*). Fr., *implacentaire*. Having no placenta. The *Implacentalia* of Owen are the *Achoria* (*q. v*). [L, 343.]

IMPLANTATIO (Lat.), n. f. I^{2}m-pla^{2}n(pla^{3}n)-ta(ta^3)'shi^2(ti^2)-o. Gen., *-on'is*. See Implantation.—**I. oculi.** See Greffe *oculaire*.

IMPLANTATION, n. I^{2}m-pla^{2}n-ta'shu^{3}n. Lat., *implantatio* (from *in*, in, and *plantare*, to plant). Fr., *i.* Ger., *I.*, *Einpflanzung*, *Ansatzstelle*. It., *impiantazione*. Sp., *implantación*. 1. An attachment or insertion (*e. g.*, of a ligament). 2. The act of inserting, ingrafting, or introducing anything that is to remain *in situ*. [*a*, 17.] 3. A form of double monstrosity in which one of the individuals is parasitic. [A, 385.]—**Crescentic i.** Burn's ligament. [L.]—**Crescentic i. of the external oblique muscle** [Cooper]. See *Gimbernat's* ligament.—**Equal external i.** See *I. éxterne égale*.—**External i.** See *I. externe*.—**Hypodermatic i., Hypodermic i.** Ger., *hypodermatische I.* The introduction of solid medicinal substances into the subcutaneous connective tissue through an incision in the skin. [Bernatzik (A, 319 [*a*, 21]).]—**I. externe** (Fr.). I. (3d def.) in which the parasitic individual is wholly or partly external to the other. [A, 385.]—**I. externe égale** (Fr.). That form of i. externe in which the two individuals are joined at like anatomical points. [A, 385.]—**I. externe inégale** (Fr.). A form of i. externe in which the two individuals are united at dissimilar points. [A, 385.]—**I. interne** (Fr.). The form of i. (3d def.) in which one individual is wholly included within the other. [A, 385.]—**Internal i.** See *I. interne*.—**Medicamental i.** Ger., *medicamentöse I.* See *Hypodermic i.*—**Parenchymatous i.** Ger., *parenchymatöse I.* The introduction of remedial agents into the body of a new growth for the purpose of destroying it. [L, 57 (*a*, 40).]—**Unequal external i.** See *I. externe inégale*.

IMPLANTED, adj. I^{2}m-pla^{2}nt'e^{2}d. Lat., *implantatus* (from *in*, in, and *plantare*, to plant). Fr., *implanté*. 1. Attached. 2. Ingrafted; inoculated. [*a*, 17.]

IMPLETIO (Lat.), n. f. I^{2}m-ple(pla)'shi^2(ti^2)-o. Gen., *-on'is*. From *implere*, to fill up. Ger., *Anfüllung*. Repletion. [L, 50 (*a*, 14).]

IMPLEXOUS, IMPLICATE, adj's. I^{2}m-ple^{2}x'u^{3}s, i^{2}m'pli^2-kat. Lat., *implexus* (from *implectere*, to plait), *implicatus* (from *implicare*, to infold). Ger., *verflochten*, *verschlungen*. Interwoven; interlaced. [B, 123, 167 (*a*, 24).]

IMPLICATED, adj. I^{2}m'pli^{2}k-at-e^{2}d. 1. See Implicate. 2. Involved, affected.

IMPLICATIO (Lat.), n. f. I^{2}m-pli^2-ka(ka^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *implicare*, to infold. Ger., *Verwickelung*. 1. An entangling. 2. A complication of diseases. [L, 50 (*a*, 14).]

IMPLUMED, adj. I^{2}m-plumd'. Lat., *implumis* (from *in*, not, and *pluma*, a small, soft feather). Of Illiger, featherless (said of those parts of the body of birds which are destitute of feathers). [L, 180 (*a*, 39).]

IMPLUVIUM (Lat.), n. n. I^{2}m-plu^2(plu^4)'vi^2(wi^2)-u^{3}m(u^{4}m). From *impluere*, to rain into. 1. A shower bath. [B, 48, 78.] 2. See Embrocation.

IMPONDERABILITY, n. I^{2}m-po^{2}n-de^{2}r-a^2-bi^{2}l'i^2-ti^2. From *in*, not, and *pondus*, a weight. Fr., *impondérabilité*. Ger., *Imponderabilität*, *Unwägbarkeit*. The quality of being imponderable. [*a*, 17.]

IMPONDERABLE, adj. I^{2}m-po^{2}n'de^{2}r-a^2-b'l. Lat., *imponderabilis*. Fr., *impondérable*. Ger., *unwägbar*. Incapable of being weighed; without weight. The i's (Lat., *imponderabilia*) of the old authors included heat, light, electricity, magnetism, etc. [L, 30, 41, 44, 107 (*a*, 14).]

IMPOSED, adj. I^{2}m-pozd'. Lat., *impositus* (from *imponere*, to place upon). Ger., *aufgesezt*. Placed upon. [*a*, 24.]

IMPOSTEM, n. I^{2}m-po^{2}st'em. See Abscess.

IMPOSTHUMATION, n. I^{2}m-po^{2}s-thu^{2}m-a'shu^{3}n. See Apostasis (1st def.).

IMPOSTHUME, n. I^{2}m-pos'thu^{2}m. See Abscess.

IMPOSTOR (Lat.), n. m. I^{2}m-po^{2}st'o^{2}r. Gen., *-o'ris*. From *imponere*, to impose. A deceiver. [A, 312 (*a*, 21).]—**I. chymicorum.** An old name for mercury. [B, 180 (*a*, 24).]

IMPOTENCE, IMPOTENCY, n's. I^{2}m'pot-e^{2}ns, -e^{2}ns-i^2. Gr., ἀδυναμία. Lat., *impotentia*. Fr., *i.*, *impuissance*. Ger., *Impotenz*, *Unvermögen*. It., *impotenza*. Sp., *impotencia*. Powerlessness, especially inability to copulate satisfactorily.—**I. fonctionnelle** (Fr.). A general term for certain affections characterized by incapacity for a particular sort of muscular action (such as writer's cramp, etc.). [E. Chambard, "Rev. de méd.," June, 1887, p. 469.]—**Paralytic i.** A form of i. resulting from the abolition of the power of erection and sexual desire. [Gross (*a*, 40).]—**Psychical i.** Lat., *impotentia psychica*. I. due to a lack of self-confidence, fear, shame, or the like. [A, 326 (*a*, 21).]

IMPOTENT, adj. I^{2}m'pot-e^{2}nt. Lat., *impotens* (from *in* neg., and *posse*, to be able). Fr., *i.*, *impuissant*. Ger., *unvermögend*, *zeugungsunfähig*. Affected with impotence. [D.]

IMPOTENTIA (Lat.), n. f. I^{2}m-po(po^2)-te^{2}n'shi^2(ti^2)-a^3. See Impotence.—**I. coeundi.** See Impotence.—**I. concipiendi.** Barrenness in the female.—**I. generandi.** See Sterility.—**I. gestandi.** Barrenness in the female due to inability to carry the fœtus to full term. [*a*, 40.]—**I. parturiendi.** Barrenness in the female resulting from natural deformities which disable her for giving birth to a child. [L, 57 (*a*, 40).]—**I. virilis.** Impotence in the male.

IMPRÆGNATIO (Lat.), n. f. I^{2}m-pre^{2}g(pra^3-e^{2}g)-na(na^3)'shi^2-(ti^2)-o. Gen., *-on'is*. From *imprægnare*, to impregnate. 1. A moistening. 2. Impregnation. [L, 50 (*a*, 14).]

IMPRÆPUTIATUS (Lat.), adj. I^{2}m-pre(pra^3-e^2)-pu^2(pu)-ti^2-at(a^{3}t)'u^{3}s(u^{4}s). From *in* neg., and *præputiare*, to draw out the foreskin. Ger., *unbeschnitten*. Uncircumcised. [A, 322.]

IMPRÄGNIRUNG (Ger.), n. I^{2}m-preg-ner'un^2. See Impregnation.

IMPREGNATION, n. I^{2}m-pre^{2}g-na'shu^{3}n. Lat., *imprægnatio* (from *imprægnare*, to impregnate). Fr., *imprégnation*. Ger., *Imprägnirung*, *Schwängerung* (1st def.). It., *impregnazione*. Sp., *impregnación*. 1. In chemistry, the saturation of a substance with another substance without chemical combination. 2. In botany, the fertilization of the ovules by the pollen tubes. [*a*, 24.] 3. The process by which the female is made to conceive.—**Artificial i.** Fr., *fécondation artificielle*. See *Artificial* fecundation.—**Hypodermic i.** The i. of ova in some invertebrates (*Clepsine*, etc.) by the injection of the spermatozooids through the body wall. ["Jour. of Morph.," iv, p. 363 (J).]—**Ovarian i.** Fr., *imprégnation ovarique*. See *Indirect* atavism.

IMPRÉGNATION (Fr.), n. A^{2}n^2-pran-ya^3-se-o^{2}n^2. See Impregnation.—**I. ovarique.** See *Ovarian* impregnation.

IMPRESSED, adj. I^{2}m-pre^{2}st'. Lat., *impressus* (from *imprimere*, to press into). Fr., *imprimé*, *impressionné* (1st def.). Ger., *eingedrückt*. 1. Having linear or dot-like indentations or depressions (said of leaves, scales of grasses, etc.). 2. Sunk into the substance of another part or organ so as to produce linear or other depressions (said of the veins in some leaves, etc.). 3. Immersed (said of a part or organ depressed in another part or organ so that the surfaces of the two lie even, or nearly so). [B, 1, 123 (*a*, 24).]

IMPRESSIBILITY, n. I^{2}m-pre^{2}s-i^2-bi^{2}l'i^{2}t-i^2. From *imprimere*, to press into. Fr., *impressibilité*. Ger., *Empfänglichkeit*. Susceptibility to impression; that property of organic bodies by which they are capable of being modified by certain agents. [L, 107.]

IMPRESSIBLE, adj. I^{2}m-pre^{2}s'i^2-b'l. Possessing impressibility. [*a*, 17.]

IMPRESSIO (Lat.), n. f. I^{2}m-pre^{2}s'si^2-o. Gen., *-on'is*. See Impression.—**I. angularis.** A depression in the surface of the occipital lobe of the brain, corresponding to the projection of the petrous portion of the temporal bone into the cranial cavity. [L, 332.]—**I. cardiaca, I. cardis.** The shallow depression on the upper surface of the left lobe of the liver, just below where the apex of the heart abuts against the diaphragm. [L, 332.]—**I. carotica.** The anterior portion of the carotid groove in the sphenoid bone. [L, 31 (*a*, 29).]—**I. coli, I. colica.** A depression in the lower surface of the right lobe of the liver, receiving the hepatic flexure of the colon. [L, 31.]—**I. deltoidea, I. deltoides.** See *Deltoid* impression *of the humerus*.—**I. digastrica.** See *Digastric* fossa.—**I'nes digitatæ.** Small, roundish depressions on the inner surface of the cranial bones. [L, 332.]—**I. duodenalis.** A slight depression in the lower surface of the right lobe of the liver, in relation below with the descending portion of the duodenum. [L.]—**I. gastrica.** 1. The concavity in the lower surface of the left lobe of the liver which receives the stomach. 2. The depression in the anterior surface of the left kidney corresponding to the fundus of the stomach. [L, 142, 332.]—**I. hepatica.** The depression in the anterior surface of the right kidney where it is in relation with the right lobe of the liver. [L, 332.]—**I. jugularis.** A shallow depression in the lower surface of the cerebellum receiving the jugular tubercle of the occipital bone. [L, 332.]—**I'nes laterales (phalangium).** Small foveæ surmounted by tubercles, on either side of the distal ends of the metacarpal bones, receiving the attachments of the lateral ligaments of the metacarpo-phalangeal articulations. [A, 478 (*a*, 17).]—**I. lateralis (ossis metacarpi).** The lateral surface of the head of a metacarpal bone. [L, 31 (*a*, 29).]—**I'nes metacarpi laterales.** See *I. lateralis ossis metacarpi*.—**I'nes musculares.** The flattened surfaces on the greater tuberosity of the humerus, to which are attached, respectively, the supraspinatus

infraspinatus, and teres minor muscles. [L, 332.]—**I. muscularis.** The depression on the posterior surface of the kidney, where it is in relation with the quadratus lumborum muscle. [L, 332.]—**I. nervi trigemini.** The depression upon the apex of the petrous portion of the temporal bone for the reception of the Gasserian ganglion. [L, 332.]—**I'nes phalangium laterales.** See *I'nes laterales* (*phalangium*).—**I. petrosa.** A depression on the under surface of the occipital lobe of the brain, at its junction with the temporal lobe, which corresponds to the prominence formed by the petrous portion of the temporal bone. [L, 117 (*a*, 29).]—**I. renalis.** A depression in the lower surface of the right lobe of the liver in relation with the right kidney. [L, 332.]—**I'nes semilunares.** Depressions upon the external surface of the retina, corresponding to elevations upon its internal surface, found only in fœtal eyes. [F.]—**I. suprarenalis.** The depression in the posterior border of the right lobe of the liver, which receives the suprarenal capsule. [L, 142.]—**I. trigemini (ossis temporis).** A depression near the apex of the petrous portion of the temporal bone, on its anterior surface, for the reception of the trigeminus nerve and the Gasserian ganglion. [L, 31 (*a*, 29).]—**I. vesicalis.** See Fissure *for the gall-bladder.*

IMPRESSION, n. I^{2}m-pre^{2}sh'u^{3}n. Gr., ἐντύπωσις. Lat., *impressio* (from *imprimere*, to press into). Fr., *i.* Ger., *Eindruck.* 1. A slight depression or hollow in a surface, such as might result from the impact of a finger upon a soft body. 2. A perceptible alteration of, or (passive) change in, the condition or state of anything resulting from the action of an extraneous agency. 3. An idea passively engendered. [*a*, 17.]—**Deltoid i. of the humerus.** Lat., *impressio deltoidea* (seu *deltoides*). A large, triangular, uneven i. on the external surface of the shaft of the humerus, near its middle, receiving the insertion of the deltoid muscle. [C, 3.]—**Digital i.** See Impressiones *digitatæ* (under Impressio).—**Maternal i.** An i. (3d def.) made upon a pregnant female and supposed to result in some peculiarity in the formation of the offspring.

IMPRESSIONNÉ (Fr.), adj. A^{2}n^2-pre^{2}s-se-o^{2}n-na. See Impressed (1st def.).

IMPRESSURA (Lat.), n. f. I^{2}m-pre^{2}s-su^2(su)'ra^3. 1. See Impression. 2. Of M. A. Severinus, a mark of contamination (*e. g.*, with syphilis). [A, 325.]

IMPUBERAL, adj. I^{2}m-pu^{2}b'e^2-r'l. Lat., *impuber, impubes, impubis* (from *in*, neg., and *pubes* (*q. v.*). Fr., *impubère.* Ger., *unmannbar* (1st def.). 1. Not having attained puberty. 2. Immature. [L, 50 (*a*, 14).]

IMPUBERTY, n. I^{2}m-pu^2'bu^{5}r-ti^2. From *in*, not, and *pubertas*, maturity. The state of being impuberal.

IMPUBES (Lat.), adj. I^{2}m-pu^2(pu)'bez(bas). See Impuberal.

IMPUDENS (Lat.), **IMPUDICUS** (Lat.). I^{2}m-pu^{2}d(pud)'e^{2}ns-(ans), -pu^{2}d(pud)-i(e)'ku^{3}s(ku^{4}s). From *in*, neg., and *pudere*, to be ashamed. Fr., *impudique.* Ger., *schamlos.* Shameless; as a botanical species name, resembling the penis.

IMPUISSANCE (Fr.), n. A^{2}n^2-pwes-sa^{3}n^{2}s. See Impotence.

IMPULS (Ger.), n. I^{2}m-puls'. See Impulse.—**Accommodationsi'.** See under Accommodation.

IMPULSE, n. I^{2}m'pu^{3}ls. Gr., ὠσμός. Lat., *impulsus* (from *impellere*, to push). Fr., *impulsion.* Ger., *Impuls, Antrieb.* It., Sp., *impulso.* Lit., a being driven in a particular direction. 1. Momentum or force, especially when suddenly accelerated; a quick thrust. 2. A sudden access of volition, especially when viewed as making the mind its passive agent. [D; *a*. 17.]—**Cardiac i.** See *Apex* beat.—**Emotional morbid i.** An i. to commit an act, originating in a sentiment or emotion and not from any intellectual source.—**Expiratory i.** Ger., *Expirationserregung.* An i. from the respiratory center giving rise to expiratory movements, inspiratory movements being at the same time wholly suspended. [J.]—**Heart's i.** See *Apex* beat.—**Homicidal i.** An insane i. to kill a fellow-being. [D, 36.]—**Inspiratory i.** An i. from the respiratory centre, inducing inspiratory movements, expiratory efforts being at the same time suspended. [J.]—**Intellectual objective morbid i.** The persistence of an idea in the mind of an individual contrary to his sense of right, urging him to a specific act repugnant to his conscience, the consequences of which are not limited to himself. [Hammond (*a*, 40).]—**Intellectual subjective morbid i.** The occurrence or recurrence of an idea known to be false, the logical consequences of which are restricted to the individual in whom it occurs. [Hammond (*a*, 40).]—**Morbid i.** A form of i. in which the patient is moved to commit acts from which he would shrink if sane. [*a*, 40.]—**Suicidal i.** An insane i. to take one's own life. [D, 36.]—**Systolic i.** See *Apex* beat.—**Volitional morbid i.** An irresistible i. to the perpetration of acts often motiveless, known to be criminal, and against which the intellect and will are strongly exerted. [Hammond (*a*, 40).]

IMPULSIVE, adj. I^{2}m-pu^{3}ls'i^{2}v. From *impellere*, to push. 1. Pertaining to an impulse (1st def.). 2. Acting under or prone to be affected by impulse (2d def.).

IMPUNCTATE, adj. I^{2}m-pu^{3}n^{2}k'tat. Lat., *impunctatus* (from *in* neg., and *pungere*, to prick). Ger., *unpunktirt.* Not punctate. [B, 123 (*a*, 24).]

IMPURGATUS (Lat.), adj. I^{2}m-pu^{3}r(pu^{4}r)-gat(ga^{3}t)'u^{3}s(u^{4}s). From *in* neg., and *purgare*, to make clean. See Acathartus.

IMPURITY, n. I^{2}m-pu^3'ri^2-ti^2. Lat., *impuritas* (from *impurus*, unclean). Fr., *impurité.* Ger., *Unreinigkeit.* 1. The state of being impure. 2. The substance or substances the presence of which renders anything impure.

IMPUTABILITY, n. I^{2}m-pu^{2}t-a^2-bi^{2}l'i^{2}t-i^2. From *imputare*, to charge against. Lat., *imputabilitas.* Fr., *imputabilité.* Ger., *Zurechnungsfähigkeit.* The soundness of mind which renders a man legally chargeable with crime. [*a*, 40.]

INACTION, n. I^{2}n-a^{2}k'shu^{3}n. From *in* neg., and *actio*, a doing. Lack of action.—**Hemiopic pupillary i.** See *Hemiopic pupillary* reaction.

INACTIVE, adj. I^{2}n-a^{2}k'ti^{2}v. Lat., *inactivus.* Fr., *inactif.* Ger., *unthätig.* In a passive state.—**Optically i.** In chemistry, having no action on polarized light.

INADEQUACY, n. I^{2}n-a^{2}d'e-kwa-si^2. From *in* neg., and *adæquare*, to make equal to. Fr., *insuffisance.* Ger., *Insufficienz, Unzulänglichkeit.* Insufficiency.—**Renal i.** Fr., *insuffisance rénale.* Ger., *Niereninsufficienz.* Of Sir Andrew Clark, a condition of the kidney in which it is unable to produce the normal amount of urine containing the proper proportion of solids and of a specific gravity greater than 1·014. Its pathology is not positively known, but is believed to consist in a slight withering and induration of the kidney. The solids most diminished are urea and uric acid. The symptoms are palpitation, flatulence, a feeble capillary circulation, a dry, shiny skin, occasional flushes, mental worry, and general nervousness. The patients are very vulnerable and deficient in recuperative power, and bear shocks poorly. ["Lancet," 1879, ii, p. 800 (*a*, 40).]

INADHERENT, adj. I^{2}n-a^{2}d-he're^{2}nt. Lat., *inadherens* (from *in*, in, and *adhærere*, to cleave to). Fr., *inadhérent.* Ger., *frei.* Free, unattached (said of plant-organs). [B, 1 (*a*, 24).]

INÆQUALIFOLIUS (Lat.), adj. I^{2}n-e(a^3-e^2)-kwa(kwa^3)-li(li^2)-fol(fo^{2}l)'i^2-u^{3}s(u^{4}s). From *in* neg., *æquus*, equal, and *folium*, a leaf. Having unequal leaves. [L, 107.]

INÆQUALIS (Lat.), adj. I^{2}n-e(a^3-e^2)-kwa(kwa^3)'li^{2}s. From *in* neg., and *æqualis*, equal. See Unequal.

INÆQUITELÆ (Lat.), n. f. pl. I^{2}n-e^{2}k(a^3-e^{2}k)-wi^2-te(ta)'le (la^3-e^2). From *inæqualis*, unequal, and *tela*, a web. A tribe of spiders distinguished by the irregular shape of their webs. [B, 77.]

INAIGRETTÉ (Fr.), adj. I^{2}n-e^2-gre^{2}t-ta. Without an aigrette (pappus). [B, 1 (*a*, 24).]

INALBUMINATE, adj. I^{2}n-a^{2}l-bu^2'mi^{2}n-at. Lat., *inalbuminatus* (from *in* neg., and *albumen* [*q. v.*]). Fr., *inalbuminé.* See Exalbuminous.

INALIMENTAL, adj. I^{2}n-a^{2}l-i^2-me^{2}n't'l. From *in* neg., and *alimentum*, food. Of Bacon, not nutritious. [J.]

INAMOVIBLE (Fr.), adj. I^{2}n-a^3-mo veb-l'. From *in* neg., and *amovere*, to remove from. Irremovable (said of dressings). [E.]

INANAGENESIS (Lat.), **INANAPHYSIS** (Lat.), n's f. I^{2}n-a^{2}n(a^{3}n)-a^3-je^{2}n(ge^{2}n)'e^2-si^{2}s, -a^{2}f(a^{3}f)-i^2(u^6)-si^{2}s. Gen., *-es'eos* (*-gen'esis*), *-ys'eos* (*-aph'ysis*). From ἴς, a muscle, ἀνά, again, and γένεσις, generation, or φύσις, birth. Ger., *Muskelfasernwiedererzeugung.* Muscular regeneration; the reproduction of muscular fibres. [L, 50, 107 (*a*, 14).]

INANGULATE, adj. I^{2}n-a^{2}n^2'gu^2-lat. Lat., *inangulatus* (from *in* neg., and *angulare*, to make angular). Fr., *inangulé.* Without angles (said of leaves, etc.). [B, 1 (*a*, 24).]

INANIA (Lat.), n. n., pl. of adj. *inanis.* I^{2}n-an(a^{3}n)'i^2-a^3. The iliac regions. [A, 322.]

INANIMATE, adj. I^{2}n-a^{2}n'i^2-mat. Lat., *inanimans* (from *in* neg., and *animare*, to fill with breath). Destitute of life. [L, 56 (*a*, 43).]

INANIS (Lat.), adj. I^{2}n-an(a^{3}n)'i^{2}s. Fr., *vide.* Ger., *leer, taub.* Empty (said of fruits having no seed, of hollow organs, etc., or [Ger., *lockermarkig*] of plant-stems containing a light pithy matter). [B, 1, 19, 123 (*a*, 24).]

INANISATION (Fr.), n. E-na^3-ne-sa^3-se-o^{2}n^2. It., *inanizzazione.* Of Chaussat, a gradual passage into an inanimate state. [L, 41, 44 (*a*, 14).]

INANITION, n. I^{2}n-a^{2}n-i^{2}sh'u^{3}n. Lat., *inanitio* (from *inanis*, empty). Fr., *i.* Ger., *I., Leerheit.* It., *inanizione.* Sp., *inanición.* The condition of being inane, emptiness; of Carpenter, starvation. [D.]

INANTHERATE, INANTHERIFEROUS, adj's. I^{2}n-a^{2}nth'e^{2}r-at, -a^{2}n-the^{2}r-i^{2}f'e^{2}r-u^{3}s. Lat., *inantheratus* (from *in*, not, and ἄνθος, blooming), *inantheriferus* (from *in* neg., ἄνθος, a flower, and *ferre*, to bear). Fr., *inanthéré.* Destitute of anthers. [B, 1 (*a*, 24).]

INANTINIAL, adj. I^{2}n-a^{2}n-ti^{2}n'i^2-a^{2}l. Pertaining to the inion and to the antinion. [L, 141.]

INAPERTOUS, adj. I^{2}n-a^{2}p-u^{5}rt'u^{3}s. Lat., *inapertus* (from *in* neg., and *aperire*, to open). Ger., *ungeöffnet.* Not open (said of perforations in plant-organs when abnormally closed). [B, 123 (*a*, 24).]

INAPPENDICULATE, adj. I^{2}n-a^{2}p-pe^{2}nd-i^{2}k'u^2-lat. Lat., *inappendiculatus* (from *in* neg., and *appendix*, an appendix). Fr., *inappendiculé.* Ger., *ohne Anhängsel.* Having no appendices. [B, 1, 123 (*a*, 24).]

INAPPETENCE, INAPPETENCY, n's. I^{2}n-a^{2}p'pe^{2}t-e^{2}ns, -e^{2}ns-i^2. Lat., *inappetentia* (from *in* neg., and *appetentia*, a longing after). Fr., *inappetence.* Ger., *Appetitlosigkeit.* It., *inappetenza.* Sp., *inapetencia.* See Anorexia.

INAPPETENTIA (Lat.), n. f. I^{2}n-a^{2}p(a^{3}p)-pe^{2}t-e^{2}n'shi^2(ti^2)-a^3. See Inappetence.—**I. a bile.** See Anorexia *biliosa.*

INAPPLICATE, adj. I^{2}n-a^{2}p'pli^{2}k-at. Lat., *inapplicatus* (from *in* neg., and *applicare*, to join). Fr., *inappliqué.* Not appressed; of bracteoles, not applied to the clinanthium. [B, 1 (*a*, 24).]

INARTICULATE, adj. I^{2}n-a^{3}rt-i^{2}k'u^2-lat. Gr., ἄσημος (2d def.). Lat., *inarticulatus* (from *in* neg., and *articulare*, to divide into single members or joints). Fr., *inarticulé.* Ger., *ungegliedert, gelenklos* (2d def.). 1. Not jointed to another part or organ; with-

out articulations in the bodily structure. 2. Of vocal sounds, or of speech, not formed into distinct syllables, confused, unintelligible. [L, 341 (*a*, 27).] Cf. ANARTHROUS. The *Inarticulata* are an order of the *Branchiopoda* having no hinge or calcareous support to the arms. The intestine opens into the cavity of the mantle, the margins of the lobes of which are completely separate. They include the genus *Lingula*. [L, 11 (*a*, 39).]

INARTICULATIO (Lat.), n. f. I^{2}n-a^{3}r-ti^{2}k-u^2(u)-la(la^3)'shi^2'-(ti^2)-o. Gen., *-on'is*. From *in* neg., and *articulare*, to divide into single members or joints. 1. See ENARTHROSIS. 2. The state of being inarticulate; the absence of an articulation normally present. [L, 50 (*a*, 14).]

INASSIMILABLE, adj. I^{2}n-a^{2}s-si^{2}m'i^{2}l-a-b'l. From *in* neg., and *assimilis*, similar. Fr., *i*. Incapable of assimilation. [L, 41 (*a*, 14).]

INAURATE, adj. I^{2}n-a^{4}r'at. Lat., *inauratus* (from *inaurare*, to gild). Fr., *doré*. Ger., *vergoldet*. Gilded. [A, 322.]

INAURATION, n. I^{2}n-a^{4}r-a'shu^{3}n. Lat., *inauratio* (from *inaurare*, to gild). Fr., *i*. Ger., *Vergoldung*. The process of gilding. [L, 50 (*a*, 14).]

INCALYCATE, adj. I^{2}n-ka^{2}l'i^2-kat. Lat., *incalycatus* (from *in* neg., and *calyx* [*q. v.*]). Fr., *incalycé*. Ger., *ungekelcht*. Destitute of a calyx. [B, 1 (*a*, 24).]

INCANATE, adj. I^{2}n-kan'at. See INCANOUS.

INCANATIO (Lat.), n. f. I^{2}n(i^{2}n^2)-ka^{2}n(ka^{3}n)-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. See INCARCERATION.

INCANDESCENCE, n. I^{2}n-ka^{2}n-de^{2}s'e^{2}ns. From *incandescere*, to glow. Fr., *i*. Ger., *Incandescenz*, *Weissglühen*. It., *incandescenza*. Sp., *incandescencia*. The state of being or becoming incandescent.

INCANDESCENT, adj. I^{2}n-ka^{2}n-de^{2}s'e^{2}nt. Glowing from heat.

INCANESCENT, adj. I^{2}n-ka^{2}n-e^{2}s'e^{2}nt. Lat., *incanescens*. See CANESCENT.

INCANOUS, adj. I^{2}n-kan'u^{3}s. Lat., *incanus* (from *in*, in, and *canus*, white). Fr., *incane*. Ger., *greisgrau*, *weisslichgrau*. Hoary white.

INCAPACITY, n. I^{2}n-ka^{2}p-a^{2}s'i^{2}t-i^2. From *in*, in, and *capax*, that can contain. Fr., *incapacité*. Ger., *Unfähigkeit*. Incapability.—**Sexual i.** See IMPOTENCE.

INCAPSULED, adj. I^{2}n-ka^{2}p'su^{2}ld. Ger., *eingekapselt*. Capsulated. [*a*, 40.]

INCARCERATED, adj. I^{2}n-ka^{3}r-su^{5}r-at'e^{2}d. Lat., *incarceratus* (from *incarcerare*, to imprison). Fr., *incarcéré*, *enchatonné*, *chatonné*, *enclavé*. Ger., *incarcerirt*, *eingekeilt*, *eingeklemmt*. It., *incarcerato*. Confined, imprisoned; of an organ, abnormally inclosed or shut off from return to its normal position in the body, or from escape through a passage which should be open.

INCARCERATIO (Lat.), n. f. I^{2}n(i^{2}n^2)-ka^{3}r-su^{5}r(ke^{2}r)-a(a^3)'-shi^2(ti^2)-o. Gen., *-on'is*. See INCARCERATION.—**I. inflammatoria.** See *Inflammatory* INCARCERATION.—**I. intestinorum.** Inclusion of a portion of the intestine in a sac or cavity with a narrow opening, as in hernia. [*a*, 40.]—**I. placentæ.** See INCARCERATION *of the placenta*.

INCARCERATION, n. I^{2}n-ka^{3}r-su^{5}r-a'shu^{3}n. Lat., *incarceratio* (from *in*, in, and *carcerare*, to imprison). Fr., *incarcération*, *enclavement*, *chatonnement*. Ger., *Eingeschlossenwerden*, *Einhülsung*, *Einsackung*, *Einklemmung*. 1. The act of incarcerating. 2. The state or process of being incarcerated. 3. Of a medicament administered subcutaneously, its confinement so that its action does not extend too far. [J. L. Corning, "N. Y. Med. Jour.," Jan. 2, 1886, p. 12.]—**I. of the gravid uterus.** Ger., *I.* (oder *Einklemmung*) *der schwangeren Gebärmutter*. Abnormal retention of the organ in the pelvis.—**I. of the placenta.** Lat., *incarceratio placentæ*. Fr., *incarcération* (ou *enchatonnement*, ou *chatonnement*) *du placenta*. Retention of the placenta in consequence of irregular contraction of the uterus.—**Inflammatory i.** I. of the intestine in old inflammatory bands. [A, 319 (*a*, 40).]—**Spasmodic i.** Obstruction of the bowel by spasmodic contraction of its muscular coat. [A, 319 (*a*, 40).]

INCARCERIRT (Ger.), adj. I^{2}n-ka^{3}r-tsa-rert'. See INCARCERATED.

INCARNANT, adj. I^{2}n-ka^{3}rn'a^{2}nt. Lat., *incarnans* (from *incarnare*, to make flesh). Forming or producing flesh; of vulnerary remedies, promoting granulation. [L, 50 (*a*, 14).]

INCARNATE, adj. I^{2}n-ka^{3}rn'at. Lat., *incarnatus* (from *incarnare*, to make flesh). Fr., *incarnat*. Ger., *fleischroth*. In botany, flesh-colored. [B, 1, 123 (*a*, 24).]

INCARNATIO (Lat.), n. f. I^{2}n^2-ka^{3}rn-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *incarnare*, to make flesh. 1. Lit., a conversion into flesh; an incarnation. 2. Syssarcosis (*q. v.*).—**I. unguis, I. unguium.** See *Ingrowing* NAIL.

INCARNATION, n. I^{2}n-ka^{3}rn-a'shu^{3}n. Lat., *incarnatio* (from *incarnare*, to make flesh). Fr., *i*. Ger., *Einfleischung*, *Fleischbildung*. It., *incarnazione*. Sp., *encarnación*. 1. A formation of, or (more properly) a conversion into, flesh; carnification. 2. The production of the germ or embryo within the ovum. 3. The formation of new material in the repair of wounds; granulation. 4. See DIANTHUS *caryophyllus*.

INCARNATIVE, adj. I^{2}n-ka^{3}rn'a^{2}t-i^{2}v. Lat., *incarnativus*. Fr., *incarnatif*. 1. See INCARNANT. 2. Imbedded in the soft parts (said of a bandage [see *Uniting* BANDAGE]).

INCARNIFICATION, n. I^{2}n-ka^{3}rn-i^2-fi^2-ka'shu^{3}n. From *in*, in, *caro*, flesh, and *facere*, to make. See INCARNATION (1st, 2d, and 3d defs).

INCASSA-POISON, n. An African ordeal bark said to contain a violent cardiac poison. [Liebreich (B, 5 [*a*, 24]).]

INCEAL, adj. I^{2}n'se-a^{2}l. From *incus*, an anvil. Fr., *incéal*. See INCUDAL; as a n., of G. St.-Hilaire, see *Subopercular* BONE.

INCENDIAIRE (Fr.), adj. A^{2}n^2-sa^{3}n^2-de-a^{2}r. From *incendere*, to set fire to. Incendiary; in the Broussais system, augmenting the gastro-intestinal secretions (said of medicines used in malarial affections). [L, 41 (*a*, 14).]

INCENDIUM (Lat.), n. n. I^{2}n(i^{2}n^2)-se^{2}nd(ke^{2}nd)'i^2-u^{3}m(u^{4}m). From *incendere*, to set fire to. 1. A phlegmon. 2. An old term for a "burning fever." [E; L, 94.] 3. See COMBUSTION.—**I. spontaneum.** See *Spontaneous* COMBUSTION.

INCENSARIA (Lat.), n. f. I^{2}n(i^{2}n^2)-se^{2}n(ke^{2}n)-sa(sa^3)'ri^2-a^3. From *incendere*, to set fire to. The *Inula odorata* and the *Artemisia abrotanum*. [B, 121 (*a*, 35).]

INCENSE, n. I^{2}n'se^{2}ns. Gr., θύος. Lat., *thus*, *tus*, *incensum*. Fr., *encens*. Ger., *Weihrauch*. It., *incenso*. Sp., *incienso*. A perfume obtained by burning certain aromatic gums, resins, barks, woods, spices, dried flowers, or seeds; also a substance so burned. The term is now restricted almost exclusively to frankincense (see OLIBANUM). [B, 18, 19, 77 (*a*, 24).]—**Hell's i.** The *Sterculia fœtida*. [A, 479 (*a*, 21).]—**I.-herb.** The *Rosmarinus officinalis*. [A, 511 (*a*, 24).]—**I.-tree.** Any tree furnishing i., especially the *Boswellia thurifera* and other species of *Boswellia*, as well as various species of pine; the *Moschoxylon Swartzii*, and in Guiana the *Icica guianensis* and *Icica heptaphylla*. [B, 19, 173, 180, 275, 282 (*a*, 24).] See OLIBANUM.—**I.-wood (of Guiana).** Fr., *bois d'encens*. The *Icica guianensis* and *Icica heptaphylla*, or their wood. [B, 19, 173, 180, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**Indian i.** 1. The odoriferous resin of the *Boswellia thurifera*. 2. Benzoin; often made into i. sticks or pastils with aloes-wood, patchouli, rose malloes, sandalwood, mastic, etc. [B, 18, 77 (*a*, 35).]—**Male i.** Lat., *thus masculum*. Olibanum. [*a*, 35.]

INCENSIO (Lat.), n. f. I^{2}n(i^{2}n^2)-se^{2}n(ke^{2}n)'si^2-o. Gen., *-on'is*. From *incendere*, to set fire to. Inflammation. [L, 50 (*a*, 14).]

INCENTIVUM (Lat.), n. n. I^{2}n(i^{2}n^2)-se^{2}n(ke^{2}n)-ti(te)'vu^{3}m-(wu^{4}m). Ger., *Reizmittel*. An irritant. [L, 50 (*a*, 14).]

INCEPTION, n. I^{2}n-se^{2}p'shu^{3}n. Lat., *inceptio*. 1. The beginning of anything. 2. Of Lankester ["Quart. Jour. of Micr. Sci.," Jan., 1881], ingestion. 3. Intussusception. [J.]

INCERATION, n. I^{2}n-se^2-ra'shu^{3}n. Gen., *-on'is*. Lat., *inceratio* (from *incerare*, to smear). Fr., *incération*. Ger., *Einwächsen*. It., *incerazione*. Sp., *enceración*. In pharmacy, the reduction of any dry substance to the consistence of softened wax by the gradual admixture of a fluid. [L, 50 (*a*, 14).]

INCERNICULUM (Lat.), n. n. I^{2}n(i^{2}n^2)-su^{5}r(ke^{2}r)-ni^{2}k'u^{2}l-(u^{4}l)-u^{3}m(u^{4}m). From *incernere*, to sift upon a thing. 1. A sieve or strainer. 2. The pelvis of the kidney. [L, 94, 107.]

INCEST, n. I^{2}n'se^{2}st. Lat., *incestus* (from *in* neg., and *castus*, chaste). Fr., *inceste*. Ger., *Blutschande*. It., Sp., *incesto*. Cohabitation between persons so related as to make their marriage illegal. [L, 56.]

INCIDENTIA (Lat.), n. n. pl. I^{2}n(i^{2}n^2)-si^{2}d(ked)-e^{2}n'shi^2(ti^2)-a^3. From *incidere*, to cut into. Medicines (*e. g.*, acids or salts) formerly supposed to consist of sharp particles. [L, 50, 107.]

INCIDING, adj. I^{2}n-sid'i^{2}n^2. From *incidere*. to cut into. Incisive, resolvent; of pectoral medicaments, expectorant. [B, 117.]

INCIDUUS (Lat.), adj. I^{2}n(i^{2}n^2)-si^{2}d(ki^{2}d)'u^2(u^4)-u^{3}s(u^{4}s). From *in*, in, and *cadere*, to fall. Ger., *einfallend*, *zwischenfallend*. Falling between two others (said of pulsations). [L, 50 (*a*, 14).]

INCILE (Lat.), n. n. I^{2}n(i^{2}n^2)-sil(kel)'e(a). Gen., *-cil'es*. Of Haller, the fourth ventricle of the brain. [I, 3 (K).]

INCINERATION, n. I^{2}n-si^{2}n-e^{2}r-a'shu^{3}n. Lat., *incineratio* (from *in*, into, and *cinis*, ash). Fr., *incinération*. Ger., *Einäscherung*. It., *incinerazione*. Sp., *incineración*. A process employed in analysis to obtain the inorganic constituents of organic matters by heating in red-hot vessels open to the air, so as to burn off all the organic particles. ["Proc. of the Am. Pharm. Assoc.," vii (*a*, 14).]

INCIPIENT, adj. I^{2}n-si^{2}p'i^2-e^{2}nt. Lat., *incipiens*. Fr., *commençant*. Ger., *aufangend*. Beginning.

INCISE, v. tr. I^{2}n-siz'. Lat., *incidere*. Fr., *inciser*. Ger., *einschneiden*. To cut into.

INCISED, adj. I^{2}n-sizd'. Lat., *incisus*. Fr., *incisé*, *découpé*. Ger., *eingeschnitten*. Cut into; of a wound, made with a cutting instrument; in botany, sharply and rather deeply cut into, or notched. [B, 1, 123, 291 (*a*, 24).]—**Digitately i.** Lat., *digitato-incisus*. Ger., *fingerig-eingeschnitten*. Cut into finger-like sinuses. [B, 123 (*a*, 24).]

INCISEUR (Fr.), adj. and n. A^{2}n^2-se-zu^{5}r. See INCISIVE and INCISOR.

INCISIF (Fr.), adj. and n. A^{2}n^2-se-sef. 1. (Adj.) see INCISIVE. 2. (N.) see INCISIVUS. 3. (N.) the intermaxillary bone. [A, 385.]—**I. mitoyen.** See DEPRESSOR *alæ nasi*.

INCISIO (Lat.), n. f. I^{2}n(i^{2}n^2)-si^{2}z(kes)'i^2-o. Gen., *-on'is*. See INCISION.—**I. crucialis.** See *Crucial* INCISION.—**I. priori opposita.** See COUNTER-OPENING.—**I. simplex.** Fr., *incision simple*. A single cut made at one time and in one direction. [E.]

INCISION, n. I^{2}n-si^2'zhu^{3}n. Lat., *incisio*, *incisura* (from *in*, into, and *cædere*, to cut). Fr., *i.*, *découpure*. Ger., *I.*, *Incisur*, *Einschnitt*, *Schnitt*. It., *incisione*. Sp., *incisión*. 1. A division of parts with a cutting instrument. 2. In botany, an incisure, a cut or sinus of any sort in a plant-organ; in a special sense, a sharp cut deeper than the sinuses in dentation, not so deep as those in segmentation. [B, 1, 19, 123, 229, 291 (*a*, 24).]—**Crucial i.** Lat., *in-*

cisio crucialis. An i. consisting of two simple i's crossing each other at right angles.—**Dry i.** Fr., *i. sèche.* The wound made by an écraseur. [E.] See Écrasement.—**Explorative i., Exploratory i.** Fr., *i. exploratrice.* Ger., *Probeincision.* An i. into a cavity for the purpose of examining the contents of the cavity.—**Fergusson's i. for removal of the upper jaw.** The i. usually employed; it passes from the inner canthus of the eye down around the ala of the nose, and through the median line of the lip. [E.]—**Gensoul's i. for removal of the upper jaw.** An i. extending across the cheek in the line of Stenson's duct, meeting a vertical one extending upward from the angle of the mouth to the inner canthus of the eye. [E, 1.]—**I. composée** (Fr.). An i. made up of two or more simple i's (*e. g.*, the crucial i. or the elliptical i.). [E.]—**I. contre soi** (Fr.). An i. made by drawing the knife toward the operator. [E.]—**I. couche par couche** (Fr.). An i. in which, to reach a deep part, the superposed layers are divided separately. [E.]—**I. devant soi** (Fr.). An i. made in a direction away from the operator. [E.]—**I. sèche** (Fr.). See *Dry i.*—**I. simple** (Fr.). See Incisio *simplex.*—**Liston's (or Lizars's) i. for removal of the upper jaw.** An i. extending from in front of the ear downward in a curved line to the angle of the mouth. [E, 1.]—**Probei'** (Ger.). See *Exploratory i.*—**Relief i.** Ger., *Entspannungsschnitt.* An i. made for the purpose of lessening tension.—**Wilde's i. for mastoid disease.** An i. 1 to 1½ inch long, made about a centimetre behind the line of attachment of the external ear and parallel with it, passing through the skin, subcutaneous tissue, and periosteum, down to the bone; recommended in painful and refractory swellings of the tissues overlying the mastoid process, to secure complete drainage and relieve tension. [F.]

INCISIVAL, adj. I^{2}n-si^2-siv'a^{2}l. See Incisive (2d def.).

INCISIVE, adj. I^{2}n-si'si^{2}v. Lat., *incisivus.* Fr., *incisif.* 1. Anciently, resolvent. [B, 119.] 2. In relation with or adjacent to an incisor tooth. 3. Adapted to cutting, incisor. [L.]

INCISIVUS (Lat.), adj. I^{2}n(i^{2}n^2)-si(ke)-si(se)'vu^{3}s(wu^{4}s). Incisive; as a n., an incisor tooth; also a muscle situated near the incisor teeth.—**I. inferior.** See Accessorii *orbicularis oris.*—**I. lateralis.** Of Winslow, the levator labii superioris and the levator labii superioris alæque nasi taken as one muscle. [a, 29.]—**I. medius.** Fr., *incisif mitoyen.* See Depressor *alæ nasi.*

INCISO-CRENATE, adj. I^{2}n-si''so-kre^{2}n'at. Lat., *incisocrenatus* (from *in*, into, *cædere*, to cut, and *crena*, a notch). Ger., *eingeschnitten-gekerbt.* Having slashed crenæ. [B, 123 (a, 24).]

INCISO-DENTATE, adj. I^{2}n-si''so-de^{2}nt'at. Lat., *incisodentatus.* Ger., *eingeschnitten-gezähnt.* Having slashed dentations. [B, 19, 123 (a, 24).]

INCISO-LOBATE, adj. I^{2}n-si''so-lob'at. Ger., *eingeschnitten-gelappt.* Of a lobate leaf, having the sinuses or re-entering angles deep and narrow. [a, 35.]

INCISO-PINNATIFID, adj. I^{2}n-si''so-pi^{2}n-a^{2}t'i^{2}f-i^{2}d. Deeply pinnatifid. [a, 35.]

INCISOR (Lat.), adj. and n. I^{2}n(i^{2}n^2)-si(ke)'zo^{2}r(so^{2}r). Gen., *-or'is.* Fr., *inciseur.* Ger., *einschneidend* (adj.), *Einschneider* (n.). 1. (Adj.) serving to incise; pertaining to or in relation with the i. teeth. 2. (N.) a cutting instrument or organ, especially an i. tooth. [K (a, 14).]

INCISORIUM (Lat.), n. n. I^{2}n(i^{2}n^2)-si(ke)-so'ri^2-u^{3}m(u^{4}m). From *in*, into, and *cædere*, to cut. 1. See Bistoury. 2. An old term for an operating-table. [L, 94.]

INCISORIUS (Lat.), adj. I^{2}n(i^{2}n^2)-siz(kes)-o'ri^2-u^{3}s(u^{4}s). See Incisivus.

INCISO-SERRATE, adj. I^{2}n-si''so-se^{2}r'at. Lat., *inciso-serratus* (from *in*, into, *cædere*, to cut, and *serra*, a saw). Ger., *eingeschnitten-gesägt.* Having slashed serratures. [B, 19, 123 (a, 24).]

INCISUR (Ger.), n. I^{2}n-tse-sur'. See Incision, Incisor (2d def.), and Incisura.—**Fibulari'.** See Incisura *fibularis.*

INCISURA (Lat.), n. f. I^{2}n(i^{2}n^2)-si(ke)-su^2(su)'ra^3. From *in*, into, and *cædere*, to cut. Fr., *échancrure.* Ger., *Einkerbung, Incisur.* 1. An incisure. 2. In surgery and botany, an incision. [a, 24.]—**Anterior i.** See *I. anterior.*—**I. acetabuli.** See *Acetabular* notch.—**I. anterior.** The anterior notch of the cerebellum. [I, 17 (K).]—**I. anthelicis.** A shallow fissure in the cartilage of the ear, between the anthelix and the antitragus. [L, 332.]—**I. astragali.** The groove on the posterior aspect of the astragalus for the tendon of the flexor pollicis pedis longus muscle. [L, 332.]—**I. auriculæ (intertragica).** See *I. intertragica.*—**I. auris.** See *I. trago-helicina.*—**I. cancanei.** See *I. astragali.*—**I. cardiaca (pulmonum).** A deep notch in the anterior border of the left lung which receives the apex of the heart. [L, 31, 332.]—**I. cartilaginis thyreoideæ (superior).** See *I. thyreoidea superior.*—**I. cerebelli anterior.** A notch which separates the hemispheres of the cerebellum anteriorly. [I, 3 (K).]—**Incisuræ cerebelli marginales.** See *I. cerebelli posterior* and *I. cerebelli anterior.*—**I. cerebelli marsupialis (seu marsupiiformis, seu posterior).** A cleft which intervenes between the two hemispheres of the cerebellum posteriorly. [I, 3 (K).]—**I. cerebelli semilunaris.** See *I. cerebelli anterior.*—**I. clavicularis (manubrii sterni).** Ger., *Schlüsselbeinausschnitt.* The depressed surface at the upper end of the sternum which articulates with the clavicle. [L, 115.]—**Incisuræ costales.** The notches on each side of the lateral margins of the sternum into which the costal cartilages fit. [L, 332.]—**I. crucialis.** See *Crucial* incision.—**I. digastrica.** See *Digastric* fossa.—**I. ethmoidalis.** See *Ethmoidal* notch.—**I. falciformis.** The external crural ring. [L, 332.]—**I. fibularis (tibiæ).** Ger., *Fibularincisur.* The depression on the lower end of the tibia into which the fibula fits. [L, 31, 332.]—**I. frontalis.** See *Supra-orbital* notch.—**I. habenulæ.** See Trigonum *habenulæ.*—**I. hepatis interlobularis.** The longitudinal fissure of the liver. [L, 135 (a, 39).]—**I. iliaca anterior.** See *I. iliaca minor.*—**I. iliaca inferior.** See *Lesser sciatic* notch.—**I. iliaca major.** Fr., *échancrure interépineuse postérieure.* The hollowed-out margin between the anterior inferior spine of the ilium and the pubic bone. [L, 31, 332.]—**I. iliaca minor.** Fr., *échancrure interépineuse antérieure.* The concave margin between the anterior inferior and superior spines of the ilium. [L, 332.]—**I. iliaca posterior.** See *I. iliaca major.*—**I. iliaca superior (ossis coxæ).** See *Great sciatic* notch.—**I. incisiva.** The groove on the inner surface of the superior maxilla, which, with a corresponding one on its fellow, forms the anterior palatine canal. [L, 31.]—**I. interarytænoidea.** The depression in the larynx between the cartilages of Santorini. [L, 115.]—**I. interclavicularis.** See *Interclavicular* notch.—**I. interlobaris (seu interlobularis) hepatis.** See *Interlobar* notch *of the liver.*—**Incisuræ interlobares (seu interlobulares) pulmonis (seu pulmonum).** The fissures dividing the lungs into lobes. [L, 332.]—**I. intertragica.** A notch in the cartilage of the auricle which separates the tragus from the antitragus. [F.]—**I. ischiadica inferior.** See *Lesser sciatic* notch.—**I. ischiadica major.** See *Great sciatic* notch.—**I. ischiadica minor.** See *Lesser sciatic* notch.—**I. ischiadica superior.** See *Great sciatic* notch.—**I. jugularis.** See *Jugular* notch.—**I. jugularis anterior (seu lateralis).** The anterior of the two portions into which the jugular notch of the temporal bone is divided by the processus infrajugularis partis petrosæ. [L, 31.]—**I. jugularis medialis (seu posterior).** The posterior of the two portions into which the jugular notch of the temporal bone is divided by the processus infrajugularis partis petrosæ. [L, 31.]—**I. lacrimalis.** See Sulcus *lacrimalis.*—**I. lienalis.** See Hilum *of the spleen.*—**I. longitudinalis (cerebri).** See *Great longitudinal* fissure *of the brain.*—**I. lunata scapulæ.** See *Suprascapular* notch.—**I. mandibulæ.** The sigmoid notch of the inferior maxilla. [L, 31.]—**I. marginalis anterior.** See *I. cerebelli anterior.*—**I. marginalis posterior, I. marsupialis.** See *I. cerebelli posterior.*—**I. mastoidea.** See Digastric *fossa.*—**I. maxillæ inferioris.** See *I. mandibulæ.*—**I. nasalis.** See *Nasal* notch *of the frontal bone.*—**I. obturatoria.** A notch in the upper lateral edge of the obturator foramen. [L, 332.]—**I. palatina.** See *Spheno-palatine* notch.—**I. pallii.** Ger., *Manteleinschnitt.* The great longitudinal fissure of the brain. [I, 17 (K).]—**I. parietalis.** A notch just at the junction of the squamous portion of the temporal bone with the upper portion of the mastoid process into which the parietal bone fits. [L, 31, 332.]—**I. patellaris.** See Fossa *intercondyloidea posterior.*—**I. peronea.** See *I. fibularis.*—**I. petroso-squamosa.** See *Petro-squamous* fissure.—**I. posterior cerebelli.** See *I. cerebelli posterior.*—**I. præoccipitalis.** Of Schwalbe (after Meynert), a sulcus which extends between the occipito-temporal and the inferior temporo-sphenoidal lobes of the brain. [I, 17 (K).]—**I. renalis.** See Hilum *of the kidney.*—**Incisuræ sacro-coccygeæ.** The notches formed by the upper surface of the coccyx and the marked depressions of the lateral surfaces of the lower end of the sacrum. [L, 332.]—**I. sacro-ischiadica.** The space between the margins of the ilium and sacrum which is crossed by the great sacro-sciatic foramen. [L, 31.]—**I. Santorini.** See *I. santoriniana major* and *I. santoriniana minor.*—**I. santoriniana major.** The larger of the two fissures in the cartilaginous portion of the external auditory meatus. [L, 332.]—**I. santoriniana minor.** The smaller of the two fissures in the cartilaginous portion of the external auditory meatus. [L, 332.]—**I. scapulæ, I. scapularis.** See *Suprascapular* notch.—**I. semilunaris.** See *I. cerebelli anterior, I. fibularis, I. mandibulæ, Interclavicular* notch, and *Suprascapular* notch.—**I. semilunaris auriculæ.** See *I. intertragica.*—**I. semilunaris cerebelli.** See *I. cerebelli anterior.*—**I. semilunaris lateralis sterni.** See *I. clavicularis.*—**I. semilunaris major (ilii).**—See *I. iliaca major.*—**I. semilunaris major (ulnæ).** See *Great sigmoid* cavity.—**I. semilunaris (mandibulæ).** See *I. mandibulæ.*—**I. semilunaris manubrii sterni.** See *Interclavicular* notch.—**I. semilunaris maxillæ inferioris.** See *I. mandibulæ.*—**I. semilunaris minor (ilii).** See *I. iliaca minor.*—**I. semilunaris minor (ulnæ).** See *Lesser sigmoid* cavity.—**I. semilunaris radii.** See *Semilunar* cavity *of the radius.*—**I. semilunaris scapulæ.** See *Suprascapular* notch.—**I. semilunaris sterni.** See *Interclavicular* notch.—**I. semilunaris superior scapulæ.** See *Suprascapular* notch.—**I. semilunaris superior sterni.** See *Interclavicular* notch.—**I. semilunaris tibiæ.** See *I. fibularis.*—**I. septi (cerebri).** The fifth ventricle of the brain. [I, 6 (K).]—**I. sigmoidea.** See *I. mandibulæ.*—**I. sigmoidea major.** See *Great sigmoid* cavity.—**I. sigmoidea mandibulæ.** See *I. mandibulæ.*—**I. sigmoidea minor (ulnæ).** See *Lesser sigmoid* cavity.—**I. sphenopalatina.** See *Spheno-palatine* notch.—**I. sternalis.** See *Interclavicular* notch.—**I. supra-orbitalis.** See *Supra-orbital* notch.—**I. suprascapularis.** See *Suprascapular* notch.—**I. tali.** See *I. astragali.*—**I. temporalis.** The subtemporal fissure. [I, 17 (K).]—**I. tentorii.** See *Posterior transverse* fissure.—**I. tentorii cerebelli.** The oval opening in the tentorium in which the pons and lower portions of the corpora quadrigemina lie. [L, 332.]—**I. terminalis** [Schwalbe]. A notch in the cartilage of the pinna at the bottom of the cavity of the concha. [L, 117 (a, 29).]—**Incisuræ thyreoideæ inferiores.** Three shallow notches in the lower margin of the thyreoid cartilage, one in the middle and one on each side, the latter separated from the former by the cricoid processes. [L, 332.]—**I. thyreoidea inferior media.** The notch in the lower margin in the median line of the thyreoid cartilage. [L, 332.]—**I. thyreoidea superior.** The notch in the median line in the upper margin of the thyreoid cartilage. [L, 332.]—**I. tragica.** See *I. intertragica.*—**I. trago-helicina.** A fissure in the concha of the ear between the tragus and the helix. [L, 332.]—**Incisuræ tympanicæ.** See Notches *of Rivinus.*—**I. ulnaris radii.** See *Lesser sigmoid* cavity.—**I. umbilicalis.** See *Umbilical* fissure.—**I. umbilicalis hepatis.** See *Interlobar* notch *of the liver.*—**Incisuræ vertebrales.** See *Intervertebral* notches.—**I. vertebralis inferior (seu major).** The intervertebral notch

in the lower margin of the articular process of a vertebra. [L, 31.]—**I. vertebralis minor** (seu **superior**). The intervertebral notch in the upper margin of the articular process of a vertebra. [L, 31.]—**I. vesicæ felleæ, I. vesicalis hepatis.** A notch or depression in the anterior margin of the liver, near the gall-bladder. [L, 31.]—**I. vomeris.** The depression between the alæ vomeris which receives the rostrum of the sphenoid bone. [L, 31, 332.]

INCISURE, n. I^{2}n-si′zhu^{2}r. Lat., *incisura* (from *in*, into, and *cædere*, to cut). Fr., *i.* Ger., *Incisur.* A notch, depression, or fissure (see also INCISURA); in botany, see INCISION.—**I's of Schmidt.** Fr., *i's de Schmidt* (ou *obliques*). Ger., *Lantermann'sche Einkerbungen.* The oblique markings sometimes seen in the medullary sheath of nerves. [J.] See *Medullary* SEGMENTS.

INCISUS (Lat.), adj. I^{2}n(i^{2}n^2)-si(ke)′su^{3}s(su^{4}s). See INCISED; as a n., see INCISION.

INCITABLE, adj. I^{2}n-sit′a^2-b'l. Lat., *incitabilis* (from *incitare*, to set in rapid motion). Ger., *aufregend.* See IRRITABLE.

INCITABILITY, n. I^{2}n-sit-a^2-bi^{2}l′i^{2}t-i^2. From *incitare*, to urge forward. Fr., *incitabilité.* Ger., *Erregbarkeit.* See IRRITABILITY.

INCITAMENTUM (Lat.), n. n. I^{2}n(i^{2}n^2)-sit(ket)-a^3-me^{2}nt′u^{3}m-(u^{4}m). From *incitare*, to set in rapid motion. See STIMULUS.

INCITANT, adj. I^{2}n-sit′a^{2}nt. Lat., *incitans* (from *incitare*, to set in rapid motion). Fr., *i.* Ger., *reizend.* See STIMULANT.

INCITATION, n. I^{2}n-si-ta′shu^{3}n. Lat., *incitatio* (from *incitare*, to urge forward). See STIMULATION.

INCITING, adj. I^{2}n-sit′i^{2}n^2. See STIMULANT.

INCITO-MOTOR, adj. I^{2}n-sit′o-mo′to^{2}r. See EXCITO-MOTOR.

INCLAVATA (Lat.), n. n. pl. I^{2}n-kla(kla^3)-va(wa^3)′ta^3. Of Carnoy, objects contained in cells and formed by the activity of the protoplasm, such as starch, fat, etc. [J, 15.]

INCLAVATIO (Lat.), n. f. I^{2}n^2-kla(kla^3)-va(wa^3)′shi^2(ti^2)-o. Gen., *-on'is.* From *in*, into, and *clavus*, a nail. See GOMPHOSIS.

INCLINAISON (Fr.), n. A^{2}n^2-kle-ne^2-so^{2}n^2. See INCLINATION.—**I. du bassin.** See INCLINATION *of the pelvis.*

INCLINANT, INCLINATE, adj's. I^{2}n^2-klin′a^{2}nt, -at. See INCLINING.

INCLINATIO (Lat.), n. f. I^{2}n^2-kli^2(kle)-na(na^3)′shi^2(ti^2)-o. Gen., *-on'is.* See INCLINATION.—**I. cœli.** Climate. [L, 50 (α, 14).]—**I. pelvis.** See INCLINATION *of the pelvis.*—**I. uteri.** See INCLINATION *of the uterus.*

INCLINATION, n. I^{2}n^2-kli^2-na′shu^{3}n. Lat., *inclinatio.* Fr., *inclinaison* (1st def.), *i.* (2d def.). Ger., *Neigung.* 1. A leaning, inclining. 2. A propensity.—**Backward i. of the pelvis.** Fr., *inclinaison du bassin en arrière, obliquité postérieure* (ou *rétroversion*) *du bassin.* A pathological diminution of the normal forward i. of the pelvis. [A, 15.]—**Forward i. of the pelvis.** Fr., *inclinaison du bassin en avant, obliquité antérieure* (ou *antéversion*) *du bassin.* A pathological exaggeration of the normal forward i. of the pelvis. [A, 15].—**I. of the brim of the pelvis.** Fr., *inclinaison du détroit supérieur du bassin.* Ger., *Neigung des Beckeneinganges.* The angle formed by the highest antero-posterior diameter of the pelvis with the horizon, the subject standing.—**I. of the outlet of the pelvis.** Fr., *inclinaison du détroit inférieur du bassin.* Ger., *Neigung des Beckenausganges.* The angle formed by the lowest antero-posterior diameter of the pelvis with the horizon, the subject standing.—**I. of the pelvis.** Lat., *inclination pelvis.* Fr., *inclinaison du bassin.* Ger., *Neigung des Beckens, Beckenneigung.* The deviation of any particular plane of the pelvis (generally the plane of the outlet) from the horizon.—**I. of the uterus.** Lat., *inclinatio uteri.* Ger., *Fruchthalterneigung.* Obliquity of the uterus. [α, 14.]—**Lateral i. of the pelvis.** Fr., *inclinaison latérale du bassin.* A lateral obliquity of the pelvis.—**Lateral i. of the uterus.** Fr., *inclinaison latérale de l'utérus.* Ger., *Seitwärtslagerung des Uterus.* Lateral obliquity of the uterus.

INCLINED, INCLINING, adj's. I^{2}n-klind′, i^{2}n-klin′i^{2}n^2. Lat., *inclinatus, inclinans* (from *inclinare*, to incline). Fr., *incliné.* Ger., *geneigt* (1st def.). *einwärtsgeneigt* (2d def.). 1. Oblique, slanting. 2. Bending from without inward, incurved. [B, 1, 19, 123 (α, 14).]

INCLUDED, adj. I^{2}n-klu^{2}d′e^{2}d. Lat., *inclusus* (from *includere*, to shut up). Fr., *inclus.* Ger., *eingeschlossen* (1st def.). *hervortretend, hervorstehend* (2d def.). 1. Inclosed within the substance or hollow of another organism or organ. 2. Not exserted. [B, 1, 19, 123, 291 (α, 24).]

INCLUSIO (Lat.), n. f. I^{2}n^2-klu^2(klu)′si^2-o. Gen., *-on'is.* See INCLUSION.—**I. abdominalis.** A teratoma of the abdomen the sac of which may or may not be intimately connected with the tissues of the abdominal organs. [G. St.-Hilaire (α, 40).]—**I. cerebralis.** A teratoma of the brain. [α, 40.]—**I. fœtalis.** See *Fœtal* INCLUSION.—**I. mediastinalis.** A teratoma of the mediastinum. [α, 40.]—**I. ovarii.** A teratoma of the ovary prior to the age of conception. [G. St.-Hilaire (α, 40).]—**I. subcutanea.** Fr., *inclusion sous-cutanée.* A teratoma situated just beneath the skin. [G. St.-Hiliare (α, 40).]—**I. testiculi.** A teratoma encysted in the parenchyma of the testicle or between it and the tunica vaginalis propria. [G. St.-Hilaire (α, 40).]

INCLUSION, n. I^{2}n-klu^2′zhu^{3}n. Lat., *inclusio* (from *includere*, to shut up). Fr., *i.* Ger., *Einschliessung.* A shutting of one thing within another, also the state of being so shut in; in the pl., of Carnoy, see INCLAVATA.—**Fœtal i.** Lat., *inclusio fœtalis.* Fr., *i. fœtale.* The i. of a more or less rudimentary fœtus within another fœtus (fœtus in fœtu) or within a more developed individual, especially where the included fœtus lies free beneath the skin. [Braune (A, 15).] See also FŒTUS *inclusus.*—**I. des germes** (Fr.). The doctrine of the production of species by independent creation, as opposed to Darwinism (*q. v.*). [M. Duval, "Progr. méd.," June 9, 1883, p. 457.]

INCOAGULABLE, adj. I^{2}n-ko-a^{2}g′u^{2}l-a^2-b'l. From *in* neg., and *coagulare*, to curdle. Not coagulable. [α, 4.]

INCOCTUS (Lat.), adj. I^{2}n-ko^{2}k′tu^{3}s(tu^{4}s). From *in* neg., and *coquere*, to cook. Ger., *ungekocht.* Ill-concocted, crude (said of the humors). [A, 322.]

INCOERCIBILITY, n. I^{2}n-ko-u^{5}rs-i^2-bi^{2}l′i^{2}t-i^2. Fr., *incoercibilité.* Ger., *Unsperrbarkeit.* The state of being incoercible.

INCOERCIBLE, adj. I^{2}n-ko-u^{5}rs′i^2-b'l. From *in* neg., and *coercere*, to restrain. Fr., *i.* Ger., *unsperrbar, unzähmbar.* 1. Not capable of coercion (said of certain gases or fluids until recently supposed incapable of being made to take the liquid or solid form). 2. Of vomiting and other disorders, uncontrollable. [L, 30, 41, 49 (α, 14).]

INCOHERENCE, n. I^{2}n-ko-her′e^{2}ns. Lat., *incohærentia.* Fr., *incohérence.* Ger., *Inkohärenz.* The state of being incoherent.

INCOHERENT, adj. I^{2}n-ko-her′e^{2}nt. Lat., *incohærens* (from *in* neg., and *cohærere*, to cling together). Fr., *incohérent.* Ger., *inkohärent.* Disconnected; of speech, rambling, without logical sequence in the words. [α, 14.]

INCOLOR (Lat.), adj. I^{2}n^2′ko^{2}l-o^{2}r. From *in*, neg., and *color*, color. Fr., *incolore.* Ger., *unfarbig, farblos, ungefärbt.* See ACHROMATISTOUS.

INCOLORATION, n. I^{2}n-ku^{3}l-u^{3}r-a′shu^{3}n. Fr., *i.* Colorlessness. Cf. ACHROMATOSIS.

INCOLOROUS, adj. I^{2}n-ku^{3}l′u^{3}r-u^{3}s. See ACHROMATISTOUS.

INCOLUMIS (Lat.), adj. I^{2}n^2-ko^{2}l′u^2(u^4)-mi^{2}s. Ger., *unversehrt, unbehindert.* Not abortive, not obliterated, unchecked in growth, sound, entire (said of plants or their organs). [B, 123 (α, 24).]

INCOMBANT (Fr.), adj. A^{2}n^2-ko^{2}n^2-ba^{3}n^2. See INCUMBENT.

INCOMBUSTIBILITY, n. I^{2}n-ko^{2}m-bu^{3}st-i^2-bi^{2}l′i^2-ti^2. Fr., *incombustibilité.* Ger., *Unverbrennlichkeit.* The quality of being incombustible.

INCOMBUSTIBLE, adj. I^{2}n-ko^{2}m-bu^{3}st′i^2-b'l. From *in* neg., and *comburere*, to burn up. Fr., *i.* Ger., *unverbrennlich.* Incapable of combustion.

INCOMPATIBILITY, n. I^{2}n-ko^{2}m-pa^{2}t-i^2-bi^{2}l′i^{2}t-i^2. Fr., *incompatibilité.* Ger., *Unverträglichkeit.* The quality of being incompatible.

INCOMPATIBLE, adj. I^{2}n-ko^{2}m-pa^{2}t′i^2-b'l. From *in* neg., and *compati*, to suffer in company with. Fr., *i.* Ger., *unverträglich.* 1. Incapable of existing together. 2. Of drugs, having qualities which do not admit of mixture with certain other drugs without rendering the compound inert, injurious, or otherwise objectionable.

INCOMPETENCE, INCOMPETENCY, n's. I^{2}n-ko^{2}m′pe^2-te^{2}ns, -te^{2}ns-i^2 Lat., *incompetentia* (from *incompetere*, to be insufficient). Fr., *insuffisance.* Ger., *Unfähigkeit.* Structural or functional inadequacy.—**Aortic i.** A term for all the conditions which prevent complete closure of the aortic valve, and permit regurgitation of the blood from the aorta into the left ventricle during the ventricular diastole. [D, 68.]—**Mental i.** In law, such mental unsoundness as would disqualify a man for making a testament or managing affairs. [α, 40.]—**Mitral i.** See *Mitral* INSUFFICIENCY.

INCOMPETENT, adj. I^{2}n-ko^{2}m′pe^{2}t-e^{2}nt. Lat., *incompetens.* Fr., *insuffisant.* Ger., *unfähig.* Incapable, affected with incompetence.

INCOMPLETE, adj. I^{2}n-ko^{2}m-plet′. Lat., *incompletus* (from *in* neg., and *complere*, to fill up). Fr., *incomplet.* Ger., *unvollständig.* Imperfect, lacking some part, partial. The *Incompletæ* (Fr., *incomplètes*) are: Of Gmelin, a class of plants consisting of the genera *Hippuris, Salicornia, Daphne, Parietaria, Polygonum, Cannabis, Rhamnus*, and many others; of Scopoli, a tribe of plants comprising the *Crustaceæ, Filamentosæ*, and *Fuci*; of Lamarck, a class of plants consisting of the divisions *Thalamiflores, Caliciflores, Diclynes*, and *Gynandres*; of Batsch, a class of plants including the orders *Culmales, Agrostales, Spadicales, Juliferæ, Cocciferæ, Seminiferæ*, and *Nuciferæ*; of Reichenbach, a formation of the *Venosæ*, consisting of the families *Amentaceæ, Urticaceæ*, and *Nyctagineæ*, or, subsequently, the families *Myricaceæ, Amentaceæ*, and *Urticaceæ*; of Lindley, a subclass of *Exogenæ*, including the cohorts *Tubiferæ, Curvembryæ, Rectembryæ, Achlamydeæ*, and *Columniferæ*; of Fries, a series of dicotyledons consisting of the classes *Bracteifloræ, Julifloræ*, and *Nudifloræ.* [B, 1, 19, 77, 104, 123, 170 (α, 24).]

IMCOMPRESSIBILITY, n. I^{2}n-ko^{2}m-pre^{2}s-i^2-bi^{2}l′i^{2}t-i^2. From *in*, not, and *comprimere*, to squeeze together. Fr., *incompressibilité.* Ger., *Unzusammendrückbarkeit.* The quality of being incompressible.

INCOMPRESSIBLE, adj. I^{2}n-ko^{2}m-pre^{2}s′i^2-b'l. Fr., *i.* Ger., *unzusammendrückbar.* Incapable of being compressed; of the pulse, so forcible that the artery can not be compressed without the use of excessive pressure.

INCONCOCTION, n. I^{2}n-ko^{2}n-ko^{2}k′shu^{3}n. From *in* neg., and *concoquere*, to cook together. The state of not being duly concocted (in the sense employed by the humoralists).

INCONDENSABILITY, n. I^{2}n-ko^{2}n-de^{2}ns-a^3-bi^{2}l′i^{2}t-i^2. From *in* neg, and *condensare*, to press close together. Ger., *Unverdichtbarkeit.* The quality of being incondensable.

INCONDENSABLE, adj. I^{2}n-ko^{2}n-de^{2}ns′-a^2-b'l. Fr., *i.* Ger., *unverdichtbar.* Incapable of undergoing condensation. [B.]

INCONGRUENCE, INCONGRUITY, n's. I^{2}n-ko^{2}n'gru^2-e^{2}ns, -ko^{2}n-gru^2'i^{2}t-i^2. From *in* neg., and *congruere*, to run together. Fr., *incongruité*. Ger., *Incongruenz*. Lack of correspondence, or of harmony.—**Copulative i.** See *Relative* STERILITY.—**I. of the retinæ, Retinal i.** Fr., *incongruité de la rétine*. Ger., *Netzhautincongruenz*. A supposed condition, assumed to be due to a congenital anomaly, in which that region of the retina of a squinting eye which should see single and simultaneously with the corresponding region of the retina of the centrally fixing eye is situated eccentrically in consequence of the squint. This assumed condition does not exist. [F.]

INCONSCIENT, adj. I^{2}n-ko^{2}n'she^{2}nt. From *in* neg., and *conscire*, to know. Fr., *i.* Done unconsciously or impulsively (said of muscular action, etc.). [A, 385.]

INCONSPICUOUS, adj. I^{2}n-ko^{2}n-spi^{2}k'u^2-u^{3}s. Lat., *inconspicuus* (from *in* neg., and *conspicere*, to look at attentively). Ger., *unmerklich*, *unansehnlich*. Not conspicuous. The *Inconspicuæ* of Reichenbach are a formation of the *Rigidifoliæ*, containing the families *Equisetaceæ*, *Taxeæ*, and *Santaleæ* (subsequently the *Equisetaceæ*, *Taxineæ*, and *Santalaceæ*). [B, 170 (*a*, 24).]

INCONSTANT, adj. I^{2}n-ko^{2}n'sta^{2}nt. Lat., *inconstans* (from *in* neg., and *constare*, to stand together). Fr., *variable*. Ger., *veränderlich*. Not constant, changeable.

INCONTINENCE, n. I^{2}n-ko^{2}n'ti^{2}n-e^{2}ns. Lat., *incontinentia* (from *in* neg., and *continere*, to hold together). Fr., *i.* Ger., *Unenthaltsamkeit*, *Incontinenz*. Inability to control those conditions which are ordinarily controllable in a condition of health (*e. g.*, the discharge of fæces or of urine). [D, 1, 70.]—**I. du ventre** (Fr.). See *I. of fæces*.—**I. of fæces.** Lat., *incontinentia alvi*. Fr., *i. du ventre*. Inability to control the discharge of fæces. [A, 326 (*a*, 21).]—**I. of urine.** Lat., *incontinentia urinæ*. Fr., *i. d'urine*. Ger., *Harnfluss*. Uncontrollable micturition. [A, 326 (*a*, 21).]—**I. par regorgement** (Fr.). See INCONTINENTIA *urinæ paradoxa*.—**I. vraie** (Fr.). Unconscious, involuntary dribbling of the urine, due to paralysis or inactivity of the sphincter vesicæ. [L, 88 (*a*, 40).]

INCONTINENTIA (Lat.), n. f. I^{2}n^2-ko^{2}n-ti^{2}n-e^{2}n'shi^2(ti^2)-a^3. See INCONTINENCE.—**I. alvi.** See INCONTINENCE *of fæces*.—**I. seminis.** See SPERMATORRHŒA.—**I. urinæ.** See INCONTINENCE *of urine*.—**I. urinæ paradoxa.** Fr., *incontinence par regorgement*. Dribbling of urine from over-distention of the bladder. [A, 326 (*a*, 21).]—**I. vulvæ.** See GARRULITAS *vulvæ*.

INCO-ORBICULAR, adj. I^{2}n''ko-o^{2}r-bi^{2}k'u^2-la^{3}r. From *incus*, an anvil, and *orbiculus*, a small disc. Fr., *inco-orbiculaire*. Ger., *amboss-orbicular*. Pertaining to the incus and to the orbicular bone.

INCO-ORDINATE, adj. I^{2}n-ko-o^{2}rd'i^{2}n-at. From *in* neg., *cum*, with, and *ordinare*, to arrange. Not co-ordinate; wanting in the power of co-ordination. [D.]

INCO-ORDINATION, n. I^{2}n-ko-o^{2}rd-i^{2}n-a'shu^{3}n. Lat., *incoordinatio*. Fr., *i.* Ger., *Unzusammenwirkung*. Want of harmony between the action of the mind and will on the one hand, and that of the muscular system on the other; irregularity of muscular action, so that movements designated by the will are made awkwardly and without precision.—**Locomotor i.-o.** I.-o. manifested in the muscles of locomotion, as in drunkenness or locomotor ataxia. [D.]

INCORONATE, adj. I^{2}n-ko^{2}r'on-at. Lat., *incoronatus* (from *in* neg., and *coronare*, to crown). Fr., *incouronné*. Ger., *ungekrönt*. In botany, destitute of a coronet or crown. [*a*, 24.] Cf. CORONATE (1st def.).

INCORPORATION, n. I^{2}n-ko^{2}rp-o^{2}r-a'shu^{3}n. Lat., *incorporatio* (from *incorporare*, to fashion into a body). Fr., *i.* Ger., *I.*, *Einkörperung*, *Einverleibung*, *Mischung*. In pharmacy, the process of blending different ingredients into a uniform mass. [B, 38, 48, 78, 93 (*a*, 14).]

INCOURONNÉ (Fr.), adj. A^{2}n^2-ku-ro^{3}n-na. See INCORONATE.

INCRASSANS (Lat.), adj. I^{2}n^2-kra^{2}s(kra^{3}s)'sa^{2}nz(sa^{3}ns). From *incrassare*, to make thick. Fr., *incrassant*. Ger., *verdickend*. Thickening, giving consistence; as a n., a medicine supposed to thicken the animal liquids. [B, 38, 48, 78, 88, 93 (*a*, 14, 39).]

INCRASSATE, adj. I^{2}n-kra^{2}s'at. Lat., *incrassatus*. Fr., *épaissi* (1st def.), *épais* (2d def.). Ger., *verdickt* (1st def.), *dick* (2d def.). 1. Thickened. 2. Thicker than usual, or thick in proportion to its area. [B, 1, 19, 123 (*a*, 24).] Cf. CRASSUS.

INCRASSATING, adj. I^{2}n-kra^{2}s'at-i^{2}n^2. See INCRASSANS.

INCRASSATION, n. I^{2}n-kra^{2}s-a'shu^{3}n. Lat., *incrassatio*. Fr., *i.* Ger., *Verdickung*. Inspissation. [L, 30, 41, 50 (*a*, 14).]

INCREMATION, n. I^{2}n-kre^{2}m-a'shu^{3}n. See CREMATION.

INCREMENT, n. I^{2}n'kre^2-me^{2}nt. Lat., *incrementum* (from *increscere*, to grow). Fr., *incrément*. Ger., *Zunahme*, *Wachsthum*. 1. Growth, increase. 2. The amount by which a thing increases. [L, 30. 41, 49, 50 (*a*, 14).]

INCREMENTAL, adj. I^{2}n-kre^2-me^{2}n't'l. Pertaining to increment. [C.]

INCREMENTUM (Lat.), n. n. I^{2}n-kre^2(kra)-me^{2}nt'u^{3}m(u^{4}m). See INCREMENT.—**Incrementa fibrosa.** The transverse fibres uniting the posterior pair of the corpora quadrigemina. [I, 3.]

INCRESCENT, adj. I^{2}n-kre^{2}s'e^{2}nt. From *increscere*, to grow. In botany, growing. [*a*, 24.]

INCRUCIATIO (Lat.), n. f. I^{2}n^2-kru^2(kru)-si^2(ki^2)-a(a^3)'shi^2-(ti^2)-o. Gen., *-o'nis*. From *in*, into, and *crux*, a cross. Ger., *Durchkreuzung*. Decussation. [I, 3 (K).]—**I. nervorum opticorum.** See CHIASM.

INCRUSTATE, adj. I^{2}n-kru^{3}st'at. See INCRUSTED.

INCRUSTATION, n. I^{2}n-kru^{3}st-a'shu^{3}n. Lat., *incrustatio*. Fr., *i.* Ger., *I.*, *Bekrustung*, *Ueberschorfung*. 1. The act of incrusting; also the state of being incrusted. 2. The material forming a crust.

INCRUSTED, adj. I^{2}n-kru^{3}st'e^{2}d. Lat., *incrustatus* (from *incrustare*, to incrust). Fr., *incrusté*. Ger., *inkrustirt*. 1. Covered as with a coat or rind (applied to seeds growing so close to the pericarp as to appear to have but one integument). 2. Covered or coated with earthy or mineral matter. [B, 1, 19, 114, 123 (*a*, 24).]

INCRUSTING, adj. I^{2}n-kru^{3}st'i^{2}n^2. Lat., *incrustans*. Fr., *incrustant*. Forming a crust. The *Incrustantes* of Nards are a family of crustaceous *Algæ*, belonging to the *Titanoideæ*. [B, 19, 170 (*a*, 24).]

INCUBATION, n. I^{2}n-ku^2-ba'shu^{3}n. Lat., *incubatio* (from *incubare*, to lie upon anything). Fr., *i.*, *couvage*, *couvaison*. Ger., *I.*, *Bebrütung*, *Brüten*. It., *incubazione*. Sp., *incubación*. 1. The process of development of a fecundated ovum; usually the process by which birds hatch their eggs by applying to them the heat of their own body. 2. The time from the moment of infection to the outbreak of the first symptoms of an infectious disease. [A, 326 (*a*, 21).]—**External i.** I. (1st def.) after the expulsion of the egg from the maternal organism, as in the *Ovipara*. [L.]—**First i. of syphilis.** The period elapsing between the time of inoculation of the syphilitic virus and the first appearance of the initial lesion, usually from fifteen to twenty days, though not infrequently a month and sometimes longer. [G.] Cf. *Second i. of syphilis*.—**I. chirurgicale** (Fr.). The latent period in the development of surgical affections. [B, 46 (*a*, 39).]—**I. of syphilis.** See *First i. of syphilis* and *Second i. of syphilis*.—**Internal i.** I. (1st def.) within the maternal organism, as in the *Vivipara*.—**Period of i.** See *I.* (2d def.).—**Second i. of syphilis.** The period elapsing between the first appearance of the primary lesion and the first manifestations of constitutional or secondary syphilis, usually from forty to fifty days. [G.]

INCUBATIVE, adj. I^{2}n'ku^2-ba-ti^{2}v. Pertaining to incubation.

INCUBATOR, n. I^{2}n'ku^2-bat-o^{2}r. From *incubare*, to hatch. An apparatus for maintaining objects at a uniform temperature, as in the artificial hatching of eggs. See COUVEUSE.—**Tarnier's i.** See COUVEUSE.—**I. for bacteria.** An i. for bacterial culture, consisting of a rectangular chest, having a glass front, and provided with a water-jacket, a lamp or a gas-jet, and an automatic thermo-regulator for maintaining the desired temperature. [Cruikshank (*a*, 39).]

INCUBATORY, adj. I^{2}n'ku^2-ba^{2}t-o-ri^2. Pertaining to incubation or to the period of incubation. [D.]

INCUBE (Fr.), adj. A^{2}n^2-ku^{6}b. See INCUBOUS.

INCUBITIO (Lat.), **INCUBITUS** (Lat.), n's f. and m. I^{2}n-ku^2(ku^4)-bi^{2}sh(bi^{2}t)'i^2-o, -ku^{2}b(ku^{4}b)'i^{2}t-u^{3}s(u^{4}s). Gen., *-on'is*, *-cub'itus*. See INCUBATION.

INCUBO (Lat.), n. m. I^{2}n^2'ku^2(ku^4)-bo. Gen., *-on'is*. See INCUBUS.

INCUBOUS, adj. I^{2}n^2'ku^2-bu^{3}s. Lat., *incubus* (from *incubare*, to lie upon). Fr., *incube*. Imbricated from below (said of *Jungermanniaceæ*, in which the leaves are imbricated over each other from the base toward the apex). [B, 19, 123 (*a*, 24).] Cf. SUCCUBOUS.

INCUBUS (Lat.), n. m. I^{2}n^2'ku^2(ku^4)-bu^{3}s(bu^{4}s). From *incubare*, to lie upon. Gr., ἐφιάλτης. Fr., *cauchemar*. Ger., *Alpdrücken*, *Nachtmännchen*, *Trute*. It., Sp., *incubo*. 1. Originally, a male demon that was supposed to attack women in their sleep, lying on them and causing nightmare. The female demon that attacked men was called Succuba. 2. Nightmare; the assemblage of sensations formerly attributed to an attack by i. (1st def.) or Succuba. It consists of some frightful dream associated with sensations of physical distress, chiefly that of oppression, as from a weight on the chest, and that of inability to escape or cry out. It ends in a loud groan and the recovery of consciousness. [A, 385, 528.]—**I. vigilantium.** See DAYMARE.

INCUDAL, adj. I^{2}n-ku^2'd'l. From *incus*, an anvil. Pertaining to the incus.

INCUDEUS (Lat.), n. m. I^{2}n^2-ku^{2}d(kud)'e^2-u^{3}s(u^{4}s). From *incus*, an anvil. The laxator tympani. [L.]

INCUDO-MALLEAL, adj. I^{2}n-ku^2''do ma^{2}l'e^2-a^{2}l. From *incus*, an anvil, and *malleus*, a hammer. Pertaining to the incus and to the malleus.

INCUDO-STAPEDIAL, adj. I^{2}n-ku^2''do-sta^{2}p-ed'i^2-a^{2}l. For deriv., see INCUS and STAPES. Fr., *incudo-stapédial*. Ger., *Amboss-Steigbügel*. Pertaining to the incus and to the stapes.

INCUDO-TYMPANIC, adj. I^{2}n-ku^{2}d''o-ti^{2}m-pa^{2}n'i^{2}k. Pertaining to the incus and to the tympanum.

INCU-MALLEAL, adj. I^{2}n''ku^2-ma^{2}l'e^2-a^{2}l. See INCUDO-MALLEAL.

INCUMBENT, adj. I^{2}n-ku^{3}m'be^{2}nt. Lat., *incumbens* (from *incumbere*, to recline upon). Fr., *incombant*. Ger., *aufliegend*. 1. In botany, leaning or resting upon. An i. anther is one lying against the inner face of the filament. I. cotyledons are those so folded that the back of one is laid against the side of the radicle. [B, 1, 19, 123, 291 (*a*, 24).] 2. In ornithology, depressed or bending down upon something; laid at full length, said chiefly of the hind toe when its whole length rests on the ground or other support, owing to its low insertion. [L, 343.]

INCUNABULA (Lat.), n. n. pl. I^{2}n^2-ku^2(ku)-na^{2}b(na^{3}b)'u^{2}l(u^{4}l)-a^3. Fr., *langes*. Ger., *Wickelband*, *Windel*. Swaddling-clothes, swathing-bands. [A, 312 (*a*, 21); *a*, 45.]

INCUNEATIO (Lat.), n. f. I^{2}n^2-ku^2(ku^4)-ne^2-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is*. From *in*, in, and *cuneare*, to plug. See GOMPHOSIS and IMPACTION.

INCURABILITY, n. I^{2}n-ku^{2}r-a^2-bi^{2}l'i^{2}t-i^2. Fr., *incurabilité.* Ger., *Unheilbarkeit.* The state of being incurable.

INCURABLE, adj. I^{2}n-ku^{2}r'a^2-b'l. Lat., *incurabilis.* Fr., *i.* Ger., *unheilbar.* Not capable of being cured or healed. [L, 50, 107 (a, 14).]

INCURRENS (Lat.), adj. I^{2}n^2-ku^{5}r(ku^{4}r)'re^{2}nz(rans). Ger., *anlaufend.* From *incurrere*, to run into. See INCUBOUS. [a, 45.]

INCURSUS (Lat.), n. m. I^{2}n-ku^{5}r(ku^{4}r)'su^{3}s(su^{4}s). Gen., *-curs'us.* From *incurrere*, to run into. Ger., *Andrang, Anlauf.* A sudden impulse. [L, 50 (a, 14); a, 45.]—**I. arteriæ.** An arterial pulsation. [A, 322.]

INCURVATE, adj. I^{2}n-ku^{5}r'vat. See INCURVED.

INCURVATIO (Lat.), n. f. I^{2}n^2-ku^{5}r(ku^{4}r)-va(wa^3)'shi^2(ti^2)-o. Gen., *-on'is.* See INCURVATION.—**I. manus.** See CHEIROCYRTOSIS.

INCURVATION, n. I^{2}n-ku^{5}r-va'shu^{3}n. Lat., *incurvatio* (from *incurvare*, to bend). Fr., *i.* Ger., *Einwärtsbiegung, Krümmung.* It., *incurvatura.* Sp., *encorvadura.* The production of a curvature, also the state of being curved. [L, 107.]

INCURVED, adj. I^{2}n-ku^{5}rvd'. Lat., *incurvatus, incurvus.* Fr., *incurvé, courbé en dedans.* Ger., *aufwärtsgekrümmt, einwärtsgekrümmt.* Incurvate, curved inward, bending from without inward. [B, 1, 19, 123 (a, 24).]

INCURVO-RECURVED, adj. I^{2}n-ku^{5}rv"o-re-ku^{5}rvd'. From *incurvare*, to bend, and *recurvare*, to bend backward. Curving inward and then backward. [a, 35.]

INCUS (Lat.), n. f. I^{2}n^{2}k'u^{3}s(u^{4}s). Gen., *-cud'is.* From *incudere*, to forge with the hammer. Fr., *enclume.* Ger., *Amboss.* Lit., an anvil. 1. The second bone in the chain of ossicles of the middle ear. It has a body which resembles the crown of a molar tooth: two processes—the short, which points backward toward the entrance to the mastoid process, and the long, which, slightly bent in a direction almost parallel with the handle of the malleus, points downward and backward. On the long process there is the processus lenticularis, which articulates with the stapes. Its body is connected with the head of the malleus by a movable joint. [F, 32.]

INCU-STAPEDIC, adj. I^{2}n"ku^2-sta-pe'di^{2}k. See INCUDO-STAPEDIAL.

INCU-TYMPANIC, adj. I^{2}n"ku^2-ti^{2}m-pa^{2}n'i^{2}k. See INCUDO-TYMPANIC.

INDAGATION, n. I^{2}n-da^{2}g-a'shu^{3}n. Lat., *indagatio* (from *indagare*, to trace out). An investigation, especially a digital examination by the vagina. [P. F. Mundé.]

INDECIDUOUS, adj. I^{2}n-de^{2}s-i^{2}d'u^2-u^{3}s. From *in* neg., and *deciduus*, falling down. Not deciduous. [a, 35.]

INDECIDUATE, adj. I^{2}n-de-si^{2}d'u^2-at. Lat., *indeciduatus* (from *in* neg., and *deciduus*, falling). Having the placenta not deciduate. The *Indeciduata* of Haeckel are a class of mammals including the *Ungulata* and *Cetemorpha*, in which at birth the placenta fœtalis, or "embryonic cake," is alone removed, the placenta uterina, or "matenal cake," remaining attached to the walls of the uterus. [L, 146 (a, 39).]

INDECOMPOSABILITY, n. I^{2}n-de-ko^{2}m-poz-a^{2}b-i^{2}l'i^{2}t-i^2. From *in* neg., *de*, from, and *componere*, to place. The state or quality of being indecomposable. [B.]

INDEFINITE, adj. I^{2}n-de^{2}f'i^{2}n-i^{2}t. Lat., *indefinitus* (from *in*, not, and *definire*, to set bounds to). Fr., *indéfini.* Ger., *unbestimmt.* 1. Not definite in number. [B, 1, 19, 123 (a, 24).] 2. See INDETERMINATE.

INDEHISCENCE, n. I^{2}n-de-hi^{2}s'e^{2}ns. Lat., *indehiscentia* (from *in*, not, and *dehiscere*, to part). Fr., *indéhiscence.* Ger., *Unaufspringen.* The character of not opening at maturity. [B, 1 (a, 24).]

INDEHISCENT, adj. I^{2}n-de-hi^{2}s'e^{2}nt. Lat., *indehiscens.* Fr., *indéhiscent.* Ger., *unaufspringend.* Characterized by indehiscence. [B, 1, 19 (a, 24).]

INDÉLIBROME (Fr.), n. A^{2}n^2-da-le-brom. A crystallizable substance, $C_{16}H_8Br_4N_3O_4$, formed by the action of bromine on isamic acid; yellow, insoluble in water, slightly soluble in alcohol and in ether, and melting at a very high temperature. [B, 93 (a, 14).]

INDENOXYD (Ger.), n. I^{2}n'dan-ox-u^{6}d". Isatic acid. [A, 324.]

INDENTATE, adj. I^{2}n-de^{2}n'tat. Lat., *indentatus* (from *in* neg., and *dentatus*, toothed). Fr., *indenté.* Ger., *ungezähnt.* Not dentate. [B, 1 (a, 24).] See ENTIRE.

INDENTATION, n. I^{2}n-de^{2}n-ta'shu^{3}n. Lat., *indentatio* (from *in*, in, and *dentatus*, toothed). Fr., *i.* Ger., *Verzahnung.* A cut or notch in the margin of anything. [a, 24.]

INDENTED, adj. I^{2}n-de^{2}nt'e^{2}d. Lat., *indentatus.* Fr., *indenté.* Ger., *gezähnt.* Toothed, notched, having indentations. [a, 24.]

INDEPENDENCE, n. I^{2}n-de-pe^{2}nd-e^{2}ns. In botany, the separation of organs usually entire. [B, 308 (a, 35).]

INDEPENDENT, adj. I^{2}n-de-pe^{2}nd'e^{2}nt. From *in*, not, and *dependere*, to hang from. Fr., *indépendant.* Ger., *unabhängig.* Distinct, separate; said of plant-organs which are separate though usually united. [B, 308 (a, 35).]

INDERJOB (Beng.), n. The *Wrightia antidysenterica.* [B, 172 (a, 24).]

INDETERMINATE, adj. I^{2}n-de-tu^{5}rm'i^{2}n-at. Lat., *indeterminatus* (from *in*, neg., and *determinare*, to limit). Fr., *indéterminé.* Ger., *unbestimmt.* Indefinite, uncertain, not limited. [a, 24.] See *I.* INFLORESCENCE.

INDEX (Lat.), n. com. I^{2}n'de^{2}x. Gen., *ind'icis.* From *indicare*, to show. Fr., *indice.* Ger., *Anzeiger.* 1. That which points out or indicates. 2. See *I.* FINGER. 3. In ornithology, the principal digit of the wing, often so called, but really homologous with the third or middle finger of mammals, the pollex or so-called thumb of birds being the homologue of the mammalian i. [L, 343.]—**Antebrachial i.** See *Radio-humeral i.*—**Alveolar i.** Fr., *indice alvéolaire.* See *Gnathic i.*—**Basilar i.** Fr., *indice basilaire.* The ratio of the projection of the portion of the skull on a plane surface anterior to the basion to the projection of the entire skull. [L, 149 (a, 29).]—**Breadth-breadth i.** Ger., *Breitenbreiteni'.* The ratio between the greatest breadth of the skull and the least distance between two corresponding points in the temporal fossæ measured with calipers. [L, 132 (a, 29).]—**Breadth-height i.** The ratio between the maximum breadth and the maximum height of a skull determined by the formula $\frac{100 \times \text{height}}{\text{breadth}}$. [L, 332 (a, 29).]—**Cephalic i.** An i. of the cranium, especially the length-breadth i. [L.]—**Cephalo-facial i.** See *Cerebro-facial i.*—**Cephalo-nasal i.** See *Rhino-cephalic i.*—**Cephalo-orbital i.** Fr., *indice céfalorbitale* (ou *céphalo-orbitaire*, ou *céphalo-orbitale*). Of Mantegazza, the ratio between the capacity of the orbits and that of the skull. [L.]—**Cephalo-orbito-nasal i.** See *Cerebro-facial i.*—**Cephalo-rhachidian i., Cephalo-spinal i.** Fr., *indice céphalo-rhachidien.* Of Mantegazza, the ratio between the area of the occipital foramen, expressed in square millimetres, and the cranial capacity, expressed in cu. ctm., the latter having a constant value of 100. [L, 149 (a, 29).]—**Cerebral i.** The ratio between the greatest transverse and antero-posterior diameters of the brain. [L, 149 (a, 29).]—**Cerebro-facial i.** Fr., *indice cérébro-faciale.* The ratio of the united capacity of the orbits and the nasal fossæ to that of the skull. [L.]—**Cubic cranial i.** Fr., *indice cubique du crane.* The ratio which the cubic capacity of a skull bears to the cubic contents of a solid having for its diameter the greatest antero-posterior transverse and vertical diameter of the skull. [L, 87 (a, 29).]—**Facial i.** Fr., *indice facial.* Ger., *Gesichtsi'.* The ratio between the greatest breadth and the greatest length of the face. [L, 149.]—**Frontal i.** Fr., *indice frontal.* The ratio between the minimum frontal diameter and the maximum transverse diameter of the skull. [L, 149 (a, 29).]—**Fronto-parietal i.** The ratio of the minimum frontal diameter to the maximum breadth of the skull as determined by the formula $\frac{100 \times \text{minimum frontal diameter}}{\text{breadth}}$. ["Arch. f. Anthropol." (a, 29).]—**Gesichtsi'** (Ger.). See *Facial i.*—**Gnathic i.** [Flower]. The ratio between the basialveolar length and the basinasal length (= 100) of a skull. [L, 142.]—**I. of height (of the skull).** The proportion of the height of the skull (measured from the basion to the bregma) to its length. [C.]—**I. of platycnemia.** Fr., *indice de la platycnémie.* The ratio between the antero-posterior diameter and the transverse diameter, the latter having a constant value of 100, of a plane, perpendicular to the long axis of the bone, on a level with the nutrient foramen. [L, 150 (a, 29).]—**I. of refraction.** See *Refractive i.*—**I. of the breadth of the cranium.** See *Cephalic i.*—**I. of the ear.** Fr., *indice de l'oreille.* The ratio of the breadth of the ear to its length, the latter having a constant value of 100. [L, 150 (a, 29).]—**I. of the foramen magnum.** Fr., *indice du tron occipital.* The ratio of the greatest breadth of the foramen magnum to its greatest length. [L, 87 (a, 29).]—**I. of the head.** Fr., *indice de la tête.* The ratio of the maximum height of the face to its maximum diameter. [L, 149 (a, 29).]—**I. of the ramus of the jaw.** Fr., *indice de la branche postérieure de la mandibule.* The ratio of the length of the ramus of the jaw from the gonion to the top of the condyle to the minimum breadth of the ramus measured at right angles to the length. [L, 150 (a, 29).]—**Lateral-corono-Rolandic i.** The distance of the lower extremity of the fissure of Rolando from the coronal suture compared with the distance between the anterior and posterior extremities of the cerebral hemisphere measured over its lateral surface, which latter has a constant value of 100. ["Jour. of Anat. and Physiol.," Oct., 1890, p. 12 (a, 29).]—**Lateral-fronto-Rolandic i.** The distance of the lower extremity of the fissure of Rolando from the anterior end of the cerebrum compared with the distance between the anterior and posterior extremities of the cerebral hemisphere measured over its lateral surface, which latter has a constant value of 100. [*l. c.* (a, 29).]—**Length-breadth i.** The ratio between the maximum length and the maximum breadth of a skull determined by the formula $\frac{100 \times \text{breadth}}{\text{length}}$. [L, 149, 332 (a, 29).]—**Length-height i.** The ratio between the maximum length and the maximum height of a skull determined by the formula $\frac{100 \times \text{height}}{\text{length}}$. [L, 332 (a, 29).]—**Mesial-corono-Rolandic i.** The distance of the upper extremity of the fissure of Rolando from the coronal suture compared with the length of the upper margin of the cerebral hemisphere, which latter has a constant value of 100. [*l. c.* (a, 29).]—**Mesial-fronto-Rolandic i.** The distance of the upper extremity of the fissure of Rolando from the anterior end of the cerebrum compared with the length of the upper margin of the cerebral hemisphere, which latter has a constant value of 100. [*l. c.* (a, 29).]—**Nasal i.** Fr., *indice nasal.* The ratio between the vertical and horizontal diameters of the aperture pyriformis narium. [L, 332 (a, 29).]—**Orbital i.** Fr., *indice orbitaire.* The ratio of the vertical height of the base of the orbit to the transverse width, the latter being expressed as 100. [C, 3; L, 149.] See, also, MEGASEME, MESOSEME, and MICROSEME.—**Palatine i.** The ratio of the maximum breadth of the vault of the palate to its maximum length. [L, 149 (a, 29).]—**Pelvic i.** Fr., *indice pelvien.* The ratio between the antero-posterior and the transverse diameter of the pelvis. [C.]—**Refractive i.** Fr., *indice* (ou *exposant*) *réfractif.* Ger., *Refractionsexponent, Refractionsanzeiger.* The ratio (constant for the same two media) between the sines of the angle of incidence and of the angle of refraction, when a ray of

light passing from one medium to another undergoes deviation. It is usually indicated by the symbol *n*, and when the i. for any one medium is stated without specifying the other, the latter is always understood to be air. [B.]—**Rhino-cephalic i.** Fr., *indice rhinocéphale* (ou *rhinocéphalique*). Of Mantegazza, the ratio of the capacity of the nasal fossæ to the capacity of the skull, the former being expressed by 100. [L.]—**Sacral i.** Fr., *indice sacré.* The ratio of the greatest length of the sacrum to its greatest breadth. [Challenger (*a*, 29).]—**Scapular i.** The ratio between the greatest length and the greatest breadth of the scapula, determined by the formula $\frac{100 \times \text{breadth}}{\text{length}}$. [L, 332 (*a*, 29).]—**Thoracic i.** The ratio between the antero-posterior diameter of the thorax measured at the level of the lower extremity of the sternum and the greatest transverse diameter at the same level. [L, 150 (*a*, 29).]

INDIAN, adj. I^{2}n'di^2-a^{2}n. Lat., *indicus* (from *India*, a country of Asia). Fr., *indien.* Of or pertaining to (1) India and the Indies, or (2) the aborigines of the Western Hemisphere. [*a*, 17.]—**I. bread, I. loaf.** See Tuckahoo.—**I. mourner.** The *Nyctanthes arbor tristis.* [B, 275 (*a*, 24).]

INDIAN-RUBBER, n. I^{2}n''di^2-a^{2}n-ru^{3}b'u^{5}r. See Caoutchouc.

INDIAN SPRINGS, n. I^{2}n''di^2-a^{2}n-spri^{2}n^{2}z'. 1. A place in Butts County, Georgia, where there are springs containing magnesium carbonate and sulphate, potassium and calcium sulphates, carbonic-acid gas, hydrogen sulphide, and nitrogen. 2. A place in Martin County, Indiana, where there are springs containing magnesium and calcium carbonates and sulphates, carbonic-acid gas, hydrogen sulphide, oxygen, nitrogen, etc. [A, 363 (*a*, 21).]

INDIA-RUBBER, n. I^{2}nd''i^2-a^3-ru^{3}b'u^{5}r. See Caoutchouc.—**I.-r. vine.** See Cryptostegia *grandiflora.*

INDICAN, INDICANE, n's. I^{2}n'di^2-ka^{2}n, -kan. Fr., *indican.* Ger., *Indican, Indikan.* A substance, $C_{26}H_{31}NO_{17}$, or $C_8H_7NSO_4$, found in *Isatis tinctoria*, and also in blood, urine, sweat, etc., its antecedent here probably being indol. It forms a yellowish syrup of bitter taste and acid reaction, soluble in water, in alcohol, and in ether, and readily decomposed by heat, acids, etc., into indigotin and indiglycin. In certain diseases it is present in the urine in considerable quantity, and, decomposing spontaneously, produces a blue tint in the latter. [B, 38, 93 (*a*, 14); K.]

INDICANINE, n. I^{2}n-di^2-kan'en. A substance, $C_{20}H_{23}NO_{12}$, formed by the action of alkalies upon indican. [B, 93.]

INDICANT, adj. I^{2}n'di^2-k'nt. Lat., *indicans* (from *indicare*, to point to). Fr., *indiquant.* Ger., *anzeigend.* Indicative, indicating. [A, 322.]

INDICANURIA (Lat.), n. f. I^{2}n-di^{2}k-a^{2}n(a^{3}n)-u^2(u)'ri^2-a^3. An excess of indican in the urine. [B.]

INDICATED, adj. I^{2}n'di^2-kat-e^{2}d. Lat., *indicatus* (from *indicare*, to point out). Fr., *indiqué.* Ger., *angezeigt.* Shown by the signs and symptoms to be proper or necessary to employ (said of therapeutical measures).

INDICATEUR (Fr.), n. A^{2}n^2-de-ka^3-tu^{5}r. 1. See Indicator. 2. See *Index* finger.—**I. sur arc.** An arc-indicator. [B, 121.] See Auxanometer.—**I. sur fil.** A thread-indicator. [B, 121.] See Auxanometer.

INDICATING, adj. I^{2}n'di^2-kat-i^{2}n^2. See Indicant.

INDICATIO (Lat.), n. f. I^{2}n-di^2-ka(ka^3)'shi^2(ti^2)-o. Gen., *-on'is.* See Indication.—**I. causalis.** See *Causal* indication.—**I. curativa.** See *Curative* indication.—**I. febris.** That which indicates what is to be done for a given fever. [*a*, 40.]—**I. hypothetica.** The indication pointing out a course to be pursued upon hypothetical reasoning. [*a*, 40.]—**I. localis.** The i. called for by the local condition as distinguished from that furnished by the underlying general or constitutional condition. [B.]—**I. morbi.** See *Curative* indication.—**I. palliativa.** See *Palliative* indication.—**I. preservativa.** See *Vital* indication.—**I. prophylactica.** See *Prophylactic* indication.—**I. symptomatica.** See *Symptomatic* indication.—**I. topica.** See *I. localis.*—**I. vitalis.** See *Vital i.*

INDICATION, n. I^{2}n-di^2-ka'shu^{3}n. Gr., ἔνδειξις, ἔνδειγμα (2d def.). Lat., *indicatio* (from *indicare*, to point out), *indicatum* (2d def.). Fr., *i.*, *symptome* (1st def.). Ger., *Anzeige, Symptom, Indikation.* 1. A sign or symptom. 2. An inference from a patient's condition, or the grounds for such an inference, as to what is to be done to prevent, cure, or mitigate the disease.—**Accessory i.** See *Symptomatic i.* [*a*, 40.]—**Causal i.** Lat., *indicatio causalis.* An i. for curing a disease by abolishing the cause of its continuance. [Samuel (A, 319 [*a*, 21]).]—**Curative i.** Lat., *indicatio curativa* (seu *morbi*). An i. of measures likely to cure a disease. [Samuel (A, 319 [*a*, 21]).]—**Essential i.** See *Principal i.*—**Palliative i.** Lat., *indicatio palliativa.* An i. of measures likely to palliate a disease. [Samuel (A, 319).]—**Preservative i.** Lat., *indicatio preservativa.* See *Vital i.*—**Principal i.** That symptom which indicates the most important thing to be done under given circumstances. [*a*, 40.]—**Prophylactic i.** Lat., *indicatio prophylactica.* An i. of measures likely to ward off disease, such as removing the causes of infection, isolating the individual, or strengthening his powers of resistance. [Samuel (A, 319 [*a*, 21]).]—**Rational i.** See *Principal i.*—**Symptomatic i.** Lat., *indicatio symptomatica.* An i. of measures for attacking the most prominent symptoms of a disease. [Samuel (A, 319 [*a*, 21]).]—**Therapeutic i.** See *I.* (2d def.).—**Vital i.** Lat., *indicatio vitalis.* An urgent indication for the immediate preservation of life. [A, 88.]

INDICATOR (Lat.), n. m. I^{2}n-di^{2}k-a(a^3)'to^{2}r; in Eng., i^{2}n'-di^{2}k-at-o^{2}r. Gen., *-or'is.* From *indicare*, to point out. Fr., *indicateur* (1st def.). Ger., *Anzeiger.* 1. That which points out; (*a*) in physics, an apparatus or mechanism which, like the hand of a clock, serves to register the progress of a movement or process; (*b*) in chemistry, a substance like litmus, which shows when a chemical change is indicated. [B.] 2. See Extensor *indicis* (*proprius*).—**Arc i.** Fr., *indicateur sur arc.* See Auxanometer.—**Thread-i.** Fr., *indicateur sur fil.* See Auxanometer.

INDICE (Fr.), n. A^{2}n^2-des. See Index.—**I. alvéolaire.** See *Gnathic* index.—**I. basilo-latitudinal.** The ratio between the length of the naso-basilar line and the maximum transverse diameter of the skull, the former having a constant value of 100. ["Rev. d'anthropol.," 1874, p. 244 (*a*, 29).]—**I. basilo-longitudinal.** The ratio between the length of the naso-basilar line and the antero-posterior diameter of the skull, the former having a constant value of 100. ["Rev. d'anthropol.," 1874, p. 244 (*a*, 29).]—**I. basilo-vertical.** The ratio between the length of the naso-basilar line and the maximum vertical diameter of the skull, the former having a constant value of 100. ["Rev. d'anthropol.," 1874, p. 244 (*a*, 29).]—**I. des moyennes.** An index calculated from the average measurements of a number of skulls. [L, 149 (*a*, 29).]—**I. latitudino-basilaire.** The ratio between the length of the naso-basilar line and the maximum transverse diameter of the skull, the latter having a constant value of 100. ["Rev. d'anthropol.," 1874 (*a*, 29).]—**I. longitudino-basilaire.** The ratio between the length of the naso-basilar line and the antero-posterior diameter of the skull, the latter having a constant value of 100. [*a*, 29.]

INDICIUM (Lat.), n. n. I^{2}n-di^{2}s(di^{2}k)'i^2-u^{3}m(u^{4}m). See Index and Indication (2d def.).—**I. simplex.** Ger., *einfache Anzeige.* That which indicates the most obvious course to pursue. [D, 129, p. 30 (*a*, 40).]—**I. universale.** See *Principal* indication.

INDICO, n. I^{2}n'di^2-ko. An old name for indigo. [B, 77 (*a*, 24).]

INDICON (Lat.), **INDICUM** (Lat.), n's n. I^{2}n'di^2-ko^{2}n, -ku^{3}m-(ku^{4}m). Gr., ἰνδικόν. Indigo. [B, 121, 180 (*a*, 24).]

INDICUS (Lat.), adj. I^{2}nd'i^{2}k-u^{3}s(u^{4}s). See Indian.

INDIFFERENT, adj. I^{2}n-di^{2}f'e^{2}r-e^{2}nt. From *indifferens*, in which there is no difference. 1. In embryology, supposed to form some part not specially differentiated; as the ectoderm after the neural plate and the rudiments of the special sense organs have been given off (said of cell, a cell-mass, or cell-layer). ["Amer. Nat.," 1891, p. 335 (J).] 2. In chemistry, little or not at all affected by reagents; also reacting equally and in a similar manner to reagents of opposite character. [B.] 3. In physics, affected in no way by a force which is usually capable of two opposite kinds of action; *e. g.*, a body which is neither attracted nor repelled by a magnet. Neutral; neither positive nor negative. [B.]

INDIFFERENTISM, n. I^{2}n-di^{2}f'e^{2}r-e^{2}nt-i^{2}z'm. In embryology, not becoming specially differentiated or capable of differentiating in all directions. ["Amer. Nat.," 1891 (J, 55).]

INDIFULVIN, n. I^{2}n-di^2-fu^{3}l'vi^{2}n. Fr., *indivulvine.* Ger., *I.* A substance obtained by decomposing indican with dilute acids. Two varieties are known, *α*-i., $C_{22}H_{20}N_2O_3$; and *β*-i., $C_{44}H_{38}N_4O_3$, both soluble in alcohol. [B, 38, 93 (*a*, 14).]

INDIFUSCIN, n. I^{2}n-di^2-fu^{3}s'i^{2}n. A substance, $C_{24}H_{20}N_2O_9$, obtained by decomposing indican with dilute acids. [B.]

INDIG (Ger.), n. I^{2}n'di^{2}g. See Indigo.—**Anil-I.** See Indigofera *anil.*—**I'blau.** See Indigotin.—**I'küpe.** A vat in which crude indigo is prepared for use as a dye by dissolving in water and fermenting. [L, 30 (*a*, 14).]—**I'leim.** A proteid resembling gliadin, but not sticky, extracted from indigo by treating it with dilute acids. [B, 48 (*a*, 14).]—**I'pflanze.** See Indigofera.—**I'roth.** See Indigo *red.*—**I'schwefelsäure.** See Indigotin*sulphonic acid.*—**I'urie.** Indoxylsulphuric acid. [*a*, 38.]—**I'weiss.** See Indigogen.

INDIGENE, n. I^{2}n'di^2-jen. From *indu*, in, and *gignere*, to beget. An indigenous plant. [B, 116 (*a*, 24).]

INDIGENOUS, adj. I^{2}n-di^{2}j'e^{2}n-u^{3}s. Lat., *indigenus* (from *indu*, in, and *gignere*, to beget). Fr., *indigène.* Ger., *inländisch. einheimisch.* Native to a country; not foreign. [*a*, 24.]

INDIGÉRÉ (Fr.), adj. A^{2}n^2-de-zha-ra. Undigested. [L, 41 (*a*, 14).]

INDIGESTIBLE, adj. I^{2}n-di-je^{2}st'i^2-b'l. Lat., *indigestibilis* (from *in*, not, and *digerere*, to divide). Fr., *i.* Ger., *unverdaulich.* Incapable of being digested; as commonly used, difficult of digestion. [*a*, 17.]

INDIGESTION, n. I^{2}n-di-je^{2}st'yu^{3}n. Lat., *indigestio* (from *in*, not, and *digerere*, to separate). Fr., *i.* Ger., *I.*, *Unverdauung* (1st def.). Apepsia or dyspepsia, especially acute dyspepsia.—**Intestinal i.** I. dependent upon derangement of the functions of the small intestine. It may be a primary disease or secondary to diseases of the liver, pancreas, or stomach. It is characterized by constant dull pain, flatulence, and constipation. The appetite is seldom impaired. [Loomis (*a*, 40).]

INDIGITATION, n. I^{2}n-di^{2}j-i^{2}t-a'shu^{3}n. From *in*, into, and *digitus*, a digit. Fr., *i.* Ger., *Einfingerung.* Intussusception; so called from the resemblance to intussusception of the finger of a glove. [A, 322.]

INDIGLUCIN, INDIGLYCIN, n's. I^{2}n-di^2-glu^{2}s'i^{2}n, -glis'i^{2}n. Fr., *indiglycine.* Ger., *Indiglucin.* A decomposition product, $C_6H_{10}O_6$, of indican; a yellow, sweetish syrup, soluble in alcohol and in water, insoluble in ether. [B, 93 (*a*, 14).]

INDIGNATORIUS (Lat.), adj. I^{2}n-di^{2}g-na^{2}t(na^{3}t)-o'ri^2-u^{3}s-(u^{4}s). From *indignari*, to be indignant. Expressive of indignation; as a n., the external rectus muscle of the eye, because its action expresses indignation. [Bartholin (A, 325).]

INDIGO, n. I^{2}n'di^2-go. Gr., ἰνδικόν (n. of adj. ἰνδικός [φάρμακον understood]). Lat., *indicum* (n. of adj. *indicus* [*pigmentum* understood]). Fr., *i.* Ger., *I.*, *Indig I.* It., *indaco.* Sp., *índigo* [Mex. Ph.] *añil.* Ar., *alnil.* Sanscr., *nili.* A blue dye-stuff obtained from the leaves or green stalks of plants of the genus *Indigofera*, from *Wrightia tinctoria*, *Polygonum tinctorium*, *Galega tinctoria*, *Tephrosia apollinea*, *Tephrosia toxicaria*, *Randia aculeata*, etc.;

also prepared artificially. Its efficiency in coloring blue depends on the presence of indogotin, but other coloring matters are present (see *I. red*, *I. brown*, and *I. gluten*), besides certain inorganic substances. Internally, it is very nauseating and cathartic, discolors the urine, but without producing diuresis, and is a gastro-intestinal irritant (see also the plants producing it). It has been used in epilepsy, infantile convulsions, chorea, hysteria, and amenorrhœa. 2. The *Indigofera tinctoria* and other i.-bearing plants. [B, 5, 19, 77, 173, 180, 185 (α, 24).]—**Amer d'i.** (Fr.). Picric acid. [B, 92.]—**American wild i.** The *Baptisia tinctoria*. [B, 5, 19, 275 (α, 24).]—**Bastard i.** Fr., *i. bâtard*, *i. sauvage*. 1. The *Amorpha fruticosa*. [B, 19, 173 (α, 24).] 2. The *Cassia occidentalis*. [B, 88 (α, 39).] Cf. *False i.*—**Bengal i.** A commercial name for i. from Bengal, where the most highly esteemed kinds are prepared. There are many qualities of Bengal i., the best forming a porous, light, and easily pulverized mass, that breaks with a brilliant purple-blue color. [B, 77 (α, 24).]—**Chinese i.** The *Polygonum tinctorium* and certain other non-leguminous plants, also the dye obtained from them, known in China as *lan*. [B, 77, 185, 275 (α, 24).]—**Common dyers' i.** The *Indigofera tinctoria*. [α, 24.]—**Egyptian i.** Fr., *i. d'Egypte*. Ger., *ägyptischer Indig.* A dye formerly considered the product of *Indigofera argentea*; now thought to be obtained from *Tephrosia apollinea* and *Tephrosia toxicaria*. [B, 19, 173, 180, 185, 275 (α, 24).]—**English i., European i.** The *Isatis tinctoria*. [B, 19, 77, 180 (α, 24).]—**False i.** Fr., *faux i.* The genera *Amorpha* and *Baptisia*, also the *Galega officinalis*. [B, 19, 173, 275 (α, 24).]—**Gaud i.** In the Punjaub, sun-dried cakes of i. consisting of the crude fæcula of *Indigofera tinctoria* or other species of *Indigofera*. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**German i.** Ger., *deutscher Indig.* The *Isatis tinctoria*. [B, 19, 77, 180 (α, 24).]—**Indian i.** The *Indigofera tinctoria* or its dye. [B, 19 (α, 24).]—**I'baum** (Ger.). The *Nerium tinctorium*. [B, 48 (α, 14).]—**I. bâtard** (Fr.). See *Bastard i.*—**I. berry.** The *Randia latifolia*. [B, 282; B, 19, 275 (α, 24).]—**I. black.** See ANILINE *black*.—**I. blanc** (Fr.). See INDIGOGEN.—**I. blue.** See INDIGOTIN.—**I. brown.** Ger., *Indigbraun*. A brown dye existing in i., combined with calcium and an acid. It is soluble in a concentrated solution of caustic potash, and is precipitated from this solution as a brown powder by acids. [B, 5, 48 (α, 14).]—**I. carmin.** Fr., *indigo-carmine*. Ger., *Indigcarmin*. Potassium sulphindigotate. [B, 48 (α, 14).]—**I. d'Égypte** (Fr.). See *Egyptian i.*—**I. de la Louisiane** (Fr.). A variety of i. obtained from *Indigofera anil*. [B, 173 (α, 24).]—**I. du Nord** (Fr.). A dye prepared from *Roccella tinctoria*. [B, 173 (α, 24).]—**I. extract.** See *I. carmin.*—**I. gelatin, I. gluten.** A gelatinous substance found in i. [B, 5 (α, 24).]—**Soluble i. blue.** Powdered i. (1 part) treated with 5 parts of Nordhausen sulphuric acid or 8 of oil of vitriol, the temperature being kept down by immersion of the vessel in cold water. It forms a dark-blue pasty mass in 2 or 3 days, and its solution in about 2 parts of water is known as *liquid blue*. [B, 81 (α, 28).]—**I. plant.** Ger., *I'pflanze*. See INDIGOFERA and also the major list.—**I. purple, I. purpurin, I. red, I. resin, I. rubin.** Fr., *i. rouge*. Ger., *Indigroth*, *Indigharz*. A crystallizable coloring matter, $C_{16}H_{10}N_2O_2$, isomeric with indigotin, resulting from the decomposition of indican, and found in i., soluble in alcohol, in ether, in chloroform, in benzene, and in sulphuric and acetic acids. [B, 5, 77 (α, 24); B, 46 (α, 39).]—**I'säure** (Ger.). See INDIGOTIC *acid*.—**I. sauvage** (Fr.). See *Bastard i.*—**I'sulfosäure** (Ger.), **I. sulphate, I'sulphonic acid, I'sulphuric acid.** See INDIGOTIN*sulphonic acid*.—**I.-weed.** The *Baptisia tinctoria*. [B, 275 (α, 24).]—**I. white.** See INDIGOGEN.—**Künstlicher I.** (Ger.). See INDIGOTIN.—**Mineralischer I.** (Ger.). See MOLYBDENUM *molybdate*.—**Pala i.** In southern India, a sort of i. obtained from the leaves of *Wrightia tinctoria*. [B, 185 (α, 24).]—**Prairie i.** The *Baptisia alba*. [B, 5 (α, 24).]—**Pure i.** See INDIGOTIN.—**Reduced i.** See INDIGOGEN.—**Soluble i.** Sulphindigotic acid. [B.]—**Weisser I.** (Ger.). See INDIGOGEN.—**West Indian i.** 1. The *Randia aculeata*. 2. The *Indigofera anil* or the dye obtained from it. [B, 19, 185, 275 (α, 24).]—**White i.** See INDIGOGEN.—**Wild i.** 1. The *Baptisia tinctoria*. 2. In India, the *Indigofera paucifolia*. [B, 5, 172 (α, 24).]

INDIGOFERA (Lat.), n. f. I^{2}n-di^{2}g-o^{2}f′e^{2}r-a^3. From *indigo* (*q. v.*), and *ferre*, to bear. Fr., *indigotier*. Ger., *Indigopflanze*, *Indigpflanze*. The indigo-plant; of Linnæus, a genus of the *Indigoferæ*, or *Indigofereæ* (Fr., *indigoférées*), which are a subtribe of leguminous herbs or shrubs of the *Papilionaceæ*, tribe *Galegeæ*. [B, 19, 34, 42, 170, 173, 180 (α, 24).]—**I. angustifolia.** Fr., *indigotier à feuilles étroites*. An East Indian species producing indigo. The root is a bitter tonic and febrifuge. [B, 173 (α, 24).]—**I. anil.** Fr., *anil*, *anir*, *indigo anil*. Ger., *Anil*, *Anit-Indig*. A species indigenous to the West Indies, by some considered a variety of *I. tinctoria*, yielding much of the indigo of commerce. The root is used in the East and West Indies for calculous affections and syphilis, and the leaves are employed as a bitter tonic and febrifuge and as an external emollient application. [B, 173, 180, 185 (α, 24).] Cf. *I. tinctoria*.—**I. arcuata.** Fr., *indigotier courbé en arc*. A species found in the East, having properties like those of *I. anil*. [B, 173 (α, 24).]—**I. argentea, I. articulata.** Fr., *indigotier argenté*. Ger., *ägyptische Indigopflanze*, *silberfarbene Indigpflanze*. A species indigenous to Egypt, Arabia, and the East Indies. In Egypt the seeds are used as a vermifuge, in the East Indies the root and leaves are used like those of *I. anil*, and in the West Indies the root is used in gonorrhœa and gleet, and a decoction of the whole plant in asthma. [B, 5, 173, 180 (α, 24).]—**I. aspalathifolia, I. aspalathoides.** Malay, *manneli*. A species found on waste land in India, where the leaves, flowers, and tender shoots are used in decoction as a cooling and demulcent drink, and in elephantiasis and cancer. The root is given in toothache and aphthæ, and yields an oil used as an ointment in erysipelas. The ashes of the burnt plant are used for removing dandruff, and the leaves as an application to abscesses. [B, 172, 180 (α, 24).]—**I. cærulea.** Fr., *indigotier bleu*. An East Indian species yielding a light-blue indigo in great quantity. [B, 172, 173, 180 (α, 24).]—**I. caroliniana.** Fr., *indigotier de Caroline*. A species found in sandy woods from North Carolina to Florida; said to have the same properties as *I. anil*. [B, 34, 173 (α, 24).]—**I. enneaphylla.** Fr., *indigotier à neuf feuilles*. Ger., *neunblättrige Indigopflanze*. A species found in the East Indies. The juice is said to be antiscorbutic and alterative, and is used in syphilitic affections. The whole plant is given in infusion as a diuretic in fevers and coughs. [B, 172, 173, 180 (α, 24).]—**I. frutescens.** An East Indian species used in decoction in vesical calculus. [B, 180 (α, 24).]—**I. glabra.** Fr., *indigotier glabre*. An East Indian species having properties like those of *I. anil*. [B, 173 (α, 24).]—**I. glauca.** See *I. argentea*.—**I. hedysaroides.** A species used in the East Indies in abdominal and calculous diseases. [B, 180 (α, 24).]—**I. hirsuta.** Fr., *indigotier velu*. An indigoferous species used in the East Indies in cerebral disorders. [B, 173, 180 (α, 24).]—**I. indica.** See *I. tinctoria*.—**I. microcarpa.** A South American species; used in Brazil in poultices. [B, 180 (α, 24).]—**I. oblongifolia.** Fr., *indigotier oblong*. A species found in Arabia, where a fresh decoction is used in colic. [B, 173, 180 (α, 24).]—**I. paucifolia.** The wild indigo found in the East Indies, where it is used as an antidote to poisons, the root, boiled in milk, as a purgative, and the stem, in decoction, as a gargle in mercurial salivation. [B, 172 (α, 24).]—**I. pseudo-tinctoria.** Fr., *indigotier faux des teinturiers*. An indigoferous East Indian species. [B, 173 (α, 24).]—**I. sumatrana, I. tinctoria.** Fr., *indigotier des teinturiers* (1st def.). Ger.,

INDIGOFERA TINCTORIA. [A, 327.]

Färbe-Indigopflanze, *sichelfruchtige Indigpflanze* (1st def.). 1. Of Linnæus, the common indigo-plant, indigenous to the East Indies, but now disseminated throughout the tropics. The leaves are considered alterative, and are used in hepatitis; a decoction of the root is used in calculus; a poultice of the leaves is applied over the bladder to excite micturition, and the juice of the young branches is used in asthma. [B, 5, 19, 173, 180, 185 (α, 24).] See INDIGO and cf. *I. anil*. 2. Of Forskål, see *I. argentea*.—**I. trifoliata.** Guz., *vekhario*. A species found in the East. The leaves are used as an alterative, nutritive, tonic, astringent, and demulcent. [A, 479 (α, 21).]—**I. uniflora.** Ger., *einblüthige Indigopflanze*. A species found in the East Indies, used like *I. aspulathifolia*. [B, 172, 180 (α, 24).]

INDIGOFEROUS, adj. I^{2}n-di^2-go^{2}f′e^{2}r-u^{3}s. Lat., *indigoferus* (from *indigo* [*q. v.*], and *ferre*, to bear). Fr., *indigofère*. Ger., *indigtragend*. Yielding indigo. [L, 107.]

INDIGOGEN, n. I^{2}n-di^{2}g′o-je^{2}n. From *ἰνδικόν*, indigo, and *γεννᾶν*, to engender. Fr., *indigo blanc*. Ger., *weisser Indigo*. Reduced, or white, indigo; a soluble compound, C_8H_6NO, formed by the action of deoxidizing agents on indigo. [B, 8 (α, 24).]

INDIGOGENOUS, adj. I^{2}n-di^2-go^{2}j′e^{2}n-u^{3}s. Fr., *indigogène*. In chemistry, indigo-producing.

INDIGOPFLANZE (Ger.), n. I^{2}n′de-go-pfla^{3}ntz-e^2. See INDIGOFERA.—**Aegyptische I.** See INDIGOFERA *argentea* and cf. *Egyptian* INDIGO.—**Färbe-I.** See INDIGOFERA *tinctoria*.—**Neunblättrige I.** See INDIGOFERA *enneaphylla*.

INDIGO-PLANT, n. I^{2}n′di^2-go-pla^{3}nt. See INDIGOFERA.—**Egyptian i.-p., False i.-p., Indian i.-p.** See the corresponding words under INDIGO.—**Narrow-leaved i.-p.** See INDIGOFERA *angustifolia*.—**Niger i.-p.** See TEPHROSIA *toxicaria*.—**Pegu i.-p.** The *Marsdenia tinctoria*. [B, 275 (α, 24).]—**Shrubby false i.-p.** The *Amorpha fruticosa*. [B, 275 (α, 24).]—**West Indian i.-p., Wild i.-p.** See *West Indian* INDIGO and *Wild* INDIGO.

INDIGOTATE, n. I^{2}n′di^2-go^{2}t-at. A salt of indigotic acid. [L, 107.]

INDIGOTIC, adj. I^{2}n-di^2-go^{2}t′i^{2}k. Lat., *indigoticus*. Fr., *indigotique*. 1. Pertaining to or derived from indigo. 2. Of the deepest blue. [B, 19, 123 (α, 24).]—**I. acid.** Fr., *acide indigotique*. Ger., *Indigosäure*. Syn.: *nitrosalicylic acid*. An acid formed by the action of nitric acid on indigo. [B, 38, 93 (α, 14).]—**I. group.** Fr., *groupe indigotique*. A group of substances containing the radicle indyl or, according to more recent views, formed from indol by substitution. They comprise hydroxindol, hydrindic acid, isatic acid, indigo-blue, indigo-white, etc. [B, 46, 93 (α, 14).]

INDIGOTIER (Fr.), n. A^{2}n^2-de-go-te-a. See INDIGOFERA.—**I. à feuilles étroites.** See INDIGOFERA *angustifolia*.—**I. à neuf feuilles.** See INDIGOPHYLLA *enneaphylla*.—**I. courbé en arc.**

See INDIGOFERA *arcuata.*—**I. argenté.** See INDIGOFERA *argentea.*—**I. bleu.** See INDIGOFERA *cœrulea.*—**I. de Caroline.** See INDIGOFERA *caroliniana.*—**I. des teinturiers.** See INDIGOFERA *tinctoria* (1st def.).—**I. faux des teinturiers.** See INDIGOFERA *pseudo-tinctoria.*—**I. glabre.** See INDIGOFERA *glabra.*—**I. oblong.** See INDIGOFERA *oblongifolia.*—**I. velu.** See INDIGOFERA *hirsuta.*

INDIGOTIN, n. I^{2}n'di^2-go-ti^{2}n. Fr., *indigotine.* Ger., *I.* The blue coloring matter, $C_{16}H_{10}N_2O_2$, of indigo, obtainable as a blue amorphous powder, and also in shining copper-red crystals. It is insoluble in water, in dilute or cold alcohol, in dilute acids, and in cold ether; soluble in anhydrous acetic acid to which a drop of sulphuric acid is added, in boiling strong alcohol, in methyl alcohol, and in carbolic acid. [B, 270 (α, 38); "Proc. of the Am. Pharm. Assoc.," xix (α, 39).]—**I'disulphonic acid, I'monosulphonic acid, I'sulphonic acid.** Ger., *I'disulfonsäure, I'monosulfonsäure, Indigosulfosäure, Indigschwefelsäure, Indigsulfonsäure.* An acid obtained from i. by treating with fuming sulphuric acid. By using 7 to 10 parts of sulphuric acid, *i'monosulphonic, phœnicinsulphuric,* or *sulphopurpuric acid,* $C_{16}H_9N_2O_2.SO_3H$, is obtained as a purple powder soluble in water or alcohol, insoluble in dilute acids; by using 15 parts of sulphuric acid, *i'disulphonic, sulphindigotic,* or *sulphindylic acid,* $C_{16}H_8N_2O_2(SO_3H)_2$, is obtained as an amorphous blue mass, easily soluble in water and in alcohol. [B, 4, 158, 270 (α, 38).]

INDIGOURIA (Lat.), n. f. I^{2}nd"i^{2}g-o-u^2(u)'ri^2-a^2. From ἰνδικόν, indigo, and οὖρον, urine. Fr., *indigourie.* Ger., *Indigourie.* The secretion of urine containing indigo; due to the decomposition of the normal indican. [Gilchrist, Kornblume (α, 40).]

INDIGPFLANZE (Ger.), n. I^{2}nd'i^{2}g-pfla^{3}nts-e^2. See INDIGOFERA.—**Sichelfruchtige I.** See INDIGOFERA *tinctoria.*—**Silberfarbene I.** See INDIGOFERA *argentea.*

INDIGUM, n. I^{2}nd'i^{2}g-u^{3}m. See INDIGO.

INDIHUMIN, n. I^{2}nd-i^2-hu^{2}m'i^{2}n. Fr., *indihumine.* A product of the decomposition of indican by dilute acids, $C_{10}H_9NO_3$, probably identical with indigo-brown; insoluble in water and in alcohol, soluble in alkaline solutions. [B, 38, 93 (α, 14).]

INDIKAN (Ger.), n. I^{2}n-de-ka^{3}n'. See INDICAN.

INDIKATION (Ger.), n. I^{2}n-de-ka^3-tse-on'. See INDICATION.

INDIN, n. I^{2}nd'i^{2}n. Fr., *indine.* Ger., *I.* A substance, $C_{16}H_{10}N_2O_2$, isomeric with indigotin, obtained by rubbing together sulphisatyde and alcoholic potassic hydrate, and washing the resulting mass with water. It occurs as a fine red powder [Strecker], consisting of dark rose-colored microscopic crystals, insoluble in water, slightly soluble in alcohol [Roscoe and Schorlemmer], readily soluble in boiling alcohol or ether and in sulphuric acid. [B, 3, 4 (α, 38), 93 (α, 14).]—**I'kalium** (Ger.). See POTASSIUM *indin.*—**I'sulphuric acid.** Fr., *acide i'sulfurique.* Ger., *Indinschwefelsäure.* An oxidation product of hydrindinsulphuric acid, $C_{16}H_{12}N_2S_2O_9$, a reddish substance easily soluble in water, slightly soluble in alcohol, insoluble in ether; used to dye purple. [B, 93 (α, 14).]

INDIPURPURIN, n. I^{2}nd-i^2-pu^{5}r'pu^{2}r-i^{2}n. See INDIGO-*purpurin.*

INDIRECT, adj. I^{2}n-di-re^{2}kt'. Lat., *indirectus* (from *in,* neg., and *dirigere,* to lay straight). Fr., Ger., *i.* Not direct, mediate; in cell division, caryocinetic. [J; α, 45.]

INDIRRHETIN, n. I^{2}nd-i^{2}r-ret'i^{2}n. From ἰνδικόν, indigo, and ῥητίνη, resin. Fr., *indirrhétine.* A product of the decomposition of indican by dilute acids, $C_{18}H_{17}NO_5$; insoluble in water and in alcohol, soluble in alkaline solutions. [B, 38, 93 (α, 14).]

INDIRUBIN, n. I^{2}nd-i^2-ru^{2}b'i^{2}n. Fr., *indirubine.* Ger., *I.* See *Indigo* RED.

INDISINE, n. I^{2}nd'i^{2}s-en. See FUCHSINE.

INDISPOSED, adj. I^{2}n-di^{2}s-pozd'. Fr., *indisposé.* Ger., *unpässlich, abgeneigt.* It., *indisposto.* Sp., *indispuesto.* Slightly ill. [D (α, 45).]

INDISPOSITION, n. I^{2}n-di^{2}s-po-si^{2}sh'u^{3}n. From *in,* neg., and *dispositio,* a regular disposition. Fr., *i.* Ger., *Unpässlichkeit, Uebelfinden.* A slight illness or malaise. [D, 3.]

INDISSOLUBILITY, n. I^{2}n-di^{2}s-so^{2}l-u^2-bi^{2}l'i^{2}t-i^2. From *in,* neg., and *dissolubilis,* soluble. Fr., *indissolubilité.* Ger., *Unauflöslichkeit.* See INSOLUBILITY.

INDISSOLUBLE, adj. I^{2}n-di^{2}s-so^{2}l'u^2-b'l. Fr., *i.* See INSOLUBLE.

INDIUM (Lat.), n. n. I^{2}nd'i^2-u^{3}m(u^{4}m). From ἰνδικόν, indigo. A metallic element discovered in 1863 by Reich and Richter. It is a white, very soft and easily malleable substance, not tarnishing by exposure to air, having the sp. gr. of 7·42, and melting at 176°. In compounds it acts as a trivalent radicle, forming salts analogous to those of aluminium. Symbol, In; atomic weight, 113·4. It is very similar to cadmium in its relation to other substances. [B, 3; "Proc. of the Am. Pharm. Assoc.," xiv (α, 39).]—**Hydrated i. oxide.** A white substance, $In_2O_6H_6$, obtained by precipitating its salts. It is gelatinous when moist, horn-like when dried. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. acetate.** A substance, $(C_2H_3O_2)_6In_2$, obtained by dissolving hydrated i. oxide, freshly precipitated from cold solution, in glacial acetic acid, and evaporating the solution to crystallization. It forms tufts of silky, glistening needles, readily decomposed, and consequently not of constant composition. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. alum, I. and ammonium sulphate.** A compound of the formula $In_2(SO_4)_3.(NH_4)_2SO_4 + 24H_2O$. [B, 3.]—**I. and potassium cyanide.** A salt obtained by treating a solution of an i. salt with potassium cyanide. It exists only in solution, hydrated i. oxide being deposited on evaporation. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. bichloride.** A compound, $InCl_2$, obtained by heating gaseous hydrochloric acid with metallic i.; an amber-yellow liquid which congeals on cooling to form a crystalline mass. It is split by water into i. trichloride and metallic i. Its vapor density is normal at high temperatures. ["Proc. of the Am. Pharm. Assoc.," xxxvii (α, 39).]—**I. bromide.** A white, crystalline, volatile substance, In_2Br_6, obtained in the same manner as i. chloride. ["Proc. of the Am. Pharm. Assoc.," xvi (α, 39).]—**I. chloride.** A glistening, crystalline, scaly substance, In_2Cl_6, obtained by heating i., mixed with carbon, in a current of chlorine. It is anhydrous, is decomposed by sodium with explosive violence, is exceedingly hygroscopic, and dissolves in water with a hissing noise, and the elimination of considerable heat. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).] See also *I. bichloride* and *I. monochloride.*—**I. chromate.** A substance obtained by dissolving the hydrated oxide in an aqueous solution of chromic acid. The neutral salt is insoluble; the acid salt remains, on evaporation, in the form of an uncrystallizable, syrupy mass. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. cyanide.** Fr., *cyanure d'i.* Ger., *I'cyanür.* A salt, $In(CN)_2$, formed by the action of potassic cyanide or of hydrocyanic acid on a salt of i.; readily decomposed, on boiling with water, into i. hydrate. [B, 4.]—**I. formate.** A very soluble, minutely crystalline substance, obtained by dissolving hydrated i. oxide in formic acid. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. iodide.** A yellow, very hygroscopic, crystalline mass, In_2I_6, obtained by heating metallic i. with an excess of iodine in an atmosphere of dry carbonic acid, and distilling off the excess of iodine. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. monochloride.** A dark-red fluid, InCl, obtained by carefully heating an excess of metallic i. in gaseous hydrochloric acid, or by heating i. bichloride with metallic i. ["Proc. of the Am. Pharm. Assoc.," xxxvii (α, 39).]—**I. oxide.** A light-yellow powder, In_2O_3, obtained by heating its carbonate or nitrate to redness; also by heating metallic i. to redness for some time, by which InO is first formed, which, as the temperature increases, ignites and forms In_2O_3. It is infusible and non-volatile, is dissolved by dilute acids with difficulty if cold, readily if hot. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. suboxide.** A light-black, pyrophorous powder, InO, obtained by the reduction of In_2O_3 in a current of hydrogen at a temperature of about 300° C. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. sulphate.** A substance, $(SO_4)_3In_2$, obtained by dissolving the metal in dilute sulphuric acid, evaporating to dryness, and heating sufficiently to drive off the excess of acid. Its neutral solution yields, on evaporation, a white, gum-like mass, containing 9 molecules of water. By strong heating it is converted into a basic salt. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. sulphide.** A brown, infusible powder, In_2S_3, obtained by the direct union of sulphur and i., or by heating In_2O_3 and sulphur, by which sulphurous acid is eliminated. It is not decomposed by heat. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. sulphite.** A light, white, crystalline powder, $In_2O_3.3SO_2 + In_2O_3 + SHO$, readily dissolved by acids; prepared by precipitating any of the soluble salts of i. with sodium bisulphide. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. tartrate.** A substance obtained by dissolving hydrated i. oxide in a boiling solution of tartaric acid until a considerable precipitate forms. It yields on filtering and evaporating, *in vacuo,* a gelatinous, uncrystallizable mass. ["Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]—**I. trichloride.** See *I. chloride.*

INDIVIDUAL, adj. and n. I^{2}n-di^2-vi^{2}d'u^2-a^{2}l. Lat., *individualis* (1st def.), *individuum* (2d def.) (from *in* neg., and *dividere,* to divide). Fr., *individuel* (1st def.), *individu* (2d def.). Ger., *individuell* (1st def.), *Individuum* (2d def.). 1. (Adj.) not divided, incapable of being divided, single; pertaining to a single object or person, distinctive. 2. (N.) a single being or object. 3. (N.) in the ordinary botanical sense, a distinct plant; one of a series forming species. Sometimes a separable part of a plant (seed, root, etc.), which may, under favorable conditions, become an entire plant. In a stricter sense, the analogue in plants of the i. in the higher animals; by some regarded as the entire product of one seed even if separated into numerous plants; by others restricted to such a product only while organically united; by Thouars and Braun regarded as the axis or shoot with its foliage; by others, as the phytomer (*q. v.*); by others, the cell; by Gray, as the cell in the lower forms of vegetation, as the phytomer in the higher. [B, 1, 229 (α, 24); Braun (α, 24); L, 56.]

INDIVIDUALISM, INDIVIDUALITY, n. I^{2}n-di^2-vi^{2}d'u^2-a^{2}l-i^{2}z'm, -vi^{2}d-u^2-a^{2}l'i^{2}t-i^2. Fr., *individualité.* Ger., *Individualität.* The condition or quality of being individual; an individual existence or nature. [α, 24.]

INDIVIDUUS (Lat.), adj. I^{2}n-di(de)-vi^{2}d(wi^{2}d)'u^2(u^4)-u^{3}s(u^{4}s). See INDIVIDUAL (1st def.).

INDIVISUS (Lat.), adj. I^{2}n-di(de)-vi(we)'su^{3}s(su^{4}s). From *in,* not, and *dividere,* to divide. Fr., *indivisé.* Ger., *unzertheilt.* Entire, not separated into parts; undivided. [B, 1, 19, 123 (α, 24).]

INDOGEN, n. I^{2}nd'o-je^{2}n. 1. See INDULIN. 2. A bivalent radicle, $C_8H_5NO = \begin{matrix} C_6H_4 - CO \\ | \quad\quad | \\ HN - C: \end{matrix}$ occurring in indigo and many of its derivatives. [B, 3, 270 (α, 38).]

INDOL, n. I^{2}nd'o^{2}l. Fr., *i.* Ger., *I.* A crystalline body, $C_8H_7N = C_6H_4\left\langle{CH \atop NH}\right\rangle CH$, to which the peculiar odor of the fæces is supposed to be due; a product of pancreatic digestion (*e. g.,* of blood albumin) and an antecedent of indican. It is easily soluble in alcohol, in ether, and in the hydrocarbons, less soluble in hot water, from which it crystallizes in plates melting at 52° C., and boiling with partial decomposition at about 245° C. It acts as a weak base. [B, 3, 4, 270 (α, 38); "Proc. of the Am. Pharm. Assoc.," xxiv (α, 39).]—**I'dicarboxylic acid.** A dibasic acid, $C_{10}H_8NO_4$, $= C_6H_4 \begin{matrix} \diagup CH \diagdown \\ - NH - \\ \diagdown CO.OH \end{matrix} C-CO.OH$, crystallizing from hot alcohol in fine nee-

dles melting at 250° C. [B, 3 (*a*, 38).]—**I. picrate.** A substance, $C_6H_7N.C_6H_3(NO_2)_3O$, occurring in long, red needles, soluble in hot benzene, less soluble in petroleum spirit or cold benzene. [B, 3 (*a*, 38).]

INDOLENT, adj. I^{2}n'do-le^{2}nt. Lat., *indolens* (from *in* neg., and *dolere*, to feel pain). Fr., *i.* Ger., *unempfindlich, unschmerzhaft, schlaff.* 1. Sluggish. 2. Painless. [E.]

INDOLES (Lat.), n. f. I^{2}nd'ol(o^{2}l)-ez(as). Gen., *ind'olis* (from *indu*, in, and *olere*, to grow). Ger., *Eigenthümlichkeit.* Natural disposition, temperament, character. [L, 50, 343 (*a*, 14).]—**I. animi.** Ger., *Gemüthsbeschaffenheit.* The disposition of the mind. [B, 50 (*a*, 14).]—**I. morbi.** Ger., *Krankheitsnatur.* The character of a disease. [L, 50 (*a*, 14).]

INDOLOIÊMIE [Piorry] (Fr.), n. A^{2}n^2-do-lwa^3-a-me. From *indoles*, an inborn quality, and *αἷμα*, blood. See *Asiatic* CHOLERA.—**I. asiatique** [Piorry]. See *Asiatic* CHOLERA.—**I. septicémique** [Piorry]. See *Choléra* FOUDROYANT.—**I. sporadique** [Piorry]. See *Simple* CHOLERA.

INDOPHENIN, n. I^{2}nd-o-fe^{2}n'i^{2}n. Fr., *indophénine.* Ger., *I.* A condensation product, $C_{13}H_7NOS$ [Roscoe and Schorlemmer], formed when a solution of 1 part of isatin in 30 parts of sulphuric acid is shaken with benzene, and occurring as a blue powder. [B, 3, 270 (*a*, 38).]

INDOPHENOL, n. I^{2}nd-o-fe^{2}n'o^{2}l. A dye-stuff, $C_{18}H_{16}N_2O = N\langle^{C_6H_4.N(CH_3)_2,}_{C_{10}H_6O}$ formed by oxidizing a molecule of a paradiamine with a molecule of a phenol. The i's include: (1), *phenol blue*, $C_{14}H_{14}N_2O$, occurring in commerce as a paste; (2), *trichlorophenol blue*, $C_{14}N_{11}Cl_3N_2O$, crystallizing in tough elastic needles almost insoluble in water, soluble in alcohol, and easily so in ether and benzene; (3), *trichlorodimethylanilinamidophenol*, $C_{14}H_{12}Cl_3N_2OH$, crystallizing in colorless needles, becoming deep blue and melting at about 139° C; (4), *dibromoquinonephenolimide*, $C_6H_2Br_2O:N.C_6H_4.OH$, crystallizing in dark-red prisms having a metallic lustre and soluble in water; (5), *gallocyanine* (*q. v.*); (6), *naphthol blue* (*q. v.*). [B, 3, 270 (*a*, 38).]—**I'weiss** (Ger.). A dye-stuff, $C_{18}H_{18}N_2O = N \begin{cases} C_6H_4.N(CH_3)_2, \\ C_{10}H_6.OH \\ H \end{cases}$ formed by warming indophenol with caustic soda and grape sugar. [B, 270 (*a*, 38).]

INDOSYNCLONUS (Lat.), n. m. I^{2}nd-o(o^3)-si^{2}n(su^{6}n^2)'klon-(klo^{2}n)-u^{3}s(u^{4}s). From *ἰνδικός*, Indian, *σύν*, with, and *κλόνος*, any violent, confused motion. See BERI-BERI.

INDOXYL, n. I^{2}nd-o^{2}x'i^{2}l. Fr., *indoxyle.* Ger., *I.* A substance, C_8H_7NO, isomeric with oxindol, occurring as a brown oil, soluble in alcohol, in ether, and in chloroform, slightly soluble in hot water. [B, 3, 270 (*a*, 38); B, 46 (*a*, 39).]—**I'sulphuric acid.** Fr., *acide indoxylsulfurique.* Ger., *Indoxylschwefelsäure.* A very unstable acid, $C_8H_6N.O.SO_2.OH$, formed by the union of sulphuric acid with i.; an oxidation product of indol in the body, furnishing the indigo occurring in the urine. [B, 3, 270 (*a*, 38); B, 46 (*a*, 39).]

INDOXYLIC ACID, n. I^{2}nd-o^{2}x-i^{2}l'i^{2}k. Fr., *acide indoxylique.* An acid, $C_8H_6NO(CO.OH)$, formed by reducing orthonitrophenylpropionic acid. [B, 3 (*a*, 38).]

INDRAINI (Hind.), n. The *Cucumis colocynthis.* [B, 121, 172 (*a*, 24).]

INDRAJAB (Bomb.), **INDRAJOW** (Hind.), n's. The bark of *Wrightia antidysenterica.* [B, 92, 121 (*a*, 14, 35).]

INDRÁSANA (Sanscr.), n. See HEMP.

INDRA VADHI (Sanscr.), n. See MUTELLA *occidentalis.*

INDRÁ VÁRUNI (Sanscr.), **INDRAVUNKAPHUL** (Decc.), **INDRAYAN** (Hind.), **INDRAYANA** (Hind.), n's. See CITRULLUS *colocynthis.*

INDRAYAVA (Sanscr.), n. The *Holarrhena antidysenterica.* [A, 479 (*a*, 21).]

INDUAR, n. A name applied at different times to various tuberous roots, supposed to have tonic and alexipharmac properties; in India, to a species of aconite found in the markets of Bombay. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

INDUCED, adj. I^{2}n-du^{2}st'. Fr., *induit.* Caused to occur. [B.] See *I.* CURRENT.

INDUCING, adj. I^{2}n-du^{2}s'i^{2}n^2. From *inducere*, to lead into. See *I.* CURRENT.

INDUCTIO (Lat.), n. f. I^{2}n-du^{3}k(du^{4}k)'shi^2(ti^2)-o. Gen., *-o'nis.* 1. The coating of a surface with a plaster or cataplasm, etc. [L, 50 (*a*, 14).] 2. See INDUCTION.

INDUCTION, n. I^{2}n-du^{3}k'shu^{3}n. Gr., *ἐπαγωγή.* Lat., *inductio* (from *inducere*, to lead into). Fr., *i.* Ger., *Induktion, Einleitung, Einführung.* It., *induzione.* Sp., *inducción.* The act or process of inducing, of causing to occur (as of abortion or premature labor).

INDUCTIVE, adj. I^{2}n-du^{3}k'ti^{2}v. Fr., *inductif.* Ger., *einleitend, einführend, hervorbingend, Induktions-.* Pertaining to induction. [*a*, 45.]

INDUCTORIUM (Lat.), n. n. I^{2}n-du^{3}k(du^{4}k)-to'ri^2-u^{3}m(u^{4}m). From *inducere*, to spread over. 1. A covering. [A, 312 (*a*, 21).] 2. An induction apparatus. [Wreden, "Arch. of Otol.," xvii, 3; "N. Y. Med. Jour.," Feb. 23, 1889, p. 222.]

INDUCTRIC, adj. I^{2}n-du^{3}k'tri^{2}k. See INDUCED.

INDUCULA (Lat.), n. f. I^{2}n-du^2(du)'ku^{2}l(ku^{4}l)-a^3. From *induere*, to put on. Fr., *gilet de force* (2d def.). Ger., *Zwangsjacke* (2d def.). 1. Anciently, an undergarment worn by women. [A, 312 (*a*, 21).] 2. A strait-waistcoat. [A, 518.]

INDUGA (Tel.), n. The *Strychnos potatorum.* [B, 172 (*a*, 24).]

INDUIT (Fr.), adj. A^{2}n^2-dwe. See INDUCED.

INDUKTOR (Ger.), n. I^{2}n-duk'to^{2}r. See INDUCTORIUM (2d def.).—**Funkeni'.** An induction coil that emits sparks. [*a*, 27.]

INDULIN, n. I^{2}nd'u^{2}l-i^{2}n. Fr., *induline.* Ger., *I.* A term for certain blue-black, blue, and grayish dyes formed in various ways from benzenes and aniline. One series has the formula $C_{18}H_{15}N_3.HCl$. They are soluble in alcohol, insoluble in water. [B, 270 (*a*, 38).]—**I'sulphonic acid, Spirit-soluble i's.** The hydrochlorides or sulphates of i. bases. They are also slightly soluble in water. [B, 3 (*a*, 38).]—**Water-soluble i's.** The alkali salts of i'sulphonic acids. [B, 3 (*a*, 38).]

INDUMENTUM (Lat.), n. n. I^{2}nd-u^2(u)-me^{2}nt'u^{3}m(u^{4}m). From *induere*, to put on. Ger., *Ueberzug.* 1. In botany, any hairy or pubescent covering. 2. In ornithology, the plumage. 3. The enveloping membrane or capsule of an internal organ. [B, 19, 123 (*a*, 24); L, 50 (*a*, 14), 343.]—**I. cordis.** The pericardium. [L, 50 (*a*, 14).]—**I. nervi, I. nervorum.** See NEURILEMMA and PERINEURIUM.—**I. vitreum.** See ENAMEL.

INDUPLICATE, adj. I^{2}n-du^2'pli^{2}k-at. Lat., *induplicatus* (from *in* neg., and *duplicare*, to double). Fr., *induplicatif.* Ger., *eingefaltet, einwärtsgefaltet.* Having the edges flexed or folded inward. [B, 1, 19, 77, 123 (*a*, 24); *a*, 45.] See under *Valvate* ÆSTIVATION.

INDUPLICATION, n. I^{2}n-du^2-pli^{2}k-a'shu^{3}n. From *in*, neg., and *duplicare*, to double. The state of being induplicate.

INDUPLICATIVE, adj. I^{2}n-du^2'pli^{2}k-at-i^{2}v. See INDUPLICATE.

INDURANT, adj. I^{2}n'du^2-ra^{2}nt. Lat., *indurans* (from *indurare*, to make hard). Fr., *i.*, *endurcissant.* Ger., *verhärtend.* Hardening (said of medicines formerly supposed to "condense," or give firmer consistence to the tissues of the body). [L, 50, 105, 135 (*a*, 39); *a*, 45.]

INDURATED, adj. I^{2}n'du^2-rat-e^{2}d. Lat., *induratus* (from *indurare*, to make hard). Fr., *induré, endurci.* Ger., *verhärtet.* Hardened; of a lesion, accompanied with induration. [B, 123 (*a*, 24); *a*, 45.]

INDURATIO (Lat.), n. f. I^{2}n-du^2(du)-ra(ra^3)'shi^2(ti^2)-o. Gen., *-on'is.* See INDURATION.—**I. adiposa neonatorum.** See SCLEREMA *neonatorum.*—**I. cutis.** See SCLEREMA *cutis.*—**I. glandularum.** Scirrhus of glands. [L, 135 (*a*, 39).]—**I. hepatis.** See HEPAR *induratum.*—**I. Hunteri.** See *Hunterian* CHANCRE.—**I. maligna.** See SCIRRHUS.—**I. telæ cellulosæ.** See SCLEREMA and DERMATOSCLEROSIS.—**I. telæ cellulosæ adultorum.** See SCLEREMA *adultorum.*—**I. telæ cellulosæ neonatorum.** See SCLEREMA *neonatorum.*—**I. testiculi, I. testis.** Orchitis with induration. [L, 135 (*a*, 39).]—**I. thyreoideæ.** See GOÎTRE.

INDURATION, n. I^{2}n-du^2-ra'shu^{3}n. Gr., *σκλήρωσις.* Lat., *induratio.* Fr., *i.* Ger., *Verhärtung, Erhärtung, Härten.* It., *indurimento.* Sp., *induración.* 1. The state of being, or the process of becoming, hardened. 2. An old term for a form of atrophy; also for a number of morbid processes consisting in hypertrophies or new formations, especially of connective tissue. [D, 3, 20.]—**Atrophic pigmentary i. (of the stomach).** A pigmentary change in the mucous membrane of the stomach associated with glandular atrophy and fibrous hyperplasia. The pigmentation is usually gray, being due to the presence of small, black granules, consisting of extravasated blood. The thinned condition of the mucous membrane indicates the atrophic process, and the fibrous hyperplasia, if slight, is confined to the interglandular connective tissue. [D, 48.]—**Brown i. of the lungs.** Fr., *induration brune des poumons.* Ger., *braune I. der Lungen.* See *Pigment i. of the lung.*—**Cyanotic i.** Fr., *i.* (ou *endurcissement*) *cyanotique.* Ger., *cyanotische I.* (oder *Verhärtung*). An i. resulting from long-continued venous hyperæmia, the pressure on the vessels causing transudation of blood and serum and the formation of a dark, hard mass. In the liver, spleen, etc., it leads to the absorption of more or less of the parenchyma and to the formation of new connective tissue. [D, 3, 4.]—**Fibrous i. of the lung.** See *Interstitial* PNEUMONIA.—**Hunter'sche I.** (Ger.). See *Hunterian* CHANCRE.—**I's de voisinage** [Fournier] (Fr.). Syn.: *chancre successif.* Isolated i's that sometimes occur at a short distance from a syphilitic chancre. It is uncertain whether they are due to metastasis from the primary chancre or correspond to separate points of inoculation. [G.]—**I. foliacée** [Fournier] (Fr.). The leaf-like or paper-like i. of a syphilitic chancre when it is of the lightest grade perceptible to the touch. [G.] See also *Lamellar i. of the syphilitic chancre.*—**I. lamelleuse** (Fr.). See *Lamellar i. of the syphilitic chancre.*—**I. of chancre.** See *Hunterian* CHANCRE.—**I. of the lung.** Fr., *i. pulmonaire.* See *Interstitial* PNEUMONIA.—**I. papyracée** (Fr.). See *I. foliacée.*—**I. parcheminée** [Ricord] (Fr.). See *Parchment i.*—**I's plastiques des tissus érectiles du pénis** [Demarquay] (Fr.). See SCLEROSIS *of the corpora cavernosa.*—**I. primitive** (Fr.). See *Syphilitic* CHANCRE.—**I. pulmonaire** (Fr.). See *Interstitial* PNEUMONIA.—**I. tégumentaire** (Fr.). See SCLEREMA *cutis.*—**Lamellar i. of the syphilitic chancre.** Fr., *i. lamelleuse.* I. of the syphilitic chancre occurring as a superficial thickening in the form of a thin plate or disc. [G.]—**Mitral i.** Hardening of the mitral valve (*e. g.*, in sclerotic endocarditis). It causes mitral murmurs, usually heard at the apex of the heart and exceptionally in the second intercostal space. [D, 45.]—**Parchment i.** Fr., *i. parcheminée.* The i. of a syphilitic chancre when it is of slight degree and feeling, when held between the fingers, like a piece of parchment. [G.]—**Pigment i. of the lung** [Virchow]. A form of interstitial pneumonia in which, after long-continued passive congestion, associated with obstruction at the mitral orifice, pigment from the blood is lodged in the lung-tissue, forming red points that can be seen on section of the lung. [D, 5.]—**Plastic i's of the penis.** See SCLEROSIS *of*

the corpora cavernosa.—**Primitive i.** Fr., *i. primitive.* See *Syphilitic* CHANCRE.—**Scaly i.** Ger., *schiefrige I.* A form of i. found within the lungs, characterized by the presence of small masses of dry scales of pigmented connective tissue which have accumulated in the course of a diffuse process of proliferation. [D, 4.]—**Specific i.** Ger., *specifische I.* The i. of the initial lesion of syphilis. [G.] See *Syphilitic* CHANCRE.

INDURATUS (Lat.), adj. I^{2}n-du^2(du)-rat(ra^{3}t)′u^{3}s(u^{4}s). Accompanied with induration (*e. g.*, acne indurata).

INDURESCENT, adj. I^{2}n-du^2-re^{2}s′e^{2}nt. Lat., *indurescens* (from *indurescere*, to become hard). Ger., *erhärtend, hartwerdend.* Gradually becoming indurated. [B, 19, 123 (α, 24).]

INDURESCENTIA (Lat.), n. f. I^{2}n-du^2(du)-re^{2}s-se^{2}n(ke^{2}n)′shi^2(ti^2)-a^3. From *indurescere*, to become hard. The process of becoming hardened.

INDUSIAL, adj. I^{2}n-du^2′si^2-a^{2}l. Pertaining to the indusium.

INDUSIATE, adj. I^{2}n-du^2′si^2-at. Lat., *indusiatus.* Ger., *geschleiert.* Having an indusium. [B, 123 (α, 24).]

INDUSIUM (Lat.), n. n. I^{2}nd-u^2(u)′si^2-u^{3}m(u^{4}m). From *induere*, to put on. Fr., *indusie.* Ger., *Schleierchen.* A membranous covering; in botany, that of the sori in ferns; of Link, the receptacle of some *Fungi.* [B, 1, 123, 291 (α, 24).] 2. See AMNION (1st def.).

INDUVIÆ (Lat.), n. f. pl. I^{2}n-du^2(du^4)′vi^2(wi^2)-e(a^3-e^2). From *induere*, to put on. Fr., *induvies, chemises.* Ger., *Fruchtdecken.* 1. Floral envelopes remaining on fruit till its maturity. 2. The volva (*q. v.*). 3. Withered leaves remaining on a stem. [B, 119, 123 (α, 24).]

INDUVIAL, adj. I^{2}n-du^2′vi^2-a^{2}l. Lat., *induvialis* (from *induere*, to put on). Of Mirbel, persistent and covering the fruit (said of the calyx, as in the rose). [B, 1 (α, 24).]

INDUVIATE (Lat.), adj. I^{2}n-du^2′vi^2-at. Lat., *induviatus.* Fr., *induvié.* Ger., *fruchtdeckig.* Having induviæ. [B, 1, 19, 123 (α, 24).]

INDWIJAW (Hind.), n. The *Holarrhena antidysenterica.* [B, 172 (α, 24).]

INÉ (Fr.), n. E-na. In the Gaboon country, Africa, kombé arrow poison. [B, 5 (α, 24).] See STROPHANTHUS *kombé.*

INEBRIANT, adj. I^{2}n-e′bri^2-a^{2}nt. Lat., *inebrians* (from *inebriare*, to inebriate). Fr., *inébriant, enivrant.* Causing drunkenness; as a n., an agent having that property. Inebriating agents were divided by Linnæus into the "artificial," or alcoholic, and the "natural," or narcotic. [B, 88 (α, 39).]

INEBRIATION, n. I^{2}n-e-bri^2-a′shu^{3}n. From *inebriare*, to inebriate. Drunkenness.

INEBRIETY, n. I^{2}n-e^2-bri′e^{2}t-i^2. Lat., *inebrietas* (from *inebriare*, to make drunk). Ger., *Trunksucht.* 1. The state of being drunk. 2. Habitual drunkenness.—**Acute impulsive i.** Ger., *akute impulsive Trunksucht.* A form described by Crothers as suddenly attacking persons who have not before been given to drink; occasioned either by heredity or by wasting diseases or mental shock; a forerunner of progressive paralysis or simple dementia. ["Med. Record," Sept. 13, 1884, p. 289; "Centralbl. f. kl. Med.," Dec. 27, 1884, p. 838.]

INEBRIISM, n. I^{2}n-e′bri^2-i^{2}z′m. See INEBRIETY (2d def.).

INEDIA (Lat.), n. f. I^{2}n-ed(e^{2}d)′i^2-a^3. From *in*, neg., and *edere*, to eat. 1. A fasting. 2. A famine. 3. Anorexia. [L, 50 (α, 14), 135 (α, 39).]

INÉE (Fr.), n. See INÉ.

INÉGAL (Fr.), adj. I^{2}n-a-ga^{3}l. See UNEQUAL.

INEINE, n. I^{2}n-e′en. Fr., *inéine.* Ger., *Ineïn.* A crystalline alkaloid obtained from the tufts of hairs removed from the seeds of *Strophanthus hispidus.* It has not the physiological properties of strophanthine. ["Bull. gén. de thérap.," Jan. 30, 1889, p. 69; "Proc. of the Am. Pharm. Assoc.," xxv (α, 39).]

INEINANDERFLIESSEND (Ger.), adj. I^{2}n-in-a^{3}nd′e^{2}r-flesse^{2}nd. See CONFLUENT (1st def.).

INEINANDERGEFALTET (Ger.), **INEINANDERGEWUNDEN** (Ger.), adj's. I^{2}n-in-a^{3}nd′e^{2}r-ge^2-fa^{3}lt-e^{2}t, -vund-e^{2}n. See CONTORTIPLICATE.

INEINANDERMÜNDEND (Ger.), adj. I^{2}n-in-a^{3}nd′e^{2}r-mu^{6}nd-e^{2}nd. See ANASTOMOSANT.

INEINANDERMÜNDEN (Ger.), **INEINANDERMÜNDUNG** (Ger.), n's. I^{2}n-in-a^{3}nd′e^{2}r-mu^{6}nd-e^{2}n, -un^2. See ANASTOMOSIS (2d def.).

INEINANDERSCHIEBEN (Ger.), **INEINANDERSCHIEBUNG** (Ger.), **INEINANDERVERSCHIEBUNG** (Ger.), n's. I^{2}n-in-a^{3}nd′e^{2}r-sheb-e^{2}n, -un^2, -fe^{2}r-sheb-un^2. See INTUSSUSCEPTION.

INELASTIC, adj. I^{2}n-e-la^{2}s′ti^{2}k. From *in* neg. and ἐλαστός, elastic. Fr., *inélastique.* Ger., *inelastisch.* Not elastic.

INEMBRYONATE, adj. I^{2}n-e^{2}m′bri^2-o^{2}n-at. Lat., *inembryonatus* (from *in* neg., and ἔμβρυον, the embryo). Fr., *inembryonné.* Ger., *unkeimhaltig.* Not embryonate. [B, 1 (α, 24).]

INENCHYMA (Lat.), n. n. I^{2}n-e^{2}n^2′ki^2(ch^{2}u^6)-ma^3. Gen., *-ym′atos* (*-atis*). From *in*, into, and ἔγχυμα, an infusion. Fr., *inenchyme.* A collection of cells resembling spiral vessels. [B, 19 (α, 24).]

INÉNUCLÉABLE (Fr.), adj. E-na-nu^6-kla-a^{3}b-l′. From *in*, neg., *e*, out of, and *nucleus*, a kernel. Not capable of enucleation. [α, 14.]

INEQUALIS (Lat.), adj. I^{2}n-e(a)-kwa(kwa^3)′li^{2}s. See INÆQUALIS and UNEQUAL.

INÉQUICOSTÉ (Fr.), adj. I^{2}n-a-ke-ko^{3}s-ta. From *in*, neg., *æquus*, even, and *costa*, a rib. Provided with ribs (or with longitudinal markings to correspond) of unequal length. [L, 41 (α, 14).]

INEQUILATERAL, adj. I^{2}n-e-kwi^2-la^{2}t′e^2-r′l. Lat., *inæquilater* (from *in*, neg., *æquus*, equal, and *latus*, a side). Fr., *inéquilatère.* Having unequal sides.

INÉQUILOBÉ (Fr.), adj. I^{2}n-a-ke-lo-ba. From *in*, neg., *æquus*, equal, and λοβός, a lobe. In natural history, divided into two lobes of unequal size. [L, 41 (α, 14).]

INEQUIVALVATE, INEQUIVALVE, adj's. I^{2}n-e-kwi^2-va^{2}lv′at, -e′kwi^2-va^{2}lv. Lat., *inæquivalvis* (from *in* neg., *æquus*, equal, and *valva*, the leaf of a door). Fr., *inéquivalve.* Having one valve differing in size or shape from the other. [L, 206 (α, 27).]

INERM, INERMOUS, adj's. I^{2}n-u^{5}rm′, -u^{5}rm′u^{3}s. Lat., *inermis, inermus* (from *in* neg., and *arma*, arms). Fr., *inerme.* Ger., *unbewaffnet, unbewehrt, wehrlos.* Unarmed; of plants, destitute of prickles. [B, 1, 19, 116, 123 (α, 24); α. 45.]

INERT, adj. I^{2}n-u^{5}rt′. Lat., *iners.* Fr., *inerte.* Ger., *kraftlos.* It., Sp., *inerte.* Inactive, inoperative, having no power; of a seed, destitute of the force or vigor necessary for its development. [B, 123 (α, 24).]

INERTIA (Lat.), n. f. I^{2}n-u^{5}r(e^{2}r)′shi^2(ti^2)-a^3. Fr., *inertie.* Ger., *Trägheit.* It., *inerzia.* Sp., *inercia.* 1. The tendency of a body to maintain its condition of repose unless acted upon by disturbing forces. 2. Sluggishness, lack of activity. [B; α, 17.]—**Uterine i.** Lat., *i. uteri.* Fr., *inertie* (ou *paresse*) *utérine* (ou *de la matrice*). Ger., *Trägheit der Gebärmutter.* Inaction or diminished action of the uterus during parturition; especially (according to Wigand) the first of his three degrees of powerless labor, the intervals between the pains being abnormally long. [A, 20.] See also ATONY *of the uterus* and PARALYSIS *of the uterus.*

INERTNESS, n. I^{2}n-u^{5}rt′ne^{2}s. The state of being inert.

INESIS (Lat.), **INETHMOS** (Lat.), n's f. and m. I^{2}n-e(a)′si^{2}s, i^{2}n-e^{2}th′mo^{2}s. Gen., *-es′eos* (*-is*), *-eth′mi.* Gr., ἴνησις, ἰνηθμός (from ἰνεῖν, to empty). 1. Of Hippocrates, an emptying or purging. 2. An excretion or evacuation. [A, 311 (α. 17); L, 50 (α, 14).]

INEXTENSILINGUAL, adj. I^{2}n-e^{2}x-te^{2}ns-i^2-li^{2}n^2′gwa^{2}l. From *in* neg., *extendere*, to extend, and *lingua*, the tongue. Not able to extend the tongue beyond the mouth. [L, 180 (α, 39).]

INEXUVIABLE, adj. I^{2}n-e^{2}x-u^2′vi^2-a^2-b′l. From *in* neg., and *exuere*, to draw off. Of birds, not molting. [L, 180 (α, 39).]

INFANCY, n. I^{2}n′f^{2}n-si^2. Lat., *infantia* (from *infans*, speechless). Fr., *enfance.* Ger., *Kindheit.* It., *infanzia.* Sp., *infancia.* 1. Early childhood, before the child can talk and walk. 2. In English law, the age of one's minority. [A, 316.]

INFANS (Lat.), n. m. I^{2}n′fa^{2}nz(fa^{3}ns). Gen., *-fant′is.* See INFANT.—**I. recens natus.** See NEONATUS.

INFANT, n. I^{2}n′f′nt. Lat., *infans* (from *in*, neg., and *fari*, to speak). Fr., *enfant.* Ger., *Kind.* 1. A child not yet old enough to talk and walk. 2. In English law, a person under twenty-one years of age. [A, 316.]

INFANTIA (Lat.), n. f. I^{2}n-fa^{2}n(fa^{3}n)′shi^2(ti^2)-a^3. See INFANCY.

INFANTICIDE, n. I^{2}n-fa^{2}nt′i^2-sid. From *infans*, an infant, and *cædere*, to slay. Fr., *i.* Ger., *Kindermord* (1st def.), *Kindesmörder* (2d def.). It., Sp., *infanticidio* (1st def.), *infanticida* (2d def.). 1. Child-murder. 2. One who kills, murders, or destroys an infant. [L, 30, 41, 44, 93, 107 (α, 14).]

INFANTILE, adj. I^{2}n′fa^{2}n-ti^{2}l(til). Lat., *infantilis* (from *infans*, a little child). Fr., *i.* Ger., *kindlich, Kindes-, Kinder-.* It., *infantile.* Sp., *infantil.* 1. Pertaining to infancy. 2. Occurring in infants. 3. Having the characteristics of infancy.

INFARCT, n. I^{2}n′fa^{3}rkt. Gr., ἔμφραγμα. Lat., *infarctus* (from *infarcire*, to stuff into). Ger., *I., Infarkt.* It., Sp., *infarto.* 1. The lesion of infarction; a plug in a duct or blood-vessel, or an extravasation of blood, together with the surrounding engorgement dependent on the obstruction. 2. A nodular deposit of chronic inflammatory products in the substance of a tissue or organ. [A, 326 (α, 21); A, 385.]—**Calcareous i.** Ger., *Kalkinfarkt.* An i. in which the plug consists of calcareous matter. [A, 326 (α, 21).]—**Dissecting i.** Ger., *dissecirender I.* An i. which has stellate branches extending out into the inflamed tissue surrounding the main infarction. [α, 40.]—**Dry i.** A hæmorrhagic i. in which the moisture has been replaced by fat cells, and, being deprived of the oxygen and moisture necessary for putrefaction, may remain unchanged for an indefinite period. [α, 40.]—**Gallenpigmenti'** (Ger.). The infiltration of a conical area of the kidney with bile pigment. [α, 40.]—**Pigment i.** Ger., *Pigmenti'.* A form of i. described by Virchow in which large masses of pigment are found in the urinary tubules. [D, 3.]—**Pyæmic i.** An i. due to the obstruction of the blood-vessel supplying an area by a pyæmic embolus. It is especially seen in the lungs, kidney, and spleen. [Delafield (α, 40).]—**Uterusi'** (Ger.). See *Uterine* INFARCTION.—**Yellow i.** An opaque, yellowish, white conical patch found beneath the capsule of the spleen or kidney, following the obstruction of a blood-vessel in the organ. It consists of necrosed tissue with some fragments of disorganized and decolorized blood-clot. [Ziegler (α, 40).]

INFARCTED, adj. I^{2}n-fa^{3}rkt′e^{2}d. 1. Wedged in. [D.] 2. Affected with infarction.

INFARCTION, n. I^{2}n-fa^{3}rk′shu^{3}n. Lat., Fr., *infarctus.* Ger., *Infarkt, Infarcirung.* It., *infarto.* Sp., *infarto, obstrucción por repleción.* 1. An old term for intestinal obstruction due to hard masses of more or less imperfectly digested food. It is still sometimes used in that sense. [A, 304 (D).] 2. The formation of an infarct. 3. The state of being affected with infarcts. 4. An infarct.—**Embolic i.** An i. due to the obstruction of the main blood-vessel of a given area by an embolus. [α, 40.]—**Fibrinous i.** A form of i. in which, instead of the necrotic process, a fibrous organization of

the infarct has taken place. [α, 40.]—**Hæmorrhagic i.** Ger., *hämorrhagischer Infarkt.* 1. One of the consequences of embolism. It occurs in the form of a wedge-shaped spot of bloody infiltration in organs in which, between the obstruction and the capillaries, insufficient, inconstant, or no arterial anastomoses exist; also in organs in which the veins are without valves. The lungs, spleen, and kidneys are often affected. 2. A large effusion of blood connected with great separation of the tissues and with little or no destruction of them. [D, 3.] See, also, *Pulmonary* APOPLEXY.—**Metastatic i.** An i. due to obstruction of the blood-vessel supplying a given area by a metastatic embolus. [α, 40.]—**Red i.** See *Hæmorrhagic i.*—**Renal i.** Lat., *infarctus renalis.* Ger., *Harnsäureinfarkt der Neugeborenen.* I. of the kidney in the newly born; characterized by sharply outlined, yellowish striping of the pyramids, especially in the papillæ. [D, 29.]—**Uterine i.** Lat., *infarctus uteri.* Ger., *Uterusinfarkt.* A term sometimes applied to subinvolution and to engorgement of the uterus.—**White i. of the placenta.** A hæmorrhagic i. of the placenta in which the coloring matter has been absorbed, leaving a cone-shaped mass of white solid tissue on the maternal side of the placenta. [W. L. Reed, J. Coats, "Glasgow Med. Jour.," June, 1891, p. 464 (α, 40).]

INFARCTUS (Lat.), n. m. I^{2}n-fa^{3}rkt'u^{3}s(u^{4}s). Fr., *i.* See INFARCT and INFARCTION.—**I. hæmoptoicus Laennecii.** Ger., *hämoptoïscher Lungeninfarkt.* Infarction of the lungs as a result of hæmoptysis, first described by Laennec. It is not infrequently found in autopsies on new-born infants, and may be complicated with pyæmia, etc. [D, 29.]—**I. intestinorum.** See INFARCTION (1st def.).—**I. mammæ lacteus.** A nodular condition of the mammary gland due to obstruction and accumulation of milk in the galactophorous ducts. [α, 40.]—**I. renalis.** See *Renal* INFARCTION.—**I. uratique** (Fr.). A yellowish or blanched area of the urinary tubules shut off from the rest of the kidney by impaction of a small stone or gravel. [α, 40.]—**I. uteri.** See *Uterine* INFARCTION.—**Red i.** See *Hæmorrhagic* INFARCTION.

INFARKT (Ger.), n. I^{2}n-fa^{3}rkt'. See INFARCT and INFARCTION.—**Hämoptoïscher Lungeni'.** See INFARCTUS *hæmoptoicus Laennecii.*—**Harnsäurei'.** See *Renal* INFARCTION.—**Kalki'.** See *Calcareous* INFARCT.—**Niereni'.** See *Renal* INFARCTION.

INFARZIRUNG (Ger.), n. I^{2}n-fartz-er'un^2. See INFARCTION.

INFATIGABLE (Fr.), adj. A^{2}n^2-fa^3-te-ga^3-bl'. From *in* neg., and *fatigare*, to weary. See ACAMATHOS.

INFÉCOND (Fr.), adj. A^{2}n^2-fa-ko^{2}n^2. From *infecundus*, unfruitful. See STERILE.

INFECTANT, adj. I^{2}n-fe^{2}k't'nt. Fr., *i.* Ger., *ansteckend.* It., *infettante.* Sp., *infectante.* Capable of infecting, tainting, or producing disease. [α, 40.]

INFECTED, adj. I^{2}n-fe^{2}kt'e^{2}d. Fr., *infecté.* Ger., *angesteckt.* It., *infetto, infettado.* Sp., *infecto, infectado.* Tainted, affected, or infused with morbid or noxious material. [α, 40.]

INFECTIEUX (Fr.), adj. A^{2}n^2-fe^{2}k-se-u^5. See INFECTIOUS.

INFECTIO (Lat.), n. f. I^{2}n-fe^{2}k'shi^2(ti^2)-o. Gen., *-on'is.* See INFECTION.—**I. per partum.** I. communicated from the mother to her infant at the time of delivery. [G.]—**I. purulenta.** See PYÆMIA.

INFECTION, n. I^{2}n-fe^{2}k'shu^{3}n. Lat., *infectio* (from *inficere*, to dye). Fr., *i.* Ger., *I., Ansteckung.* It., *infezione.* Sp., *infección.* 1. The act or process by which disease is set up in an organism by the implantation of morbific germs from without, or of a part of the organism by the conveyance of such germs from another part. I. differs from contagion (*q. v.*) in the fact that the germs are not necessarily transferred from another organism, and, as used by some writers, in the further fact that, when they are, contact of the two organisms is not requisite. 2. The material by which communicable diseases are propagated.—**Acute septic i.** 1. The infection of the system with septic material from a dead fœtus *in utero.* [Gerhardt (α, 40).] 2. The i. of the system by the absorption of septic germs through a wound. [α, 40.]—**Auto-i.** See *Self-i.*—**I. au passage** (Fr.). Infection of the child with syphilis from an initial lesion in the mother during childbirth. [α, 40.]—**I. by vicinity.** Of Virchow, the reproduction of a tumor in a neighboring part without any visible connection between it and the original growth. [α, 40.]—**I. post-initiale** (Fr.). The transportation of the syphilitic virus from the initial lesion to a remote portion of the body. [Laug (α, 40).]—**I. putride aiguë** (Fr.). See GANGRÈNE *gazeuse foudroyante.*—**I'sfähigkeit** (Ger.). 1. Capability of infecting. 2 Susceptibility to infection.—**I'skrankheit** (Ger.). See the major list.—**I'sstoff** (Ger.). See CONTAGIUM.—**Intra-uterine i.** Fr., *i. intra-utérine.* Syphilitic infection of the child *in utero.* [α, 40.]—**Intra-uterine septische I.** (Ger.). The i. of the child *in utero* with septic germs due to disease of the mother. [L, 57 (α, 40).]—**Intravaginale septische I.** (Ger.). The i. of the child during childbirth with septic material in the vagina. [α, 40.]—**Miasmatic i.** Ger., *miasmatische I.* I. arising from a miasma independently of a diseased organism. [A, 326 (α, 21).]—**Parish i.** In England, a common term for a disease which prevails in crowded districts as the result of bad hygiene. It is of the same type with typhus and relapsing fevers. [D, 52.]—**Placentäre I.** (Ger.), **Placentari'** (Ger.). Syphilitic i. of the placenta. [α, 40.]—**Postconceptionelle I.** (Ger.). I. of the child with syphilis acquired by the mother after conception. [A, 319 (α, 40).]—**Purulent i.** Fr., *i. purulente.* See PYÆMIA.—**Putrid i.** Fr., *i. putride.* See SEPTICÆMIA.—**Self-i.** Fr., *auto-i.* Ger., *Selbsti'.* I. of the organism at large or of a fresh portion of it from a pre-existing source within itself.—**Septic i.** Ger., *septische I.* The invasion of a wound by septic germs such as interfere with the normal progress of healing, or induce suppuration. It may or may not be followed by septicæmia. [α, 40.]—**Septic i. of the blood.** See SEPTICÆMIA.—**Spermatische I.** (Ger.). The infection of the child with syphilis through the semen of the father. [A, 319 (α, 40).]—**Systemic i.** I. of the organism at large with a disease previously only local.—**Telluric i.** The i. of the system by miasma proceeding from the earth. [α, 40.]

INFECTIONNISTE (Fr.), n. A^{2}n^2-fe^{2}k-se-o^{3}n-nest. One who considers certain diseases as propagated by infection. [L, 41.]

INFECTIONSKRANKHEIT (Ger.), n. I^{2}n-fe^{2}k-tse-ons'-kra^{3}n^{2}k-hit. An infectious disease.—**Contagiöse I.** An infectious disease in which the element of contagion is also strongly marked (*e. g.*, measles, diphtheria, etc.). [D, 66.]—**Miasmatisch-contagiöse I.** An infectious disease with both miasmatic and contagious elements, such as malignant cholera, ileo-typhus, cerebrospinal meningitis, etc. [D, 66.]

INFECTIOSITY, n. I^{2}n-fe^{2}k-shi^2-o^{2}s'i^{2}t-i^2. Fr., *infectiosité.* Ger., *Infectiosität.* Capability of causing infection. [A, 385.]

INFECTIOUS, adj. I^{2}n-fe^{2}k'shu^{3}s. Fr., *infectieux, infectueux.* Ger., *ansteckend, infectiös.* Pertaining to or of the nature of infection. [D, 1.]

INFECTIOUSNESS, n. I^{2}n-fe^{2}k'shu^{3}s-ne^{2}s. Fr., *qualité contagieuse.* Ger., *Ansteckungsfähigkeit.* The quality of being infectious. [D.]

INFECTIVE, adj. I^{2}n-fe^{2}k'ti^{2}v. Lat., *infectivus.* See INFECTIOUS.

INFECTIVITY, n. I^{2}n-fe^{2}k-ti^{2}v'i^{2}t-i^2. The quality or degree of infectiousness.

INFECTO-CONTAGION, n. I^{2}n-fek"to-co^{2}n-taj'i^2-u^{3}n. The reproducing element of infecto-miasmatic diseases, such as typhus, typhoid, and yellow fever. It is supposed to have a telluric origin, but develops in those affected with the diseases a germ or miasm which produces the particular disease in others removed from the influence of the original cause. [Ziegler (α, 40).]

INFECUND, adj. I^{2}n-fe^{2}k'u^{3}nd. Lat., *infecundus.* Fr., *infécond.* Ger., *unfruchtbar.* Sterile. [L, 50 (α, 14).]

INFECUNDITY, n. I^{2}n-fe^{2}k-u^{3}nd'i^{2}t-i^2. Lat., *infecunditas.* Fr., *infécondité.* Ger., *Unfruchtbarkeit.* See STERILITY.

INFEKTION (Ger.), n. I^{2}n-fe^{2}k-tse-on'. See INFECTION.—**Kontagiöse I.** Infection arising from contagion. [A, 326 (α, 21).]—**Miasmatisch-kontagiöse I.** Infection arising from both contagion and a miasma. [A, 326 (α, 21).]

INFERAXILLARIS (Lat.), adj. I^{2}n-fe^{2}r-a^{2}x(a^{3}x)-i^{2}l-la(la^3)'-ri^{2}s. From *inferus*, beneath, and *axilla* (*q. v.*). Fr., *inféraxillaire.* Below the axil; inferior axillary (said of leaves, spines, etc.). [B, 1 (α, 24).]

INFÈRE (Fr.), adj. A^{2}n^2-fe^{2}r. See INFERIOR.

INFERENT, adj. I^{2}n'fe^{2}r-e^{2}nt. From *inferre*, to carry into. See AFFERENT.

INFERIOR, adj. I^{2}n-fe'ri^2-o^{2}r. Lat., *inferus.* Fr., *inférieur, infère.* Ger., *unterständig.* Situated below; in botany, growing below another organ (said of ovaries below a calyx, calyces below ovaries, etc.). [B, 1, 123 (α, 24).]—**Half-i.** Lat., *semi-inferus.* Ger., *halbunterständig.* Partially i., like the ovary in many of the *Saxifragaceæ.* [B, 77, 123 (α, 24).]—**I. urethræ.** Of Spigelius, see BULBO-CAVERNOSUS.

INFERNA (Lat.), n., n. pl. of *infernus*, nether. I^{2}n-fu^{5}rn-(fe^{2}rn)'a^3. An old name for the abdomen. [L, 349.]

INFERNAL, adj. I^{2}n-fu^{5}r'n'l. Lat., *infernalis* (from *infernum*, hell). Fr., *i.* Ger., *höllisch, Höllen-.* It., *infernale.* Sp., *i.* Lit., hellish; very disagreeable or harsh (see LAPIS *infernalis*). [A, 322.]

INFEROBRANCHIATE, adj. I^{2}n-fe^{2}r-o-bra^{2}n^2'ki^2-at. From *inferus*, neither, and βράγχιον, a gill. Having the branchiæ projecting from the lower side of the body. The *Inferobranchia* and the *Inferobranchiata* of Cuvier and others are an order of molluscs characterized by having the gills projecting from under the border of the mantle. [L, 180 (α, 39).]

INFEROCOSTAL, adj. I^{2}n-fe^{2}r-o-ko^{2}s't'l. From *inferus*, nether, and *costa*, a rib. Pertaining to the lower border of, or beneath, a rib. [α, 40.]

INFEROFRONTAL, adj. I^{2}n-fe^{2}r-o-fru^{3}n't'l. From *inferus*, lower, and *frons*, the forehead. Pertaining to the lower portion of the frontal lobe of the cerebrum. [α, 29.]

INFÉRO-SUPÈRE (Fr.), adj. A^{2}n^2-fa-ro-su^6-pe^{2}r. Of a fruit, inferior as regards the corolla, and superior as regards the calyx. [B, 38 (α, 14).]

INFÉROVARIÉ (Fr.), adj. A^{2}n^2-fa-ro-va^3-re-a. In botany, having the ovary inferior. [B, 38 (α, 14).]

INFERSCUL, n. In Morocco, the *Cistus salvifolius.* ["Proc. of the Am. Pharm. Assoc.," xxiii (α, 39).]

INFEUILLÉ (Fr.), adj. A^{2}n^2-fu^5-el-ya. See APHYLLOUS.

INFIBULATION, n. I^{2}n-fi^{2}b-u^{2}l-a'shu^{3}n. Lat., *infibulatio* (from *infibulare*, to clasp together), *fibulatio.* Fr., *i., bouclement.* Ger., *Zusammenheftung.* The passage of a ring (fibula) through the prepuce, or through the labia pudendi, to prevent sexual intercourse. [E.]

INFICIRUNG (Ger.), n. I^{2}n-fi^{2}tz-er'un^2. See INFECTION.

INFILTRATE, n. I^{2}n-fi^{2}lt'rat. Ger., *Infiltrat.* Material diffused by infiltration.

INFILTRATED, adj. I^{2}n-fi^{2}lt'rat-e^{2}d. Lat., *infiltratus.* Fr., *infiltré.* Ger., *infiltrirt, eingesickert.* It., *infiltrato.* Sp., *infiltrado.* 1. Diffused by infiltration. 2. Affected with infiltration. [D.]

INFILTRATING, adj. I^{2}n-fi^{2}lt'rat-i^{2}n^2. Lat., *infiltrans.* Fr., *infiltrant.* Ger., *infiltrirend.* Extending by infiltration.

INFILTRATIO (Lat.), n. f. I^{2}n-fi^{2}l-tra(tra^3)'shi^2(ti^2)-o. Gen., *-on'is.* See INFILTRATION.—**I. adiposa hepatis.** Fatty i. of the liver. [D, 67.]

INFILTRATION, n. I^{2}n-fi^{2}l-tra'shu^{3}n. Lat., *infiltratio.* Fr., *i.* Ger., *Durchsickerung.* 1. A process or a condition by virtue of which foreign substances are deposited in and diffused through a structure (*e. g.*, from the blood into the tissues, the result being often a partial or complete destruction of the tissues). 2. See INFILTRATE. [D, 3.]—**Albuminoid i., Albuminous i., Amyloid i.** Fr., *i. albumineuse, i. amyloïde.* Ger., *albuminöse I., Amyloïdi'.* See *Amyloid* DEGENERATION.—**Black i. of the lungs.** Of Gregory, see ANTHRACOSIS (4th def.).—**Bluti'** (Ger.). See *Sanguineous i.*—**Calcareous i.** Fr., *i. calcaire.* See *Calcareous* DEGENERATION.—**Cellular i.** The effusion of white blood-cells into the parenchyma of a tissue about to inflame. [α, 40.]—**Circumscribed gummatous i.** A circumscribed gumma developed between the bone and its adjacent membrane, whether dura mater or periosteum. [α, 40.]—**Cholesterin i.** See *Cholesterin* DEGENERATION.—**Colloid i.** See *Colloid* DEGENERATION and *Amyloid* DEGENERATION.—**Diffuse gummatous i.** A more or less diffuse deposit of gummatous tissue throughout the entire substance of a bone. [α, 40.]—**Dropsical i.** Ger., *hydropische I.* See ŒDEMA.—**Eitrige I.** (Ger.). See *Purulent I.*—**Fatty i.** Fr., *i. graisseuse.* Ger., *Fetti', fettige I.* The i. of tissues with fatty matter brought to them in the blood. [D, 3.]—**Fatty i. of the heart.** Excessive development of the subpericardial fat with which may be associated fatty degeneration of the heart. [D, 68.]—**Fibrinous i.** The effusion of the fibrinous elements of the blood into the parenchyma of an inflaming tissue. [α, 40.]—**Fibroid i.** I. of an infarct with fibroid tissue. [α, 40.]—**Gelatinous i.** Jelly-like tuberculous i. The injection of a gray, semi-transparent, gelatinous material into the intervals between miliary tubercles. [α, 40.]—**Gummatous i.** The invasion of the cancellous tissue of bone by gummata. [α, 40.]—**Hæmorrhagic i.** I. with blood.—**Harni'** (Ger.). See *Urinary i.*—**Hydropische I.** (Ger.). See ŒDEMA.—**Inflammatory i.** The i. of a part with inflammatory products. [α, 40.]—**Markige I.** (Ger.). See *Myeloid i.*—**Medullary i.** An anatomical condition in typhoid fever in which several of the diseased intestinal glands or groups of glands coalesce; considered pathognomonic of the disease. [D, 1.]—**Mucous i.** Mucoid softening. [α, 40.]—**Myeloid i.** Ger., *markige I.* The i. of bone by the peculiar nucleated cells which go to make up medullary tumors. It is generally but not always benign. [α. 40.]—**Œdematous i.** See ŒDEMA.—**Opaque i. of bone.** Of Nélaton, the second stage of tuberculous i. of bone. It is characterized by a dull yellow color of the infiltrated portion, by the absence of blood-vessels, and by hypertrophy of the cancellous tissue of the bone, which may extend to the obliteration of its spaces. [α, 40.]—**Pigmentary i.** See *Pigmentary* DEGENERATION.—**Plastic i.** I. with plastic material. [α, 40.]—**Pneumonic i.** I. of the walls of the air cells or the interstitial pulmonary tissue with material which is either the result of hyperplastic development of the original elements of the parts or is adventitious (*e. g.*, tubercles). The latter is also called tubercular. [D, 1.]—**Puriform i. of bone.** See *Opaque i. of bone.*—**Purulent i.** Fr., *i. purulente.* Ger., *eitrige I.* Syn.: *purulent œdema* [Pirogoff]. I. with pus. diffuse suppuration. [D.]—**Saline i.** See *Calcareous* DEGENERATION.—**Sanguineous i.** Fr., *i. sanguine.* Ger., *Bluti'.* I. with blood.—**Semi-transparent i. of bone.** Of Nélaton, the first stage of tubercular i. of bone. It is characterized by the deposit of a gray. opaline material in the spaces of the spongy tissue, resembling brain substance in appearance, which can not be washed out by an ordinary stream of water. It does not modify the density of the bone tissue. [α, 40.]—**Serous i.** Fr., *i. séreux.* See ŒDEMA.—**Tubercular i., Tuberculous i.** Fr., *infiltration tuberculeuse.* Ger., *tuberculöse I.* I. with tubercle.—**Uratic i.** Fr., *i. uratique.* See *Uratic* DEGENERATION.—**Urinary i.** Fr., *i. d'urine.* Ger., *Harni'.* I. with extravasated urine.—**Waxy i.** See *Amyloid* DEGENERATION.

INFILTRIRT (Ger.), adj. I^{2}n-fi^{2}lt-rert'. See INFILTRATED.

INFIMUS (Lat.), adj., superl. of *inferus*, low. Ger., *unterste.* Lowest (said of the relative position of plant-organs). [B, 123 (α, 24).]

INFINITE, adj. I^{2}n'fi^{2}n-i^{2}t. Lat., *infinitus* (from *in*, neg., and *finis*, a limit). Ger., *unbegrenzt, unendlich.* It., Sp., *infinito.* Unlimited.

INFINITESIMAL, adj. I^{2}n-fi^{2}n-i^2-te^{2}s'i^2-m'l. Fr., *infinitési mal.* Ger., *i.* It., *infinitesimale.* Sp., *i.* Infinitely small. [L, 107.]

INFINITOVISME (Fr.), n. A^{2}n^2-fe-ne-to-vez-m'. The doctrine of the infinitovists. [L, 41 (α, 14).]

INFINITOVIST, n. I^{2}n-fi^{2}n-i^{2}t'ov-i^{2}st. Fr., *infinitoviste.* The follower of a doctrine according to which generation is caused by the evolution of germs contained infinitely one within the other. [L, 41, 49 (α, 14).]

INFIRM, adj. I^{2}n-fu^{5}rm'. Fr., *infirme.* Ger., *kränklich, schwach.* It., *infermo.* Sp., *enfermizo, débil.* Weak or disabled from age or disease.

INFIRMARY, n. I^{2}n-fu^{5}rm'a^{2}r-i^2. Lat., *infirmarium.* Fr., *infirmerie.* Ger., *Krankenstube, Krankenhaus.* It., *infermeria.* Sp., *enfermeria.* A hospital or dispensary.

INFIRMIER (Fr.), n. A^{2}n^2-fer-me-a. A male nurse, especially in hospitals. [L. 41 (α, 14).]

INFIRMIÈRE (Fr.), n. A^{2}n^2-fer-me-e^{2}r. A female hospital nurse.

INFIRMITY, n. I^{2}n-fu^{5}rm'i^{2}t-i^2. Lat., *infirmitas.* Fr., *infirmité.* Ger., *Kränklichkeit.* It., *infermità.* Sp., *enfermedad constitucional.* A general weakness or disease, especially if it produces disability. [L, 50 (α, 14).]

INFLAME, v. tr. and intr. I^{2}n-flam'. Lat., *inflammare.* Fr., *enflammer.* Ger., *entzünden.* It., *infiammare.* Sp., *inflamar.* 1. (Tr.) to set on fire; to kindle desire, to excite violently, to affect with inflammation. 2. (Intr.) to take fire; to become affected with inflammation.

INFLAMED, adj. I^{2}n-flamd'. Lat., *inflammatus.* Fr., *enflammé.* Ger., *entzündet.* It., *infiammato.* Sp., *inflamado.* 1. Ignited. 2. In a state of inflammation. [L, 107.]

INFLAMMABILITY, n. I^{2}n-fla^{2}m-a^2-bi^{2}l'i^{2}t-i^2. Fr., *inflammabilité.* Ger., *Entzündbarkeit.* The quality of being inflammable.

INFLAMMABLE, adj. I^{2}n-fla^{2}m'a^2-b'l. Fr., *i.* Ger., *entzündbar.* Easily set on fire.

INFLAMMATIO (Lat.), n. f. I^{2}n-fla^{2}m(fla^{3}m)-ma(ma^3)'shi^2-(ti^2)-o. Gen., *-on'is.* From *inflammare*, to set on fire. Inflammation; in Young's classification of diseases, a genus of the *Parhæmasiæ.* order *Phlogismi.* [L, 290.]—**I. adhæsiva.** See *Adhesive* INFLAMMATION.—**I. asthenica.** See *Asthenic* INFLAMMATION.—**I. catarrhalis.** See CATARRH.—**I. debilis.** See *Asthenic* INFLAMMATION.—**I. erysipelatodes, I. erysipelatosa, I. erythema.** See ERYSIPELAS.—**I. exanthematica.** An exanthem. [L, 135 (α, 39).]—**I. exulcerans.** See *Ulcerative* INFLAMMATION.—**I. interstitialis.** See *Interstitial* INFLAMMATION.—**I. latens.** See *Latent* INFLAMMATION.—**I. neuroparalytica.** See *Neuroparalytic* INFLAMMATION.—**I. occulta.** See *Latent* INFLAMMATION.—**I. œdematosa.** See *Œdematous* INFLAMMATION.—**I. parenchymatosa.** See *Parenchymatous* INFLAMMATION.—**I. passiva.** See *Passive* INFLAMMATION.—**I. pectoris.** See PLEURISY.—**I. pectoris acuta.** Pneumonia. [α, 40.]—**I. per contiguitatem.** See INFLAMMATION *by contiguity.*—**I. per continuitatem.** Inflammation of a part due to the extension of the process from an adjacent part. [Virchow (α, 40).]—**I. periorbitæ.** See OPHTHALMIA.—**I. phagedænica.** See PHAGEDÆNA.—**I. pharyngea.** See PHARYNGITIS.—**I. phlegmonodes.** See *Phlegmonous* INFLAMMATION.—**I. putrida.** See *Putrid* INFLAMMATION.—**I. rheumatica.** See *Inflammatory* RHEUMATISM.—**I. serosa.** See *Serous* INFLAMMATION.—**I. specifica.** See *Specific* INFLAMMATION.—**I. sthenica.** See *Sthenic* INFLAMMATION.—**I. suppurativa.** See *Suppurative* INFLAMMATION. **I. symptomatica.** See *Symptomatic* INFLAMMATION.—**I. torpida.** See *Asthenic* INFLAMMATION.—**I. traumatica.** See *Traumatic* INFLAMMATION.—**I. ulcerativa.** See *Ulcerative* INFLAMMATION.—**I. ustoria.** Of Cullen, a burn or scald. [L, 290.]

INFLAMMATION, n. I^{2}n-fla^{2}m-ma'shu^{3}n. Lat., *inflammatio* (from *inflammare*, to inflame). Fr., *i.* Ger., *Entzündung.* It., *infiammazione.* Sp., *inflamación.* 1. "A complex morbid process characterized by a suspension of the concurrent exercise of function among the minute elements of the tissue involved by stagnation of the blood and abnormal adhesiveness of the blood-discs in the capillary vessels contiguous to the tissue elements whose functions are suspended; by contraction of the minute arteries leading to the capillaries of the affected part, with subsequent dilatation and paralysis of the contractile tissue. The nutritive relations between the blood and the minute component elements of the affected tissue become visibly altered, and, if the disease persists, an appreciably excessive interstitial exudation infiltrates the affected tissue, with a constant tendency to a profusion of growth, to which this interstitial exudation ministers abundant nutrition. This excessive exudation which follows as a result of the inflammatory state is apt to be associated with an unhealthy condition of the blood and of the blood-plasma, giving rise to varied forms of i., and associated with varied forms of new growth, according to (1) the elementary structure in which it occurs; (2) the specific constitutional or local disease with which this complex morbid process may coexist; and (3) the progress of the i., the amount and suddenness of the effusion, the extent of tissue involved, the diminished vascularity, and the powers of absorption of the surrounding parts." [A, 2.] 2. In chemistry, combustion or ignition.—**Adhesive i.** Lat., *inflammatio adhæsiva.* A form of i. accompanied by plastic exudation and tending to cause adhesion of adjacent surfaces.—**Adynamic i.** Lat., *inflammatio adynamica.* See *Asthenic i.*—**Anthracic i's.** Fr., *i's charbonneuses.* The i's of malignant pustule. [Nysten (α, 40).]—**Aplastic i.** An i. accompanied by an exudate of aplastic lymph, which will not form embryonic tissue. [α, 40.]—**Articular i.** See ARTHRITIS.—**Asthenic i.** Lat., *inflammatio asthenica* (seu *debilis*). Fr., *i. asthénique.* Ger., *asthenische Entzündung.* An i. which affects parts that are poorly nourished and disposed to degenerations. The asthenic i's arise from slight irritations, and include most chronic i's. [D, 3.]—**Caseous i.** See *Cheesy i.*—**Catarrhal i.** See CATARRH.—**Cellular i.** I. of connective tissue. [E, 27.]—**Cheesy i.** Fr., *i. caséeuse.* Ger., *käsige Entzündung.* An i. in which the purulent or fibrino-purulent exudation, or desquamated epithelium, has lost so much of its watery elements that a dry, grayish-yellow mass remains firmly imbedded in the tissue. [D, 3.]—**Chronic i.** Lat., *inflammatio chronica.* Fr., *i. chronique.* Ger., *chronische Entzündung.* I. that follows a protracted course.—**Congestive i.** Fr., *i. congestive.* Ger., *congestive Entzündung.* An i. chiefly due to congestive hyperæmia, characterized by redness and swelling, the latter being increased by the accompanying serous, mucous, or sero-purulent exudation. [D, 3.]—**Contagious i.** Of Hutchinson, i. which is propagated by the direct inoculation of its own secretions (*e. g.*, syphilis, gonorrhœa, purulent ophthalmia, etc.). [α, 40.]—**Croupous i.** Ger., *croupöse Entzündung.* I. attended by the presence of a croupous exudate. [D, 4.]—**Degenerative i.** Fr., *i. dégénérative.* An i. which produces in the tissue involved a degenerative action such as fatty degeneration or gangrene. [α, 40.]—**Delimiting i.** See *Eliminative i.*—**Desquamative i.** An i. of the skin, and sometimes of the mucous membrane, characterized by excessive desquamation of the epithelial cells. [α. 40.]—**Destructive i.** Fr., *i. destructive.* See *Ulcerous i.*—**Diffused i.** An i. in which the inflammatory process and exudations are more or less diffused throughout the tissues of a part. [α, 40.]—**Diphtheritic i.** Ger., *diptheritische Entzündung* An i. due to diphtheria. [D.]—**Dry i.** I. without exudation. [α, 40.]—**Dyscrasic i.** Fr., *i. dyscrasique.* Ger., *dyskrasische Entzündung.* Of Perls, a term (not generally accepted among pathologists), based on the theory of the humoral pathology, for an i. due to dyscrasia or abnormal mixt-

ure of the elements of the blood. It is supposed to be by virtue of this condition that a ready susceptibility to i. exists in certain parts or organs in many individuals. [D, 3, 4.]—**Eliminative i.** An i. set up around a tumor or foreign body for relieving the tissues of its presence. [Nysten (α, 40).]—**Embolic i.** 1. An i. due to the presence of a septic embolus. 2. An i. produced by the presence of an embolus in the artery supplying an area. [α, 40.]—**Erethitic i.** I. in which there is abnormal irritability or sensitiveness to pain in the part. [α, 40.]—**Erysipelatous i., Erythematic i.** See Erysipelas.—**Exudative i.** Fr., *i. exudative.* An i. characterized by an exudation of serous, mucous, fibrinous, or purulent material. [L, 135 (α, 39).]—**Fibrinous i.** Fr., *i. fibrineuse.* I. characterized by a large proportion of fibrin in the exudation. [α, 40.]—**Gangrenous i.** See Gangrene.—**General i.** Of G. Fordyce, continued fever not dependent upon any localized i. [α, 40.]—**Gonorrhœal i.** See Gonorrhœa.—**Gouty i.** I. due to a gouty diathesis. [α, 40.]—**Hæmorrhagic i.** An i. in which the exudation is infiltrated with blood. [α 40.]—**Healthy i.** Of Hunter, i. which progresses to a union of parts without any great destruction of tissue substance. [Gross (α, 40).]—**Hyperplastic i.** An i. chiefly characterized by the formation of new connective tissue. [E, 27.]—**Hypersthenic i.** Fr., *i., hypersthenique.* Ger., *hypersthenische Entzündung.* An i. in which the local transformation of tissue is so considerable that the part is destroyed by gangrene. [D, 3.]—**Hypostatic i.** An i. slowly developed from passive hyperæmia, in which the weakened heart's action, or a pressure from without on the skin, or the products of secretion in the bronchi, lungs, urinary passages, etc., act as an irritant (*e. g.*, a bed-sore). [D, 3.]—**Indurative i.** An i. which causes excessive induration of the tissues, which may persist indefinitely. [α, 40.]—**Infective i.** I. due to infection. ["Med. Times and Gaz.," 1871, p. 633 (α, 40).]—**I. caséeuse** (Fr.). See *Cheesy i.*—**I. by contiguity.** Lat., *inflammatio per contiguitatem.* I. that spreads to parts in contact with the seat of the primary i., but not continuous with it. [A, 326 (α, 21).]—**I. by continuity.** Lat., *inflammatio per continuitatem.* I. that spreads through a continuous tissue. [A, 326 (α, 21).]—**I. d'entrailles des femmes enceintes** (Fr.). Of De la Roche, puerperal fever. [A, 84.]—**I. destructive** (Fr.). See *Ulcerous i.*—**I. organisatrice** (Fr.). See *Productive i.*—**Interstitial i.** Lat., *inflammatio interstitialis.* I. of the connective tissue of an organ. [A, 326 (α, 21).]—**Latent i.** Ger., *undeutliche Entzündung.* An i. which exists for a longer or shorter time without manifest symptoms. [Gross (α, 40).]—**Malignant i.** I. due to the invasion of a part by malignant growths, such as sarcoma, carcinoma, etc. [α, 40.]—**Membranous i.** See *Croupous i.*—**Metastatic i.** An i. transferred from an inflamed part to a part more or less distant through the agency of emboli and collateral hyperæmia at the obstructed part, or of an irritant in the blood. [D, 3.]—**Mucous i.** Ger., *schleimige Entzündung.* A catarrh accompanied by a copious production of mucus. [D, 3.]—**Necrotic i.** An i. in which the inflamed part is destroyed by the process. [E, 27.]—**Necrotic-reparative i.** An i. (*e. g.*, in a bruised tissue) in which the affected part is partly destroyed, but eventually regains its activity. [E, 27.]—**Neuroparalytic i., Neuropathic i.** Lat., *inflammatio neuroparalytica.* An i. in a part due to impairment or loss of its trophic nerve supply. [D, 4.] Cf. *Asthenic i.*—**Œdematous i.** Lat., *inflammatio œdematosa.* I. in which there is such an amount of serum exuded into the tissue that it pits upon pressure. [α, 40.]—**Parasitic i.** Fr., *i. parasitique.* Ger., *parasitäre Entzündung.* I. caused by animal or vegetable parasites. [D, 3; α, 45.]—**Parenchymatous i.** Lat., *inflammatio parenchymatosa.* Fr., *i. parenchymateuse.* Ger., *parenchymatöse Entzündung.* 1. I. of the parenchyma of a viscus, accompanied by serous infiltration and the separation of the affected endothelia, which are then discharged or absorbed or undergo cheesy degeneration. [D, 3.] 2. Of Virchow, i. of such a kind that the elementary components of the tissues only are involved, without any appreciable exudation in the interstices or on the free surface of a membrane—a process established locally between the capillaries, the blood, and the tissue elements, expressed by a tendency merely to such effusion of plastic material as may eventually take place from the blood-vessels. [A, 2.]—**Passive i.** Lat., *inflammatio passiva.* An i. running a prolonged inactive course, and seeming to have become in a manner habitual to a part. [α, 40.]—**Pellicular i.** See *Diphtheritic i.*—**Pellicular intestinal i.** See *Membranous* enteritis.—**Phagedænic i.** Lat., *inflammatio phagedænica.* See Phagedæna.—**Phlegmonous i.** Cellulitis. [α, 40.]—**Plastic i.** A form of i. in which the material produced not only tends to solidify as fibrin, but is loaded with elementary colorless corpuscles, peculiar, for the most part, to serous surfaces and the surfaces of wounds. [A, 2.]—**Productive i.** Fr., *i. productive, i. organisatrice.* I. in which new cells or tissue are formed. [Delafield (α, 17).] Cf. *Exudative i.*—**Proliferous i. of the middle ear.** Fr., *i. prolifère de l'oreille moyenne.* Ger., *wuchernde Entzündung des Mittelohrs.* Of Roosa, a chronic i. of the middle ear, characterized by connective-tissue formations in the cavity of the tympanum, a dense fibrous-tissue covering to the mucous membrane of the Eustachian tube, hypertrophy of the bony walls of the tube, obstruction of the cavities of the tube and tympanum by fibrous tissue, ankylosis of the ossicula, bands of adhesion in the mastoid cells, and occasionally exostosis and hyperostosis of the bony walls. [F, 34.]—**Pseudomembranous i.** An i. attended with the formation of a false membrane. [α, 40.]—**Purulent i.** Fr., *i. purulente.* See *Suppurative i.*—**Putrid i.** Lat., *inflammatio putrida.* A septic i. in which the exudation is foul, putrid, or sanious. [α, 40.]—**Reflex i.** I. occurring in one portion of the body as the result of injury to another. [Holmes (α, 40).]—**Resolving i.** Of James, i. in which the inflamed part returns gradually and without suppuration to the normal state. [α, 40.]—**Rheumatic i.** See *Inflammatory* rheumatism.—**Secretory i.** An i. of superficial tissue elements, where an increased escape of fluid takes place from the blood and conveys the new products of growth and altered secretion along with it to the surface. [A, 2.]—**Scrofulous i.** I. dependent upon or modified by a scrofulous infection. [α, 40.]—**Septic i.** I. caused by the absorption of septic germs. [α, 40.]—**Serous i.** Lat., *inflammatio serosa.* Fr., *i. séreuse.* I. associated with profuse serous exudations. [α, 40.]—**Simple i.** I. of slight intensity without suppuration or specific characteristics. [α, 40.]—**Simple localized i.** I. without suppuration or specific characteristics, and limited to a localized area. [α, 40.]—**Specific i.** Lat., *inflammatio specifica.* Fr., *i. spécifique.* I. due to a specific poison, such as that of syphilis, tuberculosis, or typhoid fever. [α, 40.]—**Spongoid i.** [Burns]. An old term for medullary sarcoma. [A, 42.]—**Sthenic i.** Lat., *inflammatio sthenica.* Fr., *i. sthénique.* A form of i. associated with hyperalbuminosis, and apt to occur in vigorous and well-nourished persons. The local phenomena and the fever are pronounced. [D, 3.]—**Strumous i.** See *Scrofulous i.*—**Suppurative i.** Lat., *inflammatio suppurativa* (seu *suppurans*). Fr., *i. suppurative, i. purulente.* Ger., *Eiterungsentzündung, eiterige Entzündung.* I. resulting in the formation of pus. [A, 2.]—**Sympathetic i.** See *Reflex i.*—**Symptomatic i.** Lat., *inflammatio symptomatica.* I. which is the sign or symptom of another disease. [α, 40.]—**Torpid i.** See *Passive i.*—**Toxic i.** Fr., *i. toxique.* Ger., *Intoxikationsentzündung.* An i. due to poisoning of the blood or tissues or to the contact of corrosive substances. [D, 3.] Cf. *Parasitic i.* and *Septic i.*—**Traumatic i.** Lat., *inflammatio traumatica.* I. due to an injury.—**Tuberculous i.** Lat., *inflammatio tuberculosa.* Fr., *i. tuberculeuse.* Ger., *tuberkulöse Entzündung.* Of Virchow, that process in tubercular disease which resembles i. in that an exudate is poured out, which becomes lowly organized, then dies, breaks down, and leaves a node or tubercle. [D.]—**Typhoid i.** I. associated with the symptoms of severe typhoid fever, such as low mutterings, involuntary evacuations, etc. [α, 40.]—**Ulcerative i., Ulcerous i.** Lat., *inflammatio ulcerativa* (seu *exulcerans*). Fr., *i. ulcérative, i. ulcéreuse.* Ger., *geschwürige Entzündung, Verschwärungsentzündung.* A form of i. which, eventually approaching a cutaneous or mucous surface, induces a breaking up of the surface and the formation of an ulcer. [A, 2.]—**Unhealthy i.** Of John Hunter, i. of great violence and accompanied by great structural change. [Agnew (α, 40).]—**Vascular i.** An i. (usually exudative) in which the vessels of the affected part exhibit the most marked inflammatory changes. [E, 27.]

INFLAMMATIUNCULA (Lat.), n. f. I^{2}n-fla^{2}m(fla^{3}m)-ma-(ma^3)-shi^2(ti^2)-u^{3}n^2(u^{4}n^2)'ku^2(ku^4)-la^3. Dim. of *inflammatio.* A mild inflammation. [L, 135.]

INFLAMMATORY, adj. I^{2}n-fla^{2}m'a^2-to-ri^2. Lat., *inflammatorius.* Fr., *inflammatoire.* Ger., *inflammatorisch, entzündlich.* 1. Pertaining to or of the nature of inflammation. 2. In chemistry, capable of producing combustion. [B; D.]

INFLAMMATUS (Lat.), adj. I^{2}n-fla^{2}m(fla^{3}m)-mat(ma^{3}t)'u^{3}s-(u^{4}s). See Inflamed.

INFLATED, adj. I^{2}n-flat'e^{2}d. Lat., *inflatus* (from *inflare,* to blow into). Fr., *enflé.* Ger., *aufgeblasen, aufgebläht, wulstig.* Distended with air or gas; of plant-organs, bladdery, puffed out. [B, 1, 19, 77, 123 (α, 24).]

INFLATINE, n. I^{2}n-flat'en. Fr., *i.* Ger., *Inflatin.* A secondary alkaloid obtained from the seeds of *Lobelia inflata.* [A, 319 (α, 21).]

INFLATIO (Lat.), n. f. I^{2}n-fla(fla^3)'shi^2(ti^2)-o. Gen., *-o'nis.* 1. See Inflation. 2. See *Flatulent* colic.—**I. parotidum.** See Cynanche *parotidæa.*—**I. uteri.** See Physometra.

INFLATION, n. I^{2}n-fla'shu^{3}n. Lat., *inflatio* (from *inflare,* to blow into). Fr., *i.* Ger., *Aufblähung.* 1. The act or process of distending with gas. Cf. Insufflation. 2. The state of being inflated. [α, 45.]—**Cellular i.** See *Subcutaneous* emphysema.—**I. of the tympanum.** The distention of the tympanic membrane of the ear by air blown into the middle ear through the Eustachian tube. [α, 40.]—**Tympanitic i.** See Tympanites.

INFLATUS (Lat.), adj. I^{2}n-fla(fla^3)'tu^{3}s(tu^{4}s). See Inflated.

INFLÉCHI (Fr.), adj. A^{2}n^2-fla-she. See Inflexed.

INFLECTED, adj. I^{2}n-fle^{2}kt'e^{2}d. See Inflexed.

INFLECTION, n. I^{2}n-fle^{2}k'shu^{3}n. Fr., *i.* See Inflexion and Diffraction.

INFLEXED, adj. I^{2}n-fle^{2}xd'. Gr., καμπτός. Lat., *inflexus* (from *inflectere,* to bend in). Fr., *fléchi, recourbé.* Ger., *eingebogen, einwärtsgebogen, eingeschlagen.* Bent or turned abruptly inward. [B, 1, 123 (α, 24); α, 45.] Cf. Reflexed.

INFLEXIBILITY, n. I^{2}n-fle^{2}x-i^2-bi^{2}l'i^{2}t-i^2. Lat., *inflexibilitas.* Fr., *inflexibilité.* Ger., *Unbiegsamkeit.* The state of being inflexible.

INFLEXIBLE, adj. I^{2}n-fle^{2}x'i^2-b'l. Lat., *inflexibilis* (from *in,* neg., and *flextere,* to bend). Fr., *i.* Ger., *unbiegsam.* Incapable of being bent, unyielding. [α, 41.]

INFLEXION, n. I^{2}n-fle^{2}k'shu^{3}n. Lat., *inflexio* (from *inflectere,* to bend). Fr., *i.* Ger., *Einknickung, Beugung, Biegung.* It., *inflessione.* Sp., *inflexión.* A bending, especially a bending inward.—**I. de la colonne vertébrale** (Fr.). See Curvature *of the spine.*

INFLEXIOSCOPE, n. I^{2}n-fle^{2}x'i^2-o-skop. Lat., *inflexioscopium* (from *inflexio,* a bending, and σκοπεῖν, to examine). Fr., *i.* Ger., *Inflexioskop.* An instrument for demonstrating diffraction. [L, 30, 41 (α, 14).]

INFLEXUS (Lat.), adj. I^{2}n-fle^{2}x'u^{3}s(u^{4}s). See Inflexed.

INFLORESCENCE, n. I^{2}n-flor-e^{2}s'e^{2}ns. Lat., *inflorescentia* (from *inflorescere,* to begin to blossom). Fr., *i.* Ger., *Blüthenstand.* 1. The particular way in which flower-clusters are arranged on the axis. 2. The flower-cluster itself. [B, 1, 19, 77, 104, 123, 215 (α, 24).]—**Abnormal i.** Any form of anthotaxy in which the relations of the flower to the axis are much obscured or complicated by real or apparent departures from the type (see

Suprafoliaceous i.). [a, 35.]—**Acropetal i., Ascending i., Axillary i., Botryose i., Botrytic i.** Lat., *inflorescentia ascendens.* Fr., *i. acropète, i. ascendante.* Ger., *akropetaler* (oder *aufsteigender*, oder *botrytischer*) *Blüthenstand.* Indeterminate i. [B, 215 (a, 24).] See also ACROPETAL, ASCENDING, AXILLARY, etc.—**Centrifugal i.** Lat., *inflorescentia centrifuga.* Fr., *i. centrifuge.* Ger., *centrifugaler Blüthenstand.* Determinate i. [B, 110, 215, 291 (a, 24).]—**Centripetal i.** Lat., *inflorescentia centripeta.* Fr., *i. centripète.* Ger., *centripetaler Blüthenstand.* Indeterminate i. [B, 1, 104, 123, 291 (a, 24).]—**Clustered i.** An i. in which the flowers are collected into a bunch of any sort. [a, 35.] See CYME, FASCICLE, GLOBUS, GLOMERULE, and THYRSE.—**Compound cymose i., Compound definite i.** An i. in which the terminal axes for one or more earlier generations bear a cyme instead of a single flower. [B, 77 (a, 35).]—**Compound i.** Lat., *inflorescentia composita.* Fr., *i. composée.* Ger., *zusammengesetzter Blüthenstand.* Any aggregation of similar i's into a common whole (*e. g.*, a compound cyme, a compound raceme, or a thyrsus). [B, 1, 123, 291 (a, 24).]—**Compound racemose i.** A racemose i. in which the lateral axes are themselves branched and bear clusters instead of single flowers. [Gray (a, 35).]—**Cymose i.** Lat., *inflorescentia cymosa.* Fr., *i. cymeuse.* Ger., *trugdoldiger Blüthenstand, cymöser Blüthenstand.* A variety of determinate i. in which the primary floral axis, before ending in a flower, gives off one or more lateral unifloral axes which repeat the process. [B, 1, 104, 123, 291 (a, 24).]—**Definite i.** Fr., *i. définie.* See *Determinate i.*—**Descending i.** Lat., *inflorescentia descendens.* Fr., *i. descendante.* Ger., *absteigender Blüthenstand.* A variety of determinate i. in which the terminal flower on the rhachis opens first, and the others open in succession below it. [B, 167 (a, 24).]—**Determinate i.** Lat., *inflorescentia determinata.* Fr., *i. déterminée.* Ger., *bestimmter Blüthenstand.* Definite or terminal i., cymose i. without a pseudaxis; an i. in which the expansion of the flowers is centrifugal (*i. e.*, from apex to base or from centre to circumference). [B, 1, 77, 123, 291 (a, 24).]—**Heterogeneously compound racemose i.** A compound racemose i. in which the secondary or tertiary ramifications are unlike the primary. [Gray (a, 35).]—**Indefinite i., Indeterminate i.** Lat., *inflorescentia indeterminata.* Fr., *i. indéterminée.* Ger., *unbestimmter Blüthenstand.* An i. in which the expansion of the flower is centripetal (*i. e.*, from base to apex or from circumference to centre). [B, 177, 123, 167, 215, 291 (a, 24).] See also *Spicate i.* and *Panicled i.*—**I. bulbifère** (Fr.). That form of i. in which bulbils are developed in place of flowers. [A. St.-Hilaire (B, 121).]—**I. capsulifère** (Fr.). That form of i. in which at first flowers appear and are followed by capsules. [A. St.-Hilaire (B, 121).]—**I. épiée** (Fr.). See *Spicate i.*—**Mixed i.** Fr., *i. mixte.* An i. in which both the determinate and indeterminate types are represented. The flowers on the primary axis may be arranged on the opposite plan from those on the branches, or the flower-heads (in composite plants) or whorls (in labiate plants) may be developed centrifugally, while the florets open centripetally. It includes the mixed panicle, thyrse, spiked verticillaster, etc. [B, 77, 104, 167, 215 (a, 24).]—**Monopodial i.** [Sachs]. Indeterminate i. [a, 24.]—**Panicled i.** Lat., *inflorescentia paniculata.* Fr., *i. paniculée.* Ger., *rispiger Blüthenstand.* A panicle-like i., a form of indeterminate i. arising when the lateral axes from the rhachis themselves branch. It includes forms in which the axes are elongated, such as the true panicle (*e. g.*, in the grapevine), and the compound panicle composed of spikes (*e. g.*, in an ear of wheat); and forms in which the axes are shortened, such as the compact spike-like panicle (*e. g.*, in ears of barley), and the compound umbel (as in most *Umbelliferæ*). [B, 1, 123, 167 (a, 24).]—**Pure i.** I. of a single type (*i. e.*, wholly determinate or indeterminate). [B, 215 (a, 24).] Cf. *Mixed i.*—**Racemose i.** Lat., *inflorescentia racemosa.* Ger., *traubiger Blüthenstand.* Of Sachs and others, indeterminate i. According to Gray, the term is inapplicable to some forms of the latter. [a. 24.]—**Simple cymose i.** A simple definite i.; an i. in which the terminal axis of each generation is one-flowered. [B, 77 (a, 35).]—**Simple i.** Lat., *inflorescentia simplex.* Fr., *i. simple.* Ger., *einfacher Blüthenstand.* An i. in which the flower-clusters are not compounded. [B, 1, 123, 215, 291 (a, 24).]—**Solitary i.** 1. The solitary axillary (or indefinite) i.; a form of indefinite i. in which a lateral shoot produced in the axil of a single foliage leaf ends in a single flower. 2. The solitary terminal (or definite) i.; a form of determinate i. in which the axis terminates in a single flower, no other flowers being produced on the plant. [B, 77 (a, 35).]—**Spicate i.** Lat., *inflorescentia spicata.* Fr., *i. épiée.* Ger., *ähriger Blüthenstand.* A form of indeterminate i. arising when the lateral axes first produced from the rhachis do not themselves branch, and are all floral axes. It includes the spike, spadix, and raceme, in all of which the rhachis is elongated, and the capitulum and simple umbel, in both of which the rhachis is abbreviated. [B, 1, 123 (a, 24).]—**Suprafoliaceous** (or **suprafoliate**) **i.** A form of abnormal i. in which the flower-stalk coalesces with the axis above the subtending bract (in a simple i.) or last leaf (in a sympodial i.). [a, 35.]—**Sympodial i.** Of Sachs and Gray, a cymose i. with a pseudaxis; that form of determinate i. arising from the development of a sympodium (*q. v.*). [B, 167, 215 (a, 24).]—**Terminal i.** Definite or determinate i.; so called because the primary and secondary axes both terminate in a flower (*e. g.*, the poppy and columbine). [B, 77 (a, 35).]

DETERMINATE INFLORESENCE.

MIXED INFLORESENCE.

INDETERMINATE INFLORESENCE.

INFLORESCENTIA (Lat.), n. f. I^{2}n-flor-e^{2}s-se^{2}n(ke^{2}n)'shi^2-(ti^2)-a^3. See INFLORESCENCE.—**I. ascendens.** See *Ascending* INFLORESCENCE.—**I. centrifuga.** See *Centrifugal* INFLORESCENCE.—**I. centripeta.** See *Centripetal* INFLORESCENCE.—**I. composita.** See *Compound* INFLORESCENCE.—**I. cymosa.** See *Cymose* INFLORESCENCE.—**I. descendens.** See *Descending* INFLORESCENCE.—**I. determinata.** See *Determinate* INFLORESCENCE.—**I. indeterminata.** See *Indeterminate* INFLORESCENCE.—**I. paniculata.** See *Panicled* INFLORESCENCE.—**I. racemosa.** See *Racemose* INFLORESCENCE.—**I. simplex.** See *Simple* INFLORESCENCE.—**I. spicata.** See *Spicate* INFLORESCENCE.

INFLUENS (Lat.), adj. I^{2}n'flu^2(flu^4)-e^{2}nz(ans). Gen., *-ent'is.* From *influere*, to flow into. Fr., *influent.* Ger., *einfliessend.* See AFFERENT.

INFLUENTIA (Lat.), n. f. I^{2}n-flu^2(flu^4)-e^{2}n'shi^2(ti^2)-a^3. 1. A flowing in. [L, 50 (a, 14).] 2. See INFLUENZA.

INFLUENZ (Ger.), n. I^{2}n-flu-e^{2}nts'. See INFLUENTIA.—**Nordische I.** See INFLUENZA.

INFLUENZA (Lat.), n. f. I^{2}n-flu^2(flu^4)-e^{2}nz'a^3. An Italianized form of *influentia*, because the disease was ascribed to some mysterious influence. Fr., *grippe.* Ger., *I.*, *Influenz, russischer Katarrh, Blitzkatarrh, epidemisches Katarrhalfieber, Schnupfenfieber.* It., *i.*, *catarro russo.* Sp., *catarro epidémico.* Syn.: *catarrhus epidemicus* (seu *a contagio* [Cullen]), *defluxio catarrhus* [Young], *coryza maligna* [Underwood], *rheuma epidemicum* [Sauvages]. 1. A specific catarrhal inflammation of the mucous membrane of the air-passages with severe constitutional disturbance. The disease is invariable in its essential characteristics, frequently prevailing as an epidemic, attended with lassitude and prostration to an extreme degree, with special and early implication of the naso-laryngo-bronchial mucous membrane. Chills occur, and great sensibility to cold exists over the surface of the skin; the eyes become injected, and tend to fill with tears, the nostrils discharge an acrid fluid, and there is fixed and intense pain in the head, mostly frontal, sometimes attended with giddiness. The nights are sleepless, with delirium or lethargy, cough prevails with yellow expectoration, most troublesome at night and tending greatly to increase the headache. Fever attends the disorder, sometimes slight and sometimes severe, and of a type varying in different epidemics and localities. The duration of the fever is from four to eight days. The sense of taste is generally much disordered, and there are great anxiety and oppression in the region of the heart. After the acute symptoms have subsided there is great debility, which often lasts for many months. [D, 1; H. Macdonald, "N. Y. Med. Jour.," Jan. 11, 1890, p. 40.] 2. In the horse, a disease resembling typhoid fever. [A, 523.]—**I. europæa.** See *I.* (1st def.).

INFLUENZOID, adj. I^{2}n-flu^2-e^{2}nz'oid. From *influenza* (*q. v.*), and εἶδος, resemblance. Resembling influenza.

INFLUX, n. I^{2}n'flu^{3}x. Lat., *influxus* (from *influere*, to flow into). Fr., *i.* Ger., *Einfliessen* (1st def.), *Einwirkung* (2d def.). 1. A flowing into. [a, 14.] 2. Influence. [A, 322.]

INFOLIATE, adj. I^{2}n-fol'i^2-at. Lat., *infoliatus* (from *in*, neg., and *folium*, a leaf). Fr., *infeuillé.* See APHYLLOUS.

INFORMIS (Lat.). adj. I^{2}n-fo^{2}rm'i^{2}s. From *in* neg., and *forma*, form. Deformed, shapeless; as a n., in the pl., *Informes*, of Illiger, an order of multungulated mammals, including those which have the subcutaneous tissue so filled with fat as to efface their form. [L, 180 (a, 39).]

INFORMITAS (Lat.), n. f. I^{2}n-fo^{2}rm′i^2-ta^{2}s(ta^{3}s). Gen., *-tat′is.* From *informis*, shapeless. See DEFORMITY.

INFORTUNIUM (Lat.), n. n. I^{2}n-fo^{2}r-tu^2(tu)′ni^2-u^{3}m(u^{4}m). From *in* neg., and *fortuna*, fortune. See CONTRAFISSURA.

INFRA-ACROMIO-HUMERALIS (Lat.), n. m. I^{2}n-fra^3-a^{2}k-(a^{3}k)-ro′′mi^2-o-hu^2(hu)-mu^{5}r(me^{2}r)-a(a^3)′li^{2}s. Fr., *sous-acromio-huméral* [Chaussier]. See DELTOID.

INFRA-ARYGLOTTIDEUS [E. Coues] (Lat.), n. m. I^{2}n-fra^3-a^{2}r(a^{3}r)-i^2(u^6)-glo^{2}t(glot)-ti^{2}d′e^2-u^{3}s(u^{4}s). From *infra*, below, ἀρύταινα, a pitcher, γλωττίς, the glottis, and εἶδος, resemblance. See ARYTÆNO-EPIGLOTTIDEUS *inferior.*

INFRA-ATLOIDEUS (Lat.), n. m. I^{2}n-fra^3-a^{2}t(a^{3}t)-lo(lo^2)-i^{2}d-(ed)′e^2-u^{3}s(u^{4}s). From *infra*, below, *atlas* (*q. v.*), and εἶδος, resemblance. The second cervical nerve. [L, 41 (α, 29).]

INFRA-AXILLARY, adj. I^{2}n-fra^3-a^{2}x′i^{2}l-a-ri^2. From *infra*, below, and *axilla*, the armpit. Fr., *sous-axillaire.* Situated below the axilla. [α, 29.]

INFRA-AXOIDEUS (Lat.), n. m. I^{2}n-fra^3-a^{2}x(a^{3}x)-o(o^3)-i^{2}d-(ed)′e^2-u^{3}s(u^{4}s). From *infra*, below, and *axis* (*q. v.*). The third cervical nerve. [L, 41 (α, 29).]

INFRABRANCHIAL, adj. I^{2}n-fra^3-bra^{2}n^2′ki^2-a^{2}l. From *infra*, below, and βράγχιον, a gill. Situated below the gills (said of the pallial impression). [L, 227 (α, 39).]

INFRACLAVICULAR, adj. I^{2}n-fra^3-kla^{2}v-i^{2}k′u^{2}l-a^{3}r. Lat., *infraclavicularis* (from *infra*, below, and *clavicula*, the clavicle). Situated below the clavicle. [α, 29.]

INFRACOMMISSURE, n. I^{2}n-fra^3-ko^{2}m′i^{2}s-u^{2}r. From *infra*, below, and *commissura*, a commissure. Of Wilder, see *Inferior* COMMISSURE.

INFRACONSTRICTOR [E. Coues] (Lat.), n. m. I^{2}n-fra^3-co^{2}n-stri^{2}kt′o^{2}r. Gen., *-or′is.* From *infra*, below, and *constringere*, to draw together. See *Inferior* CONSTRICTOR *of the pharynx.*

INFRACOSTAL, adj. I^{2}n-fra^3-ko^{2}s′t′l. Lat., *infracostalis* (from *infra*, below, and *costa*, a rib). Pertaining to the lower surface of a rib. [α, 29.]

INFRA-COSTALIS (Lat.), n. m. I^{2}n-fra^3-ko^{2}st-a(a^3)′li^{2}s. Gen., *-al′is.* From *infra*, below, and *costa*, a rib. A fasciculus of aponeurotic and muscular tissue which arises from the inner surface of a rib, passes obliquely downward and backward, and is inserted into the inner surface of the first, second, or third rib below. [L, 172 (α, 29).]

INFRACTION, n. I^{2}n-fra^{2}k′shu^{3}n. Lat., *infractio* (from *infringere*, to break to pieces). Fr., *i.* Ger., *Infraktion.* See *Green-stick* FRACTURE.

INFRACTOUS, adj. I^{2}n-fra^{2}k′tu^{3}s. Lat., *infractus* (from *infringere*, to break to pieces). Ger., *eingeknickt.* See GENICULATE (1st def.).

INFRADIAPHRAGMATIC, adj. I^{2}n-fra^3-di-a^3-fra^{2}g-ma^{2}t′-i^{2}k. Situated below the diaphragm. [α, 29.]

INFRA-ÉPINEUX (Fr.), adj. A^{2}n^2-fra^3-a-pe-nu^5. See INFRASPINOUS.

INFRAGENUAL, adj. I^{2}n-fra^3-je^{2}n′u^2-a^{2}l. From *infra*, below, and *genu*, the knee. See SUBPATELLAR.

INFRAGLENOID, adj. I^{2}n-fra^3-glen′oid. From *infra*, below, γλήνη, a cavity, and εἶδος, resemblance. Situated below the glenoid cavity. [α, 29.]

INFRAGLOTTIC, adj. I^{2}n-fra^3-glo^{2}t′i^{2}k. From *infra*, below, and γλωττίς, the glottis. Situated below the glottis. [α, 29.]

INFRA-HYOID, adj. I^{2}n-fra^3-hi′oid. From *infra*, below, and ὑοειδής, resembling the letter upsilon. Situated below the hyoid bone or apparatus. [α, 29.]

INFRA-INGUINAL, adj. I^{2}n-fra^3-i^{2}n^2′gwi^2-n′l. From *infra*, below, and *inguen*, the groin. Of Luschka, situated below the inguinal region. [α, 29.]

INFRALEMNISC, n. I^{2}n-fra^3-le^{2}m′ni^{2}sk. From *infra*, below, and *lemniscus*, a pendant. Of Wilder, the inferior lamina of the lemniscus. [K.]

INFRAMAMMARY, adj. I^{2}n-fra^3-ma^{2}m′a^2-ri^2. From *infra*, below, and *mamma*, the breast. Fr., *sous-mammaire.* Situated beneath the mamma.

INFRAMARGINAL, adj. I^{2}n-fra^3-ma^{3}rj′i^2-n′l. From *infra*, below, and *margo*, a margin. See SUBMARGINAL.

INFRAMAXILLARY, adj. I^{2}n-fra^3-ma^{2}x′i^{2}l-a-ri^2. Lat., *inframaxillaris* (from *infra*, below, and *maxilla* [*q. v.*]). Fr., *sous-maxillaire.* Pertaining or adjacent to the inferior maxilla; as a n., the lower mandible. [L, 343; α, 45.]

INFRAMAXILLOSTERNODYMIA (Lat.), n. f. I^{2}n-fra^3-ma^{2}x(ma^{3}x)′′i^{2}l-lo(lo^3)-stu^{5}rn(ste^{2}rn)-o(o^3)-di^{2}m(du^{6}m)′i^2-a^3. From *infra*, below, *maxilla* (*q. v.*), στέρνον, the sternum, and δίδυμος, twin. A form of double monstrosity in which the individuals are united by the sternum and the lower jaw. [α, 40.]

INFRA-OBLIQUUS [E. Coues] (Lat.), n. m. I^{2}n-fra^3-o^{2}b-li-(le)′kwu^{3}s(kwu^{4}s). From *infra*, below, and *obliquus*, slanting. See OBLIQUUS *inferior.*

INFRA-OCCIPITAL, adj. I^{2}n-fra^3-o^{2}k-si^{2}p′i^2-t′l. From *infra*, below, and *occiput*, the back part of the head. Fr., *sous-occipital.* Situated beneath the occiput.

INFRA-ORBITAL, INFRA-ORBITAR, INFRA-ORBITARY, adj′s. I^{2}n-fra^3-o^{2}rb′i^2-t′l, -o^{2}rb′^{2}-ita^{3}r, -i^2-ta-ri^2. Lat., *infra-orbitalis*, *infra-orbitarius* (from *infra*, below, and *orbis*, a ring). Fr., *infra-orbitaire.* Ger., *infra-orbital.* Situated in the floor of the orbit or the region below the orbital margin.

INFRA-ORBITALIS (Lat.), adj. I^{2}n-fra^3-o^{2}rb-i^{2}t-a(a^3)′li^{2}s. See INFRA-ORBITAL; as a n., a bundle of muscular fibres, frequently found, which arise from the lower margin of the orbit and are inserted into the nasal process of the superior maxilla. [L, 332 (α, 29).]

INFRAPUBIAN, adj. I^{2}n-fra^3-pu^{2}b′i^2-a^{2}n. From *infra*, below, and *pubes* (*q. v.*). Fr., *sous-pubien.* Ger., *untergeschlechtstheilig.* See SUBPUBIC.

INFRARECTUS [E. Coues] (Lat.), n. m. I^{2}n-fra^3-re^{2}kt(rakt)′-u^{3}s(u^{4}s). From *infra*, below, and *rectus*, straight. See RECTUS *inferior oculi.*

INFRASCAPULAR, adj. I^{2}n-fra^3-ska^{2}p′u^{2}l-a^{3}r. Lat., *infrascapularis* (from *infra*, below, and *scapula*, the shoulder-blade). Fr., *sous-scapulaire.* Ger., *Unterschulterblatt-.* Situated beneath the scapula. [α, 14; α, 45.]

INFRASCAPULARIS (Lat.), adj. I^{2}n-fra^3-ska^{2}p(ska^{3}p)-u^2-(u^4)-la(la^3)′ri^{2}s. Gen., *-lar′is.* Infrascapular; as a n., the subscapularis muscle (of E. Coues, the teres minor muscle). [L.]

INFRASERRATUS (Lat.), adj. I^{2}n-fra^3-se^{2}r-rat(ra^{3}t)′u^{3}s(u^{4}s). From *infra*, below, and *serratus*, saw-shaped. Situated beneath the serratus magnus muscle; as a n., of E. Coues, the serratus posticus inferior muscle. [L.]

INFRASPINAL, adj. I^{2}n-fra^3-spi′n′l. Lat., *infraspinalis.* See INFRASPINOUS.

INFRASPINALIS (Lat.), adj. I^{2}n-fra^3-spin(spen)-a(a^3)′li^{2}s. See INFRASPINOUS; as a n., see INFRASPINATUS.

INFRASPINATUS (Lat.), adj. I^{2}n-fra^3-spin(spen)-at(a^{3}t)′u^{3}s-(u^{4}s). From *infra*, below, and *spina*, the spine. Fr., *sous-épineux.* Infraspinal; as a n., a triangular muscle which occupies the greater part of the infraspinous fossa of the scapula. It arises from the fascia covering it, from the lower surface of the spine of the scapula and from the inner two thirds of the infraspinous fossa except at the lower angle and along the external border. The fibres converge to a tendon which is inserted into the middle facet of the great tuberosity of the humerus. [L. 31, 113, 117, 142, 172 (α, 29).]—**I. accessorius, I. minor, I. secundus.** Of certain authors, the upper portion of the infraspinatus which arises from the spine of the scapula. [L, 34 (α, 29).]

INFRASPINOUS, adj. I^{2}n-fra^3-spin′u^{3}s. From *infra*, below, and *spina*, the spine. Fr., *sous-épineux.* Situated beneath the spine of the scapula.

INFRASTAPEDIAL, adj. I^{2}n-fra^3-sta-ped′i^2-a^{2}l. Situated below the stapes. [α, 29.]

INFRASTERNAL, adj. I^{2}n-fra^3-stu^{5}r′n′l. From *infra*, below, and στέρνον, the sternum. Situated beneath the sternum. [α, 45.]

INFRATEMPORAL, adj. I^{2}n-fra^3-te^{2}m′po-r′l. From *infra*, below, and *tempus* (see TEMPLE). Fr., *i.* Situated beneath the temple. [α, 45.]

INFRATHORACIC, adj. I^{2}n-fra^3-thor-a^{2}s′i^{2}k. From *infra*, below, and θώραξ, the thorax. Situated below the thorax. [α, 29.]

INFRATONSILLAR, adj. I^{2}n-fra^3-to^{2}n′si^{2}l-a^{3}r. From *infra*, below, and *tonsilla*, the tonsil. Fr., *infra-tonsillaire.* Ger., *untermandelig.* Situated below the tonsil. [α, 29.]

INFRATROCHANTERIC, adj. I^{2}n-fra^3-tro-ka^{2}n-te^{2}r′i^{2}k. From *infra*, below, and τροχαντήρ, a trochanter. Fr., *i.-trochantérique.* Situated below one or both of the trochanters. [α, 29.]

INFRATROCHLEAR, adj. I^{2}n-fra^3-tro^{2}k′le-a^{3}r. From *infra*, below, and *trochlea*, a case containing one or more pulleys. Fr., *infra-trochléaire.* Situated below the trochlea. [α, 29.]

INFRAVAGINAL, adj. I^{2}n-fra^3-va^{2}j′i^2-n′l. From *infra*, below, and *vagina*, the vagina. Fr., *sous-vaginal.* Situated below the junction of the vault of the vagina with the cervix uteri.

INFRICTION, n. I^{2}n-fri^{2}k′shu^{3}n. From *infricare*, to rub in. Fr., *i.* Ger., *Einreibung.* A rubbing in, as of an ointment. [α, 45.]

INFRIGIDATION, n. I^{2}n-fri^{2}j-i^{2}d-a′shu^{3}n. From *in* intens., and *frigidus*, cold. See REFRIGERATION.

INFRUCTUOSE, INFRUGIFEROUS, adj′s. I^{2}n-fru^{3}k′tu^2-os, i^{2}n-fru^2-ji^{2}f′e^{2}r-u^{3}s. Lat., *infructuosus* (from *in* neg., and *fructuosus*, fruitful, or *frux*, fruit, and *ferre*, to bear). Fr., *infructueux.* Ger., *unfruchtbar.* Barren; not bearing fruit. [L, 56 (α, 43; α, 45).]

INFUNDIBULAR, adj. I^{2}n-fu^{3}n-di^{2}b′u^2-la^{3}r. From *infundibulum*, a funnel. Like or pertaining to a funnel. [B, 123 (α, 24).] See INFUNDIBULIFORM.

INFUNDIBULIFORM, adj. I^{2}n-fu^{3}n-di^2-bu^2′li^2-fo^{2}rm. Lat., *infundibuliformis* (from *infundibulum*, a funnel, and *forma*, form). Fr., *infundibulé, infundibuliforme.* Ger., *trichterförmig.* Funnel-shaped. [B, 1, 123 (α, 24; α, 45).]

INFUNDIBULO-OVARIAN, adj. I^{2}n-fu^{3}n-di^{2}b′′u^2-lo-o-va′-ri^2-a^{2}n. From *infundibulum*, a funnel, and *ovarium*, the ovary. Pertaining to the oviduct and to the ovary. [L, 332 (α, 29).]

INFUNDIBULO-PELVIC, adj. I^{2}n-fu^{3}n-di^{2}b′′u^2-lo-pe^{2}l′vi^{2}k. From *infundibulum*, a funnel, and *pelvis* (*q. v.*). Fr., *infundibulo-pelvien.* Pertaining to the oviduct and to the pelvis. [L, 332 (α, 29).]

INFUNDIBULUM (Lat.), n. n. I^{2}n-fu^{3}n(fu^{4}n)-di^{2}b′u^{2}l(u^{4}l)-u^{3}m(u^{4}m). From *infundere*, to pour in. Fr., *i.*, *entonnoir, tige pituitaire* (2d def.). Ger., *Trichter.* Lit., a funnel. 1. A tubular

passage more or less closely resembling a funnel. [α, 29.] 2. A hollow process that forms the continuation of the tuber cinereum and terminates in the pituitary body. [I, 6 (K).]—**Base de l'i.** (Fr.). See TUBER *cinereum*.—**I. cerebri.** See *I.* (2d def.).—**I. cochleæ.** Ger., *I. der Cochlea, Gehörbecher.* An imperfect funnel around which the gyri of the cochlea pass. Its apex is common with that of the modiolus, and its base is covered by the apex of the cochlea (the cupola). [F, 40.]—**I. cordis.** See CONUS *arteriosus*.—**I. femoralivasculare.** See *Femoral* CANAL (1st def.).—**I. lacrimale.** See *Lacrymal* SAC.—**I. of the brain.** See *I. cerebri*.—**I. of the cochlea.** See *I. cochleæ*.—**I. of the ear.** See *I. cochleæ*.—**I. of the ethmoid bone.** A long, flexuous cellular canal, which passes from the frontal sinus through the anterior ethmoidal cells to the front part of the middle meatus of the nose. [L, 142, 172 (α, 29).]—**I. of the Falloppian tube.** See *I. tubæ*.—**I. of the frontal sinus.** See *I. of the ethmoid bone*.—**I. of the heart.** See CONUS *arteriosus*.—**I. of the hypophysis.** See *I.* (2d def.).—**Infundibula of the kidney.** Lat., *infundibula renis.* Ger., *Nierentrichter.* The three prolongations of the pelvis of the kidney, the subdivisions of which constitute the calices. [A, 478 (α, 17).]—**Infundibula of the lungs.** Lat., *infundibula pulmonum.* Fr., *infundibule des poumons.* Ger., *Lungentrichter.* The extreme enlarged ends of the bronchioles. [K (α, 45).]—**I. of the nasal fossæ.** See *I. of the ethmoid bone*.—**I. of the right ventricle of the heart.** See CONUS *arteriosus*.—**I. ovaricum.** See *I. tubæ*.—**Infundibula pulmonum.** See *Infundibula of the lungs*.—**I. renis.** See *Infundibula of the kidney*.—**I. tubæ (Falloppii).** Ger., *Franze der Falloppischen Röhre.* The funnel-shaped cavity formed by the fimbriæ of the oviduct.—**I. ventriculi.** See ŒSOPHAGUS.—**I. ventriculi tertii cerebri.** See *I. cerebri*.

INFUNDIRBÜCHSE (Ger.), n. I^{2}n-fund-er'bu^{6}ch^{2}s-e^2. A percolator. [A, 521.]

INFUSE, v. tr. I^{2}n-fu^{2}z'. Lat., *infundere.* Fr., *infuser.* Ger., *infundir.* 1. To pour into. 2. To steep.

INFUSÉ (Fr.), adj. Infused; as a n., see INFUSION (3d def.). [L, 41 (α, 14).]

INFUSED, adj. I^{2}n-fu^{2}zd'. Lat., *infusus.* Fr., *infusé.* Ger., *eingeweicht.* Subjected to the process of infusion.

INFUSIBILITY, n. I^{2}n-fu^{2}z-i^2-bi^{2}l'i^{2}t-i^2. The quality of being infusible.

INFUSIBLE, adj. I^{2}n-fu^{2}z'i^2-b'l. From *in* neg., and *fundere*, to melt. Fr., *i.* Ger., *unschmelzbar.* Incapable of being melted. [L, 107.]

INFUSION, n. I^{2}n-fu^2'zhu^{2}n. Gr., ἔγχυσις (1st and 2d def's), ἔγχυμα (3d def.). Lat., *infusio* (1st and 2d def's), *infusum* (3d def.). Fr., *i.*, *infusé* (3d def.). Ger., *Eingiessung* (1st def.), *Einweichen* (2d def.), *Aufguss* (3d def.). 1. A pouring into; as distinguished from transfusion (*q. v.*), the gentle injection of any other liquid than blood into a vein. 2. The process of making an i. (3d def.). 3. A solution (generally aqueous) of those portions of a crude drug that are soluble in the menstruum used, without the aid of boiling. [Bernatzik (A, 319 [α, 21]).]—**Cold i.** An i. (3d def.) made with cold water.—**Darmi'** (Ger.). See ENTEROCLYSM (1st def.).—**Guthrie's i.** See INFUSUM *Guthrii*.—**Hot i.** An i. (3d def.) made with hot water.—**I. amère** (Fr.). 1. See *Infusum* GENTIANÆ *compositum*. 2. A preparation made by infusing 15 parts of species amaræ in 1,000 parts of boiling water, and straining; or by digesting 15 parts each of wormwood and juniper in 180 parts of boiling water, and straining. [B, 119 (α, 38).]—**I. astringente** (Fr.). See *Tinctura* ROSARUM *acidula*.—**I. vulnéraire** (Fr.). Of the old pharmacopœias, an i. of equal parts of *Agrimonia eupatoria, Solidago virgaurea,* and *Hypericum perforatum.* [D, 133; L, 85.]

INFUSO-DECOCTUM (Lat.), n. n. I^{2}n-fu^2(fu)-so(so^3)-de(da)-ko^{2}kt'u^{3}m(u^{4}m). From *infundere*, to infuse, and *decoquere*, to boil away. Fr., *infuso-décoction.* Ger., *Infusodecoct, Aufguss-Absud.* A preparation made by mixing an infusion with a decoction of the same substance. [L, 30, 44, 50 (α, 14).]

INFUSOR (Lat.), n. m. I^{2}n-fu^2(fu)'so^{2}r. Gen., *-or'is.* From *infundere*, to pour in. Ger., *Eingiesser.* An instrument devised by Hunter for the parenchymatous injection and infusion of medicines, especially carbolic acid. It consists of a long glass cylinder graduated from above downward, into c. c. and half c. c., to the number of 15. Its lower end is drawn out for the attachment of a long flexible tube; to the other end of this tube is attached a long hypodermic needle with multiple apertures. The needle is introduced into the subcutaneous tissue, and the cylinder raised so that the medicine is infused by gravitation. [α, 40.]

INFUSORIA (Lat.), n. n., pl. of adj. *infusorius.* I^{2}n-fu^2(fu)-so'ri^2-a. Fr., *infusoires.* Ger., *Infusorien, Infusionsthierchen.* Unicellular animals, so called because often developing in organic infusions; formerly, of von Siebold and Stannius, a class of the *Protozoa*, characterized by having cilia or flagella used in locomotion, or for the prehension of food; more recently, according to Packard, the highest division of the *Protozoa* (the *Ciliata*). According to Hilgard, all the *I.*, as well as the *Protozoa*, the *Protophyta*, and the fresh-water *Algæ*, are only "the immature, but even thus self-multiplying germs of higher (or adult) forms of plants and animals, otherwise well known for themselves." According to Bennet, both vegetable and animal *I.* occurring in organic fluids originate in oleo-albuminous particles there formed, which, floating on the surface, constitute the primordial mucous layer of Burdach (the proligerous pellicle of Pouchet), and, under the influence of proper temperature, light, air, and chemical exchanges, pass into the lower forms of vegetable and animal life. [B, 28 (α, 27); B, 46 (α, 39); L, 231; "Am. Nat.," vi, p. 317 (α, 32); "Proc. of the Am. Pharm. Assoc.," xvii (α, 39).]—**Intestinal i.** Microscopic animalcula formed in the animal and human intestines, and multiplying by gemmation. [Leckart (α, 40).]

INFUSORIAL, adj. I^{2}n-fu^{2}s-o'ri^2-a^{2}l. Pertaining or belonging to the *Infusoria.*

INFUSORIUS (Lat.), adj. I^{2}n-fu^{2}s(fu^{4}s)-o'ri^2-u^{3}s(u^{4}s). Pertaining to infusion (1st and 3d def's).

INFUSUM (Lat.), n. n. I^{2}n-fu^2(fu)'su^{3}m(su^{4}m). See INFUSION (3d def.).—**Decoctoi'.** See INFUSO-DECOCTUM.—**I. amarum vinosum.** See *Vinum* GENTIANÆ *compositum*.—**I. concentratissimum.** Ger., *höchst concentrirter Aufguss.* An infusion in which 5 parts of colature represent 1 part of the drug. [Bernatzik (A, 319 [α, 21]).]—**I. concentratum.** Ger., *concentrirter Aufguss.* An infusion in which 20 parts of colature represent 3 of the drug. [Bernatzik (A, 319 [α, 21]).]—**I. Guthrii.** An infusion of 8 parts of sodium sulphate, 2 each of coriander- and fennel-seeds, and 1 part of senna-leaves in 16 parts of water. ["Proc. of the Am. Pharm. Assoc.," v (α, 39).]—**I. laxans.** A preparation made by infusing 3 parts of senna-leaves in 31 of an aqueous solution of magnesium sulphate containing 9 of the sulphate. [B, 270 (α, 38).]—**I. laxativum (viennense).** It., *acqua lassativa di Vienna.* A purgative draught made by infusing 25 parts of Alexandrian senna in 200 of boiling water for four hours, and adding 35 of manna. [A, 314.]—**I. pectorale.** See POTION *pectorale.*

INGA, n. I^{2}n'ga^3. Fr., *i.* Ger., *I.* A genus of tropical or subtropical leguminous plants of the *Ingeæ.* Many of the species are now referred to *Pithecolobium.* [B, 19, 42, 173, 180 (α, 24).]—**Cortex ingæ.** Syn.: *cortex virginalis.* The bark of *Mimosa saponaria.* [B, 48 (α, 14).]—**I. adstringens.** Fr., *i. astringent.* Port., *figueirinha.* A Brazilian species. The bark is astringent. [B, 173 (α, 24).]—**I. à fruits ronds** (Fr.). See PITHECOLOBIUM *cyclocarpum.*—**I. ailé** (Fr.). See *I. vera.*—**I. alba.** A species found in Guiana; of Grisebach, the *I. Bourgoni.* [α, 24.]—**I. anomala.** See ANNESLEA *grandiflora.*—**I. astringens, I. astringent** (Fr.). See *I. adstringens.*—**I. avaremotemo.** The *Pithecolobium avaremotemo.* [B, 121.]—**I.** A species the leaves of which are vulnerary. [B, 88 (α, 39).]—**I. barbatimão.** The *Stryphnodendron barbatimão.* [B, 121.]—**I.-bark.** See *Cortex* INGÆ.—**I. bigemina.** Fr., *i. bigéminé.* See PITHECOLOBIUM *bigeminum.*—**I. biglobosa.** Fr., *i. biglobuleux.* The *Parkia africana.* [B, 173, 180 (α, 24).]—**I. Bourgoni.** Fr., *i. bordé.* A species found in the West Indies and South America. The bark is astringent and the fruit is edible. [Spach (B, 173, 180 [α, 24]).]—**I. caven.** A species found in Chili, where the pods are considered astringent, and are used to make ink. [B, 173 (α, 24).]—**I. camatchili.** A plant (probably the *Pithecolobium dulce*) found in Manilla, where the seeds, which are thick, white, pulpy, and aromatic, are eaten. [B, 88 (α, 39), 173 (α, 24).]—**I. circinalis.** A species found in Santo Domingo and the Bahamas; a source of mesquite gum. [De Candolle (B, 104 [α, 24]).]—**I. cochliocarpos.** See *I. adstringens.*—**I. comosa.** See PITHECOLOBIUM *comosum.*—**I. cyclocarpa.** Fr., *i. à fruits ronds.* See PITHECOLOBIUM *cyclocarpum.*—**I. de Sainte-Marthe** (Fr.). See *I. Marthæ.*—**I. dulcis.** See PITHECOLOBIUM *dulce.*—**I. élégant** (Fr.). See *I. spectabilis.*—**I. fæculifera.** A West Indian species having edible fruits. [B, 180 (α, 24).]—**I. fagifolia.** See *I. Bourgoni.*—**I. faroba.** A plant (probably a species of an allied genus) found in Senegal, where its fruit is eaten. [B, 173 (α, 24).]—**I. fastuosa.** Fr., *i. fastueux.* A species found at Caracas, having edible fruit. [Spach (α, 24).]—**I. fétide** (Fr.). See *I. fœtida.*—**I. Feuillei.** The Pacay-tree of Peru and Guiana, cultivated for its fruit, the white pulp of which is edible. [B, 19, 77, 180, 275 (α, 24).]—**I. fœtida.** Fr., *i. fétide.* A West Indian species. The leaves and roots have an alliaceous odor. [Spach, De Candolle (α, 24).]—**I. guadaloupensis.** A plant used like *Pithecolobium unguis cati.* [B, 180 (α, 24).]—**I. insignis.** Fr., *i. remarquable.* A species found in tropical America, having edible fruits. [B, 173 (α. 24).]—**I. jurema.** See *I. adstringens.*—**I. kœringa** [Kostel]. The *Mimosa kœringa.* [B, 42, 180 (α, 24).]—**I. latifolia.** See PITHECOLOBIUM *latifolium.*—**I. leucantha.** The *Pithecolobium unguis cati.* [Grisebach (α, 24).]—**I. marginata.** See *I. Bourgoni.*—**I. Marthæ.** Fr., *i. de Sainte-Marthe.* A species found in Colombia, where the pods (called *algarovilla*) are used as an astringent. [B, 88 (α, 39), 173, 180 (α, 24).]—**I. niopo.** The *Acacia niopo.* [B, 173 (α, 24).]—**I. ongle-de-chat** (Fr.). See PITHECOLOBIUM *unguis cati.*—**I. pois sucrin** (Fr.). See *I. vera.*—**I. punctata.** Fr., *i. ponctué.* A species found in the Antilles, where the pods are used as a laxative. [B, 173 (α, 24).]—**I. remarquable** (Fr.). See *I. insignis.*—**I. salutaris.** Fr., *i. salutaire.* A species found in New Granada, where the bark is used as a diuretic and astringent. [B, 173, 180 (α, 24).]—**I. saman.** See PITHECOLOBIUM *saman.*—**I. sapida.** Fr., *i. savoureux.* A species found near the Magdalena River in South America, and in Central America. The pods contain a sweet edible pulp. [B, 180 (α, 24).]—**I. saponaria.** Fr., *i. savonneux.* The *Mimosa saponaria.* [B, 42, 173, 180 (α, 24).]—**I. sassa.** The sassa-gum tree (see ACACIA *sassa*). [B, 180, 275 (α, 24).]—**I. savonneux** (Fr.). See *I. saponaria.*—**I. savoureux** (Fr.). See *I. sapida.*—**I. senegalensis.** The *Parkia africana.* [B, 173, 180 (α, 24).]—**I. spectabilis.** Fr., *i. élégant, guayavo real.* A species found in the West Indies and New Granada, where it is cultivated for its pods, which contain a sweet, mucilaginous, and edible pulp. [B, 19, 185, 275 (α, 24).]—**I. tetraphylla.** A species the pulp of the pods of which is sweet and mucilaginous. [B, 197 (α, 35).]—**I.-tree.** See *I. vera.*—**I. unguis cati.** Fr., *I. ongle-de-chat.* See PITHECOLOBIUM *unguis cati.*—**I. vera.** Fr., *i. ailé, i. pois sucrin.* Coco-wood; a species found in Jamaica and Trinidad. The pulp of the pod, called sweet pea (*pois doux*), is edible, but purgative, and is used in catarrhal affections. The bark and leaves are astringent and tonic. [B, 19, 173, 180, 275 (α, 24).]—**I. xylocarpa.** The *Xylia dolabriformis.* [B, 185 (α, 24).]

INGBER (Ger.), n. I^{2}n^2'be^{2}r. Ginger. [B, 180 (α, 24).]—**I'-kiauen.** See *I.*

INGENIUM (Lat.), n. n. I^{2}n(i^{2}n^2)-jen(ge^{2}n)'i^2-u^{3}m(u^{4}m). From *in*, in, and *gignere*, to beget. 1. A congenital quality; a primor-

dial characteristic. 2. Natural intelligence, mentality, or genius. [L, 50 (α, 14).]—**I. morbi.** The nature or special character of a disease. [α, 40.]

INGERENDUM (Lat.), n. n. I^{2}n(i^{2}n^2)-je^{2}r(ge^{2}r)-e^{2}nd'u^{3}m-(u^{4}m). From *ingerere*, to carry into. Ger., *Einzuführende*. Any substance to be ingested. [L, 50 (α, 14).]

INGEST, v. tr. I^{2}n-je^{2}st'. Lat., *ingerere* (from *in*, into, and *gerere*, to carry). Fr., *ingérer, englober*. Ger., *aufnehmen*. To eat, to take up, to perform ingestion (*q. v.*). [J.]

INGESTA (Lat.), n. n. pl. I^{2}n(i^{2}n^2)-je^{2}s(ge^{2}s)'ta^3. From *ingerere*, to carry into. Fr., *i.* Ger., *I.*, *Eingeführten*. Things taken into the stomach. Cf. Egesta.

INGESTION, n. I^{2}n-je^{2}st'yu^{3}n. Lat., *ingestio* (from *ingerere*, to carry into). Fr., *i.* Ger., *Aufnahme*. It., *ingestione*. Sp., *ingestión*. 1. The introduction of anything into the alimentary canal by the mouth. 2. The act by which a cell takes into its substance aprticles of foreign matter. This has been observed in the amœba, in many amœboid cells, especially white blood-corpuscles, and in the mesodermic cells of invertebrates. [Metschnikoff, "Quart. Jour. of Micr. Sci.," Jan., 1884 (J).] 3. See Intussusception.

INGLUVIATION, n. I^{2}n-glu^2-vi^2-a'shu^{3}n. From *ingluvies* (*q. v.*). The process of storing up food in a special receptacle of the body (*e. g.*, the crop in birds) for use in future digestion. [B.]

INGLUVIES (Lat.), n. f. I^{2}n^2-glu^2(glu^4)'vi^2(wi^2)-ez(as). Gen., *-vie'i*. Perhaps from *in*, in, and *gula*, the gullet. 1. The pharynx, especially if it is large. 2. The crop, or craw, of a bird. 3. The first stomach of ruminants. 4. Bulimia. [L, 50 (α, 14), 343.] 5. See Chin.

INGLUVIN, n. I^{2}n^2'glu^2-vi^{2}n. A digestive preparation made out of the crops of chickens. [B, 270 (α, 38).]

INGO [Mex. Ph.] (Sp.), n. I^{2}n^2'go. See Asafœtida.

INGRAIN (Fr.), n. A^{2}n^2-gra^{2}n^2. The *Triticum spelta*. [B, 173 (α, 24).]

INGRASSIAL, adj. I^{2}n-gra^{2}s'i^2-a^{2}l. Described by *Ingrassias*, a Sicilian physician. [α, 14.] See *I.* bone.

INGRATUS (Lat.), adj. I^{2}n^2-grat(gra^{3}t)'u^{3}s(u^{4}s). From *in* neg., and *gratus*, pleasant. Fr., *ingrat*. Ger., *unangenehm*. Of plants, disagreeable to the smell and taste. [B, 123 (α, 24).]

INGRAVESCENT, adj. I^{2}n-gra^{2}v-e^{2}s'e^{2}nt. Lat., *ingravescens* (from *ingravescere*, to grow heavy). Growing more and more severe. [C. L. Dana, "N. Y. Med. Jour.," July 19, 1890, p. 80.]

INGRAVIDATION, n. I^{2}n-gra^{2}v-i^2-da'shu^{3}n. From *ingravidare*, to make pregnant. See Impregnation.

INGREDIENT, n. I^{2}n-gred'i^2-e^{2}nt. Lat., *ingrediens* (from *ingredi*, to go into). Fr., *i.* Ger., *Bestandtheil*. A substance which enters into the composition of a mixture. [α, 17.]

INGRESSUS (Lat.), n. m. I^{2}n^2-gre^{2}s'su^{3}s(su^{4}s). Gen., *-gres'sus*. From *ingredi*, to go into. Ger., *Hineingehen*. An entrance or opening (into a cavity). [L, 50 (α, 14).]—**I. superior.** See Cardia (2d def.).

INGROWING, adj. I^{2}n'gro-i^{2}n^2. Growing in an inward direction; as a n., see Ingrowth.—**I. of a nail.** Lat., *incarnatio unguis*. Ger., *Nageleinwachsung*. Onyxis. [α, 40.]

INGROWN, adj. I^{2}n'gron. Having grown in.

INGROWTH, n. I^{2}n'groth. A process of growth proceeding inward (*e. g.*, the penetration of vascular shoots from the perichondrium of the embryo into the inclosed cartilage). [A, 70.]

INGUEN (Lat.), n. n. I^{2}n^2'gwe^{2}n. Gen., *ing'uinis*. 1. See Groin. 2. See Bubo.—**I. gonorrhœum, I. gonorrhoicum.** See *Gonorrhœal* bubo.—**I. induratum.** See *Syphilitic* bubo.—**I. suppurans.** See *Suppurating* bubo.—**I. syphiliticum.** See *Syphilitic* bubo.—**I. virulentum.** See *Virulent* bubo.

INGUÉRISSABLE (Fr.), adj. A^{2}n^2-ge-res-sa^3-bl'. Incurable. [L, 41.]

INGUINAL, adj. I^{2}n^2'gwi^2-n'l. Lat., *inguinalis* (from *inguen*, the groin). Fr., *inguinaire*. Ger., *Leisten-*. Pertaining to or situated in the groin. [C.]

INGUINALIS (Lat.), adj. and n. f. I^{2}n^2-gwi^{2}n-a(a^3)'li^{2}s. 1. (Adj.) see Inguinal. 2. (N.) the *Aster amellus, Aster inula*, and *Buphthalmum spinosum*. [B, 121 (α, 35).]

INGUINARIA (Lat.), n. f. I^{2}n^2-gwi^{2}n-a(a^3)'ri^2-a^3. From *inguen*, the groin. The *Rubia cruciata*. [B, 88 (α, 39), 121 (α, 35).]

INGUINO-ABDOMINAL, adj. I^{2}n^2''gwi^{2}n-o-a^{2}b-do^{2}m'i^2-n'l. From *inguen*, the groin, and *abdomen*, the abdomen. Fr., *i.-a.* Pertaining to the groin and to the abdomen.

INGUINO-CRURAL, adj. I^{2}n^2''gwi^{2}n-o-kru^2'r'l. From *inguen*, the groin, and *crus*, the leg. Fr., *i.-c.* Pertaining to the groin and to the thigh.

INGUINO-CUTANEOUS, adj. I^{2}n^2''gwi^{2}n-o-ku^2-tan'e-u^{3}s. Lat., *inguino-cutaneus* (from *inguen*, the groin, and *cutis*, the skin). Fr., *inguino-cutané*. Pertaining to the skin of the inguinal region. [L, 41 (α, 14).]

INGUINO-INTERSTITIAL, adj. I^{2}n^2''gwi^{2}n-o-i^{2}n-tu^{5}r-sti^2'-sh'l. From *inguen*, the groin, and *intersies*, that is between. In the tissues of the inguinal region. [α, 29.]

INGULATION, n. I^{2}n^2-gu^2-la'shu^{3}n. From *in*, into, and *gula*, the throat. The introduction of anything into the throat. [L, 50, 107 (α, 14).]

INGURGITATION (Fr.), n. A^{2}n^2-gu^{6}r-zhe-ta^3-se-o^{2}n^2. From *in*, in, and *gurgitare*, to ingulf. See Deglutition.

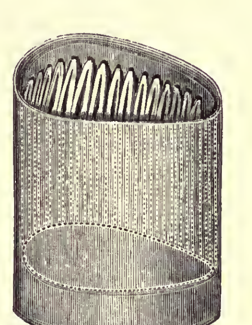
INGWER (Ger.), n. I^{2}n^2've^{2}r. See Ginger (1st def.) and Zingiber.—**Aechter I.** The *Zingiber officinale*. [B, 180 (α, 24).]—**Aetherisches I'extrakt.** See *Oleoresina* zingiberis.—**Cassumunar-I.** The *Zingiber cassumunar*. [B, 180 (α, 24).]—**Deutscher I.** See Arum *maculatum*.—**Flüssiges I'extrakt.** See *Extractum* zingiberis.—**Gebräuchlicher I.** See Zingiber *officinale*.—**Gelber i.** The *Curcuma longa*. [B, 180 (α, 24).]—**Gemeiner I.** 1. The *Zingiber officinale*. 2. Black ginger. [B, 180 (α, 24).]—**Gerandeter I.** The *Zingiber marginatum*. [B, 180 (α, 24).]—**Geschälter I.** See *White* ginger.—**Grasblättriger I.** The *Zingiber gramineum*. [B, 180 (α, 24).]—**I'kraut.** The *Lepidium latifolium*. [B, 48 (α, 14).]—**I'öl.** See *Oil of* ginger.—**I'syrup.** See *Syrupus* zingiberis.—**I'tinktur** [Ger. Ph.]. See *Tinctura* zingiberis.—**I'wurzel.** See *Rhizoma* zingiberis.—**I'zehen.** The root of *Zingiber officinale*. [B, 180 (α, 24).]—**Schwarzer I.** See *Black* ginger.—**Wahrer I.** The *Zingiber officinale*. [B, 180 (α, 24).]—**Weisser I.** See *Uncoated* ginger.—**Weisser I. aus Jamaika.** See *White* ginger.—**Wilder I.** The root of *Zingiber zerumbet, Zingiber cassumunar*, and *Asarum arifolium*. [B, 180 (α, 24).] Cf. *Wild* ginger.—**Zweifelhafter I.** The *Zingiber dubium*. [B, 180 (α. 24).]

INHABITIVENESS, n. I^{2}n-ha^{2}b'i^2-ti^{2}v-ne^{2}s. Of the phrenologists, a propensity to remain in an accustomed habitation; the love of home and country. [α, 40.]

INHÆRENS (Lat.), adj. I^{2}n-her'(ha^3'e^{2}r)-e^{2}nz(ans). From *inhærere*, to stick in. See Inherent.

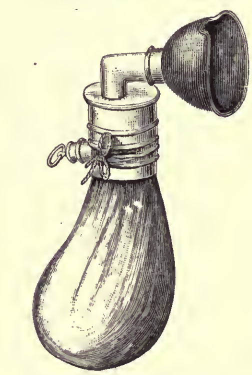
INHALATEUR (Fr.), n. E-na^3-la^3-tu^{5}r. See Inhaler.

INHALATIO (Lat.), n. f. I^{2}n-ha^{2}l(ha^{3}l)-a(a^3)'shi^2(ti^2)-o. Gen., *-o'nis*. See Inhalation and *Cutaneous* absorption.



INHALATION, n. I^{2}n-ha^{2}l-a'shu^{3}n. Lat., *inhalatio* (from *inhalare*, to breathe at). Fr., *i.* Ger., *Einathmung, I.* It., *aspirazione, inalazione*. Sp., *inhalación*. 1. The inspiration of air, of a gas, or of vapor, especially when impregnated with a medicament, or of itself physiologically active, as in the case of an anæsthetic. 2. Absorption, especially by the lungs. [J, 33.] 3. A medicinal preparation the vapor or spray of which is to be inhaled.

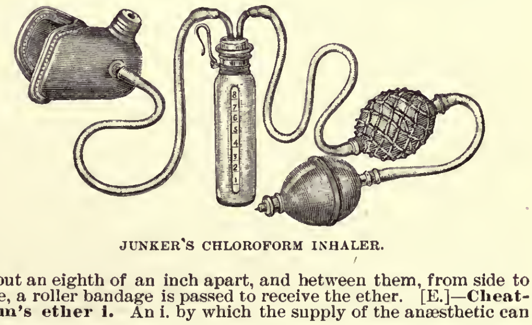
INHALANT, adj. I^{2}n-hal'a^{2}nt. Serving for inhalation; as a n., see Inhalation (3d def.).



INHALATOR (Lat.), **INHALATORIUM** (Lat.), n's m. and n. I^{2}n-ha^{2}l(ha^{3}l)-at(a^{3}t)'o^{2}r, -a^{2}t(a^{3}t)-o'ri^2-u^{3}m(u^{4}m). See Inhaler.

INHALENT, adj. I^{2}n-hal'e^{2}nt. See Inhalant.—**Buttles's i.** An instrument consisting of an olive-shaped nozzle attached to a long flexible tube for inflation and medication of the Eustachian canal with vaporized medicinal agents. [α, 40.]

INHALER, n. I^{2}n-hal'u^{5}r. Lat., *inhalatorium* (from *inhalare*, to inhale). Fr., *inhalateur*. Ger., *Inhalateur, Inhalationsapparat*,



Allis's ether inhaler.

Hutchison's ether inhaler.

Respirationsapparat. An apparatus for inhalation (1st def.). [E.]—**Allis's ether i.** Ger., *Allis'scher Aetherinhalateur*. A leather face-piece containing a wire framework. The wires are parallel and

Junker's chloroform inhaler.

about an eighth of an inch apart, and between them, from side to side, a roller bandage is passed to receive the ether. [E.]—**Cheatham's ether i.** An i. by which the supply of the anæsthetic can

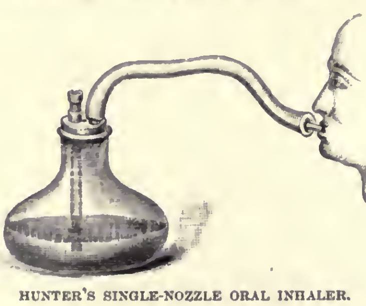
O, no; O^2, not; O^3, whole; Th, thin; Th^2, the; U, like oo in too; U^2, blue; U^3, lull; U^4, full; U^5, urn; U^6, like ü (German).

be replenished without removing the evaporating surface from the face. The face-piece is connected directly with the ether-bottle by a rubber tube. [E.]—**Chloroform i.** Fr., *inhalateur à chloro-*

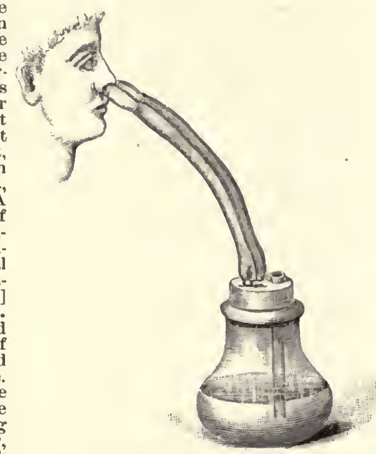
MAW'S INHALER.

MAW'S DOUBLE-VALVED INHALER.

forme. An apparatus devised by Créquy, consisting of a wire mask covered with wide-meshed cloth and an upright bar to which are attached a handle and clamp for holding an acorn-shaped bottle graduated in c. c., and fitted with a stop-cock so that the chloroform may be administered continuously drop by drop. [α, 40.]—**Electric i.** An urn-shaped boiler with an internal compartment for holding a medicinal agent, fitted with an alcohol lamp for the production of steam charged with a volatile medicine; in its upper end



BULLOCK AND REYNOLDS'S INHALER.



ROE'S INHALER.

is a flexible tube and mouth-piece through which the steam is inhaled. [α, 40.]—**Ether i.** Ger., *Aetherinhalationsapparat.* An i. for administering vapor of ether. [E.]—**Heberden's i.** See *Mistura* FERRI *aromatica.*—**Hunter's i.** A simple glass or china vessel containing the medicine to be inhaled, and supplied with a rubber pipe and mouth-piece. [E.]—**Hutchison's ether i.** An i. consisting of a tin tube bent at right angles for holding a sponge containing the ether, a rubber bag for preserving the exhaled ether,

HUNTER'S SINGLE-NOZZLE ORAL INHALER.

and an ordinary dentist's rubber hood to fit over the mouth. [α, 40.]—**Iodine i.** A hard rubber olive-shaped bulb, one end of which is formed into a nasal nozzle. Cotton or other porous material is introduced into the bulb charged with iodine, and the air inhaled through this is thus impregnated. [α, 40.]—**Junker's i.** An i. consisting of a rubber mouth-piece on the one hand, and a set of air-bulbs on the other, attached by separate tubes to a dark bottle containing methylene, which substance is vaporized by the compressed air and used as an anæsthetic. [α, 40.]—**Lente's ether i.** A metallic cone fitted with a hair-cushion edge, to adapt it to the face, and connected with the ether-bottle by a rubber tube. [E.]—**Mackenzie's i.** An i. resembling Roe's, except that it is more elaborate, and is provided with a lamp and a pressure gauge. [E.]—**Roe's i.** An i. composed of one metallic cylindrical can within another, each having a bent conical top, the internal one fitting closely to the external one at their upper extremities, to which is attached a flexible mouth-piece. There are multiple apertures in the upper part of the external and in the lower part of the internal can. Hot water is placed in the former and a medicinal agent in the latter, so that the patient inhales hot, moist air charged with the medicament. [α, 40.]—**Siegle's i.** A very simple form of steam atomizer, consisting of a lamp, a boiler, a cup for medicinal agents, and a bifurcated spray tube. [α, 40.]—**Squibb's ether i.** An hour-glass-shaped muslin bag one end of which is funnel-shaped to receive the face. The narrow part of the bag receives a tin tube about seven inches long and two in diameter, the only object of which is to distend this part to allow of free access of air from the expanded end of the bag to the face. The large end of the bag is partially filled with a roll of flannel and blotting-paper to hold the ether. [E.]

HUNTER'S DOUBLE-NOZZLE NASAL INHALER.

INHALT (Ger.), n. I^{2}n'ha^{3}lt. 1. The contents of anything. 2. The amount of any particular substance in a mixture.

INHAPECANGA, n. The *Smilax syphilitica.* [B, 121 (α, 35).]

INHERENT, adj. I^{2}n-her'e^{2}nt. Lat., *inhærens* (from *inhærere*, to stick in). Fr., *inhérent.* Ger., *inhärent.* Belonging to anything naturally, originally, and not as the result of circumstances; of cauterization, deep.

INHERITANCE, n. I^{2}n-he^{2}r'i^2-t'ns. Fr., *hérédité.* Ger., *Erbschaft.* 1. The reception of characteristics transmitted from one's ancestors. 2. That which is so derived.—**Abridged i.** Of Haeckel, the fusion or omission of certain characteristics in an offspring which were present and in the ancestors. [J, 9.]—**Amphigonous i.** Of Haeckel, in sexual generation, the i. of character from both father and mother. [J, 9, 201.]—**Homochronous i.** Of Haeckel, i. of a character in an offspring at an age corresponding to that in which the character appeared in the parent. [J, 9, 201.]—**Homotopic i.** Of Haeckel, the i. of acquired character. [J, 9, 201.]

INHERITED, adj. I^{2}n-he^{2}r'i^{2}t-e^{2}d. Fr., *hérité.* Ger., *erbet.* Acquired by inheritance. [D.]

INHIBITION, n. I^{2}n-hi^2-bi^{2}sh'u^{3}n. Gr., ἐπίσχεσις. Lat., *inhibitio* (from *inhibere*, to keep back). Fr., *i.* Ger., *Hemmung.* It., *inibizione.* Sp., *inhibición.* A preventive or restraining action. [K.]—**Reflex i.** Lat., *inhibitio reflexa.* Fr., *i. reflexe.* Ger., *reflectische Hemmung, Reflexhemmung.* An i. (*e. g.*, of cardiac action) the result of a shock caused by an irritation or an injury to a peripheral tissue, which is carried to the brain, and thence is reflected by an efferent nerve to the inhibited organ. [K.]—**Vasomotor i.** A restraint of the nervous mechanism tending to narrow the calibre of the blood-vessels. It may be brought about by depressor or vaso-dilator fibres. [J, 19, 57.]—**Voluntary i.** Ger., *willkürliche Hemmung.* The voluntary restraint of reflex actions, such as the arrest of winking when the eyeball is touched. [J, 57.]

INHIBITOR (Lat.), n. m. I^{2}n-hi^{2}b'i^{2}t-o^{2}r. Gen., *-tor'is.* Fr., *inhibiteur.* Ger., *Verhinderer, Hemmungsagent.* That which causes inhibition.

INHIBITORY, adj. I^{2}n-hi^{2}b'i^{2}t-o-ri^2. Lat., *inhibitorius.* Fr., *inhibitoir.* Ger., *hemmend.* Exercising inhibition. [K.]

INHUMATION, n. I^{2}n-hu^2-ma'shu^{3}n. From *inhumare*, to bury in the ground. Fr., *i.*, *enterrement.* Ger., *Beerdigung.* Burial in the earth. [L, 107.]

INIAC, adj. I^{2}n'i^2-a^{2}k. From ἰνίον, the nape of the neck. Fr., *iniaque.* Pertaining to or connected with the inion. [L, 41 (α, 14).]

INIAD, adv. I^{2}n'i^2-a^{2}d. Toward the inial aspect. [L, 141.]

INIAL, INIAN, INIAQUE (Fr.), adj's. E-ne-a^{3}l, -a^{3}n^2, -a^{2}k. See INIAC.

INIENCEPHALUS (Lat.), adj. I^{2}n(en)-i^2-e^{2}n(e^{2}n^2)-sc^{2}f(ke^{2}f)'-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From ἰνίον, the nape of the neck, and ἐγκέφαλος, the brain. Fr., *iniencéphale.* Having the skull fissured posteriorly and inferiorly; as a n., an exencephalic monster in which the cranial anomaly is complicated by a spinal fissure. [L, 41, 44, 87 (α, 39); α, 34.]

INIMBOJA (Port.), n. En-i^{2}m-bo′zha^3. The *Cœsalpinia bonducella.* [B, 18 (*a*, 24).]

INIODYMUS (Lat.), n. m. I(e)-ni^2-o^{2}d′i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From ἰνίον, the nape of the neck, and δίδυμος, double. Fr., *iniodyme.* It., *iniodimo.* A double monster having a single body, and two heads united at the posterior parts. [L, 49.]

INIO-FACIAL, adj. I^{2}n-i^2-o-fa′si^2-a^{2}l. Pertaining to the inion and to the face (see *I.-f.* ANGLE).

INIO-GLABELLAR, adj. I^{2}n-i^2-o-gla^{2}b-e^{2}l′a^{3}r. Pertaining to the inion and to the glabella. [L, 141.]

INIO-MESIAL, adj. I^{2}n-i^2-o-me′zi^2-a^{2}l. Pertaining to the inion and to the meson. [L, 141.]

INION, n. I(e)′ni^2-o^{2}n. Gr., ἰνίον. 1. The occiput. 2. The back part of the neck. [A, 322.] 3. The external occipital protuberance; used in craniometry as a point from which measurements are made. [C ; L, 149.]

INIOPS (Lat.), adj. I(e)′ni^2-o^{2}ps(ops). Gen., *-op′os* (*-is*). From ἰνίον, the nape of the neck, and ὄψ, the face. Fr., *iniope.* It., *iniope.* A double syncephalic monster having two bodies, distinct below the umbilicus, but joined above. The head is incompletely double, presenting on one side a complete face (which distinguishes it from the janiceps), the incomplete face having a single eye and one or two ears. [L, 41 (*a*, 14) ; 44, 87 (*a*, 39).]

INIRRITABILITAS (Lat.), n. f. I^{2}n-i^{2}r-rit(ret)-a^2(a^3)-bi^{2}l′i^2-ta^{2}s(ta^{3}s). Gen., *-tat′is.* From *in* neg., and *irritabilitas*, irritability. See ANERETHISIA.

INITIAL, adj. I^{2}n-i^2′sh′l. Lat., *initialis* (from *initium*, a beginning). Fr., *i.* Ger., *anfänglich.* It., *iniziale.* Sp., *inicial.* Pertaining to or marking the beginning of anything.

INITIS (Lat.), n. f. In(en)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). From ἴς, a muscle (see also *-itis**). 1. Inflammation of muscular tissue. 2. Inflammation of a tendon. 3. Of Feuerstein, rheumatism. [L, 50 (*a*, 14); L, 107, 135 (*a*, 39).]

INITIUM (Lat.), n. n. I^{2}n-i^{2}sh(i^{2}t)′i^2-u^{3}m(u^{4}m). A beginning or entrance ; the first portion of anything. [L, 50 (*a*, 14).]—**I. asperæ arteriæ.** See LARYNX.—**I. extuberans coli.** The cæcum. [L, 50 (*a*, 14).]

INIUM (Lat.), n. n. I(e)′ni^2-u^{3}m(u^{4}m). See INION.

INJACULATIO (Lat.), n. f. I^{2}n-ja^{2}k(ya^{3}k)-u^{2}l(u^{4}l)-a(a^3)′shi^2-(ti^2)-o. Gen., *-on′is.* From *in*, into, and *jaculari*, to throw. 1. The propulsion of semen into the vagina. 2. Of Van Helmont, a sudden and violent spasmodic pain in the stomach. [L, 50 (*a*, 14).]

INJECT, v. tr. I^{2}n-je^{2}kt′. Lat., *injicere.* Fr., *injecter.* Ger., *einspritzen.* To force a liquid or gas into a cavity.

INJECTED, adj. I^{2}n-je^{2}kt′e^{2}d. Fr., *injecté, engorgé.* Ger., *injectirt.* Filled or distended with fluid ; engorged with blood.

INJECTEUR (Fr.), n. A^{2}n^2-zhe^{2}k-tu^{5}r. See INJECTOR.—**Gazo-i.** See the major list.—**I. de gaz à regulateur.** An apparatus for the injection of a gas into the natural cavities of the body, under a determinate and readily controllable pressure. [H. Hénocque, "Gaz. hebd. de méd. et de chir.," Aug. 3, 1883, p. 522 (B).]

INJECTIO (Lat.), n. f. I^{2}n-je^{2}k(ye^{2}k)′shi^2(ti^2)-o. Gen., *-on′is.* See INJECTION.—**I. ad leucorrhœam, I. adstringens.** See *Liquor* ALUMINIS *compositus.*—**I. anatomica.** See *Anatomical* INJECTION.—**I. fellea.** A preparation consisting of 4 parts of thickened ox-gall, $\frac{3}{5}$ part of gum ammoniac, and 90 parts of infusion of saponaria. [B, 119 (*a*, 38).]—**I. hypodermatica, I. hypodermica.** See *Hypodermic* INJECTION.—**I. jodata Velpeau.** Sp., *inyección iodada de Velpeau* [Sp. Ph.]. A preparation made by treating 15 parts of tincture of iodine with 100 parts of distilled water, and filtering. [B, 95 (*a*, 38).]—**I. liquorum in vasa.** See *Anatomical* INJECTION.—**I. subcutanea.** See *Hypodermic* INJECTION.

INJECTION, n. I^{2}n-je^{2}k′shu^{3}n. Lat., *injectio* (from *injicere*, to throw into). Gr., εἰσβολή (1st def.). Fr., *i.* Ger., *I.*, *Einspritzung* (1st def.). It., *injezione.* Sp., *inyección.* 1. The act of injecting. 2. The state of being injected. 3. A substance which is thrown in (*i. e.*, into a cavity, vessel, or tissue of the body) by the use of a syringe or injector. [D ; *a*. 17.] 4. See ENEMA.—**Anatomical i.** Lat., *injectio anatomica.* Fr., *i. cadavérique.* Ger., *anatomische Einspritzung.* An i. of some suitable substance, usually a liquid capable of solidfying on cooling, into the vessels of a cadaver to facilitate dissection. [L, 50 (*a*, 14).]—**Antiseptic i.** See *I. antiseptique.*—**Astringent i.** See *I. astringente.*—**Coarse i.** An anatomical i. of some colored material that fills the larger vessels, but which does not traverse the capillaries. Used to facilitate the dissection of vessels. [J.]—**Collodion i.** An i. in which the mass is colored collodion. It is frequently employed in making corrosion preparations. [J.]—**Dry i.** See *Trockene* EINSPRITZUNG.—**Ernährende I.** (Ger.). See *Nutrient i.*—**Fine i.** The I. of the blood-vessels or lymphatic vessels or gland-ducts with some substance like colored melted gelatin which will penetrate to the finest ramifications. Fine i's may be opaque or transparent, depending upon the coloring substance. [J, 200.]—**Forced i.** An i. used for the purpose of distending a sac or cavity. [*a*, 40.]—**Gamberini's i.** An i. consisting of 1 part of tincture of aloes and 8 parts of water ; used in gonorrhœa. ["Proc. of the Am. Pharm. Assoc.," x (*a*, 39).]—**Gelatin i.** An i. in which the body of the mass is gelatin or glue. It may be coarse or fine, opaque or transparent, according to the coloring matter. [J.]—**Hypodermatic i., Hypodermic i.** Fr., *i. hypodermique.* Ger., *hypodermatische I.* It., *injezione ipodermica.* An i. of a medicinal or other agent under the skin. [D.]—**I's abortives** (Fr.). Strong i's used in the early stages of blennorrhagia with the intent to abort the disease. [L, 88 (*a*, 40).]—**I. antiseptique** (Fr.). 1. A preparation made by boiling 14 parts of cinchona in 518 parts of water, and adding 4 parts of liquid myrrh ; used in chronic gonorrhœa. 2. A preparation made by boiling 60 parts of willow-bark in 360 parts of water till $\frac{1}{3}$ reduced, then adding a mixture of 2 parts of camphor and 30 parts of clarified honey. [B, 119 (*a*, 38).]—**I. astringente** (Fr.). 1. See *Hydrolé de sulfate de* CUIVRE. 2. A preparation made by dissolving 5 parts of iron sulphate in 240 parts of water. [B, 119 (*a*, 38).] 3. See *I. de sulfate de* ZINC. 4. See INJECTIO *cuprata.*—**I. Brou.** A preparation consisting, according to Hager, of an unfiltered mixture of 180 parts of water, 1 part of zinc sulphide, 2 parts of lead acetate, and 4 parts each of tincture of catechu and Sydenham's laudanum. [B, 270 (*a*, 38).]—**I. cadavérique** (Fr.). See *Anatomical i.*—**I's coagulantes** (Fr.). I's of astringent fluids into tumors or aneurysms with the intent of coagulating the blood therein and thus curing them. It was first proposed by Monteggia. [L, 88 (*a*, 40).]—**I. de Pringle** (Fr.). See *Liquor* ALUMINIS *compositus.*—**I. détersive de Lentin** (Fr.). A preparation made by dissolving in 184 grammes of water enough isinglass to make a thick solution, and adding 4 grammes of solution of myrrh. [B, 119 (*a*, 38).]—**I. excitante** (Fr.). See INJECTIO *fellea.*—**I. mucilagineuse** (Fr.). A preparation made of 23 parts of flax-seed and water enough to make 1,000 parts. [B, 119 (*a*, 38).]—**I. prophylactique de Girtanner** (Fr.). A preparation made by dissolving 1 part of caustic potash in 300 parts of distilled water. [B, 119 (*a*, 38).]—**I. saturnine myrrhée** (Fr.). A preparation made by dissolving 4 parts of lead acetate in 180 parts of distilled water, and adding a mixture of 7 parts each of solution of myrrh and tincture of opium. [B, 119 (*a*, 38).]—**I. sèche** (Fr.). See *Trockene* EINSPRITZUNG.—**I. térébenthinée** (Fr.). A preparation consisting of 15 parts of Venetian turpentine and 240 parts of water, with 7 parts of tincture of benzoin added. [B, 119 (*a*, 38).]—**I's transparentes** (Fr.). In microscopy, the i's which, though coloring the specimens, still leave them transparent. [*a*, 40.]—**Interstitial i.** Fr., *i. interstitielle.* Ger., *interstitielle I.* 1. An i. of water or a medicated fluid into a mucous cavity or canal, or into an abscess, fistula, or wound. [Bernatzik (A, 319 [*a*, 21]).] 2. See *Parenchymatous i.*—**Intestinal i.** See ENEMA.—**Intra-arterial i.** An i. into an artery.—**Intra-bronchial i.** Bennett's method for i. of medicinal agents into the bronchial tubes through a laryngeal catheter. [L, 57 (*a*, 40).]—**Intradermic i.** Fr., *i.*, *intradermique.* An i. into the substance of the derma. ["Sem. méd.," Aug. 16, 1889, p. 385 (*a*, 18).]—**Intraparenchymatous i.** See PARENCHYMATOUS.—**Intraperitoneal i.** An i. into the cavity of the peritonæum.—**Intrapleural i.** An i. into the pleural cavity.—**Intrapulmonary i.** An i. into the substance of the lung or into a pulmonary cavity. [B. Robinson, "N. Y. Med. Jour.," Nov. 14, 1885, p. 533.]—**Intratracheal i.** Fr., *i.*, *intra-trachéenne.* An i. into the trachea. [*a*, 18.]—**Intra-uterine i.** Fr., *i. intra-utérine.* Ger., *Uterusi'*, *Einspritzung in die Uterushöhle.* An i. into the cavity of the uterus.—**Intravascular i.** An i. into a blood-vessel.—**Intravenous i.** Fr., *i. intraveineuse.* An i. into a vein.—**Muscular i.** The i. of medical agents into the muscular tissue. [*a*, 40.]—**Natural i.** An engorgement of the capillaries and smaller blood-vessels with blood. thus simulating a fine i. [J, 2.]—**Nutrient i.** Ger., *ernährende I.* 1. See *Nutrient* ENEMA. 2. The i. of a nutrient fluid.—**Opaque i.** An i., either coarse or fine, in which the mass is opaque. [J.]—**Parenchymatous i.** Ger., *parenchymatöse I.* An i. of a medicated fluid into the substance of a tissue. [Vogel (A, 319 [*a*, 21]).]—**Percutaneous i.** Fr., *i. percutanée.* An i. in which medicine is introduced into the lung by puncturing the skin and trachea with a hollow needle and then injecting the liquid. [*a*, 40.]—**Plaster i.** A coarse anatomical i. in which the mass is plaster of Paris mixed with about an equal volume of water. [J, 100.]—**Preservative i.** The i. of a solution of some antiseptic substance like zinc or mercuric chloride, arsenic, carbolic acid, alcohol, etc., into the blood-vessels or body cavities, or both, to prevent decomposition. [J.]—**Rectal i.** See ENEMA.—**Starch i.** A coarse i. in which starch mixed with about an equal volume of water or other liquid forms the mass. The liquid exudes, leaving the solid starch. ["N. Y. Med. Jour.," June 7, 1884, p. 629 (J).]—**Subcutaneous i.** Fr., *i. sous-cutanée.* Ger., *subcutane I.* See *Hypodermic i.*—**Submucous i.** Fr., *i. sous-muqueuse.* Ger., *submucöse I.* An i. beneath a mucous membrane.—**Urethral i.** An i. into the urethra.—**Uterus'** (Ger.). See *Intra-uterine i.*—**Vaginal i.** An i. into the vagina.—**Valcrius's i.** An i. consisting of 1 drachm of tincture of valerian, 2 drachms of alum, 16 drops of tincture of opium, 1 oz. of starch, and 1 pint of decoction of althæa ; used in dysentery.—**White opaque i.** An i. made by mixing cold saturated solutions of lead acetate and sodium carbonate, allowing the precipitate to settle, washing the latter with warm water, and finally adding to the solution a 5-per-cent. solution of gelatin. [A, 510.]—**Yellow opaque i.** An i. made like the white opaque i., potassium bichromate being substituted for sodium carbonate. [A, 510.]

INJECTOR (Lat.), n. m. I^{2}n-je^{2}k(ye^{2}k)′to^{2}r. From *injicere*, to throw into. Fr., *injecteur.* Ger., *I.* An apparatus for injecting.—**Guyon's i.** A syringe graduated in cu. cent., and having a sharp screw-point to fit into a soft-rubber catheter through which the deeper portions of the urethra may be injected. [*a*, 40.]—**Hartwelt's drop i.** A hollow vulcanite tube curved for introduction into the larynx and fitted into a straight handle. At the junction of the tube with the handle on the upper side is a circular cavity covered with a thin piece of rubber and communicating with the interior of the shaft. By pressure upon this rubber the fluid is thrown out into the larynx, either diffused or in a single direction, according to which tip is used. [*a*, 40.]—**Intratympanischer I.** (Ger.). An i. devised by Schwendt composed of a Hartmann's Eustachian catheter fitted to a compression bulb for injecting the middle ear with fluids through the Eustachian canal. ["Aerztlich. Polytechnik," December, 1890, p. 269 (*a*, 40).]—**Intra-uterine i.** An i. devised by Goutillon for injecting the cavity of the uterus. It is composed of a glass-barreled syringe with a long flexible metallic nozzle which can be introduced into the cavity of the uterus. [*a*, 40.]—**Rauchfuss's i.** A rubber bulb fitted to a long vulcanite tube curved for introduction into the larynx. In the upper side of the

tube is a cavity into which powder is put, covered by a movable tubular shield. It is used for the insufflation of powders. [a, 40.] —**Urethral i.** A hypodermic syringe graduated to half-minims and fitted with a silver male catheter having a small aperture in its end instead of at the side, so that minute quantities of medicated fluids may be injected into any portion of the urethra. [a, 40.]

INJECTUM (Lat.), n. n. I2n-je2k(ye2k)′tu3m(tu4m). From *injicere*, to throw into. See INJECTION (3d def.).

INJICIREN (Ger.), v. tr. I2n-ye-tse′re2n. See INJECT.

INJURY, n. I2n′ju2-ri2. Gr., ἀδικία, τραῦμα. Lat., *injuria* (from *in* neg., and *jus*, right). Fr., *injure*. Ger., *Verletzung*. Harm, damage, especially that resulting from mechanical violence.

INK, n. I2n2k. Mid. Eng., *enke*. Gr., ἔγκαυστον. Lat., *encaustum*. Fr., *encre*. Ger., *Dinte*, *Tinte*. It., *inchiostro*. Sp., *tinta*. A coloring matter used to produce impressions on paper or other material. [a, 24.]—**Black i.** An i. of black color, usually prepared from a tannin-yielding body and a salt of iron. It is a ferroso-ferric gallate held in suspension in water. [a, 24.]—**China i.** See *Indian i.*—**Diamond i.** An i. for writing on glass with a common pen; a mixture of barium sulphate, ammonium fluoride, and sulphuric acid; kept in glass bottles which are coated on the outside with asphaltum varnish and on the inside with wax. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 39).]—**Indelible i.** Incorrodible i., made by combining lamp-black with resinous substances. A very good sort is prepared by rubbing down Indian i. in ordinary black i. [B, 5, 77 (a, 24).] See also *Marking i.*—**India i., Indian i.** A dried mixture of fine lamp-black and size or thin glue. [a, 24.]—**I′berry.** See the major list.—**I.-plant.** In New Zealand and South America, the *Coriaria ruscifolia* and the *Coriaria thymifolia*. The juice of these plants, locally termed *canchi*, is at first of a somewhat reddish color, but becomes intensely black in a few hours. The juice may be used without preparation; it corrodes less, and resists the action of chemical reagents better than ordinary i. ["Proc. of the Am. Pharm. Assoc.," xvi (a, 39); B, 185, 275 (a, 14).]—**I′root.** The *Statice caroliniana*. [Griffith (a, 35).]—**Invisible i.** See *Sympathetic i.*—**Marking i.** An i. used chiefly for marking linen. It is composed of a silver salt in solution in water or ammonia, thickened with a little gum. [a, 24; "Proc. of the Am. Pharm. Assoc.," xvi (a, 39).]—**Portable i.** An i. prepared by saturating several sheets of paper with aniline black, and pressing them together into a compact, portable mass. For writing, a piece of this paper is torn off and steeped in a little water. ["Proc. of the Am. Pharm. Assoc.," xxii (a, 39).]—**Sympathetic i.** An i. employed for forming characters which become visible only when heat or some chemical reagent is applied. [a, 24.]

INKARADIYA (Ar.), n. The *Semecarpus anacardium*. [A, 479 (a, 21).]

INKBERRY, n. I2n2k′be2r-ri2. 1. The *Ilex* (*Prinos*) *glaber* (U. S. Ph.). 2. In the West Indies, the *Randia aculeata*. [B, 5, 185, 275 (a, 24).]—**Queensland black i.** The *Kibara macrophylla*. [B, 275 (a, 24).]

IN-KNEE, n. I2n′ne. See GENU *valgum*.

INKOMANKOMO, n.; written also *uncomocomo*. Of the Kaffirs of South Africa, the rhizome of *Aspidium athamanticum*. [B, 5 (a, 24).]

INLÄNDISCH (Ger.), adj. I2n′land-i2sk. See DOMESTIC (2d def.) and INDIGENOUS.

INLET, n. I2n′le2t. Lat., *introitus*. Ger., *Bingang*. An opening of entrance.—**I. of the pelvis, Pelvic i.** Lat., *introitus pelvis*. Fr., *détroit supérieur du bassin*. Ger., *Beckeneingang*. The superior strait of the pelvis, corresponding to the boundary between the true pelvis and the false pelvis; so called because the fœtus enters the pelvic canal by that orifice in parturition.

INMORTAL [Mex. Ph.] (Sp.), n. I2n-mor-ta3l′. See GOMPHRÆNA *procumbens*.

INNATATIO (Lat.), n. f. I2n-na(na3)-ta(ta3)′shi2(ti2)-o. Gen., *-on′is*. From *innatare*, to float in. See ANAPLEUSIS.

INNATE, adj. I2n-nat′. Lat., *innatus* (from *innasci*, to be born in). Fr., *inné*, *naturel*. Ger., *angeboren* (1st def.). 1. Congenital. 2. Indigenous. 3. Of fruits, apparently immersed in the substance of a part. 4. Of an anther, adherent to the apex. [B, 1, 19, 123, 291 (a, 24).] See also ADNATE.

INNATO-FIBRILLOSE, adj. I2n-na-to-fi′bri2l-os. From *innasci*, to be born in, and *fibrilla*, a small fibre. Clothed with adherent fibrillæ, like the cottony down adhering to the epidermis of most rootlets. [B, 308 (a, 35).]

INNATENESS, n. I2n-nat′ne2s. From *innasci*, to be born in. The quality of being innate.

INNENBLATT (Ger.), n. I2n′ne2n-bla2t. See ENTODERM.

INNENHAUT (Ger.), n. I2n′ne2n-ha2-u4t. An inner or lining membrane. [a, 29.] See ENDOCARP, SPORANGEIDIUM, and TUNICA *intima*.

INNENKOLBEN (Ger.), n. I2n′ne2n-ko3lb-e2n. See *Axile* CORPUSCLE and CORE.

INNENKÖPFIG (Ger.), adj. I2n′ne2n-ku3pf-i2g. See ENDOCEPHALUS.

INNERKIP, n. I2n-u3r-ki2p. A sea-side resort in Renfrewshire, Scotland, on the Firth of Clyde. [L, 30 (a, 14).]

INNERLEITHEN, n. I2n-u3r-leth′e2n. A place in Peeblesshire, Scotland, where there are earthy saline springs; the St. Ronan's Well of Sir Walter Scott. [L, 30, 57 (a, 14).]

INNERLICH (Ger.), adj. I2n′ne2r-li2ch2. Inward, internal.

INNERVATE, adj. I2n-nu3rv′at. Lat., *innervatus*. See INNERVED.

INNERVATION, n. I2n-nu3rv-a′shu3n. Fr., *i.* Ger., *I.* It., *innervazione*. The special action of the nervous system on a given organ; also the distribution of nerves to a part. [L, 41, 44, 49 (a, 14).]—**Collateral i.** The supply of nervous influence, through an adjacent or surrounding nerve tract, to a part the original nerve supply of which has been injured or destroyed. [a, 40.]

INNERVED, adj. I2n-nu3rvd′. Lat., *innervis* (from *in* neg., and *nervus*, a nerve). Fr., *innervé*. Ger., *nervlos*, *rippenlos*. Having no nerves or veins (said of the leaves of certain mosses and many *Algæ*). [B, 1 (a, 24).]

INNERVIS (Lat.), adj. I2n-nu3r(ne2r)′vi2s(wi2s). See INNERVED.

INNICHEN (Ger.), n. I2n′ne-ch2e2n. A place in the Tyrol, Austria, where there are four mineral springs, one of them containing sodium carbonate and rich in free carbonic acid. [L, 30, 37 (a, 14).]

INNOCENT, adj. I2n′no-se2nt. Lat., *innocens* (from *in* neg., and *nocere*, to injure). See BENIGN and INNOXIOUS.

INNOCUOUS, adj. I2n-no2k′u2-u3s. From *in* neg., and *nocere*, to injure. Not injurious.

INNODATIO (Lat.), n. f. I2n-nod(no2d)-a(a3)′shi2(ti2)-o. Gen., *-on′is*. From *innodare*, to fasten with a knot. Ger., *Verknotung*. A knotting together, especially of intestines. [L, 50 (a, 14).]

INNOMINATE, adj. I2n-no2m′i2n-at. Gr., ἀνώνυμος. Lat., *innominatus* (from *in* neg., and *nominare*, to name). Fr., *innomé*, *innominé*. Ger., *unbenannt*. Without a name.

INNOVANS (Lat.), adj. I2n′no(no2)-va2nz(wa3ns). From *innovare*, to renew. Ger., *verjüngend*, *innovirend*, *sprossend*. Sprouting, forming innovations. [B, 123 (a, 24).]

INNOVATIONS, n. pl. I2n-o-va′shu3nz. Lat., *innovationes* (from *innovare*, to renew). Fr., *i.* Ger., *neue Triebe*. *Jahrestriebe*. Newly formed shoots; in mosses, the new shoots which appear at the end of the stem (terminal i.) or in the axils after the completion of fructification. [B, 1, 19, 123 (a, 24).]—**Terminal i.** Lat., *innovationes terminales*. Ger., *Gipfeltriebe*. See *I.*

INNOVIREND (Ger.), adj. I2n-no-fer′e2nd. See INNOVANS.

INNOXIOUS, adj. I2n-no2k′shu3s. Lat., *innocius* (from *in*, not, and *nocere*, to injure). Fr., *innocent*. Ger., *unschädlich*. It., *innocente*. Sp., *inocente*. See INNOCUOUS.

INNUTRITIO (Lat.), n. f. I2n-nu2(nu)-tri2′shi2(ti2)-o. Gen., *-on′is*. See INNUTRITION.—**I. ossium.** See RHACHITIS.

INNUTRITION, n. I2n-nu2-tri2sh′u3n. Lat., *innutritio* (from *in*, neg., and *nutrire*, to nourish). Fr., *i.* Ger., *mangelnde Ernährung*. Deficiency of nutrition. [D.]

INNUTRITIOUS, adj. I2n-nu2-tri2′shu3s. 1. Pertaining to innutrition. 2. Deficient in nutritious properties. [D.]

INOBLAST, n. I2n′o-bla2st. From ἴς, a fibre, and βλαστός, a sprout. Ger., *Inoblaste*. A general name for a connective-tissue corpuscle or a cell giving rise to connective tissue. [J, 42, 67, 140.]

INOCARCINOMA (Lat.), n. n. I(e)-no(no3)-ka3r-si2n(ki2n)-o′-ma3. Gen., *-om′atos* (*-atis*). From ἴς, a fibre, and καρκίνωμα, a cancer. See CROCYDOCARCINOMA.

INOCARPIN, n. I2n-o-ka3rp′i2n. Fr., *inocarpine*. A red coloring substance contained in the sap of *Inocarpus edulis*; soluble in water and in alcohol, insoluble in ether. [B, 93 (a, 14); B, 46 (a, 39).]

INOCARPOUS, adj. I2n-no-ka3rp′u3s. Lat., *inocarpus*. From ις, a fibre, and καρπός, a fruit. Having fibrous fruit; used chiefly in the Latin as a botanical specific name. [a, 35.]

INOCARPUS (Lat.), n. m. I(e)-no(no3)-ka3rp′u3s(u4s). From ἴς, a fibre, and καρπός, a fruit. A genus of leguminous, smooth, unarmed trees of the tribe *Dalbergieæ*, indigenous to the islands of the Pacific and the Indian Archipelago. The *Inocarpeæ* of Reichenbach are a section of the *Sapoteæ genuinæ*. [B, 19, 42, 170 (a, 24).] —**I. edulis.** Fr., *i. comestible*. South Sea chestnut, Fiji or Otaheite chestnut; a species found in the Indian Archipelago. The seeds, boiled or roasted, are used by the natives as food, and a decoction of the astringent bark is employed in chronic diarrhœa and dysentery. [B, 19, 173, 180, 275 (a, 24); "Proc. of the Am. Pharm. Assoc.," xvi (a, 39).]

INOCHONDRITIS (Lat.), n. f. I(e)-no(no3)-ko2nd(ch2o2nd)-ri(re)′ti2s. Gen., *-drit′idos* (*-idis*). From ἴς, a fibre, and χόνδρος, cartilage (see also *-itis**). Ger., *Sehnen- und Knorpelentzündung*. Inflammation of the tendons and cartilages. [L, 50, 107 (a, 14).]

INOCULABILITY, n. I2n-o2k-u2l-a2-bi2l′i2t-i2. Fr., *inoculabilité*. Ger., *Uebertragbarkeit*, *Inoculabilität*. The quality of being inoculable.

INOCULABLE, adj. I2n-o2k′u2l-a2-b′l. Fr., *i.* Ger., *übertragbar*, *impfbar*. Capable of being inoculated. [L, 41.]

INOCULAR, adj. I2n-o2k′u2l-a3r. From *in*, in, and *oculus*, the eye. Fr., *inoculaire*. Inserted in the eyes (said of antennæ). [L, 41 (a, 14).]

INOCULATE, v. tr. I2n-o2k′u2l-at. Lat., *inoculare*. Fr., *inoculer*. Ger., *einimpfen*, *inokuliren*. To introduce into a living organism, by means of a solution of continuity, matter capable of giving rise to a specific disease. [A, 523.]

INOCULATIO (Lat.), n. f. I2n-o2k-u2l(u4l)-a(a3)′shi2(ti2)-o. Gen., *-on′is*. See INOCULATION.—**I. vaccinæ.** See VACCINATION.

INOCULATION, n. I2n-o2k-u2l-a′shu3n. Lat., *inoculatio* (from *inoculare*, to ingraft). Fr., *i.* Ger., *Einimpfung*, *Ueberimp-*

fung, Inokulation. It., *inoculazione.* Sp., *inoculación.* 1. The operation of ingrafting a bud. 2. The process of inoculating, especially (as formerly used) that of inoculating with the virus of small-pox. [A, 322.]—**Cow-pox i.** See VACCINATION.—**Endermic i.** The introduction into the system of medicine or specific virus by placing it in contact with scarified skin. [α, 40.]—**Hypodermic i.** The introduction of medicine or specific virus into the system through a hollow needle inserted beneath the skin. [α, 40.]—**I. antirabique** (Fr.). See *Preventive i. of rabies.*—**I. hypodermique par enchevillement** (Fr.). Of Lafargue, the introduction into the subcutaneous tissue of morphine, atropine, or veratrine in the form of a paste rolled into thin cylinders. [Bernatzik (A, 319 [α, 21]).]—**Jennerian i.** See VACCINATION.—**Medicinal i.** The introduction of medicinal agents into the system through the skin, whether by scarification or hypodermic injection. [α, 40.]—**Pasteur's system of i.** A system of i. for rabies in which a portion of the spinal cord of a rabid dog is used to inoculate a rabbit, which contracts the disease in about thirteen days. The spinal cord of this rabbit is used to inoculate another, and this a third, and so on through a long series of cases. The cords of these are dried and collected, some stale and powerless, others fresh and virulent. The system consists in beginning with the weakest for i. and progressing gradually to those of the greatest intensity, when the patient is supposed to be proof against the disease. [α, 40.]—**Preventive i. of rabies.** Fr., *i.* (ou *vaccination*) *antirabique.* The i. with a mitigated virus of rabies to induce insusceptibility to the disease or with the view of limiting its intensity when it is already established. ["Med. Times and Gaz."; "N. Y. Med. Jour.," Nov. 21, 1885, p. 591 (α, 40).]—**Self-i.** Fr., *auto-i.* Ger., *Selbstinokulation.* Syn.: *auto-i.* The i. of the organism at large from a diseased part of the same organism.—**Lacto-variolic i., Modified i.** The practice of inoculating small-pox virus mixed with cow's milk, founded on a theory that cow-pox is the result. [T. Layton, "N. O. Med. and Surg. Jour.," Dec., 1883, p. 461.]

INOCULATOR (Lat.), n. m. I^{2}n-o^{2}k-u^{2}l(u^{4}l)-at(a^{3}t)'o^{2}r; in Eng., i^{2}n-o^{2}k'u^{2}l-at-o^{2}r. Gen., *-or'is.* From *inoculare,* to ingraft. 1. One who practices inoculation. 2. An instrument for performing inoculation.

INOCULISTE (Fr.), n. E-no-ku^6-lest. From *inoculare,* to ingraft. One who favors inoculation (of small-pox). [L, 41.]

INOCYSTIS (Lat.), n. f. I(e)-no(no^3)-si^{2}s(ku^{6}s)'ti^{2}s. Gen., *-cyst'eos* (*-cyst'ios*). From ἴς, a fibre, and κύστις, a bag. Fr., *inocyste.* Ger., *Sehnenbalg.* A fibrous cyst. [L, 50 (α, 14).]

INODESMA (Lat.), n. n. I(e)-no(no^3)-de^{2}z(de^{2}s)'ma^3. Gen., *-des'matos* (*-atis*). From ἴς, a fibre, and δέσμα, a band. Ger., *Sehnenband.* A fibrous band. [L, 50 (α, 14).]

INODORATE, INODOROUS, adj's. I^{2}n-od'o^{2}r-at, -u^{3}s. Gr., ἄνοσμος. Lat., *inodorus* (from *in,* neg., and *odorare,* to perfume). Fr., *inodore.* Ger., *geruchlos.* Without odor. [α, 24.]

INODULAR, adj. I^{2}n-od'u^{2}l-a^{3}r. From ἰνώδης, fibrous. Fr., *inodulaire.* Ger., *inodulär.* It., *inodulare.* Fibrous and cicatricial. [A, 385.]

INODULE (Fr.), n. E-no-du^{6}l. Fibrous cicatricial tissue. [L, 41, 42, 44 (α, 14).]

INOGEN, INOGENE, n's. I^{2}n'o-je^{2}n. -jen. From ἴς, a muscle, and γεννᾶν, to engender. Fr., *inogène.* A hypothetical substance of muscles, susceptible of being broken up, during contraction and chemical actions, into lactic and sarcolactic acids and myosin. [B, 49, 93 (α, 39).]

INOGENESIS (Lat.), n. f. I(e)-no(no^3)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-es'eos* (*-gen'esis*). From ἴς, a fibre, and γένεσις, a begetting. Fr., *inogénésie.* Ger., *Faserbildung.* The formation of fibres. [L, 50 (α, 14).]

INOHYLOMA (Lat.), n. n. I^{2}n(en)-o(o^3)-hil(hu^{6}l)-o'ma^3. More properly written *inyloma.* Gen., *-om'atos* (*-atis*). From ἴς, a fibre, and ὕλη, matter. A fibrous tumor. [E, 6.]

INOHYMENITIS (Lat.), n. f. I^{2}n(en)-o(o^3)-hi(hu^6)-me^{2}n(man)-i(e)'ti^{2}s. More properly written *inymenitis.* Gen., *-it'idos* (*-idis*). From ἴς, a fibre, and ὑμήν, a membrane (see also *-itis**). Inflammation of fibrous tissue. [E, 6.]

INOKULABILITÄT (Ger.), n. I^{2}n-o-ku-la^3-be-le-tat'. See INOCULABILITY.

INOLITH, n. I^{2}n'o-li^{2}th. Lat., *inolithus* (from ἴς, a fibre, and λίθος, a stone). A fibrous concrement. [L, 50 (α, 14).]

INOMA (Lat.), n. n. I^{2}n(en)-o'ma^3. Gen., *-om'atos* (*-atis*). From ἴς, a fibre. See SCIRRHUS and FIBROMA.

INOMYCETES (Lat.), n. m. pl. I^{2}n(en)-o(o^3)-mi(mu^6)-set(kat)'-ez(e^{2}s). From ἴς, a fibre, and μύκης, a mushroom. Of Martius, Fries, and Sprengel, a section or order of the *Hyphomycetes,* containing, according to Fries, the *Mucedines* and *Byssacei.* [B, 170 (α, 24).]

INONCTION (Fr.), n. I^{2}n-o^{2}n^{2}k-si^2-o^{2}n^2. See INUNCTION.

INONDÉ (Fr.), adj. I^{2}n-o^{2}n^2-da. See INUNDATE.

INOPERCULAR, INOPERCULATE, adj's. I^{2}n-o-pu^{6}rk'-u^{2}l-a^{3}r, -at. Lat., *inoperculatus* (from *in* neg., and *operculum* [*q. v.*]). Fr., *inoperculé.* Having no operculum. The *Inoperculata* are a division of the pulmonate *Gasteropoda* so characterized. [B, 28 (α, 27).]

INOPEXIA, n. I^{2}n(en)-o(o^3)-pe^{2}x(pax)'i^2-a^3. From ἴς, a fibre, and πῆξις, a coagulation. Fr., *inopexie.* Ger., *Inopexie.* Of Vogel, a condition of the blood, observed especially in lying-in women, in which it is prone to coagulate spontaneously. [A, 38; Hayem, "Union méd.," Dec. 31, 1885, p. 1076.]

INOPHLOGISMA (Lat.), n. n. I^{2}n(en)-o(o^3)-flo(flo^2)-ji^{2}z(gi^{2}s)'-ma^3. Gen., *-gis'matos* (*-atis*). From ἴς, a fibre, and φλόγισμα, the blister of a burn. Inflammation of fibrous tissue. [L, 50 (α, 14).]

INOPHLOGOSIS (Lat.), n. f. I^{2}n(en)-o(o^3)-flo(flo^2)-go'si^{2}s. Gen., *-os'eos* (*-os'is*). From ἴς, a fibre, and φλόγωσις, a burning. The formation of inophlogisma. [L, 50 (α, 14).]

INOPHYLLOUS, adj. I^{2}n-o-fi^{2}l'u^{3}s. From ἴς, a fibre, and φύλλον, a leaf. Fr., *inophylle.* Of plants, having leaves provided with very distinct reticulated veins. [L, 41 (α, 14).]

INOPOLYPUS (Lat.), n. m. I^{2}n(en)-o(o^3)-po^{2}l'i^{2}p(u^{6}p)-u^{3}s(us). From ἴς, a fibre, and πολύπους, a polypus. Fr., *inopolype.* Ger., *Faserpolyp.* A fibrous polypus. [L, 50 (α, 14).]

INORGANIC, adj. I^{2}n-o^{2}r-ga^{2}n'i^{2}k. Lat., *inorganicus* (from *in,* neg., and ὄργανον, an organ). Fr., *inorganique.* Ger., *inorganisch.* It., *inorganico.* Sp., *inorgánico.* In chemistry, not forming a part of an organic compound, hence not containing carbon; thus water, H_2O, is an inorganic substance; alcohol, C_2H_6O, an organic substance. [α, 38.]

INOSATE, n. I^{2}n'os-at. Fr., *i.* Ger., *inosinsaures Salz.* A salt of inosic acid. [B, 38, 93 (α, 14).]

INOSCLEROMA (Lat.), n. n. I^{2}n(en)-o(o^3)-skle^{2}r(sklar)-o'ma^3. Gen., *-om'atos* (*-atis*). From ἴς, a fibre, and σκλήρωμα, induration. Ger., *Faserhautgewebsverhärtung.* Indurated fibrous tissue. [L, 50 (α, 14).]

INOSCLEROSIS (Lat.), n. f. I^{2}n(en)-o(o^3)-skle^{2}r(sklar)-o'si^{2}s. Gen., *-os'eos* (*-is*). Inflammation and hypertrophy of fibrous tissue. [α, 40.]

INOSCULATE, v. intr. I^{2}n o^{2}s'ku^2-lat. See ANASTOMOSE.

INOSCULATIO (Lat.), n. f. I^{2}n-o^{2}sk-u^{2}l(u^{4}l)-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is.* See ANASTOMOSIS.—**I. vasorum.** See ANASTOMOSIS (2d def.).

INOSCULATION, n. I^{2}n-o^{2}s-ku^2-la'shu^{3}n. Lat., *inosculatio* (from *in,* into, and *osculum,* a little mouth). Ger., *Einmündung.* See ANASTOMOSIS.

INOSIC ACID, n. I^{2}n-os'i^{2}k. From ἴς, a muscle. Fr., *acide inosique.* Ger., *Inosinsäure.* An acid, $C_{10}H_6N_2O_{10}HO$, or $C_5H_8N_2O_6$, or $C_{10}H_{14}N_4O_{11}$, discovered by Liebig in the flesh and muscular tissue, together with creatine; a syrupy substance soluble in water, insoluble in alcohol and in ether. [B, 38, 48, 93, 125 (α, 14); Munk (A, 319 [α, 21]).]

INOSIN, n. I^{2}n'os-i^{2}n. Fr., *inosine.* Ger., *I.* See INOSITE.

INOSINIC ACID, n. I^{2}n-os-i^{2}n'ik. See INOSIC ACID.

INOSIS (Lat.), n. f. I^{2}n(en)-o'si^{2}s. Gen., *-os'eos* (*-is*). From ἴς, a fibre. See HYPERINOSIS and INOGENESIS.

INOSITE, n. I^{2}n'os-it. From ἴς, a muscle. Fr., *i.* Ger., *Inosit.* Muscle sugar; a carbohydrate, $C_6H_{12}O_6 + 2H_2O$, occurring under the form of efflorescent prismatic crystals of a sweetish taste, moderately soluble in water. It is found in the juice of muscles, especially cardiac muscle, in the lungs, liver, spleen, kidney, brain, and blood, and pathologically in the urine and in the liquid of some hydatid cysts; it also occurs in some *Leguminosæ,* in asparagus, and in the vine. It has been obtained by Tauret and Villiers from the leaves of the *Juglans regia.* In chemical structure it is a hexatonic alcohol of the formula $C_6H_6(OH)_6$. [B, 4, 9, 93, 125; "Bericht. d. dtsch. chem. Gesellsch.," xiv, p. 2250 (B).]

INOSITOSE, n. I^{2}n'os-it-os. Ger., *I.* Of Scheibler, inosite. [B.]

INOSITURIA (Lat.), n. f. I(e)-no(no^3)-si(si^2)-tu^2(tu)'ri^2-a^3. From ἴς, a muscle, and οὖρον, urine. Fr., *inositurie.* See INOSURIA.

INOSTEATOMA (Lat.), n. n. I^{2}n(en)-o(o^3)-ste(ste^2)-a^{2}t(a^{3}t)-o'ma^3. Gen., *-om'atos* (*-atis*). From ἴς, a fibre, and στέαρ, suet. Fr., *inostéatome.* A tumor composed of fibrous tissue and steatomatous matter. [E, 6.]

INOSURIA (Lat.), n. f. I^{2}n(en)-os(o^{3}s)-u^2(u)'ri^2-a^3. From ἴς, a muscle, and οὖρον, urine. Fr., *inosurie.* Ger., *Inosurie.* It., Sp., *i.* A morbid condition characterized by the presence of inosite in the urine. [Cochot, "Paris méd.," 1882, No. 5; "Sperimentale," May, 1882, p. 515.]

INOTAGMATA (Lat.), n. n. pl. I^{2}n(en)-o(o^3)-ta^{2}g(ta^{3}g)'ma^{2}t-(ma^{3}t)-a^3. From ἴς, a muscle, and τάγμα, that which has been arranged. Fr., *inotagmes.* Ger., *Inotagmen.* Of Engelmann, the hypothetical contractile elements of contractile protoplasm. Like the disdiaclasts of Brücke, they are supposed to be positively uniaxial and doubly refracting. ["Quart. Jour. Micr. Sci.," 1884, p. 411 (J, 140, 175).]

INOVULATE, adj. I^{2}n-ov'u^{2}l-at. Lat., *inovulatus* (from *in* neg., and *ovum,* an egg). Fr., *inovulé.* Not ovulate, without an ovule (said of the two sterile cells of the ovary in the *Arctotideæ*). [α, 35.]

INOWRACLAW, n. A place in the province of Posen, Prussia, where there is a spring rich in sodium and magnesium chlorides, also a modern bathing establishment. [L, 30, 37, 57 (α, 14).]

INOXIDIZABLE, adj. I^{2}n-o^{2}x-i^{2}d-iz'a^2-b'l. Fr., *inoxydable.* Ger., *inoxydirbar.* Incapable of oxidation.

INQUEST, n. I^{2}n'kwe^{2}st. See INQUISITION.

INQUIETUDE, n. I^{2}n-kwi'e^{2}t-u^{2}d. Lat., *inquies, inquietudo* (from *inquietare,* to disquiet). Fr., *inquiétude.* Ger., *Unruhe.* Restlessness.

INQUILINÆ (Lat.), n. f. pl. I^{2}n^2-kwi^{2}l-i(e)'ne(na^3-e^2). From *inquilinus,* an inhabitant of a place that is not his own. The guest gall-flies, a section of the *Hymenoptera* which are unable to produce galls themselves, as they do not secrete the gall-producing poison. [L, 196 (α, 39).]

INQUILINE, adj. I^{2}n^2'kwi^2-lin. Lat., *inquilinus.* Of or pertaining to the *Inquilinæ.* [L, 196 (α, 39).]

INQUINATE, v. tr. I^{2}n^2'kwi^2-nat. Lat., *inquinare*. To pollute, defile. [α, 38.]

INQUISITION, n. I^{2}n-kwi^2-zi^{2}sh'u^{3}n. Lat., *inquisitio* (from *inquirere*, to inquire into). The inquiry by a jury or commission into the facts of a case, civil or criminal, or into an individual's mental condition, such inquest being generally in lieu of trial at the bar. [α, 40.]

INRADIANT, adj. I^{2}n-rad'i-a^{2}nt. Lat., *inradians* (from *in* neg., and *radians*, radiant). Fr., *i*. Ger., *unstrahlend*. Not radiating (said of a capitulum of flowers in which rays are not formed by the enlargement of outer florets). [B, 1, 19, 123 (α, 35).]

INSACCATION, n. I^{2}n-sa^{2}k-ka'shu^{3}n. Lat., *insaccatio*. Ger., *Einsackung*. An inward pitting or dimpling of the wall of a hollow organ. [A, 322.]

INSALIFIABLE (Fr.), adj. A^{2}n^2-sa^{2}l-i^2-fi'a^2-bl'. From *in*, neg., *sal*, a salt, and *fieri*, to become. Unable to form a salt (said of certain bases). [B, 38 (α, 14).]

INSALIVATION, n. I^{2}n-sa^{2}l-i^2-va'shu^{3}n. Lat., *insalivatio* (from *in*, into, and *saliva*, saliva). Fr., *i*. Ger., *Einspeichelung*. The process of mixing the saliva intimately with the food while it is being chewed. [K, 11.]

INSALUBRIOUS, adj. I^{2}n-sa^{2}l-u^{2}b'ri^2-u^{3}s. Lat., *insalubris* (from *in* neg., and *salubris*, health-giving). Fr., *insalubre*. Ger., *unheilsam*, *ungesund*. Unwholesome. [L, 30, 41. 50 (α, 14).]

INSALUBRITY, n. I^{2}n-sa-lu^2'bri^{2}t-i^2. From *in* neg., and *salubritas*, healthfulness. Fr., *insalubrité*. Ger., *Insalubrität*. The quality of being insalubrious.

INSALUTARY, adj. I^{2}n-sa^{2}l'u^2-ta-ri^2. See INSALUBRIOUS.

INSANABILIS (Lat.), adj. I^{2}n-sa^{2}n(sa^{3}n)-a^{2}b(a^{3}b)'i^{2}l-i^{2}s. From *in* neg., and *sanare*, to cure. Incurable.

INSANE, adj. I^{2}n-san'. Lat., *insanus* (from *in* neg., and *sanus*, sound). Fr., *fou*, *aliéné*. Ger., *irrsinnig*, *toll*, *wahnsinnig*. It., *pazzo*. Sp., *demente*, *loco*. Affected with or of the nature of insanity. [D.]

INSANIA (Lat.), n. f. I^{2}n-san(sa^{3}n)'i^2-a^3. See INSANITY.—**I. cadiva.** See EPILEPSY.—**I. lupina.** A form of delusional insanity in which the patient believes himself transformed into a wolf and imitates the voice and habits of that animal. [α, 40.]—**I. puerperarum.** See *Puerperal* INSANITY.

INSANIFEROUS, adj. I^{2}n-sa^{2}n-i^{2}f'e^{2}r-u^{3}s. From *insanus*, unsound, and *ferre*, to bear. Conducing to or producing insanity. [α, 45.]

INSANITARY, adj. I^{2}n-sa^{2}n'i^2-ta-ri^2. From *in* neg., and *sanitas*, health. Not sanitary, unwholesome. [D.]

INSANITY, n. I^{2}n-sa^{2}n'i^2-ti^2. Gr., ἀφροσύνη, παραφροσύνη. Lat., *insanitas* (from *insanus*, unsound). Fr., *insanité*, *folie*. Ger., *Tollheit*, *Wahnsinn*, *Irrsinn*. It., *pazzia*, *insania*, *follia*. Sp., *demencia*, *locura*. According to Hammond, a result of certain forms of disease of the brain in which there is derangement, more or less complete, of the mental faculties, with weakening, perversion, or even destruction of mental freedom. According to Spitzka, inability to correctly register and reproduce impressions, and the resulting conceptions that serve as proper guides to action, and to limit one's self to the registration of impressions transmitted by the peripheral organs of sensation as subjective realities. According to others, imperfect power of co-ordinating mental impressions and following them to logical ends. This want of power excludes the influence of sleep, trance, and somnambulism, the ordinary phenomena of the general neuroses, also those of febrile delirium, coma, acute intoxications, intense mental preoccupation, also the well-recognized immediate effects of nervous shock and injury. [D, 36.]—**Acute confusional i.** See *Primary confusional i.*—**Acute methepileptic (or post-epileptic) i.** Fr., *grand* (et *petit*) *mal intellectuel* [Fabret]. The acute I. immediately following the convulsive paroxysm of epilepsy; subdivided by Samt into (1) simple stupor, (2) morbid conditions of fever or fright, simple or complicated with reasoning mania or great excitement, and (3) mania. [D, 36.]—**Affective i.** Of Maudsley, one of the general divisions of i., including mania sine delirio, simple melancholia, and moral alienation proper. [D, 36.]—**Alcoholic i.** Fr., *folie alcoolique*. See *Chronic alcoholic i.*—**Alternating i.** See *Periodical i.*—**Ambitious i.** See DELIRIUM *grandiosum*.—**Amenorrhœal i.** Of Skae, i. in which irregularities in the catamenia are the obviously immediate and essential cause. [α, 40.]—**Anæmic i.** Of B. Tuke, i. produced by anæmia. [α, 7.]—**Anomalous i.** I. in which the symptoms of several forms are so intimately associated that it can not be positively classified. [α, 40.]—**Asthenic i.** Of Skae, a variety of idiopathic i. characterized by the slight intensity with which the mental derangement is manifested. [D, 43.]—**Cataleptoid i.** I. associated with catalepsy, although rarely due to it. [Mann (α, 40).]—**Catatonic i.** See CATATONIA.—**Choreic i.** Aberration of mind accompanying or resulting from chorea and due to the same causes as the chorea. Emotional, intellectual, and perceptional faculties are all affected by this disease, and it may end in maniacal delirium. [Hammond (α, 40).]—**Chronic alcoholic i.** Chronic I. secondary to an alcoholic neurosis; especially characterized by hallucinations, delusions, and delirious exacerbations. [D, 36.]—**Circular i.** Lat., *cyclothymia*. Fr., *folie circulaire* (ou *à double forme*, ou *paralytique circulaire à double phase*). A variety of periodical i. characterized by alternations of mania and melancholia in regularly recurring periods. [D, 36.]—**Climacteric i.** I. occurring in women at the menopause, especially those predisposed to i., the extent to which the mind is influenced by the physiological changes of that period not being exactly known. [D, 43.]—**Communicated i.** Fr., *folie communiquée* (ou *à deux*, ou *épidémique*, ou *par imitation*). Ger., *induzirtes Irresein*. I. transferred from one person to another, or depending on some association or special relation between two persons. Tuke includes cases (1) in which a lunatic of relatively stronger mind or will infects (*a*) another lunatic or (*b*) a weak-minded or hereditarily predisposed person with the same delusions (see *Imitative i.*); (2) in which a nurse or keeper becomes insane from the shock or strain incidental to his work; (3) in which two persons become insane simultaneously from the same cause; and (4) in which twins become insane contemporaneously, although living apart, from a supposed special sympathy between them. [D, 36; "Med. Chron.," Apr., 1888, p. 78 (α, 17); α, 34.]—**Compound i.** Of Hammond, i. in which two or more groups of mental faculties are markedly involved. [α, 40.]—**Confusional i.** See *Primary confusional i.*—**Congenital i.** Fr., *folie congénitale* (ou *morphologique*). Of Ball, a division of i. including idiocy, imbecility, and cretinism. [α, 34.]—**Congestive i.** I. due to congestion of the brain. [α, 40.]—**Consecutive i.** I. succeeding and due to some injury or disease other than of the brain. [α, 40.]—**Constitutional i.** Those forms of i. which are the result of a physiological or pathological condition or of some specific morbid influence affecting the general system. [Hammond (α, 40).]—**Cretinic i.** See under CRETINISM.—**Cyclic i., Cyclical i.** See *Circular i.*—**Delusional i.** See *Primary delusional i.* and *Secondary delusional i.*—**Demonomaniacal i.** See DÆMONOMANIA.—**Depressive i.** See MELANCHOLIA.—**Diabetic i.** I. associated with or due to diabetes. [D, 43.]—**Diathetic i.** An i. brought on by very slight cause in a person of insane diathesis. [Mann (α, 40).]—**Doubting i.** See FOLIE *du doute*.—**Emotional i.** Fr., *folie émotive* (ou *impulsive*). I. in which perversion of the emotions is the essential feature, as in mania and melancholia. [D, 36.]—**Epidemic i.** Fr., *folie épidémique*. See *Communicated i.*—**Epileptic i.** Fr., *folie épileptique*. Ger., *epileptischer Irrsinn*. 1. I. in its various forms, either induced or precipitated by epilepsy. 2. Of Samt, i. resembling one of the forms of methepileptic i. [D, 36.]—**Erotic i.** Satyriasis. [α, 40.]—**Exophthalmic i.** I. connected with exophthalmic goître and due to the same affections of the sympathetic nervous system as the goître. [α, 40.]—**Febrile i.** Mania or protracted delirium due to hyperpyrexia. [Savage (α, 40).]—**Feigned i.** Fr., *folie simulée*. Ger., *simulirter Irrsinn*. I. which has no existence in fact, but is simulated for a purpose. [D, 43.]—**Furious i.** 1. Homicidal destructive mania. 2. An old Roman division signifying violent and excited i. [α, 40.]—**Gastro-enteric i.** I. due to some functional or organic disease of the alimentary tract. [α, 40.]—**General i.** Of Maudsley, a general term for mania and melancholia. [D, 36.]—**Gouty i.** I. due to gout. [D, 36.]—**Hepatic i.** An i., usually hypochondriacal, due to real or imaginary disease of the liver. [α, 40.]—**Hereditary i.** Fr., *folie des dégénérés* (ou *instinctive*). I. usually appearing at some physiological crisis, such as puberty or the climacteric and due to hereditary influences. [Mann (α, 40).]—**Homicidal i.** Fr., *folie homicide*. A form of impulsive i. in which the patient, though conscious of the criminal nature of the act, is irresistibly impelled to kill, often those nearest or dearest to him. It is associated with mental or physical strain or exhaustion, and there is usually some form of mental degeneration to which the i. can be traced. [Pepper (α, 40).]—**Hypochondriacal i.** Fr., *folie hypochondriaque*. I. manifested by delusions as to bodily sensations or morbid conditions. [D, 36.]—**Hysterical i.** Chronic i. secondary to an hysterical neurosis. It preserves the characteristics of hysteria as to simulative tendencies. [D, 36.]—**Ideal i.** Arnold's first general division of i. in which he embraces all those forms in which the ideas dependent upon the special senses are perverted. [Arnold (α, 40).]—**Ideational i.** Of Maudsley, a division of i. including (1) general i., comprising mania and melancholia; (2) partial i., comprising monomania and melancholia; (3) dementia, either primary or secondary; (4) general paralysis; and (5) idiocy and imbecility. [D, 36.]—**Ideophrenic i.** See *Ideational i.*—**Idiopathic i.** Fr., *folie idiopathique* (ou *essentielle*, ou *primitive*, ou *vésanique*). I. depending (1) on conditions said to be *sine materia* (*i. e.*, in which no appreciable lesion is found); (2) on conditions in which there are material lesions; or (3) on alterations of the blood. [Voisin (α, 34).]—**Imitative i.** The second form of communicative i., consisting of an imitation of the insane characteristics of another. [α, 40.]—**Imposed i.** Fr., *folie imposée*. An i. in which the lunatic imposes his delirious conceptions on another morally and intellectually weaker than himself. [Hammond (α, 40).]—**Impulsive i.** A term often used in the courts, especially in pleadings in defense for crime, in which it is alleged that i. and consequent non-responsibility existed at the moment when a crime was committed, the subject being rational before and afterward. Hamilton and others deny the existence of such a condition. [D, 43.]—**Infantile i.** Of Spitzka, i. of infant life, whether congenital or acquired. [Keating (α, 40).]—**I. from intoxication.** See *Toxic i.*—**I. of acts.** Fr., *folie des actes*. See *Reasoning* MANIA.—**I. of adolescence.** See *I. of puberty.*—**I. of childbirth.** See *Puerperal i.*—**I. of childhood.** An i. occurring in early life brought on by some patent cause and not due to any congenital defect or hereditary influence. [α, 40.]—**I. of delivery.** 1. Puerperal i. 2. Hysterical mania the result of escape from some great peril. [α, 40.]—**I. of febrile disorders.** See *Febrile i.*—**I. of gestation.** See *Puerperal i.*—**I. of grandeur.** See DELIRIUM *grandiosum*.—**I. of lactation.** Fr., *folie des nourrices*. The i. of nursing women, a variety of puerperal i.; of Voisin, mania occurring during the first six weeks, or after several months, of nursing or at weaning. [α, 34.]—**I. of masturbation.** The i. of pubescence when due to masturbation. [D, 36.]—**I. of oxaluria.** A form of hypochondriacal i. associated with excess of oxalates in the urine. [Skae (α, 40).]—**I. of persecution.** See DÉLIRE *des persécutions*.—**I. of phosphaturia.** Of Skae, a form of i. found in mentally overworked men, and associated with excessive phosphates in the urine. [α, 40.]—**I. of pregnancy.** See *Puerperal i.* and *Preparturient i.*—**I. of puberty, I. of pubescence.** Fr., *folie de l'adolescence* (ou *de la puberté*, ou *pubérale*). Ger., *Hebephrenie*. Of Skae and Maudsley, a form of i. occurring at or soon after the period of puberty and supposed to be due to vital depletion from masturbation, the inception of

menstruation, or overstudy, in those predisposed by heredity; characterized by a period of melancholic depression, followed by mental enfeeblement, silliness, delusions, and, finally, complete dementia. [D, 36.]—**I. of self-abuse.** See *I. of masturbation.* —**I. of the feelings.** See *Emotional i.*—**I. of the muscles.** Fr., *folie musculaire.* Ger., *muskeliger Wahnsinn.* Of Watson, the irregular and uncalled-for action of certain muscles, associated with spastic inco-ordination, tremor, or spasm (*e. g.*, in laryngeal chorea); of Bellingham and Bouillaud, chorea. [D, 35.]—**I. of twins.** Fr., *folie gémellaire.* See under *Communicated i.*—**I. of uncertainty.** See FOLIE *du doute.*—**Instinctive i.** See *Hereditary i.*—**Intellectual i.** [Hammond]. See *Ideational i.* and MONOMANIA.—**Intermittent i.** Recurrent i. [*a*, 40.]—**Intervallary epileptic i.** Of Spitzka, i. occurring between consecutive paroxysms of epilepsy. [D, 36.]—**Ischæmic i.** I. due to persistent anæmia of the brain, being usually the result of neurasthenia. [*a*, 40.]—**Katatonic i.** See CATATONIA.—**Lucid i.** Moral i. [*a*, 40.]—**Malarial i.** It., *insanità di malaria.* An i. of no distinctive characteristics, due to malarial poisoning. [Hammond (*a*, 40).]—**Maniacal i.** See MANIA.—**Masturbatic i.** See *I. of masturbation.*—**Melancholic i.** See MELANCHOLIA.—**Menstrual i.** Fr., *folie menstruelle* (ou *périodique*). I. appearing during the course or with the inception of menstruation or at the menopause (see *Climacteric i.*). In some women there is a periodical i. at each menstrual epoch, not the result, according to Spitzka, of the menstrual condition, but only excited thereby. [D, 36; *a*, 34.]—**Metastatic i.** I. due to the metastasis of a disease from one part of the body to another, possibly to the brain itself. [D, 43.]—**Monomaniacal i.** See MONOMANIA.—**Moral i.** Fr., *folie morale.* An uncontrollable violence of impulses, instincts, and emotions, associated with more or less progressive mental impairment and change of character, taste, and disposition. [*a*, 40.]—**Notional i.** Of Arnold, that form of i. in which the patient sees, hears, or otherwise perceives objects as they really exist, yet conceives such notions of them as are obviously and grossly erroneous. [*a*, 40.]—**Onanistic i.** See *I. of masturbation.*—**Opium i.** An acute or chronic i. due to chronic opium poisoning. Its phenomena may resemble those seen in the various types of alcoholic i. [D, 36.]—**Organic i.** Fr., *folie organique.* Of Ball, a class of insanities including acute delirium, aphasia, general paralysis, etc. [*a*, 34.]—**Ovarian i.** Of Skae, i. due to ovarian disease, usually of melancholic or hysterical form. [*a*, 40.]—**Paralytic i.** The general paralysis of the insane. [D.]—**Paroxysmal i.** A form of recurrent i. in which the patient is seized with paroxysms of mental aberration, hallucinations, delirium, and mania (sometimes epileptic) which are temporary, and the patient remains more or less perfectly well in the interims. [*a*, 40.]—**Partial i.** See MONOMANIA.—**Pathetic i.** See *Affective i.*—**Pellagrous i.** Of Spitzka, a form of i. dependent on a primary pellagrous condition. [D, 36.]—**Perceptional i.** An i. in which the patient has perceptive sensations when no external object to excite such sensations has impressed the senses. [*a*, 40.]—**Periodical i.** Fr., *folie périodique* (ou *intermittente*). A form of i. which recurs at intervals, with apparent mental soundness between the attacks. It is usually hereditary, but may be due to traumatism, alcoholic excesses, etc. [D, 36.] See also *Menstrual i.*—**Phthisical i.** Fr., *folie phthisique.* A form of i. developed in the course of phthisis. [D, 36; G. H. Roger, "Encéphale," No. 5, p. 597.]—**Post-connubial i.** Of Skae, an acute mania in men of previously rigid virtue brought on by the first sexual orgasm after marriage. ["Brit. Jour. of Ment. Sci.," 1873, p. 503 (*a*, 40).]—**Post-epileptic i.** See *Acute methepileptic i.*—**Post-febrile i.** A disordered mental condition which occurs in the convalescent period of some acute febrile diseases. [D, 36.]—**Post-puerperal i.** Puerperal i. occurring after delivery.—**Preparturient i., Prepuerperal i.** Puerperal i. occurring before labor.—**Pre-epileptic i.** Of Spitzka, a form of mental disturbance preceding an epileptic convulsion (or its equivalent), and increasing in intensity until the onset of the paroxysm. [D, 36.]—**Primary confusional i.** Mental derangement characterized by incoherence and confusion of ideas, but with no essential emotional disturbance, or true dementia. [D, 36.]—**Primary delusional i.** A form of hereditary i. arising primarily from no preceding psychosis and in which the delusions, though fixed and systematized, are yet limited and associated in its early stages with no great mental enfeeblement. [*a*, 40.]—**Primary i.** A chronic i. not induced by any preceding neuro-psychosis. [Spitzka (*a*, 40).]—**Primordial i.** See *Primary i.*—**Pubescent i.** See *I. of pubescence.*—**Puerperal i.** Lat., *mania* (seu *melancholia*, seu *vesania*, seu *encephalopathia*) *puerperalis* (seu *puerperarum*, seu *in puerpera*, seu *lactea*). Fr., *folie puerpérale* (ou *des femmes enceintes* [ou *en couches*], *des nouvelles accouchées, et des nourrices*). Ger., *Puerperalwahnsinn*, *Manie der Wöchnerinnen*, *Wahnsinn bei Kindbetterinnen*, *Puerperal-Psychose.* Syn.: *puerperal mania.* The i. of pregnancy, childbed, and lactation; commonly of sudden onset and maniacal character, lapsing subsequently into melancholia.—**Reasoning i.** Moral i. [*a*, 40.]—**Recurrent i.** A psycho-neurosis in which there are recurrent attacks of mental aberration with intervening periods of mental health. [*a*, 40.]—**Religious i.** A form of i. in which the mental aberration is associated with religious subjects. It embraces religious monomania and theomania, and has at times been epidemic. [Hammond (*a*, 40).]—**Rheumatic i., Rheumatismal i.** Of Spitzka, a form of i. dependent on a primary rheumatic condition. [D, 36.]—**Saturnine i.** The i. resulting from lead poisoning. [*a*, 40.]—**Secondary delusional i.** A chronic, incurable i. characterized by a slow progress from various mental diseases and persistent delusions, to marked dementia and confusion. [Pepper (*a*, 40).]—**Secondary partial i.** See *Active* DEMENTIA.—**Senile i.** I., conforming to no particular type, occurring in the aged. [D, 36.]—**Sensorial i.** I. associated with delusions and hallucinations with regard to objects of the special senses. [*a*. 40.]—**Simulated i.** See *Feigned i.*—**Simultaneous i.** See under *Communicated i.*—**Sthenic i.** Of Skae, a variety of idiopathic i. in which the mental derangement is forcibly expressed. [D, 43.] Cf. *Asthenic i.*—**Stuporous i.** Simple impairment or suspension of the mental powers, without emotional perversion. [D, 36.]—**Suicidal i.** Fr., *folie du suicide.* I. characterized by an impulse to commit suicide. [*a*, 34.]—**Sympathetic i.** Fr., *folie sympathique.* A form of i. due to powerful reflex influences. [D, 36.]—**Symptomatic i.** I. which exhibits itself as the symptom or result of some other disease. [*a*, 40.]—**Syphilitic i.** I. due to or associated with syphilis. [D.] —**Toxic i.** Fr., *folie toxique* (ou *par intoxication*). Mania due to poisoning by alcohol, absinthe, opium, cannabis indica, etc. [*a*, 34.] —**Transitory i.** Of Krafft-Ebing, a form of mental disease differing from other forms of i. only in its duration, viz., two to six days. [*a*, 40.]—**Transmitted i.** See *Communicated i.*—**Traumatic i.** Of Skae and of Bucknill and Tuke, i. referable to traumatism or analogous causes; characterized by perversity of character, with violent impulses and a tendency to alcoholism, and sometimes by fits of maniacal self-exaltation of short duration. The condition lasts a long time, with occasional remissions, and finally results in dementia. [D, 36.]—**Uterine i.** I. due to uterine or ovarian disease. [Savage (*a*, 40).]—**Visceral i.** A form of i., usually hypochondriacal or melancholic, due to the actual existence of or the patient's belief in some visceral lesion. [Spitzka (*a*, 40).]—**Volitional i.** I. associated with disturbance of will-power, whether excessive activity or inertia. [Hammond (*a*, 40).]

INSANUS (Lat.), adj. I^{2}n-san(sa^{3}n)'u^{3}s(u^{4}s). See INSANE.

INSATIABILITY, n. I^{2}n-sa-shi^2-a^2-bi^{2}l'i^2-ti^2. From *in* neg., and *satiare*, to satisfy. See ACORIA (3d def.).

INSATIABLE, adj. I^{2}n-sa'shi^2-a^2-b'l. Lat., *insatiabilis* (from *in* neg., and *satiare*, to satisfy). Fr., *i.* Ger., *unersättlich.* It., *insaziabile.* Sp., *insaciable.* Incapable of being satisfied.

INSCRIPTIO (Lat.), n. f. I^{2}n-skri^{2}p(skrep)'shi^2(ti^2)-o. Gen., *-on'is.* From *inscribere*, to write. 1. A religious sign or invocation placed at the head of a prescription; now often replaced by a sign designative of the system of weights employed. 2. A linear impression or marking like the stroke made with a pen. [B, 10 (*a*, 17).]—**Inscriptiones tendineæ.** Ger., *flechsige Querstreifen.* Syn.: *lineæ transversæ.* Transverse or oblique tendinous intersections which cross or partly cross the fibres of the rectus abdominis muscle, and are intimately adherent to its sheath. [C.]

INSCULPTO-PUNCTATUS (Lat.), adj. I^{2}n-sku^{3}lp(sku^{4}lp)-to(to^3)-pu^{3}n^{2}k(pu^{4}n^{2}k)-ta(ta^3)'tu^{3}s(tu^{4}s). From *insculpere*, to carve in, and *pungere*, to pierce into. Ger., *eingestochen-punktirt.* Reticulated with minute pits (*e. g.*, those occurring on the testa of a mustard-seed). [B, 123 (*a*, 24); *a*, 45.]

INSCULPTUS (Lat.), adj. I^{2}n-sku^{3}lp(sku^{4}lp)'tu^{3}s(tu^{4}s). From *insculpere*, to carve in. Ger., *eingestochen*, *eingegraben.* Having dotted or linear depressions (said of the surfaces of seeds, etc.). [B, 123 (*a*, 24).]

INSÉCABLE (Fr.), adj. A^{2}n^2-sa-ka^3-bl'. From *in* neg., and *siccare*, to make dry. Incapable of being dried. [L, 41 (*a*, 14).]

INSECT, n. I^{2}n'se^{2}kt. Gr., ἔντομον. Lat., *insectum* (from *insecare*, to cut through). Fr., *insecte.* Ger., *Insekt*, *I.* It., *insetto.* Sp., *insecto.* A small, usually winged, six-legged invertebrate animal, with body cut into segments; or, more particularly, any member of the class *Insecta.*—**Ametabolous i's.** See AMETABOLA. —**Cochineal i.** See COCCUS *cacti.*—**Gall i.** See CYNIPS.—**True i's.** Arthropods with but six true legs (*Hexapoda*), and the body grouped with three series of segments—head, thorax, and abdomen. [J, 10.]

INSECTA (Lat.), n. n. pl. I^{2}n-se^{2}kt'a^3. A class of articulate invertebrate animals in which the body is not only composed of a continuous series of segments articulating with each other, but is also cut into three very marked portions, the head, thorax, and abdomen, possessing jointed legs, and breathing by means of air-tubes throughout the body. This includes centipedes, millipedes, and spiders, as well as true insects. According to Nicholson, the *I.* are divided into subclasses, viz.: 1. The *Ametabola*, including the orders *Anopleura*, *Mallophaga*, and *Thysanura.* 2. The *Hemimetabola*, including the orders *Hemiptera*, *Orthoptera*, and *Neuroptera.* 3. The *Holometabola*, including the orders *Aphaniptera*, *Diptera*, *Lepidoptera*, *Hymenoptera*, *Strepsiptera*, and *Coleoptera.* [A, 359; J; L, 196, 292 (*a*, 39).]

INSECTICIDE, adj. I^{2}n-se^{2}kt'i^2-sid. From *insectum*, an insect, and *cædere*, to slay. Fr., *i.* Destructive to insects; as a n., a substance having that quality. [L, 41 (*a*, 14).]

INSECTIFEROUS, adj. I^{2}n-se^{2}kt-i^{2}f'e^{2}r-u^{3}s. From *insectum*, an insect, and *ferre*, to bear. Fr., *insectifère.* Bearing or containing insects, said especially of rocks bearing imprints or petrified bodies of insects. [L, 41 (*a*, 14).]

INSECTIVORISM, n. I^{2}n-se^{2}kt-i^{2}v'o^{2}r-i^{2}z'm. From *insectum*, an insect, and *vorare*, to devour. Fr., *insectivorisme.* Ger., *Insektenfressen.* The property possessed by certain plants of capturing and digesting insects. [B, 121 (*a*, 35).] See *Digestive* GLANDS.

INSECTIVOROUS, adj. I^{2}n-se^{2}k-ti^{2}v'o^{2}r-u^{3}s. Lat., *insectivorus* (from *insectum*, an insect, and *vorare*, to devour). Fr., *insectivore.* Ger., *insektenfressend.* Subsisting in part or wholly on insects (said of both animals and plants). The *Insectivora* are an order of the *Mammalia*, also a section of the *Cheiroptera*, so characterized. [*a*, 24; B, 28 (*a*, 27); L.]

INSECTOLOGY, n. I^{2}n-se^{2}k-to^{2}l'o-ji^2. Lat., *insectologia* (from *insectum*, an insect, and λόγος, understanding). Fr., *insectologie.* See ENTOMOLOGY.

INSECT-POWDER, n. I^{2}n-se^{2}kt-pu^5'ud-u^{5}r. Ger., *Insektenpulver.* The flowers of different species of *Pyrethrum*, often adulterated with the leaves and stem of the plant; used to destroy insects, as a dressing for sores, etc., to prevent the growth of maggots, and to preserve dried insects in cabinets. [B, 5 (*a*. 24).]—**Caucasian i.-p.** Fr., *pyrèthre du Caucase* [Fr. Cod.]. The flowers

of *Pyrethrum carneum* and *Pyrethrum roseum.* [B. 5 (*a*, 24).]—**Dalmatian i.-p.** The flowers of *Pyrethrum cinerariæfolium.* It is stronger than the Caucasian i.-p. [B. 5 (*a*, 24).]—**Guirila i.-p.** See *Caucasian i.-p.*—**Persian i.-p.** Ger., *persisches Insektenpulver.* See *Caucasian i.-p.*

INSEKT (Ger.), n. I^{2}n-ze^{2}kt′. See INSECT.—**I'enähnlich.** See ENTOMOID.—**I'enblüthig.** See ENTOMOPHILOUS.—**I'enfressend.** See INSECTIVOROUS.—**I'enkunde.** See ENTOMOLOGY.—**I'enpulver.** See INSECT-POWDER.—**I'entödter.** See ENTOMOPHTHOREÆ.—**I'enversteinerung.** See ENTOMOLITHUS.

INSEL (Ger.), n. I^{2}n′ze^{2}l. See INSULA.—**Bluti'n.** See BLOOD-*islands.*—**Epitheli'n.** See *Epithelial* ISLANDS.—**Gehirni'.** See INSULA.—**I'schwelle.** See MARGO *falciformis.*—**Pander'sche I'n.** See BLOOD-*islands.*—**Reil'sche I.** See INSULA.

INSELBAD (Ger.), n. I^{2}n′ze^{2}l-ba^{3}d. A place in the outskirts of Paderborn, Prussia, where there are several mineral springs (one ferruginous and containing calcium and magnesium sulphates, and others containing sodium chloride and much nitrogen and free carbonic acid), and an establishment for bathing and inhalations. [L, 30, 49, 57 (*a*, 14).]

INSEMINATION, n. I^{2}n-se^{2}m-i^{2}n-a′shu^{3}n. Lat., *inseminatio* (from *inseminare*, to plant in). Fr., *i.*, *insémination*, *ensemencement.* Ger., *Einsaat.* 1. The act of depositing the semen in copulation. 2. See DISSEMINATION.

INSENESCENCE, n. I^{2}n-se^{2}n-e^{2}s′e^{2}ns. Lat., *insenescentia* (from *in* neg., and *senescere*, to grow old). Ger., *Nichtaltern.* See AGERASIA.

INSENSIBILISATEUR (Fr.), n. A^{2}n^2-sa^{3}n^2-se-be-le-sa^3-tu^{5}r. See ANÆSTHETIC (n.).

INSENSIBILISATION (Fr.), n. A^{2}n^2-sa^{3}n^2-se-be-le-za^3-se-o^{2}n^2. See ANÆSTHETIZATION.

INSENSIBILITY, n. I^{2}n-se^{2}n-si^2-bi^{2}l′i^2-ti^2. Lat., *insensibilitas* (from *insensibilis*, that can not be felt). Fr., *insensibilité.* Ger., *Unempfindlichkeit.* It., *insensibilità.* Sp., *insensibilidad.* 1. See ANÆSTHESIA. 2. See *General* ANÆSTHESIA.

INSENSIBLE, adj. I^{2}n-se^{2}n′si^2-b'l. Lat., *insensibilis.* Fr., *i.* Ger., *unempfindlich.* It., *insensibile.* Sp., *i.* In a state of insensibility.

INSEPARATE, adj. I^{2}n-se^{2}p′a^2-rat. Lat., *inseparatus* (from *in* neg., and *separare*, to separate). Coalescent or adnate. [Gray (*a*, 35).]

INSEPARATION, n. I^{2}n-se^{2}p-a^2-ra′shu^{3}n. See COALESCENCE.

INSERTED, adj. I^{2}n-su^{5}rt′e^{2}d. Lat., *insertus* (from *inserere*, to ingraft). Fr., *greffé*, *implanté*, *inséré.* Ger., *eingefügt*, *angeheftet.* Attached to, adherent to, or growing out of another organ. [B, 1, 19, 123 (*a*, 24) ; *a*, 45.]

INSERTIO (Lat.), n. f. I^{2}n-su^{5}r(se^{2}r)′shi^2(ti^2)-o. Gen., *-o′nis.* 1. See INSERTION. 2. See GRAFT.—**I. eccentrica funis umbilicalis.** Ger., *excentrische Insertion des Nabelstranges.* An insertion of the umbilical cord into some other portion of the placenta than its centre.—**I. epigyna.** See *Epigynous* INSERTION.—**I. funiculi furcata.** Fr., *insertion vélamenteuse en forme de fourche* (ou *en fourche*). Ger., *Gabelinsertion des Nabelstranges.* Of Hyrtl, that mode of insertion of the umbilical cord into the placenta in which the vessels of the cord diverge in the form of two branches that are inserted separately. [A, 19.] See also FUNIS *furcalis.*—**I. funiculi umbilicalis velamentosa.** See *I. velamentosa funis umbilicalis.*—**I. funis umbilicalis.** Fr., *insertion du cordon ombilical.* The insertion of the umbilical cord into the placenta.—**I. furcata.** See *I. funiculi furcata.*—**I. hypogyna.** See *Hypogynous* INSERTION.—**I. immediata.** See *Immediate* INSERTION.—**I. marginalis bifida** [Hyrtl]. See *I. velamentosa* (*funis umbilicalis*).—**I. marginalis (funis umbilicalis).** See *I. eccentrica funis umbilicalis.*—**I. marginalis furcata.** See *I. funiculi furcata.*—**I. mediata.** See *Mediate* INSERTION.—**I. nervi.** Ger., *Einfügung eines Nerven in ein Organ.* The termination of a nerve by its filaments in a muscle or other portion of the body. [L, 50 (*a*, 29).]—**I. perigyna.** See *Perigynous* INSERTION.—**I. velamentosa (funis umbilicalis).** Fr., *insertion vélamenteuse du cordon umbilical.* Ger., *velamentöse Insertion des Nabelstranges.* Syn.: *i. marginalis bifida* (Hyrtl). That form of insertion of the umbilical cord into the placenta in which the vessels of the cord diverge from each other before entering the placenta, and the cord as a whole is really inserted into the chorion, near the margin of the placenta. [A, 19.]—**I. velamentosa furcalis.** See *I. funiculi furcata.*

INSERTION, n. I^{2}n-su^{5}r′shu^{3}n. Gr., ἔνωσις. Lat., *insertio* (from *inserere*, to introduce into). Fr., *i.* Ger., *Einfügung*, *Anheftung.* It., *inserzione.* Sp., *inserción*, *ingestion.* 1. The act of inserting. 2. The particular way in which anything is inserted ; in botany, the manner or place of attachment of a body ; especially a stamen, on the organ that bears it. [B, 1, 123, 291 (*a*, 24).] 3. Of a muscle, the site of its attachment to the part that its action tends to move.—**Epigynous i.** Lat., *insertio epigyna.* Fr., *i. épigyne.* Ger., *epigynische Anheftung.* An i. of the stamens upon the ovary. [B, 1 (*a*, 24).]—**Excentrische I. des Nabelstranges** (Ger.). See INSERTIO *eccentrica funis umbilicalis.*—**Gabeli' des Nabelstranges** (Ger.). See INSERTIO *funiculi furcata.*—**Hypogynous i.** Lat., *insertio hypogyna.* Fr., *i. hypogyne.* Ger., *hypogynische Anheftung.* An i. of a part upon the receptacle of the flower (*i. e.*, beneath the pistil). [B, 1, 123 (*a*, 24).]—**Immediate i.** Lat., *insertio immediata.* Fr., *i. immédiate.* Ger., *unmittelbare Anheftung.* An i. in which the points of origin and i. are the same, the organ inserted proceeding directly from the part. [B, 1, 19 (*a*. 24).]—**I'sstelle** (Ger.). The site of i. [L.]—**I. vélamenteuse en forme de fourche** (ou **en fourche**) (Fr.). See INSERTIO *funiculi furcata.*—**Mediate i.** Lat., *insertio mediata.* Fr., *i. médiate.* Ger., *mittelbare Anheftung.* In botany, an i. in which the apparent and actual places of attachment are different. [B, 1 (*a*, 24).]—**Marginal i. of the umbilical cord.** Lat., *insertio marginalis.* Fr., *i. marginale.* That form of i. of the cord in which the character of the latter as a whole is maintained up to its i. at the margin of the placenta, giving rise to the formation termed battledore placenta. Cf. *Velamentous i.*—**Perigynous i.** Lat., *insertio perigyna.* Fr., *i. périgyne.* Ger., *perigynische Anheftung.* An i. around the pistil (*i. e.*, an adnation which carries up the apparent place of attachment to some distance above or away from the receptacle). [B, 1, 19, 123, 291 (*a*, 24).]—**Vaginal i.** Ger., *Vaginalanheftung.* Syn.: *utero-vaginal junction.* The line of junction of the upper end of the vagina with the neck of the uterus.—**Velamentöse I. des Nabelstranges** (Ger.). See INSERTIO *velamentosa* (*funis umbilicalis*).—**Velamentous i. (of the umbilical cord).** See INSERTIO *velamentosa* (*funiculi umbilicalis*).

INSERTUS (Lat.), adj. I^{2}n-su^{5}r(se^{2}r)′tu^{3}s(tu^{4}s). See INSERTED.

INSESSIO (Lat.), n. f. I^{2}n-se^{2}s′si^2-o. Gen., *-on′is.* From *insidere*, to sit in anything. The use of a sitz-bath. [B, 270.]

INSESSORES (Lat.), n. m. pl. I^{2}n-se^{2}s-sor′ez(as). From *insidere*, to sit in anything. See PASSERES.

INSESSORIAL, adj. I^{2}n-se^{2}s-so′ri^2-a^{2}l. Of or pertaining to the *Insessores.* [L, 343.]

INSESSUS (Lat.), n. m. I^{2}n-se^{2}s′su^{3}s(su^{4}s). From *insidere*, to sit in anything. Gr., ἐγκάθισμα, ἐγκαθισμός (from ἐγκαθίζειν, to sit in anything). A sitz-bath. [B, 48 ; L, 50 (*a*, 14).]—**I. vaporosus.** A steam bath for the hips. [L, 50 (*a*, 14).]

INSEXED, adj. I^{2}n-se^{2}xd′. Lat., *insexus* (from *in* neg., and *sexus*, sex). Fr., *insexé.* Ger., *geschlechtslos.* Of plants, without sex ; neuter. [B, 1 (*a*, 24).]

INSIDENT, adj. I^{2}n′si^{2}d-e^{2}nt. Lat., *insidens* (from *insidere*, to sit upon). Ger., *aufsitzend.* Sitting upon ; of fruits, placed upon a carpophore (*carpophoroinsidens*). [B, 123 (*a*, 24).] The film, etc., found on the surface of urine were formerly termed *insidentia.* [A, 325.]

INSIDIOUS, adj. I^{2}n-si^{2}d′i^2-u^{3}s. Lat., *insidians* (from *insidiari*, to lie in ambush). Fr., *insidieux.* Ger., *insidiös.* It., Sp., *insidioso.* Of diseases, coming on stealthily, so that they are apt to have become confirmed before their presence is recognized.

INSINUATION, n. I^{2}n-si^{2}n-u^2-a′shu^{3}n. Lat., *insinuatio* (from *insinuare*, to insinuate into). Ger., *Einfügung.* The introduction of anything (*e. g.*, an instrument into a winding canal) by a series of oblique or spiral movements. [*a*, 17.]

INSIPID, adj. I^{2}n-si^{2}p′i^{2}d. Lat., *insipidus* (from *in* neg., and *sapidus*, savory). Fr., *insipide.* Ger., *geschmacklos*, *unschmackhaft.* Tasteless, flat, vapid. [*a*, 24.]

INSIPIENS (Lat.), adj. I^{2}n-si^{2}p′i^2-e^{2}nz(ans). Gen., *-ent′is.* From *in* neg., and *sapiens*, wise. Ger., *albern*, *unklug.* Silly, simple. [L, 50 (*a*, 14).]

INSIPIENTIA (Lat.), n. f. I^{2}n-si^{2}p-i^2-e^{2}n′shi^2(ti^2)-a^3. From *in* neg., and *sapientia*, wisdom. Ger., *Albernheit*, *Thorheit.* 1. Silliness ; simplicity. 2. A mild form of insanity. [L, 50 (*a*, 14).]—**I. ingenita.** Imbecility. [*a*, 40.]

INSISTENT, adj. I^{2}n-si^{2}s′t'nt. From *insistere*, to set foot upon. Lit., treading or pressing upon (said of a bird's hallux when its tip only touches the ground). [L, 221.]

INSITIENCY, n. I^{2}n-si^{2}t′i^2-e^{2}n-si^2. From *in* neg., and *sitis*, thirst. Freedom from thirst. [L, 56.]

INSITIO (Lat.), n. f. I^{2}n-si^{2}sh(si^{2}t)′i^2-o. Gen., *-o′nis.* From *inserere*, to ingraft. 1. A putting into place. 2. Grafting or implantation. 3. Inoculation or vaccination. [E ; L, 50 (*a*, 14 ; *a*, 45).]—**I. ciliorum.** An old term for an operation for the restoration of the eyelashes to their normal position, and indirectly of the eyelid to its proper shape. [F.]—**I. dentium.** The implantation of teeth. [L, 50 (*a*, 14).]—**I. variolarum.** Small-pox inoculation. [L, 50 (*a*, 14).]

INSOLATION, n. I^{2}n-sol-a′shu^{3}n. Lat., *insolatio* (from *insolare*, to expose to the sun), *solis ictus* (2d def.). Fr., *i. coup de soleil* (ou *de chaleur*) (2d def.). Ger., *I.*, *Sonnenstich* (2d def.). It., *insolazione*, *colpo di sole* (2d def.). Sp., *insolación.* 1. Exposure of a person or thing to the direct rays of the sun ; a sun-bath. [B, 48.] 2. Properly, that form of heat fever known as sunstroke ; as generally employed, any form of prostration by extreme heat.—**Electric i.** See COUP *de soleil électrique.*—**Local i.** The effect of extreme sun heat upon any localized portion of the body or the nerves contiguous thereto. [*a*, 40.]

INSOLAZIONE (It.), n. I^{2}n-so-la^{3}ts-e-o′na. See INSOLATION.—**I. di primavera.** Lit., spring sunstroke. See PELLAGRA.

INSOLINIC ACID, n. I^{2}n-so^{2}l-i^{2}n′i^{2}k. Fr., *acide insolinique.* Ger., *Insolinsäure.* See TEREPHTHALIC ACID.

INSOLUBILITY, n. I^{2}n-so^{2}l-u^2-bi^{2}l′i^{2}t-i^2. Fr., *insolubilité.* Ger., *Unlöslickheit.* The quality of being insoluble.

INSOLUBLE, adj. I^{2}n-so^{2}l′u^2-b'l. Lat., *insolubilis* (from *in* neg., and *solubilis*, soluble). Fr., *i.* Ger., *unlöslich*, *unauflöslich.* It., *insolubile.* Sp., *i.* Incapable of being dissolved. [L, 41 (*a*, 14).]

INSOMNIA (Lat.), n. f. I^{2}n-so^{2}m′ni^2-a^3. From *in* neg., and *somnus*, sleep. Fr., *insomnie.* Ger., *Insomnie*, *Schlaflosigkeit.* Sleeplessness. [D.]—**Alcoholic i.** An i. due to acute alcoholism. [*a*, 40.]—**Congestive i.** A persistent form of i. due to congestion of the brain. [*a*, 40.]—**Febrile i.** The i. which attends the evolution of the various specific fevers. It may be due to hyperpyrexia, irritation of the eruption, or exhaustion in the later stages. [Pepper (*a*, 40).]—**I. of exhaustion.** I. produced by over-work, debilitating discharges, mental strain, parturition, or any cause capable of causing mental and physical exhaustion. [Pepper (*a*, 40).]—**Lithæmic i.** I. originating in over-feeding, and consisting in an irritation of the brain through the intervening nervous apparatus. [Pepper (*a*, 40).]

INSOMNIOUS, adj. I^{2}n-so^{2}m'ni^2-u^{3}s. From *in* neg., and *somnus*, sleep. Sleepless.

INSOMNIUM (Lat.), n. n. I^{2}n-so^{2}m'ni^2-u^{3}m(u^{4}m). A dream. [A, 322.]

INSPECTION, n. I^{2}n-spe^{2}k'shu^{3}n. Lat., *inspectio* (from *inspicere*, to look into). Fr., *i.* Ger., *Inspektion, Adspektion, Besichtigung, Besehen.* It., *inspezione, ispezione.* Sp., *inspección.* Ocular examination. [D.]

INSPERGATION, n. I^{2}n-spu^{5}r-ga'shu^{3}n. From *inspergere*, to sprinkle into. The application of a fine powder or spray to a surface, as of the eye, by sprinkling or dusting. [Alt, "Am. Jour. of Ophth.," Nov., 1885; "Am. Jour. of the Med. Sci.," Apr., 1886, p. 630 (α, 29).]

INSPIRATEUR (Fr.), adj. A^{2}n^2-spe-ra^3-tu^{5}r. See INSPIRATORY.

INSPIRATION, n. I^{2}n-spi^2-ra'shu^{3}n. Gr., εἰσπνοή. Lat., *inspiratio* (from *inspirare*, to blow into). Fr., *i.* Ger., *Einathmung, I.* It., *inspirazione.* Sp., *inspiración.* 1. The act of drawing in the breath. [J.] 2. The act or property of plant-organs, especially leaves, of absorbing gases from the atmosphere. [B, 1 (α, 24).]—**Crowing i.** The peculiar, noisy i. made in laryngismus stridulus or spasmodic croup. [D, 63; L. Elsberg, "N. Y. Med. Jour.," Dec. 20, 1884, p. 685 (D).]—**Deferred i.** I. which is not audible until shortly after the beginning of the inspiratory act. During this interval the air-cells have become distended, and at its close the inspiratory murmur is heard as a short wheeze; observed in emphysema, bronchitis, etc. [D, 1.]—**Difficult i., Forced i., Forcible i.** Fr., *i. forcée.* Ger., *forcirte I.* Syn.: *labored i.* I. (2d def.) in which the ordinary muscles of i. are assisted by the so-called inspiratory auxiliaries (*i. e.*, the muscles attached to the chest which by their contraction can increase the thoracic cavity directly or indirectly by furnishing fixed support whereby other muscles may act more advantageously). If the movements become excessively labored, there is brought into co-ordinate action every muscle in the body which can either directly or indirectly increase the cavity of the thorax. [J, 18, 40, 53, 198.] See MUSCLES *of i.*—**Full i.** Fr., *i. profonde.* Ger., *tiefe Athmung.* Syn.: *full breath.* I. in which the lungs are filled as completely as possible (voluntarily, as in determining the amount of complemental air, or involuntarily, as in cardiac dyspnœa). [J.]—**I. of blood.** The increased flow of venous blood into the heart, due to and during the act of i. [K.]—**I. profonde** (Fr.). See *Full i.*—**I'sdruck** (Ger.). See PRESSURE *of i.*—**I'swelle** (Ger.). The wave-like movement of i. [J.]—**Jerking i.** Ger., *saccadirte I.* An inspiration the murmur of which, instead of being regular and continuous, is interrupted and wavy. It is associated with incipient pleurisy, pleurodynia, and asthma. [α, 40.]—**Labored i.** See *Forced i.*—**Non-expansive i.** I. in which the expansile movement of the chest is deficient or altogether absent, owing to emphysema, pleuritic adhesions, or obstruction to the entrance of air into the lung. [α, 40.]—**Saccadirte I.** (Ger.). See *Jerking i.*—**Unfinished i.** I. prematurely and abruptly stopped; one of the disorders of the respiratory rhythm. [D.]

INSPIRATORY, adj. I^{2}n'spi^{2}r-a^{2}t-o-ri^2. Lat., *inspirationi inserviens.* Fr., *inspirateur.* Ger., *inspiratorisch.* Pertaining to, associated with, or subserving inspiration. [J.]

INSPISSANS (Lat.), adj. I^{2}n-spi^{2}s'sa^{2}nz(sa^{3}ns). From *inspissare*, to thicken. Fr., *inspissant, épaississant.* Ger., *verdickend, eindickend.* Thickening. The *inspissantia* (Ger., *verdickende Mittel*) are agents that thicken the blood or other liquids. [A, 322.]

INSPISSATED, adj. I^{2}n'spi^{2}s-at-e^{2}d. Lat., *inspissatus.* Fr., *inspissé, épaissi.* Ger., *verdickt.* Made thicker; partially evaporated or dehydrated. [α, 17.]

INSPISSATION, n. I^{2}n-spi^{2}s-sa'shu^{3}n. Lat., *inspissatio* (from *inspissare*, to thicken). Fr., *i., épaississement.* Ger., *Verdickung.* The act or process of becoming or of making thicker in consistence. [α, 17.]

INSPISSATUS (Lat.), adj. I^{2}n-spi^{2}s-sat(sa^{3}t)'u^{3}s(u^{4}s). See INSPISSATED.

INSTABILIS (Lat.), adj. I^{2}n-sta(sta^3)'bi^{2}l-i^{2}s. From *in* neg., and *stabilis*, that stands firm. Fr., *instable.* Ger., *unbeständig.* See UNSTABLE.

INSTAMINATE, adj. I^{2}n-sta^{2}m'i^{2}n-at. Lat., *instaminatus* (from *in* neg., and *stamen* [*q. v.*]). Fr., *instaminé.* Destitute of stamens. [B, 1 (α, 24); α, 45.]

INSTAURATION, n. I^{2}n-sta^4-ra'shu^{3}n. Lat., *instauratio* (from *instaurare*, to establish). Fr., *i.* The establishment of a function (*e. g.*, menstruation). [A, 385.]

INSTEP, n. I^{2}n'ste^{2}p. Fr., *cou-de-pied.* Ger., *Fussbiege.* It., *collo del piede.* Sp., *empeine, garganta.* The convexity of the upper side of the foot near its junction with the leg. [C.]

INSTILLATION, n. I^{2}n-sti^{2}l-a'shu^{3}n. Lat., *instillatio* (from *instillare*, to drop in). Fr., *i.* Ger., *Eintröpfeln.* The act of pouring in a liquid drop by drop. [B, 88 (α, 39).]

INSTINCT, n. I^{2}n'sti^{2}n^{2}kt. Lat., *instinctus* (from *instinguere*, to instigate). Fr., *i.* Ger., *Naturtrieb.* A natural propensity independent of reasoning; the natural faculty, as seen in the lower animals, of doing the right thing without knowing why. [L, 343.]

INSTINCTIVE, adj. I^{2}n-sti^{2}n^{2}k'ti^{2}v. Fr., *instinctif.* Determined by instinct. [α, 17.]

INSTIPULATE, adj. I^{2}n-sti^{2}p'u^2-lat. Lat., *instipulatus.* Fr., *instipulé.* Not stipulate. [B, 1 (α, 24).]

INSTITA (Lat.), n. f. I^{2}n'sti^2-ta^3. From *insistere*, to step, tread upon. Lit., the flounce or border of a Roman lady's tunic; hence, the portion stepped upon; a bandage. [A, 312 (α, 21); α, 45.]

INSTITUTES (or **INSTITUTIONS**) **OF MEDICINE**, n. pl. I^{2}n'sti^2-tu^{2}tz, i^{2}n-sti^2-tu^2'shu^{3}nz. From *instituere*, to put into place. A collective term sometimes used to denote the elementary principles of physiology, general pathology, therapeutics, and hygiene. [A, 2.]

INSTRUMENT, n. I^{2}n'stru^2-m'nt. Gr., ὄργανον. Lat., *instrumentum* (from *instruere*, to build). Fr., *i., outil.* Ger., *I., Werkzeug.* It., *instrumento, utensile.* Sp., *instrumento.* 1. A tool, an implement. 2. An agent, an organ. [E.]—**Accouchiri'** (Ger.). An obstetrical i.—**Allingham's i. for fistula.** An i. composed of a steel director and a strong pair of scissors the back of one blade of which is ground to fit into the tunneled groove of the director, so that the blade can not slip out of the groove as it is forced through the fistula tract. [α, 40.]—**Canaliculus i.** An i. devised by Greenslade consisting of a fine director, in the groove of which is a sliding knife manipulated by the action of the thumb upon a small button in the handle of the i. It is used for widening the lacrymal canal. [α, 40.]—**Davidson's spray i.** An atomizer consisting of a bottle with a concavity on one side, into which the compression bulb fits, and a spray tube having tips directing the spray in various directions. [α, 40.]—**Detschy's i.** An i. consisting of an intra-uterine stem attached to a double wing-shaped pessary, and manipulated by a screw, so that the womb can be flexed into any desired position. [α, 40.]—**Earle's i. for the extraction of cataract.** Fr., *i. d'extraction.* Ger., *I. zur Staarausziehung.* A small lancet, not now used, moving backward and forward between the blades of a forceps. The i. was introduced through the sclerotic and chorioid; the lancet was withdrawn by means of a spring in the handle, and the blades of the forceps were then opened and the cataract seized and brought away. [F.]—**Electromassage i.** An i. devised by Butler, composed of a magnet and three cylinders, revolved by multiplying cog-wheels and developing magneto-electricity. It is said to possess the advantages of electricity and massage combined. [α, 40.]—**Erweiterungsi'** (Ger.). See DILATATORIUM.—**Geburtshülfliches I.** (Ger.). An obstetrical i.—**Goetz's suture i.** An i. composed of a curved needle fitted into a hollow handle, in which is a bobbin holding the suture silk and dealing it out as needed, thus obviating the necessity of frequently threading the needle. [α, 40.]—**Grant's i. for œdema of the glottis.** A small cap with a sharp hook attached fitted on to the end of the finger like a thimble, and used for scarifying. [E.]—**Gross's foreign-body i. for the ear.** A small steel shaft with an ear-scoop on one end and a fine bent point on the other for removing foreign bodies from the ear. [α, 40.]—**Hoff's automatic suture i.** An i. consisting of a long shaft with flared end and internal sliding bar, manipulated by a finger-ring. It is designed to introduce serre-fines instead of sutures into wounds. [α, 40.]—**I'besteck** (Ger.). See *Operating* CASE.—**Sim's intra-uterine-stem i.** A Hodge pessary, with an intra-uterine stem movable upon an axis, thus facilitating its introduction and allowing motion to the uterus. [α, 40.]—**Squarey's i.** A straight self-retaining stem pessary, without any vaginal support. It is held in place by the automatic dilatation of its intra-uterine extremity. [α, 40.]

INSTRUMENTARIUM (Lat.), n. n. I^{2}n-stru^2(stru)-me^{2}nt-a(a^3)'ri^2-u^{3}m(u^{4}m). From *instrumentum*, an instrument. A collection or supply of instruments.

INSTRUMENTUM (Lat.), n. n. I^{2}n-stru^2(stru)-me^{2}nt'u^{3}m(u^{4}m). See INSTRUMENT.—**I. chirurgicum.** A surgical instrument.—**I. digestionis.** Ger., *Verdauungsorgan.* An organ of digestion. [L, 50 (α, 14).]—**I. instrumentorum.** The hand. [L, 50 (α, 14).]

INSUCCATION, n. I^{2}n-su^{3}k-ka'shu^{3}n. From *in*, into, and *succus*, juice. Ger., *Insukkation.* A method pursued in making an extract from very hard bodies, like wood or hard fruit-rinds, consisting in steeping them for 2 or 3 days in cold water before extracting them with hot water. [B, 49.]

INSUCCATUS (Lat.), adj. I^{2}n-su^{3}k(su^{4}k)-kat(ka^{3}t)'u^{3}s(u^{4}s). From *insucare*, to soak in. Dissolved in or treated with vegetable juices (see ALOE *insuccata*). [B, 57.]

INSUFFICIENCY, n. I^{2}n-su^{2}f-fi^{2}sh'e^{2}n-si^2. Lat., *insufficientia* (from *in*, neg., and *sufficientia*, a sufficiency). Fr., *insuffisance.* Ger., *Insufficienz, Unzulänglichkeit.* The state of being insufficient for its purpose.—**Absolute i.** I. due to thickening, induration, or other change in the cardiac valves themselves. [α, 40.]—**Active i. of a muscle.** A muscular contraction only equal to that usually observed at the beginning of shortening, when the origins and insertions of certain muscles in the neighborhood of joints are brought too near together, the muscles being thus made to contract at a mechanical disadvantage. [Landois (K).]—**Aortic i.** Fr., *insuffisance aortique.* Ger., *Aortenklappeninsufficienz.* An imperfect closure of the aortic orifice by the aortic valves. It may be due to the rupture of a valve, or to endocarditis, especially to sclerotic endocarditis. [D, 45.] See also *Corrigan's* DISEASE.—**Functional mitral i.** Fr., *insuffisance mitrale anorganique* (ou *fonctionnelle*). Ger., *anorganische Mitralinsufficienz.* Mitral i. due to deficient muscular contractility in the heart itself. [Heitler (α, 40).]—**I. of the ocular muscles.** Fr., *insuffisance des muscles oculaires.* Ger., *Insufficienz der Augenmuskeln.* An absence of dynamical equilibrium of the ocular muscles, due either to an inherent weakness of one set of muscles or to an elastic preponderance of another set of muscles. [F.]—**Mitral i.** Fr., *insuffisance mitrale* (ou *de la valvule mitrale*). That pathological condition in which the mitral valve inefficiently closes its orifice with the rhythmic action of the heart. [D.]—**Muscular i.** Fr., *insuffisance musculaire.* Ger., *Muscularinsufficienz.* 1. A condition in which a muscle (especially one of the ocular muscles) is relatively weak compared with its antagonist, so that an effort on the part of this muscle is required in order to maintain equilibrium. [B.] Cf. *I. of the ocular muscles.* 2. See *Active* and *Passive i. of a muscle.*—**Passive i. of a muscle.** The disabled condition of a muscle in the neighborhood of a joint when so stretched by the action of other muscles that it can not contract perfectly. [Landois (K).]

INSUFFICIENZ (Ger.), n. I^{2}n-suf-fe-tse-e^{2}ntz'. See INSUFFICIENCY.—**Aortenklappeni'.** See *Aortic* INSUFFICIENCY.—**I. der Augenmuskeln.** See INSUFFICIENCY *of the ocular muscles.*—**Musculari'.** See *Muscular* INSUFFICIENCY.

INSUFFISANCE (Fr.), n. A^{2}n^2-su^{6}f-fe-sa^{3}n^{2}s. See INSUFFICIENCY.—**I. de la valvule mitrale.** See *Mitral* INSUFFICIENCY.—**I. mitrale anorganique** (ou **fonctionnelle**). See *Functional mitral* INSUFFICIENCY.—**I. rénale.** See *Renal* INADEQUACY.

INSUFFLATION, n. I^{2}n-su^{3}f-fla'shu^{3}n. Lat., *insufflatio* (from *insufflare*, to blow into or upon). Fr., *i.* Ger., *I.*, *Einblasung.* It., *insufflazione.* Sp., *sopio.* The act of blowing a gas, a vapor, air (often charged with a finely divided medicament), or a powder into a cavity of the body (either natural or pathological). [E; *a*, 17.]—**Pulmonary i.** Fr., *i. pulmonaire.* 1. The act of injecting the lung with air by blowing it into the mouth or nose, or (more recently) by the use of a bellows inserted into an opening in the trachea, the air being artificially warmed and charged with the proper moisture; used in the asphyxia of new-born children, and in that due to opium, coal-gas, submersion, etc. 2. The i. into the trachea and bronchi, and even the ultimate air-passages, of air (sometimes compressed or rarefied) charged with medicinal vapors or impalpable powders. [B, 88 (*a*, 39); *a*, 17.]—**Relative i.** I. due to cardiac dilatation. [*a*, 40.]

INSUFFLATOR (Lat.), n. m. I^{2}n-su^{3}f(su^{4}f)-fla(fla^3)'to^{2}r; in Eng., i^{2}n'su^{3}f-flat-o^{2}r. Gen., *or'is.* Fr., *insufflateur.* Ger., *Insufflateur.* It., *insofflatore.* Sp., *insuflador.* An instrument for performing insufflation.—**Clay's i.** An i. resembling Elsberg's. [E.]—**Duke's vaginal i.** An i. composed of a compression ball connected by a long, narrow tube with an elliptical box with a movable lid for holding powder. By pressure upon the ball the lid is raised and the powder insufflated. ["Aerztlichen Polytec.," Sept., 1890, p. 190 (*a*, 40).]—**Elsberg's i.** A delicate cannula with a small soft-rubber bulb attached, for holding and forcing out the powder. [E.]—**Mallez's powder i.** A tube with a rubber bulb at the end, for blowing powders into the urethra. [E.]—**Politzer's i.** Fr., *insufflateur de Politzer.* Ger., *Politzer'scher Apparat zum Einblasen.* An i. for blowing powder into the ear, made of metal or hard rubber, and consisting of a powder-chamber fastened on a tube, and communicating with the cavity of the latter by suitable openings. By a half-turn of the tube the openings are closed, and the powder which has penetrated into the tube is blown into the meatus by an air-balloon fixed at the outer end. [F, 32.]—**Rauchfuss's i.** See *Rauchfuss's* INJECTOR.—**Tube i.** An i. consisting of a long vulcanite tube, shaped for introduction into the larynx, in which there is a cavity covered by a movable shield for holding the powder, and just back of this a valve to prevent the powder being blown backward by air from the larynx. Attached to this vulcanite tube is a flexible tube with a mouth-piece attached, into which the operator blows to insufflate the powder. [*a*, 40.]

INSULA (Lat.), n. f. I^{2}n'su^2(su^4)-la^2. Gr., *νῆσος.* Fr., *i.*, *i. de Reil* (1st def.). Ger., *Insel*, *Insellappen* (1st def.), *Stammlappen* (1st def.), *versteckter Lappen* (1st def.), *Zwischenlappen* (1st def.). An island or inlet. 1. A group of convolutions, situated within the beginning of the fissure of Sylvius. It covers the lenticular nucleus, and is itself concealed by the operculum. 2. A lobule of the liver. See ACINUS (1st def.). [I, 15 (K); J.]—**I. cerebri, I. de Reil** (Fr.), **I. fissuræ Sylvii.** See *I.* (1st def.).—**Insulæ griseæ cornu Ammonis.** Patches of gray matter in the cornu Ammonis. [L, 7 (*a*, 29).]—**I. hepatica, I. hepatis.** See *I.* (2d def.).—**Insulæ Peyeri.** See *Peyer's* GLANDS.—**I. Reilii.** See *I.* (1st def.).—**I. sanguinis.** An old term for a blood-clot. [K.]

INSULAR, adj. I^{2}n'su^2-la^{3}r. From *insula*, an island. Fr., *insulaire.* Ger., *insularisch.* Pertaining to or of the character of an insula.

INSULATED, adj. I^{2}n'su^{2}l-at-e^{2}d. Lat., *insulatus* (from *insula*, an island). Fr., *isolé.* Ger., *abgesondert*, *isolirt.* 1. See ISOLATED. 2. In electro-physics, protected by a non-conductor. 3. Having a part distinct and free from other parts (said of the wings of certain insects). [L, 180 (*a*, 39).]

INSULATING, adj. I^{2}n'su^{2}l-at-i^{2}n^2. Serving to insulate.

INSULATION, n. I^{2}n-su^{2}l-a'shu^{3}n. Lat., *insulatio.* Fr., *i.* Ger., *Absondern*, *Isolirung.* 1. The act or process of insulating. 2. The state of being insulated.

INSULATOR (Lat.), n. n. I^{2}n-su^{2}l(su^{4}l)-a(a^3)'to^{2}r; in Eng., i^{2}n'su^{2}l-at-o^{2}r. Gen., *-tor'is.* Fr., *insulateur.* Ger., *Isolator.* That by means of which insulation is accomplished.

INSULTUS (Lat.), n. m. I^{2}n-su^{3}lt(su^{4}lt)'u^{3}s(u^{4}s). Gen., *-sult'us.* From *insultare*, to spring upon a thing. An attack, onset, or paroxysm, as of a disease.—**I. apoplecticus.** An attack of apoplexy.—**I. eclampticus.** A convulsive attack.—**I. epilepticus.** An attack of epilepsy. [D.]—**I. hystericus.** An hysterical paroxysm.—**I. maniacalis.** An attack of mania.

INSUPPURABLE, adj. I^{2}n-su^{3}p'u^{2}r-a^2-b'l. Lat., *insuppurabilis* (from *in* neg., and *suppurare*, to suppurate). See ANECPYETOUS.

INSUSCEPTIBILITY, n. I^{2}n-su^{3}s-se^{2}pt-i^2-bi^{2}l'i^{2}t-i^2. Fr., *insusceptibilité.* Ger., *Unempfänglichkeit.* The state of being insusceptible.

INSUSCEPTIBLE, adj. I^{2}n-su^{3}s-se^{2}pt'i^2-b'l. Lat., *insusceptibilis.* Fr., *i.* Ger., *unempfänglich.* Not susceptible, incapable of being affected.

INSYMMETRIC, adj. I^{2}n-si^{2}m-me^{2}t'ri^{2}k. From *in* neg., *σύν*, with, and *μέτρον*, a measure. Fr., *insymétrique.* Ger., *unsymmetrisch.* See ASYMMETRIC.

INTACT, adj. I^{2}n-ta^{2}kt'. Lat., *intactus* (from *in* neg., and *tangere*, to touch). Fr., *i.* Ger., *unangerührt* (1st def.), *farbelos* (2d def.), *ungefärbt* (2d def.). 1. Uninjured, entire. 2. In botany, unstained, not sphacelate (*q. v.*). [B, 123 (*a*, 24).]

INTACTILE, INTANGIBLE, adj's. I^{2}n-ta^{2}k'ti^{2}l, -ta^{3}n'ji^2-b'l. From *in* neg., and *tangere*, to touch. Fr., *i.* Ger., *unfühlbar.* Incapable of being felt by the sense of touch. [L, 41 (*a*, 14).]

INTEGER (Lat.), adj. I^{2}n'te^2-ju^{5}r(ge^{2}r). From *in* neg., and *tangere*, to touch. 1. See INTACT (1st def.) and ENTIRE. 2. Branching so that the axis may be traced to the top. [B, 1, 123 (*a*, 24).] Cf. DELIQUESCENT (2d def.).

INTEGERRIMUS (Lat.), adj. I^{2}n-te^2-je^{2}r(ge^{2}r)'ri^{2}m-u^{3}s(u^{4}s). Superl. of *integer.* Ger., *ganzrandig.* Quite entire, having the margin filled out to an even line (said of a leaf). [B, 123 (*a*, 24).]

INTEGRATION, n. I^{2}n-te^{2}g-ra'shu^{3}n. Lat., *integratio* (from *integrare*, to make whole). Fr., *intégration.* A fusion of parts previously separate in the embryo.

INTEGRIFOLIATE, INTEGRIFOLIOUS, adj's. I^{2}n-te^{2}g-ri^2-fol'i^2-at, -u^{3}s. Lat., *integrifolius* (from *integer*, whole, and *folium*, a leaf). Having entire leaves. [B.]

INTEGRIMAL, adj. I^{2}n-te^{2}g'ri^2-m'l. From *integer*, whole. In botany, nearly or quite entire; having no notches. [L, 116 (*a*, 43).]

INTEGRITY, n. I^{2}n-te^{2}g'ri^2-ti^2. Gr., *ὁλότης* (from *ὅλος*, whole). Lat., *integritas* (from *integer*, whole). Fr., *intégrité.* Ger., *Unverletztheit*, *Vollständigkeit.* The state of being intact (1st def.).

INTEGROSTOMOUS, adj. I^{2}n-te^{2}g-ro^{2}st'o^{2}m-u^{3}s. From *integer*, whole, and *στόμα*, the mouth. Fr., *intégrostome.* Of bivalves, having the opening entire. [L, 41 (*a*, 14).]

INTEGUMENT, n. I^{2}n-te^{2}g'u^2-m'nt. Lat., *integumentum* (from *in*, in, and *tegere*, to cover). Fr., *enveloppe*, *tégument.* Ger., *Decke*, *Hülle*, *Deckhaut.* 1. A covering; an envelope. 2. The covering investing the body or any part of it, especially the skin. [G.]—**Common i.** Lat., *integumentum commune.* The skin. [G.]—**Floral i's.** See *Floral* ENVELOPES.—**I's of the ovule.** See PRIMINE and SECUNDINE.—**I's of the seed.** See TESTA and TEGMEN.

INTEGUMENTAL, INTEGUMENTARY, adj's. I^{2}n-te^{2}g-u^2-me^{2}n't'l, -tari^2. From *integumentum*, a cover. Belonging to or of the nature of an integument.

INTEGUMENTATION, n. I^{2}n-te^{2}g-u^2-me^{2}nt-a'shu^{3}n. From *integumentum*, a cover. The state of having integuments, or the integuments themselves considered collectively. [*a*, 35.]

INTEGUMENTUM (Lat.), n. n. I^{2}n-te^{2}g-u^2(u^4)-me^{2}nt'u^{3}m-(u^{4}m). See INTEGUMENT.—**I. commune.** See *Common* INTEGUMENT.—**Integumenta fœtus.** See *Fœtal* ENVELOPES (2d def.).—**I. gelatinosum.** In many *Algæ*, the gelatinous covering of the filaments of the thallus. [B, 123 (*a*, 24).]—**I. ventriculorum.** See VELUM *interpositum.*

INTELLECT, n. I^{2}n'te^{2}l-e^{2}kt. Lat., *intellectus* (from *intellegere*, to see into, perceive, understand). Fr., *i.* Ger., *Verstand.* The understanding and reasoning power of man. [L, 41, 50 (*a*, 14).]

INTELLECTION, n. I^{2}n-te^{2}l-e^{2}k'shu^{3}n. Lat., *intellectio.* The action of the intellect.

INTELLECTUAL, adj. I^{2}n-te^{2}l-e^{2}k'tu^2-a^{2}l. Lat., *intellectualis.* Fr., *intellectuel.* Ger., *intellectuell.* 1. Pertaining to the intellect. 2. Possessed of or expressive of intelligence.

INTEMPERANCE, n. I^{2}n-te^{2}m'pe^{2}r-a^{2}ns. Lat., *intemperantia* (from *in* neg., and *temperare*, to regulate, moderate, restrain). Fr., *intempérance.* Ger., *Unmässigkeit.* Excess; immoderate indulgence of the appetites, especially the immoderate use of alcoholic drinks. [L, 30, 41, 50 (*a*, 14).]

INTEMPERANTIA (Lat.), n. f. I^{2}n-te^{2}m-pe^{2}r-a^{2}n(a^{3}n)'shi^2-(ti^2)-a^3. See INTEMPERANCE.—**I. edendi.** See ADEPHAGIA.

INTEMPERIES (Lat.), n. f. I^{2}n-te^{2}m-pe(pe^2)'ri^2-ez(as). Gen., *-perie'i.* From *in* neg., and *temperare*, to moderate, regulate). Fr., *intemperie.* 1. Of the weather, inclemency. 2. A dyscrasia. [L, 41, 49, 50 (*a*, 14).]

INTENCIONES DE LÓPEZ [Mex. Ph.] (Sp.), n. pl. I^{2}n-te^{2}n-thi^2-on-as da lo'path^2. See *Pomatum cum* OXIDO *hydrargyrico ex López.*

INTENSIFICATION, n. I^{2}n-te^{2}ns-i^2-fi^2-ka'shu^{3}n. From *intensus*, intense, and *facere*, to make. 1. A rendering intense. 2. The state of being rendered intense.

INTENSITY, n. I^{2}n-te^{2}ns'i^{2}t-i^2. From *intendere*, to stretch out. Fr., *intensité.* Ger., *Angespanntheit*, *Stärke*, *Verstärkung.* It., *intensità.* Sp., *intensidad.* The state of being intense. [*a*, 45.]

INTENSIVE, adj. I^{2}n-te^{2}n'si^{2}v. From *intendere*, to stretch out or extend. Fr., *intensif.* Ger., *intensiv.* 1. Causing or accompanied by intensification. 2. In Pasteur's prophylactic treatment of rabies, characterized by frequent inoculations of more and more virulent dilutions of the spinal cords of rabbits to which rabies has been communicated artificially. [A. 523.]

INTENTIO (Lat.), n. f. I^{2}n-te^{2}n'shi^2(ti^2)-o. Gen., *-on'is.* See INTENTION.—**Prima i.** See *First* INTENTION.—**Secunda i.** See *Second* INTENTION.

INTENTION, n. I^{2}n-te^{2}n'shu^{3}n. Lat., *intentio* (from *intendere*, to stretch forth). Fr., *i.* Ger., *I.* The process by which the lips of a wound unite in the healing of the wound.—**First i.** Lat., *prima intentio.* Fr., *première i.* Ger., *Heilung per primam intentionem.* An immediate union in which the surfaces of the wound become glued together by an albuminous fluid and the wound heals without further redness or swelling. [A, 326 (*a*, 21).]—**Second i.** Lat., *secunda intentio.* Fr., *seconde i.* Ger., *Heilung per secundam intentionem.* Union by the adhesion of opposed granulating surfaces.—**Third i.** Of the older writers, the union of wounds by the growing together of the granulations on their sides. *Union of granulations* is the more recent term. [Agnew (*a*, 40).]

INTERACCESSORII (Lat.), n. m. pl. I^{2}n-tu^{5}r(te^{2}r)-a^{2}k(a^{3}k)-se^{2}s(ke^{2}s)-so'ri^2-i(e). From *inter*, between, and *accessorius* (*q. v.*).

Short muscles which pass from the accessory process of one lumbar vertebra to the mammillary process of the next. [L, 142, 332 (α, 29).]

INTERACINOUS, adj. I^{2}n-tu^{5}r-a^{2}s'i^{2}n-u^{3}s. From *inter*, between, and ἄκινος, a grape. Fr., *interacineux*. Ger., *interacinös*. Situated between the acini.

INTERAMBULACRA (Lat.), n. n. pl. I^{2}n-tu^{5}r(te^{2}r)-a^{2}m(a^{3}m)-bu^2(bu^4)-la^{2}k(la^{3}k)'ra^3. From *inter*, between, and *ambulacrum* (*q. v.*). Ger., *Interambulacralfelder*. See *Interambulacral* PLATES.

INTERANEUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-an(a^{3}n)'e^2-u^{3}s(u^{4}s). From *inter*, in the midst. Ger., *innerlich, inwendig*. Internal (said of spores or other body within a plant or plant-organ); as a n., in the pl., *interanea*, of Pliny, the intestines; of Lindenus and Rhodius, the viscera of the abdomen. [B, 123 (α, 24); L, 50 (α, 14).]

INTER-ANNEXIEL (Fr.), adj. A^{2}n^2-te^{2}r-a^{3}n-ne^{2}x-e-e^{2}l. From *inter*, between, and *annectere*, to bind to. Situated between the various extra-embryonic structures of the ovum. [A, 38.]

INTERANTENNARY, adj. I^{2}n-tu^{5}r-a^{2}n-te^{2}n'na-ri^2. Lat., *interantennarius* (from *inter*, between, and *antenna* [*q. v.*]). Situated between the antennæ (said of the interantennary ridge in *Hymenoptera*). [L, 11, 180 (α, 39).]

INTERAPOPHYSEAL, adj. I^{2}n-tu^{5}r-a^{2}p-o-fi^{2}s'e^2-a^{2}l. From *inter*, between, and ἀπόφυσις, an apophysis. Situated between apophyses. [α, 29.]

INTERARTICULAR, adj. I^{2}n-tu^{5}r-a^{3}rt-i^{2}k'u^2-la^{3}r. Lat., *interarticularis* (from *inter*, between, and *articulus*, a joint). Fr., *interarticulaire*. Ger., *zwischen den Gelenken liegend, Zwischengelenk*. Situated between the joints. [L, 41, 44, 50 (α, 14).]

INTERARYTÆNOID, adj. I^{2}n-tu^{5}r-a^{2}r-i^2-ten'oid. Lat., *interarytænoideus* (from *inter*, between, and *arytænoid* [*q. v.*]). Fr., *interaryténoïdien*. Situated between the arytænoid cartilages. [A, 385.]

INTERAURICULAR, adj. I^{2}n-tu^{5}r-a^{4}r-i^{2}k'u^2-la^{3}r. From *inter*, between, and *auricula*, the auricle. Fr., *interauriculaire*. Situated between the external ears or between the auricles of the heart. [A, 385.]

INTERAXILLARY, adj. I^{2}n-tu^{5}r-ax'i^{2}l-la-ri^2. From *inter*, between, and *axilla*, the armpit. Springing from or situated in the upper angle which a leaf forms with the stem. [α, 35.] Cf. EXTRA-AXILLARY.

INTERBRACHIAL, adj. I^{2}n-tu^{5}r-brak'i^2-a^{2}l. Situated between the brachiæ or rays (said of the areas between the rays of a star-fish, especially those of the genus *Ophiolepis*). [A, 359 (α, 39).]

INTER-BRAIN, n. I^{2}n'tu^{5}r-bran. From *inter*, between, and *brain* (*q. v.*). Ger., *Zwischenhirn*. See THALAMENCEPHALON.

INTERCADENCE, n. I^{2}n-tu^{5}r-kad'e^{2}ns. From *inter*, between, and *cadere*, to fall. Fr., *i*. A state of the pulse in which a supernumerary pulsation occurs sometimes between two regular pulsations. [L, 41 (α, 14).]

INTERCADENT, adj. I^{2}n-te^{2}r-kad'e^{2}nt. Fr., *i*. Having the character of intercadence (said of the pulse). [A, 523.]

INTERCALAR, INTERCALARY, INTERCALATED, adj's. I^{2}n-tu^{5}r'ka^{2}l-a^{3}r, -a-ri^2, -at-e^{2}d. Lat., *intercalaris, intercalarius* (from *intercalare*, to insert). Fr., *intercalaire*. Ger., *eingeschaltet, zwischenfallend*. It., *intercalare, intercalario*. Sp., *intercalado*. 1. Inserted among others; in botany, said of the growth of the cell-wall when by the extension of a zone formed by the deposition of new substance a fresh piece of cell-wall is introduced between the old ones. [B, 1, 4, 116 (α, 24).] 2. Intervening between paroxysms of fever; also, as occasionally used, marked by unusually severe fever (said of certain days). [A, 322.] 3. Of a staphyloma, situated between the sclero-corneal margin and the ciliary body. [L, 57 (α, 29).]

INTERCALATION, n. I^{2}n-tu^{5}r-ka^{2}l-a'shu^{3}n. Lat., *intercalatio* (from *intercalare*, to insert). An interposition.

INTERCAPEDO (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-ka^{2}p(ka^{3}p)-e(a)'do. Gen., *-ed'inis*. From *inter*, between, and *capere*, to take. Fr., *intervalle*. Ger., *Lücke*. An interval, interstice. [L, 50 (α, 14).]

INTERCAPILLARY, adj. I^{2}n-tu^{5}r-ka^{2}p'i^{2}l-a-ri^2. From *inter*, between, and *capillaris* (see CAPILLARY). Fr., *intercapillaire*. Situated between the capillaries. [A, 385.]

INTERCAROTIC, INTERCAROTID, adj's. I^{2}n-tu^{5}r-ka^{2}r-o^{2}t'i^{2}k, -i^{2}d. From *inter*, between, and καρωτίδες, the carotid arteries. Fr., *intercarotidien*. Situated between the two primitive carotid arteries or between the external and internal carotid arteries of one side. [A, 385.]

INTERCARTILAGINOUS, adj. I^{2}n-tu^{5}r-ka^{3}rt-i^{2}l-a^{2}j'i^{2}n-u^{3}s. Lat., *intercartilagineus* (from *inter*, between, and *cartilago*, cartilage). Fr., *intercartilagineux*. Ger., *zwischenknorpelig*. Situated between cartilages, especially the arytænoid cartilages. [A, 385.]

INTERCAVERNOUS, adj. I^{2}n-tu^{5}r-ka^{2}v'u^{5}rn-u^{3}s. From *inter*, between, and *caverna*, a cavern. Between caverns (said of a sinus extending from one cavernous sinus to the other). [C.]

INTERCÉDENT (Fr.), adj. A^{2}n^2-te^{2}r-sa-da^{3}n^2. From *inter*, between, and *cedere*, to go. Of the pulse, intermittent. [L, 41 (α, 14).]

INTERCELLULAR, adj. I^{2}n-tu^{5}r-se^{2}l'u^{2}l-a^{3}r. Lat., *intercellularis* (from *inter*, between, and *cellula*, a cell). Fr., *intercellulaire*. Ger., *intercellulär*. 1. Situated between cells, as i. cement, i. spaces. [J.] 2. Of Huxley (1853), see INTRACELLULAR.

INTERCEPTED, adj. I^{2}n-tu^{5}r-se^{2}pt'e^{2}d. Lat., *interceptus* (from *intercipere*, to intercept, hinder, preclude). Fr., *intercepté*. Constricted, narrowed. [B, 123 (α, 24).]

INTERCEPTIO (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-se^{2}p(ke^{2}p)'shi^2(ti^2)-o. Gen., *-on'is*. From *intercipere*, to intercept. 1. See APOLEPSIS. 2. See INTERCAPEDO. 3. In ancient pharmacy, a medicine supposed to interrupt the course of the blood, etc. [L, 50 (α, 14).]—**I. intestinorum.** Ger., *Darmverschlingung*. Intestinal obstruction. [L, 50 (α, 14).]

INTERCERVICALS, n. pl. I^{2}n-tu^{5}r-su^{5}r'vi^2-k'lz. Lat., *intercervicales* (from *inter*, between, and *cervix*, the neck). Fr., *intercervicaux*. See INTERTRANSVERSALES, under INTERTRANSVERSALIS.

INTERCHANGE, n. I^{2}n'tu^{5}r-chanj. Fr., *échange*. Ger., *Austausch*. An exchange. See GAS *i*.

INTERCHONDRAL, adj. I^{2}n-tu^{5}r-ko^{2}nd'r'l. From *inter*, between, and χόνδρος, a cartilage. 1. See INTERCARTILAGINOUS. 2. By the interposition of cartilages, as in the i. articulations of the 6th, 7th, 8th, and 9th ribs. [C.]

INTERCIDENCE, n. I^{2}n-tu^{5}r-sid'e^{2}ns. From *inter*, between, and *cadere*, to fall. See INTERCADENCE.

INTERCIDENT, adj. I^{2}n-tu^{5}r'si^{2}d-e^{2}nt. Lat., *intercidens*. Fr., *i*. Ger., *zwischenfallend*. 1. See INTERCALARY. 2. See INTERCADENT.

INTERCILIUM (Lat.), n. n. I^{2}n-tu^{5}r(te^{2}r)-si^{2}l(ki^{2}l)'i^2-u^{3}m(u^{4}m). From *inter*, between, and *cilium*, an eyebrow. See GLABELLA.

INTERCISIO (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-si(ke)'si^2-o. Gen., *-on'is*. From *inter*, between, and *cædere*, to cut. Gr., διακοπή. Ger., *Wegfallen, Ausbleiben*. Intermittence (of the pulse). [L, 50 (α, 14).]

INTERCISUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-sis(kes)'u^{3}s(u^{4}s). Intermittent. [A, 322.]

INTERCLAVICLE, n. I^{2}n-tu^{5}r-kla^{2}v'i^2-k'l. From *inter*, between, and *clavicula*, the clavicle. A cross- or T-shaped bony plate or membrane bone connecting and supporting the inner ends of the clavicle in many vertebrates, and intimately connected with the sternum. [L, 12, 153 (α, 39).]

INTERCLAVICULAR, adj. I^{2}n-tu^{5}r-kla^{2}v-i^{2}k'u^{2}l-a^{3}r. From *inter*, between, and *clavicula*, a small key. Fr., *interclaviculaire*. Ger., *zwischen den Schlüsselbeinen liegend*. Situated between the clavicles.

INTERCLAVICULARIS (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-kla^2(kla^3)-vi^{2}k(wi^{2}k)-u^{2}l(u^{4}l)-a(a^3)'ri^{2}s. A muscle not often found, formed by the union of the sternoclavicularis of one side with the corresponding muscle on the other, or with the sternal head of the sterno-cleido-mastoid. [L, 332 (α, 29).]—**I. anticus digastricus.** An anomalous muscle described by Dwight as arising from the front of each clavicle by an origin 1½ in. broad, the outer end covered by the clavicular portion of the pectoralis major. Its outer muscular parts were united by a median tendon 2 inches long which crossed the sternoclavicular joints and lay in front of the sternum. ["N. Y. Med. Jour.," Aug. 4, 1888, p. 133 (α, 29).]

INTERCLINOID, adj. I^{2}n-tu^{5}r-kli^{2}n'oid. From *inter*, between, κλινή, a bed, and εἶδος, resemblance. Situated between the clinoid processes. [α, 29.]

INTERCLUSIO (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-klu^2(klu)'si^2-o. Gen., *-on'is*. From *intercludere*, to shut out. Ger., *Absperrung, Verhaltung*. A suppression, disturbance. [L, 50 (α, 14).]—**I. animæ.** A sudden interruption of respiration. [L, 50 (α, 14).]

INTERCOLUMNA (Lat.), n. f. I^{2}n-tu^{5}r-ko^{2}l-u^{3}m(u^{4}m)'na^3. From *inter*, between, and *columna*, a column. See DIAPEGMA.

INTERCOLUMNAR, adj. I^{2}n-tu^{5}r-ko^{2}l-u^{3}m'na^{3}r. From *inter*, between, and *columna*, a column. Fr., *intercolumnaire*. Ger., *intercolumnär*. Situated between columns. [L, 49.] See *I.* FASCIA.

INTERCONDYLAR, INTERCONDYLEAN, INTERCONDYLOID, adj's. I^{2}n-tu^{5}r-ko^{2}n'di^{2}l-a^{3}r, -ko^{2}n-di^{2}l'e^2-a^{2}n, -ko^{2}n'di^{2}l-oid. From *inter*, between, and κόνδυλος, a knuckle. Fr., *intercondylien*. Ger., *intercondylär*. Situated between the condyles of a bone. [A, 385.]

INTERCORONOIDEAL, adj. I^{2}n-tu^{2}r-ko^{2}r-on-oid'e-a^{3}l. From *inter*, between, κορώνη, a crown, and εἶδος, resemblance. Situated between the coronoid processes. [α, 29.]

INTERCOSTAL, adj. I^{2}n-tu^{5}r-ko^{2}s't'l. Lat., *intercostalis* (from *inter*, between, and *costa*, a rib). Fr., *i*. Ger., *i*., *zwischen den Rippen liegend, Zwischenrippen-*. Situated between the ribs; as a n., a nerve, artery, etc., so situated. [C.]—**Aortic i's.** See *Aortic i.* ARTERIES.

INTERCOSTALIS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-ko^{2}st-a(a^3)'li^{2}s. See INTERCOSTAL.—**Intercostales breves.** The intercostal muscles and the intertransversales. [L, 332 (α, 29).]—**I. dextra prima.** The branch of the superior intercostal space on the right side. [α, 29.]—**Intercostales externi.** Muscular fibres with tendinous fibres intermixed which pass obliquely downward and forward from one rib to another. They cover the intercostal spaces from the margin of the levatores costarum nearly to the outer end of the cartilages. In the three or four upper spaces they end at some distance laterally from the ends of the bony ribs, in the middle spaces they touch the cartilages at the lower borders, and in the two lowest intervals they reach forward to the ends of the spaces. [L, 31, 142, 172 (α, 29).]—**Intercostales interni.** Short muscular fibres attached to the inner margins of the ribs and their cartilages from the anterior extremities of the cartilages to a point within the angles of the ribs. The fibres pass downward and backward from one rib to the next below, crossing the fibres of the external intercostals. [L, 31, 142 (α, 29).]—**Intercostales longi.** A generic term embracing the infracostalis, iliocostalis lumborum, iliocostalis dorsi, and scaleni. [L, 332 (α, 29).]

INTERCOSTARII (Lat.), n. m. pl. I^{2}n-tu^{5}r(te^{2}r)-ko^{2}st-a(a^3)'-ri^2-i(e). See INTERTRANSVERSALIS.

INTERCOSTAUX (Fr.), n. pl. A^{2}n^2-te^{2}r-ko^{2}s-to. From *inter*, between, and *costa*, a rib. The intercostal muscles, vessels, or nerves. [B, 45 (*a*, 39).]

INTERCOSTOBRACHIAL, INTERCOSTO-HUMERAL, adj's. I^{2}n-tu^{6}r-ko^{2}st-o-brak′i^2-a^{2}l, -hu^{2}m′e^{2}r-a^{2}l. From *inter*, between, *costa*, a rib, and *βραχίων* or *humerus*, the shoulder. Pertaining to the intercostal spaces and to the arm. [*a*, 29.]

INTERCOTYLEDONARY, adj. I^{2}n-tu^{6}r-ko^{2}t-i^{2}l-e^{2}d′o^{2}n-a-ri^2. From *inter*, between, and *κοτυληδών*, a cotyledon. Intervening between the placental cotyledons.

INTERCOURSE, n. I^{2}n′tu^{6}r-kors. From *intercurrere*, to run between. Fr., *entrecours*. Association, especially of a sexual character.—**Carnal i.** See Copulation.—**Impure i.** Copulation with a person affected with venereal disease.—**Sexual i.** See Copulation.

INTERCRURAL, adj. I^{2}n-tu^{6}r-kru^2′r′l. From *inter*, between, and *crus*, the leg. Fr., *i.* Ger., *i.*, *Zwischenschenkel-*. Situated between the legs or the crura of a structure.

INTERCUNEAL, INTERCUNEIFORM, adj's. I^{2}n-tu^{6}r-ku^2′ne-a^{2}l, -i^2-fo^{2}rm. From *inter*, between, and *cuneus*, a wedge. Fr., *intercunéen*. Situated between the cuneiform bones. [L, 49 (*a*, 14).]

INTERCURRENT, adj. I^{2}n-tu^{6}r-ku^{6}r′e^{2}nt. Gr., *παρεμπίπτων* Lat., *intercurrens* (from *intercurrere*, to run between). Fr., *i.* Ger., *zwischenlaufend*. 1. In botany, running between, intervening (said of the leaves of certain *Jungermannieæ* when, growing in a double row, those on one side of the stem intervene between those of the opposite side). [B, 123 (*a*, 24).] 2. Of diseases, attacking the patient during the course of another disease. [D, 1.]

INTERCUS (Lat.), adj. I^{2}n-tu^{6}r(te^{2}r)′ku^{3}s(ku^{4}s). Gen., *-ter′-cutis*. See Subcutaneous; as a n., see Anasarca.

INTERCUTANEOUS, adj. I^{2}n-tu^{5}r-ku^2-ta′ne-u^{3}s. Lat., *intercus* (from *inter*, between, and *cutis*, the skin). See Subcutaneous.

INTERDENTAL, adj. I^{2}n-tu^{6}r-de^{2}n′t′l. From *inter*, between, and *dens*, a tooth. Situated between the teeth.

INTERDENTIUM (Lat.), n. n. I^{2}n-tu^{6}r(te^{2}r)-de^{2}n′shi^2(ti^2)′-u^{3}m(u^{4}m). From *inter*, between, and *dens*, a tooth. An interval between teeth of the same order. [L, 84.]

INTERDICTION, n. I^{2}n-tu^{6}r-di^{2}k′shu^{3}n. Lat., *interdictio* (from *inter*, between, and *dicere*, to speak). Fr., *i.* Ger., *Interdict*. A judicial decree depriving an insane person of the control of his own or others' affairs, wholly or in part. [A, 523.]

INTERDIFFUSE, v. intr. I^{2}n-tu^{6}r-di^{2}f-fu^{2}z′. From *inter*, between, and *diffundere*, to pour out. Of two neighboring bodies, to pass into one another's substance, so that all parts of one body shall be in contact with some part of the other. [B.]

INTERDIFFUSION, n. I^{2}n-tu^{6}r-di^{2}f-fu^{2}z′yu^{3}n. The process of interdiffusing. [B.]

INTERDIGITAL, adj. I^{2}n-tu^{6}r-di^{2}j′i^2-t′l. From *inter*, between, and *digitus*, a digit. Fr., *i.* Ger., *i.*, *Zwischenfinger-*. Between the digits. [L, 30, 41, 44, 49 (*a*, 14).]

INTERDIGITATE, v. intr. I^{2}n-tu^{6}r-di^{2}j′i^{2}t-at. Of two adjacent structures, to connect with each other by alternating tongue-like prolongations and corresponding recesses, after the manner of the fingers of the two hands when those of each are received into the spaces between those of the other.

INTERDIGITATION, n. I^{2}n-tu^{6}r-di^{2}j-i^{2}t-a′shu^{3}n. The process of interdigitating or the state of being interdigitated.

INTERDIGITIUM (Lat.), n. n. I^{2}n-tu^{6}r(te^{2}r)-di^{2}j(di^{2}g)-i^{2}sh-(i^{2}t)′i^2-u^{3}m(u^{4}m). A corn between the toes. [L, 84.]

INTERDILATATUS (Lat.), adj. I^{2}n-tu^{6}r(te^{2}r)-di(de)-la^{2}t-(la^{3}t)-a(a^3)′tu^{3}s(tu^{4}s). From *inter*, between, and *dilatare*, to dilate. Fr., *interdilaté*. Dilated between (said of the intermediate bracts in an involucre of several rows when they are larger than the others). [B, 1 (*a*, 24).]

INTERÉPINEUX (Fr.), adj. A^{2}n^2-te^{2}r-a-pe-nu^6. From *inter*, between, and *spina*, a spine. Interspinal; as a n., the small muscles arranged in pairs between the spinous processes of two neighboring vertebræ. [L, 41, 49, 87 (*a*, 39).]

INTERERUPTIVE, adj. I^{2}n-tu^{6}r-e-ru^{3}p′ti^{2}v. From *inter*, between, *ex*, out, and *rumpere*, to break. Between two developments or outbreaks of eruption. [D.]

INTERFASCICULAR, adj. I^{2}n-tu^{6}r-fa^{2}s-i^{2}k′u^2-la^{3}r. From *inter*, between, and *fasciculus* (*q. v.*). Fr., *interfasciculaire*. Ger., *i.* Situated between the fasciculi of tissue. [J.]

INTERFEMINIUM (Lat.), n. n. I^{2}n-tu^{6}r(te^{2}r)-fe^{2}m-i^{2}n′i^2-u^{2}m-(u^{4}m). From *inter*, between, and *femen* (= *femur*), the thigh. An old name for that which lies between the thighs (the perinæum, the vulva, or the vagina). [A, 322.]

INTERFEMORAL, adj. I^{2}n-tu^{6}r-fe^{2}m′o-r′l. From *inter*, between, and *femur*, the thigh. Situated between the thighs. [L, 341 (*a*, 27).]

INTERFERENCE, n. I^{2}n-tu^{6}r-fer′e^{2}ns. From *inter*, between, and *ferre*, to bear. Fr., *interférence*. Ger., *Interferenz, gegenseitige Einwirkung*. 1. A clashing; in horses, the habit of bringing the feet into contact while running or trotting. 2. Intervention (as by art in the progress of a disease or injury).—**Nervous i.** Fr., *interférence nerveuse*. Of C. Bernard, inhibitory nervous action. [*a*, 18.]

INTERFIBRILLAR, adj. I^{2}n-tu^{6}r-fi′bri^{2}l-a^{3}r. From *inter*, between, and *fibra*, a fibre. Fr., *interfibrillaire*. Ger., *interfibrillär*. Pertaining to the substance situated between fibrils or fibrillæ (*e. g.*, the ground substance or the achromatin of cells). [J.]

INTERFILAR (Ger.), adj. I^{2}n-tu^{6}r-fel-a^{3}r′. From *inter*, between, and *filum*, a thread. Situated between the filaments of a network (see *I*′masse and Paraplasm). [J.]

INTERFINIUM (Lat.), n. n. I^{2}n-tu^{5}r(te^{2}r)-fi^{2}n′i^2-u^{3}m(u^{4}m). From *inter*, between, and *finis*, a limit. See Sæptum.—**I. narium.** See Sæptum *narium*.

INTERFŒMINIUM (Lat.), n. n. I^{2}n-tu^{5}r(te^{2}r)-fe^{2}m(fo^2-e^{2}m)-i^{2}n′i^2-u^{3}m(u^{4}m). See Interfeminium.

INTERFOLIACEOUS, INTERFOLIAR, adj's. I^{2}n-tu^{6}r-fol-i^2-a′shu^{3}s, -fol′i^2-a^{3}r. Lat., *interfoliaceus* (from *inter*, between, and *folium*, a leaf). Fr., *interfoliacé*, *interfoliaire*. Ger., *zwischenblattständig*. Situated between the leaves of a pair (said of stipules). [B, 1, 77, 123 (*a*, 24).]

INTERFOLLICULAR, adj. I^{2}n-tu^{6}r-fo^{2}l-i^{2}k′u^2-la^{3}r. From *inter*, between, and *folliculus*, a follicle. Fr., *interfolliculaire*. Situated between follicles. [A, 385.]

INTERFRONTALIS (Lat.), adj. I^{2}n-tu^{6}r(te^{2}r)-fro^{2}n-ta(ta^3)′-li^{2}s. From *inter*, between, and *frons*, the forehead. Of Robineau-Desvoidy, situated on the anterior median part of the frontal portion of the head (said of two chitinous pieces in insects). [L, 180 (*a*, 39).]

INTERFURCALIS (Lat.), adj. I^{2}n-tu^{6}r(te^{2}r)-fu^{6}r(fu^{4}r)-ka-(ka^3)′li^{2}s. From *inter*, between, and *furca*, a fork. Ger., *gabelständig, gaffelständig, zwischengabelig*. Of flowers, situated in the forks of the stem. [B, 123 (*a*, 24).]

INTERGANGLIONIC, adj. I^{2}n-tu^{6}r-ga^{2}n^2-gli^2-o^{2}n′i^{2}k. From *inter*, between, and *γάγγλιον*, a ganglion. Fr., *interganglionnaire*. Running from one nervous ganglion to another (said of the cords of the ganglionic nervous system). [L, 41 (*a*, 14).]

INTERGERINUS (Lat.). adj. I^{2}n-tu^{6}r(te^{2}r)-je^{2}r(ge^{2}r)-i(e)′nu^{3}s-(nu^{4}s). From *inter*, between, and *gerere*, to bear. Ger., *zwischengefügt*. Inserted, shoved in, as it were, between two parts (see Lamina *intergerina*). [B, 123 (*a*, 24).]

INTERGÉRION (Fr.), n. A^{2}n^2-te^{2}r-zha-re-o^{2}n^2. From *inter*, between, and *gerere*, to bear. A keel-shaped portion projecting beyond the labrum and behind the chin, found in certain coleopterous insects. [L, 180 (*a*, 39).]

INTERGLANDULAR, adj. I^{2}n-tu^{6}r-gla^{2}nd′u^{2}l-a^{3}r. From *inter*, between, and *glandula*, a gland. Situated between the glands of a part.

INTERGLOBULAR, adj. I^{2}n-tu^{6}r-glo^{2}b′u^{2}l-a^{3}r. From *inter*, between, and *globulus*, a globule. Ger., *i.* Situated between globules. [C.]

INTERGONIAL, adj. I^{2}n-tu^{6}r-go′ni^2-a^{2}l. From *inter*, between, and *γωνία*, an angle. Situated or extending between the two angles of the lower jaw.

INTERGRANULAR, adj. I^{2}n-tu^{6}r-gra^{2}n′u^{2}l-a^{3}r. From *inter*, between, and *granulum*, a granule. Occupying the spaces between granules.

INTERHÆMAL, adj. I^{2}n-tu^{6}r-hem′a^{2}l. From *inter*, between, and *αἷμα*, the blood. Fr., *interhématal*. Situated between the hæmal processes. [A, 385.]

INTERHEMISPHERIC, adj. I^{2}n-tu^{6}r-he^{2}m-i^2-sfe^{2}r′i^{2}k. From *inter*, between, *ἡμι-*, half, and *σφαῖρα*, a sphere. Fr., *interhémisphérique*. Situated between the cerebral hemispheres. [A, 385.]

INTERHUMAIN (Fr.), adj. A^{2}n^2-te^{2}r-u^6-ma^{2}n^2. From *inter*, between, and *humanus*, human. Of infection, transmitted from one human being to another. [Verneuil, "Sem. méd.," Mar. 20, 1889, p. 91 (*a*, 18).]

INTERHYAL, adj. From *inter*, between, and the Greek letter *υ* (see Hyoid). Situated between the component parts of the hyoid apparatus. [L.]

INTERITUS (Lat.), n. m. I^{2}n-tu^{6}r(te^{2}r)′i^{2}t-u^{3}s(u^{4}s). Gen., *-ter′-itus*. From *interire*, to perish. Death. [L, 50 (*a*, 14).]

INTERJECTED (Lat.), adj. I^{2}n-tu^{6}r-je^{2}kt′e^{2}d. Lat., *interjectus* (from *interjicere*, to throw between). See Interposed.

INTERJUGAL, adj. I^{2}n-tu^{6}r-ju^2′g′l. From *inter*, between, and *jugum*, a yoke. Situated between the zygomatic processes or regions. [*a*, 29.]

INTERJUGULAR, adj. I^{2}n-tu^{6}r-ju^2′gu^2-la^{3}r. From *inter*, between, and *jugulum* (*q. v.*). Situated between the jugular processes or veins. [*a*, 29.]

INTERLAKEN (Ger.), n. I^{2}n′te^{2}r-la^{3}k-e^{2}n. A climatic resort in the canton of Berne, Switzerland, where there is a whey-cure establishment. [L, 30, 41, 57 (*a*, 14).]

INTERLAMELLAR, adj. I^{2}n-tu^{6}r-la^{2}m-e^{2}l′a^{3}r. From *inter*, between, and *lamella* (*q. v.*). Fr., *interlamelleux*. Ger., *i.* Situated between lamellæ.

INTERLAMINAR, adj. I^{2}n-tu^{6}r-la^{2}m′i^{2}n-a^{3}r. From *inter*, between, and *lamina* (*q. v.*). Situated between laminæ.

INTERLATERICOSTALIS (Lat.), adj. I^{2}n-tu^{6}r(te^{2}r)-la^{2}t-(la^{3}t)″e^{2}r-i^2-ko^{2}st-a(a^3)′li^{2}s. From *inter*, between, *latus*, the side, and *costa*, a rib. Fr., *interlatéricostal*. It., *interlatericostale*. Of Dumas, an external intercostal muscle. [L, 41, 44 (*a*, 14).]

INTERLIGAMENTOUS, adj. I^{2}n-tu^{6}r-li^{2}g-a^2-me^{2}nt′u^{2}s. From *inter*, between, and *ligamentum*, a ligament. Fr., *interligamenteux*. Situated between ligaments.

INTERLIGNE (Fr.), n. A^{2}n^2-te^{2}r-len-y′. From *inter*, between, and *linea*, a line. A boundary line.—**I. articulaire antérieur.** The line marking the anterior limit of the sacro-iliac articulation. [A, 50.]—**I. cellulaire.** The lines between cells, especially the black lines between endothelial cells after staining with silver nitrate. [J, 31.]

INTERLOBAR, adj. I^{2}n-tu^{5}r-lob'a^{3}r. Lat., *interlobaris* (from *inter*, between, and λοβός, a lobe). Fr., *interlobaire.* Situated between the lobes of a structure.

INTERLOBULAR, adj. I^{2}n-tu^{5}r-lo^{2}b'u^{2}l-a^{3}r. Lat., *interlobularis* (from *inter*, between, and *lobulus*, a lobule). Fr., *interlobulaire.* Situated between the lobules of a structure.

INTERLUNIUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-lu^2(lu)'ni^2-u^{3}s(u^{4}s). From *inter*, between, and *luna*, the moon. Pertaining to an interval between moons (see MORBUS *i.*). [Hartmann (A, 325).]

INTERMALAR, adj. I^{2}n-tu^{5}r-ma'la^{3}r. From *inter*, between, and *mala*, the cheek-bone. Situated between the malar bones. [α, 29.]

INTERMARGINAL, adj. I^{2}n-tu^{5}r-ma^{3}rj'i^2-n'l. Lat., *intermarginalis* (from *inter*, between, and *margo*, a margin). Situated between two margins. [α, 29.]

INTERMASTOID, adj. I^{2}n-tu^{5}r-ma^{2}s'toid. From *inter*, between, μαστός, the breast, and εἶδος, form. Situated between the mastoid processes. [α, 29.]

INTERMAXILLA (Lat.), n. f. I^{2}n-tu^{5}r(te^{2}r)-ma^{2}x(ma^{3}x)-i^{2}l'-la^3. From *inter*, between, and *maxilla*, the jaw-bone. See *Intermaxillary* BONE.

INTERMAXILLARY, adj. I^{2}n-tu^{5}r-ma^{2}x'i^{2}l-la-ri^2. Fr., *intermaxillaire.* Ger., *intermaxillär.* See PREMAXILLARY.

INTERMEDIARY, INTERMEDIATE, adj's. I^{2}n-tu^{5}r-med'i^2-a-ri, -at. Lat., *intermedius* (from *inter*, between, and *medius*, middle). Fr., *intermédiaire.* Ger., *intermediär, mittelständig, zwischenständig.* 1. Situated centrally or in the middle; situated between two bodies. 2. Occurring between two specified periods of time.

INTERMEDIO-LATERAL, adj. I^{2}n-tu^{5}r-med''i^{2}o-la^{2}t'e^2-r'l. From *intermedius*, intermediate, and *latus*, a side. In the spinal cord.

INTERMEDIUM (Lat.), n., n. of adj. *intermedius.* I^{2}n-tu^{5}r-(te^{2}r)-med(me^{2}d)'i^2-u^{3}m(u^{4}m). Fr., *intermède.* 1. Anything having an intermediate situation; of Gegenbaur, a tarsal bone found between the astragalus and the calcaneum in saurians. ["Am. Nat.," ix, p. 116 (α, 32).] 2. In pharmacy, an emulsifying or suspending ingredient. [A, 523.]—**Intermedia ligamentalia** (seu **nervea**). The tendinous intersections of the rectus abdominis muscle. [A, 322.]

INTERMEDIUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-med(me^{2}d)'i^2-u^{3}s-(u^{4}s). See INTERMEDIATE.

INTERMEMBRANOUS, adj. I^{2}n-tu^{5}r-me^{2}m'bra^{2}n-u^{3}s. From *inter*, between, and *membrana*, a membrane. Situated or occurring between membranes (see *I.* OSSIFICATION).

INTERMENINGEAL, adj. I^{2}n-tu^{5}r-me^{2}n-i^{2}n'je-a^{2}l. From *inter*, between, and μῆνιγξ, a membrane. Situated or occurring between the meninges.

INTERMENSTRUAL, adj. I^{2}n-tu^{5}r-me^{2}n'stru^2-a^{2}l. From *inter*, between, and *menstrualis*, menstrual. Fr., *intermenstruel.* Occurring between menstruations.

INTERMENSTRUATION (Fr.), n. A^{2}n^2-te^{2}r-ma^{3}n^2-stru^6-a^3-se-o^{2}n^2. The interval between the menses. [L, 41.]

INTERMENT, n. I^{2}n-tu^{5}r'me^{2}nt. From *in*, into, and *terra*, the earth. Fr., *enterrement.* Ger., *Begräbniss.* Burial in the earth.

INTERMESENTERIC, adj. I^{2}n-tu^{5}r-me^{2}z-e^{2}n-te^{2}r'i^{2}k. From *inter*, between, and μεσεντέριον, the mesentery. Situated between mesenteries (see *I.* CHAMBERS).

INTERMESOBLASTIC, adj. I^{2}n-tu^{5}r-me^{2}s-o-bla^{2}st'i^{2}k. From *inter*, between, μέσος, middle, and βλαστός, a bud. Situated between the two layers or between the two lateral plates of the mesoblast. [J.]

INTERMETACARPAL, adj. I^{2}n-tu^{5}r-me^{2}t-a^3-ka^{3}r'p'l. From *inter*, between, μετά, beyond, and καρπός, the wrist. Fr., *intermétacarpien.* Situated between the metacarpal bones.

INTERMETATARSAL, adj. I^{2}n-tu^{5}r-me^{2}t-a^3-ta^{3}r's'l. From *inter*, between, μετά, beyond, and ταρσός, the sole of the foot. Fr., *intermétatarsien.* Pertaining to or connecting two or more metatarsal bones. See *I.* ARTICULATIONS.

INTERMISSION, n. I^{2}n-tu^{5}r-mi^{2}sh'u^{3}n. Lat., *intermissio.* Fr., *i.* Ger., *Unterlassen, Zwischenzeit* (1st and 2d def's). 1. The interval between two paroxysms of disease (especially of fever) during which the active symptoms of the disease are wanting. 2. A complete temporary cessation of a disease or its symptoms. [A, 326 (α, 21); D, 70.] 3. Of the pulse, the act of intermitting, also the quality of being intermittent.

INTERMITTENCE, n. I^{2}n-tu^{5}r-mi^{2}t'e^{2}ns. Fr., *i.* Ger., *Unterbrechung, Intermittenz.* The quality of being intermittent.

INTERMITTENS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-mi^{2}t'te^{2}nz(te^{2}ns). See INTERMITTENT; as a n., intermittent fever.—**I. anteponens.** An intermittent form in which each succeeding paroxysm occurs at an earlier hour in the day than the preceding one. [L, 57 (α, 40).]—**I. biliosa.** Intermittent fever due to or associated with gall-stones. [α, 40.]—**I. duplicata.** A double intermittent fever. [L, 57 (α, 40).]—**I. fixa.** Intermittent fever in which the paroxysms occur at a certain hour each time. [L, 57 (α, 40).]—**I. inversa.** An intermittent fever in which the hot or sweating stage precedes the chill. [α, 40.]—**I. larvata.** See *Marked* AGUE.—**I. multiplex.** A double tertian or quartan intermittent fever. [α, 40.]—**I. multiplex multiplicata.** An intermittent fever in which there are two paroxysms on the first day, one on the second, two on the third, and so on, alternating with succeeding days. [L, 57 (α, 40).]—**I. non fixa.** Intermittent fever the paroxysms of which occur at no special period of the day. [α, 40.]—**I. perniciosa.** Malarial fever characterized by a special dangerous local affection in an important organ which more or less obscures the real disease. [A, 319 (α, 40).]—**I. postponens.** Intermittent fever in which each paroxysm occurs at a later hour in the day than the preceding one. [α, 40.]—**I. quartana.** See *Quartan intermittent* FEVER.—**I. quotidiana.** See *Quotidian intermittent* FEVER.—**I. subintrans.** An intermittent fever in which there is a second rise of temperature before the last stage of the first is entirely ended, thus forming a combination of intermittent and remittent fevers. [L, 57 (α, 40).]—**I. tertiana.** See *Tertian intermittent* FEVER.—**I. topica.** An i. in which the febrile changes are limited to a particular part of the body (*e. g.*, the liver, the spleen, or the nervous system). [L, 57 (α, 40).]

INTERMITTENT, adj. I^{2}n-tu^{5}r-mi^{2}t'e^{2}nt. Lat., *intermittens* (from *intermittere*, to leave off). Fr., *i.* Ger., *intermittirend, nachlassend, abwechselnd.* Having the property of intermittence (*i. e.*, having an interval or intermission between two successive manifestations); as a n., i. fever. [D, 1.]—**Masked i.** See *Masked* AGUE.

INTERMURAL, adj. I^{2}n-tu^{5}r-mu^2'r'l. From *inter*, between, and *murus*, a wall. Situated or occurring between the tunics of an organ.

INTERMUSCULAR, adj. I^{2}n-tu^{5}r-mu^{3}s'ku^2-la^{3}r. From *inter*, between, and *musculus*, a muscle. Fr., *intermusculaire.* Situated between muscles. [C.]

INTERN, adj. I^{2}n-tu^{5}rn'. Treated as a hospital in-patient. [Simpson, "Edinb. Med. Jour.," May, 1882.]

INTERNAL, adj. I^{2}n-tu^{5}r'n'l. Lat., *internus.* Fr., *interne.* Ger., *intern, innerlich.* Interior, situated within. [α, 24.]

INTERNASAL, adj. I^{2}n-tu^{5}r-na's'l. From *inter*, between, and *nasus*, the nose. Situated between the nasal bones. [α, 29.]

INTERNE (Fr.), adj. and n. A^{2}n^2-te^{2}rn. 1. (Adj.) see INTERNAL. 2. (N.) a physician resident in and attached to the medical staff of a hospital. [D.]—**I. du marteau.** Of Winslow, the tensor tympani. [L, 33 (α, 29).]

INTERNEURAL, adj. I^{2}n-tu^{5}r-nu^2'r'l. From *inter*, between, and νεῦρον, a nerve. Situated between the neural processes. [L.]

INTERNODAL, adj. I^{2}n-tu^{5}r-no'd'l. From *inter*, between, and *nodus*, a knot. Situated between nodes.

INTERNODE, n. I^{2}n'tu^{5}r-nod. Lat., *internodium* (from *inter*, between, and *nodus*, a node). Fr., *entre-nœud.* Ger., *Zwischenknotenstück, Mittelstück.* 1. In botany, a portion of stem between the points where two successive leaves or whorls of leaves are inserted. [B, 1, 123, 291 (α, 24).] 2. See PHALANX.—**I. of Ranvier.** Fr., *segment interannulaire.* Syn.: *interannular* (or *internodal*) *segment.* The part of a medullated nerve-fibre situated between two successive nodes of Ranvier. [J.]

INTERNODIAL, adj. I^{2}n-tu^{5}r-nod'i^2-a^{2}l. See INTERNODAL.

INTERNODIUM (Lat.), n. n. I^{2}n-tu^{5}r(te^{2}r)-nod(no^{2}d)'i^2-u^{3}m-(u^{4}m). See INTERNODE.

INTERNODIUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-nod(no^{2}d)'i^2-u^{3}s(u^{4}s). See INTERNODAL.

INTERNOMEDIALIS (Lat.), adj. I^{2}n-tu^{5}rn(te^{2}rn)-o(o^3)-me-(me^2)-di^2-a(a^3)'li^{2}s. From *internus*, inner, and *medialis*, median. In entomology, of Kirby, common to the internal and median areas of the wings (applied to the fourth vein of the wing which separates the internal from the median area). [L, 180. 196 (α, 39).]

INTERNUCLEAR, adj. I^{2}n-tu^{5}r-nu^2'kle^2-a^{3}r. From *inter*, between, and *nucleus* (*q. v.*). Fr., *internucléaire.* Occupying the spaces between nuclei.

INTERNUNCIUS (Lat.), **INTERNUNTIUS** (Lat.), adj's. I^{2}n-tu^{5}r(te^{2}r)-nu^{3}n(nu^{4}n)'si^2(ki^2)-u^{3}s(u^{4}s), -shi^2(ti^2)-u^{3}s(u^{4}s). From *internuntiare*, to send messengers. Ger., *zwischenmeldend.* Indicative (said of the days of a fever that precede the crisis and indicate the course to be pursued). [A, 322.]

INTERNUS (Lat.), adj. I^{2}n-te^{2}rn'u^{3}s(u^{4}s). See INTERNAL; as a n., an internal muscle.—**I. auris, I. mallei.** See TENSOR *tympani.*

INTEROCULAR, adj. I^{2}n-tu^{5}r-o^{2}k'u^{2}l-a^{3}r. From *inter*, between, and *oculus*, the eye. Situated between the eyes.

INTEROLIVARY, adj. I^{2}n-tu^{5}r-o^{2}l'i^{2}v-a-ri^2. From *inter*, between, and *oliva*, an olive. Situated between the olivary bodies. [α, 29.]

INTEROPERCULAR, adj. I^{2}n-tu^{5}r-o-pu^{5}r'ku^{2}l-a^{3}r. From *inter*, between, and *operculum*, a cover. Fr., *interoperculaire.* Situated between the opercula; as a n., the i. bone. [A, 385.]

INTEROPERCULUM (Lat.), n. n. I^{2}n-tu^{5}r(te^{2}r)-op(o^{2}p)-u^{5}r-(e^{2}r)'ku^{2}l(ku^{4}l)-u^{3}m(u^{4}m). Fr., *interopercule.* See *Interopercular* BONE.

INTEROPTICUS (Lat.), adj. I^{2}n-tu^{5}r(te^{2}r)-o^{2}pt'i^{2}k-u^{3}s(u^{4}s). From *inter*, between, and ὀπτικός, for sight. Ger., *interoptisch.* See INTEROCULAR; as a n., an interocular lobe observed in certain reptiles. [I, 80 (K); "Jour. of Nerv. and Ment. Dis.," July, 1880, p. 480 (K).]

INTERORBITAL, adj. I^{2}n-tu^{5}r-o^{2}rb'i^2-t'l. From *inter*, between, and *orbita*, the orbit. Fr., *interorbitaire.* Situated between the orbits; pertaining to the space between the orbits; as a n., see *I.* BONE. [L, 343.]

INTERORGANIC, adj. I^{2}n-tu^{5}r-o^{2}r-ga^{2}n'i^{2}k. From *inter*, between, and ὄργανον, an organ. Fr., *interorganique.* Situated between organs or their elements. [A, 385.]

INTEROSCULANT, adj. I^{2}n-tu^{5}r-o^{2}s'ku^{2}l-a^{2}nt. From *inter*, between, and *osculare*, to kiss. See OSCULANT.

INTEROSSEOUS, adj. I[2]n-tu[6]r-o[2]s'e[2]-u[3]s. Lat., *interosseus* (from *inter*, between, and *os*, a bone). Fr., *interosseux*. Ger., *zwischen Knochen liegend.* Pertaining to, connected with, or situated between two contiguous bones. [C.]

INTEROSSEUS (Lat.), adj. I[2]n-tu[6]r(te[2]r)-o[2]s'se[2]-u[3]s(u[4]s). Interosseous; as a n., an interosseous muscle, and in the m. pl., *interossei*, muscles occupying the intervals between the metacarpal bones and between the metatarsal bones. [L, 135 (α, 14).]—**Interossei dorsales.** See *Interossei manus dorsales* and *Interossei pedis dorsales.*—**I. internus primus.** Of Albinus, the first dorsal i. of the hand. [L, 31 (α, 29).]—**Interossei manus.** See *Interossei palmares.*—**Interossei manus bicipites.** See *I. manus dorsales.*—**Interossei manus dorsales, Interossei manus externi.** Four small muscles which occupy the dorsal portions of the spaces between the metacarpal bones. Each arises by two heads from the adjacent sides of the metacarpal bones between which it lies, the larger head being attached to the bone which supports the finger upon which the muscle acts, and is inserted into the base of the first phalanx and the aponeurosis of the common extensor tendon. They are known as the first, second, third, and fourth from the radial to the ulnar side of the hand. The first, or abductor indicis, is the largest, and is inserted into the radial side of the index finger; the second is inserted into the radial side of the middle finger; the third into the ulnar side of the middle finger; and the fourth into the ulnar side of the ring-finger. [L, 31, 142, 172 (α, 29).]—**Interossei palmares.** Small muscles which occupy the palmar portion of the intervals between the metacarpal bones, and lie partially upon the palmar surfaces of the latter. They are three in number, arise from the entire length of the metacarpal bone of one finger, and are inserted into the base of the first phalanx and into the extensor tendon of the same finger. The first belongs to the ulnar side of the index-finger; the second and third to the radial sides of the ring and little fingers. Some authors consider one of the heads of the flexor pollicis brevis as a palmar interosseous belonging to the thumb, thus making the number of palmar interossei four. They are known as the first, second, third, and fourth from the radial toward the ulnar side of the hand.—**Interossei pedis.** See *Interossei plantares.*—**Interossei pedis bicipites, Interossei pedis dorsales, Interossei pedis externi.** Small muscles which occupy the dorsal portions of the spaces between the metatarsal bones. They are four in number, arise by two heads from the adjacent sides of the metatarsal bones, between which they are placed, and are inserted into the bases of the first phalanges and into the common extensor tendons. The first dorsal interosseous is inserted into the inner side of the second toe, the other three into the outer sides of the second, third, and fourth toes. They are known as the first, second, third, and fourth from the inner side of the foot outward. [L, 31, 142, 172, 332 (α, 29).]—**Interossei plantares.** Three small muscles in the foot which arise from the inner and under surfaces and bases of the third, fourth, and fifth metatarsal bones, and are inserted into the inner sides of the bases of the first phalanges of the same toes and into the aponeurosis of the common extensor tendon. They are known as the first, second, and third from the inner side of the foot outward. [L, 31, 142, 172, 332 (α, 29).]—**Interossei pollicis indicisque.** Of Dursy, one of the heads of the flexor pollicis brevis, together with a portion of the first dorsal interosseous of the hand. [L, 31 (α, 29).]—**Interossei pollicis volaris primus.** The portion of the deep head of the flexor pollicis brevis which arises from the metacarpal bone of the thumb. [L, 31, 332 (α, 29).]—**Interossei simplices.** See *Interossei palmares.*—**Interossei volares.** See *Interossei palmares.*

INTERPAPILLARY, adj. I[2]n-tu[6]r-pa[2]p'i[2]l-a-ri[2]. From *inter*, between, and *papilla* (*q. v.*). Fr., *interpapillaire.* Situated between papillæ. [L, 41.]

INTERPARENCHYMATOUS, adj. I[2]n-tu[6]r-pa[2]r-e[2]n-ki[2]m'-a[3]-tu[3]s. From *inter*, between, and παρέγχυμα, parenchyma. Situated between the proper or functional tissue elements of a part or organ. [J.]

INTERPARIETAL, adj. I[2]n-tu[6]r-pa[2]r-i'e[2]-t'l. From *inter*, between, and *paries*, a wall. Fr., *interpariétal.* Ger., *i.*, *Zwischenwand-.* Situated between the parietal bones; as a n., see *I.* BONE. [C; L, 150.]

INTERPAROXYSMAL, adj. I[2]n-tu[6]r-pa[2]r-o[2]x-i[2]z'm'l. From *inter*, between, and παροξυσμός, a paroxysm. Occurring between paroxysms.

INTERPASSATIO (Lat.), n. f. I[2]n-tu[6]r(te[2]r)-pa[2]s(pa[3]s)-sa-(sa[3])'shi[2](ti[2])-o. Gen., *-on'is.* From *interpassare*, to quilt. Fr., *interpassation.* Ger., *Durchnähen.* The process of quilting. [A, 322, 325.]

INTERPEDUNCULAR, adj. I[2]n-tu[6]r-pe[2]d-u[3]nk'u[2]l-a[3]r. From *inter*, between, and *pedunculus*, a peduncle. Fr., *interpédonculaire.* Situated between the peduncles of the brain. [L, 49.]

INTERPELLATUS (Lat.), n. m. I[2]n-tu[6]r(te[2]r)-pe[2]l-lat(la[3]t)'-u[3]s(u[4]s). From *interpellare*, to interrupt. Of Paracelsus, characterized by irregular paroxysms (said of diseases). [L, 50 (α, 14).]

INTERPENNÉ (Fr.), adj. A[2]n[2]-te[2]r-pa[3]n-na. See INTERPINNATE.

INTERPETIOLAR, INTERPETIOLARY, adj's. I[2]n-tu[6]r-pe[2]t-i'ol-a[3]r, -a-ri[2]. Lat., *interpetiolaris* (from *inter*, between, and *petiolus*, a petiole). Fr., *interpétiolaire.* See INTERFOLIACEOUS.

INTERPHALANGEAL, adj. I[2]n-tu[6]r-fa[2]l-a[2]n'je[2]-a[2]l. From *inter*, between, and φάλαγξ, a phalanx. Situated between the phalanges. [C.]

INTERPINNATE, adj. I[2]n-tu[6]r-pi[2]n'at. From *inter*, between, and *pinna*, a feather. Fr., *interpenné.* Of leaves, having small folioles between the larger ones. [B, 38 (α, 14).]

INTERPLACENTAL, adj. I[2]n-tu[6]r-pla[2]s-e[2]n't'l. From *inter*, between, and *placenta*, a cake. Ger., *i.* Pertaining to the spaces or lacunæ between the villi of the placenta. [J, 14, 55.]

INTERPLEURICOSTAL, adj. I[2]n-tu[6]r-plu[2]-ri[2]-ko[2]s't'l. From *inter*, between, πλευρόν, the pleura, and *costa*, a rib. Fr., *interplévricostal.* Situated between the pleura and the ribs. The *interpleuricostales* of Dumas are the internal intercostal muscles. [L, 44, 187 (α, 14).]

INTERPOLATED, adj. I[2]n-tu[6]r'po[2]l-at-e[2]d. Lat., *interpolatus* (from *interpolare*, to give a new form). See INTERCALARY.

INTERPOLATION, n. I[2]n-tu[6]r-pol-a'shu[3]n. Fr., *i.* Ger., *I.*, *Einschaltung.* In plastic surgery, a method of operating by inserting material from adjacent regions, from a limb, or from another person. [Roberts, "Phila. Med. Times," July 1, 1882, p. 657.]

INTERPOSED, adj. I[2]n-tu[6]r-pozd'. Lat., *interpositus* (from *interponere*, to place between). Fr., *interposé.* Ger., *zwischengestellt.* Interjected, introduced between other parts or members already formed. [B, 77, 123 (α, 24).]

INTERPOSITION, n. I[2]n-tu[6]r-po-zi[2]sh'u[3]n. Lat., *interpositio.* Fr., *i.*, *génération interstitielle* (ou *accrementitielle*) (2d def.). 1. A placing between. 2. The development of anatomical elements between those which already exist. [J, 33.]

INTERPOSITIVE, adj. I[2]n-tu[6]r-po[2]z'i[2]-ti[2]v. Lat., *interpositivus.* Fr., *interpositif.* Ger., *dazwischenstehend.* Situated between other parts or organs. [B, 1 (α, 24).]

INTERPROTOMETAMERE, n. I[2]n-tu[6]r-pro-to-me[2]t'a[3]-mer. From *inter*, between, πρῶτος, first, μετὰ, among, and μέρος, a part. In embryology, the part or parts between the myotomes or primary segments. [J.]

INTERPTERYGOID, adj. I[2]n-tu[6]r-te[2]r'i[2]goid. From *inter*, between, πτέρυξ, a wing, and εἶδος, resemblance. Situated between the pterygoid processes. [α, 29.]

INTERPUBIC, adj. I[2]n-tu[6]r-pu[2]b'i[2]k. From *inter*, between, and *pubes* (*q. v.*). Situated between the pubic bones. [α, 14.]

INTERPYRAMIDAL, adj. I[2]n-tu[6]r-pi[2]r-a[2]m'i[2]-d'l. From *inter*, between, and πυραμίς, a pyramid. Situated between the pyramids. [α, 29.]

INTERRADIAL, adj. I[2]n-tu[6]r-ra'di[2]-a[2]l. From *inter*, between, and *radius* (*q. v.*). In the *Echinoidea*, situated between the rays or radii (as the i. plates). [L, 11 (α, 39).]

INTERRAMAL, adj. I[2]n-tu[6]r-ra'm'l. From *inter*, between, and *ramus*, a branch. Situated between the rami of the mandible. [L, 343.]

INTERRANEOUS [Mirbel], adj. I[2]n-te[2]r-ran'e[2]-u[3]s. From *in*, in, and *terra*, the earth. See SUBTERRANEOUS.

INTERRENAL, adj. I[2]n-tu[6]r-re'n'l. From *inter*, between, and *ren*, the kidney. Situated between the kidneys (said by Balfour of the median of the two distinct parts into which he considered the suprarenal bodies of some of the lower vertebrates to be divided). [A, 5.] See *I.* BODY.

INTERRUPTED, adj. I[2]n-tu[6]r-ru[3]pt'e[2]d. Lat., *interruptus* (from *interrumpere*, to break apart). Fr., *interrompu.* Ger., *unterbrochen.* Broken, not continuous, broken or discontinued at short intervals. [B, 1, 19, 123 (α, 24).]

INTERRUPTIO (Lat.), n. f. I[2]n-tu[6]r(te[2]r)-ru[3]p(ru[4]p)'shi[2](ti[2])-o. Gen., *-on'is.* Fr., *i.* Ger., *Unterbrechung.* An interruption.—**I. menstrualis.** Arrest of the menstrual flow. [A, 322.]

INTERRUPTIPINNATE, adj. I[2]n-tu[6]r-ru[3]pt-i[2]-pi[2]n'at. From *inter*, between, *rumpere*, to break, and *penna*, a wing. Lat., *interrupte pinnatus.* Fr., *interrupté-penné, interruptipenné.* Ger., *unterbrochen-gefiedert.* Of a pinnate leaf, having some of the leaflets (*pinnæ*) smaller than the others, as in the potato; also used improperly for *abruptly pinnate* (*i. e.*, pinnate with the leaf terminated abruptly by a pair of leaflets). [B, 1, 19, 121, 123, 291 (α, 35).]

INTERSACRAL, adj. I[2]n-tur-sa'kr'l. From *inter*, between, and *sacer* (see SACRUM). Situated between different portions of the sacrum. [α, 29.]

INTERSÆPTUM (Lat.), n. n. I[2]n-tu[6]r(te[2]r)-se[2]p'(sa[3]'e[2]p)'-tu[3]m(tu[4]m). From *intersæpire*, to fence about. See SÆPTUM.—**I. narium.** See SÆPTUM *narium.*—**I. virginale.** See HYMEN (2d def.).

INTERSCAPULAR, adj. I[2]n-tu[6]r-ska[2]p'u[2]-la[3]r. Lat., *interscapularis* (from *inter*, between, and *scapula* [*q. v.*]. Fr., *interscapulaire.* Ger., *zwischen den Schulterblättern.* Situated between the scapulæ. [B, 117; L, 44 (α, 14).]

INTERSCAPULIUM (Lat.), n. n. I[2]n-tu[6]r(te[2]r)-ska[2]p(ska[3]p)-u[2]l(u[4]l)'i[2]-u[3]m(u[4]m). From *inter*, between, and *scapula* (*q. v.*). Ger., *Vorderrücken, Schulterblattsgräte* (1st def.). 1. Of Bartholin, the spine of the scapula. [A, 325.] 2. The space between the scapulæ. 3. A fossa on the dorsum of the scapula. [L, 349 (α, 29).] 4. In birds, the region between the wings. [L, 180 (α, 39).]

INTERSECTIO (Lat.), n. f. I[2]n-tu[6]r(te[2]r)-se[2]k'shi[2](ti[2])-o. Gen., *-on'is.* From *intersecare*, to cut asunder. An intersection.—**I. nervorum opticorum.** See CHIASM.—**I'nes tendineæ.** See LINEÆ *transversæ.*

INTERSEPIMENTUM (Lat.), n. n. I[2]n-tu[6]r(te[2]r)-se[2]p(sap)-i-(e)-me[2]nt'u[3]m(u[4]m). From *intersæpire*, to fence about. Ger., *Zwischenraum, Scheidewand.* A separation, partition. [L, 50 (α, 14).]—**I. thoracis.** See MEDIASTINUM.

INTERSEPTAL, adj. I[2]n-tu[6]r-se[2]p't'l. From *intersæpire*, to fence about or to hedge up, impede. Situated between the partitions or septa. [J.]

INTERSEPTUM (Lat.), n. n. I[2]n-tu[6]r(te[2]r)-se[2]p(sap)'tu[3]m-(tu[4]m). 1. See SÆPTUM. 2. See INTERSEPIMENTUM. 3. The sæptum narium. 4. The diaphragm. [L, 30, 50.]

INTERSPACE, n. I[2]n'tu[6]r-spas. From *inter*, between, and *spatium*, a space. A space between two or more things. [α, 41.]—**Haversian i's.** The more or less prismatic masses of bone that fill the gaps between adjacent Haversian systems.

INTERSPINAL, adj. I[2]n-tu[5]r-spi'n'l. See Interspinous.

INTERSPINALIS (Lat.), adj. I[2]n-tu[5]r(te[2]r)-spin(spen)-a(a[3])'-li[2]s. See Interspinous; as a n., one of the short vertical bundles of muscular fibres placed in pairs between the spinous processes of the contiguous vertebræ. [L, 31, 142, 172 (α, 29).]—**Interspinales colli.** The interspinales in the cervical region. [α, 29.]—**Interspinales dorsi et lumborum.** The interspinales of the dorsal and lumbar regions. [α, 29.]

INTERSPINOUS, adj. I[2]n-tu[5]r-spin'u[3]s. Lat., *interspinalis* (from *inter*, between, and *spina*, a spine). Fr., *interépineux*. Ger., *Zwischendorn-*. Situated between spinous processes (*e. g.*, those of the vertebræ). [C.]

INTERSTAMINAL, adj. I[2]n-tu[5]r-sta[2]m'i[2]-n'l. From *inter*, between, and στήμων, a stamen. Between stamens (said of an organ placed between two stamens). [Balfour (α, 35).]

INTERSTERNAL, adj I[2]n-tu[5]r-stu[5]r'n'l. From *inter*. between, and στέρνον, the sternum. Situated between different portions of the sternum. [α, 29.]

INTERSTICE, n. I[2]n-tu[5]r'sti[2]s, i[2]n'tu[5]r-sti[2]s. Lat., *interstitium* (from *intersistere*, to stand still in the middle). Fr., *i.* Ger., *Zwischenraum*, *Zwischenstand*. 1. A small gap or interval between two adjacent bodies. 2. In botany, (*a*) an air-space, especially one smaller than the surrounding cells. Cf. *Air*-cells (3d def.) and Lacuna; and (*b*) the vallecula in the *Umbelliferæ*. 3. An old term for an intermission of twelve hours in the course of a fever. [B, 123, 229 (α, 24); L, 50 (α, 14).]—**Lacunar i.** See Areola (2d def.).

INTERSTITIAL, adj. I[2]n-tu[5]r-sti[2]sh'a[2]l. From *interstitium*, a space between. Fr., *interstitiel*. Ger., *interstitiell*. 1. Disseminated through the substance of an organ or part; of an inflammation, affecting the connective tissue of an organ. 2. Pertaining to that form of growth which consists in the interposition of new elements between old ones instead of in addition to the surface. [B, 291 (α, 24).] Cf. Intercalary. 3. Of pathological processes, occupying the space between the essential parts of an organ which constitutes its proper tissue; opposed to parenchymatous. [B.]

INTERSTITIUM (Lat.), n. n. I[2]n-tu[5]r(te[2]r)-sti[2]sh(sti[2]t)'i[2]-u[3]m(u[4]m). 1. See Interstice. 2. An interposed part or body. [L, 50 (α, 14).]—**I. ciliare.** See *Ciliary* ligament.—**Interstitia intercostalia.** See *Intercostal* spaces.—**Interstitia interossea metacarpi.** The spaces between the metacarpal bones. [L, 332 (α, 29).]—**Interstitia interossea metatarsi.** The spaces between the metatarsal bones. [L, 332 (α, 29).]—**I. interosseum antibrachii.** The space between the radius and ulna. [L, 332 (α, 29).]—**I. interosseum cruris.** The space between the tibia and fibula. [L, 332 (α, 29).]—**I. jugulare.** Fr., *interstice jugulaire*. Ger., *Gurgelzwischenraum*. See Jugulum.—**I. thyreo-hyo-epiglotticum.** The space between the hyo-epiglottic and the thyreo-epiglottic and middle thyreo-hyoid ligaments. [L, 332 (α, 29).]

INTERSUPERCILIARY, adj. I[2]n-tu[5]r-su[2]p-u[5]r-si[2]l'i[2]-a-ri[2]. Situated between the superciliary ridges. [α, 29.]

INTERTARSAL, adj. I[2]n-tu[5]r-ta[3]r's'l. From *inter*, between, and *tarsus* (*q. v.*). Situated between adjacent tarsal bones.

INTERTIBIALIS (Lat.), n. m. I[2]n-te[2]r-ti[2]b(teb)-i[2]-a(a[3])'li[2]s. Gen., *-al'is*. From *inter*. between, and *tibialis*, pertaining to the tibia. A muscle found in some of the lower animals, attached to both tibiæ and passing across the sphincter cloacæ; an adductor of the legs. [L, 14.]

INTERTINCTUS (Lat.), adj. I[2]n-tu[5]r-ti[2]n[2]kt'u[3]s(u[4]s). From *inter*, between, and *tinguere*. to wet. See Discrete (1st def.).

INTERTRABECULA (Lat.), n. f. I[2]n-tu[5]r(te[2]r)-tra[2]b(tra[3]b)-e[2]k'u[2]l(u[4]l)-a[3]. From *inter*, between, and *trabecula*, a little beam. A median cartilaginous bar that sometimes connects the trabeculæ of the cranium in front. [L, 294.]

INTERTRACHELIAN, adj. I[2]n-tu[5]r-tra[2]k-el'i[2]-a[2]n. Lat., *intertrachelianus* (from *inter*, between, and τράχηλος, the throat). Fr, *intertrachélien*. Situated between the cervical vertebræ. [L, 41, 44, 50 (α, 14).]

INTERTRAGICUS (Lat.), n. m. I[2]n-tu[5]r(te[2]r)-tra[2]j(tra[3]g)'-i[2]k-u[3]s(u[4]s). From *inter*, between, and τραγικός. like a goat. Fr., *dilatateur de la conque*. Of Jung, a muscle on the anterior surface of the anterior wall of the cartilage of the external auditory canal. It passes obliquely over the lateral fissures in the cartilage. [L, 31, 332 (α, 29).]

INTERTRANSVERSAIRE (Fr.), adj. and n. A[2]n[2]-te[2]r-tra[3]n[2]s-ve[2]r-sa[2]r. 1. (Adj.) see Intertransverse. 2. (N.) see Intertransversalis and Intertransversarius.—**I. du cou.** See Intertransversalis (n.).

INTERTRANSVERSALIS (Lat.), adj. I[2]n-tu[5]r(te[2]r)-tra[2]ns-(tra[3]ns)-vu[5]r(we[2]r)-sa(sa[3])'li[2]s. Gen., *-al'is*. Intertransverse; as a n. (Fr., *intertransversaire du cou*), and in the m. pl., *intertransversales* (Fr., *intercervicaux*; Ger., *obere* und *untere Quermuskeln des Halses*, *Zwischenquermuskeln*), the analogues of the intertransversarius muscle of man, found in solipeds. [L, 13.]

INTERTRANSVERSARIUS (Lat.), adj. I[2]n-tu[5]r(te[2]r)-tra[2]ns-(tra[3]ns)-vu[5]r(we[2]r)-sa(sa[3])'ri[2]-u[3]s(u[4]s). See Intertransverse; as a n., a muscle which passes nearly vertically from the transverse process of one vertebra to the transverse process of the vertebra immediately below. [L, 31, 142, 332.]—**Intertransversarii anteriores.** See *Intertransversarii laterales*.—**Intertransversarii breves.** A generic term embracing the intertransversarii colli postici, the intertransversarii dorsi, the interaccessorii, and the rectus capitis lateralis. [L, 332 (α, 29).]—**Intertransversarii colli antici.** The anterior fibres of the intertransversarii in the cervical regions. [L, 332 (α, 29).]—**Intertransversarii colli postici.** The posterior fibres of the intertransversarii in the cervical region. [L, 332 (α, 29).]—**Intertransversarii laterales.** The fibres of the intertransversarii in the lumbar region which lie between the transverse processes and are in series with the levatores costarum. [L, 142, 332 (α, 29).]—**Intertransversarii longi.** A generic term embracing the median fasciculi of the longissimus dorsi, transversalis cervicis, and the trachelo-mastoid. [L, 332 (α, 29).]—**Intertransversarii posteriores.** See Interaccessorii.

INTERTRANSVERSE, adj. I[2]n-tu[5]r-tra[2]ns-vu[5]rs'. Lat., *intertransversalis*, *intertransversarius* (from *inter*, between, and *transvertere*, to turn across). Fr., *intertransversaire*. Ger., *intertransversal*. Situated between the transverse processes of the vertebræ. [α, 29.]

INTERTRIGINOUS, adj. I[2]n-tu[5]r-tri[2]j'i[2]n-u[3]s. From *intertrigo*. a chafing. Fr., *intertrigineux*. Pertaining to or of the nature of intertrigo. [L, 41 (α, 14).]

INTERTRIGO (Lat.), n. f. I[2]n-tu[5]r(te[2]r)-tri(tre)'go. Gen., *-trig'inis*. From *inter*, between, and *terere*, to rub. Fr., *écorchure*. Ger.. *Fratt*. It., *intertrigine*. Sp., *i.* Syn.: *paratrimma*. A chafing or galling of the skin from the friction of two apposed surfaces, and the macerating and irritating effect of accumulated sweat. It is attended with erythema and usually with a foul-smelling secretion. [G.]—**I. ani, I. podicis.** I. of the anus.

INTERTROCHANTERIC, adj. I[2]n-tu[5]r-tro-ka[2]n-te[2]r'i[2]k. From *inter*, between, and τροχαντήρ, a trochanter. Situated between the trochanters. [α, 14.]

INTERTROPICAL, adj. I[2]n-tu[5]r-tro[2]p'i[2]-k'l. From *inter*, between, and τροπικός, tropical. Fr., *i.* Occurring between the tropics. [L, 41 (α, 14).]

INTERTUBULAR, adj. I[2]n tu[5]r-tu[2]b'u[2]l-a[3]r. From *inter*, between, and *tubulus*, a tubule. Situated between tubules. [α, 14.]

INTERURETERIC, adj. I[2]n-tu[5]r-u[2]-re[2]t-e[2]r'i[2]k. From *inter*, between, and οὐρητήρ, the ureter. Situated between the ureters. [Rockwell, "N. Y. Med. Jour.," July 17, 1886, p. 82.] See *I.* bar.

INTERUTEROPLACENTAL, adj. I[2]n-tu[5]r-u[2]t''e[2]r-o-pla[2]s-e[2]n't'l. From *inter*, between, *uterus*, the womb, and *placenta* (*q. v.*). Situated between the uterus and the placenta. [α, 14.]

INTERVAGINAL, adj. I[2]n-tu[5]r-va[2]j'i[2]-n'l. From *inter*, between, and *vagina*, a sheath. Situated between sheaths.

INTERVAL, n. I[2]n'tu[5]r-v'l. Lat., *intervallum* (from *inter*, between, and *vallum*, a breastwork). Fr., *intervalle*. Ger., *Intervall*. 1. A space between places, an interstice. 2. A remission of a disease. [α, 14.]—**Focal i.** Fr., *intervalle focale*. Ger.. *focales Intervall*. That i. within which a homocentric beam of light, after refraction by an asymmetric surface, undergoes its greatest concentration. It is bounded by the anterior and posterior focal lines, which include all the rays. [F.]—**Inter-mesoblastic i.** The space between the two layers of the mesoblast.—**Interorbital i.** The distance between the two dacrya. [L, 149. 150 (α, 29).]—**Lucid i.** The i. between two paroxysms, in periodic or recurrent insanity, in which the patient is sane and responsible. [α, 40.]—**Orbital i.** See *Interorbital i.*

INTERVALLARY, adj. I[2]n-tu[5]r-va[2]l'a[2]r-i[2]. Occurring in the interval between the paroxysms of a disease (see *Epileptic* insanity). [D, 36.]

INTERVALLUM (Lat.), n. n. I[2]n-tu[5]r(te[2]r)-va[2]l(wa[3]l)'lu[3]m-(lu[4]m). See Interval.—**Intervalla cellularia.** The spaces between constituents of organs or tissues, particularly the spaces in areolar tissue. [L, 349 (α, 29).]—**Intervalla intercostalia.** The intercostal spaces. [A, 322.]—**I. lucidum.** See *Lucid* interval.

INTERVALVAR, INTERVALVATE, adj's. I[2]n-tu[5]r-va[2]lv'-a[3]r, -at. Lat., *intervalvis*, *intervalvularis* (from *inter*, between, and *valva*, the leaf of a door). Fr., *intervalve*, *intervalvaire*. Ger., *Zwischenklappig*. Situated between valves. [B, 123 (α, 24).]

INTERVALVE, INTERVALVULAR, adj's. I[2]n'tu[5]r-va[2]lv, -valv'u[2]-la[3]r. From *inter*, between, and *valva*, the leaf of a door. Lat., *intervalvis*, *intervalvularis*. Fr., *intervalve* [Mirbel], *intervalvaire*. Ger., *zwischenklappig*. Between the valves; said of the partition extending between the ventral sutures of the carpels in the pod of cruciferous plants, and by Mirbel of the nervules (fibres forming the vascular tissue of the placentaries) situated between the borders of the valves in such fruit. [B, 1, 19, 123, 291 (α, 35).]

INTERVALVIS (Lat.), adj. I[2]n-tu[5]r(te[2]r)-va[2]l(wa[3]l)'vi[2]s(wi[2]s). See Intervalvate.

INTERVASCULAR, adj. I[2]n-tu[6]r-va[2]s'ku[2]l-a[3]r. From *inter*, between, and *vasculum*, a small vessel. Occupying the spaces between vessels.

INTERVENIUM (Lat.), n. n. I[2]n-tu[5]r(te[2]r)-ve(wa)'ni[2]-u[3]m-(u[4]m). From *inter*, between, and *vena*, a vein. The portion of parenchyma between the veins of a leaf. [B, 19 (α, 24).]

INTERVENTRICULAR, adj. I[2]n-tu[5]r-ve[2]n-tri[2]k'u[2]l-a[3]r. From *inter*, between, and *ventriculus*, a ventricle. Situated between the ventricles.

INTERVERSION, n. I[2]n-tu[5]r-vu[5]r'zhu[3]n. From *inter*, between, and *vertere*, to turn. Fr., *i.* See Evolution.—**I. lobulaire** (Fr.). See Évolution *nodulaire graisseuse du foie*.

INTERVERTEBRAL, adj. I[2]n-tu[5]r-vu[5]rt'e[2]b-r'l. From *inter*. between, and *vertebra* (*q. v.*). Situated between adjacent vertebræ. [α, 14.]

INTERVERTÉBRO-COSTAL (Fr.), adj. A[2]n[2]-te[2]r-ve[2]r-ta-bro-kos-ta[3]l. From *inter*, between, *vertebra* (*q. v.*), and *costa*, a rib. See Vertébro-costal.

INTERVILLOUS, adj. I[2]n-tu[5]r-vi[2]l'u[3]s. From *inter*. between, and *villus*, shaggy hair. Ger., *intervillös*. Situated between the villi. [α. 29.]

INTESTATUS (Lat.), adj. I[2]n-te[2]st-at(a[3]t)'u[3]s(u[4]s). From *in*, not, and *testari*, to be witness. See Anorchus.

INTESTIN (Fr.), adj. and n. A^{3}n^2-te^{2}s-ta^{2}n^2. 1. (Adj.) see INTESTINAL. 2. (N.) see INTESTINE.—**I. grêle.** See *Small* INTESTINE.—**I. vide** [Winslow]. See JEJUNUM.

INTESTINAL, adj. I^{2}n-te^{2}st'i^2-n'l. Lat., *intestinalis* (from *intestinus*, inward). Fr., *intestin.* Of or belonging to the intestines. [a, 14.]

INTESTINALIA (Lat.), n. n. pl. I^{2}n-te^{2}st-i^{2}n(en)-a(a^3)'li^2-a^3. From *intestina*, the intestines. Of Cuvier, a class of invertebrates which live in the intestines of animals. [L, 180 (a, 39).] See ENTOZOA.

INTESTINALIS (Lat.), adj. I^{2}n-te^{2}st-i^{2}n-a(a^3)'li^{2}s. See INTESTINAL.

INTESTINE, n. I^{2}n-te^{2}st'i^{2}n. Gr., ἔντερον. Lat., *intestinum* (from *intus*, within). Fr., *intestin.* Ger., *Darm, Gedärm.* It., Sp., *intestino.* The musculo-membranous canal (or any definite portion of it) extending from the stomach to the anus, situated inside the abdominal cavity. [C.]—**Large i.** Lat., *intestinum amplum.* Fr., *gros intestin.* Ger., *Dickdarm.* That part of the intestinal canal which extends from the end of the ileum to the anus. It is divided into the cæcum, colon, and rectum. [C.]—**Primitive i.** See PROTOGASTER.—**Small i.** Lat., *intestinum angustum.* Fr., *intestin grêle.* Ger., *Dünndarm.* That part of the i. which extends from the pyloric orifice to the large i. [C.]

INTESTINIFORM, adj. I^{2}n-te^{2}st-i^{2}n'i^2-fo^{2}rm. From *intestinum*, an intestine, and *forma*, form. Intestine-shaped.

INTESTINO-VAGINAL, adj. I^{2}n-te^{2}st-i^{2}n-o-va^{2}j'i^2-n'l. From *intestinum*, an intestine, and *vagina* (*q. v.*). Pertaining to the intestine and to the vagina.

INTESTINO-VESICAL, adj. I^{2}n-te^{2}st-i^{2}n-o-ve^{2}s'i^2-k'l. From *intestinum*, an intestine, and *vesica*, the bladder. Pertaining to the intestine and to the bladder.

INTESTINULUM (Lat.), n. n. I^{2}n-te^{2}st-i^{2}n(en)'u^{2}l(u^{4}l)-u^{3}m-(u^{4}m). Dim. of *intestinum.* 1. A small intestine, or a small convoluted body resembling one; of Sömmerring, a cerebral convolution. [I. 3 (K).] 2. The umbilical cord. [L, 50 (a. 14).]—**Intestinula cerebri.** The cerebral convolutions. [a, 14.]—**Intestinula Meibomii.** An old term for the Meibomian glands. [F.]

INTESTINUM (Lat.), n. n. I^{2}n-te^{2}st-in(en)'u^{3}m(u^{4}m). See INTESTINE.—**I. amplum.** See *Large* INTESTINE.—**I. angustum.** See *Small* INTESTINE.—**I. cæcum.** See CÆCUM.—**I. cellulatum.** See COLON.—**I. circumvolutum.** See ILEUM.—**I. colon.** See COLON.—**I. contortum, I. convolutum.** See ILEUM.—**I. crassum.** See COLON.—**Intestina diaboli.** See DEVIL'S-GUTS.—**I. duodenum.** See DUODENUM.—**I. glomerulatum.** See ILEUM.—**I. gracile.** See *Small* INTESTINE.—**I. grande.** See *Large* INTESTINE.—**I. gyratum.** See ILEUM.—**I. gyratum, I. ileum, I. involutum.** See ILEUM.—**I. jejunum.** See JEJUNUM.—**I. laxum.** See COLON.—**I. longum** [Avicenna]. See ILEUM.—**I. majus.** See COLON.—**I. pancreaticum.** See DUODENUM.—**I. plenum.** See COLON.—**I. rectum.** See RECTUM.—**I. tenue.** See *Small* INTESTINE.—**Intestina terræ.** The *Lumbricus terrestris.* [B, 88 (a, 39).]

INTEXINE, INTEXTINE, n's. I^{2}n-te^{2}x'i^{2}n, -ti^{2}n. From *intexere*, to weave. In the pollen-grains of angeiosperms, an inner membrane sometimes occurring (*e. g.*, in the genus *Œnothera*) in the extine. [B, 229 (a, 35).]

INTIMA (Lat.), n., f. of adj. *intimus*, innermost. I^{2}n'ti^2-ma^3. The innermost tunic of any structure. [a, 45.]—**I. pia.** Ger., *innere Lage der Pia.* The innermost layer of the pia. [L, 31 (a, 29).]—**I. unguis.** The root of the nail. [a, 29.]—**I. vasorum.** The lining membrane of blood-vessels. [a, 29.]

INTIMUM (Lat.), n., n. of adj. *intimus.* I^{2}n'ti^{2}m-u^{3}m(u^{4}m). The interior part of anything. [a, 29.]

INTODISCALIS (Lat.), adj. I^{2}n-to(to^2)-di^{2}sk-a(a^3)'li^{2}s. Fr., *intodiscal.* Of Lestiboudois, situated (of stamens, inserted) within the disc. [B, 1 (a, 24).]

INTOLERANCE, n. I^{2}n-to^{2}l'e^2-r'ns. Lat., *intolerantia* (from *intolerans*, that can not bear). Inability to endure the effects of an agent (*e. g.*, a drug).—**I. of light.** See PHOTOPHOBIA.

INTONATION, n. I^{2}n-to-na'shu^{3}n. From *intonare*, to thunder. 1. The production of a tone. 2. The quality of a tone.—**Intestinal i.** Lat., *intonatio intestinalis.* See BORBORYGMUS.

INTORSION, n. I^{2}n-to^{2}r'shu^{3}n. Lat., *intorsio* (from *intorquere*, to twist). Fr., *i.* The bending or twisting of a part of a plant in any direction other than the apparently natural one. [B, 1 (a, 24).]

INTORTUS (Lat.), adj. I^{2}n-to^{2}rt'u^{3}s(u^{4}s). Ger., *einwärtsgedreht, abgedreht.* Of a plant or plant-organ, twisted upon itself. [B, 19, 123 (a, 24).]

INTOXICATION, n. I^{2}n-to^{2}x-i^2-ka'shu^{3}n. From *in*, intens., and *toxicare*, to poison. Fr., *i., ivresse* (2d def.). Ger., *I., Intoxikation, Berauschung, Trunkenheit* (2d def.). 1. A condition of systemic poisoning due to the absorption into the blood of any agent which overwhelms the mental or bodily functions. 2. I. (1st def.) produced by alcohol. [D. 3.]—**Alcoholic i.** Fr., *i. alcoolique.* See *I.* (2d def.).—**Arsenical i.** Poisoning with arsenic.—**Cholæmic i.** See CHOLÆMIA.—**Chronic alcoholic i.** Of Marcet, chronic alcoholism. [D.]—**Ferment i.** The absorption into the system and consequent toxic effect of the fermenting contents of a cystic tumor. ["N. Y. Med. Jour.," April 28, 1888, p. 453 (a. 40).]—**I. hydatique** (Fr.). I. (1st def.) by the liquid of a hydatid cyst. Injected under the skin, it was found by Debove to produce urticaria in healthy persons, and when effused into the tissues in large amount, as after puncture of a cyst, dyspnœa, collapse, and even death. [a, 18.]—**I. putride** (Fr.). I. (1st def.) by products of decomposition. [A. 396 (a, 21).]—**Mercurial i.** Fr., *i. mercurielle.* Ger., *Quecksilberi'.* Constitutional poisoning by mercury, salivation. [a, 14.] Cf. *Mercurial* CACHEXIA.—**Saturnine i.** Fr., *i. saturnine.* See *Lead* POISONING and *Lead* CACHEXIA.—**Septicæmic i., Septic i.** See SEPTICÆMIA.—**Uræmic i.** See URÆMIA.

INTRA-ABDOMINAL, adj. I^{2}n-tra^3-a^{2}b-do^{2}m'i^2-n'l. Lat., *intra-abdominalis.* Fr., *i.-a.* Situated in the abdominal cavity.

INTRA-ARACHNOID, adj. I^{2}n-tra^3-a^{2}r-a^{2}k'noid. From *intra*, within, and ἀραχνώδης (see ARACHNOID). Fr., *intra-arachnoïdien.* Situated within the arachnoid cavity. [L, 49 (a, 14).]

INTRA-ARTERIAL, adj. I^{2}n-tra^3-a^{3}r-te'ri^2-a^{2}l. From *intra*, within, and ἀρτηρία, an artery. Fr., *intra-artériel.* Situated within an artery or within the arterial system. [a, 45.]

INTRA-ARTICULAR, adj. I^{2}n-tra^3-a^{3}rt-i^{2}k'u^2-la^{3}r. From *intra*, within, and *articulus*, a joint. Fr., *intra-articulaire.* Situated within a joint.

INTRACAPSULAR, adj. I^{2}n-tra^3-ka^{2}p'su^{2}l-a^{3}r. From *intra*, within, and *capsula*, a capsule. Fr., *intra-capsulaire.* Situated within a capsule, especially of a joint. [L, 49 (a, 14); a, 45.]

INTRACARDIAC, adj. I^{2}n-tra^3-ka^{3}rd'i^2-a^{2}k. From *intra*, within, and καρδία, the heart. Fr., *intra-cardiaque.* Situated within the cavity of the heart. [L, 49 (a, 14).]

INTRACARPELLARY, adj. I^{2}n-tra^3-ka^{3}rp'e^{2}l-a-ri^2. From *intra*, within, and καρπός, a fruit. Produced among or interior to the carpels. [B, 308 (a, 35).]

INTRACARTILAGINOUS, adj. I^{2}n-tra^3-ka^{3}rt-i^{2}l-a^{2}j'i^{2}n-u^{3}s. From *intra*, within, and *cartilago*, cartilage. Fr., *intracartilagineux.* Situated or occurring within the substance of cartilage. [J.]

INTRACELLULAR, adj. I^{2}n-tra^3-se^{2}l'u^{2}l-a^{3}r. From *intra*, within, and *cellula*, a small cell. Fr., *intraprotoplasmique.* Ger., *i.* Contained or occurring within a cell. [J.]

INTRACEREBRAL, adj. I^{2}n-tra^3-se^{2}r'e^{2}b-r'l. From *intra*, within, and *cerebrum* (*q. v.*). Fr., *i.-cérébral.* Situated or occurring within the cerebrum.

INTRACERVICAL, adj. I^{2}n-tra^3-su^{5}r'vi^2-k'l. From *intra*, within, and *cervix*, the neck. Fr., *i.-c.* Situated within the canal of the cervix uteri. [L, 44, 49 (a, 14).]

INTRACILIARY, adj. I^{2}n-tra^3-si^{2}l'i^2-a-ri^2. From *intra*, within, and *cilium*, an eyelash. Situated within the ciliary region. [a, 29.]

INTRACISOR (Lat.), n. m. I^{2}n-tra^3-siz(kes)'o^{2}r. Gen., *-or'is.* From *intra*, within, and *cædere*, to cut. A hæmostatic forceps with a roughened bite so arranged that the intima of the artery is crushed or cut, thus obviating the necessity of a ligature. [a. 40.]

INTRACOSTALIS (Lat.), n. m. I^{2}n-tra^3-ko^{2}st-a(a^3)'li^{2}s. From *intra*, within, and *costa*, a rib. An internal intercostal muscle. ["Med. Record," July 30, 1887 (L).]

INTRACRANIAL, adj. I^{2}n-tra^3-kran'i^2-a^{2}l. From *intra*, within, and *cranium* (*q. v.*). Situated or occurring within the skull. [a, 14.]

INTRACRESCENT, adj. I^{2}n-tra^3-kre^{2}s'se^{2}nt. From *intra*, within, and *crescere*, to grow. Fr., *i.* Of corals, growing more upon the internal than upon the external surface. [Cassini (L, 41).]

INTRACRURÆUS (Lat.), n. m. I^{2}n-tra^3-kru^2(kru)-re'(ra^3'e^2)-u^{2}s(u^{4}s). From *intra*, within, and *cruræus* (*q. v.*). See VASTUS *internus.*

INTRACUTANEOUS, adj. I^{2}n-tra^3-ku^2-ta'ne-u^{3}s. From *intra*, within, and *cutaneus*, cutaneous. Situated, placed, or occurring within the substance of the skin. [a, 14.]

INTRACYSTIC, adj. I^{2}n-tra^3-si^{2}st'i^{2}k. From *intra*, within, and κύστις, a bladder. Fr., *intracystique.* 1. Situated or occurring within a cyst. 2. See INTRAVESICAL.

INTRADERMIC, adj. I^{2}n-tra^3-du^{5}rm'i^{2}k. From *intra*, within, and δέρμα, the skin. See INTRACUTANEOUS.

INTRADILATED, adj. I^{2}n-tra^3-di-lat'e^{2}d. Lat., *intradilatatus* (from *intra*, within, and *dilatare*, to dilate). Fr., *intradilaté.* Ger., *inwendig* (oder *innerlich*) *ausgedehnt.* Dilated within. [B, 1 (a, 24); a, 45.] Cf. INTERDILATATUS.

INTRADURAL, adj. I^{2}n-tra^3-du^2'r'l. From *intra*, within, and *dura* (*q. v.*). Situated or occurring within the dura.

INTRA-EPIDERMAL, INTRA-EPIDERMIC, adj's. I^{2}n-tra^3-e^{2}p-i^2-du^{5}r'm'l, -mi^{2}k. From *intra*, within, ἐπί, upon, and δέρμα, the skin. Fr., *intraépidermique.* Ger., *intraëpidermal.* Situated within the substance of the epidermis. [J.]

INTRA-EPITHELIAL, adj. I^{2}n-tra^3-e^{2}p-i^2-thel'i^2-a^{2}l. From *intra*, within, and *epithelium* (*q. v.*). Within an epithelium. [J.]

INTRAFASCICULAR, adj. I^{2}n-tra^3-fa^{2}s-i^{2}k'u^2-la^{3}r. Lat., *intrafascicularis* (from *intra*, within, and *fasciculus* [*q. v.*]). Fr., *intrafasciculaire.* Situated within a fascicle. [a, 24.]

INTRA-FÉBRILE (Fr.), adj. A^{2}n^2-tra^3-fa-brel. From *intra*, within, and *febris*, a fever. Occurring during fever.

INTRAFŒTATION, n. I^{2}n-tra^3-fe-ta'shu^{3}n. Lat., *intrafœtation* (from *intra*, within, and *fœtus* [*q. v.*]). Fr., *i.* Ger., *Intrafötation.* See *Fœtal* INCLUSION.

INTRAFOLIACEOUS, INTRAFOLIAR, INTRAFOLIATE, adj's. I^{2}n-tra^3-fol-i^2-a'shu^{3}s, -fol'i^2-a^{3}r, -fol'i^2-at. Lat., *intrafoliaceus, intrafoliaris, intrafoliatus* (from *intra*, within, and *folium*, a leaf). Fr., *intrafolié.* Ger., *über einem Blatte stehend.* Placed within the axil of a leaf. [B, 1, 19, 123 (a, 24).]

INTRA-HEPATIC, adj. I^{2}n-tra^3-he^{2}p-a^{2}t'i^{2}k. From *intra*, within, and ἡπατικός, belonging to the liver. Fr., *intra-hépatique.* Situated or occurring within the liver.

INTRAJUGULAR, adj. I^{2}n-tra^3-ju^{2}g'u^2-la^{2}r. From *intra*, within, and *jugulum*, the collar-bone. Fr., *intra-jugulaire.* Situated within or internal to the jugular process, vein, or foramen. [a, 29.]

INTRALIGAMENTOUS, adj. I^{2}n-tra^3-li^{2}g-a^{2}m-e^{2}nt'u^{3}s. From *intra*, within, and *ligamentum*, a ligament. Fr., *intra-ligamenteux.* Situated or occurring within a ligament, especially beween the folds of the broad ligament of the uterus.

INTRALINGUAL, adj. I^{2}n-tra^3-li^{2}n^2'gw'l. From *intra*, within, and *lingua*, the tongue. Fr., *i.* Situated in the substance of the tongue.

INTRALOBULAR, adj. I^{2}n-tra^3-lo^{2}b'u^2-la^{3}r. From *intra*, within, and λοβός, a lobe. Fr., *intra-lobulaire.* Situated or occurring within a lobule (as of the liver).

INTRAMARGINAL, adj. I^{2}n-tra^3-ma^{3}rj'i^2-n'l. From *intra*, within, and *margo*, a margin. Situated within the margin. [α, 14.]

INTRAMEDULLARY, adj. I^{2}n-tra^3-me^{2}d'u^{3}l-a-ri^2. From *intra*, within, and *medulla*, the marrow of bones. Fr., *intra-médullaire.* Situated within the medulla. [L, 41 (α, 29).]

INTRAMEMBRANOUS, adj. I^{2}n-tra^3-me^{2}m'bra^{2}n-u^{3}s. From *intra*, within, and *membrana*, a membrane. Fr., *intra-membraneux.* Ger., *intra-membranös.* Situated or occurring within the substance of a membrane. [J.]

INTRAMENINGEAL, adj. I^{2}n-tra^3-me^{2}n-i^{2}n'je^2-a^{2}l. From *intra*, within, and μῆνιγξ, a membrane. Fr., *intraméningéal.* Situated or occurring within the meninges.

INTRAMOLECULAR, adj. I^{2}n-tra^3-mo-le^{2}k'u^2-la^{3}r. From *intra*, within, and *moles*, a shapeless mass. Occurring within the molecules. [B, 229 (α, 24).] See *I.* RESPIRATION.

INTRAMURAL, adj. I^{2}n-tra^3-mu^2'r'l. From *intra*, within, and *murus*, a wall. 1. Situated or occurring within the wall of a hollow organ. 2. Of interments, occurring within the limits of a municipality.

INTRAMUSCULAR, adj. I^{2}n-tra^3-mu^{3}s'ku^2-la^{3}r. From *intra*, within, and *musculus*, a muscle. Fr., *intramusculaire.* Ger., *intramusculär.* Situated or occurring within the substance of a muscle or a muscular fibre. [J.]

INTRANUCLEAR, adj. I^{2}n-tra^3-nu^2'kle^2-a^{3}r. From *intra*, within, and *nucleus* (*q. v.*). Fr., *intranucléaire.* Contained within a nucleus. [J.]

INTRA-OCULAR, adj. I^{2}n-tra^3-o^{2}k'u^2-la^{3}r. From *intra*, within, and *oculus*, the eye. Fr., *intra-oculaire.* Ger., *i.* Situated or occurring within the eye.

INTRA-ORBITAL, adj. I^{2}n-tra^3-o^{2}rb'i^2-t'l. From *intra*, within, and *orbita*, the orbit. Fr., *intra-orbitaire.* Situated or occurring within the orbit.

INTRA-OSSEOUS, adj. I^{2}n-tra^3-o^{2}s'e^2-u^{3}s. From *intra*, within, and *os*, a bone. Fr., *intra-osseux.* Situated or occurring within the substance of bone.

INTRAPARENCHYMATOUS, adj. I^{2}n-tra^3-pa^{2}r-e^{2}n-ki^{2}m'-a^{2}t-u^{3}s. From *intra*, within, and παρέγχυμα, anything poured in beside. Fr., *intraparenchymateux.* Ger., *intraparenchymatös.* Situated between the proper elements of a tissue. [J.]

INTRAPARIETAL, adj. I^{2}n-tra^3-pa-ri'e^2-t'l. From *intra*, within, and *paries*, a wall. Fr., *i.-pariétal.* See INTRAMURAL (1st def.).

INTRAPELVIC, adj. I^{2}n-tra^3-pe^{2}lv'i^{2}k. From *intra*, within, and *pelvis* (*q. v.*). Fr., *intra-pelvien.* Ger., *intrapelvisch.* Situated or occurring in the pelvic cavity.

INTRAPERITONEAL, adj. I^{2}n-tra^3-pe^{2}r-i^2-to^{2}n-e'a^{2}l. From *intra*, within, and περιτόναιον, the peritonæum. Fr., *intrapéritonéal.* Situated or occurring within the peritoneal cavity.

INTRAPETALOUS, adj. I^{2}n-tra^3-pe^{2}t'a^{2}l-u^{3}s. From *intra*, within, and πέταλον, a leaf. Within the petals (said of organs enveloped by the corolla). [α, 35.]

INTRAPETIOLAR, adj. I^{2}n-tra^3-pe^{2}t-i'o^{2}l-a^{3}r. Lat., *intrapetiolaris* (from *intra*, within, and *petiolus*, a little petiole). Fr., *intrapétiolaire.* Surrounded by the base of the petiole (said of buds). [B, 77, 123 (α, 24).]

INTRAPLACENTAL, adj. I^{2}n-tra^3-pla-se^{2}n't'l. From *intra*, within, and *placenta* (*q. v.*). Situated within or extending into the placenta.

INTRAPLEURAL, adj. I^{2}n-tra^3-plu^2'r'l. From *intra*, within, and πλευρά (see PLEURA). Situated or occurring within the pleural cavity.

INTRAPROTOPLASMIC, adj. I^{2}n-tra^3-pro-to-pla^{2}z'mi^{2}k. From *intra*, within, πρῶτος, first, and πλάσμα, plasma. Fr., *intra-protoplasmique.* Ger., *intraprotoplasmisch.* See INTRACELLULAR.

INTRAPULMONARY, adj. I^{2}n-tra^3-pu^{3}l'mo^{2}n-a-ri^2. From *intra*, within, and *pulmo*, the lung. Fr., *intrapulmonaire.* Situated or occurring within or forced into the lung. [L, 41 (α, 14).]

INTRARECTUS [E. Coues] (Lat.), n. m. I^{2}n-tra^3-re^{2}kt'u^{3}s(u^{4}s). From *intra*, within, and *rectus*, straight. See RECTUS *oculi internus.*

INTRARHACHIDIAN, adj. I^{2}n-tra^{3}r-ra^{2}k-i^{2}d'i^{2}a^{2}n. From *intra*, within, ῥάχις, the spine, and εἶδος, resemblance. See INTRASPINAL.

INTRARIOUS, adj. I^{2}n-tra'ri^2-u^{3}s. Lat., *intrarius.* Fr., *intraire* [L. C. Richard]. Ger., *im Innern liegend.* Lying within (said of the embryo when inclosed by the endosperm). [B, 1, 123 (α, 35).]

INTRASCROTAL, adj. I^{2}n-tra^3-skro't'l. From *intra*, within, and *scrotum* (*q. v.*). Situated or occurring within the scrotum.

INTRASPINAL, adj. I^{2}n-tra^3-spi'n'l. From *intra*, within, and *spina*, the spine. Fr., *i.* Situated or occurring within the spinal canal.

INTRASTAMINAL, adj. I^{2}n-tra^3-sta^{2}m'i^2-n'l. Lat., *intrastamineus* (from *intra*, within, and *stamen* [*q. v.*]). Situated within the stamens. [B, 123 (α, 24).]

INTRATESTICULAR, adj. I^{2}n-tra^3-te^{2}st-i^{2}k'u^2-la^{3}r. From *intra*, within, and *testiculus*, a testicle. Fr., *intratesticulaire.* Situated or occurring within the testicle.

INTRATHORACIC, adj. I^{2}n-tra^3-thor-a^{2}s'i^{2}k. From *intra*, within, and θώραξ, the chest. Fr., *intrathoracique.* Situated or occurring within the cavity of the thorax.

INTRATUBAL, adj. I^{2}n-tra^3-tu^2'b'l. From *intra*, within, and *tuba*, a trumpet. Situated or occurring within a tube, especially the oviduct.

INTRATYMPANIC, adj. I^{2}n-tra^3-ti^{2}m-pa^{2}n'i^{2}k. From *intra*, within, and τύμπανον, the tympanum. Fr., *intratympanique.* Situated, placed, or occurring within the tympanum.

INTRA-URETHRAL, adj. I^{2}n-tra^3-u^2-reth'r'l. From *intra*, within, and οὐρήθρα, the urethra. Situated, placed, or occurring within the urethra.

INTRA-UTERINE, adj. I^{2}n-tra^3-u^2'te^{2}r-i^{2}n. From *intra*, within, and *uterus* (*q. v.*). Fr., *intra-utérin.* Ger., *intra-uterin.* 1. Situated within or penetrating into the cavity of the body of the uterus. 2. Occurring before birth.

INTRAVAGINAL, adj. I^{2}n-tra^3-va^{2}j'i^2-n'l. From *intra*, within, and *vagina* (*q. v.*). Fr., *i.* Situated or occurring within or penetrating into the vagina. [L, 44, 49 (α, 14).]

INTRAVALVULAR, adj. I^{2}n-tra^3-va^{2}lv'u^2-la^{3}r. From *intra*, within, and *valva*, the leaf of a door. Within the valves (said of the sæptum in the pod of the *Cruciferæ*). [B, 19 (α, 35).] See INTERVALVULAR.

INTRAVASATION, n. I^{2}n-tra^{2}v-a^2-sa'shu^{3}n. From *intra*, within, and *vas*, a vessel. The entrance of pus or other foreign matter into the blood-vessels through pathological or traumatic openings in their walls. [α, 40.]

INTRAVASCULAR, adj. I^{2}n-tra^3-va^{2}s'ku^2-la^{3}r. From *intra*, within, and *vasculum*, a small vessel. Fr., *intravasculaire.* Ger., *intravasculär.* Situated or occurring within or forced into the vessels.

INTRAVENOUS, adj. I^{2}n-tra^3-ven'u^{3}s. From *intra*, within, and *vena*, a vein. Fr., *intraveineux.* Ger., *intravenös.* Situated or occurring within or thrown into the veins. [α, 14.]

INTRAVENTRICULAR, adj. I^{2}n-tra^3-ve^{2}n-tri^{2}k'u^2-la^{3}r. From *intra*, within, and *ventriculus*, a ventricle. Fr., *intra-ventriculaire.* Situated or occurring within a ventricle.

INTRAVERTEBRAL, adj. I^{2}n-tra^3-vu^{5}rt'e^{2}b-r'l. From *intra*, within, and *vertebra* (*q. v.*). See INTRASPINAL.

INTRAVERTEBRATED, adj. I^{2}n-tra^3-vu^{5}rt'e-brat-e^{2}d. From *intra*, within, and *vertebratus*, articulated. Fr., *intravertébré.* Of G. St.-Hilaire, furnished with a vertebral column. [L, 180 (α, 39).]

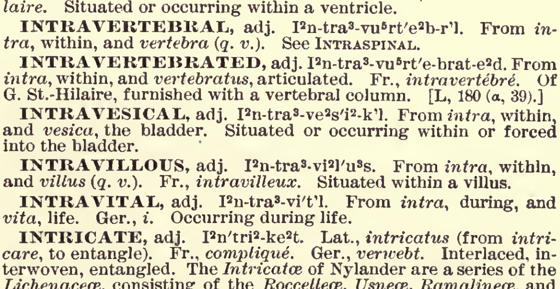
INTRAVESICAL, adj. I^{2}n-tra^3-ve^{2}s'i^2-k'l. From *intra*, within, and *vesica*, the bladder. Situated or occurring within or forced into the bladder.

INTRAVILLOUS, adj. I^{2}n-tra^3-vi^{2}l'u^{3}s. From *intra*, within, and *villus* (*q. v.*). Fr., *intravilleux.* Situated within a villus.

INTRAVITAL, adj. I^{2}n-tra^3-vi't'l. From *intra*, during, and *vita*, life. Ger., *i.* Occurring during life.

INTRICATE, adj. I^{2}n'tri^2-ke^{2}t. Lat., *intricatus* (from *intricare*, to entangle). Fr., *compliqué.* Ger., *verwebt.* Interlaced, interwoven, entangled. The *Intricatæ* of Nylander are a series of the *Lichenaceæ*, consisting of the *Roccelleæ*, *Usneæ*, *Ramalineæ*, and *Cetrarieæ*. [B, 19, 123, 170 (α, 24).]

INTRICATION, n. I^{2}n-tri^2-ka'shu^{3}n. From *intricare*, to entangle. The process of rendering or becoming or the state of being intricate.



INTRICATURA (Lat.), n. f. I^{2}n-tri^2(tre)-ka^{2}t(ka^{3}t)-u^2(u)'ra^3. From *intricare*, to entangle. Ger., *Verwickelung.* 1. An interlacing or interweaving. 2. A matting or entanglement of the hair. [L, 50, 107 (α, 14).]—**I. nervorum opticum.** See CHIASMA.

INTRINSECI (Lat.), n. m. pl. I^{2}n-tri^{2}n'se^2-si(ke). Of Linnæus, diseases of the internal organs. [α, 40.]

INTRINSIC, adj. I^{2}n-tri^{2}n'si^{2}k. Lat., *intrinsecus.* Fr., *intrinsèque.* Ger., *innerlich.* Springing from within, not of external origin; of a muscle, having both its origin and its insertion in or on a single organ.

INTRITUM (Lat.), n. n. I^{2}n-tri(tre)'tu^{3}m(tu^{4}m). From *interere*, to rub into. A substance rubbed in. [L, 50 (α, 14).]

INTROCESSION, n. I^{2}n-tro-se^{2}sh'u^{3}n. From *introcedere*, to enter. A sinking in or depression of a part. [α, 41.]

a, CHAMBERS'S STEM AND INTRODUCER; *b*, ARNOLD'S TENT INTRODUCER; *c*, BARNES'S TAMPON INTRODUCER.

INTRODUCER, n. I^{2}n-tro-du^{2}s'u^{5}r. From *introducere*, to lead into. An instrument for inserting anything.

INTRODUCTION, n. I^{2}n-tro-du^{3}k'shu^{3}n. Lat., *introductio* (from *introducere*, to lead into). Fr., *i.* Ger., *Einführung.* The act of inserting anything.

INTROFLEXED, adj. I^{2}n-tro-fle^{2}xt'. Lat., *introflexus* (from *intro*, inwardly, and *flectere*, to bend). Fr., *introfléchi.* Ger., *einwärtsgebogen.* Curved inward. [B, 19, 123 (α, 24).] See INFLEXED.

INTROITUS (Lat.), n. m. I^{2}n-tro(tro^3)'i^{2}t-u^{3}s(u^{4}s). Gen., *-tro'itus.* From *introire*, to go in. The entrance or mouth of a canal or cavity. [L, 50 (α, 14).]—**I. canalis sacralis.** The opening at the termination of the spinal canal at the lower end of the sacrum. [L, 115 (α, 29).]—**I. laryngis.** The upper opening of the larynx. [α, 29.]—**I. pelvis.** See *Pelvic* INLET.—**I. vaginæ.** Fr., *entrée du vagin* (ou *vaginale*). Ger., *Scheideneingang.* The external orifice of the vagina.

INTROMISSION, n. I^{2}n-tro-mi^{2}sh'u^{3}n. From *intromittere*, to send in. Fr., *i.* Ger., *Einschiebung.* An act of insertion, especially of the penis into the vagina. [L, 49.]

INTROMITTENT, adj. I^{2}n-tro-mi^{2}t'e^{2}nt. Serving for intromission.

INTROPELVIMÈTRE (Fr.), n. A^{2}n^2-tro-pe^{2}l-ve-me^{2}tr'. From *intro*, internally, *pelvis* (*q. v.*), and μέτρον, a measure. See *Internal* PELVIMETER.

INTRORSE, adj. I^{2}n-tro^{2}rs'. Lat., *introrsus* (from *intro*, inwardly, and *versus*, turned). Fr., *i.* Of an anther, turned toward the axis. [B, 1, 77, 123 (α, 24).] Cf. EXTRORSE.

INTRORSION (Fr.), n. A^{2}n^2-tror-si^2-o^{2}n^2. The act of turning inward; of C. Robin, the embryological process of invagination of the mesoderm and the endoderm by which follicles, etc., are formed. [A, 385.]

INTROSUSCEPTIO (Lat.), n. f. I^{2}n-tro(tro^3)-su^{3}s(su^{4}s)-se^{2}p-(ke^{2}p)'shi^2(ti^2)-o. Gen., *-on'is.* From *intro*, inwardly, and *suscipere*, to catch up. Intussusception; in Young's classification of diseases, a genus of the *Ectopiæ.* [L, 50, 290 (α, 14): α, 45.]

INTROVEINED, adj. I^{2}n-tro-vand'. Characterized by introvenium. [α, 41.]

INTROVENIUM (Lat.), n. n. I^{2}n-tro(tro^3)-ve(wa)'ni^2-u^{3}m(u^{4}m). From *intro*, internally, and *vena*, a vein. The condition of having the veins hidden (said of plant organs in which the veins are so buried in parenchyma as to be hardly visible externally). [B, 121 (α, 35).]

INTROVERSION, n. I^{2}n-tro-vu^{5}r'zhu^{3}n. From *intro*, inwardly, and *vertere*, to turn. Ger., *Einwärtskehrung.* The process of rendering or becoming or the state of being sunken in or dimpled (said of the wall of a hollow organ).

INTRUSE, INTRUSIVE, adj's. I^{2}n-tru^{2}s', -tru^{2}s'i^{2}v. Lat., *intrusus* (from *intrudere*, to thrust in). Pushed inward (said, for instance, when the base of a fruit is so concave that the pericarp is apparently pushed inward by the stem at its point of attachment). [B, 19 (α, 35).]

INTSIA (Lat.), n. f. I^{2}nt'si^2-a^3. The genus *Afzelia.* [B, 121 (α, 35).]—**I. amboinensis.** A species found on the islands of the Indian Archipelago. The bark is used in diarrhœa, dysentery, and leucorrhœa. [B, 180 (α, 24).]

INTUBATION, n. I^{2}n-tu^2-ba'shu^{3}n. From *in*, into, and *tubus*, a tube. Fr., *tubage.* Ger., *I.* See CATHETERISM.—**I. of the larynx.** Fr., *tubage du larynx.* O'Dwyer's method of introducing into the larynx and trachea metallic tubes of suitable shape and size, for the relief of obstruction of respiration in this part of the respiratory tract. [J. O'Dwyer, "N. Y. Med. Jour.," Aug. 8, Nov. 28, 1885, p. 145 (α, 40).]—**Nasal i.** The introduction of metallic and soft-rubber tubes of proper shape and size into the nares for fracture, hæmorrhage, etc., as proposed by Goodwillie in 1887. [α, 40.]

INTUBUM (Lat.), n. n. I^{2}n'tu^{2}b(tu^{4}b)-u^{3}m(u^{4}m). Gr., ἔντυβον. Of Pliny, see INTYBUM.

INTUBUS (Lat.), n. m. I^{2}n'tu^{2}b(tu^{4}b)-u^{3}s(u^{4}s). See INTYBUS.

INTUITION, n. I^{2}n-tu^2-i^{2}sh'u^{3}n. From *intueri*, to look at. The process of rapid and more or less unconscious reasoning by which a person may arrive at the comprehension of an intricate subject.

INTUMESCENCE, n. I^{2}n-tu^2-me^{2}s'e^{2}ns. Lat., *intumescentia* (from *intumescere*, to swell). Fr., *i.* Ger., *Intumescenz, Anschwellung.* Swelling, tumefaction.—**Brachial i.** See *Cervical* ENLARGEMENT.—**Lumbo-sacral i.** See *Lumbar* ENLARGEMENT.

INTUMESCENTIA (Lat.), n. f. I^{2}n-tu^2(tu^4)-me^{2}s-se^{2}n(ke^{2}n)'-shi^2(ti^2)-a^3. See INTUMESCENCE and ENLARGEMENT. The *Intumescentiæ*, in Cullen's classification of diseases, are an order of the *Cachexiæ.* [L, 104.]—**I. cervicalis.** See *Cervical* ENLARGEMENT.—**I. gangliformis** (seu **gangliofomis**) **nervi facialis** (seu **vestibuli**) (**Scarpæ**). A small, grayish-red swelling containing numerous ganglion cells situated at the point of connection between the facial nerve and the vestibular branch of the auditory nerve, near where the latter enters the internal auditory meatus. [F; Schwalbe (α, 29).]—**I. gangliosa nervum tympanicum ambiens.** An enlargement upon the tympanic branch of the glossopharyngeal nerve, supposed to be the remains of a fœtal artery. [α, 40.]—**I. lactea mammarum.** Distention of the breasts with milk.—**I. lienis.** Swelling of the spleen.—**I. lumbalis.** See *Lumbar* ENLARGEMENT.—**I. maligna.** See AGRIOPHYMA.—**I. medullæ spinalis cervicalis.** See *Cervical* ENLARGEMENT.—**I. medullæ spinalis inferior** (seu **lumbalis**). See *Lumbar* ENLARGEMENT.—**I. medullæ spinalis superior.** See *Cervical* ENLARGEMENT.—**I. plana nervi trigemini, I. semilunaris.** See *Gasserian* GANGLION.

INTURIS (Lat.), n. m. I^{2}n-tu^2(tu)'ri^{2}s. The genus *Capparis.* [B, 121 (α, 35).]

INTUSSUSCEPTION, n. I^{2}n-tu^{3}s-su^{3}s-se^{2}p'shu^{3}n. Lat., *intussusceptio* (from *intus*, within, and *suscipere*, to catch up). Fr., *i.* Ger., *Intussuszeption.* 1. See INCEPTION, IMBIBITION, and ABSORPTION. 2. The growth of cells or of the cell-wall by the deposition of molecules between those already existing. [B, 1, 229 (α, 24); J.] 3. The invagination of one portion of an organ, especially the intestine, into a contiguous portion, usually below it. [E.] 4. In chemistry, the taking in of new matter into a compound. [A, 12.]—**Agonal i.** An i. (3d def.) occurring during the death-struggle. [Eichhorst (A, 319 [α, 21]).]—**Ascending i.** See *Retrograde i.*—**Descending i.** See *Progressive i.*—**Progressive i.** An i. in which the upper portion of the intestine is invaginated in the lower part. [A, 319 (α, 40).]—**Regressive i., Retrograde i.** The form of i. in which the lower portion of the intestine is invaginated in the upper portion. [A, 319 (α, 40).]—**Uterine i.** Introversion of the uterus.

INTUSSUSCEPTUM (Lat.), n. n. I^{2}n-tu^{3}s(tu^{4}s)-su^{3}s(su^{4}s)-se^{2}p-(ke^{2}p)'tu^{3}m(tu^{4}m). The segment of intestine which is invaginated in intussusception. [E.]

INTUSSUSCIPIENS (Lat.), n. f. I^{2}n-tu^{3}s(tu^{4}s)-su^{3}s(su^{4}s)-si^{2}p-(ki^{2}p)'i^2-e^{2}nz(ans). Gen., *-ent'is.* The invaginating portion of the bowel in intussusception. [E.]

INTYBUM (Lat.), n. n. I^{2}n'ti^{2}b(tu^{6}b)-u^{3}m(u^{4}m). Gr., ἔντυβον. Of the ancients, the *Cichorium intybus.* [B, 315 (α, 35).]

INTYBUS (Lat.), n. m. I^{2}n'ti^{2}b(tu^{6}b)-u^{3}s(u^{4}s). Gr., ἔντυβον. The *Cichorium i.* [B, 78 (α, 14).]—**I. angustus.** The *Lactuca virosa.* [B, 180 (α, 24).]—**I. hortensis** (seu **sativus**). The *Cichorium endivia.* [B, 180 (α, 24).]—**Semen intybi.** The fruit of *Cichorium i.* [B, 180 (α, 24).]

INUL, n. I^{2}n'u^{2}l. See INULA *helenium.*

INULA (Lat.), n. f. I^{2}n'u^2(u^4)-la^3. Gr., ἑλένιον. Fr., *inule, aulnée, aunée.* Ger., *Alant* (1st def.), *Alantwurzel* (2d def.). 1. Of Linnæus, a genus of the *Inuleæ* (Fr., *inulées*), tribe *Inuloideæ.* The former are: Of Cassini, the 12th tribe of the *Synanthereæ* (*Compositæ*). The *Inulaceæ* of Presl are a division of the *Compositæ*, consisting of *Pulicaria, Gnaphalium*, and *Filago.* 2. Of the U. S. Ph., elecampane-root (see also *I. helenium*). 3. The ancient Latin name for *I. helenium.* [B, 1, 5, 19, 34, 42, 114, 121, 173, 180 (α, 24, α, 35).]—**Common i.** See *I. helenium.*—**I. aspera.** The *I. salicina*, var. *β, latifolia.* [B, 214.]—**I. bifrons.** A species found in Southern Europe, formerly used in an antodontalgic mixture called *Paraguay-roux.* [B, 180 (α, 24]).—**I. britanica, I. britannica.** Ger., *gemeiner Alant, Wiesenalant.* The κόνυζα τρίτη of Dioscorides; a species found throughout continental Europe, Persia, and Siberia, but not, according to De Candolle, in Great Britain, its name being derived from βριτάνικη [Dalechamp]. Its properties are like those of *I. viscosa.* The flowers have been substituted for those of *Arnica montana.* [B, 173, 180 (α, 24).]—**I. canadensis.** The *Erigeron canadense.* [B, 173 (α, 24).]—**I. canariensis.** See *I. crithmoides.*—**I. chinensis.** A species found about China, having stimulant, tonic, antispasmodic, sedative, and stomachic properties, and used in hæmoptysis, colic, etc. The juice, or the coarsely powdered herb, is applied to carbuncles, buboes, deaf ears, and sore eyes. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 39).]—**I. conyza.** See CONYZA *squarrosa.*—**I. conyzæa.** The *Pulicaria dysenterica.* [B, 180 (α, 35).]—**I. conyzoides.** Of Desfontaines, the *Pulicaria odora.* [B, 214 (α, 35).]—**I. crispa.** Fr., *aulnée* (ou *aunée*, ou *inule*) *crépue.* 1. Of Persoon and Desfontaines, the *Pulicaria crispa.* 2. Of Siebthorpe, the *Pulicaria undulata.* [B, 214; B, 42, 173 (α, 24).]—**I. crithmifolia, I. crithmoides.** Ger., *meerfenchelähnlicher Alant.* Golden samphire; a species found on rocky coasts of the Atlantic Ocean in Europe, and along the Mediterranean Sea. It contains much sodium carbonate, and was formerly used as a diuretic. [B, 64, 180, 275 (α, 24).]—**I. cylindrica.** See PULICARIA *vulgaris.*—**I. dumetorum.** The *Pulicaria odora.* [B, 214.]—**I. dysenterica.** The *Pulicaria dysenterica.* [B, 214.]—**I. germanica.** Ger., *deutscher Alant.* 1. Of De Candolle, a white-flowered variety of *I. squarrosa.* 2. Of Linnæus, a species the herb of which has a strong, rather unpleasant odor, and was once official in European medicine as *herba inulæ germanicæ* (seu *inulæ palatinæ*). [B, 64, 180, 214, 309 (α, 35).]—**I. gnaphaloides.** See PULICARIA *crispa.*—**I. graveolens.** Ger., *starkriechender Alant.* A species found in Southern Europe, having properties like those of *I. viscosa.* [B, 180 (α, 24).]—**I. helenium.** Fr., *aillaune, aunée, inule, aromate germanique, enula campana, œil de cheval, panacée de Chiron.* Ger., *Alant, Brustalant, Helenenkraut, Glockenwurz.* Elf- (or else-) dock, horse-elder, elecampane; a species indigenous to Europe and naturalized in the United States. The root, the ἑλένιον of the Greeks, or elecampane-root (*q. v.*), contains a volatile oil that is powerfully expectorant, also inulin, and helenin. [B, 5, 77, 173, 180, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxx (α, 39).]—**I. hirta.** Ger., *steifhaariger Alant.* A species found in Europe and Siberia, sometimes mistaken for *Arnica montana.* [B, 64, 180 (α, 24).]—**I. oculus Christi.** Ger., *Christauge.* Christ's eye, hoary fleabane; a species found

INULA HELENIUM. [A, 327.]

in Austria. [B, 64, 275 (*a*, 24).]—**I. odora.** See PULICARIA *odora.* —**I. oetteliana.** See *I. britanica.*—**I. pulicaria.** The *Pulicaria dysenterica.* [B, 42, 180 (*a*, 35).]—**I. salicina.** A species found in the mountainous parts of Europe. The flowers were formerly used like arnica flowers, and the root, *radix bubonii lutei*, was sometimes used medicinally. [B, 180 (*a*, 24), 214.]—**I. saxatilis.** Of Lamarck, the *Jasonia glutinosa.* [B, 214 (*a*, 35).]—**I. spiræifolia.** A form of *I. squarrosa*, with a thick corymb terminating the stem. [B, 64 (*a*, 35).]—**I. squarrosa.** See CONYZA *squarrosa.* —**I. uliginosa.** The *Pulicaria vulgaris.* [B, 214.]—**I. undulata.** The *Pulicaria undulata.* [B, 214.]—**I. viscosa.** Ger., *klebriger Alant.* The *κονίζα μεγάλη*, of Dioscorides, formerly used in colic, dysmenorrhœa, dysuria, and epilepsy, and as an external application to snake-bites and tumors. [B, 180 (*a*, 24).]—**Oleum inulæ compositum** [Sp. Ph., 1798]. Fr., *huile d'aunée composée.* A preparation made by mixing 3 parts each of elecampane root, valerian root, the root of *Lappa major*, *Hypericum*, *Artemisia abrotanum*, *Artemisia absinthium*, *Melissa calamintha*, *Balsamita odorata*, sweet marjoram, round-leaved mint, savine, sage, and elder, 2 parts each of chamomile, melilotus, and *Lavandula stœchas*, 6 each of bay-leaves, the leaves of *Sambucus ebulus*, rosemary, and rue, 1 part each of cumin, fenugreek, and seeds of *Urtica pilulifera*, and 192 parts of olive-oil, macerating, and boiling till all moisture is expelled. [B, 119.]—**Radix inulæ** [Dan. Ph., Swed. Ph.] (**helenii**). The root of *I. helenium.* [B, 95.]—**Unguentum inulæ.** Fr., *onguent d'aunée.* Syn.: *unguentum enulæ* (seu *enulatum*). An ointment made by boiling together 16 parts of elecampane rhizome, 8 of lard, and 4 of olive-oil, and adding 1 part each, of yellow wax and turpentine [Brunsw. Ph., 1777, Würtemb. Ph. 1798]; or by melting together 512 parts of oleum inulæ compositum, 128 of yellow wax, 32 of lard, and adding 11 of liquid styrax and 6 of mastic [Sp. Ph., 1798.] Used in scabies. [B, 119.]

INULIC ACID, n. I²n'u²l-i²k. Alantic acid. [B.]

INULIN, n. I²n'u²l-i²n. From *inula*, elecampane. Fr., *inuline.* Ger., *I.* Syn.: *alantin.* A carbohydrate, $nC_6H_{10}O_5$, analogous to starch occurring in the roots of several of the *Compositæ* (*Inula helenium*, *Arnica montana*, *Taraxacum*, etc.). It dissolves in hot water, from which, on cooling, it is precipitated unchanged as a white powder. Its solution rotates polarized light to the left, and on fermentation, continued ebullition, or treatment by acids, it yields lævulose. It also differs from starch in turning yellow, not blue, with iodine. [B, 4, 5, 93.]

INULOID, n. I²n'u²l-oid. Fr., *inuloïde.* A substance, $C_6H_{10}O_5 + H_2O$, allied to inulin, but much more readily soluble in water. It is found in the roots of composite plants. [B, 18 (*a*, 24).]

INULOL, n. I²n'u²l-o²l. Alant camphor. [B, 8.]

INUNCANS (Lat.), adj. I²n-u³n²(u⁴n²)'ka²nz(ka³ns). From *inuncare*, to hook. Fr., *accrochant.* Covered with little hooked hairs (said of the surface of leaves). [B, 1, 19 (*a*, 24).]

INUNCTION, n. I²n-u³n²k'shu³n. Lat., *inunctio* (from *inunguere*, to anoint). Ger., *I.*, *Einsalbung*, *Einschmierung*, *Einfettung.* The act of rubbing in ointment; friction with the hand to facilitate the cutaneous absorption of liniments, salves, etc. [L, 30, 50, 107 (*a*, 14).]—**Mercurial i.** See HYDRARGYRENTRIPSIS.

INUNCTUS (Lat.), adj. I²n-u³n²k(u⁴n²k)'tu³s(tu⁴s). From *inunguere*, to anoint. Ger., *ölglänzend.* Shining as if smeared with oil (said of leaves, etc.). [B, 123 (*a*, 24).]

INUNDATE, INUNDATED, adj's. I²n'u³n-dat, -dat-e²d. Lat., *inundatus* (from *inundare*, to overflow). Fr., *inondé.* Ger., *überschwemmt.* Flooded (said of plants growing on places sometimes covered with water and sometimes dry). The *Inundatæ* of Linnæus are an order comprising the *Naiadeæ*, *Halorageæ*, etc. [B, 121 (*a*, 35); B, 123 (*a*, 24).]

INUNGUIS (Lat.), adj. I²n-u³n²(u⁴n²)'gwi²s. From *in* neg., and *unguis*, a nail. Having no nails, as in the *Gecko i.* [L, 180 (*a*, 39).]

INUSTION, n. I²n-u³st'yu³n. Lat., *inustio* (from *inurere*, to burn in). 1. A burning in; deep cauterization. 2. A caustic. 3. The heat of inflammation. [A, 322; L, 107.]

INUSTORIUM (Lat.), n. n. I²n-u³s(u⁴s)-to'ri²-u³m(u⁴m). See CAUTERY.

INUSTUM (Lat.), n. n. I²n-u³s(u⁴s)'tu³m(tu⁴m). See BURN.

INVAGINATE, INVAGINATED, adj's. I²n-va²j'i²n-at, -ate²d. From *in*, into, and *vagina*, a scabbard. 1. Sheathed. 2. Affected with intussusception. [L, 343.]

INVAGINATION, n. I²n-va²j-i²n-a'shu³n. Lat., *invaginatio.* Fr., *i.* Ger., *I.*, *Einscheidung.* A folding in of anything upon itself (see INTUSSUSCEPTION), in embryology, that stage of a (mammalian) blastoderm in which it is so folded in upon itself as to form two layers. [A, 23.]—**Agonale I.** (Ger.). See *Agonal* INTUSSUSCEPTION. —**Darmi'** (Ger.). See INTUSSUSCEPTION.—**Embolic i.** The process in the segmentation of the ovum which consists in one half of the blastosphere being pushed in toward the other half so as to form a gastrula. [L, 353 (*a*, 40).]—**Entzündliche I.** (Ger.). Inflammatory intussusception. [Eichhorst (A, 319 [*a*, 21]).]—**Epibolic i.** The growth of the epiblast around the hypoblast in the formation of the gastrula of the embryo. [L, 356 (*a*, 39).]—**I. of a hernial sac.** The i. of the dependent end of a hernial sac by a tent or compress, with intent to secure inflammatory adhesion and obliteration of the sac. [*a*, 40.]—**Permanente I.** (Ger.), **Vital i.** I. of the intestine made permanent by inflammatory adhesion of the serous surfaces. [A, 319 (*a*, 40).]

INVAGINATOR, n. I²n-va²j'i²n-a-to²r. A cylinder or instrument of any kind used for invaginating the sac in operations for the radical cure of hernia. [*a*, 40.]

INVALESCENCE, n. I²n-va²l-e²s'e²ns. Lat., *invalescentia* (from *invalescere*, to become strong). See CONVALESCENCE.

INVALID, n. I²n'va²l-i²d. Lat., *invalidus.* Fr., *invalide.* Ger., *I.* A person who is out of health.

INVALIDING, n. I²n'va²l-i²d-i²n². The act of putting a person off duty on account of ill-health.

INVALIDISM, n. I²n'va²l-i²d-i²z'm. Fr., *invalidisme.* Ger., *Invalidität.* The state of being an invalid.

INVASION, n. I²n-va'zhu³n. Lat., *invasio* (from *invadere*, to invade). Fr., *i.* Ger., *I.*, *Einfall*, *Anfall.* 1. The onset of a disease. 2. The process by which a particular organ or part becomes affected with disease or parasites existing elsewhere in the organism.

INVENOSE, adj. I²n-ven'os. Lat., *invenosus* (from *in* neg., and *vena*, a vein. Fr., *inveiné.* Ger., *venenlos*, *aderlos.* Without veins or nerves (said of leaves). [B, 1 (*a*, 24).]

INVERECUNDUS (Lat.), adj. I²n-ve²r(we²r)-e²(a)-ku³n(ku⁴n)'-du³s(du⁴s). From *in* neg., and *verecundus*, feeling shame. Fr., *effronté*, *impudent.* Ger., *unverschämt*, *schamlos.* See PUDIC.

INVERLEITHEN, n. I²n'vu⁵r-leth-e²n. A place in Scotland, where there is a spring containing sodium chloride and free carbonic acid. [L, 49 (*a*, 43).]

INVERMINATION, n. I²n-vu⁵r-mi²n-a'shu³n. From *in*, into, and *vermis*, a worm. The acquisition of intestinal worms.

INVERSE, adj. I²n-vu⁵rs'. Fr., *i.* See INVERTED.

INVERSIO (Lat.), n. f. I²n-vu⁵r(we²r)'si²-o. Gen., *-o'nis.* See INVERSION.—**I. palpebrarum.** See ENTROPION.—**I. testium.** See INVERSION *of the testicles.*—**I. uteri.** See INVERSION *of the uterus.*—**I. vaginæ.** Prolapse of the vagina. [A, 326 (*a*, 21).]—**I. viscerum.** See TRANSPOSITION *of the viscera.*—**I. vesicæ.** See CYSTANASTROPHE.—**I. vesicæ urinariæ fissæ.** See EXSTROPHY *of the bladder.*

INVERSION, n. I²n-vu⁵r'zhu³n. Gr., *ἀναστροφή.* Lat., *inversio* (from *invertere*, to turn upside down). Fr., *i.*, *renversement.* Ger., *I.*, *Umstülpung*, *Umkehrung*, *Invertirung*, *Einwärtskehrung.* It., *inversione.* Sp., *inversión.* 1. A reversal of the natural order of things, especially a turning upside down. 2. In optics, the transformation of a body having a specific rotary action on the plane of polarization into a body or bodies which have a directly opposite rotary action. [B.] 3. Of a hollow organ, its partial or complete turning inside out.—**Acute i. of the uterus.** Fr., *i. utérine récente.* The rapid or recent, partial or complete, invagination of the upper portion of the uterus through the lower. [*a*, 40.]—**Chronic i. of the uterus.** Ger., *veraltete I. der Gebärmutter.* I. of the uterus of long standing.—**Complete i. of the uterus.** Lat., *inversio uteri completa.* Fr., *prolapsus de l'utérus renversé.* Ger., *vollkommene Umstülpung der Gebärmutter.* That degree of i. of the uterus in which the fundus uteri escapes through the os uteri externum.—**General i.** See TRANSPOSITION *of the viscera.* —**Incomplete i. of the uterus.** Lat., *inversio uteri incompleta.* Ger., *unvollkommene Umstülpung der Gebärmutter.* Syn.: *partial i.* Any degree of i. of the uterus short of complete i. (*q. v.*)— **I. of the bladder.** See CYSTANASTROPHE.—**I. of the canal of the cervix uteri.** See ECTROPION *of the cervix* (or *os*) *uteri.*—**I. of the eyelashes.** A malposition of the eyelashes so that they rub against the cornea. [*a*, 29.]—**I. of the testicles.** Lat., *inversio testium.* That change of the attitude of the testicles in which the free edges turn inward instead of forward. [A, 326 (*a*, 21).]—**I. of the uterus.** Lat., *inversio uteri.* Fr., *i. utérine*, *renversement de l'utérus.* Ger., *Umstülpung der Gebärmutter.* A partial or complete turning of the uterus inside out. [A; A, 326 (*a*, 21).]—**I. of the viscera.** See TRANSPOSITION *of the viscera.*—**I. of the eyelid.** See ENTROPION.—**Splanchnic i.** Fr., *i. splanchnique.* See TRANSPOSITION *of the viscera.*—**Uterine i.** See *I. of the uterus.*—**Veraltete I. der Gebärmutter** (Ger.). See *Chronic i. of the uterus.*—**Vesical i.** See CYSTANASTROPHE.

INVERSUS (Lat.), adj. I²n-vu⁵r(we²r)'su³s(su⁴s). From *invertere*, to turn in. See INVERTED.

INVERTEBRAL, INVERTEBRATE, adj's. I²n-vu⁵rt'e²-br'l, -brat. Lat., *invertebratus* (from *in*, neg., and *vertebra* [*q. v.*]). Fr., *invertébré.* Ger., *wirbellos.* Having no vertebral column. The *Invertebrata* are animals so characterized. [B, 28 (*a*, 27); L, 343.]

INVERTED, adj. I²n-vu⁵rt'e²d. Lat., *inversus* (from *invertere*, to turn upside down). Fr., *inverse.* Ger., *umgekehrt*, *verkehrt*, *gestürzt.* 1. Turned in the opposite direction to the usual one, as in an ovary with its apex directed downward. [B, 1, 77, 123 (*a*, 24).] 2. Turned inside out.

INVERTENS (Lat.), adj. I²n-vu⁵r(we²r)'te²nz(tans). From *invertere*, to turn upside down. Fr., *invertent*, *rabattu* (1st def.). Ger., *niederhängend* (1st def.), *umändernd* (2d def.). 1. Of De Candolle, hanging downward (said of leaves, *invertentia folia*, which during sleep hang downward, but touch by their upper surfaces). [B, 1, 19 (*a*, 24).] 2. Of remedies, changing the character of disease, also acting as antacids. [L, 50 (*a*, 14).]

INVERTIN, n. I²n'vu⁵rt-i²n. From *invertere*, to turn upside down. Fr., *invertine.* Ger., *I.* A ferment extracted from yeast by means of alcohol. According to C. Bernard, it also occurs in the intestinal juice. It is an amorphous, colorless body, soluble in water and highly pyretogenic. It was supposed by Bernard to convert cane-sugar into lævulose, but more recently it has been found not to affect starch or dextrin solutions. [K, 26; "Sem. méd.," Nov. 13, 1889 (*a*, 18); "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 39).]

INVERTIRUNG (Ger.), n. I²n-fe²rt-er'un². See INVERSION.

INVESTING, adj. I²n-ve²st'i²n². From *in*, in, and *vestire*, to clothe. Covering, inclosing.

INVESTITURE, INVESTMENT, n's. I²n-ve²st'i²t-u²r, -me²nt. Lat., *investitura.* Ger., *Umkleidung.* A covering or sheath. [L, 50 (*a*, 14).]—**Capsular i.** A capsule or a structure re-

sembling or having the function of a capsule. [L.]—**Fibrous i. of the suprarenal capsule.** An i. consisting of an outer loose part and an inner part which is very closely adherent to the capsule. It is made up of connective tissue, the deeper layers of which contain unstriped muscle fibres. It is continuous with the sæpta which run into and help to form the substance of the organ. [C.] —**Myeline i.** See *Medullary* SHEATH.

INVETERATE, adj. I^{2}n-ve^{2}t'e^{2}r-at. Gr., χρόνιος (from χρόνος, time). Lat., *inveteratus* (from *inveterare*, to render old). Fr., *invétéré*. Ger., *eingewurzelt, hartnäckig.* Of long duration and difficult to overcome. [*a*, 45.]

INVIRILITY, n. I^{2}n-vi^2-ri^{2}l'i^{2}t-i^2. From *in* neg., and *virilitas*, manhood. Absence of virility. [L, 56.]

INVISCANS (Lat.), adj. I^{2}n-vi^{2}s(wi^{2}s)'ka^{2}nz(ka^{3}ns). From *inviscare*, to smear with birdlime). Fr., *inviscant.* Ger., *eindickend.* Thickening. [L, 41, 50 (*a*, 14).]

INVISCATED, adj. I^{2}n-vi^{2}s'kat-e^{2}d. From *inviscare*, to smear with birdlime. Thickened.

INVISCATION, n. I^{2}n-vi^{2}s-ka'shu^{3}n Lat., *inviscatio.* 1. A rendering thick and sticky. [L, 50 (*a*, 14).] 2. See INSALIVATION.

INVIUS (Lat.), adj. I^{2}n'vi^2(wi^2)-u^{3}s(u^{4}s). From *in* neg., and *via*, a way. In botany, see IMPERVIOUS.

INVOLUCEL, n. I^{2}n-vo^{2}l'u^2-se^{2}l. Lat., *involucellum* (dim. of *involucrum*). Fr., *involucelle.* Ger., *Hüllchen.* In compound inflorescences, a partial, secondary, or inner involucre subtending the partial clusters. [B, 1, 77, 123 (*a*, 24).]

INVOLUCELLATE, adj. I^{2}n-vo^{2}l-u^2-se^{2}l'at. Lat., *involucellatus.* Fr., *involucellé.* Provided with an involucel. [B, 1 (*a*, 24).]

INVOLUCELLUM (Lat.), n. n. I^{2}n-vo^{2}l(wo^{2}l)-u^2(u)-se^{2}l(ke^{2}l)'-lu^{3}m(lu^{4}m). See INVOLUCEL.

INVOLUCRAL, adj. I^{2}n-vo^{2}l-u^{2}k'r'l. Lat., *involucralis.* Pertaining to an involucre or involucrum. [B, 1, 19, 123 (*a*, 24).]

INVOLUCRATE, adj. I^{2}n-vo^{2}l-u^{2}k'rat. Lat., *involucratus.* Fr., *involucré.* Ger., *gehüllt.* Provided with an involucre. [B, 1, 19, 123 (*a*, 24).]

INVOLUCRE, n. I^{2}n-vo-lu^2'k'r. Gr., εἴλυμα. Lat., *involucrum* (from *involvere*, to roll to anything). Fr., *i.* Ger., *Hülle, Decke.* A spiral collection of bracts around a flower or flower cluster ; also the annulus of some *Fungi* and the cup-shaped external indusia of some ferns. [B, 1, 19, 123 (*a*, 24).]—**Compound i.** Fr., *i. composé.* An i., as in the *Compositæ*, composed of several rows of leaflets. [B, 77, 104 (*a*, 24).]—**Simple i.** Fr., *i. simple.* An i. composed of one row of bracts. [B. 104 (*a*, 24).]—**General i.** The i. at the base of an umbel in contradistinction to an involucel. [B, 77 (*a*, 24).]—**Partial i., Secondary i.** See INVOLUCEL.

INVOLUCRIFORMIS (Lat.), adj. I^{2}n-vo^{2}l(wo^{2}l)-u^2(u)-kri^2-fo^{2}rm'i^{2}s. From *involucrum* (*q. v.*), and *forma*, form. Fr., *involucriforme.* Of Cassini, resembling an involucre (said of the periclinium). [B, 1 (*a*, 24).]

INVOLUCRUM (Lat.), n. n. I^{2}n-vo^{2}l(wo^{2}l)-u^2(u)'kru^{3}m(kru^{4}m). 1. See INVOLUCRE. 2. The sheath of new-formed bone formed about a sequestrum of necrosed bone.—**Crassum et durum i. oculi.** See SCLERA.—**Involucra cerebri.** Ger., *Hirnhäute.* The cerebral meninges. [L, 50 (*a*, 14).]—**I. cordis.** See PERICARDIUM. —**I. corporis vitrei.** See RETINA.—**I. hepatis.** The outer covering of the liver, by Petréquin separated into two portions, the serosa and the tunica propria or fibrosa. [L, 31 (*a*, 29).]—**I. linguæ.** The mucous membrane of the tongue. [L, 332 (*a*, 29).]—**I. membranaceum.** Fr., *involucre membraneux.* Of Albinus, the decidua reflexa. [A, 45.]—**I. nativum.** The skin. [G.]—**I. nerveum corporis vitrei.** See RETINA.—**I. nervorum.** See PERINEURIUM.—**I. renis succenturiati.** See *Fibrous* INVESTMENT *of the suprarenal capsule.*—**I. reti comparatum.** An obsolete term for the retina. [F.]

INVOLUMENTUM (Lat.), n. n. I^{2}n-vo^{2}l(wo^{2}l)-u^2(u)-me^{2}nt'-u^{3}m(u^{4}m). See INVOLUCRE.

INVOLUNTARY, adj. I^{2}n-vo^{2}l'u^{3}n-ta-ri^2. Lat., *involuntarius* (from *in* neg., and *voluntas*, the will). Fr., *involontaire.* Ger., *unwillkürlich.* Occurring independently of or against the will.

INVOLUTANS (Lat.), adj. I^{2}n-vo^{2}l(wo^{2}l)-u^{2}t(ut)'a^{2}nz(a^{3}ns). From *involvere*, to roll to anything. Fr., *enveloppant.* Ger., *einwickelnd, einhüllend.* Surrounding (said of leaves which apply themselves to the stem during sleep). [B, 1 (*a*, 24).]

INVOLUTE, adj. I^{2}n-vo-lu^{2}t'. Lat., *involutus, involutivus* (from *involvere*, to roll to anything). Fr., *entortillé, involuté, involutif.* Ger., *eingerollt, eingewickelt.* Rolled inward, like the leaf of the apple-tree. [B, 1, 19, 77, 123 (*a*, 24).]

INVOLUTIFOLIUS (Lat.), adj. I^{2}n-vo^{2}l(wo^{2}l)-u^{2}t(ut)-i^2-fol-(fo^{2}l)'i^2-u^{3}s(u^{4}s). Having the leaves folded inward from summit to base. [L, 107 (*a*, 43).]

INVOLUTION, n. I^{2}n-vo^{2}l-u^2'shu^{3}n. Lat., *involutio.* Fr., *i.* Ger., *I., Rückbildung.* It., *involuzione.* Sp., *involución.* 1. A condition or process in which nutrition is incomplete, and in which the original form and function are more or less lost. 2. In embryology, a folding in of a membranous structure, as of the epiblast, as a step in the process of the development of the embryo. 3. The process of retrograde development, especially of the uterus in the puerperium or of the organs in general in old age. [A, 326 (*a*, 21) ; D, 3.]—**Buccal i.** In the embryo, the folding in of the epiblast at the angle formed by the cranial flexure which forms the cavity of the mouth. [Balfour (*a*, 39).]—**I. of the uterus.** Fr., *retrait de l'utérus, i. utérine.* The gradual return of the uterus to its normal size after delivery.—**Pituitary i.** In the embryo, the ingrowth from the epiblast of the mouth cavity which forms the pituitary body. [Balfour (*a*, 39).]—**Senile i.** Senile atrophy.

INVOLUTIVE, adj. I^{2}n-vo^{2}l-u^{2}t'i^{2}v. Lat., *involutivus.* Fr., *involutif.* See INVOLUTE.

INVOLVENS (Lat.), adj. I^{2}n-vo^{2}l(wo^{2}l)'ve^{2}nz(wans). From *involvere*, to roll to anything. Fr., *involvant.* Ger., *einwickelnd, einhüllend.* 1. Involving, enveloping (said, for example, of the close-fitting scales or bracts at the base of the calyx tube in most of the pinks). [B, 123 (*a*, 24).] 2. Demulcent. [A, 322.]

INWENDIG (Ger.), adj. I^{2}n've^{2}ndi^{2}g. See INTERANEUS.

INYLOMA (Lat.), n. n. I^{2}n(en)-i^{2}l(u^{6}l)-o'ma^3. A more correct form of *inohyloma* (*q. v.*).

INYMENITIS (Lat.), n. f. I^{2}n(en)-im(u^{6}m)-e^{2}n(an)-i(e)'ti^{2}s. A more correct form of *inohymenitis* (*q. v.*).

INZUCHT (Ger.), n. I^{2}n'tsuch^{2}t. In-breeding. [L, 30 (*a*, 14).]

IOD (Ger.), n. E-od'. See IODINE and JOD.

IODACETATE, n. I-o^{2}d-a^{2}s'e^{2}t-at. Fr., *iodacétate.* A salt of iodacetic acid. [B, 98 (*a*, 14).]

IODACETIC ACID, n. I-o^{2}d-a^{2}s-et'i^{2}k. Lat., *acidum jodoaceticum.* Fr., *acide iodacétique* (ou *iodoacétique*). Ger., *Jodessigsäure.* 1. An acid derived from acetic acid by the substitution of iodine for hydrogen. Three of these substitution componnds are possible : (1) *Moniodacetic acid*, often called simply i. a., $C_2H_3IO_2$; (2) *Diiodacetic acid*, $C_2H_2I_2O_2$; (3) *Triicodacetic acid*, $C_2HI_3O_2$. 2. A pharmaceutical term for a saturated solution of iodine in glacial acetic acid ; used for the same purposes as chloracetic acid. [Bernatzik (A, 319) ; B.]

IODACETONE, n. I-o^{2}d-a^{2}s'e^{2}t-on. A compound, C_3H_5IO, formed from acetone by the substitution of iodine for hydrogen. [B, 2.]

IODACETYL, n. I-o^{2}d-a^{2}s'e^{2}t-i^{2}l. Acetyl iodide. [*a*, 38.]

IODAL, n. I'o^{2}d-a^{2}l. Hydride of triiodacetyl, $C_2I_3O.H$, a body having the same constitution as chloral with iodine substituted for chlorine, and produced by the action of iodine on a mixture of 95-per-cent. alcohol and nitric acid. It boils at 25° C., and, when heated with potassium, forms iodoform and formic acid. [B ; B, 46, 93 (*a*, 39, *a*, 14).]

IODALDEHYDE, n. I-o^{2}d-a^{2}l'de-hid. A substitution compound of acetic aldehyde and iodine. The moniodo-compound, C_2H_3IO, and the triiodo-compound (*iodal*) C_2HI_3O. are known. [B, 2.]

IODALLYL ALCOHOL, n. I-o^{2}d-a^{2}l'i^{2}l. An alcohol, $C_3H_4I.OH$, crystallizing in needles melting at 160° C. [B, 3 (*a*, 38).]

IODALLYLENE, n. I-o^{2}d-a^{2}l'i^{2}l-en. A substance, C_3H_3I, obtained by the action of an aqueous solution of iodine and potassium iodide on allylene, and occurring as a liquid of penetrating odor, strongly attacking the eyes and mucous membranes. It boils at 98° C. [B, 3 (*a*, 38).]—**I. diiodide.** A substance, $C_3H_3I_3$ obtained by shaking up silver allylide with ethereal solution of iodine until decolorization stops, then doubling the iodine and allowing to stand till the iodine color disappears. It forms long acicular crystals. [B, 3 (*a*, 38).]

IODAMYLE (Fr.), n. E-o-da^3-mel. See AMYL *iodide.*

IODAMMONIUM (Ger.), n. E'od-a^{2}m-mo-ne-um. Ammonium iodide. [*a*, 38.]

IODANILINE (Fr.), n. E-o-da^3-ne-len. A crystallizable substance, C_6H_6NI, of vinous odor and burning taste, easily soluble in alcohol, ether, and oil, nearly insoluble in water, obtained by dissolving iodine in aniline. There are two isomeric forms, fusible at 25° to 60° C. respectively. [B, 38, 93 (*a*, 14).]

IODANTIFEBRINE, n. I-o^{2}d-a^{2}nt-i^2-fe^{2}b'ren. From ἰώδης (see IODINE), ἀντί, against, and *febris*, fever. A compound of iodine and acetanilide. It is slightly soluble in cold alcohol, ether, or water, and readily soluble in hot alcohol or glacial acetic acid. Experiments prove that it is not absorbed in the slightest degree by the alimentary canal. ["Therap. Gaz.," May 15, 1891, p. 324 (*a*, 40).]

IODANTIPYRINE, n. I-o^{2}d-a^{2}nt-i^{2}p''i^{2}r-en. From ἰώδης (see IODINE), ἀντί, against, and πῦρ, feverish heat. Iodphenyldimethylpyrazolone ; a compound of iodine and antipyrine. It crystallizes in colorless, shining prismatic needles, is tasteless and odorless, and is only slightly soluble in alcohol or water unless hot. [E. Manzer, "Prag. med. Woch." ; "Therap. Gaz.," May 15, 1891, p. 324 (*a*, 40).]

IODATE, n. I'o^{2}d-at. Lat., *iodas.* Fr., *i.* Ger., *jodsaures Salz.* It., *iodato.* A salt of iodic acid. [B.]

IODATED, adj. I'o^{2}d-at-e^{2}d. Fr., *iodé.* Containing iodine. [L, 107.]

IODATUM (Lat.), n. n. I(i^2)-od-at(a^{3}t)'u^{3}m(u^{4}m). See IODIDE.

IODATUS (Lat.), adj. I(i^2)-od-at(a^{3}t)'u^{3}s(u^{4}s). Fr., *iodé.* 1. Iodized ; combined with iodine. In the Ger. Ph., when qualifying the name of an element or radicle, it designates the iodide of that element or radicle. Thus, *kalium iodatum* is potassium iodide. [B.] 2. Due to the action of iodine (*e. g.*, *acne iodata*).

IODAURATE, n. I-od-a^{4}r'at. From ἰώδης, violet-like, and *aurum*, gold. A compound of gold triiodide and the iodide of another element or radicle. [B.]

IODE (Fr.), n. E-od. See IODINE.—**Alcoolé d'i.** See *Tinctura* IODI.—**Chlorure d'i.** See IODINE *chloride.*—**Éthérolé d'i.** See *Tinctura* IODII *ætherea.*—**I.-méthyle.** See METHYL *iodide.*—**I. sublimé** [Fr. Cod.]. See IODUM *purissimum.*—**Pilules d'i.** See PILULÆ *iodatæ.*—**Pommade d'i.** See UNGUENTUM *iodatum.*—**Soluté d'i. ioduré** [Fr. Cod.]. See *Liquor* IODI *compositus.*—**Teinture d'i.** [Fr. Cod.]. See *Tinctura* IODI.—**Teinture éthérée d'i.** See *Tinctura* IODII *ætherea.*—**Trichlorure d'i.** See IODINE *trichloride.*

IODÉ (Fr.), adj. E-o-da. See IODATUS and IODIZED.

IODELAYL, n. I-o^{2}d-e^{2}l'a-i^{2}l. Fr., *iodélayle.* See Ethylene *diiodide.*

IODETHANE, n. I-o^{2}d-e^{2}th'an. Ethyl iodide (*q. v.*).

IODÉTHÉRIDE (Fr.), **IODÉTHÉROÏDE** (Fr.), n's. E-o-da-ta-red, -ta-ro-ed. Moniodoethylene. [B.] See Iodethylene.

IODETHYL, n. I-o^{2}d-e^{2}th'i^{2}l. Fr., *iodéthyle.* See Ethyl *iodide.*

IODETHYLENE, n. I-o^{2}d-e^{2}th'i^{2}l-en. Ger., *Jodäthylen.* A substitution product of ethylene in which iodine replaces an equivalent amount of hydrogen. *Moni'*, a colorless, oily liquid, CH_2 : CHI, is known. [B, 4.]

IODETUM (Lat.), n. n. I(i^2)-od-et(at)'u^{3}m(u^{4}m). An iodide.—**Glycerinum cum iodeto kalico** [Netherl. Ph.]. See *Glycerinum iodureti* potassii.—**I. ammonicum.** See Ammonium *iodide.* —**I. ferrosum.** Ferrous iodide. [a, 38.]—**I. hydrargyricum** [Netherl. Ph.] (**præcipitatum**). See Mercury *biniodide.*—**I. hydrargyrosum.** See Mercury *protiodide.*—**I. kalicum.** Potassium iodide. [a, 38.]—**I. plumbicum.** See Lead *iodide.*—**Pilulæ iodeti ferrosi** [Netherl. Ph., Norw. Ph., Swed. Ph.]. See *Pilulæ* ferri *iodidi.*—**Syrupus iodeti ferrosi** [Norw. Ph., Swed. Ph.]. See *Syrupus* ferri *iodidi.*—**Unguentum iodeti kalici** [Netherl. Ph., Norw. Ph., Swed. Ph.]. See *Unguentum* potassii *iodidi.*

IODEUX (Fr.), adj. E-o-du^6. Iodous. [a, 14.]

IODHYDRATE, n. I-o^{2}d-hid'rat. Fr., *i.* Ger., *Jodhydrat.* See Hydriodate and Hydriodide.

IODHYDRIC, adj. I-o^{2}d-hid'ri^{2}k. Fr., *iodhydrique.* See Hydriodic.—**I. acid.** See Hydriodic *acid.*—**I. ether.** See Iodethyl.

IODHYDRIN, n. I-o^{2}d-hid'ri^{2}n. A substitution-product of glyceryl alcohol (glycerin), in which one or more molecules of hydroxyl are replaced by iodine ; obtained by the action of hydrochloric acid on glycerin ; a syrupy liquid, soluble in alcohol and in ether. [B, 4 (a, 38).] See Moniodhydrin, Chloriodhydrin, and Diiodhydrin.

IODIC, adj. I-o^{2}d'i^{2}k. Lat., *iodicus.* Fr., *iodique.* Ger., *jod haltig, Jod-.* It., *iodico.* Sp., *iódico.* 1. Due to the use of iodine. 2. Derived from or containing iodine, more particularly, containing iodine in combination with oxygen, in greater relative amount than is the case with the iodous compounds. The *iodica* were the old pharmaceutical preparations of iodine, considered as a class. [B ; L, 107.]—**I. acid.** Fr., *acide iodique.* Ger., *Jodsäure.* A colorless, crystalline, monobasic acid, HIO_3, readily soluble in water ; prepared by the action of nitric acid on tincture of iodine, forming a series of salts called iodates. [B, 3 ; "Proc. of the Am. Pharm. Assoc.," x (a, 39).]—**I. oxide.** I_2O_5, the only known oxide of iodine. [B, 5 (a, 38).] See Iodine *pentoxide.*

IODID (Ger.), n. I^2-od-ed'. See Jodid.

IODIDE, n. I'od-i^{2}d(id). Lat., *iodidum, iodetum, ioduretum.* Fr., *i., iodure.* Ger., *Jodür, Jodid, Jod-* (in compos. with the name of the base), *-jodür* (in compos.). It., *ioduro.* Sp., *ioduro.* A compound of iodine with an element or radicle. [B.]—**Basic i.** Fr., *iodure basique.* Ger., *basisches Jodür.* Sp., *ioduro básico.* A compound of the iodide of an element or radicle with the oxide or hydroxide of the same element or radicle. [B.]—**I. arsénieux** (Fr.). See Arsenic *triiodide.*—**Saccharated ferrous i.** See Ferri *iodidum saccharatum.*

IODIDUM (Lat.), n. n. I(i^2)-od'i^{2}d-u^{3}m(u^{4}m). See Iodide.—**I. cadmicum.** See Cadmium *iodide.*—**I. hydrargyricum, I. hydrargyrosum.** See Mercury *iodide.*

IODIFÈRE (Fr.), adj. E-o-de-fe^{2}r. From ἰώδης, violet-like, and *ferre*, to bear. Containing or yielding iodine. [L, 41.]

IODINA (Lat.), n. f. I(i^2)-od-i(e)'na^3. 1. See Iodine. 2. A genus of the *Santalaceæ.* [B, 42.]—**I. rhombifolia.** A species growing in the Argentine Republic, where it is called *quebracho flojo.* The wood and bark are astringent. ["Proc. of the Am. Pharm. Assoc.," xxviii (a, 39).]

IODINE, n. I'od-en. From ἰώδης, violet-like. Ar., *ioud.* Lat., *iodum* [U. S. Ph., Br. Ph., Ger. Ph., Fr. Cod.], *iodinium, iodina* [U. S. Ph., 1870], *iodium* [Netherl. Ph.], *jodum* [Ger. Ph., Aust. Ph., Swiss Ph., Russ. Ph., Finn. Ph., Dan. Ph., Hung. Ph.], *jodium, jodina* [Gr. Ph.]. Fr., *iode.* Ger., *Jod.* It., *iodio, iodo.* Sp., *yodo.* A non-metallic element, discovered by Courtois in 1812. It occurs usually in grayish-black, prismatic or pyramidal crystals of metallic lustre, and peculiar, not very penetrating odor. It volatilizes at ordinary temperatures, giving off a violet-colored vapor. It melts between 113° and 115° C., and boils above 200° C. It dissolves in 5,500 parts of water, but is readily soluble in alcohol, ether, chloroform, or an aqueous solution of potassium iodide. It combines with hydrogen, forming hydriodic acid, and with the other non-metallic and the metallic elements, forming the iodides. In compounds it acts usually as a univalent radicle ; rarely it is trivalent. Sp. gr., 4·948. Atomic weight, 126·53 ; symbol, I. It is used medicinally in the form of an ointment and counter-irritant in local inflammations, the enlargement of glands, certain skin diseases, and for injecting into cystic and suppurating cavities. It is used also as an inhalant in chronic bronchitis, laryngitis, naso-pharyngeal catarrh, phthisis, and diphtheria. [B, 3 ; a, 40.]—**Churchill's i. caustic.** See *Liquor* iodi *causticus.*—**Colorless solution of i.** A solution of i. in an aqueous solution of resorcin, orcin, or phloroglucin. [Hlasiwetz, "Proc. of the Am. Pharm. Assoc.," xvi (a, 39).]—**Churchill's tincture of i.** See *Tinctura* iodi *fortior.*—**Colorless tincture of i.** Lat., *tinctura iodinii decolorata.* A preparation made by dissolving $1\frac{1}{2}$ oz. of i. in 13 fl. oz. of alcohol, adding 3 fl. oz. of strong aqua ammoniæ and allowing the mixture to stand for four weeks with occasional agitation. It may be diluted with water or glycerin. A quicker preparation may be made by using ammonia in excess, and then cautiously adding hydrochloric acid until the reaction is but slightly alkaline. [B, 5 (a, 38).] Cf. *Tinctura* jodi *decolorata.*—**Compound ointment of i.** [U. S. Ph.]. See *Unguentum* iodi.—**Compound solution of i.** [U. S. Ph.]. See *Liquor* iodi *compositus.*—**Compound tincture of i.** See *Tinctura* iodinii *composita.*—**Cones of i.** See *I. cones.*—**Decolorized tincture of i.** See *Tinctura* iodi *decolorata.*—**Hebra's i. caustic.** A solution of 1 part each of i. and potassium iodide in 2 parts of glycerin. [B, 81 (a, 21).]—**Inhalation of i.** [Br. Ph.]. See *Vapor* iodi.—**I. bromide.** Lat., *iodi bromidum.* Fr., *bromure d'iode.* Ger., *Jodbromür, Jodbromid.* A compound of bromine and i. I. monobromide, IBr, is a solid crystalline mass melting at 36° C., very soluble in alcohol, ether, or chloroform, less soluble in water. I. pentabromide, $I Br_5$, occurs as a dark-brown liquid. [B, 270 (a, 38).] —**I. chloride.** Fr., *chlorure d'iode.* Ger., *Chlorjod.* A compound of i. and chlorine. I. monochloride, ICl, and i. trichloride, ICl_3, are known. The existence of i. pentachloride is generally doubted. [B ; "Proc. of the Am. Pharm. Assoc.," xxiv (a, 39).]—**I. cigar.** Fr., *cigare d'iode.* Ger., *Jodcigarre.* A cigar made of tobacco soaked in an iodide of an alkaline metal (*e. g.*, potassium). [B, 270 (a, 38).]—**I. clyster.** Ger., *Jodklystier.* An enema consisting of 10 parts of tincture of i., 1 part of potassium iodide, and 250 parts of distilled water. [Bernatzik (A, 319 [a, 21]).]—**I. cones.** Pastilles containing i., powdered marshmallow, and potassium nitrate, made up with alcohol and water ; used as a fumigatory. ["Proc. of the Am. Pharm. Assoc.," x (a, 39).]—**I. disulphide.** See Sulphur *iodide.*—**I. green.** Ger., *Jodgrün.* A dye, $C_{20}H_{16}(CH_3)N_3.2CH_3I$, obtained by heating rosaniline with an excess of methyl iodide, occurring as green crystalline prisms soluble in alcohol. [B, 4, 270 (a, 38).]—**I. inhalation.** See *Vapor* iodi.—**I. liniment.** See *Linimentum* iodi.—**I. monobromide.** See under *I. bromide.*—**I. monochloride.** Fr., *monochlorure d'iode.* Ger., *Monochlorjod,* A crystalline substance, I Cl, melting at 25° C. to a reddish-brown liquid of oily consistence. It gives off irritating vapors. [B, 3.]—**I. ointment** [U. S. Ph.]. See *Unguentum* iodi.—**I. oxide.** Fr., *oxyde d'iode.* Ger., *Jodoxyd.* See *I. pentoxide.*—**I. paint.** A preparation made by dissolving 1 drachm of i. in a fl. oz. of alcohol, and evaporating to a syrupy consistence. [B, 5.]—**I. pentabromide.** See under *I. bromide.*—**I. pentoxide.** A white powder, I_2O_5, very soluble in water, forming by its solution in water iodic acid. [B, 3.]—**I.-plant.** A name for various species of *Algæ.* [B, 185, 275 (a, 24).]—**I. terbromide.** A preparation of i. and bromine, consisting of $37\frac{1}{2}$ parts of the latter for each 20 parts of i. [B, 81 (a, 38).] —**I. triacetate.** Ger., *essigsaures Jod, Jodtriacetat.* See Acetoiodous anhydride.—**I. trichloride.** Fr., *trichlorure d'iode.* A body, ICl_3, forming hygroscopic yellow crystals, emitting irritating vapors, and very readily decomposed. [B, 3 ; "N. Y. Med. Jour.," Feb. 4, 1888, p. 124.]—**I. violet.** Ger., *Jodviolett.* Hofmann's violet. [B.]—**Liniment of i.** [Br. Ph.]. See *Linimentum* iodi.—**Lugol's caustic i. solution.** Lat., *solutio iodi caustica Lugoli.* A preparation consisting of 1 part each of i. and potassium iodide dissolved in 2 parts of water. [B, 5.]—**Lugol's i. lotion.** A preparation consisting of from 2 to 4 grains of i. with double the quantity of potassium iodide, dissolved in a pint of water. [B, 5.]—**Lugol's rubefacient i. solution.** A preparation made by dissolving 1 part of i. and 2 parts of potassium iodide in 6 parts of water. [B, 5.]—**Natural i. wine.** Of Boinet, a wine prepared by fermenting grapes with intermediate layers of seaweed. ["Proc. of the Am. Pharm. Assoc.," x (a, 39).]—**Solution of i.** [Br. Ph.]. See *Liquor* iodi *compositus.*—**Test solution of i.** [U. S. Ph.] A clear solution of dark color, made by dissolving 1 part of i. in a mixture of 3 parts of potassium iodide and 50 parts of distilled water. [B, 5 (a, 38).]—**Tincture of i.** [U. S. Ph., Br. Ph.]. See *Tinctura* iodi.—**Volumetric solution of i.** [U. S. Ph.]. A solution made by dissolving 18 grammes of potassium iodide in 700 cubic centimetres of distilled water, adding 12·66 grammes of i., and water enough to make 1,000 cubic centimetres of solution. [B, 5 (a, 38).]

IODINED, adj. I'od-end. See Iodized.

IODINITE, n. I'od-en-it. From ἰώδης, violet-like. An ore containing i. in conjunction with silver. ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 39).]

IODINIUM (Lat.), n. n. I(i^2)-od-i^{2}n'i^2-u^{3}m(u^{4}m). See Iodine.—**Balneum iodinii.** A bath made (1) by triturating 3 to 5 drachms of iodine with 2 oz. of dry sand, and adding to the water used ; or (2) by dissolving 4 drachms of iodine and 4 fl. oz. of liquor potassæ in 2 pints of water, and adding water enough for a bath. [B, 199.]—**Liquor iodinii compositus** [U. S. Ph., 1870]. See *Liquor* iodi *compositus.* —**Tinctura iodinii** [U. S. Ph., 1870]. See *Tinctura* iodi.—**Tinctura iodinii composita** [U. S. Ph., 1870]. A preparation made by dissolving $\frac{1}{2}$ oz. of iodine and 1 oz. of potassium iodide in a pint of alcohol. It corresponds to the tinctura iodi of the Br. Ph. [B.] —**Tinctura iodinii decolorata.** See *Colorless tincture of* iodine. —**Unguentum iodinii (compositum)** [U. S. Ph., 1870]. See *Unguentum* iodi.

IODISED, adj. I'od-izd. See Iodized.

IODISM, n. I'od-i^{2}z'm. Lat., *iodismus.* Fr., *iodisme, cachexie iodée.* The train of symptoms, such as malaise, frontal headache, coryza, lacrymation, pharyngitis, acne, hydroa, etc., which follow the prolonged excessive use of iodine alone or in the form of iodides. [Bartholow (a, 40).]—**Constitutional i.** The third form of i., according to Rilliet, produced by the absorption of iodine or iodides in very minute quantities, whether taken as medicine or combined with table salt or inhaled in the form of sea air. It is characterized by nervous palpitations, excessive emaciations (sometimes preceded by increase of flesh), and progressive wasting of the mammæ and testes. [Bull (a, 40).]

IODITE, n. I'od-it. A salt of iodous acid. [a, 38.]

IODIUM [Netherl. Ph.] (Lat.), n. n. I(i^2)-od'i^2-u^{3}m(u^{4}m). See Iodine.—**Solutio iodii spirituosa** [Netherl. Ph.], **Tinctura iodii** [Belg. Ph.]. See *Tinctura* iodi.—**Tinctura iodii æetherea.** Fr., *éthérolé d'iode, éther ioduré, teinture éthérée d'iode.* A solution of 1 part of i. in 12 parts of sulphuric ether. [B, 119 a, 21).]

IODIZED, adj. I'od-izd. Lat., *iodatus.* Fr., *ioduré, iodé.* Ger., *jodirt.* Combined with or containing iodine. [B.]

IODMETHYL, n. I-o[2]d-me[2]th'i[2]l. See METHYL *iodide.*

IODOACETAMIDE, n. I-od-o-a[2]s-e[2]t'a[2]m-i[2]d(id). A one-atom iodine substitution-product. $C_2H_3IO.NH_2$, of acetamide, obtained by treating monochloracetamide with potassium iodide. [B, 2.]

IODOACETIC ACID, n. I''od-o-a[2]s-et'i[2]k. Fr., *acide iodoacétique.* See IODACETIC ACID.

IODOACETYLENE, n. I-od-o-a[2]s-e[2]t'i[2]l-en. A one-atom iodine substitution-product, $C_4H.I.$ of acetylene. It has a polymeric modification, dii', $C_4H_2I_2$. [B, 2.]

IODOARGENTATE, n. I-od-o-a[3]r'je[2]nt-at. Lat., *iodoargentas.* A salt produced by the combination of silver iodide with another metallic iodide. [B, 38 (a, 14).]

IODOAURATE, n. I-od-o-a[4]r'at. See IODAURATE.

IODOBENZOIC ACID, n. I-od-o-be[2]nz-o'i[2]k. Fr., *acide iodobenzoïque.* Ger., *Jodbenzoësäure, Jodobenzoësäure.* A monobasic crystalline acid, $C_6H_4I.CO.OH$, existing in three isomeric forms: 1. *Ortho-i. a.*, forming needles which melt at 157° C. 2. *Meti' a.*, occurring in needles melting at 187° C. 3. *Pari' a.*, forming scales melting at about 267° C. It is obtained by treating amidobenzoic acid with hydriodic acid. [B, 93 (a, 14), 158 (a, 38).]

IODOBORIC ACID, n. I-od-o-bor'i[2]k. Lat., *acidum iodoboricum.* Fr., *acide iodoborique.* Ger., *jodsaure Borsäure.* A combination of iodic and boric acids. [B, 38 (a, 14).]

IODOCALCIC, adj. I-od-o-ka[2]l'si[2]k. From ἰώδης, violet-like, and *calx*, lime. Fr., *iodocalcaire.* Containing salts of iodine and of calcium. [a, 14.] See *I.* SYRUP.

IODOCAMPHOR, n. I-od-o-ka[2]m'fo[2]r. A crystalline substance, $C_{10}H_{15}IO$, obtained by treating sodium camphor with cyanogen iodide, melting at about 44° C. [B, 3 (a, 38).] Cf. *Iodized* CAMPHOR.

IODOCAOUTCHINE (Fr.), n. E-o-do-ka[3]-ut-shen. From ἰώδης, violet-like, and *caoutchouc* (*q. v.*). A substance obtained by treating caoutchouc with iodine, soluble in alcohol and in ether. [L, 41, 49 (a, 14).]

IODOCHLORIDE, n. I-od-o-klor'i[2]d(id). Lat., *iodochloruretum.* Fr., *iodochlorure.* A compound of iodine and chlorine directly united to the same radicle. [B.]

IODOCINCHONINE, n. I-od-o-si[2]n[2]'kon-en. Fr., *i.* An amorphous yellow substance, $C_{20}H_{24}N_2O.I_2$, according to Pelletier, obtained by treating cinchonine with iodine. [B, 38, 93 (a, 14).]—**I. sulphate.** A crystalline salt occurring in long, four-sided acicular prisms, of deep ruby or garnet color; or in thin plates or long, flat, acicular prisms, transmitting a yellow light when thin, a reddish-brown light when thicker. [B, 5 (a, 38).]

IODOCINNAMIC ACID, n. I-od-o-si[2]n-a[2]m'i[2]k. A monobasic acid, $C_6H_4I.C_2H_2.CO.OH$, occurring in the three isomeric forms: 1. *Ortho-i. a.*, crystals melting at about 214° C. 2. *Meti' a.*, melting and decomposing at about 182° C. 3. *Pari' a.*, indistinct crystals decomposing without melting. [B, 3 (a, 38).]

IODOCODEINE, n. I-od-o-ko-de'en. Fr., *iodocodéine.* A crystallizable opium alkaloid, $C_{18}H_2NO_3I_3$, obtained by treating an alcoholic solution of codeine with a solution of iodine. [B, 38, 93 (a, 14).]

IODO-CONJUGUÉ (Fr.), adj. E-o-do-ko[2]n[2]-zhu[6]-ga. From ἰώδης, violet-like, and *conjugare*, to bind together. Containing iodine as an associated element. [B, 38.] Cf. AZOTURES *i.-c's.*

IODOCYANE (Fr.), n. E-o-do-se-a[2]n. Ger., *Jodcyan.* See CYANOGEN *iodide.*

IODOCYANIDE, n. I-od-o-si'a[2]n-i[2]d(id). Lat., *iodocyanuretum.* A double salt consisting of an iodide and a cyanide of the same base. [B.]

IODODICHLORHYDRIN, n. I-od-o-di-klor-hid'ri[2]n. A colorless, oily liquid, $C_3H_5ICl_2$, or glycerin in which an atom of iodine and 2 atoms of chlorine replace all the hydroxyl; insoluble in water, and having a sweet, biting taste; obtained by the action of iodine chloride on allyl iodide. [B, 2.]

IODODIMETHYLDIALLYLIDE, n. I-od-o-di-me[2]th-i[2]l-di-a[2]l'i[2]l-i[2]d(id). A compound containing iodine with two molecules of methyl and two of allyl. [B, 2.]

IODOFORM, n. I-o[2]d'o-fo[2]rm. Lat., *iodoformum, iodoformium* [Ger. Ph.], *jodoformium* (from ἰώδης, violet-like, and *formyl* [*q. v.*]). Fr., *iodoforme.* Ger., *I., Formyljodid, Jodoform.* It., *giodoformio, iodoformio, jodoformio.* Sp., *iodoformo. yodoformo.* A body, CHI_3, discovered by Sérullas in 1822. It occurs in minute and shining yellow crystals, of a peculiar, pronounced odor, and an unpleasant sweetish taste, melting at 115° C., volatile at all temperatures, and moderately soluble in boiling alcohol, and in ether, chloroform, and carbon disulphide. It is used as an antiseptic, disinfectant, healing, and sedative application to wounds, as an application in catarrhs of mucous membranes; in the form of inunctions in meningitis; and internally in cirrhosis of the liver, chronic dysentery, phthisis, diabetes, obesity, etc. [B; A. Poehl, "St. Petersb. med. Woch.," May 3, 1886, p. 167.]—**I. collodion.** See under COLLODION.—**I. gauze.** See under GAUZE.—**I. ointment.** Ger., *Formyljodische Salbe.* See *Unguentum* IODOFORMI.—**I. pencils.** See *Crayons d'*IODOFORME.—**I. suppositories.** See *Suppositoria* IODOFORMI.—**Ointment of i.** See *Unguentum* IODOFORMI.

IODOFORME (Fr.), n. E-o-do-form. See IODOFORM.—**Crayons d'i.** [Fr. Cod.]. Lat., *bacilli iodoformi.* A preparation made by mixing iodoform with 1-20th of its weight of powdered gum arabic, adding water and glycerin, and rolling into cylindrical sticks. [B.]

IODOFORMISM, n. I-od'o-fo[2]rm-i[2]z'm. Intoxication with iodoform. [a, 40.]

IODOFORMIUM (Lat.), n. n. I(i[2])-o[2]d(od)-o(o[3])-fo[2]rm'i[2]-u[3]m-(u[4]m). See IODOFORM.

IODOFORMIZE, v. tr. I-o[2]d'o-fo[2]rm-iz. 1. To impregnate (gauze, etc.) with iodoform. 2. To treat a part with applications of iodoform. [W. T. Bull, "N. Y. Med. Jour.," Jan. 6, 1883, p. 11.]

IODOFORMUM (Lat.), n. n. I(i[2])-o[2]d(od)-o(o[3])-fo[2]rm'u[3]m(u[4]m). See IODOFORM.—**Bacilli iodoformi.** See *Crayons d'*IODOFORME.—**I. bituminatum, I. bituminosum.** A proprietary preparation in which iodoform is so incorporated with tar as nearly to lose its odor, unless very largely diluted with water, the odor of tar being perceptible only in large quantities of the mixture. ["Proc. of the Am. Pharm. Assoc.," xxxvii (a, 39); "N. Y. Med. Jour.," Nov 3, 1888, p. 503.]—**Suppositoria iodoformi** [Br. Ph.]. Suppositories each containing 3 grains of iodoform, made by triturating 36 parts of powdered iodoform with 44 of oil of theobroma, then adding 100 parts of melted oil of theobroma, and shaping into the required form. [B, 95 (a, 38).]—**Unguentum iodoformi** [U. S. Ph.]. An ointment containing 1 part of iodoform to 9 parts of benzoinated lard. [B.]

IODOHYDRARGYRATE, n. I-od-o-hi-dra[3]r'ji[2]r-at. Fr., *i.* Ger., *Jodhydrargyrat.* A compound of mercuric iodide with the iodide of another radicle. [B.]

IODOHYDRATE, n. I-od-o-hid'rat. Fr., *iodhydrate.* Ger., *Jodhydrat.* See HYDRIODATE.

IODOHYDRIN, n. I-od-o-hid'ri[2]n. See IODHYDRIN.

IODOL, n. I'od-o[2]l. Lat., *iodolum, jodolum.* Ger., *Jodol.* It., *iodolo.* Tetraiodopyrrol; an odorless, nearly tasteless substance, C_4I_4NH, obtained by treating pyrrol with iodine in a solution of neutral reaction, occurring as a yellowish-white powder, soluble in alcohol, in ether, and in chloroform, less soluble in water. As an antiseptic and deodorant, it is said to have all the value of iodoform without its occasionally toxic effects, and is also feebly escharotic, and occasionally anæsthetic. [B, 46 (a, 39); "Gaz. hebd. de méd. et de chir.," July 23, 1886, p. 487; "Proc. of the Am. Pharm. Assoc.," xxxiv (a, 39); "St. Petersb. med. Wchnschr."; "N. Y. Med. Jour.," Dec. 19, 1885, p. 704; A. Poehl, "St. Petersb. med. Woch.," May 3, 1886, p. 167.]—**I. gauze.** A preparation made by saturating gauze with a solution of 1 part each of i., resin, and glycerin in 10 parts of alcohol. ["Proc. of the Am. Pharm. Assoc.," xxxiv (a, 39).]

IODOLACTIC ACID, n. I''od-o-la[2]k'ti[2]k. Fr., *acide iodolactique.* Moniodolactic acid, an acid, $C_3H_5IO_3$, or lactic acid in which one atom of iodine replaces hydrogen, melting at about 85° C. [B, 3 (a, 38).]

IODOLUM (Lat.), n. n. I(i[2])-o[2]d(od)'o[2]l-u[3]m(u[4]m). See IODOL.

IODOMECONE, n. I''o[2]d-o-me[2]k'on. Ger., *Jodomecon.* A substance, $C_6H_8I_6O_6$, obtained by heating meconic, pyromeconic, or comenic acid with an excess of iodine bromide. It crystallizes in yellow tablets, insoluble in water, soluble in alcohol and in ether. [B, 48 (a, 14).]

IODOMECONIN, n. I''o[2]d-o-me[2]k'on-i[2]n. A substance, $C_{10}H_9IO_4$, occurring in long crystals or needles melting at 112° C. and decomposing if heated more highly. [B, 3 (a, 38).]

IODOMÉSITYLE (Fr.), n. E-o-do-ma-se-tel. See METHYL *iodide.*

IODOMETHANE, n. I-od-o-me[2]th'an. See METHYL *iodide.*

IODOMETHE (Lat.), n. f. I(i[2])-od-o[2]m'e[2]th-e(a). Gen., *-om'ethes.* From ἰώδης, violet (see IODINE), and μέθη, drunkenness. Fr., *ivresse iodique.* Ger., *Jodinrausch, Jodrausch.* Of Lugol, the feeling of drunkenness caused by the ingestion of large doses of iodine. [A, 322, 385.]

IODOMETRY, n. I-od-o[2]m'e[2]t-ri[2]. From ἰώδης, violet-like, and μετρεῖν, to measure. Fr., *iodométrie.* The volumetric determination of the quantity of iodine in a compound, by estimating the amount of arsenious acid oxidized by iodine in the presence of water. [B, 38, 93 (a, 14).]

IODONAPHTHALENE, n. I-od-o-na[2]f'tha[2]l-en. A colorless liquid, $C_{10}H_7I$, boiling above 300° C. [B, 4, 158 (a, 38).]

IODONITRIC ACID, n. I-od-o-nit'ri[2]k. Fr., *acide iodo-nitrique.* An acid formed by the combination of iodic acid and nitric acid. [B, 38 (a, 14).]

IODONITROBENZENE, n. I-od-o-nit-ro-be[2]nz'en. Fr., *iodo-nitro-benzine.* Ger., *Jodnitrobenzol.* A compound, $C_6(NO_2)IH_4$, or benzene in which iodine and nitryl replace hydrogen. Three isomers are known: 1. *Orthoi'*, $C_6[H,NO_2,I,H,H,H,]$, occurring in yellow needles melting at about 49° C. 2. *Meti'*, $C_6[H,NO_2,H,I,H,H,]$, forming small monoclinic plates that melt at 36° C. 3. *Pari'*, $C_6[H,NO_2,H,H,I,H,]$, forming needles melting at 171·5° C. [B, 3 (a, 38).]

IODONITROPHENOLSULPHONIC ACID, n. I-od-o-nit-ro-fe-no[2]l-su[3]l-fo[2]n'i[2]k. Fr., *acide iodo-nitro-phénol-sulfonique.* A body, $C_6H_2(NO_2)(OH)SO_2.OH$, or phenol-sulphonic acid in which an atom of iodine and a molecule of nitryl replace two atoms of hydrogen. [B, 2.]

IODOORCIN, IODOORCINOL, n's. I-od-o-o[2]r'si[2]n, -o[2]l. Ger., *Jodorcin.* A substitution compound of orcin in which iodine replaces hydrogen. [B.]

IODOPHENOL, n. I-od-o-fe[2]n'o[2]l. Fr., *iodophénol.* Ger., *Jodphenol.* A substitution compound of phenol in which iodine replaces hydrogen. [B.] See MONIODOPHENOL, DIIODOPHENOL, and TRIIODOPHENOL.

IODOPHOSPHIDE, n. I-od-o-fo[2]s'fi[2]d(fid). Lat., *iodophosphuretum.* Fr., *iodophosphure.* A compound of an iodide with a phosphide. [B, 38 (a, 14).]

IODOPHOSPHORIC ACID, n. I-od-o-fo^{2}s-fo^{2}r'i^{2}k. Fr., *acide iodo-phosphorique.* An acid produced by the combination of iodic and phosphoric acids. [B, 38 (α, 14).]

IODOPHTHISIS (Lat.), n. f. I(i^2)-od-o^{2}t(o^{2}f)'i^{2}s(thi^{2}s)-i^{2}s. Gen., *-phthis'eos* (*oph'thisis*). From ἰώδης, violet-like, and φθίσις, consumption. Fr., *iodophthisie.* Ger., *Jodschwindsucht.* The emaciation, etc., of severe iodism. [L, 41, 50 (α, 14).]

IODOPLATINATE, n. I-od-o-pla^{2}t'i^{2}n-at. A salt of iodoplatinic acid. [B.]

IODOPLATINIC ACID, n. I-od-o-pla^{2}t-i^{2}n'i^{2}k. Ger., *Jodplatinsäure.* A substance, $H_2PtI_6+2H_2O$, forming dark-red or brown crystals. [B.]

IODOPLUMBATE, n. I-od-o-plu^{3}m'bat. Lat., *iodoplumbas* (from ἰώδης, violet-like, and *plumbum*, lead). Fr., *iodoplombate.* A compound of lead iodide with another metallic iodide. [B, 38 (α, 14).]

IODOPROPIONIC ACID, n. I-od-o-pro-pi^2-o^{2}n'i^{2}k. Fr., *acide iodopropionique.* Ger., *Jodpropionsäure.* A monobasic acid, $C_3H_5IO_2$, known in two isomeric forms : 1. *α-i. a.*, $CH_3.CHI.CO.OH$, a brown, oily liquid slightly soluble in water. 2. *β-i. a.*, $CH_2I,CH_2.CO.OH$, forming shining crystalline laminæ, readily soluble in alcohol, ether, or hot water, slightly soluble in cold water, and melting at about 101° C. [B, 3 (α, 38).]

IODOQUININE, n. I-od-o-kwi^{2}n'en. Fr., *i.* A brown amorphous substance, $(C_{20}H_{24}N_2O_2)_2.I_2$, obtained by the action of iodine on quinine. [B, 93 (α, 14).]—**I. sulphate.** Ger., *basischschwefelsaures Chinin.* A crystalline salt, $4C_{20}H_{24}N_2O_2.3H_2SO_4.2HI.I_4 + 3H_2O$, occurring in more or less varied rhombic prisms of emerald color in reflected light, and nearly colorless in transmitted light. [B, 5 (α, 38).]

IODOSALICYLIC ACID, n. I-od-o-sa^{2}l-i^2-si^{2}l'i^{2}k. Fr., *acide iodo-salicylique.* Ger., *Iodsalicylsäure.* An acid formed by treating salicylic acid with iodine in the presence of iodic acid or an alkali. [B, 4 (α, 38).] See MONIODOSALICYLIC ACID, DIIODOSALICYLIC ACID, and TRIIODOSALICYLIC ACID.

IODOSIS (Lat.), n. f. I(i^2)-od-o'si^{2}s. Gen., *-os'eos* (*-is*). From ἰώδης, violet-like. See IODISM.

IODOSTEARIC ACID, IODOSTEARIDIC ACID, n's. I-od-o-ste-a^{2}r'i^{2}k, -ste-a^{2}r-i^{2}d'i^{2}k. Fr., *acide iodo-stéarique.* Ger., *Jodstearinsäure.* An acid, $C_{18}H_{33}IO_2$, formed by the action of iodine, phosphorus, and water on ricinoleic acid, and occurring as a yellow oil. [B, 3 (α, 38).]

IODOSUCCINIMIDE, n. I-od-o-su^{3}k-si^{2}n'i^{2}m-i^{2}d(id). A substance, $C_2H_4(CO)_2NI$, obtained by adding silver succinimide to a solution of iodine in absolute alcohol, and occurring in hard, quadratic, crystalline prisms, readily soluble in water, less soluble in alcohol. [B, 3 (α, 38).]

IODOSULPHATE, n. I-od-o-su^{3}lf'at. Fr., *i.* Ger., *jodschwefelsaures Salz.* A salt of iodosulphuric acid. [B, 2 (α, 45).]

IODOSULPHURIC ACID, n. I-od-o-su^{3}l-fu^{2}r'i^{2}k. Fr., *acide iodo-sulfurique.* Ger., *Jodschwefelsäure.* A dibasic acid, $H_2SO_3I_2$, or sulphuric acid in which two atoms of iodine replace a single atom of oxygen. [B, 2.]

IODOTANNIN, n. I-od-o-ta^{2}n'i^{2}n. A solution of iodine and tannic acid. [B, 5 (α, 38).]

IODOTHERAPY, n. I-od-o-the^{2}r'a^3-pi^2. From ἰώδης, violet-like, and θεραπεία, medical treatment. Fr., *iodothérapie.* The treatment of disease with iodine. [α, 14.]

IODOTOLUENE, n. I-od-o-to^{2}l'u^2-en. Ger., *Jodtoluol.* A substitution compound, $C_6H_4I-CH_3$, of toluene, in which iodine replaces the hydrogen of the benzene residue, C_6H_5. It is known in three isomeric forms : 1. *Orthoi'*, a colorless liquid melting at 205° C. 2. *Meti'*, a colorless liquid melting at 207° C. 3. *Pari'*, forming shining crystalline laminæ melting at 35° C. [B, 158 (α, 38).]

IODOUS ACID, n. I'od-u^{3}s. Fr., *acide iodeux.* Ger., *jodsauerstoffsäure.* An acid formed by the combination of iodine with oxygen. [B, 38 (α, 14).]

IODUM [U. S. Ph., Br. Ph., Fr. Cod.] (Lat.), n. n. I(i^2)-od'u^{3}m-(u^{4}m). See IODINE.—**Causticum iodi** [Norw. Ph., Swed. Ph.]. A solution of 1 part each of iodine and potassium iodide in 2 parts of water. [B, 81 (α, 21).]—**Glycerinum iodi causticum** [Rachter]. See *Hebra's* IODINE *caustic.*—**Inhalatio iodi.** See *Vapor iodi.*—**Injectio iodi iodurata.** Sp., *inyección de iodo iodurada* [Sp. Ph.]. A solution of 10 grammes each of iodine and potassium iodide in 200 grammes of distilled water to which 100 grammes of 90-per-cent. alcohol are added. [B, 95.]—**I. purissimum** [Fr. Cod.]. Fr., *iode sublimé* [Fr. Cod.]. Iodine purified by sublimation for medicinal use. [B.]—**Linimentum iodi** [Br. Ph.]. Fr., *liniment d'iode.* Ger., *Jodliniment.* A preparation made by dissolving 1¼ oz. (11¼ per cent.) of iodine, ¼ oz. (2¼ per cent.) of potassium iodide, and ¼ oz. (2¼ per cent.) of camphor in 10 fl. oz. (82 per cent.) of rectified spirit. [B, 95.]—**Liquor causticus iodi** [Fr. Cod.], **Liquor iodi** [Br. Ph.] (**causticus, seu compositus** [U. S. Ph.]). Fr., *soluté d'iode ioduré* [Fr. Cod.]. Syn.: *liquor iodinii compositus* [U. S. Ph., 1870] (*liquor jodi cum kalio jodato* [Russ. Ph.]), *solutio superiodeti kalici* [Norw. Ph., Swed. Ph.], *solutio Lugol.* Lugol's solution, an aqueous solution containing 1 [Russ. Ph., Norw. Ph., Swed. Ph.], 3·3 [Fr. Cod.], 4·4 [Br. Ph.], or 5 [U. S. Ph.] per cent. of iodine, and 2 [Roum. Ph., Norw. Ph., Swed. Ph.] 3·3 [Fr. Cod.], 6·7 [Br. Ph.], or 10 [U. S. Ph.] per cent. of potassium iodide. The Fr. preparation also contains 60 per cent. of alcohol. [B, 95.]—**Solutio iodi aquosa.** See *Liquor iodi compositus.*—**Solutio iodi caustica Lugoli.** See *Lugol's caustic* IODINE *solution.*—**Tinctura iodi** [U. S. Ph., Br. Ph., Fr. Cod.]. Fr., *teinture d'iode* [Fr. Cod.]. Ger., *Jodtinctur.* Sp., *tintura alcohólica de iodo* [Sp. Ph.]. Syn.: *tinctura iodinii* [U. S. Ph., 1870] (seu *jodi* [Ger. Ph., etc.], seu *iodii* [Belg. Ph.], seu *jodii* [Gr. Ph.]), *solutio iodi* [Norw. Ph., Swed. Ph.] (seu *iodii* [Netherl. Ph.], seu *jodi* [Dan. Ph.]) *spirituosa.* A solution of iodine in alcohol. The different officinal tinctures contain in a 1,000 parts 80 parts of iodine [U. S. Ph.], 28 parts of iodine and 14 parts of potassium iodide dissolved in rectified spirit [Br. Ph.], 91 parts of iodine [Ger. Ph.], and 77 parts of iodine dissolved in 90-per-cent. alcohol [Fr. Cod.]. [B.]—**Tinctura iodi fortior.** A solution of 2 parts of iodine and 1 part of potassium iodide in 9 parts of diluted alcohol and 1 part of distilled water. [A, 319 (α, 21).]—**Unguentum iodi** [U. S. Ph., Br. Ph.]. Syn.: *unguentum iodinii* (*compositum* [U. S. Ph., 1870]), *pomatum cum iodureto potassico iodurato* [Fr. Cod.]. Fr., *pommade d'iodure de potassium ioduré* [Fr. Cod.]. Ger., *Jodsalbe.* Sp., *pomada de ioduro potásico iodado* [Sp. Ph.]. Roum., *unguentu de potassiu jodatu cu jodu* [Roum. Ph.]. A preparation containing in a 1,000 parts 40 parts of iodine and 10 parts of potassium iodide mixed with 20 parts of water and incorporated with 930 parts of benzoinated lard [U. S. Ph.] ; or 32 parts of iodine and 32 parts of potassium iodide triturated with 51 parts of dilute alcohol (proof spirit), and mixed with 885 parts of prepared lard [Br. Ph.] ; or 20 parts of iodine and 100 parts of potassium iodide mixed with water and 800 parts of benzoinated lard [Fr. Cod.]. The preparations of the Sp. Ph. and the Roum. Ph. are very similar to the last-named. The *unguentum iodinii compositum* of the U. S. Ph. of 1870 was made up of 28 parts of iodine and 55 parts of potassium iodide, mixed with 55 parts of water and 862 of lard.—**Vapor iodi** [Br. Ph.]. Inhalation of iodine ; a preparation consisting of a fluidrachm of tincture of iodine mixed with a fl. oz. of water, and slowly evaporated. [B.]

IODURATED, adj. I-o^{2}d'u^{2}r-at-e^{2}d. See IODIZED.

IODURE (Fr.), n. E-o-du^{6}r. See IODIDE.—**I. mercureux.** Ger., *Jodinmerkur.* See MERCURY *proto-iodide.*—**I. mercurique** [Fr. Cod.]. See MERCURY *biniodide.*—**Pilules d'I. ferreux** [Fr. Cod.]. See *Pilulæ* FERRI *iodide.*—**Pilules d'I. mercureux opiacées** [Fr. Cod.]. Lat., *pilulæ cum iodureto hydrargyroso.* Sp., *píldoras de yoduro mercurioso* [Sp. Ph.]. Pills each of which contains 5 centigrammes (about ⅘ grain) of mercurous iodide (green iodide of mercury), 2 centigrammes (⅓ grain) of extract of opium, and 5 centigrammes of licorice powder made up with a little honey. [B.]

IODURET, n. I-o^{2}d'u^2-re^{2}t. Lat., *ioduretum.* See IODIDE.

IODURETED, adj. I-o^{2}d'u^2-re^{2}t-e^{2}d. See IODIZED.

IODURETUM [Fr. Cod.] (Lat.), n. n. I(i^2)-od-u^2(u)-re(ra)'tu^{3}m-(tu^{4}m). See IODIDE.—**Emplastrum cum iodureto hydrargyrico ex Gutierrez.** See *Emplastrum* PLUMBI *iodidi.*—**Glyceritum cum iodureto potassico** [Fr. Cod.]. See *Glycéré d'iodure de* POTASSIUM.—**I. ammonicum** [Fr. Cod.] See AMMONIUM *iodide.*—**I. arseniosum.** See ARSENIC *triiodide.*—**I. cadmicum.** See CADMIUM *iodide.*—**I. ferrosum.** Ferrous iodide. [α, 38.] See IRON *iodide.*—**I. hydrargyrico-potassicum.** Mercury and potassium iodide. [α, 38.]—**I. hydrargyricum.** See MERCURY *biniodide.*—**I. hydrargyrosum** [Fr. Cod.]. See MERCURY *protoiodide.*—**I. kalicum.** See POTASSIUM *iodide.*—**I. plumbicum** [Fr. Cod.]. See LEAD *iodide.*—**I. potassicum** [Fr. Cod.]. See POTASSIUM *iodide.*—**I. sodicum.** Sodium iodide. [α, 38.]—**I. zincicum.** Zinc iodide. [α, 38.]—**Pilulæ cum iodureto ferroso** [Fr. Cod.]. See PILULÆ *ferri iodidi.*—**Pilulæ cum iodureto hydrargyroso** [Fr. Cod.]. See *Pilules d'*IODURE *mercureux opiacées.*—**Pomatum cum iodureto plumbico** [Fr. Cod.]. See *Unguentum* PLUMBI *iodidi.*—**Pomatum cum iodureto potassico** [Fr. Cod.]. See *Pommade d'iodure de* POTASSIUM.—**Pomatum cum iodureto potassico iodurato** [Fr. Cod.]. See *Unguentum* IODI.—**Syrupus cum iodureto ferroso** [Fr. Cod.]. See *Syrupus* FERRI *iodidi.*—**Syrupus cum iodureto potassico** [Fr. Cod.]. See *Sirop d'iodure de* POTASSIUM.

IODURETUS (Lat.), adj. I(i^2)-od-u^2(u)-re(ra)'tu^{3}s(tu^{4}s). Iodated. [B.]

ION (Lat.), n. n. I(i^2)-o^{2}n. Gr., ἴον. 1. Of Greek writers, the *Viola odorata.* 2. The *Vaccinium baccifera.* [B, 78 (α, 14).]

IONIA (Lat.), n. f. I(i^2)-on(o^{2}n)'i^2-a^3. From ἴον, a violet. The *Teucrium chamæpitys.* [B, 121 (α, 35).]

IONIDES (Lat.), n. f. I(i^2)-o^{2}n'i^{2}d-ez(as). The *Capparis spinosa.* [B, 121 (α, 35).]

IONIDIE (Fr.), n. E-o-ne-de. See IONIDIUM.—**I. à petites fleurs.** See IONIDIUM *parviflorum.*—**I. toubou.** See IONIDIUM *ipecacuanha.*

IONIDION (Lat.), **IONIDIUM** (Lat.), n's n. I(i^2)-o^{2}n-i^{2}d'i^2-o^{2}n, -u^{3}m(u^{4}m). Fr., *ionidie.* Ger., *Brechviole, Brechveilchen.* A genus of the *Violaceæ*, tribe *Violeæ.* [B, 42, 173 (α, 24).]—**I. angustifolium.** Sp., *yerba de San Nicolás* [Mex. Ph.]. A Mexican species having a popular repute for the cure of dropsy. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**I. brevicaule.** A South American species having an emetic root. [L, 107.] **I. calceolaria.** A species growing in Guiana, Colombia, and the Antilles, resembling *I. ipecacuanha* and by many authors considered a variety of the latter. Its root is used like ipecac. [B, 180 (α, 35).]—**I. heterophyllum.** Fr., *i. hétérophylle.* A species growing in China and Ceylon. It probably has the emetic properties of the genus. [B, 214, 311 (α, 35).]—**I. ipecacuanha, I. ituba, I. itobu.** Fr., *ionidie itoubou.* A South American species. Its root is white ipecacuanha (*q. v.*). [α, 24.]—**I. lanatum.** A Brazilian species the root of which is said to be emetic. [B, 214, 311 (α, 35).]—**I. Marcucci, I. Marcutii.** A species growing near Quito, South America ; identified by Hooker with the *I. parviflorum*, and by Lindley with the *I. microphyllum.* [B, 5 (α, 24).]—**I. microphyllum.** A species found in South America. The root, called *huichunchulli*, is used in Brazil like ipecacuanha, and in Ecuador in elephantiasis. [B, 48 (α, 14) ; B, 5, 189 (α, 24).]—**I. parviflorum.** Fr., *ionidie à petites fleurs.* A South American species furnishing *huichunchulli* (*q. v.*). [B, 5, 18, 173 (α, 24).]—**I. poaya.** Fr., *ionidie poaya.* A Brazilian species the root of which is used as an emetic. [B, 18, 173 (α, 24).]—**I. polygalæfolium.** The *Viola polygalæfolia.* [B, 173

(*a*, 24).]—**I. strictum.** A species found in the West Indies, where its root is used like ipecac. [B, 180 (*a*, 35).]—**I. suffruticosum.** An East Indian species the root of which is used in infusion in gonorrhœa and diseases of the urinary organs, and the demulcent leaves and stalks, mixed with oil, as a cooling liniment for the head. [B, 19, 172 (*a*, 24).]—**I. urticæfolium.** A Brazilian species the root of which is emetic. [B, 180 (*a*, 35).]

IONTA (Lat.), n. n. pl. I(i^2)-o^{2}n'ta^3. Gr., ἰόντα (from ἰέναι, to go). Of Hippocrates, excreta. [L, 50 (*a*, 14).]

IONTHOS (Lat.), **IONTHUS** (Lat.), n's m. I(i^2)-o^{2}nth'o^{2}s, -u^{3}s(u^{4}s). Gr., ἴονθος. Ger., *Jonthus, Finne.* The root of a hair, a young shooting hair, an eruption on the face which often accompanies the first growth of the beard. According to some, from ὄνθος, dirt, because of the dirty appearance of the eruption. 1. Acne, especially acne punctata. 2. A generic term for various diseases of the sebaceous follicles, including comedones, acne, milium, sycosis, and the furuncular affections that originate in these follicles. [G, 22.]—**I. acme, I. acne.** See ACNE.—**I. comedo.** See COMEDO.—**I. corymbifer.** See ROSACEA.—**I. furunculus.** See FURUNCULUS.—**I. sycosis.** See SYCOSIS.—**I. varus.** See ACNE. —**I. varus punctatus.** Acne punctata. [G, 52.]—**I. varus simplex.** Acne simplex. [G, 52.]

IONTITIS (Lat.), n. f. I(i^2)-o^{2}n-ti(te)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἴον, a violet. The *Aristolochia clematitis.* [B, 121 (*a*, 35).]

IOSANGIOVITE [Piorry] (Fr.), n. E-o-sa^{3}n^2-zhe-o-vet. From ἰός, poison, and ἀγγεῖον, a vessel (see also *-itis**). An inflammation of the female genitalia due to infection. [L, 82.]

IOSÉLYTHRITE [Piorry] (Fr.), n. E-o-sa-le-tret. From ἰός, poison, and ἔλυτρον, a sheath (see also *-itis*). Elytritis due to infection. [L, 82.]

IOSOPROOMMITE [Piorry] (Fr.), n. E-o-so-pro-om-met. From ἰός, poison, ὄψ, the eye, and ῥόος, a stream (see also *-itis*). Ophthalmia due to infection. [L, 41, 82 (*a*, 14).]

IOSURÉTHRITE (Fr.), n. E-o-su^6-ra-tret. From ἰός, poison, and οὐρήθρα, the urethra (see also *-itis**). Of Piorry, urethritis due to infection. [L, 41 (*a*, 14).]

IOTACISMUS (Lat.), n. m. I(i^2)-ot-a^3-si^{2}z(ki^{2}s)'mu^{3}s(mu^{4}s). Gr., ἰωτακισμός (from ἰῶτα, the letter *iota* [= *i*]). An inability, due to defects in the vocal organs, to pronounce distinctly words beginning with the sound of *i*, especially so as to distinguish them from words beginning with a *j*. [L, 30, 41, 50 (*a*, 14).]

IOTERIUM (Lat.), n. n. I(e)-o-te(ta)'ri^2-u^{3}m(u^{4}m). From ἰός, poison. Fr., *iotère.* The poison-gland of an insect. [L, 41 (*a*, 14).]

IOZE (Fr.), n. E-oz. A place in the department of Puy-de-Dôme, France, where there are alkaline springs. [A, 319 (*a*, 21).]

IPÉCA (Fr.), n. E-pa-ka^3. See IPECAC and IPECACUANHA.—**I. du pays, I. sauvage.** In the *Mauritius*, the *Tylophora asthmatica.* [B, 18 (*a*, 24).]

IPECAC, n. I^{2}p'e^2-ka^{2}k. See IPECACUANHA.—**American i.** See *American* IPECACUANHA.—**Carolina i.** See EUPHORBIA *ipecacuanha.*—**Fluid extract of i.** See *Extractum* IPECACUANHÆ *fluidum.*—**Powder of i. and opium.** See *Pulvis* IPECACUANHÆ *et opii.*—**Syrup of i.** See *Syrupus cum extracto* IPECACUANHÆ.—**Tincture of i. and opium.** See *Tinctura* IPECACUANHÆ *et opii.* —**Troches of i.** See *Trochisci* IPECACUANHÆ.—**White i.** See *White* IPECACUANHA.—**Wild i.** The *Triosteum perfoliatum* and *Asclepias curassavica.* [B, 5, 275 (*a*, 24).]—**Wine of i.** See *Vinum* IPECACUANHÆ.

IPECACOANHA, n. Of Marckgrave, see IPECACUANHA.—**Radix ipecacoanhæ vulgaris.** See IPECACUANHA (1st def.).

IPECACUANA [Mex. Ph.] (Sp.), n. E-pa-ka^3-ku-a^3'na^3. See IPECACUANHA.—**I. blanca** [Mex. Ph.]. See RICHARDSONIA *scabra.*—**I. de América** [Mex. Ph.]. See *American* IPECACUANHA.—**I. de Cartagena** [Mex. Ph.], **I. de las minas de oro** [Mex. Ph.]. The *Psychotria emetica.* [A, 447 (*a*, 21).]—**I. del Brasil** [Mex. Ph.]. See CEPHAELIS *ipecacuanha.*—**I. del país** [Mex. Ph.]. See SOLEA *verticillata.*—**I. escabrosa** [Mex. Ph.]. The *Richardsonia scabra.* [A, 447 (*a*, 21).]—**I. gris** [Mex. Ph.]. See CEPHAELIS *ipecacuanha.* —**I. negra** [Mex. Ph.]. The *Psychotria emetica.* [A, 447 (*a*, 21).] —**I. oficinal** [Mex. Ph.]. Jaborandi. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.] See PILOCARPUS.—**I. ondeada** [Mex. Ph.]. The *Richardsonia scabra.* [A, 447 (*a*, 21).]

IPÉCACUANE (Fr.), n. E-pa-ka^3-ku^6-a^{3}n. See IPECACUANHA.

IPECACUANHA (Lat.), n. I^{2}p-e^2-ka^{2}k(ka^{3}k)-u^2(u^4)-a^{2}n(a^{3}n)'-ha^3. Probably from the Topinambo words *cipó*, a creeping plant, and *poaya*, emetic. [*a*, 14.] Fr., *ipécacuanha, ipécacuane, racine brésilienne* (ou *d'ipécacuanha annelée*) (1st def.), *i. annelé* (ou *officinal*) [Fr. Cod.] (1st def.). Ger., *I., Ipekakuana, Brechwurzel* (1st def.), *Ruhrwurzel* (1st def.). Sp., *ipecacuana* [Mex. Ph.]. Port., *i.* 1. The root of *Cephaelis i.* It occurs in commerce in pieces about 2 or 3 lines thick, of a grayish or reddish-brown color, with a thick, brittle, finely wrinkled or warty cortex, having a faint, acrid, nauseous taste. It contains emetine, upon which its emetic property depends. In small doses it is often given as an expectorant and diaphoretic, and has been used with great benefit in tropical dysentery. 2. A genus of rubiaceous plants, by Bentham and Hooker referred to *Cephaelis.* [B, 5, 18, 19, 173, 180 (*a*, 24).]—**American i.** Sp., *ipecacuana de América* [Mex. Ph.]. The *Euphorbia i., Gillenia stipulacea,* and *Gillenia trifoliata.* [B, 5, 34, 77, 275 (*a*, 24).] —**Amylaceous i.** Fr., *ipecacuanha amylacé.* It., *ipecacuana farinacea.* Ger., *mehlige Brechwurzel.* See *Undulated i.*—**Annulated i.** Lat., *i. annulata, radix ipecacuanhæ annulatæ.* Fr., *ipécacuanha annelé.* Ger., *geringelte I.* (oder *Brechwurzel*). See *I.* (1st def.); so called because true ipecac presents on its surface a succession of circular rings or rugæ. [B, 5, 18, 180 (*a*, 24).]—**Bastard i.** Fr., *ipécacuanha bâtard.* The *Asclepias curassavica, Ruellia tuberosa,* and *Pedilanthus tithymaloides.* [B, 5, 18, 77, 121, 173, 275 (*a*, 24).] See also *False i.*—**Bengal i.** See *Indian i.*—**Black i.** Fr., *ipécacuanha noir.* Ger., *schwarze Brechwurzel.* See *Large striated i.*—**Black striated i.** See *Large striated i.,* and *Small striated i.*—**Braune I.** (Ger.). See *Brown i.*—**Brazilian i.** Sp., *ipecacuana del Brasil* [Mex. Ph.]. See CEPHAELIS *i.*—**Brown i.** Fr., *ipécacuanha brun.* Ger., *braune I.* The official i. [B, 5, 173 (*a*, 24).]—**Carolina i.** Fr., *ipécacuanha de la Caroline.* The *Podophyllum peltatum.* [B, 121 (*a*, 35).]—**Carthagena i., Colombian i.** Sp., *ipecacuana de Cartagena* [Mex. Ph.]. A commercial name for a variety of i. somewhat larger than i. from Brazil and containing less emetine than the latter. It is known also as New Granada i. [B, 5, 18 (*a*, 24).—**Compound powder of i.** See *Pulvis ipecacuanhæ et opii.*—**Coromandel i.** See *Indian i.*—**Country i., East Indian i.** The *Tylophora asthmatica.* [B, 275 (*a*, 24).]—**Elastic striated i.** Of Atfield, the root of *Psychotria emetica.* [B, 5 (*a*, 24).]—**Essentia ipecacuanhæ.** See *Tinctura ipecacuanhæ.*—**Extractum ipecacuanhæ** [Belg. Ph., Pruss. Ph. (7th ed.), Russ. Ph.]. Fr., *extrait alcootique d'ipécacuanha, extrait d'ipécacuanha* [Fr. Cod.]. Sp., *extracto alcohólico de ipecacuana* [Mex. Ph., Sp. Ph.]. A preparation made by extracting ipecac-root with dilute alcohol, and, after distilling off the spirit, bringing to the consistency of a soft extract [Fr. Cod.], or a thick extract [Belg. Ph., Sp. Ph.]. The Br. Ph. and Russ. Ph. make a dry extract. Only the bark of the root is employed by the Belg. Ph. [B, 95 (*a*, 38).]—**Extractum ipecacuanhæ fluidum** [U. S. Ph.]. Fr., *extrait liquide d'ipécacuanha.* Ger., *flüssiges I'extrakt.* Fluid extract of ipecac; made by exhausting 100 grammes of ipecac in No. 80 powder with alcohol, distilling off the alcohol till the residue measures 50 c. c., adding 100 c. c. of water, evaporating to 75 c. c., filtering and washing to 50 c. c., then adding alcohol enough to make 100 c. c. of extract. [B, 5 (*a*, 38).]—**False Brazilian i.** Fr., *faux ipécacuanha du Brésil.* Ger., *falsche I. aus Gujana.* The *Ionidium i.* [B, 173, 275 (*a*, 24).]—**False i.** Fr., *faux ipécacuanha.* Ger., *falsche I.* The *Ionidium i., Euphorbia i.,* and other plants. [B, 18, 121, 173 (*a*, 24).]—**False i. of Cayenne.** The root of the *Ionidium i.* and other species of *Ionidium,* and the root of *Boerhaavia decumbens.* [B, 173, 197 (*a*, 35).]—**False i. of North America.** The genus *Gillenia* and the *Euphorbia i.* [*a*, 35.]—**False i. of South America.** The non-official i's from South America; the roots of *Psychotria emetica, Richardsonia scabra,* etc., various species of *Ionidium* and other plants. [*a*, 35.]—**False i. of the Antilles.** Fr., *ipécacuanha bâtard des Antilles.* The root of *Asclepias curassavica.* [B, 121 (*a*, 35).]—**False i. of the Isle of France.** The root of *Asclepias asthmatica.* [B, 173, 300 (*a*, 35).]—**False i. of the Isle of Bourbon.** Fr., *faux ipécacuanha de l'île Bourbon.* The *Periploca mauritiana.* [B, 173 (*a*, 24).]—**Farinaceous i.** See *Undulated i.* —**Flüssiges I.-Extrakt** (Ger.). See *Extractum ipecacuanhæ fluidum.*—**Geringelte I.** (Ger.). See *Tinctura* IPECACUANHÆ.—**I. undulata.** See *Undulated i.*—**I. vera.** See *Large striated i.*—**I. von Caracas** (Ger.). The root of *Sarcostemma glaucum.* [B, 180 (*a*, 24).]—**I. von St. Paul** (Ger.). The root of *Richardsonia scabra.* [B, 180 (*a*, 24).]—**I. von Villa Rica** (Ger.). The root of *Manettia cordifolia.* [B, 180 (*a*, 24).]—**I. von Zogareire** (Ger.). See *Radix* CAINCÆ *brasiliensis.*—**I'wein** [Ger. Ph.] (Ger.). See *Vinum ipecacuanhæ.*—**I'wurzelküchelchen** (Ger.). See *Trochisci ipecacuanhæ.*—**Large striated i.** Lat., *i. striata, i. peruviana, i. nigra vera, radix ipecacuanhæ striatæ* (seu *nigræ,* seu *veræ*), *i. grossa.* Fr., *ipécacuanha strié* (ou *noir*). Ger., *gestreifte* (oder *schwarze,* oder *peruanische*) *I.* (oder *Brechwurzel*). Black i.; the root of *Psychotria emetica.* The whole surface of the root is striated longitudinally. It has a sweetish taste, and is rich in sugar, and contains a principle capable of reducing the cupro-potassic reagent. It yields but a small per cent. of emetine. [B, 5, 18, 173, 180 (*a*, 24).]—**Lesser annulated i.** The genuine i. from Brazil. [*a*, 35.] Cf. *New Granada i.*—**Lesser striated i.** See *Small striated i.*—**Lisbon i.** Genuine i., the root of *Cephaelis i.* [*a*, 35.]—**Mehlige I.** (Ger.). See *Undulated i.*—

New Granada i. An annulated i.-root differing from the official Brazilian drug in its larger size and, it is said, in its smaller proportion of emetine. It is derived, however, from the same plant (*Cephaelis i.*) as the official i. [B, 5, 18 (a, 35).]—**Pastilli ipecacuanhæ** [Swiss Ph.]. See *Trochisci ipecacuanhæ.*—**Peruvian i.** Ger., *peruanische I.* See *Large striated i.*—**Pilula ipecacuanhæ cum scilla** [Br. Ph.]. Pill of i. with squill; made by mixing 3 parts of compound powder of i. with 1 part each of powdered squill and powdered ammoniacum, and beating into a mass with syrup. [B, 5, 95 (a, 38).]—**Pulvis ipecacuanhæ compositus** [U. S. Ph., 1870; Br. Ph.]. See *Pulvis ipecacuanhæ et opii.*—**Pulvis ipecacuanhæ cum tartaro.** Fr., *poudre vomitive composée.* Syn.: *pulvis emeticus.* A preparation consisting of 1 part of tartar emetic and 20 or 60 parts of ipecac well mixed. [B, 119 (a, 38).]—**Pulvis ipecacuanhæ et opii** [U. S. Ph.]. Fr., *poudre d'ipécacuanha opiacée* [Fr. Cod.] (ou *composée*). Sp., *polvo de ipecacuana opiado* [Sp. Ph.]. Syn.: *pulvis ipecacuanhæ compositus* [U. S. Ph., 1870; Br. Ph. (seu *opiatus* [Ger. Ph., Russ. Ph., Finn. Ph., Norw. Ph., Gr. Ph.], seu *thebaicus* [Dan. Ph., Swed. Ph.])], *pulvis Doveri* [Austr. Ph., Hung. Ph., Swiss Ph. (seu *Doweri* [Belg. Ph.], seu *opii compositus* [Netherl. Ph.]). Powder of ipecac and opium, Dover's powder; a powder consisting of 10 parts each of powdered ipecac (No. 60 powder [U. S. Ph.]) and powdered opium, with 80 parts of sugar of milk [U. S. Ph., Ger. Ph., Swiss Ph., Finn. Ph.]; or with 80 parts of powdered potassium sulphate [Br. Ph., Dan. Ph., Gr. Ph., Netherl. Ph., Norw. Ph., Russ. Ph., Swed. Ph.]; or with 40 parts each of powdered potassium sulphate and powdered potassium nitrate [Fr. Cod.]; or with 80 parts of powdered sugar [Austr. Ph., Hung. Ph., Roum. Ph.]; or consisting of 9 parts each of powdered dry extract of opium and powdered ipecac with 82 parts of powdered potassium sulphate [Belg. Ph.]; or of 8 parts each of powdered ipecac and powdered opium, with 30 parts of powdered potassium sulphate and 45 parts of powdered potassium nitrate [Sp. Ph.]. The U. S. Ph. specially recommends a very fine powder. [B, 5, 95 (a, 38).]—**Pulvis ipecacuanhæ hydrargyratus.** Fr., *poudre d'ipécacuanha mercurielle.* A powder consisting of 1 part of calomel and 4 parts of ipecac triturated together. [B, 119 (a, 38).]—**Pulvis ipecacuanhæ opiatus** [Ger. Ph., Russ. Ph., Finn. Ph., Norw. Ph., Gr. Ph.]. See *Pulvis ipecacuanhæ et opii.*—**Pulvis ipecacuanhæ stibiatus** [Finn. Ph.]. A powder consisting of $\frac{1}{10}$ gramme of tartar emetic, $\frac{1}{4}$ gramme of ipecac-root, and $\frac{2}{5}$ gramme of sugar, mixed together, to be taken at one dose. [B, 95 (a, 38).]—**Pulvis ipecacuanhæ thebaicus** [Dan. Ph., Swed. Ph.]. See *Pulvis ipecacuanhæ et opii.*—**Radix cephaelidis ipecacuanhæ, Radix ipecacuanhæ** [Ger. Ph.]. [B, 5 (a, 24).]—**Schwarze I.** (Ger.). See *Large striated i.*—**Small striated i.** The lesser striated i. It differs from the larger striated i. not only in size, but in being more brittle, abounding in starch, and yielding a greater proportion of emetine. It is probably derived from some species of *Richardsonia.* [B, 5, 18 (a, 24).]—**Soft i.** The large striated i. (root of *Psychotria emetica*). [B, 18 (a, 35).]—**Striated i.** Lat., *i. grossa.* 1. I. wrinkled longitudinally; usually applied to the large striated i. (*q. v.*). [B, 5 (a, 24).]—**Syrupus cum extracto ipecacuanhæ** [Fr. Cod.]. Fr., *sirop d'ipécacuanha* [Fr. Cod.]. Ger., *I'syrup* [Ger. Ph.]. Sp., *jarabe de ipecacuana* [Sp. Ph.]. Roum., *syrupu de i.* [Roum. Ph.]. Syn.: *syrupus ipecacuanhæ* [U. S. Ph., Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.), Belg. Ph., Gr. Ph., Swiss Ph., Netherl. Ph., Russ. Ph.] (*aquosus*). Syrup of ipecac. The U. S. preparation consists of 5 parts of fluid extract of ipecac and 95 parts of syrup; the Fr. preparation of a solution of 10 parts of extract of ipecac in 30 parts of alcohol, mixed with a solution of 630 parts of sugar in 340 parts of distilled water and filtered; the Sp. preparation of a solution of $2\frac{2}{3}$ parts of extract of ipecac in 30 parts of water, which, after filtering and adding 345 parts of syrup, is evaporated to the proper consistence; the Dutch preparation, of a mixture of 1 part of tincture of ipecac and 15 parts of syrup; the Belg. preparation, of a mixture of 35 parts of tincture of ipecac and 1,000 parts of syrup, boiled down to 1,000 parts; the Gr. preparation, of an infusion of 1 part of ipecac-root in 24 parts of water, with the addition of 36 parts of sugar; the Swiss orders 1 part of powdered ipecac-root without the bark to be expressed in 10 parts of alcohol and, after filtering to 10 parts, the addition of 90 of syrup; the other preparations are made by digesting (macerating [Finn. Ph.]) 1 to 5 parts of ipecac-root in water and alcohol, and adding about half as much again of sugar to the resulting extract. Similar preparations are given as syrupus ipecacuanhæ aquosus in several of the older pharmacopœias, in one of which water of orange-flowers is added to the syrup when made. [B, 95, 119 (a, 38).]—**Syrupus de i. compositus** [Fr. Cod.]. See *Syrupus ipecacuanhæ compositus.*—**Syrupus ipecacuanhæ** [U. S. Ph., Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.), Belg. Ph., Gr. Ph., Swiss Ph., Netherl. Ph., Russ. Ph.]. See *Syrupus cum extracto ipecacuanhæ.*—**Syrupus ipecacuanhæ aceticus** [Gr. Ph.]. A preparation made by digesting $1\frac{1}{4}$ part of ipecac-root in a mixture of 3 parts of dilute acetic acid, 12 parts of distilled water, and 1 part of alcohol, and, after three days, straining and adding sugar enough to make a thick syrup. [B, 95 (a, 38).]—**Syrupus ipecacuanhæ aquosus.** See *Syrupus cum extracto ipecacuanhæ.*—**Syrupus ipecacuanhæ compositus** [Belg. Ph.]. Fr., *sirop d'i. (et de séné) composé.* Syn.: *syrupus de i. compositus* [Fr. Cod.]. Compound syrup of ipecac; made by macerating for 12 hours 30 parts of bruised ipecac-root and 100 parts of senna-leaves in 750 parts of white wine, expressing (and filtering [Fr. Cod.]), then adding to the residue from filtering 30 parts of the herb of *Thymus serpyllum*, 120 or 125 parts of red-poppy petals and 3,000 parts of boiling water, infusing for 6 hours, expressing and adding a mixture of 100 parts of magnesium sulphate and 750 parts of water of orange-flowers. This latter mixture is then filtered and added to the filtered vinous solution, with the addition of somewhat less than twice as much sugar. [B, 95 (a, 38).]—**Tabellæ cum i.** [Fr. Cod.] (seu **ipecacuanhæ**). See *Trochisci ipecacuanhæ.*—**Tinctura ipecacuanhæ** [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.), Belg. Ph., Swiss Ph., Netherl. Ph., Russ. Ph., Swed. Ph.] Fr., *alcoolé* (ou *teinture* [Fr. Cod.]). Fr., *d'ipécacuanha.* Ger., *I'tinctur* [Ger. Ph.]. Sp., *tintura alcohólica de ipecacuana* [Sp. Ph.]. Roum., *tinctura de i.* [Roum. Ph.]. Syn.: *essentia ipecacuanhæ.* Tincture of ipecac; made by macerating or digesting for some days 1 part of ipecac-root, powdered [Fr. Cod., Swed. Ph.] or bruised [Austr. Ph., Sp. Ph., Hung. Ph.] in from 5 to 10 parts of dilute alcohol. The Netherl. Ph. orders the bark of the root. [B, 95 (a, 38).]—**Tinctura ipecacuanhæ et opii** [U. S. Ph.]. A preparation made by evaporating 100 parts of deodorized tincture of opium on a water-bath to 85 parts, cooling, and adding 10 parts of fluid extract of ipecac, then, after filtering and cooling, dilute alcohol enough to make 100 parts of tincture. [B, 5, 95 (a, 38).]—**Trochisci ipecacuanhæ** [U. S. Ph., Br. Ph., Ger. Ph. (1st ed.), Gr. Ph., Austr. Ph., Dan. Ph., Russ. Ph., Netherl. Ph.]. Fr., *tablettes d'ipécacuanha* [Fr. Cod.]. Ger., *I'wurzelkügelchen.* Sp., *tabletas de ipecacuana* [Sp. Ph.]. Syn.: *tabellæ ipecacuanhæ* [Belg. Ph.] (seu *cum i.* [Fr. Cod.], *pastilli ipecacuanhæ* [Swiss Ph.]). Ipecac lozenges, consisting of 25 parts each of powdered ipecac-root and powdered tragacanth, 1,000 parts of powdered sugar, and a sufficient quantity of syrup of orange [U. S. Ph.]; or of 10 parts of powdered ipecac-root without the wood centre, 990 [Fr. Cod.], 240 [Swiss Ph.], 600 [Netherl. Ph.], or 760 [Russ. Ph.] parts of powdered sugar, with 8 parts [Fr. Cod.] or a sufficient quantity [Swiss Ph.] of powdered tragacanth and 60 parts [Fr. Cod.]; a sufficient quantity [Swiss Ph.] of water of orange-flowers, or about 30 parts [Russ. Ph.], a sufficient quantity [Netherl. Ph.] of tragacanth mucilage; or consisting of 15 parts of powdered ipecac-root without the wood centre, 979 parts of powdered sugar, 6 of powdered tragacanth, and a sufficient quantity of water [Belg. Ph.]; or of 1 part [Gr. Ph.] or 4 parts [Sp. Ph.] of powdered ipecac-root, 60 parts [Gr. Ph.] or 160 parts [Sp. Ph.] of powdered sugar, and a sufficient quantity of tragacanth mucilage; or of $\frac{1}{4}$ part of powdered ipecac-root without the wood centre, 50 parts of powdered sugar, and a sufficient quantity of water [Austr. Ph.]; or of 180 grains of powdered ipecac-root, 25 ounces of powdered sugar, 1 ounce of powdered gum arabic, 2 fluid ounces of gum-arabic mucilage, and a sufficient quantity of distilled water [Br. Ph.]; or of 3 parts of bruised ipecac-root digested for some hours in 15 parts of boiling water and strained and filtered, with 147 parts [Dan. Ph.] or enough to make 600 parts of the mass [Ger. Ph.] of powdered sugar, to which the Dan. Ph. adds 3 parts of powdered tragacanth. The lozenges contain from $\frac{1}{4}$ [Austr. Ph.] to about $2\frac{1}{4}$ [Sp. Ph.] centigrammes of ipecac each. The U. S. lozenges contain $1\frac{6}{10}$ centigramme each. [B, 95 (a, 38).]—**Undulated i.** Lat., *i. undulata, radix ipecacuanhæ undulatæ* (seu *farinosæ.* seu *amylaceæ*), *i. blanca.* Fr., *ipécacuanha ondulé.* Ger., *wellenförmige I.* White i., amylaceous i.; the root of *Richardsonia scabra* and other species. The bark is brittle, very thick, and white and farinaceous within. According to Pelletier, it contains 6 per cent. of impure emetine; according to other authorities, none. [B, 5, 18, 173, 180 (a, 24).]—**Venezuela i., Venezuelan i.** The *Sarcostemma glaucum.* [B, 77, 275 (a, 24).]—**Vinum ipecacuanhæ** [U. S. Ph., Br. Ph., Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Russ. Ph., Swed. Ph.]. Fr., *vin* (ou *œnolé*) *d'ipécacuanha.* Ger., *I'wein* [Ger. Ph.]. Wine of ipecac; made by mixing ipecac-root with wine and, except for the U. S. and Br. preparations, macerating for from 5 to 8 days. The resulting fluid must be clear. The U. S. preparation is made of 7 parts of fluid extract of ipecac and 93 parts of stronger white wine; the Br. preparation of 1 oz. of powdered ipecac-root macerated in fl. oz. of acetic acid for 24 hours, then percolated with distilled water till 20 fl. oz. are obtained, which is dried on the water-bath, the residue powdered, macerated for 48 hours, with occasional stirring, with 20 fl. oz. of sherry, and filtered; the Belg. preparation is made with 6 parts of ipecac-root without the woody centre, 3 of alcohol, and 97 of Malaga wine; the other preparations consist of 1 part of ipecac-root (without the woody centre [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]) and 10 parts of sherry or [Netherl. Ph.] 14 parts of Spanish wine. [B, 95 (a, 38).]—**Violet striated i.** The large striated i., the cut surface of which has a violet hue. [B, 18 (a, 35).]—**Weisse I.** (Ger.). See *White i.*—**Wellenförmige I.** (Ger.). See *Undulated i.*—**White (ligneous) i.** Lat., *i. alba, radix ipecacuanhæ albæ* (*lignosæ*) (2d def.). Fr., *ipécacuanha blanc, ipécacuanha de Cayenne* (2d def.). Ger., *weisse I.* (oder *Brechwurzel*). 1. See *Undulated I.* 2. I. branca, the poaya branca of the Brazilians, the root of *Ionidium i.* and other species. It has little taste or odor, and, according to Pelletier, contains but a small percentage of emetine. [B, 5, 18, 173, 180 (a, 24).]—**Wild i.** The *Asclepias curassavica* and *Euphorbia i.* [B, 77, 275 (a, 24).]

See *Trochisci* IPECACUANHÆ.—**Teinture d'i.** See *Tinctura* IPECACUANHÆ.—**Vin d'i.** See *Vinum* IPECACUANHÆ.—**Vin d'i. composé.** A preparation made by digesting 6 parts of ipecac and 1 part of orange-peel for several days in 48 parts of stronger wine and filtering; or by digesting 4 parts of ipecac with 2 of sugar in 24 of dilute alcohol for 8 days, adding 96 parts of white wine, 1 part of illicium anisatum, and 4 parts of sugar, and allowing the mixture to stand 6 days before filtering. [B, 119 (α, 38).]

IPECACUANHIC ACID, n. I^{2}p-e-ka^{2}k-u^{2}-a^{2}n′i^{2}k. Fr., *acide ipécacuanhique.* Ger., *Ipecacuanhasäure.* It., *acido ipecacuanico.* An acid having, according to Willigk, the composition $C_{14}H_9O_7$, found in the root of the *Cephaelis ipecacuanha*, and obtained as a reddish-brown, amorphous, very hygroscopic mass of strongly bitter taste, and easily soluble in water, fairly so in alcohol. [B, 93, 270 (α, 38).]

IPEKAKA, n. In Guiana, the root of *Ionidium ituba.* [B, 121 (α, 35).]

IPEUNA, n. In Brazil, certain hard-wooded species of *Bignonia.* [B, 19 (α, 24).]

IPEUVA, n. In South America, the *Geronia speciosa.* ["Nouv. rem.," July 8, 1889, p. 348.]

IPHYON (Lat.), n. n. I(e)′fi^{2}(fu^{6})-o^{2}n. Gr., ἴφυον. The *Asphodelus ramosus.* [B, 121.]

IPO, n. 1. In Borneo, a resin obtained from the root-bark of *Strychnos tieute.* [B, 19, 173 (α, 24).] 2. See under ANTIARIS *toxicaria.* 3. Of Camelli and Persoon, see ANTIARIS.—**I'baum** (Ger.), **I. toxicaria** (Lat.). The *Antiaris toxicaria.* [B, 180 (α, 24).]

IPODERMOCLISMO (It.), n. E-po-de^{2}r-mo-kles′mo. An apparatus devised by Cantani, for throwing saline injections into the subcutaneous tissue. [Cantani, "Ann. di Chim.," Nov., 1884, p. 265.]

IPOMÆA (Lat.), n. f. I(e)-po-me′(ma^{3}e^{2})-a^{3}. See IPOMŒA.

IPOMÆIC ACID, n. I^{2}p-o-me′i^{2}k. See CONVOLVULIC ACID.

IPOMÉA (Fr.), **IPOMÉE** (Fr.). n's. E-po-ma-a^{3}, e-po-ma. See IPOMŒA.—**I. purgative.** See IPOMŒA *purga.*—**I. rampante.** See IPOMŒA *repens.*—**I. tubéreuse.** See IPOMŒA *tuberosa.*

IPOMŒA (Lat.), n. f. I(e)-po-me′(mo^{2}e^{2})-a^{3}. From ἴψ, a worm that eats vine-buds, and ὅμοιος, like. Fr., *ipoméa, ipomée.* Ger., *Trichterwinde.* False bind-weed; of Linnæus, a genus of the *Convolvulaceæ*, tribe *Convolvuleæ.* [B, 19, 34, 42, 173, 180 (α, 24).]—**I. acetosæfolia.** Ger., *sauerampferblättrige Trichterwinde.* A South American and West Indian species, used as a bath in dropsy and gout. The sap is purgative. [B, 180, 212 (α, 24).]—**I. anceps.** See *I. turpethum.*—**I. aquatica.** See *I. repens.*—**I. arborea.** A species used like *I. muricoides.* [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—**I. batatas.** Fr., *batate, artichaut des Indes, truffe douce, patate de Malaga.* Ger., *Batate, Bataten-Trichterwinde.* A species supposed by some to be indigenous to India, by others to America; now cultivated throughout all tropical and subtropical regions for its tuberous root, the sweet potato. [B, 19, 77, 173, 180, 185 (α, 24).]—**I. batatoides.** A South American species, by some identified with *I. orizabensis.* The root contains a purgative resin. [B, 19, 275 (α, 24).]—**I. bicolor.** See *I. nil.*—**I. bifida.** See *I. cymosa.*—**I. bona nox.** Moon-flowers (or -creeper), good-night plant; an East and West Indian species. The root contains resin, volatile oil, fatty matter, albumin, starch, malic acid, and various salts. The natives use the root-bark as a purgative. [B, 172, 185, 275 (α, 24).]—**I. brachypoda.** Sp., *batatilla.* A forage-plant growing in Mexico. ["Proc. of the Am. Pharm. Assoc.," xxvii (α, 39).]—**I. brasiliensis.**—The *I. pes capræ.* [B, 172, 214, 215, 496 (α, 35).]—**I. cærulea.** A species indigenous to India, having purgative seeds. [L, 107.]—**I. caliginosa.** See *I. cymosa.*—**I. calobra.** A species growing in Central Australia having esculent roots. [B, 314 (α, 35).]—**I. campanulata.** An East Indian species. The leaves and fruit are used in snake-bites. [B, 180 (α, 24).]—**I. carnosa.** See *I. acetosæfolia.*—**I. Catesbæi.** A South American species identified by some with *I. batatas*, and cultivated like the latter for its edible roots. [B, 180 (α, 24), 212.]—**I. cathartica.** A species the juice of which is used in Hayti as a drastic purgative. [B, 180 (α, 24).]—**I. cymosa.** A species found in the East Indies and the Islands of the Indian Ocean. The leaves are used in the Moluccas as an emollient application in abscesses and

IPOMŒA BATATAS. [A, 327.]

ulcers. Its seeds, with those of *I. sepiaria*, are believed to be the *laldana* (red seed) sold in the Bengal bazaars under the name of *shapussundo*, which yield a mucilage when soaked in water, and are used as a gentle aperient and as an alterative in cutaneous diseases. [B, 212; B. 172, 185 (α, 24).]—**I. denticulata.** An East Indian species used in the preparation of a salve to prevent baldness. [B, 180 (α, 24).]—**I. digitata.** A species found in New Holland, India, Java, the Mauritius, West Africa, and South America, and cultivated in western tropical Africa for its long roots, which are not unpleasant to the taste. In the East Indies they are used as a purgative, in menstrual disorders, and in some fevers. [B, 19, 180 (α, 24), 212.]—**I. dissecta.** 1. Of Pursh, the *I. sinuata.* 2. Of Willdenow, a species found in Trinidad. The juice has a strong prussic-acid odor; probably identical with *Convolvulus dissectus.* [B. 18, 34 (α, 24).]—**I. edulis.** A species found in Japan. The tuberous roots are used like those of *I. batatas.* [B, 180 (α, 24).]—**I. eriosperma.** See *I. digitata.*—**I. gemella.** A species found in the East Indies, where its mucilaginous leaves, boiled with clarified butter, are used in aphthæ. [B, 172, 173, 180 (α, 24).]—**I. Gerrardi.** The wild Natal cotton-plant. The seeds yield a textile material resembling true cotton. [B, 19, 275 (α, 24).]—**I. gossypifolia.** See *I. digitata.*—**I. grandiflora.** 1. Of Roxburgh, the *I. bona nox.* 2. Of Römer and Schultes, a species found in the East Indies, used in snake-bites (probably identical with *I. bona nox*). [B, 172, 180, 185 (α, 24).]—**I. hederacea.** An American species resembling *I. nil.* [B, 215.]—**I. Heynei.** See *I. cymosa.*—**I. insignis.** See *I. digitata.*—**I. jalapa, I. jalappa.** Fr., *jalap, méchoacan noir.* Ger., *Jalappenwurzel-Trichterwinde, Xalapa-Winde.* 1. Of Pursh and Desfontaines, a species found in Mexico and the southern United States, yielding Mechoacan root, which was once used in Europe as a purgative, and for a long time erroneously identified with true jalap. 2. Of Nuttall, the *I. purga.* [B, 5, 18, 19, 173, 180 (α, 24).]—**I. latiflora.** See *I. grandiflora* (2d def.).—**I. littoralis.** See *I. acetosæfolia.*—**I. macrorrhiza.** 1. Of Michaux, the *I. jalapa* (1st def.), or a variety of it. 2. Of Römer and Schultes, a West Indian species, the root of which is used as a drastic purgative. [B, 5, 173, 180 (α, 24).]—**I. magapotamica.** A species growing in southern Brazil and the Argentina. The root serves as jalap. [B, 314 (α, 35).]—**I. malabarica.** See ARGYREIA *malabarica.*—**I. maritima.** See *I. pes capræ.*—**I. mauritiana.** See *I. digitata.*—**I. mechocanna.** See *I. jalapa* (1st def.).—**I. mextitlanica.** A plant imperfectly known, and doubtfully referred to this genus. Its root is said to be used as a purgative by the Mexicans. [B, 214 (α, 35).]—**I. muricoides.** Sp., *palo del muerto* [Mex. Ph.]. A species growing in warm regions. A decoction of the branches is used for baths in paralysis. It contains a white, crystalline principle soluble in ether and in chloroform. [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72.]—**I. nil.** Fr., *ipoméa nil.* The blue morning-glory, a widely distributed species, well known as a garden annual. Its specific name *nil* (indigo) is derived from the clear-blue color of the border of its large white flowers. In India its seeds (known as *kaldana*), roasted and pulverized, are used like jalap, being superior in flavor. [B, 34, 172, 173 (α, 24).]—**I. olanda.** See *I. cymosa.*—**I. operculata.** Fr., *liseron à opercules.* A species found in Brazil, where the large tuberous roots (called *batata de purga*) are used as a purgative. [B, 180 (α, 24).]—**I. orizabensis.** Sp., *yerba de las ánimas.* See CONVOLVULUS *orizabensis.*—**I. pandurata.** Fr., *rhubarbe sauvage, liseron sinué.* Ger., *geigenförmige Trichterwinde.* The *mechameck* of the North American Indians, wild jalap, wild potato, man-root, man-of-the-earth; a species found in sandy fields from New York to Georgia, and westward to Illinois. Its root is said to be as effectual a purgative as jalap, and is sometimes met with in commerce. [B, 5, 34, 173, 180, 275 (α, 24); "Lancet," June 6, 1885. p. 1051; "Proc. of the Am. Pharm. Assoc.," xxix, xxx (α, 39).]—**I. paniculata.** 1. Of R.

Brown, see *I. digitata.* 2. Of Burmann, a species of the genus *Convolvulus* (*Convolvulus parviflorus*). [B, 212, 214, 309 (α, 35).]—**I. papiru.** Of Ruiz and Pavón, a laxative species found in Peru. [B, 180 (α, 24).]—**I. pes capræ.** Goat's-foot creeper, sea-side potato; a species found on the coast of Georgia and common on sandy beaches in India, where it is called *murja devi.* Its boiled leaves are used as an external anodyne, internally in colic, and in decoction in rheumatism. [B, 34, 172 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxv (α, 39); "Ind. Med. Gaz.," Nov., 1886, p. 325.]—**I. pes tigridis.** Cing., *diwipahuru.* The *arti* of Malabar; a species indigenous to the East Indies, where the leaves are used as an emollient application to tumors and the bites of rabid dogs. [B, 88, 121; B, 180 (α, 24).]—**I. plantensis.** See *I. digitata.*—**I. platanifolia.** A South American species, cultivated like *I. batatas* for its sweet, edible roots. [B, 180 (α, 24).]—**I. purga.** Fr., *ipoméa purgatif.* Ger., *purgirende Trichterwinde.* A species growing in the Mexican Andes. Its roots are the jalap of the pharmacopœias. [B, 5, 18, 173, 180 (α, 24).] See Jalapa.—**I. purpurea.** The common or purple morning-glory, a well-known climber found in fields in the middle and western United States. [B, 19, 34, 275 (α, 24).]—**I. quamoclit.** Fr., *ipoméa quamoclit, fleur cardinale.* Sp., *flor de Guillermo.* The sweet-William of Barbadoes, cypress-vine; an East Indian species. The juice of the leaves (*folia quamoclit*) is used as a sternutatory. [B, 34, 173, 180 (α, 24).]—**I. reniformis.** Bom., *underakáni.* Hind., *musákáni.* Sanscr., *mushaka Karani.* A species found in India, where it is used as an alterative, deobstruent, and diuretic, and in rheumatism, headache, etc. [A, 479 (α, 21).]—**I. repens.** Fr., *ipoméa rampant.* A species found in the East and West Indies and in Arabia; used as a purgative, especially in dropsy, and as a cataplasm in abscesses. [B, 173, 180 (α, 24).]—**I. Rothii.** See *I. cymosa.*—**I. schiedeana.** See *I. purga.*—**I. sepiaria.** A species found in the East Indies (see under *I. cymosa*). [B, 172 (α, 24).]—**I. Sescossii.** Sp., *espanta vaquero.* A Mexican species, recommended in rabies. [B, 121 (α, 24).]—**I. simulans.** Fr., *faux jalap, jalap digité.* Of Hanbury, a species closely related to *I. purga*, growing in Mexico. It is the source of Tampico jalap (*q. v.*). [B, 5, 18, 104 (α, 24).]—**I. sinuata.** A twining species growing in Georgia and Florida, and found in the West Indies, where it is called "noyau plant." The bruised leaves have a decided bitter-almond odor, and were originally used in making the liqueur known as *noyau.* [B, 34 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxxiii (α, 39).]—**I. speciosa.** See Argyreia *speciosa.*—**I. stans.** Sp., *tanibata* [Mex. Ph.]. A species found in Mexico having a purgative root. [J. M. Maisch, "Am. Jour. of Pharm.," March, 1886, p. 122.]—**I. subtriloba.** A Peruvian species. The root is a drastic purgative. [B, 180 (α, 24).]—**I. tridentata.** An East Indian species, used in decoction in gastric fevers, hepatic diseases, and acute gout. [B, 180 (α, 24), 212.]—**I. triflora.** Sp., *jalapa de Querétaro* [Mex. Ph.]. A species used in Mexico as a drastic purgative. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.]—**I. triloba.** A species growing in Japan, Florida, and tropical America, used as a purgative; by some identified with *I. nil.* [B, 173, 180 (α, 24).]—**I. triquetra.** See *I. turpethum.*—**I. tuberosa.** Fr., *ipoméa tubéreux, liane à tonnelles* (1st def.). 1. The arbor-vine of Jamaica; of Linnæus, a West Indian species cultivated for its edible tuberous roots. [B, 19, 173, 180 (α, 24), 212.] 2. Of Meyer, see *I. digitata.*—**I. turpethum.** Fr., *turbith végétal.* Ger., *Turpith-Trichterwinde.* Tamil, *shevadie.* Tel., *tellategada.* Hind., *duhkulmi, pitohrinaka patara, turabeda, nisota.* Beng., *doohkulnee, teori.* Bom., *nishotara, phutakari.* Guz., *nasotará.* Sanscr., *trivrita, triputa.* Indian jalap; a species found in the East Indies. The root, *radix turbith* (seu *turpethi* [*veri*]), *turpethum vegetabile*, furnishes turpethum. The root and stems are in general use in India as a cathartic. [B, 5, 172, 173, 180 (α, 24), 212; "Proc. of the Am. Pharm. Assoc.," xxviii (α, 39).]—**I. umbellata.** See *I. cymosa.*

IPOMŒIC ACID, n. I-po-me′i^{2}k. Fr., *acide ipoméique* (ou *ipomique*). Ger., *Ipomsäure.* See Convolvulvic acid.

IPRÉAU (Fr.), n. E-pra-o. The *Populus alba.* [B, 121 (α, 35).]

IPS (Lat.), n. m. I^{2}ps(eps). Gen., *ip′os, ip′is.* Gr., ἴψ. A species of *Cynips.* [L, 30, 50 (α, 14).]

IPSUS (Lat.), n. m. I^{2}ps′u^{3}s(u^{4}s). Gr., ἴψος, ἰψός. The *Quercus ruber.* [B, 121 (α, 24).]

IPSWICH, n. I^{2}ps′wi^{2}ch. A place in Suffolk, England, where there was formerly a mineral spring. [α, 14.]

IQUETAYA, n. A Brazilian herb said to be used to adulterate senna. [B, 121 (α, 35).]

IRACUNDUS (Lat.), n. m. I(e)-ra^3-ku^{3}n(ku^{4}n)′du^{3}s(du^{4}s). From *ira*, anger. An old term for the rectus externus oculi muscle. [F.]

IRAI (Fr.), n. E-re^2. A place in the department of Orne, France, where there is a gaseous and ferruginous spring. [L, 30, 105 (α, 14).]

IRALGIA (Lat.), n. f. I(e)-ra^{2}l(ra^{3}l)′ji^2(gi^2)-a^3. From ἶρις, the iris, and ἄλγος, pain. Fr., *iralgie.* Ger., *Regenbogenhautschmerz.* An old term for pain in the iris (a symptom which can not be localized in the iris). [F.]

IRARÆOSIS (Lat.), n. f. I(e)-ra(ra^3)-re(ra^3-e^2)-o′si^{2}s. Gen., *-os′eos* (*-is*). See Tridoleptynsis.

IRAY (Fr.), n. E-re^2. See Irai.

IREALGIA (Lat.), n. f. I(e)-re(re^2)-a^{2}l(a^{3}l)′ji^2(gi^2)-a^3. See Iralgia.

IREANCISTRON (Lat.), **IREANKISTRON** (Lat.), n′s n. I(e)-re(re^2)-a^{2}n(a^{3}n^2)-si^{2}s(ki^{2}s)′tro^{2}n, -a^{2}n^2(a^{3}n^2)-ki^{2}s′tro^{2}n. See Iriankustrium.

IREDEREMIA (Lat.), n. f. I(e)-re^{2}d-e^{2}r-e(a)′mi^2-a^3. See Irideremia.

IREONCION (Lat.), n. n. I(e)-re^2-o^{2}n(o^{2}n^2)′si^2(ki^2)-o^{2}n. See Iridoncus.

IREOPERISPHINXIS (Lat.), n. f. I(e)-re^2-o(o^3)-pe^{2}r-i^2-sfi^{2}n^{2}x′-i^{2}s. Gen., *-sphinx′eos* (*-is*). From ἶρις, the iris, περί, around, and σφίγξις, a constriction. Ger., *Regenbogenhautumschnürung.* The operation of drawing the iris from all sides in toward a central point, and there fixing it, so as to form an artificial pupil. [L, 50 (α, 14).]

IREOS (Lat.), n. I(e)′re^2-o^{2}s. The root of *Iris florentina.* [B, 5 (α, 24).]—**Wild i.** The *Iris fœtidissima.* [A, 505 (α, 21).]

IRIAN, adj. I′ri^2-a^{2}n. Fr., *irien.* See Iridal.

IRIANCISTRON (L t.), **IRIANKISTRIUM** (Lat.), **IRIANKISTRON** (Lat.), n′s n. I(e)-ri^2-a^{2}n(a^{3}n^2)-si^{2}s(ki^{2}s)′tro^{2}n, -ki^{2}s′-tri^2-u^{3}m(u^{4}m), -ki^{2}s′tro^{2}n. From ἶρις, the iris of the eye, and ἄγκιστρον, a fish-hook. Ger., *Irishaken.* A hook-shaped instrument used in the operation for artificial pupil by separation. [L, 50, 107 (α, 14).]

IRIBLE (Fr.), n. E-re-bl′. The *Atriplex hortensis.* [B, 173 (α, 24).]

IRIDACEÆ (Lat.), n. f. pl. I(e)-ri^{2}d-a(a^3)′se^2(ke^2)-e(a^3-e^2). From *Iris*, one of the genera. Fr., *iridacées.* An order of Lindley's narcissal alliance, corresponding essentially with the *Irideæ.* [B, 19, 34, 170 (α, 24).] The *Irideæ* (Fr., *iridées*; Ger., *Irideen, Schwertlilien*) are: Of De Candolle, an order of the *Monocotyledones phanerogamæ*, subsequently of the *Endogenæ phanerogamæ*; and of Bentham and Hooker, an order of the *Epigynæ*, comprising the *Moræeæ, Sisyrinchieæ*, and *Ixieæ.* [B, 1, 42, 170 (α, 24).]

IRIDADENOSIS (Lat.), n. f. I(e)-ri^{2}d-a^{2}d(a^{3}d)-e^{2}n-o′si^{2}s. Gen., *-os′eos* (*-is*). From ἶρις, the iris, and ἀδήν, a gland. Ger., *Irisdrüsenkrankheit.* A glandular disease of the iris. [L, 50 (α, 14).]

IRIDÆA (Lat.), n. f. I(e)-ri^{2}d-e′(a^3′e^2)-a^3. From ἶρις, a bright-colored circle surrounding another body. Fr., *iridée.* A genus of rose-spored cryptonemiaceous *Algæ.* [B, 19, 121 (α, 24).]—**I. edulis.** A species having a tough, dark-red frond, sometimes eaten in Ireland and elsewhere, and in England said to be used as a sudorific and febrifuge. It also furnishes a dye (probably fugitive). [B, 19, 173 (α, 24).]—**I. palmata.** The *Halimenia palmata.* [B, 173 (α, 24).]

IRIDÆMIA (Lat.), n. f. I(e)-ri^{2}d-e′(a^3′e^2)-mi^2-a^3. From ἶρις, the iris, and αἷμα, blood. Ger., *Regenbogenhautblutung.* Hæmorrhage from the iris. [L, 50, 107 (α, 14).]

IRIDAL, adj. I^{2}r′i^2-d′l. From ἶρις, the iris. Fr., *irien, iridien.* Pertaining to the iris.

IRIDALGIA (Lat.), n. f. I^2(e)-ri^{2}d-a^{2}l(a^{3}l)′ji^2(gi^2)-a^3. From ἶρις, the iris, and ἄλγος, pain. Fr., *iridalgie.* Ger., *Iridalgie, Regenbogenhautschmerz.* The pain and annoyance caused by the presence of isolated synechiæ in the iris. [F.]

IRIDALLOCHROSIS (Lat.), n. f. I^2(e)-ri^{2}d-a^{2}l(a^{3}l)-lo(lo^3)-kro-(ch^{2}ro)′si^{2}s. Gen., *-chros′eos* (*-is*). From ἶρις, the iris, ἄλλος, different, and χρῶσις, a coloring. Ger., *Irisverfärbung.* A change in the color of the iris. [L, 50 (α, 14).]

IRIDANCISTRON (Lat.), **IRIDANKISTRON** (Lat.), n′s, n. I^2(e)-ri^{2}d a^{2}n(a^{3}n^2)-si^{2}s(ki^{2}s)′tro^{2}n, -ki^{2}s′tro^{2}n. See Iridankistrium.

IRIDARÆOSIS (Lat.), n. f. I^2(e)-ri^{2}d-a^{2}r(a^{3}r)-e(a^3-e^2)-o′si^{2}s. Gen., *-os′eos* (*-is*). From ἶρις, the iris, and ἀραίωσις, a becoming thin or porous. See Iridoleptynsis.

IRIDARIEÆ (Lat.), n. f. pl. I^2(e)-ri^{2}d-a(a^3)-ri(ri^2)′e^2-e(a^3-e^2). From ἶρις, an order of plants. Of Dumortier, an order of the *Gynochlamydæ*, consisting of the *Irideæ, Alstromeriaceæ, Hypoxideæ*, and *Campynemaceæ.* [B, 170 (α, 24).]

IRIDATION, n. I^{2}r′i^{2}d-a′shu^{3}n. See Iridescence.

IRIDAUXE (Lat.), **IRIDAUXESIS** (Lat.), n′s f. I^2(e)-ri^{2}d-a^{4}x′(a^3′u^{4}x)-e(a), -a^{4}x(a^3-u^{4}x)-e(a)′si^{2}s. Gen., *-aux′es* (*-œ*), *es′eos* (*-is*). From ἶρις, the iris, and αὔξη or αὔξησις, growth. Fr., *iridauxésis.* Ger., *Regenbogenhautverdickung.* An old term for a tumefaction or hypertrophy of the iris, usually from exudation of fibrinous matter into its tissue. [F.]

IRIDAVULSION, n. I^{2}r′i^{2}d-a^2-vu^{3}l′shu^{3}n. From ἶρις, the iris, and *avulsio*, a plucking off. The total removal of the iris by tearing it from its peripheral attachment. [L, 107.]

IRIDEA (Lat.), n. f. I^2(e)-ri^{2}d-e(a)′a^3. See Iridæa.

IRIDECTOMEDIALYSIS (Lat.), n. f. I^2(e)-ri^{2}d-e^{2}kt-o-(o^2)-me(ma)-di^2-a^{2}l(a^{3}l)′i^2(u^6)-si^{2}s. Gen., *-ys′eos* (*-al′ysis*). From ἶρις, the iris, ἐκτομή, a cutting out, and διάλυσις, a separating. Of I. A. Schmidt, an old method of making an artificial pupil, which consisted in detaching a portion of the iris at its periphery, and excising the portion so detached. [F.]

IRIDECTOME, n. I^{2}r-i^{2}d-e^{2}k′tom. From ἶρις, the iris, and ἐκτομή, a cutting out. Ger., *Regenbogenhautausschneider.* A knife used in iridectomy. [L, 50 (α, 14).]

IRIDECTOMIRT (Ger.), n. E-re-de^{2}k-to-mert′. A person on whom iridectomy has been performed.

IRIDECTOMY, n. I^{2}r-i^{2}d-e^{2}k′to-mi^2. Lat., *iridectomia* (from ἶρις, the iris, and ἐκτομή, a cutting out). Fr., *iridectomie.* Ger., *Iridectomie, Iridektomie, Regenbogenhautexcision, Regenbogenhautausschneidung.* It., *iridetomia.* Sp., *iridectomia.* The excision of a piece of the iris involving its entire breadth, from sphincter margin to peripheral attachment, thus forming an artificial pupil; done to improve vision, to influence the course of an active disease (*e. g.*, glaucoma, iritis, or corneal ulcer), to prevent the occlusion and exclusion of the pupil, and as a stage in the extraction of cataract. The operation consists in opening the anterior chamber and excising a piece of iris. The lids are held open by a spring speculum, and the eyeball fixed in position by fixation forceps. The incision is usually made with a bent lance-knife in the limbus or scleral margin, but exceptionally nearer the corneal

centre. It may be made upward or downward, inward or outward, according to circumstances. As soon as the point of the knife is seen in the anterior chamber, the knife is to be pushed forward in front of and parallel to the iris, a varying distance according to the size of the desired artificial pupil. In withdrawing the knife, the handle should be depressed so that the point is brought near or against the posterior surface of the cornea, so as to avoid wounding the capsule of the lens. A fine iris-forceps is then introduced (closed) through the wound as far as the peripheral margin of the sphincter, and then opened, and the iris seized and drawn out. If there are no pupillary adhesions, this is done with the greatest ease, but if there are either posterior or anterior adhesions, this may require some force. As soon as the iris is drawn out of the wound and put on the stretch, it is to be cut off close to the eyeball with a pair of scissors curved on the flat. A piece of iris is thus excised up to the extreme periphery, giving the resulting pupil the shape of a keyhole. [F.]—**Antiphlogistic i.** An i. performed for the purpose of subduing or preventing inflammation. [a, 29.]—**Diametric i.** I. performed on opposite sides of the same eye, so that the pupil extends diametrically from one edge of the cornea to the other. [a, 29.]—**Optical i.** An i. performed for the improvement of vision. [a, 29.]

IRIDECTROPIUM (Lat.), n. n. I[2](e)-ri[2]d-e[2]k-tro(tro[2])'pi[2]-u[3]m(u[4]m). From ἶρις, the iris, and ἐκτρόπιον, an eversion. Ger., *Auswärtswendung der Regenbogenhaut.* An eversion of a portion of the iris. [L. 50, 107 (a, 14).]

IRIDELCOSIS (Lat.), n. f. I[2](e)-ri[2]d-e[2]l-ko'si[2]s. Gen., *-os'eos (-is).* From ἶρις, the iris, and ἕλκωσις, ulceration. Ger., *Iridelkosis.* It., *iridelcosi.* An old term for ulceration of the iris. [F.]

IRIDENCLEISIS (Lat.), **IRIDENCLEISMUS** (Lat.), n's f. and m. I[2](e)-ri[2]d-e[2]n[2]-klis'(kle[2]-es')-i[2]s, -kliz'(kle[2]i[2]s)-mu[3]s(mu[4]s). Gen., *-cleis'eos (-is), -cleis'mi.* From ἶρις, the iris, and ἐγκλεῖν, to shut in. Fr., *iridenclise, iridencléisis.* Ger., *Iridenkleisis, Regenbogenhauteinschliessung.* It., *iridencleisi, iridenclisi.* An operation for artificial pupil, devised by Adams in 1812, and by Himly in 1816, which consists practically in displacement of the pupil. An incision is made through the cornea near its periphery, a portion of the latter is detached, and the iris caused to prolapse through the wound: either by pressure or by introducing a Tyrrell's hook into the anterior chamber, and pulling it out. The pupil is thus displaced toward the wound, and away from the opaque spot in the cornea which interfered with vision. The prolapsed portion of the iris is strangulated in the corneal wound, and drops off. [F.]

IRIDENTROPIUM (Lat.), n. n. I[2](e)-ri[2]d-e[2]n-tro(tro[2])-pi[2]-u[3]m(u[4]m). From ἶρις, the iris, and ἐντροπία, a turning inward. Ger., *Einwärtswendung der Regenbogenhaut.* Inversion of a portion of the iris. [L, 50, 107 (a, 14).]

IRIDEOUS, adj. I[2]r-i[2]d'e[2]-a[3]s. Fr., *irideux.* Belonging to or having the characters of the *Irideæ.* [a, 35.]

IRIDEREMIA (Lat.), n. f. I[2](e)-ri[2]d-e[2]r-e(a)'mi[2]-a[2]. From ἶρις, the iris, and ἐρημία, a want of. Fr., *iridérémie.* Ger., *Irismangel, Irideremie.* It., *mancanza dell' iride.* Sp., *falta del iris.* Absence or loss of the iris, either partial or entire, acquired or congenital: sometimes intentionally produced by an operation. [F.]—**I. partialis.** An interruption in the iridal ring, half or even less of the normal iris being present; a congenital defect. [F.]

IRIDES (Lat.), n. f. I(e)'ri[2]d-ez(e[2]s). Pl. of *iris (q. v.)*; of Jussieu, an order of plants corresponding essentially to the *Irideæ.* [B, 170 (a, 24).]

IRIDESCENCE, n. I[2]r-i[2]-de[2]s'e[2]ns. From *iridescere*, to shine with the colors of the rainbow. 1. The property of decomposing light into the colors of the spectrum. 2. The condition or state of being iridescent. [L, 107; a, 17.]

IRIDESCENT, adj. I[2]r-i[2]-de[2]s'e[2]nt. Lat., *iridescens.* Fr., *iridescente.* Ger., *i., irisirend.* It., *iridescente.* Glittering with many colors which change in different lights; possessing iridescence. [L, 343.]

IRIDESIS (Lat.), n. f. I[2](e)-ri[2]d'e[2]s-i[2]s. Gen., *-es'eos (-id'esis).* From ἶρις, the iris, and δέσις, a binding together. An operation for artificial pupil which consists in tying off a portion of the iris. [L, 107.]

IRIDEUX (Fr.), adj. E re-du[5]. See IRIDIOUS.

IRIDIAN, adj. I-ri[2]d'i[2]-a[2]n. Fr., *iridien.* See IRIDAL.

IRIDIBROMIDE, n. I[2]r-i[2]d-i-brom'i[2]d(id). A salt of bromiridic acid; a compound of iridium tetrabromide with the bromide of another element or radicle. [B, 3.]

IRIDIC, adj. I[2]r-i[2]d'i[2]k. Lat., *iridicus.* Fr., *iridique.* Ger., *iridisch, Iridium-.* Pertaining to iridium; containing iridium as a quadrivalent radicle. [B.]—**I. acid.** Fr., *acide iridique.* An acid, existing only in combination with bases, formed by treating iridium with potassium nitrate. [B, 46 (a, 39).]

IRIDICHLORIDE, n. I[2]r-i[2]d-i[2]-klor'i[2]d(id). A salt of chloriridic acid; a compound of iridium tetrachloride with the chloride of another element or radicle. [B, 3.]

IRIDICYANIC ACID, n. I[2]r-i[2]d-i[2]-si-a[2]n'i[2]k. Fr., *acide iridicyanique.* Ger., *Iridiumcyansäure.* A crystalline substance, $H_6Ir_2(C_3N_3)_4$, acting as a hexabasic acid. [B, 3.]

IRIDICYANIDE, n. I[2]r-i[2]d-i[2]-si'a[2]n-i[2]d(id). A salt of iridicyanic acid. [B, 3.]

IRIDIEN (Fr.), adj. E-re-de-a[2]n[2]. See IRIDAL.

IRIDIN, n. I[2]r'i[2]d-i[2]n. From *Iris*, a genus of plants. Ger., *I.* An oleoresin obtained from the root of *Iris versicolor*; used as a cholagogue. [A, 319 (a, 21); B, 5 (a, 24).]

IRIDIOBROMIDE, n. I[2]r-i[2]d-i[2]-o-brom'i[2]d(id). A compound of iridious bromide with the bromide of another element or radicle. [B, 3.]

IRIDIOCHLORIDE, n. I[2]r-i[2]d-i[2]-o-klor'i[2]d(id). A compound of iridious chloride with the chloride of another element or radicle. [B, 3.]

IRIDIONITRATE, n. I[2]r-i[2]d-i[2]-o-ni'trit. A compound of iridious nitrate with the nitrate of another element or radicle. [B, 3.]

IRIDIOUS, adj. I[2]r-i[2]d'i[2]-u[3]s. Fr., *irideux.* Containing iridium as a bivalent radicle. According to some, the term is used synonymously with irido-iridic, the term hypoiridious being used for i. [B.]

IRIDIPENNÉ (Fr.), adj. E-re-de-pe[2]nna. From ἶρις, the rainbow, and *penna*, a feather. Having iridescent wings. [L, 41 (a, 14).]

IRIDITIS (Lat.), n. f. I[2](e)-ri[2]d-i(e)'ti[2]s. Gen., *-it'idos (-idis).* Fr., *iridite.* Ger., *I.* A more correct form of *iritis (q. v.).*

IRIDIUM (Lat.), n. n. I[2](e)-ri[2]d'i[2]-u[3]m(u[4]m). From ἶρις, the rainbow. Fr., *i.* Ger., *I.* It., Sp., *iridio.* A metallic element discovered by Tennant in 1804. It is found in nature associated with osmium and platinum. It is a white, lustrous, brittle metal, almost infusible, and heavier than platinum, having the sp. gr. of 22·38. It may also be obtained as a porous mass called *spongy i.*, and as a very fine black powder called *i. black.* In composition it acts as a trivalent radicle, forming *iridious* salts, and as a quadrivalent radicle forming *iridic* salts. The soluble salts of i. are actively purgative and emetic. Symbol, Ir; atomic weight, 192·7. [B, 3; B, 88 (a, 39).]—**Azotite d'i.** (Fr.). See *I. nitrite.*—**Bioxyde d'i.** (Fr.). See *I. dioxide.*—**Bisulfure d'i.** (Fr.). See *I. disulphide.*—**Chlorure d'i.** (Fr.). See *I. chloride.*—**I. arsenate.** Fr., *arséniate d'i.* Ger., *arsensaures I.* A salt of i. and arsenic acid, a brown precipitate formed on adding sodium arsenate to i. chloride, and heating. [B, 2.]—**I. bromide.** Fr., *bromure d'i.* Ger., *I'bromür* (1st def.), *I'bromid* (2d def.). 1. See *I. tribromide.* 2. See *I. tetrabromide.*—**I. chloride.** Fr., *chlorure d'i.* Ger., *I'chlorür* (1st def.), *I'chlorid* (2d def.). 1. See *I. trichloride.* 2. See *I. tetrachloride.*—**I. dioxide.** Fr., *dioxyde d'i., bioxyde d'i.* Ger., *I'oxyd.* A black powder, IrO_2, insoluble in acids. [B, 3; B, 158, 270 (a, 38).]—**I. disulphide.** Fr., *bisulfure d'i.* Ger., *I'sulfid.* A black powder, IrS_2. [B, 3.]—**I. hydrate, I. hydroxide.** Fr., *hydrate d'i.* Ger., *I'hydrat.* 1. I. sesquihydroxide, or irido-iridic hydroxide. 2. I. tetrahydroxide.—**I. iodide.** Fr., *iodure d'i.* Ger., *I'jodid.* See *I. tetraiodide.*—**I. monosulphide.** Fr., *monosulfure d'i.* Ger., *I'sulfür.* A compound of i. and sulphur, IrS. [B, 3.]—**I. nitrite.** Fr., *azotite d'i., nitrite d'i.* Ger., *I'nitrit, salpetrigsaures I.* A body, $Ir_2(NO_2)_6$, entering into the formation of the iridio-nitrites. [B.]—**I. oxide.** Fr., *oxyde d'i.* Ger., *I'oxydul* (1st def.), *I'oxyd* (2d def.). 1. See *I. sesquioxide.* 2. See *I. dioxide.*—**I'oxydhydrat** (Ger.). See *I. tetrahydroxide.*—**I'oxydul** (Ger.). See *I. sesquioxide.*—**I'oxydulhydrat** (Ger.). See *I. sesquihydroxide.*—**I. sesquibromide.** Fr., *sesquibromure d'i.* See *I. tribromide.*—**I. sesquichloride.** Fr., *sesquichlorure d'i.* See *I. trichloride.*—**I. sesquihydroxide.** Ger., *I'sesquihydroxyd, I'oxydulhydrat.* More properly, i. trihydroxide, a yellowish-green substance, $Ir_2(OH)_6$; according to others, a black powder insoluble in acids, but having a violet modified form soluble in certain acids. [B, 3; B, 270 (a, 38).]—**I. sesquioxide.** Fr., *sesquioxyde d'i.* Ger., *I'sesquioxyd.* Irido-iridic oxide, Ir_2O_3, a bluish-black powder formed by heating i. in the air, and decomposed again by raising the temperature to 800° C. [B, 3.]—**I. sesquisulphide.** Fr., *sesquisulfure d'i.* Irido-iridic sulphide; a brown powder, Ir_2S_3. [B, 3.]—**I. sulphide.** Fr., *sulfure d'i.* See *I. monosulphide, I. sesquisulphide,* and *I. disulphide.*—**I. sulphite.** Fr., *sulfite d'i.* Ger., *schwefligsaures I'oxydul.* Irido-iridic sulphite, $Ir_2(SO_3)_3 + 6H_2O$. It forms yellow crystals. [B, 3.]—**I. tetrabromide.** Fr., *tétrabromure d'i.* Ger., *I'bromid.* Iridic bromide, a blue, crystalline substance, $IrBr_4$. With hydrobromic acid it forms bromiridic acid, and with the bromides of other metals double salts, called iridibromides. [B.]—**I. tetrachloride.** Fr., *tétrachlorure d'i.* Ger., *I'chlorid.* Iridic chloride, a substance, $IrCl_4$. With hydrochloric acid it forms chloriridic acid, and with the chlorides of other metals double salts called iridichlorides. [B, 3.]—**I. tetrahydroxide.** Ger., *I'oxydhydrat.* A substance, $Ir(OH)_4$, having the color of indigo. [B, 3.]—**I. tetraiodide.** Fr., *tétraiodure d'i.* Ger., *I'jodid.* Iridic iodide, a black powder, IrI_4. [B, 3.]—**I. tribromide.** Fr., *tribromure d'i.* Ger., *I'bromür.* Iridious bromide, a substance, $Ir_2Br_6 + 8H_2O$, occurring in olive-green crystals. With the bromides of other elements and radicles it forms compound salts called iridiobromides. [B, 3.]—**I. trichloride.** Fr., *trichlorure d'i.* Ger., *I'chlorür.* Iridious chloride, an olive-green substance, Ir_2Cl_6, forming, with the chlorides of other elements or radicles, double salts called iridiochlorides. [B, 3.]—**I. trihydroxide.** See *I. sesquihydroxide.*—**Monosulfure d'i.** (Fr.). See *I. monosulphide.*—**Oxyde d'i.** (Fr.). See *I. oxide.*—**Schwefligsaures I'oxydul** (Ger.). See *I. sulphite.*—**Sesquichlorure d'i.** (Fr.). See *I. trichloride.*—**Sesquioxyde d'i.** (Fr.). See *I. sesquioxide.*—**Sesquisulfure d'i.** (Fr.). See *I. sesquisulphide.*—**Sulfite d'i.** (Fr.). See *I. sulphite.*—**Sulfure d'i.** (Fr.). See *I. sulphide.*

IRIDOALLOCHROSIS (Lat.), n. f. I[2](e)-ri[2]d-o(o[2])-a[2]l(a[2]l)-lo(lo[2])-kro(ch[2]ro)'si[2]s. Gen., *-chros'eos (-is).* See IRIDALLOCHROSIS.

IRIDOAVULSION, n. I[2]r-i[2]d-o-a[2]v-u[3]l'shu[3]n. See IRIDAVULSION.

IRIDOCELE (Lat.), n. f. I[2](e)-ri[2]d-o(o[2])-se(ka)'le(la); in Eng., i[2]r'i[2]d-o-sel. Gen., *-cel'es (-æ).* From ἶρις, the iris, and κήλη, a tumor. Fr., *iridocèle.* Ger., *Irisvorfall.* It., *i., prolasso dell' iride.* Prolapse of the iris through a perforating wound or ulcer in the cornea. [F.]

IRIDOCHORIOIDAL, adj. I[2]r-i[2]d-o-kor-i[2]-oid'a[2]l. From ἶρις, the iris, and χοροειδής, chorioid. Pertaining to the iris and to the chorioid.

IRIDOCHORIOIDITIS (Lat.), n. f. I[2](e)-ri[2]d-o(o[2])-kor(ch[2]o[2]r)-i[2]-oid-i(e)'ti[2]s. Gen., *-it'idos (-idis).* From ἶρις, the iris, and χορο-

εἰδής, chorioid (see also *-itis*). Fr., *irido-chorioïdite.* Ger., *Iridochorioiditis, Entzündung der Regenbogenhaut der Aderhaut.* Inflammation of the uveal tract (*i. e.*, of the iris and chorioid). [F.]—**Consecutive i.** Lat., *i. consecutiva.* I. secondary to iritis. [A, 326 (α, 21).]—**Gummatous i.** Lat., *i. gummatosa.* A very rare disease, running a course similar to iritis gummatosa, but very often involving the ciliary body, chorioid, and sclera, and leading to perforation of the latter before resolution. [F.]—**I. sympathica.** See *Sympathetic i.*—**I. traumatica.** See *Traumatic i.*—**Metastatic i.** Lat., *i. metastatica.* Fr., *irido-choroïdite metastatique.* Ger., *metastatische Irido-chorioïditis.* A secondary, purulent i. occurring in the puerperal state, pyæmia, cerebro-spinal meningitis, or erysipelas. [F.]—**Parenchymatous i.** Lat., *i. parenchymatosa.* See *Purulent i.*—**Plastic i.** Lat., *i. plastica.* The usual form of i., characterized by circumcorneal injection, sensitiveness to pressure, discoloration and sluggishness of the iris, cloudiness of the aqueous humor, opacities in the vitreous, either fixed or floating, and marked failure of vision. [F.]—**Purulent i.** Lat., *i. purulenta.* An i. chiefly characterized by the rapid appearance and disappearance of a hypopyon which comes from the ciliary body. There is but little irritation or injection, and the aqueous humor is only slightly cloudy. This variety does not differ in its symptoms or course from the other forms of i. except in the character of the exudation. [F.]—**Rheumatic i.** Lat., *i. rheumatica.* A plastic form of i. with a marked tendency to relapses, due to a rheumatic diathesis. It is always chronic and obstinate in resisting treatment, and tends to the destruction of the ocular functions. [F.]—**Secondary i.** Any form of i. due to a pre-existent disease. [F.]—**Serous i.** Lat., *i. serosa.* See CYCLITIS.—**Simple i.** See *Plastic i.*—**Spontaneous i.** Lat., *i. spontanea.* A primary i.; in its inception merely a cyclitis. [A, 326 (α, 21).]—**Suppurative i.** Lat., *i. suppurativa.* See *Purulent i.*—**Sympathetic i.** Lat., *i. sympathica.* Fr., *irido-chorioïdite sympathique.* Ger., *sympathische I.* A plastic i. in one eye, secondary to an i. usually traumatic in its fellow. It was until recently regarded as identical with sympathetic ophthalmia. It is always preceded by signs of irritation, and is a very insidious, chronic, and destructive inflammation, having a most unfavorable prognosis. The main seat of the disease is in the iris and ciliary body, and there is more or less serous exudation in addition to the plastic. Treatment is of little avail, but the disease is sometimes self-limited. [F.]—**Syphilitic i.** Lat., *i. syphilitica.* See *Gummatous i.*—**Traumatic i.** Lat., *i. traumatica.* I., usually purulent in character, due to perforating wounds of the eyeball. [F.]

IRIDOCINESIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-si^{2}n(ken)-e(a)'si^{2}s. Gen., *-es'eos (-is).* From ἶρις, the iris, and κίνησις, movement. Ger., *Irisbewegung, Regenbogenhautbewegung.* The movement of the iris (contraction and expansion). [L, 50, 107 (α, 14).]

IRIDOCOLOBOMA (Lat.), n. n. I^2(e)-ri^{2}d-o(o^3)-ko^{2}l-o(o^2)-bom'a^3. Gen., *-om'atos (-atis).* From ἶρις, the iris, and κολόβωμα, a part taken away in mutilation. Fr., *iridocolobome.* Ger., *Iriscolobom, Regenbogenhautspaltung* (2d def.). 1. The part of the iris removed in an iridectomy. [F.] 2. See COLOBOMA *iridis.*

IRIDOCYCLITIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-si^{2}k(ku^{6}k)-li(le)'ti^{2}s. Gen., *-it'idos (-idis).* From ἶρις, the iris, and κύκλος, a circle (see also *-itis*). Fr., *iridocyclite.* Ger., *I.* Inflammation of the iris and ciliary body. [F.]—**Fibrinous i., Plastic i.** I. accompanied by marked effusion of plastic lymph which results in firm adhesion between the iris and ciliary body and the capsule of the lens. [F, 26 (α, 29).]—**Sympathetic i.** Lat., *i. sympathica.* I. of sympathetic origin. [α, 29.]

IRIDO-CYCLO-CHORIOIDITIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-si^{2}k(ku^{6}k)-lo(lo^3)-kor(ch^{2}o^{2}r)-i^2-oid-i(e)'ti^{2}s. Gen., *-it'idos (-idis).* From ἶρις, the iris, κύκλος, a circle, and χοριοειδής, the chorioid (see also *-itis**). Inflammation of the iris, ciliary body, and chorioid, or of the entire uveal tract. [F.]

IRIDOCYTE, n. I^{2}r'i^{2}d-o-sit. From ἶρις, the iris, and κύτος, a cell. Fr., *i.*, *cellule chatoyante.* Ger., *Interferenzzelle, Glanzzelle.* A cell which produces color by reflection or interference of rays of light; due either to its physical structure or to the presence of granules. [Pouchet, "Jour. de l'anat.," 1876, p. 45 (J).]

IRIDODESIS (Lat.), n. f. I^2(e)-ri^{2}d-o^{2}d'e^{2}s-i^{2}s. Gen., *-des'eos (-od'esis).* From ἶρις, the iris, and δέσις, a binding together. Fr., *iridodésis, iridodèse.* Ger., *I.* 1. An operation for making an artificial pupil for optical purposes only, as in opacity of the cornea or lamellar cataract, the pupil being dislocated toward the periphery of the cornea and iris; devised by Critchett, of London. [F.] 2. An operation for lengthening the pupil or changing it into a narrow vertical slit by two small iridectomies at diametrically opposite points on the margin of the cornea; proposed by Bowman. [F.] 3. See IRIDESIS.

IRIDODIALYSIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-di(di^2)-a^{2}l(a^{3}l)'i^2(u^6)-si^{2}s. Gen., *-ys'eos (-al'ysis).* From ἶρις, the iris, and διάλυσις, a loosing. Fr., *iridodialyse.* Ger., *Iridodialysis, Regenbogenhautablösung.* 1. Properly, a detachment of the iris from its peripheral attachments, throughout a greater or less extent, for the purpose of forming an artificial pupil; of De Wecker, a modification of iridotomy after cataract extractions, when the pupil is occluded. An incision is made with a stop knife near the margin of the cornea, and a puncture is made through the iris. Two diverging incisions are then made from the puncture in the iris toward the opposite side of the cornea with De Wecker's scissors, and the portion of the iris included between these incisions is torn from its ciliary attachment. [F; L, 87 (α, 29).] 2. Any separation of the iris from adhesions either to the cornea or the lens capsule. [F.]

IRIDODONESIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-do^{2}n-e(a)'si^{2}s. Gen., *-es'eos (-is).* From ἶρις, the iris, and δονεῖν, to shake. Fr., *iridodonèse.* Ger., *Iridodonesis, Iriszittern.* Tremulousness of the iris, the iris shaking like a thin veil on the slightest movement of the eyeball; due to relaxation of the zonule, dislocation of the lens, fluid vitreous, etc. [F.] Cf. HIPPUS.

IRIDO-ECTOMY, n. I^{2}r-i^{2}d-o-e^{2}k'to-mi^2. See IRIDECTOMY.

IRIDOENCLEISIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-e^{2}n^2-kli'(kle^{2}i^2)-si^{2}s. Gen., *-cleis'eos (-is).* See IRIDENCLEISIS.

IRIDO-IRIDIC, adj. I^{2}r-i^{2}d-o-i^{2}r-i^{2}d'i^{2}k. Containing iridium as an apparently trivalent (but really as a quadrivalent) radicle. [B.]

IRIDOKINESIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-ki^{2}n(ken)-e(a)'si^{2}s. Gen., *-es'eos (-is).* See IRIDOCINESIS.

IRIDOKOLOBOMA (Lat.), n. n. I^2(e)-ri^{2}d-o(o^3)-ko^{2}l-o(o^2)-bom'a^3. Gen., *-om'atos (-atis).* See IRIDOCOLOBOMA.

IRIDOL, n. I^{2}r'i^{2}d-ol. A hydrocarbon obtained from wood-tar, boiling at 47° C., and of the sp. gr. of 0·660. It has an aromatic ethereal odor, strongly refracts light, and is decomposed by chlorine into a camphor-like body, crystallizing in white needles, and an aromatic oil. ["Proc. of the Am. Pharm. Assoc.," xxvi (α, 39).]

IRIDOLEPTYNSIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-le^{2}p-ti^{2}n(tu^{6}n)'-si^{2}s. Gen., *-tyns'eos (-is).* From ἶρις, the iris, and λέπτυνσις, attenuation. Ger., *Dünnerwerden der Regenbogenhaut.* Atrophy or attenuation of the iris. [A, 322.]

IRIDOLINE, n. I^{2}r-i^{2}d'o-len. A base, $C_{10}H_9N$, found in the thick oils of coal tar, boiling at 252° to 257° C., and difficult to crystallize; not to be confounded with its isomer lepidine. [B, 46, 93 (α, 39).]

IRIDOMALACIA (Lat.), n. I^2(e)-ri^{2}d-o(o^3)-ma^{2}l(ma^{3}l)-a(a^3)'-si^2(ki^2)-a^3. From ἶρις, the iris, and μαλακία, softness. Fr., *iridomalacie.* Ger., *Iridomalacie, Iriserweichung.* Softening and degeneration of the iris, an atrophic condition, produced after long-continued inflammation, especially after rheumatic iritis. [F.]

IRIDOMEDIALYSIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-med(me^{2}d)-i^2-a^{2}l(a^{3}l)'i^2(u^6)-si^{2}s. Gen., *-ys'eos (-al'ysis).* See IRIDOMESODIALYSIS.

IRIDOMELANOMA (Lat.), **IRIDOMELANOSIS** (Lat.), n's n. and f. I^2(e)-ri^{2}d-o(o^3)-me^{2}l-a^{2}n(a^{3}n)-o'ma^3, -o'si^{2}s. Gen., *-om'atos (-atis), -os'eos (-is).* From ἶρις, the iris, and μελάνωμα, blackness, or μελάνωσις, a becoming black. Fr., *iridomélanome.* Ger., *Iridomelanom.* The deposition of black pigment-masses in the tissue of the iris, either generally throughout the iris, or in circumscribed patches, like nodules or small tumors (which are not malignant). [F.]

IRIDOMESODIALYSIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-mes(me^{2}s)-o(o^3)-di(di^2)-a^{2}l(a^{3}l)'i^2(u^6)-si^{2}s. Gen., *-ys'eos (-al'ysis).* From ἶρις, the iris, μέσος, middle, and διάλυσις, a separating. Ger., *Lösung der Verwachsung der inneren Irisränder.* The loosening of adhesions of the central margin of the iris. [L, 50 (α, 14).]

IRIDO-MOTOR, adj. I^{2}r-i^{2}d-o-mot'o^{2}r. From ἶρις, the iris, and *movere*, to move. Subserving motion in the iris. [α, 17.]

IRIDONCOSIS (Lat.), n. f. I^2(e)-ri^{2}d-o^{2}n^2-ko'si^{2}s. Gen., *-os'eos (-is).* From ἶρις, the iris, and ὄγκωσις, a puffing out. Fr., *iridoncose.* Ger., *Iridonkosis.* Thickening of the iris, as from plastic exudation. [F.]

IRIDONCUS (Lat.), n. m. I^2(e)-ri^{2}d-o^{2}n^{2}k'u^{3}s(u^{4}s). From ἶρις, the iris, and ὄγκος, a tumor. Ger., *Irisgeschwulst.* Any tumefaction or swelling of the iris. [F.]

IRIDOODEA (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-od'e^2-a^3. From ἶρις, the iris, ᾠόν, an egg, and εἶδος, resemblance. An oval conformation of the iris. [L, 50 (α, 14).]

IRIDOPARALYSIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-pa^{2}r(pa^{3}r)-a^{2}l-(a^{3}l)'i^2(u^6)-si^{2}s. Gen., *-ys'eos (-al'ysis).* From ἶρις, the iris, and παράλυσις, a loosening by the side. Paralysis of the iris.

IRIDOPARESIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-pa^{2}r(pa^{3}r)'e^2-si^{2}s. Gen., *-es'eos (-par'esis).* From ἶρις, the iris, and πάρεσις, a letting go, paralysis. Fr., *iridoparèse.* Ger., *theilweise Lähmung der Iris.* Partial paralysis of the iris. [L, 50 (α, 14).]

IRIDOPERIPHACITIS (Lat.), **IRIDOPERIPHAKITIS** (Lat.), n's f. I^2(e)-ri^{2}d-o(o^3)-pe^{2}r-i^2-fa(fa^3)-si(ke)'ti^{2}s, -ki(ke)'ti^{2}s. Gen., *-it'idos (-idis).* From ἶρις, the iris, περί, around, and φακός, anything shaped like lentils (see also *-itis*). An old and incorrect term for an inflammation of the capsule of the crystalline lens. [F.]

IRIDOPERIPHRACTIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-pe^{2}r-i^2-fra^{2}k(fra^{3}k)'ti^{2}s. Gen., *-phract'is.* From ἶρις, the iris, περί, around, and φρακτός, fenced. Ger., *Irisumwulstung.* Of Ammon, iritis pôstica. [L, 50 (α, 14).]

IRIDOPERISPHINXIS (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-pe^{2}r-i^2-sfi^{2}n^{2}x'i^{2}s. Gen., *-sphinx'eos (-is).* From ἶρις, the iris, περί, around, and σφίγξις, a binding tight. A series of circular folds in the iris, near the sphincter margin, observed and described by Ammon. [F.]

IRIDOPHLEBOCOLPOS (Lat.), n. m. I^2(e)-ri^{2}d-o(o^3)-fle(fle^2)-bo(bo^3)-ko^{2}lp'o^{2}s. From ἶρις, the iris, φλέψ, a vein, and κόλπος, the bosom. The venous sinus of the iris. [L, 50 (α, 14).]

IRIDOPLANIA (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-pla(pla^3)'ni^2-a^3. From ἶρις, the iris, and πλάνη, a wandering. 1. See HIPPUS. 2. See IRIDADENOSIS.

IRIDOPLASMA (Lat.), n. n. I^2(e)-ri^{2}d-o(o^3)-pla^{2}z(pla^{3}s)'ma^3. Gen., *-plas'matos (-atis).* From ἶρις, the iris, and πλάσμα, anything molded. Of Gluge, a peculiar degeneration of the eye beginning in the iris. [L, 50 (α, 14).]

IRIDOPLEGIA (Lat.), n. f. I^2(e)-ri^{2}d-o(o^3)-ple(pla)'ji^2(gi^2)-a^3. From ἶρις, the iris, and πληγή, a blow. Fr., *iridoplégie.* Ger., *Irislähmung.* See IRIDOPARALYSIS.—**Associative i.** Failure of the iris to respond to the stimulus of light, or the effort of accommodation. [Lewis (α, 29).]—**Photic i., Reflex i.** Fr., *iridoplégie réflexe.* Failure of the iris to respond to the stimulus of light, without implication of its accommodative movements. [Lewis (α, 29).]

IRIDOPTOSIS (Lat.), n. f. I^2(e)-ri^{2}d-o^{2}p-to'si^{2}s. Gen., *-ptos'eos (-is).* From ἶρις, the iris, and πτῶσις, a falling. Fr., *iridoptose.* Ger., *Irisvorfall.* An old term for prolapse of the iris through a perforating wound or ulcer of the cornea. [F.]

IRIDO-PUPILLAIRE (Fr.), adj. E-re-do-pu^{6}-pel-la^{2}r. From ἶρις, the iris, and *pupilla*, the pupil of the eye. Pertaining to or connected with the pupillary border of the iris. [L, 41 (*a*, 14).]

IRIDORRHAGAS (Lat.), n. I^{2}(e)-ri^{2}d-o^{2}r'ra^{3}g(ra^{3}g)-a^{2}s(a^{3}s). Gen., *-rhag'ados* (*-adis*). From ἶρις, the iris, and ῥαγάς, a rent. An old term for coloboma iridis. [F.]

IRIDORRHEXIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o^{2}r-re^{2}x(rax)'i^{2}s. Gen., *-rhex'eos* (*-is*). From ἶρις, the iris, and ῥῆξις, a breaking. Fr., *i.* Ger., *I.* Iridectomy combined with iridavulsion; used in cases in which the iris has become brittle and adheres to the capsule of the crystalline lens. [L, 49 (*a*, 14).]

IRIDORRHOGE (Lat.), **IRIDORRHOX** (Lat.), n's f. I^{2}(e)-ri^{2}d-o^{2}r'ro-je(ga), -ro^{2}x(rox). Gen., *-or'rhoges*, *-rhog'os* (*-rhog'is*). From ἶρις, the iris, and ῥώξ, a cleft. See IRIDORRHAGAS.

IRIDORRHYTIDOMA (Lat.), **IRIDORRHYTIDOSIS** (Lat.), n's n. and m. I^{2}(e)-ri^{2}d-o^{2}r-ri(ru^{6})-ti^{2}-do'ma^{3}, -do'si^{2}s. Gen., *-om'atos* (*-atis*). *-os'eos* (*-is*). From ἶρις, the iris, and ῥυτίς, a wrinkle. Corrugation of the iris. [L, 50 (*a*, 14).]

IRIDOSCHISIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o^{2}s'ki^{2}(ch^{2}i^{2})-si^{2}s. Gen., *-schis'eos* (*-oschi'sis*). From ἶρις, the iris, and σχίσις, a cleaving. The formation of an iridoschisma. [L, 50 (*a*, 14).]

IRIDOSCHISMA (Lat.), n. n. I^{2}(e)-ri^{2}d-o(o^{3})-ski^{2}z(sch^{2}i^{2}s)'ma^{3}. Gen., *-schis'matos* (*-atis*). From ἶρις, the iris, and σχίσμα, a cleft. See COLOBOMA *iridis*.

IRIDOSMINE (Fr.), n. E-re-dos-men. Ger., *Iridosmium*. A native alloy of iridium and osmium, occurring in small grains and scales of a steel-gray color and metallic lustre, also in hexagonal prisms. [L, 30, 41, 107 (*a*, 14).]

IRIDOSTERESIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o(o^{3})-ste^{2}r-e(a)'si^{2}s. Gen., *-es'eos* (*-is*). From ἶρις, the iris, and στέρησις, a deprivation. See IRIDEREMIA.

IRIDOTENCLEISIS (Lat.), n. f. I^{2}(e)-ri^{2}d-ot-e^{2}n^{2}-kli'(kle^{2}'i^{2})-si^{2}s. Gen., *-cleis'eos* (*-is*). See IRIDENCLEISIS.

IRIDOTOME, n. I^{2}r-i^{2}d-o-tom. From ἶρις, the iris, and τομή, a cutting. A cutting instrument for use in iridotomy. [*a*, 29.]

IRIDOTOMEDIALYSIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o(o^{3})-to(to^{2})-me(ma)-di(di^{2})-a^{2}l(a^{3}l)'i^{2}(u^{6})-si^{2}s. Gen., *-ys'eos* (*-al'ysis*). From ἶρις, the iris, τομή, a cutting, and διάλυσις, a loosening. Fr., *iridotomédialyse*. See IRIDOMESODIALYSIS.

IRIDOTOMENCLEISIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o(o^{3})-to(to^{2})-me^{2}n^{2}-kli'(kle^{2}'i^{2})-si^{2}s. Gen., *-cleis'eos* (*-is*). From ἶρις, the iris, τομή, a cutting, and ἐγκλεῖν, to shut in. See IRIDENCLEISIS.

IRIDOTOMIA (Lat.), n. f. I^{2}(e)-ri^{2}d-o(o^{3})-to(to^{2})'mi^{2}-a^{3}. From ἶρις, the iris, and τομή, a cutting. Fr., *iridotomie*. Ger., *Iridotomie*, *Iritomie*, *Irisschnitt*, *Regenbogenhauteinschneidung*. It., Sp., *iridotomia*. 1. Iridotomy. 2. A term now specially applied to the method of forming an artificial pupil by the natural gaping of a simple incision in the iris, or by making a V-shaped incision, and allowing the tongue-shaped piece to retract. It is only applicable when the lens is absent. It may be done with knife or scissors. [F.]

IRIDOTOMY, n. I^{2}r-i^{2}d-o^{2}t'o-mi^{2}. Lat., *iridotomia* (from ἶρις, the iris, and τομή, a cutting). Fr., *iridotomie*. Ger., *Iridotomie*. 1. Originally, a division of the sphincter iridis through a corneal incision. 2. As now used, any incision into the iris. [F.]—**Extra-ocular i.** I. in which the iris is allowed to prolapse or is drawn out through a wound in the cornea before the incision is made and is then replaced. ["Ctrlbl. f. d. ges. Therap.," Jan., 1888 (*a*, 29).]

IRIDOTROMOS (Lat.), **IRIDOTROMUS** (Lat.), n's m. I^{2}(e)-ri^{2}d-o^{2}t'ro(ro^{2})-mo^{2}s, -mu^{2}s(mu^{4}s). From ἶρις, the iris, and τρόμος, a trembling. See IRIDODONESIS and HIPPUS.

IRIDOVALOSIS (Lat.), n. f. I^{2}(e)-ri^{2}d-o-val(wa^{3}l)-o'si^{2}s. Gen., *-os'eos* (*-is*). From ἶρις, the iris, and *ovum*, an egg. See IRIDOODEA.

IRIEN (Fr.), adj. E-re-a^{3}n^{2}. See IRIDAL.

IRIGENIUM (Lat.), n. n. I^{2}(e)-ri^{2}-jen(ge^{2}n)'i^{2}-u^{3}m(u^{4}m). From ἶρις, a rainbow, and γένος, a race. The *Verbena officinalis*. [B, 121 (*a*, 35).]

IRINE, n. I'ren. Lat., *irinum* (from ἴρινος, belonging to the plant *Iris*). Fr., *i.* A substance, $C_8H_{16}O_2$, similar to camphor, and having a strong odor of orris-root, distilled from the root of *Iris florentina*, and forming pearly-white scales. [B, 38, 93, 125 (*a*, 14).]

IRIO (Lat.), n. f. I^{2}(e)'ri^{2}-o. Gen., *-o'nis*. The *Sisymbrium i.* (*officinale*). [B, 19 (*a*, 24).]—**I. altera.** The *Sisymbrium polyceratum*. [B, 121.]

IRIODESIS (Lat.), n. f. I^{2}(e)-ri^{2}-o^{2}d'e^{2}s-i^{2}s. Gen., *-es'eos* (*-od'esis*). See IRIDODESIS.

IRION (Fr.), n. E-re-o^{2}n^{2}. 1. The *Sinapis arvensis*. 2. The *Polygonum fagopyrum*. [B, 38 (*a*, 14).]

IRIPA, n. A tree growing in Malabar and producing a purgative resin. [B, 88 (*a*, 39).]

IRIS (Lat.), n. f. I(e)'ri^{2}s. Gen., *ir'idos* (*-idis*), *i'reos* (*-is*). Gr., ἶρις. Fr., *i.*, *rhizome d'i. varié* (4th def.), *glaïeul bleu* (4th def.). Ger., *I.*, *Regenbogenhaut* (1st def.), *Schwertel* (3d def.), *Schwertlilie* (3d def.), *verschiedenfarbige Schwertlilie* (4th def.). 1. A thin, circular, contractile membrane, hanging vertically like a curtain in the anterior chamber. It is attached at its periphery to the sclerocorneal margin by means of the ligamentum pectinatum, and perforated near its centre by a circular hole called the pupil. It forms the anterior segment of the uveal coat of the eye. Its posterior surface is covered with pigment. It contains a set of circular muscular fibres, the sphincter, which contracts the pupil; and radiating fibres of elastic tissue which dilate the pupil. The i. is of all colors in birds. [F; L, 343.] See cut under EYE. 2. A term for any morbid condition of the skin appearing in the form of a circle or of intersecting circles the centres of which are marked by an inflorescence. [A, 326 (*a*, 21).] 3. The flower-de-luce, a genus of iridaceous herbs. 4. Of the U. S. Ph., blue flag, the rhizome and rootlets of *I. versicolor*. [*a*, 24.]—**American dwarf-i.** The *I. verna*. [B, 275 (*a*, 24).]—**Bearded i.** The *I. germanica*, *I. cristata*, *I. sambucina*, etc. [Reese, B, 77 (*a*, 24).]—**Bermuda i.** The *Marica irioides*. Sp., *lirio florentino* (3d def.), *lirio de Florencia* [Mex. Ph.] (3d def.). Syn.: *rhizoma iridis* [Br. Ph.] (3d def.), *radix iridis florentinæ* (3d def.), *radix ireos* (3d def.).

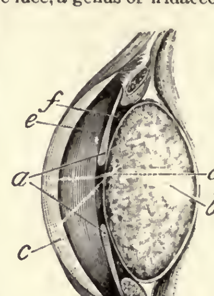

DIAGRAM SHOWING THE HUMAN IRIS.

a, the iris; *b*, the crystalline lens; *c*, the cornea; *d*, the pupil; *e*, the anterior chamber; *f*, the posterior chamber.

1. A species closely allied to *I. pallida*, indigenous to the coast region of Macedonia and the southwestern shores of the Black Sea, Hersek, in the Gulf of Ismid, and around Adalia in Asia Minor, and growing also, probably as a naturalized plant, in the vicinity of Florence and Lucca. It is one of the sources of orris-root (see 3d def.). 2. Of Savi, see *I. germanica*. 3. In the U. S. Secondary List, 1870, orris-root, obtained from *I. germanica*, *I. pallida*, and *I. florentina*, cathartic, and in large doses emetic; once used as a diuretic in dropsy, but now chiefly employed, on account of its delicate violet odor, as an ingredient in tooth-powders and perfumes. It is also used by the French for making issue-peas. [B, 5, 18, 19, 173, 180 (α, 24).]—**I. fœtida, I. fœtidissima.** Fr., *i. fétide*, *espatule*, *glaieul* (ou *i.*) *puant*, *i. gigot*. Ger., *stinkender Schwertel*. Stinking gladwyn, roast-beef-plant, blue seggin. Its root, *radix iridis* (seu *spathulæ fœtidæ*, seu *iridis fœtidissimæ*), was once employed in European medicine as a cathartic, emetic, and anodyne, but is now little used. [B, 5, 173, 180, 275 (α, 24).]—**I. fœtidissima flavescens.** Fr., *i. jaunâtre*. A variety of *I. fœtida*. [B, 173 (α, 24).]—**I. fugax.** See *I. sisyrinchium*.—**I. germanica.** Pers., *bekh-i.-banaphashâh*. Ar., *Irsa*. Guz., *Kevarâ-nu-mula*. Bom., *bâlvaekhanda*. Fr., *flamme*, *glaieul bleu*, *glé*, *i. des jardins*, *i. commun*, *i. d'Allemagne*. Ger., *deutscher Schwertel*, *Himmelsschwertel*, *Gilgen*, *Himmelslilie*, *blaue Lilie*. One of the chief sources of orris-root (see *I. florentina* [3d def.]). It is common about Florence and Lucca. It is employed in the form of a paste and powder. The root is used as a deobstruent, aperient, and diuretic, and also externally as an application to sores and pimples. [A, 479 (α, 21); B, 18, 173, 180 (α, 24).]—**I. gigot** (Fr.). See *I. fœtida*.—**I.-green.** Fr., *verdelis*, *vert d'i.* A pigment, formerly used by miniature painters, prepared from the juice of the flowers of *I. florentina*, with a little chalk or alum added. [B, 77 (α, 24).]—**I. hexagona.** Of Walter, a species frequent in swamps and pools in the southern United States. [B, 34 (α, 24).]—**I. illyrica.** Of the ancients, probably the *I. germanica*. [B, 18 (α, 35).]—**I. jambon** (Fr.). The *I. fœtida*. [B, 121.]—**I. jaunâtre** (Fr.). See *I. fœtidissima flavescens*.—**I. jaune** (Fr.). See *Yellow i.*—**I'kampfer** (Ger.). See *I. camphor*.—**I. lacustris.** Northern lake i.; a species with extensively creeping roots and pale-blue flowers; found on the islands of Lake Huron. According to some, it is similar in properties to *I. versicolor*. [B. 34, 275 (α, 24).]—**I. longifolia.** Fr., *i. à longues feuilles*. A variety of the *I. pseudacorus*. [B, 173 (α, 24).]—**I. longipetala.** A medicinal herb growing in California. ["Proc. of the Am. Pharm. Assoc.," xiv (α, 39).]—**I. lutea.** See *I. pseudacorus*.—**I. macrasiphon.** A medicinal plant growing in California. ["Proc. of the Am. Pharm. Assoc.," xix (α, 39).]—**I. martinicensis.** The *Trimezia martinicensis*. [B, 173 (α, 24).]—**I. nain** (Fr.). See *I. pumila*.—**I. nana.** See *I. verna*.—**I. nepalensis.** See *I. germanica*.—**I. nostras.** The *Gladiolus communis*. [B, 173 (α, 24).]—**I. odoratissima.** The *I. pallida*. [B, 309 (α, 35).]—**I'öl** (Ger.). See *I. camphor* and *Oleum iridis*.—**I. pallida.** Ger., *blassblauer Schwertel*. Pale-blue i.; a species growing wild in stony places in Istria and abundant about Florence and Lucca. It is one of the sources of

IRIS FLORENTINA. [A, 327.]

orris-root. See *I. florentina* (3d def.). [B, 18, 180, 275 (α, 24).]—**I. paludosa, I. palustris lutea.** See *I. pseudacorus*.—**I. persica.** Persian i.; a low, bulbous species carrying on a very short stem a single light-bluish flower which is exquisitely scented. [Delamer, Reese (α, 24).]—**I. plumeux** (Fr.). The *Moræa virgata*. [B, 19 (α, 24).]—**I. printanier** (Fr.). See *I. verna*.—**I. prismatica.** See *I. virginica*.—**I. pseudacorus.** Guz., *pakhanabeda-takari*. Fr., *i. des marais*, *acorus adultérin*, *faux acorus*, *flambe bâtarde*, *glaieul* (ou *i.*) *jaune*, *pavé*. Ger., *Wasser-Schwertel*, *Bastardkalmus*, *Teichlilie*, *Schluttenkraut*, *Blut-* (oder *Drachen-*, oder *Acker-*) *wurz*. Dragon-root, Jacob's sword, water (or yellow) flag, yellow flower-de-luce; formerly official in the London Ph. under the name of *Gladiolus luteus*. Its root, *radix acori vulgaris* (seu *adulterini*, seu *palustris*), seu *radix pseud-acori* (seu *ireos palustris*), has an acrid styptic taste, and has been used in European medicine as an errhine and sialagogue, and in dropsy, dysentery, and various other diseases. It is sometimes mixed with calamus-root, from which it may be distinguished by its astringent taste, dark color, and lack of aroma. The seed has been used as a substitute for coffee. A new carbohydrate, irisin, has been isolated from this plant. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 39); B, 18, 77, 180, 275 (α, 24).]—**I. puant** (Fr.). See *I. fœtida*.—**I. pumila.** Fr., *i. nain*. Dwarf i.; a small species found in Hungary. [B, 19, 34, 275 (α, 24).]—**I.-root.** See *I.* (2d def.) and *I. florentina* (3d def.).—**I. sambucina.** Elder-scented i.; a thick-rooted species found in southern Europe. [Reese, B, 34 (α, 24).]—**I. sibirica.** Fr., *i. des prés*. Ger., *sibirischer Schwertel*, *Wiesenschwertel*. A species found in Europe and North Asia. Its resin is vulnerary and astringent. Its root is emetic and purgative and is used in Siberia in syphilis. [B, 18, 19 (α, 24); B, 88 (α, 39).]—**I. silvestris.** See *I. germanica*.—**I. sisyrinchium.** Fr., *i. double-bulbe*. The *Moræa sisyrinchium*. [B, 173, 180 (α, 24).]—**I. squalens.** Brown-flowered i.; a species found in Central Europe in stony places. [B, 64, 275 (α, 24).]—**I'stearopten** (Ger.). See *I. camphor*.—**I. susiana.** Fr., *i. deuil*, *fleur du diable*. Chalcedonian i., mourning i., great spotted i., sad-flowered i.; a species having purgative qualities. [B, 19, 275 (α, 24).]—**I. tigré** (Fr.). The *Moræa sinensis*. [B, 19 (α, 24).]—**I. tremulans.** See under IRIDODONESIS.—**I. tuberosa.** Fr., *i. tubéreux*, *faux hermodacte*. Ger., *knolliger Schwertel*. A species found in the East, having a purgative root which is said to have been eaten, when grated and mixed with sugar, by the Egyptians to give them force and reduce obesity. Hermodactyls are erroneously referred by some authors to this species. [B, 5, 173, 180 (α, 24).]—**I. variabilis.** Fr., *i. varié*, *i. bigarré*. See *I. xiphium*.—**I. variegata.** A species found in southern Eu-

IRIS SUSIANA. [A, 327.]

rope. [Reese (α, 24).]—**I. verna, I. vernata.** Fr., *i. printanier*. Vernal i.; a species growing in hilly woods of the southern United States. The root is purgative. [B, 34, 173 (α, 24).]—**I. versicolor.** Fr., *i. bigarré*. Ger., *bunter Schwertel*. The larger blue flag of North America, the root of which (the *I.* of the U. S. Ph.) has a nauseous, acrid taste, is without odor, and possesses cathartic, emetic, and diuretic properties. The flowers give a blue infusion, used as a test for acids and alkalies. Ionidin, a powerful hepatic stimulant, is prepared from the root. [B, 5, 77, 173, 180 (α, 24).]—**I. violacea.** Fr., *i. violet*. A variety of *I. germanica*. [B, 173 (α, 24).]—**I. virginica.** Boston i., slender blue flag of North America; a species found in wet soil and having similar properties to those of *I. versicolor*. [B, 34, 180, 275 (α, 24).]—**I'vorfall** (Ger.). See HERNIA *iridis*.—**I. vulgaris.** See *I. germanica*.—**I'wurzel** (Ger.). See *I. florentina* (3d def.).—**I. xiphioides.** Pyrenean flag, Spanish (or Portuguese, or English, or great bulbous) i. An ornamental plant, by many regarded as a variety of *I. xiphium*. [Delamer; B, 275 (α, 24).]—**I. xiphium.** Fr., *i. épée* (ou *d'Angleterre*, ou *en gouttière*), *lis d'Espagne*. A species found in southwestern Europe. The flowers yield a green dye, and their juice, mixed with alum, is used as a paint. [B, 173 (α, 24).]—**Knobby-rooted i.** The *I. tuberosa*. [Reese (α. 24).]—**Labrador i.** The *I. tridentata*. [B. 275 (α, 24).]—**Lake dwarf-i.** The *I. lacustris*. [B, 275 (α, 24).]—**Mourning i.** See *I. susiana*.—**Oleum ireos** (seu **iridis**). Fr., *huile d'i.* Ger., *I'öl*. Sp., *aceite de lirio* [Sp. Ph.]. I. oil, a preparation made by digesting 520 grammes of the fresh bruised rhizome of *I. germanica* with 1,035 grammes of olive-oil for 24 hours, then pouring the expressed oil on 176 grammes of flowers of *I. germanica*, boiling for 12 hours, and straining. Some of the older pharmacopœias ordered equal parts of i. and olive-oil, others twice as much oil as i. [B, 95, 119 (α, 38).]—**Onion i.** The *I. tuberosa*. [B, 275 (α, 24).]—**Pale-blue i.** The *I. pallida*. [B, 275 (α. 24).]—**Peacock-i.** The genus *Vieusseuxia*. [B, 19 (α, 24).]—**Portuguese i.** See *I. xiphioides*.—**Poudre d'i. (racine)** (Fr. [Fr. Cod.]). See *Rhizoma iridis pulveratum*.—**Racine d'i.** (Fr.). See *I. florentina* (3d def.).—**Radix ireos.** The root-stock of *I. florentina*. [B. 180 (α, 24).]—**Radix ireos dalmatica.** Dalmatian orris. [B, 180 (α. 24).]—**Radix ireos istrica.** Dalmatian orris. [B, 180 (α, 24).]—**Radix ireos liburnica.** An orris-root used especially in France. According to Martius, it is from *I. pallida*; according to others, from *I. florentina*. [B, 180 (α, 24).]—**Rhizoma iridis** [Ger. Ph., Dan. Ph., Finn. Ph., Swiss Ph., Norw. Ph., Swed. Ph.] (**florentinæ** [Belg. Ph., Russ. Ph.]). Fr., *i. de Florence* (*rhizome*) [Fr. Cod.]. Sp., *lirio de Florencia* (*rizoma*) [Sp. Ph.]. Syn.: *i.* [U. S. Ph., Netherl. Ph.], *i. florentina* [Roum. Ph.], *i.* (*rhizoma*) [Austr. Ph., Hung. Ph. (1st ed.)], *ireos radix* [Gr. Ph.]. The rhizome of *I. versicolor* [U. S. Ph.]; of the *I. florentina* [Austr. Ph., Belg. Ph.. Gr. Ph., Sp. Ph., Netherl. Ph., Roum. Ph.]; of either the *I. florentina* or the *I. pallida* [Dan. Ph., Swiss Ph., Hung. Ph., Norw. Ph., Russ. Ph., Swed. Ph.]; of the *I. florentina*, the *I. pallida*, or the *I. germanica* [Ger. Ph., Finn. Ph.]; of various species [Fr. Cod.]. [B, 95 (α, 38).]—**Rhizoma iridis pulveratum** [Russ. Ph., Swed. Ph.]. Fr., *poudre d'i.* (*racine*) [Fr. Cod.]. A preparation made by crushing the root of *I. florentina*, drying at 40° C., powdering in an iron mortar, and sifting through a 120 silk sieve [Fr. Cod.]. The Russ. Ph. and Swed. Ph. use a 1,600-mesh sieve. [B, 95 (α, 38).]—**Sad-flowered**

i. The *I. susiana.* [B, 275 (*a*, 24).—**Scorpion i.** The *I. alata.* [B, 275 (*a*, 24).]—**Small bulbous i.** The *I. xiphium.* [B, 275 (*a*, 24).]—**Snake's-head i.** The *I. tuberosa.* [B, 275 (*a*, 24).]—**Spanish i.** The *I. xiphium* and *I. xiphioides.* [Delamer; B, 77 (*a*, 24).]—**Spanish-nut i.** The *I. sisyrinchium.* [B, 275 (*a*, 24).]—**Stinking i.** See *I. fœtidissima.*—**Tablettes d'i.** (Fr.). Lozenges consisting of 30 grammes of *espèces diaireos* and 360 grammes of sugar. [B, 119 (*a*, 38).]—**Teinture d'i.** [Fr. Cod.] (Fr.). Tincture of i.; a preparation made by macerating 1 part of the powdered rhizome of *I. versicolor* 10 days in 5 parts of alcohol, expressing, and filtering. [B, 95 (*a*, 38).]—**Thunderbolt-i.** The *I. xiphium.* [B, 275 (*a*, 24).]—**Tiger-i.** The genus *Tigridia.* [B, 275 (*a*, 24).]—**Twice-flowering i.** The *I. scorpioides* (*Xiphium planifolium*). [B, 275 (*a*, 24).]—**Vernal i.** The *I. verna.* [B, 275 (*a*, 24).]—**Vert d'i.** (Fr.). See *I.-green.*—**Water-i.** The *I. pseudacorus.* [Reese (*a*, 24).]—**Yellow-i.** Fr., *i. jaune.* The *I. pseudacorus.* [B, 19 (*a*, 35).]

IRISA, n. In the East Indian bazaars, an orris-root dried without the removal of the outer peel; supposed to be the product of *Iris germanica.* [B, 18 (*a*, 24).]

IRISATION, n. I-ri^{2}s-a'shu^{3}n. From ἶρις, the rainbow. See IRIDESCENCE.

IRISIN, n. I'ri^{2}s-i^{2}n. Fr., *irisine.* Ger., *I.* 1. A shining white carbohydrate obtained by Wallach from the rhizome of the *Iris pseudacorus.* It forms with water a pasty magma and, with very gentle heat, a perfectly clear solution, which is officially dextrorotary, and does not give any color reaction with iodine. It is apparently very closely related to, though not identical with, inulin. 2. An oleoresin obtained by precipitating with water the tincture of the rhizome of *Iris versicolor*; it is employed in the form of pills, in doses of 0·15 to 0·20 grammes, as an emetic and drastic purgative, and in smaller doses as a diuretic. ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 39); B, 270 (*a*, 38); B, 93 (*a*, 14).] See IRIDIN.

IRISITIS (Lat.), n. f. I^2(e)-ri^{2}s-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). See IRITIS.

IRITIC, adj. I^{2}r-i^{2}t'i^{2}k. Lat., *iriticus.* Pertaining to or of the nature of iritis.

IRITIS (Lat.), n. f. I^2(e)-ri(re)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἶρις, the rainbow. Fr., *i.*, *irite.* Ger., *I.*, *Regenbogenhautentzündung.* It., *irite, iridite.* Sp., *i.* Inflammation of the tissue of the iris from whatever cause. It may be primary or secondary; acute or chronic; idiopathic or traumatic. It is a purely local affection or dependent on a constitutional taint. The symptoms are swelling and discoloration of the iris, a more or less immovable pupil, adhesions of the posterior surface of the iris to the anterior capsule, irregularity of the pupil, ciliary infection of the eyeball, diminution of vision, and pain. [F.]—**Arthritic i.** See *Gouty i.*—**Gelatinous i.** Fr., *i. gélatineuse.* Ger., *gelatinöse Regenbogenhautentzündung.* An inflammation of the iris characterized by a spongy or gelatinous exudation in the pupillary space or at the bottom of the anterior chamber and appearing like flocculi. It is fibrous, and consists of a network of fibrillæ, inclosing red and white blood-corpuscles and a finely granular substance. It is usually of a gouty or rheumatic nature. [F.]—**Gonorrhœal i.** Fr., *i. gonorrhéique.* Ger., *gonorrhöische Regenbogenhautentzündung.* A mixed form of i., partly plastic, partly serous, occurring in patients suffering from gonorrhœa, and usually immediately preceded by an arthritic inflammation. [F.]—**Gouty i.** Fr., *i. goutteuse.* Ger., *gichtische Regenbogenhautentzündung.* An inflammation of the iris occurring during an attack of gout, or in persons of gouty diathesis, and resembling very closely the rheumatic form of i., especially in the severity of the pain, the frequent relapses, and the spongy or gelatinous exudation. [F.]—**Gummatous i.** Lat., *i. gummatosa.* Fr., *i. gommeuse.* Ger., *gummöse I.* (oder *Regenbogenhautentzündung*). A variety of syphilitic i. occurring in the latter stages of constitutional syphilis, characterized by the formation of one or more nodules or gummata in the tissue of the iris, with relative integrity of the neighboring tissue. These gummata vary in size, usually grow from the posterior surface of the iris close to the sphincter margin, but may grow from any part of the iris, and sometimes attain an enormous size. There is always a plastic i. present. The term is improperly applied to *I. papulosa.* [F.] See *Syphilitic i.*—**I. blennorrhagica.** Fr., *i. blennorrhagique.* Ger., *blennorrhagische Regenbogenhautentzündung.* See *Gonorrhœal i.*—**I. diabetica.** A form of i., usually associated with abundant hypopyon, occurring in diabetes. [B.]—**I. diathésique** (Fr.). See *I. syphilitica.*—**I. dysménorrhéique** (Fr.). A serous i. accompanying or following dysmenorrhœa. [L, 87 (*a*, 39).]—**I. goutteuse** (Fr.). See *Gouty i.*—**I. glycosurique** (Fr.). I. accompanying glycosuria. [L, 87 (*a*. 39).]—**I. innominata.** Fr., *i. innominée.* An old term for certain ill-defined forms of i. [F.]—**I. intermittens.** The i. of ophthalmia intermittens. [L, 57 (*a*, 29).]—**I. leprosa.** I. characterized by little nodes in the ciliary part of the iris. [A. 326 (*a*, 21).]—**I. medorrhoica.** An improper term for gonorrhœal ophthalmia. [L, 135 (*a*, 39).]—**I. papulosa.** See under *Syphilitic i.*—**I. parenchymateuse (suppurative)** (Fr.), **I. parenchymatosa.** See *Parenchymatous i.*—**I. plastica, I. plastique.** See *Plastic i.*—**I. purulenta.** Fr., *i. purulente.* Ger., *eiterige Regenbogenhautentzündung.* See *Parenchymatous i.*—**I. rheumatica.** Fr., *i. rhumatismale* (*arthritique*). Ger., *rheumatische Regenbogenhautentzündung.* I. occurring in the course of an attack of articular rheumatism or in rheumatic persons. It is of the plastic character, but both objective and subjective symptoms are very severe, the duration is very chronic, the obstinacy in resisting treatment very marked, and the prognosis is by no means favorable. There is marked tendency to relapses, and usually the episcleral tissue, and even the superficial layer of the sclera, seems to be involved in the process. There may also occur a gelatinous or spongy exudation into the anterior chamber. [F.]—**I. scrophulosa.** Fr., *i. scrofuleuse.* Ger., *scrophulöse Regenbogenhautentzündung.* A plastic form of i., said by Arlt to occur in scrofulous children and to be due to scrofula. [F.]—**I. secondaire** (Fr.). I. accompanying inflammation of other parts of the eye. [L, 87 (*a*, 38).]—**I. séreuse** (Fr.), **I. serosa.** See *Serous i.*—**I. simplex.** Fr., *i. simple.* See *Simple i.*—**I. suppurativa.** Fr., *i. suppurative.* See *Parenchymatous i.*—**I. syphilitica.** Fr., *i. syphilitique, i. diathésique.* Ger., *syphilitische Regenbogenhautentzündung.* See *Syphilitic i.*—**I. traumatica.** Fr., *i. traumatique.* Ger., *traumatische Regenbogenhautentzündung.* I., either plastic or purulent, from an injury. [F.]—**I. tuberculosa.** Fr., *i. tuberculeuse.* See *Tubercular i.*—**I. variolosa.** Fr., *i. varioleuse.* Ger., *variolöse Regenbogenhautentzündung.* A plastic i. occurring in the course of, or consequent on, variola. [F.]—**Parenchymatous i.** Lat., *i. parenchymatosa, i. suppurativa.* Fr., *i. parenchymateuse.* Ger., *parenchymatöse Regenbogenhautentzündung.* I. characterized by the exudation, usually, of lymphoid or pus cells into the tissue of the iris. This may be general or localized in spots; if the latter, it gives rise to the various names of nodules, tubercles, condylomata, etc. In addition, there is marked proliferation of the connective-tissue framework. [F.]—**Plastic i.** Lat., *i. plastica.* Fr., *i. plastique, i. simple.* Ger., *plastische Regenbogenhautentzündung.* A simple exudative i. in which the exudation occurs usually on the posterior surface of the iris and along the sphincter margin of the pupil, though it may occur on the anterior surface and even in the tissue of the iris. The exudation consists usually of cells and a highly coagulable material. This form of i. is the most frequent of all. [F.]—**Primary i.** I. which is not the result of an injury or of pre-existing disease of another part of the eye. [*a*, 29.]—**Quiet i.** I. not accompanied by the typical features of inflammation. ["N. Y. Med. Jour.," July 14, 1888, p. 51 (*a*, 29).]—**Recurrent i., Relapsing i.** Fr., *i. récurrente* Ger., *recedivirende* (oder *recurrirende*) *Regenbogenhautentzündung.* A form of i. characterized by frequent relapses. [F; *a*, 29.]—**Rheumatic i.** See *I. rheumatica.*—**Scrofulous i.** See *I. scrophulosa.*—**Secondary i.** I. which occurs as a result of previously existing disease of another part of the eye. [*a*, 29.]—**Serous i.** Lat., *i. serosa.* Fr., *i. séreuse.* Ger., *seröse Regenbogenhautentzündung.* An improper term for pure cyclitis. [B.]—**Simple i.** Lat., *i. simplex.* Fr., *i. simple.* I. occurring, either in an acute or chronic form, idiopathically or after diseases of the conjunctiva and cornea, characterized by a decoloration and opaque appearance of the iris, the slight thickening or non-thickening of the vitreous humor, and the absence of plastic exudation. [A, 326 (*a*, 21).]—**Specific i.** See *I. gummatosa.*—**Spongy i.** Fr., *i. spongieuse.* Ger., *schwammige Regenbogenhautentzündung.* See *Gelatinous i.*—**Suppurative i.** See *Parenchymatous i.*—**Syphilitic i.** Lat., *i. syphilitica.* Fr., *i. syphilitique.* Ger., *syphilitische I.* A form of i. due to syphilis; the most frequent variety of i. Syphilitic i. occurs usually in the secondary stage of syphilis and is characterized by the development of nodules in the substance of the iris, which from the period at which they occur must be regarded as analogous to the papular growths; hence the name i. papulosa applied to this form of syphilitic i. The nodules are yellowish-red, usually rather small, and are situated along the pupillary and ciliary margins of the iris but not in the intermediate zone. At other times syphilitic i. presents no characteristic signs, particularly when, as is rarely the case, it occurs in the later stages of syphilis. In exceptional cases, in these late forms of syphilitic i., gummata occur. [B.]—**Traumatic i.** See *I. traumatica.*—**Tubercular i.** Lat., *i. tuberculosa.* Fr., *i. tuberculeuse.* I. following tuberculosis of other organs and appearing in the form of grayish-yellow spots, first in the periphery of the iris and afterward in the iris itself. [A, 326 (*a*, 21).]—**Variolous i.** See *I. variolosa.*

IRITOMY, n. I^{2}r-i^{2}t'o-mi^2. From ἶρις, the iris, and τομή, a cutting. Fr., *iritomie.* Ger., *Iritomie.* See IRIDOTOMY.

IRON, n. I'rn. Gr., σίδηρος. Lat., *ferrum.* Fr., *fer.* Ger., *Eisen.* It., *ferro.* Sp., *hierro.* A metallic element known to the ancients. It occurs in nature both in the uncombined state (chiefly in the form of meteoric masses) and combined with oxygen and other elements, constituting a variety of minerals. Among these minerals are magnetite (magnetic i. ore, loadstone, the *ferri oxidum magneticum* of the Br. Ph.), franklinite, red and brown hæmatite, siderite, and i.-stone. I. is also present to a small extent in certain vegetable tissues, and forms an essential constituent of the hæmoglobin of the blood. It is employed in medicine as a reconstituent tonic in anæmic conditions however originating, the essential feature in all of them being a deficiency of i. in the blood. The compounds of i. with the mineral acids are used locally as astringents and styptics. Some of the preparations of i. (*e. g.*, the iodide and chloride) appear to have special virtues. When pure, i. is a hard, tenacious, lustrous, grayish-white substance, highly ductile and malleable, having a slight astringent taste, and emitting an odor when rubbed. In this form it is official in the U. S. Ph. and Br. Ph. as *ferrum*, and in the Fr. Cod. as *fer métallique.* It may also be obtained in the form of a light, soft, dull-gray powder, by reduction of an i. oxide or chloride with hydrogen. This constitutes the reduced i. or i. by hydrogen (*ferrum redactum*) [U. S. Ph., 1875, Ger. Ph.], *ferrum reductum* [Br. Ph., U. S. Ph.], *fer réduit par l'hydrogène* [Fr. Cod.]. Under the form of i. filings (*limatura ferri*) it is official as the *ferrum pulveratum* of the Ger. Ph. These form a lustrous powder completely soluble in dilute hydrochloric and in sulphuric acids. The sp. gr. of pure i. is 7·84. At a red heat i. becomes soft, and two fragments of the metal at a white heat can be welded together. Exposed to a higher temperature, i. becomes brittle. It is said to melt at a temperature of about 1,500° C.; but this limit is too low, and should be placed at from 1,900° to 2,100° C. I. combines with carbon in different proportions, and in this way the different commercialv arieties of the metal are formed. Wrought i. contains the least carbon (from 0·15 to 0·3 per cent.), has a fibrous structure, and is soft and very tenacious. Cast i. contains 5 per cent. of carbon, either in combination as an i. carbide, or under the form of free graphite, is harder and more brittle, and has a crystalline or granu-

lar structure. Steel is i. containing 0·6 per cent. or more of carbon. I. also varies in physical properties according as it contains sulphur, phosphorus, silicon, manganese, copper, or arsenic. I. combines directly with a great number of elements. In composition it acts sometimes apparently as a dyad, forming ferrous salts, sometimes apparently as a triad, forming ferric salts, and sometimes forming compounds, called ferroso-ferric salts, in which it appears to act both as a dyad and as a triad. In reality, however, i. is probably in all of its compounds ordinarily a tetrad element, replacing 4 atoms of hydrogen, and occasionally a hexad, replacing 6 atoms of hydrogen (see FERRIC and FERROUS); Symbol, Fe.; atomic weight, 55·9. [B, 3, 6.] Cf. FERRUM, FER, and EISEN.—**Acid i. arsenate.** See *Monohydric i. arsenate.*—**Acid i. phosphate.** See *Monohydric i. phosphate.*—**Alcoholized i.** An old term for i. oxide over which vapor of alcohol has been passed; now applied to finely powdered metallic i., produced by grinding i. filings with honey, and without the use of alcohol, the specific name being applied to indicate a high grade of refinement or of subtility. ["Proc. of the Am. Pharm. Assoc." (α, 39).] Cf. ALCOHOL.—**Ammoniated i.** See *I. and ammonium chloride.*—**Aromatic mixture of i.** [Br. Ph.]. See *Mistura* FERRI *aromatica.*—**Basic i. chloride.** Fr., *chlorure basique de fer.* Ger., *basisches Eisenchlorür.* See *I. oxychloride.*—**Basic i. phosphate.** Fr., *phosphate basique de fer.* A compound of ferrous or ferric phosphate with an i. oxide or i. hydroxide. [B, 3.]—**Basic i. sulphate.** Fr., *sulfate basique de fer.* A compound of ferrous or ferric sulphate with an i. oxide or i. hydroxide. [B.]—**Bitter wine of i.** See *Vinum* FERRI *amarum.*—**Black i. oxide.** Fr., *oxyde noir de fer.* Magnetic i. oxide. [B.]—**Cast i.** See under *I.*—**Catalytic i.** See *Liquor* FERRI *oxychlorati.*—**Citrate of i. sesquioxide.** Fr., *citrate de sesquioxyde de fer.* Ferric citrate. [B.]—**Compound i. mixture** [U. S. Ph.]. See *Mistura* FERRI *composita.*—**Compound pills of i.** [U. S. Ph.]. See *Pilulæ* FERRI *compositæ.*—**Dialyzed i.** Lat., *ferrum dialysatum.* Fr., *fer dialysé.* Ger., *dialysirtes Eisen.* Soluble i. hydroxide (in reality an oxychloride); a non-astringent chalybeate, often administered in the form of the solution (called *liquor ferri dialysatus* and *liquor ferri oxychlorati* [*q. v.*]), obtained by dialysis of a basic ferric salt. [B.]—**Dried i. sulphate.** See FERRI *sulphas exsiccatus.*—**Electrolytic i.** I. prepared by electrolysis of a mixture of sal ammoniac, magnesium sulphate, and a solution of ferrous sulphate. It is deposited in bright-gray plates. [B, 3 (α, 38).]—**Ethereal tincture of i. chloride.** See *Tinctura* FERRI *chlorati ætherea.* [B, 3.]—**Galvanized i.** Sheet iron electroplated with zinc. [B.]—**Granulated i. sulphate.** See FERRI *sulphas granulata.*—**Hydrated i. cyanuret.** See *I. ferrocyanide.*—**Hydrated oxide of i.** See FERRI *oxidum hydratum* and *I. hydroxide* (2d var.).—**Hydrated oxide of i. with magnesia** [U. S. Ph.]. See FERRI *oxidum hydratum cum magnesia.*—**Hydrated peroxide of i.** Lat., *ferri peroxidum hydratum* [Br. Ph.]. Fr., *peroxyde de fer hydraté.* 1. See FERRI *oxidum hydratum.* 2. A compound, $Fe_2H_2O_4 = Fe_2O_3$-H_2O, obtained by drying ferric hydroxide; a reddish-brown powder insoluble in water. [B, 3, 5.]—**Hydrated tritoxide of i.** See FERRI *oxidum hydratum.*—**I. acetate.** Lat., *ferrum aceticum* (*oxydatum*) [*solubile* (Swiss Ph.)]. Fr., *acétate de fer.* Ger., *essigsaures Eisen.* The *ferrous acetate* (Fr., *acétate ferreux;* Ger., *essigsaures Eisenoxydul*), $(C_2H_3O_2)Fe. + 4H_2O$, occurs in greenish-white, monoclinic crystals, readily soluble in water. The *ferric acetate* (Fr., *acétate ferrique;* Ger., *essigsaures Eisenoxyd*), $(C_2H_3$-$O_2)6Fe_2 + 4H_2O$, forms dark-red crystals. [B, 3.]—**I. albuminate.** Lat., *ferri albuminas, ferrum albuminatum.* Fr., *albuminate de fer.* Ger., *Eisenalbuminat.* A compound of i. and albumin, variously prepared. Diehl's process consists in mixing a dilute solution of ferric chloride with one of egg-albumen, and precipitating with sodium chloride. It is a brownish powder, soluble in water, and containing 3.5 per cent. of metallic i. [B, 5.] See also FERRUM *albuminatum siccum* (*solubile*).—**I. amalgam.** A compound of i. and mercury, obtained by rubbing powdered i. with corrosive sublimate and water, by electrolysis, and in other ways. Amalgams containing but little i. are liquid, those containing more are soft and crystalline, and one, containing 103·2 parts of i. to 100 of mercury, has been made by great pressure into a hard, black mass. [B, 3 (α, 38).]—**I. ammoniochloride.** See *I. and ammonium chloride.*—**I. ammoniocitrate.** See *I. and ammonium citrate.*—**I. ammoniosulphate.** See *I. and ammonium sulphate.*—**I. ammoniotartrate.** See *I. and ammonium tartrate.* [B.]—**I. and ammonium arsenate.** Ammonio-ferric arsenate, a ruby-red, transparent, fissured mass, left by the evaporation of a solution of recently precipitated ferric arsenate in aqueous ammonia. [B, 2.]—**I. and ammonium chloride.** Lat., *ammonium chloratum ferratum* [Ger. Ph., Swiss Ph.] (seu *muriaticum ferruginosum* [Gr. Ph.]), *chloretum ferricoammonicum* [Dan. Ph., Finn. Ph., Swed. Ph.], *chloretum ferricum et chloretum ammonicum* [Netherl. Ph.], *chloruretum ferri ammoniacale* [Belg. Ph.], *ferrum sesquichloratum cum ammonio chlorato* [Russ. Ph.]. Fr., *chlorure de fer ammoniacal.* Ger., *Salmiakeisen.* Roum., *ammonia chlorhydricu ferratu* [Roum. Ph.]. Syn.: *i. ammonio-chloride, ammonio-ferric chloride, ammoniated i.* Ammoniated i. chloride; a double chloride of i. and ammonium. The compound of this nature, formerly official in the U. S. Ph. and Br. Ph., was probably a mixture of i. chloride and ammonium chloride, and not a chemical combination. It occurs in the form of orange-red crystals, soluble in water and in alcohol, and is of a saline, styptic taste. When prepared by sublimation, it was called *flores martiales* and *ens Martis.* [B, 38 (α, 38).]—**I. and ammonium citrate.** Lat., *ferri et ammonii citras* [U. S. Ph., Br. Ph.] *ferrum citricum* (*oxydatum* [Swiss Ph., Ger. Ph.]) *ammoniatum* [Ger. Ph., 1st ed.], *citras ammonico-ferricus* [Netherl. Ph., Fr. Cod.], *citras ferrico-ammonicus* [Norw. Ph.], *citras ferri* [Belg. Ph.], *ferrum oxydatum citricum cum ammonia* [Gr. Ph.], *ferro-ammonium citricum, ferri ammonio-citras.* Fr., *citrate de fer et d'ammoniaque* (ou *ammoniacal* [Fr. Cod.]), *citrate ferrique ammoniacal.* Ger., *citronensaures Eisenoxydammonium.* Sp., *citrato férrico-amónico* [Sp. Ph.]. Roum., *feru citricu ammoniacatu* [Roum. Ph.]. Syn.: *i. and ammonia citrate, i. ammonio-citrate, soluble i. citrate.* Ammonio-ferric citrate, occurring in transparent, garnet-colored, deliquescent scales readily soluble in water. Its exact chemical constitution is not known. It is prepared either by evaporating together 3 parts of solution of i. citrate and 1 part of water of ammonia [U. S. Ph.], or by extemporaneously forming i. citrate as in the process of the Br. Ph., which directs that 14 fl. oz. of solution of ammonia diluted with 2 imperial pints of distilled water be added to 8 fl. oz. of solution of i. persulphate, thus forming an i. oxide, the latter to be dissolved in a solution of 4 oz. (av.) of citric acid in distilled water, and heated, thus forming an i. citrate; and to the whole 5½ fl. oz. of solution of ammonia added, and the resulting compound obtained by evaporation. The French preparation is made by mixing 100 parts of citric acid with an amount of the hydrated oxide of i. corresponding to 53 parts of the dry oxide, and then adding 18 parts of the official solution of ammonia. The preparations of the other pharmacopœias are similar. [B.]—**I. and ammonium citri-phosphate.** Sp., *fosfato de sesquióxido de hierro citrato ammoniacal.* A preparation corresponding nearly to the *ferri phosphas* of the U. S. Ph., made by dissolving 100 parts of powdered citric acid in 100 of water, adding ammonia enough to make its odor very perceptible, and 100 parts of powdered ferric phosphate, evaporating, and drying. It consists of greenish-red, amorphous scales or laminæ, readily soluble in water, less soluble in dilute alcohol, insoluble in strong alcohol. [A, 447 (α, 38).]—**I. and ammonium cyanide.** See AMMONIUM *ferrocyanide.*—**I. and ammonium sulphate.** Lat., *ferri et ammonii sulphas.* Fr., *sulfate de fer ammoniacal* (ou *et d'ammoniaque*). A double sulphate of i. and ammonium. There are: 1. *Ammonio-ferrous sulphate* (Lat., *ferrum sulfuricum oxydulatum ammoniatum* [Russ. Ph.]; Fr., *sulfate ammonio-ferreux;* Ger., *schwefelsaures Eisenoxydul-Ammonium*), $FeSO_4(NH_4)_2$-$SO_4 + 6HO$, forming hard, greenish crystals, moderately soluble in water, and showing no tendency to efflorescence. 2. *Ammonio-ferric sulphate* (or *alum*), ammonium iron-alum (Lat., *ferri et ammonii sulphas* [U. S. Ph.], *ferrum sulfuricum oxydatum ammoniatum* [Ger. Ph. (1st ed.), Russ. Ph.]; Fr., *sulfate ammonio-ferrique* (ou *ferrique ammoniacal*), *alun de fer ammoniacal;* Ger., *schwefelsaures Eisenoxydammonium, ammoniakalischer Eisenalaun*), Fe_2-$(SO_4)_3(NH_4)_2SO_4 + 24H_2O$, forming pale-violet-colored, octaedral crystals of acid astringent taste, and slightly acid reaction. It effloresces on exposure to the air, and is more soluble in water than the ammonio-ferrous salt. [B, 3, 5.]—**I. and ammonium tartrate.** Lat., *ferri et ammonii tartras* [U. S. Ph.], *ferri ammonio-tartras, tartras ferrico-ammonicus* [Fr. Cod.]. Fr., *tartrate ferrico-ammonique* [Fr. Cod.], *tartrate de fer ammoniacal* (ou *et d'ammoniaque*). Ger., *weinsaures Eisenoxyd-Ammonium.* Ammonio-ferric tartrate, a double salt of uncertain and probably variable composition, consisting of bright-red or yellowish-brown scales, soluble in water, and produced by forming a hydrated i. oxide in the usual way, using 90 parts of the solution of iron tersulphate, then making a solution of ammonium tartrate by neutralizing tartaric acid dissolved in water with ammonia, adding an excess of 30 parts of tartaric acid, and mixing in the hydrated oxide, or by forming the hydrated i. oxide with 625 parts of the solution of i. perchloride [Fr. Cod.] and ammonia solution, and then mixing this oxide with 150 parts of tartaric acid, and adding an excess of the ammonia solution [Fr. Cod.]. [B, 81.]—**I. and bismuth citrate.** Lat., *ferri et bismuthi citras.* A compound of i. and bismuth with citric acid. A solution called the solution of i. and bismuth citrate has been prepared by dissolving bismuth citrate in aqua ammonia, and mixing with i. and ammonium citrate. It is not, however, a compound, but only a mechanical mixture of the ingredients which it contains. [B, 5.]—**I. and hydrogen cyanide.** See HYDROFERROCYANIC ACID.—**I. and magnesium citrate.** Lat., *ferri et magnesii citras.* A salt occurring in greenish or yellowish scales of acidulous taste, and readily soluble in water; prepared by dissolving 2 parts of freshly precipitated i. hydrate in an aqueous solution of 3 parts of citric acid, and adding magnesium carbonate until all the free acid is neutralized. [B, 5.]—**I. and magnesium oxide.** A crystalline substance, or a red powder, Fe_2O_3MgO, compounded of ferric oxide and magnesia. [B, 3.]—**I. and manganese carbonate.** A mixture of ferrous and manganous carbonates, extemporaneously prepared, used, combined with sugar or syrup, in various unofficial preparations. [B, 5.]—**I. and manganese iodide.** A mixture of the iodides of these two metals, usually extemporaneously prepared, used in various syrups. [B, 5.]—**I. and potassium cyanide.** See POTASSIUM *ferrocyanide.*—**I. and potassium ferrocyanide.** See POTASSIUM *and i. ferrocyanide*—**I. and potassium sulphate.** Lat., *ferri et potassii sulphas.* Fr., *sulfate de fer et de potasse.* Ger., *schwefelsaures Eisenoxydkali.* Potassio-ferric alum (or sulphate), ordinary i. alum, a substance, $Fe_2(SO_4)_3,K_2SO_4 + {}_{24}H_2O$, forming violet-colored octaedral crystals of astringent taste, and moderately soluble in water; sometimes used to replace the official ammonio-ferric sulphate. [B, 3.]—**I. and potassium sulphide.** Fr., *sulfure de f. et de potassium.* A substance, formerly official, occurring in purple acicular crystals; formed by melting together iron filings, potassium carbonate, and sulphur. [B, 3, 119.]—**I. and potassium tartrate.** Lat., *ferri et potassii tartras* [U. S. Ph.], *ferrum tartaratum* [Br. Ph.], *tartras' ferrico-potassicus* [Fr. Cod., Belg. Ph.], *tartarus ferratus* [Swiss Ph.] (seu *ferruginosus* [Gr. Ph.]), *tartras ferrico-kalicus* [Dan. Ph., Finn. Ph., Swed. Ph.], *kalium ferro-tartaricum* [Austr. Ph.]. Fr., *tartrate ferrico-potassique* [Fr. Cod.] (ou *de fer et de potassium*). Ger., *weinsaures Eisenoxydkali, Eisenweinstein.* It., *tartrate di ferro e di potassio, tartaro marziale-solubile.* Sp., *tartrato férrico potásico* [Sp. Ph.]. Roum., *feru potasso-tartricu* [Roum. Ph.]. A double salt, $C_4H_4O_6(FeO)K$, produced by the action of potassium bitartrate on freshly made hydrated i. oxide, and occurring as transparent scales of brownish-red or garnet-red color, and of sweetish taste. It is readily soluble in water, almost insoluble in alcohol. [B, 95 (α, 38).]—**I. and quinine citrate.** Lat., *ferri et quininæ* (seu *quiniæ* [Br. Ph., U. S. Ph., 1870]) *citras* [U. S. Ph.], *chininum ferro-citricum* [Ger. Ph., Swiss Ph., Russ. Ph.], *citras*

quininæ et ferri [Belg. Ph.], *citras ferricus et citras chinini* [Netherl. Ph.], *citras ferro-chinicus* [Swed. Ph.]. Fr., *citrate de fer et de quinine.* Ger., *Eisenchinincitrat, citronensaures Eisenchinin.* A salt forming dark-golden scales of a greenish or reddish tinge, having a bitter taste, and completely soluble in water, almost insoluble in alcohol; prepared by adding to an aqueous solution of 88 parts of i. citrate, 12 parts of dried quinine, and evaporating [U. S. Ph.]; by adding i. oxide (prepared by mixing together 8 fl. oz. of solution of ammonia and 4½ fl. oz. of solution of i. persulphate in 4 pints of water) to a solution of 3 oz. (av.) of citric acid heated over the water bath, thus forming a solution of an i. citrate, to which is then added freshly prepared quinine, precipitated by ammonia water from an acid solution of 1 oz. (av.) of quinine sulphate, 12 fluid drachms of solution of ammonia being finally added, and the whole evaporated [Br. Ph.]; or by adding 1 part of quinine precipitated by caustic soda from a solution of the sulphate to 3 parts of powdered i. (*ferrum pulveratum*), and 6 parts of citric acid in 500 parts of water [Ger. Ph.]. The solution of i. and quinine citrate is the *liquor ferri et quininæ citratis* of the U. S. Ph. [B, 81.]—**I. and quinine cyanide.** See QUININE *ferrocyanide.*—**I. and sodium citro-phosphate.** See FERRI *phosphas.*—**I. and sodium pyrophosphate.** A solution of i. pyrophosphate in an aqueous solution of sodium pyrophosphate. The contained compound corresponds to the *pyrophosphate de fer et de soude* [Fr. Cod.]. [B.] See FERRI *et sodii pyrophosphas.*—**I. and strychnine citrate.** Lat., *ferri et strychninæ* (seu *strychniæ*) *citras* [U. S. Ph.]. Fr., *citrate de fer et de strychnine.* Ger., *citronsaures Eisenstrychnin, Eisenstrychnincitrat.* A substance prepared by the mutual reaction of 1 part each of citric acid and strychnine, 98 parts of water, and 120 parts of ammonium citrate. It forms red scales, readily soluble in water, and of a very bitter taste. Its exact chemical constitution is not known. [B, 5, 95.]—**I. and zinc oxide.** A crystalline substance, Fe_2O_3ZnO. [B. 3.]—**I. arsenate.** Fr., *arséniate de fer.* 1. Ferrous arsenate (Lat., *ferri arsenias* [Br. Ph.], *arsenias ferrosus* [Fr. Cod.]; Fr., *arséniate ferreux* [Fr. Cod.]; Ger., *arsensaures Eisenoxydul*), $Fe_3(AsO_4)_2$, is prepared by the action of a solution of sodium arsenate, either alone [Fr. Cod.] or combined with sodium acetate [Br. Ph.], on a solution of ferrous sulphate. It is a white amorphous powder, devoid of taste and odor, and insoluble in water. Exposed to the air, it turns green, and is converted into a basic *ferroso-ferric arsenate*, $2Fe_2(AsO_4)_2.2Fe_2(AsO_4)_2.Fe_2O_3$. 2. Normal ferric arsenate (Fr., *arséniate ferrique*; Ger., *arsensaures Eisenoxyd*), $Fe_2(AsO_4)_2 + 4H_2O$, occurs in nature as a mineral. [B, 5.] See also *Monohydric i. arsenate.*—**I. arsenide.** A compound of arsenic and i. One is known forming a white, brittle substance, FeAs, and another, $FeAs_2$, occurring in nature as a mineral. [B, 3.]—**I. arsenite.** Fr., *arsénite de fer.* A ferrous arsenite, $Fe_2As_2O_5$, formed by the action of a solution of arsenic trioxide upon ferrous sulphate. It is a greenish-white precipitate, becoming yellow on drying. Several basic ferric arsenites are known, one of which, $Fe_4O_5(OH)_6As$, is formed as bulky brown precipitate when ferric hydroxide (hydrated i. oxide) is added to a solution of arsenic trioxide. [B, 3.]—**I.-bark.** See *I.*-BARK.—**I. benzoate.** A substance, $Fe_26C_7H_5O_2. + 6H_2O$, obtained by treating a solution of i. tersulphate with a concentrated solution of sodium benzoate or ammonium benzoate, and drying the resultant precipitate. It occurs as a brownish-orange powder, almost tasteless, and slightly soluble in water and in alcohol. [B, 81 (*a*, 38).]—**I. bloom.** Syn.: *i. slab.* A ball of malleable i. which has been puddled and shingled (*e. g.*, hammered and squeezed) to the proper state of consolidation, in which process most of the cinders are forced out. [*a*, 38.]—**I. bromide.** Fr., *bromure de fer.* Ger., *Bromeisen.* A compound of i. and bromine including: 1. *Ferrous bromide* (Lat., *ferri bromidum*; Fr., *bromure ferreux* [Fr. Cod.]; Ger., *Eisenbromür*), $FeBr_2$, is formed by the action of bromine on i. It may be obtained in the form of yellowish crystals, but usually occurs as a brick-red, deliquescent, and unstable substance that can be preserved by the addition of sugar, as in the *syrupus ferri bromidi* [U. S. Ph.]. The *bromure ferreux* of the Fr. Cod. is an aqueous solution of ferrous bromide containing about one third its weight of the salt. Hydrated ferrous bromide, $FeBr_2 + 4H_2O$, forms bluish-green tubular crystals. It is obtained by dissolving i. in aqueous hydrobromic acid. 2. *Ferric bromide* (Fr., *bromure ferrique*; Ger., *Eisenbromid*), Fe_2Br_6, is prepared by heating i. with an excess of bromine. It forms dark-red, deliquescent crystals. [B, 3.]—**I. carbide.** Lat., *ferri carburetum.* Fr., *carbure de fer, fer carburé.* A compound of i. and carbon. Ordinary metallic i. contains carbon in varying proportions; cast-i. contains most, wrought-i. least, and steel a medium amount. [B.]—**I. carbonate.** Lat., *ferri carbonas.* Fr., *carbonate de fer.* The only i. carbonate known is ferrous carbonate (Lat., *carbonas ferrosus*; Fr., *carbonate ferreux*; Ger., *kohlensaures Eisenoxydul*), a substance, $FeCO_3$, occurring in the crystalline state in nature, and obtained artificially by precipitation of a soluble ferrous salt with an alkaline carbonate. When so prepared it is a white, flocculent substance, which rapidly undergoes decomposition when exposed to the air, and becomes converted into ferric oxide, its color at the same time changing to a greenish and finally a brownish hue (see *I. subcarbonate*). This decomposition is hindered by mixing the precipitate with sugar, as in the official *massa ferri carbonatis* and *mistura ferri composita.* [B.]—**I. carbonate with sugar.** See FERRI *carbonas saccharatus.*—**I. by hydrogen.** See *Reduced i.*—**I. chloride.** Fr., *chlorure de fer.* Ger., *Chloreisen, Eisenchlorür.* Three i. chlorides are known: 1. Ferrous chloride (Lat., *chloruretum ferrosum* [Fr. Cod.]; Fr., *chlorure ferreux*; Ger., *Eisenchlorür*), $FeCl_2$, a substance forming colorless glistening scales, deliquescent in the air, and readily soluble in water and in alcohol. It occurs also combined with four molecules of water, $FeCl_2 + 4H_2O$, and then forms bluish, transparent crystals, which become green on exposure to the air. It is official in the latter form in the Fr. Cod. as *chlorure ferreux cristallisé.* 2. Ferric chloride (Lat., *ferri chloridum, chloruretum ferricum* [Fr. Cod.]; Fr., *chlorure ferrique*; Ger., *Eisenchlorid*), i. sesquichloride, or i. perchloride, Fe_2Cl_6, often called simply i. chloride, forms black iridescent laminæ, which appear red by transmitted light, and exhibit a greenish metallic lustre by reflected light. It is readily soluble in water, alcohol, and ether, and deliquesces on exposure to the air. In the anhydrous state it constitutes the *chlorure ferrique* of the Fr. Cod. [Lat., *chloruretum ferricum anhydricum* [Belg. Ph.], *cloruro férrico anhidro* [Sp. Ph.]. Combined with 12 molecules of water, $Fe_2Cl_6 + 12H_2O$, it is an orange-colored substance of crystalline structure, constituting the *ferri chloridum* of the U. S. Ph. and the *ferrum sesquichloratum* of the Ger. Ph., Swiss Ph., and Russ. Ph. It also occurs combined with five molecules of water, $Fe_2Cl_6 + 5H_2O$, forming reddish crystals, or six molecules of water, $Fe_2Cl_6 + 6H_2O$, forming yellowish crystals. This compound is a powerful astringent and styptic. 3. *Ferroso-ferric chloride*, $Fe_3Cl_8 + 18H_2O$, is a yellow, deliquescent, crystalline substance. There are also basic i. chlorides (see *i. oxychloride*), and various compounds of ferrous and ferric chloride with alkaline chlorides, ammonia, nitrosyl chloride, etc. (see *I. and ammonium chloride*). [B, 3, 8.]—**I. chromite.** Ferrous chromite, $Fe_2Cr_2O_4$, a body occurring native in the form of chrome-iron ore, or chromite. [B, 3.]—**I. citrate.** Fr., *citrate de fer.* Ger., *Eisencitrat, citronsaures Eisenoxyd.* A salt of i. and citric acid. Ferric citrate (Lat., *ferri citras* [U. S. Ph.], *ferrum citricum oxydatum* [Ger. Ph., 1st ed., Swiss Ph., Russ. Ph.], *citras ferricus* [Netherl. Ph.]; Fr., *citrate ferrique* [ou *de sesquioxyde de fer*]; Ger., *citronsaures Eisenoxyd*; Sp., *citrato férrico* [Sp. Ph.]; Roum., *feru citricu* [Roum. Ph.]), $(C_6H_5O_7)_2Fe_2 + 6H_2O$, is obtained by dissolving ferric hydrate in warm citric acid, and evaporating (a little ammonia first being added in making the pharmaceutical preparation). It occurs in transparent, garnet scales, readily soluble in water. [B; B, 244 (*a*, 27).]—**I. crenate.** Fr., *crénate de fer.* A soluble compound of i. and crenic acid found in mineral waters. [B, 15.]—**I. cyanide.** Lat., *ferri cyanidum.* Fr., *cyanure de fer.* Ger., *Cyaneisen, Eisencyanür.* The simple i. cyanides are not definitely known, although it is thought that the ferrous cyanide, $Fe(CN)_2$, is formed as a rust-colored precipitate when a ferrous salt is acted on by potassic cyanide. [B.] For the compound cyanides see FERRICYANIDE and FERROCYANIDE.—**I. disulphate.** See *I.* PYROSULPHATE.—**I. disulphide.** I. pyrites, FeS_2, a substance occurring in nature in a white and also a yellow form; the latter a hard, heavy brass-yellow substance, which occurs in several crystalline forms, and also in dendritic masses formed about roots of trees, etc. [B, 3.]—**I. ferricyanide.** A salt of i. and ferricyanic acid. There occur: 1. Ferrous ferricyanide (Ger., *Ferroferridcyanür*), $Fe_3.Fe_2(C_3N_3)_4 = Fe_5C_{12}N_{12}$ (see under FERRICYANIDE). 2. Ferric ferricyanide, $Fe_2Fe_2(C_3N_3)_4 = Fe_4C_{12}N_{12}$, soluble in water. Other i. ferricyanides are known, whose composition is different from either of these given. [B.]—**I. ferrocyanide.** A compound of i. and ferrocyanic acid. Of these compounds there are known: 1. *Ferrous ferrocyanide*, or ferroso-ferrous cyanide, $Fe_2Fe(C_3N_3)_2$, a white powder insoluble in water. 2. *Potassic ferrous ferrocyanide.* See POTASSIUM *and i. ferrocyanide.* 3. *Ferric ferrocyanide*, or Prussian blue, $Fe_43Fe(C_3N_3)_2 = Fe_7C_{18}N_{18}$, a deep-blue powder, insoluble in water and in alcohol, soluble in a solution of oxalic acid or ammonium acetate. Formerly official in the U. S. Ph., and still official in the French (*ferrocyanure ferrique*), Belgian (*cœruleum berolinense*), Spanish (*azul de Prusia, cianuro ferroso-férrico*), and Greek (*ferrum hydrocyanicum*) pharmacopœias. [B.] See also *Prussian* BLUE.—**I. filings.** See FERRUM *præparatum* and FERRUM *metallicum.*—**I. fluoride.** Ger., *Fluoreisen.* A salt of i. and fluorine: 1. Ferrous fluoride, $FeF_2 + 8H_2O$, forms colorless or greenish-colored prismatic crystals. 2. Ferric fluoride, $Fe_2F_6 + 9H_2O$, forms colorless crystals. Both lose their water of crystallization on heating. [B, 3.]—**I.-heads.** The *Centaurea nigra.* [B, 19, 275 (*a*, 24).]—**I. hemisulphide.** A substance, Fe_2S, possessing magnetic properties. [B, 16.]—**I. hydride.** A compound (probably FeH_2) forming a powder of a metallic aspect. [B, 3.]—**I. hydroxide.** Ger., *Eisenoxyhydrat.* I. hydrate, hydrated oxide of i., a compound of i. with hydroxyl. A variety of such compounds are known: 1. Ferrous hydroxide (Ger., *Eisenoxydulhydrat*), $Fe(OH)_2$, a body which when pure is white, but which rapidly decomposes on exposure to the air, becoming first green, and then brown. 2. Ferric hydroxide (Ger., *Eisenoxydhydrat*), $Fe_2(OH)_6$ (or $Fe_2O_5H_4 = Fe_2O_3.2H_2O$ [Fr. Cod.]), a body soluble in hydrochloric acid, constituting the *ferri oxidum hydratum* (*q. v.*) of the U. S. Ph., the *ferri oxidum humidum* of the Br. Ph., and the *sesquioxyde de fer bihydraté* of the Fr. Cod. By drying ferric hydroxide, another compound is produced (see *Hydrated peroxide of i.* [2d def.]) which enters into the composition of *i. subcarbonate* (*ferri subcarbonas*, U. S. Ph., 1870, *safran de Mars apéritif* [Fr. Cod.]). I. rust (Lat., *rubigo ferri, ferri rubigo* [Dub. Ph.] is chiefly ferric hydroxide with a small admixture of ferrous compounds. 3. Ferroso-ferric-hydroxide, $Fe_3(OH)_8$, the compound formed, according to some authorities, when the so-called *magnetic oxide of i.* is prepared according to the process of the Br. Ph. According to others, however, this substance is an i. hydroxide of the constitution $Fe_3H_2O_6 = Fe(OH)_2.Fe_2O_3$. [B, 3, 5, 8.]—**I. hypophosphite.** Fr., *hypophosphite de fer.* A salt of i. and hypophosphorous acid. There are known to exist: 1. *Dihydric ferrous hypophosphite* (Ger., *unterphosphorigsaures Eisenoxydul*), $Fe.(H_2PO_2)_2$, a salt readily converted into the ferric compound. 2. *Dihydric ferric hypophosphite* (Ger., *unterphosphorigsaures Eisenoxyd*), $Fe_2(H_2PO_2)_6$, usually called simply hypophosphite of i., the *ferri hypophosphis* of the U. S. Ph. It is a white or grayish substance, almost insoluble in water, readily soluble in hydrochloric and acetic acids. [B.]—**I. hyposulphite.** Lat., *ferri hyposulphis.* Fr., *hyposulfite de fer.* Ferrous hyposulphite (Ger., *unterschwefligsaures Eisenoxydul*), FeS_2O_3, a substance produced along with i. sulphite by the action of sulphurous acid on metallic i. [B, 3.]—**I. iodate.** Ger., *jodsaures Eisenoxyd.* Ferric iodate, a salt, $2Fe_2(IO_3)_6.Fe_2O_3 + 24H_2O$, prepared by precipitating a dilute solution of ferric chloride with potassium or (sodium) iodate. [B, 5.]—**I. iodide.** Lat., *ferri iodidum* [Br. Ph.] *ferrum, jodatum* [Ger. Ph., Swiss Ph., Russ. Ph.], seu *ioduretum* [Gr. Ph.]), *jodetum ferrosum* [Dan. Ph., Finn. Ph.],

ioduretum ferri [Belg. Ph.]. Fr., *iodure de fer.* Ger., *Jodeisen, Eisenjodür.* Sp., *ioduro ferroso* [Sp. Ph.]. A salt of i. and iodine, the only one certainly known to exist, being the ferrous iodide, FeI_2, obtained by the action of iodine on i. in the presence of water. It forms transparent, greenish, tabular crystals, having a metallic, styptic taste. It is very deliquescent, and is readily soluble in water and in alcohol. It fuses with the formation of an i.-gray mass. It decomposes very readily, with the liberation of iodine, and the formation of i. sesquioxide. This can be prevented by the addition of sugar. It is an astringent compound and a very valuable tonic, particularly in scrofulous conditions, where the iodine which it contains appears to give it special virtue. [B, 95.]—**I. lactate.** Lat., *ferri lactas* [U. S. Ph.], *ferrum lacticum* [Ger. Ph., Austr. Ph.] (*oxydulatum* [Gr. Ph., Russ. Ph.]). Fr., *lactate ferreux* [Fr. Cod.], *lactate de fer.* Ger., *milchsaures Eisenoxydul.* It., *lattato di ferro.* Sp., *lactato ferroso* [Sp. Ph.], *lactato de hierro.* Roum., *feru lacticu* [Roum. Ph.]. Ferrous lactate, $Fe(C_3H_5O_3)_2 + 5H_2O$, a body occurring in minute, greenish-white crystals. A ferric lactate, $Fe_2(C_3H_5O_3)_6$, is also known, and occasionally used in medicine. [B, 5.]—**I. malate.** A compound of i. with malic acid (see *Extractum* FERRI *pomati*). The malates of i., both neutral and acid, are brown, gummy substances, unchanged in air, and very soluble in water and in alcohol. [B, 244 (*a*, 27).]—**I. monosulphide.** Fr., *monosulfure de fer, sulfure ferreux.* Ferrous (or simply i.) sulphide, FeS, a substance occurring native in meteorites, and obtained artificially either by the direct action of sulphur on metallic i. [the *sulfure ferreux par voie sèche* of the Fr. Cod.], or by precipitating a solution of ferrous sulphate with sodium monosulphide [the *sulfure ferreux par voie humide* of the Fr. Cod.]. It imparts a black color to the mud of drains and cesspools, and to fæces during the administration of ferric salts. It is obtained ordinarily as a black, porous mass, insoluble in water, soluble in dilute hydrochloric acid with decomposition and the evolution of sulphureted hydrogen. It may also be obtained in the crystalline form, and is then yellow and exhibits a metallic lustre. [B, 3, 16.]—**I. monoxide.** Fr., *monoxyde de fer.* Ger., *Eisenoxydul.* Ferrous oxide, a black powder, FeO, obtained by the action of hydrogen on i. sesquioxide, or by the decomposition of ferrous oxalate. [B, 3.]—**I. muriate.** Lat., *ferri murias, ferrum muriaticum oxydatum.* Fr., *muriate de fer oxydé.* Ger., *salzsaures Eisenoxyd.* See *I. chloride* (2d def.).—**I. nitrate.** Fr., *azotate de fer.* A salt of i. and nitric acid. 1. Ferrous nitrate (Fr., *azotate ferreux;* Ger., *salpetersaures Eisenoxydul*), $Fe(NO_3)_2$, a salt very soluble in water, and readily decomposed, forming the ferric salt. 2. Ferric nitrate (Fr., *azotate ferrique;* Ger., *salpetersaures Eisenoxyd*), the nitrate of i. of the U. S. Ph., prepared by the action of nitric acid on the metal, or on ferric hydrate. It forms colorless, deliquescent crystals, $Fe_2(NO_3)_6 + 12H_2O$ (or $Fe_2(NO_3)_6 + 18H_2O$). It is very soluble in water, its aqueous solution being the *liquor ferri nitratis* of the U. S. Ph. In addition, several basic and amorphous nitrates of i. are known. [B, 3.]—**I. nitride.** A compound of i. with nitrogen. One such, Fe_2N, is formed by the action of ammonia on ferrous or ferric chloride. It is a soft, brittle, silvery-white substance, possessed of magnetic properties. Another i. nitride, Fe_5N_2, occurs in the lava of Etna; a substance of metallic appearance and lustre. [B, 3.]—**I. orthophosphate.** See *I. phosphate.*—**I. oxalate.** Lat., *ferrum oxalicum.* Fr., *oxalate de fer.* Ger., *Eisenoxalat.* A salt of i. and oxalic acid. The ferrous oxalate (Lat., *oxalas ferrosus, ferri oxalas* [U. S. Ph.]; Fr., *oxalate ferreux;* Ger., *oxalsaures Eisenoxydul*) is an odorless, yellowish, crystalline powder of feeble taste, soluble in acids, almost insoluble in water. [B.]—**I. oxide.** Lat., *ferri oxidum, ferrum oxydatum.* Fr., *oxyde de fer.* See *I. monoxide, I. sesquioxide,* and *Magnetic i. oxide.*—**I. oxychloride.** Lat., *ferrum oxychloratum.* Fr., *oxychlorure de fer.* A compound of ferric chloride with i. oxide or hydroxide. A number of such compounds probably exist. One, containing a very large proportion of i. oxide, constitutes the so-called dialyzed i., distinguished by its solubility in water. [B.]—**I. oxyhydrate.** A compound of an i. oxide and hydroxide. Some of the so-called i. hydroxides appear to have this composition. [B, 8.]—**I. peptonate.** Lat., *ferrum peptonatum.* Ger., *Eisenpeptonat.* A compound of i. with a peptone, used for administering i. subcutaneously. [B.]—**I. perchlorate.** Fr., *perchlorate de fer.* Ger., *perchlorsaures Eisenoxydul.* Ferrous perchlorate, $Fe(ClO_4)_2 + 6H_2O$, is known, forming light-green crystals, readily deliquescing, and at 100° C. losing their water of crystallization. [B, 3.]—**I. perchloride.** Lat., *ferri perchloridum* [Br. Ph.]. Fr., *perchlorure de fer.* Ger., *Eisenchlorid.* See *I. chloride* (3d def.).—**I. perhydrate.** See *I. hydroxide* (2d var.).—**I. pernitrate.** See *I. nitrate* (2d var.).—**I. peroxide.** Lat., *ferri peroxidum.* Fr., *peroxyde de fer.* Ger., *Eisenoxyd.* I. sesquioxide. [B.]—**I. persulphate.** Lat., *ferri persulphas.* Fr., *persulfate de fer.* See *I. sulphate* (2d var.). [B.]—**I. phosphate.** Fr., *phosphate de fer.* I. orthophosphate. 1. Ferrous phosphate (Lat., *ferri phosphas* [Br. Ph.]; Fr., *phosphate ferreux;* Ger., *phosphorsaures Eisenoxydul*), $Fe_3(PO_4)_2 + 8H_2O$, a substance which when pure is colorless, but generally has a bluish tint, owing to partial oxidation. It is insoluble in water, soluble in acids. 2. Ferric phosphate (Fr., *phosphate ferrique;* Ger., *phosphorsaures Eisenoxyd*), $Fe_2(PO_4)_2$, a yellowish-white substance, soluble in dilute acids. The phosphate of i. of the U. S. Ph. is a mixture of several salts (see FERRI *phosphas*). See also *Monohydric i. phosphate* and *Basic i. phosphate.* [B.]—**I. picrate.** Fr., *picrate de fer.* Ger., *pikrinsaures Eisenoxyd.* A compound of i. and picric acid, made by digesting the latter with an excess of i. sesquioxide and water; an amorphous substance of reddish hue, having an astringent and very bitter taste, and readily soluble in water. [B, 5.]—**I. plaster** (U. S. Ph.). See *Emplastrum* FERRI.—**I. powder.** See FERRUM *pulveratum,* FERRUM *metallicum,* and *Reduced i.*—**I. protiodide.** See *I. iodide.*—**I. protocarbonate.** See *I. carbonate.*—**I. protochloride, I. protohydrochlorate.** Fr., *protochlorure de fer.* Ger., *Eisenchlorür.* See *I. chloride* (1st var.).—**I. protoiodide.** Fr., *protoiodure de fer.* See *I. iodide.*—**I. protosulphate.** Fr., *protosulfate de fer.* See *I. sulphate* (1st var.). [B.]—**I. protosulphide.** Fr., *protosulfure de fer.* I. monosulphide. [B.]—**I. pyrolignite.** Fr., *liqueur de ferroille, bouillon noir.* A mixture of the two i. acetates, prepared by treating i. with wood vinegar, in contact with the air. [B, 2.]—**I. pyrophosphate.** Lat., *ferri pyrophosphas.* Fr., *pyrophosphate de fer.* Ferric pyrophosphate, $Fe_4(P_2O_7)_3$, is prepared as a gelatinous precipitate by adding sodium pyrophosphate to a solution of ferric chloride or ferric sulphate. The so-called i. pyrophosphate of the U. S. Ph. of 1870 was prepared by dissolving this precipitate in a solution of ammonium citrate, and again evaporating. It consisted probably of a mixture of a compound pyrophosphate of i. and ammonium, citrate of i. and ammonium, and ferric citrate. This preparation is still official in the Fr. Cod. as *pyrophosphate de fer citro-ammoniacal.* The i. pyrophosphate of the present Ph. is made by adding 10 parts of sodium pyrophosphate to a solution of 9 parts of ferric citrate in 18 parts of water, and evaporating. The resultant product occurs in light-green, transparent scales, having an acidulous taste, and dissolving in water. It consists of a mixture of pyrophosphate of i. and sodium, citrate of i. and sodium, and ferric citrate. [B, 5.]—**I. pyrophosphate with soda.** See FERRI *et sodii pyrophosphas.*—**I. pyrosulphate.** It., *pirosolfato di ferro.* A white, microcrystalline powder, FeS_2O_7. [B, 3.]—**I. pyrothioarsenate.** 1. *Ferrous pyrothioarsenate,* $Fe_2As_2S_7$, a dark-brown substance. 2. *Ferric pyrothioarsenate,* $Fe_4(As_2S_7)_3$, a grayish-green precipitate. [B, 2.]—**I. pyruvate.** A compound of i. and pyruvic acid. There are two such: 1. *Ferrous pyruvate,* obtained from the action of sodium pyruvate on green vitriol, and separating out, when the air is excluded, as dark-red crystals, soluble with difficulty in water. The salt may also be obtained, as an almost black mass, soluble in water, by dissolving i. in warm dilute pyruvic acid, and evaporating. 2. *Ferric pyruvate,* obtained as a red soluble mass by treating ferric hydroxide with pyruvic acid. [B, 3 (*a*, 38).]—**I.-rust.** Lat., *rubigo ferri.* The reddish substance formed on the surface of i. as the result of exposure to air and moisture. It consists chiefly of ferric hydroxide. [B, 3.] See *I. hydroxide* (2d var.).—**I. saccharate.** A compound said to be present in the *ferrum oxydatum saccharatum solubile* of the Ger. Ph. [B.]—**I. sesquichloride.** Lat., *ferrum sesquichloratum* [Ger. Ph., Swiss Ph., Russ. Ph.]. Fr., *sesquichlorure de fer.* See *I. chloride* (2d var.).—**I. sesquiferrocyanide.** Ferric ferrocyanate. [B.] See *I. ferrocyanide.*—**I. sesquioxide.** Lat., *ferrum oxydatum, oxydum ferricum igne paratum* [Fr. Cod.]. Fr., *sesquioxide de fer anhydre* [Fr. Cod.], *oxyde rouge de fer.* Ger., *Eisenoxyd.* Ferric oxide, red i. oxide, Fe_2O_3, a substance occurring in nature as martite and red hæmatite, and obtainable artificially in the form of a crystalline, steel-colored powder, or of red translucent scales (*micaceous i.*). When finely powdered, i. sesquioxide is of a brownish-red color. It is devoid of taste and odor, and is practically insoluble in water, soluble in hydrochloric acid. When obtained by the action of heat on ferrous sulphate, it forms colcothar. [B, 3.]—**I. sesquisulphate.** Fr., *sesquisulfate de fer.* See *I. sulphate* (2d var.).—**I. sesquisulphide.** Ferric sulphide, a yellow substance, Fe_2S_3. [B, 3.]—**I. silicate.** Fr., *silicate de fer.* Ger., *kieselsaures Eisenoxydul* (oder *Eisenoxyd*). A number of single and double silicates of i., both ferrous and ferric, are known, constituting various minerals. They are generally amorphous mixtures in which ferric oxide is replaced by alumina, etc. [B, 3; B, 244 (*a*, 27).]—**I. slab.** See *I. bloom.*—**I. subcarbonate.** See FERRI *subcarbonas.*—**I. subsulphate.** Lat., *ferri subsulphas.* Fr., *soussulfate de fer.* Monsel's salt, $Fe_4O(SO_4)_5$, formed, by the action on ferrous sulphate, of nitric and sulphuric acids, the latter being in quantity insufficient completely to convert the ferrous salt into the normal ferric salt. It forms light, reddish-brown, transparent scales, which readily deliquesce and are soluble in water. It is much used as a styptic. [B, 5.] See *Liquor* FERRI *subsulphatis.*—**I. subtritocarbonate.** See FERRI *subcarbonas.*—**I. succinate.** Ferrous succinate; a grayish-green precipitate, oxidizing on contact with the air; used in cholelithiasis. Ferric succinates are also known. [B.]—**I. sucrate.** A substance, perhaps $C_{12}H_{20}FeO_{11}$, produced by allowing i. to remain a long time in contact with sugar solution in a warm place. Its exact composition is uncertain. [B, 3 (*a*, 38).]—**I. sugar.** See FERRUM *oxydatum saccharatum solubile.*—**I. sulpharsenate.** See *I. pyrothioarsenate.*—**I. sulpharsenite.** See *I. thioarsenite.*—**I. sulphate.** Fr., *sulfate de fer.* Ger., *schwefelsaures Eisen.* A salt of i. and sulphuric acid: 1. *Ferrous sulphate* (Lat., *ferri sulphas* [U. S. Ph., Br. Ph.], *ferrum sulfuricum* [Ger. Ph., Finn. Ph., Swiss Ph., Austr. Ph., Hung. Ph.], *sulfas ferrosus* [Fr. Cod.], *sulphas ferri* [Belg. Ph.] (seu *ferrosus* [Dan. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.])); Fr., *sulfate ferreux;* Ger., *schwefelsaures Eisenoxydul*), or green vitriol, often called simply i. sulphate, $FeSO_4 + 7H_2O$, occurs in light-green, monoclinic, prismatic crystals, efflorescing on exposure to the air, and having an astringent saline taste. It is readily soluble in water, insoluble in alcohol; when a solution is evaporated in a vacuum, crystals of the composition $FeSO_4 + 5H_2O$, and afterward those of the composition $FeSO_4 + 4H_2O$, are deposited. When heated to over 140° C., it forms a white powder, $FeSO_4H_2O$. This constitutes *dried i. sulphate,* the *ferri sulphas exsiccatus* of the U. S. Ph. and the *ferrum sulfuricum siccum* of the Ger. Ph. If the dried sulphate be still further heated *in vacuo,* the last molecule of water of crystallization may be driven off, and the anhydrous sulphate, $FeSO_4$, left behind. 2. *Ferric sulphate* (Fr., *sulfate ferrique;* Ger., *schwefelsaures Eisenoxyd*), also called i. tersulphate or persulphate, $Fe_2(SO_4)_3$, is formed by the action of sulphuric and nitric acids upon ferrous sulphate. It occurs in colorless crystals soluble in water. Its solution is the *liquor ferri tersulphatis* [U. S. Ph.] (*q. v.*). The anhydrous salt is a white powder. In addition to these sulphates, various *basic i. sulphates* are known (see *Basic i. sulphate* and *I. subsulphate*), also several ferroso-ferric sulphates, some of which occur in nature as minerals; and finally several compound sulphates. [B.] See *I. and ammonium sulphate, I. and potassium sulphate,* and FERRI *sulphas.*—**I.**

sulphide. Fr., *sulfure de fer.* Ger., *Schwefeleisen.* A compound of i. and sulphur. Among the i. sulphides are (1) i. hemisulphide, (2) i. monosulphide, (3) i. sesquisulphide, (4) ferroso-ferric i. sulphide, and (5) a magnetic octoferric sulphide, Fe_8S, mentioned by some authors. [B, 3.]—**I. sulphite.** Fr., *sulfite de fer.* Ger., *schwefeligsaures Eisenoxyd.* Ferrous sulphite, $FeSO_3$, a colorless or greenish crystalline substance. [B, 3.]—**I. sulphocyanate.** See *I. thiocyanate.*—**I. tannate.** Lat., *ferri tannas.* Fr., *tannate de fer.* Ger., *Eisentannat.* A preparation made by dissolving 44 parts of precipitated i. subcarbonate in a boiling solution of 9 parts of pure tannic acid, evaporating, and drying. It is thus obtained in flat pieces of crimson color, devoid of taste, and insoluble in water. It has an astringent and tonic action, and may be given in pill form in chlorosis. [B, 5 (*a*, 38).]—**I. tartrate.** A compound of i. and tartaric acid: 1. *Ferrous tartrate*, $C_4H_4O_6Fe$, obtained by boiling together tartaric acid, i. filings, and water, and occurring as a white crystalline powder almost insoluble in water. 2. *Ferric tartrate*, obtained as a brownish-green solution by treating freshly precipitated ferric hydroxide with tartaric acid. In the air it is partly reduced to ferrous tartrate, and if warmed decomposes with formation of a basic salt. [B, 3 (*a*, 38).] See also *I. and potassium tartrate.*—**I. tartro-aloetate sesquioxide.** Ferric tartro-aloetate, a mixture containing aloes, together with a tartrate of hydrated i. sesquioxide and i. filings. ["Gazzetta degli ospitali," Nov. 15, 1881 (B).]—**I. tersulphate.** Lat., *ferri tersulphas.* See *I. sulphate* (2d var.).—**I. thioarsenite.** I. sulpharsenite: 1. A body, $Fe_2As_2S_5$; 2. A substance, $Fe_4.As_2S_9$. [B, 2.]—**I. thiocyanate.** Fr., *sulphocyanate de fer.* Ger., *Schwefelcyaneisen, Rhodaneisen.* Ferric thiocyanate, $Fe_2(SCN)_6$, a dark, deliquescent, amorphous mass, soluble in water and in alcohol, and giving a deep-red solution, the formation of which is used as a test for the presence of the sulphocyanates and of the sulphides. [B.] See *I. sulphocyanate.*—**I. thiosulphate.** See *I. hyposulphite.*—**I.-tree.** 1. An arborescent growth produced by placing ferric chloride in a solution of potassium silicate. The i. salt is decomposed, forming ferric silicate, and basic ferric carbonate, with the evolution of gaseous carbon dioxide, which, bubbling through the thick solution, produces branching filiform processes. [B, 3.] 2. See the major list.—**I. tungstate.** Fr., *tungstate de fer.* Ger., *wolframsaures Eisenoxydul.* Ferrous tungstate, $FeWO_4$, occurring native as a mineral. [B, 3.]—**I. valerianate.** Lat., *ferri valerianas* [U. S. Ph., Dubl. Ph.], *ferrum valerianicum* [Gr. Ph.]. Fr., *valérianate de fer.* Ger., *baldriansaures Eisen.* A body, $Fe_2.(C_5H_9O_2)_6$, occurring as a dark-red, amorphous powder, soluble in alcohol, and having a faint odor of valerianic acid. It is usually regarded as a basic compound. [B, 5; B, 95 (*a*, 38).]—**I.-weed.** 1. The *Centaurea nigra.* 2. The genus *Vernonia* and the *Vernonia fasciculata.* [B, 19, 34, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc." (*a*, 39).]—**I. wine.** See *Vinum* FERRI.—**I. wire.** Fr., *fil de fer.* Ger., *Eisendraht.* See FERRI *filum.*—**I'wood, I'wort.** See the major list.—**I. yellow.** Fr., *jaune de fer* (ou *de Mars*), *ocre jaune.* A pigment prepared from hydrated i. oxide. [B, 46 (*a*, 39).]—**Lozenges of reduced i.** See *Trochisci* FERRI *reducti.*—**Magnetic i. oxide.** Lat., *ferri oxidum magneticum* [Br. Ph.] (seu *nigrum*) [Ed. Ph.]), *ferrum oxydatum* [Austr. Ph.] *oxydulatum* [Gr. Ph.], *oxidum ferroso-ferricum* [Finn. Ph.], *oxydum ferri nigrum* [Belg. Ph.], *ferrum oxydulato-oxydatum* [Swiss Ph.], *œthiops martialis.* Fr., *oxyde de fer magnétique* (ou *noir*), *oxyde ferroso-ferrique, éthiops martial.* Ger., *Magneteisen, Ferrioxyd, Eisenoxydoxydul.* Sp., *óxido ferroso-férrico* [Sp. Ph.]. Black i. oxide, ferroso-ferric oxide, triferric tetroxide, Fe_3O_4, a substance occurring in nature as magnetite or loadstone. Natural magnets are formed from this mineral. It may be prepared artificially in various ways. The magnetic i. oxide of the Br. Ph. is obtained by precipitating a mixture of ferrous and ferric sulphates with caustic soda. It is a brownish-black powder, devoid of taste, soluble in hydrochloric acid, and exhibiting marked magnetic properties. It consists chiefly of i. hydroxide, $Fe(OH)_2Fe_2O_3 = Fe_3O_4H_2O$, with a small quantity of i. sesquioxide. According to others, it has the composition of ferroso-ferric hydrate, $Fe_3(OH)_8$. [B, 3, 8.] See also ÆTHIOPS *martialis.*—**Mass of carbonate of i.** [U. S. Ph.]. See *Massa* FERRI *carbonatis.*—**Meteoric i.** Metallic i. from extraterrestrial sources, forming the chief part of many meteorites, and accompanied by more or less nickel and usually by other metals, among them schreibersite, $Ni_2F_{24}P$, a compound not found in the minerals of the earth. [B, 3 (*a*, 38).]—**Mephitic aerated i.** I. carbonate. [B, 91.]—**Mixture of i. and ammonium acetate.** See *Mistura* FERRI *et ammonii acetatis.*—**Moist peroxide of i.** See FERRI *oxidum hydratum.*—**Monohydric i. arsenate.** A white substance, $2Fe_2(HAsO_4)_3+9H_2O$, precipitated from a solution of ferric chloride by the addition of monohydric sodium arsenate. [B, 3.]—**Monohydric i. phosphate.** Acid phosphate of i., an i. phosphate in which the latter replaces all but one of the hydrogen atoms of phosphoric acid. Two such salts are known: 1. Monohydric ferrous phosphate, a body, $HFe(PO_4)+H_2O$, forming colorless, acicular crystals. 2. Monohydric ferric phosphate, $2Fe_2(HPO_4)_3+5H_2O$, a crystalline substance obtained by adding an excess of ammonium phosphate to a solution of ferric sulphate. [B, 3.]—**Monsel's i. persulphate.** See *I. subsulphate.*—**Muriated tincture of i.** See *Tinctura* FERRI *chloridi.*—**Nitrated i., Nitre of i.** I. nitrate. [B, 91.]—**Passive i.** I. dipped into concentrated nitric acid, and then washed, so that it fails to precipitate copper from solution, and is no longer susceptible to the action of nitric acid. This condition of i. is probably due to the formation of a thin coating of oxide, and may be produced by chloric, bromic, iodic, or chromic acid, or by hydrogen dioxide. [B, 3 (*a*, 38).]—**Pill of carbonate of i.** [Br. Ph.]. See *Massa* FERRI *carbonatis.*—**Pill** [Br. Ph.] (or **Pills** [U. S. Ph.]) **of iodide of i.** See *Pilulæ* FERRI *iodidi.*—**Porphyrized i.** See FERRUM *pulveratum.*—**Powder of i.** See *Reduced i.*—**Precipitated i. carbonate.** Ferrous carbonate obtained by precipitation of ferrous sulphate by the action of potassium carbonate. On exposure to the air it is transformed into i. sesquioxide and i. subcarbonate. [B.]—**Precipitated i. sulphate** [U. S. Ph.]. See FERRI *sulphas præcipitatus.*—**Pulverized i.** See FERRUM *pulveratum.*—**Quevenne's i.** See *Reduced i.*—**Rademacher's tincture of acetate of i.** See *Tinctura* FERRI *acetatis Rademacheri.*—**Red i. oxide.** See *I. sesquioxide.*—**Reduced i.** Lat., *ferrum* (*hydrogenio* [Fr. Cod., Belg. Ph., Gr. Ph., Hung. Ph., Netherl. Ph.]) *reductum* [U. S. Ph., Ger. Ph., Russ. Ph., Dan. Ph., Swiss Ph., Norw. Ph.] (seu *redactum* [Br. Ph., U. S. Ph., 1870]). Fr., *fer réduit* (*par l'hydrogène* [Fr. Cod.]). Ger., *reducirtes Eisen.* Sp., *hierro reducido por el hidrógeno* [Sp. Ph.]. Roum., *feru redusu prin hydrogenu* [Roum. Ph.]. I. obtained as a fine, soft, grayish powder by reducing a ferric salt by contact with hydrogen. [B.]—**Reduced i. lozenges** [Br. Ph.]. See *Trochisci* FERRI *reducti.*—**Saccharated i.** See FERRUM *oxydatum saccharatum solubile.*—**Saccharated i. carbonate.** See FERRI *carbonas saccharatus.*—**Saccharated i. iodide.** See FERRI *iodidum saccharatum.*—**Saccharated i. oxide.** A mixture of ferric oxide and sugar, such as the *ferrum oxydatum saccharatum solubile* of the Ger. Ph. [B.]—**Scales of i.** See FERRI *squamæ.*—**Soft i.** Fr., *fer doux.* Ger., *weiches Eisen.* Wrought i. containing so little carbon (from 0·15 to 0·3 per cent.) that it possesses a fibrous texture. [B, 3 (*a*, 38).]—**Soluble i. citrate.** See *I. and ammonium citrate.*—**Soluble i. hydroxide.** A modification of ferric hydroxide, soluble in water, obtained by dialysis of a dilute solution of a basic i. chloride, or other basic i. salt. The colloidal hydroxide remains behind in solution, constituting the so-called *dialyzed i.*, or *liquor ferri dialysati.* [B.]—**Soluble saccharated i. oxide.** See FERRUM *oxydatum saccharatum solubile.*—**Solution of acetate of i.** See *Liquor* FERRI *acetatis.*—**Solution of chloride of i.** [U. S. Ph.]. See *Liquor* FERRI *chloridi.*—**Solution of chloroxide of i.** See *Liquor* FERRI *oxychlorati.*—**Solution of citrate of i.** See *Liquor* FERRI *citratis.*—**Solution of citrate of i. and quinine.** See *Liquor* FERRI *et quininæ citratis.*—**Solution of dialyzed i.** See *Dialysed i.* and *Liquor* FERRI *dialysatus.*—**Solution of nitrate of i.** [U. S. Ph.]. See *Liquor* FERRI *nitratis.*—**Solution of perchloride of i.** See *Liquor* FERRI *perchloridi.*—**Solution of pernitrate of i.** [Br. Ph.]. See *Liquor* FERRI *pernitratis.*—**Solution of persulphate of i.** [Br. Ph.]. See *Liquor* FERRI *persulphatis* and *tersulphatis.*—**Solution of subsulphate of i.** See *Liquor* FERRI *subsulphatis.*—**Solution of tersulphate of i.** See *Liquor* FERRI *tersulphatis.*—**Sparry i. ore.** I. carbonate. [B, 91.]—**Strong solution of acetate of i.** See *Liquor* FERRI *acetatis.*—**Strong solution of perchloride of i.** [Br. Ph.]. See *Liquor* FERRI *chloridi.*—**Sweating-i.** Ger., *Abschrapsmesser.* In veterinary medicine, a sweat-knife; a long, flexible, dull-edged knife for scraping the perspiration from horses. [*a*, 40.]—**Syrup of bromide of i.** [U. S. Ph.]. See *Syrupus* FERRI *bromidi.*—**Syrup of iodide of i.** See *Syrupus* FERRI *iodidi.*—**Syrup of i. iodohydrargyrate.** A preparation made by dissolving 1 part of mercuric iodide (red iodide of mercury) in 3,000 parts of the syrup of i. iodide. [B, 14.]—**Syrup of phosphate of i.** See *Syrupus* FERRI *phosphatis.*—**Syrup of phosphates of i., quinine, and strychnine.** See *Syrupus* FERRI, *quininæ et strychninæ phosphatum.*—**Tartarated i.** See *I. and potassium tartrate.*—**Tartarized extract of i.** See *Extractum* FERRI *cum tartaro.*—**Tartro-aloetate of i. sesquioxide.** See *I. tartro-aloetate sesquioxide.*—**Tasteless i. chloride.** Ger., *geschmackloses Chloreisen.* A preparation made by adding a solution of an alkaline citrate to a solution of i. sesquichloride so that there shall be 2 molecules of the former to 3 of chlorine. [B, 5 (*a*, 38).]—**Tasteless i. iodide.** A preparation made by dissolving 63 grains of iodine in a filtered solution of ferrous iodide containing 126·3 grains of iodine, adding a solution of 201 grains of citric acid exactly saturated with potassa, and evaporating when the apple-green color has developed. When dried, it occurs in cauliflower-like masses of acicular crystals. [B, 5 (*a*, 38).]—**Tincture of acetate of i.** See *Tinctura* FERRI *acetatis.*—**Tincture of chloride** (or **perchloride** [Br. Ph.]) **of i.** [U. S. Ph.]. See *Tinctura* FERRI *chloridi.*—**Troches of i.** [U. S. Ph.]. See *Trochisci* FERRI.—**Vitriol of i.** I. sulphate. [B, 91.]—**White i. phosphate.** See *I. phosphate* (2d def.).—**Wine of citrate of i.** See *Vinum* FERRI *citratis.*—**Wine of i.** [Br. Ph.]. See *Vinum* FERRI.—**Wrought i.** Ger., *Schmiede-Eisen.* I. containing a minimum amount of carbon (0·2 to 0·3 per cent.). It is softer and melts at a higher temperature than other varieties of i., possesses a fibrous structure, and is tough and malleable. [B.]

IRON-BARK, n. I'rn'ba^{3}rk. The *Eucalyptus resinifera.* [B, 5, 75.]—**Lemon-scented i.-b.** The *Eucalyptus crebra.* ["New Comm. Pl. and Drugs," No. 9, 1886, p. 14 (B).]—**Queensland i.-b.-tree.** The *Eucalyptus Leboucherii.* [B, 275 (*a*, 24).]—**Silver-leaved i.-b.-tree.** The *Eucalyptus pulverulenta.* [B, 275 (*a*, 24).]

IRONCOSIS (Lat.), n. f. I^{2}(e)-ro^{2}n^{2}-ko'si^{2}s. Gen., *-os'eos* (*-is*). See IRIDONCOSIS.

IRON-TREE, n. I'rn'tre. The genus *Sideroxylon.* [B, 19 (*a*, 24).] See also IRONWOOD.—**Norfolk Island i.-t.** The *Notelæa longifolia.* [B, 275 (*a*, 24).]—**True i.-t.** The *Metrosideros vera.* [B, 275 (*a*, 24).]—**West Indian i.-t.** The *Siderodendron triflorum.* [B, 275 (*a*, 24).]

IRONWOOD, n. I'rn'wu^{4}d. The genus *Sideroxylon*; also a term for various trees of very hard timber. [B, 19, 185, 275 (*a*, 24).]—**American i.** 1. The *Bromelia lycioides.* 2. The *Carpinus americana.* 3. The *Ostrya virginica.* [B, 19, 275 (*a*, 24).]—**Bastard i.** The *Xanthoxylon pterota.* [B, 275 (*a*, 24).]—**Bastard i. of the West Indies.** The *Xanthoxylon pterota* and the *Trichilia hirta.* [B, 275 (*a*, 24).]—**Bourbon i.** The *Stadtmannia sideroxylon.* [B, 19, 185, 275 (*a*, 24).]—**Burmah i.** The *Xylia dolabriformis.* [B, 275 (*a*, 24).]—**Dutch East Indies i.** The *Dodonæa waitziana, Cassia siamea, Eusideroxylon Zwageri, Intsia amboinensis, Memecylon ferreum, Namia vera, Stadtmannia sideroxylon,* and *Sloetia sideroxylon.* [B, 19, 275 (*a*, 24).]—**East Indian i.** The *Xylia dolabriformis* and *Mesua ferrea.* [B, 275 (*a*, 35).]—**East tropical African i.** The *Copaifera mopane.* [B, 275 (*a*, 24).]—**Indian i.** See *East Indian i.*—**Jamaica i.** The *Erythroxylon areolatum.* [B,

185, 275 (α. 24).]—**Morocco i.** The *Argania sideroxylon.* [B, 19, 185 (α, 24).]—**New South Wales i.** The *Notelæa ligustrina.* [B, 185, 275 (α, 24).]—**Persian i.** The *Parrotia persica.* [B, 275 (α, 24).]—**Small-leaved i.** The *Mourria myrtilloides.* [B, 275 (α, 24).]—**South Sea Islands i.** The *Casuarina equisetifolia.* [B, 19, 275 (α, 24).]—**Tasmanian i.** The *Notelæa ligustrina.* [B, 185, 275 (α, 24).]—**West Indian i.** The *Sloanea jamaicensis* and the *Fagara pterota.* [B, 275 (α, 24).]—**White i.** The *Vepris lanceolata.* [B, 185, 275 (α, 24).]

IRONWORT, n. I'rn'wu^{5}rt. 1. The genus *Sideritis.* 2. The *Galeopsis ladanum.* [B, 19, 275 (α. 24).]—**Canary Island i.** The *Sideritis canariensis.* [B, 275 (α, 24).]—**Mountain i.** See Sideritis *montana.*—**Petty i., Smooth-leaved i.** The *Stachys arvensis.* [A, 511 (α, 24).]—**Yellow i.** The *Galeopsis ochroleuca.* [B, 275 (α, 24).]

IROS (Lat.), n. n. I(e)'ro^{2}s. Gen., *ir'u.* Perhaps from εἶρος, wool. 1. Of Hippocrates, according to Erotianus, a sort of fever. 2. A species of scirrhous tumor of the spleen. 3. A variety of erysipelas with induration. [L, 50 (α, 14).]

IRRADIATION, n. I^{2}r-ra-di^2-a'shu^{3}n. From *irradiare,* to illumine. Fr., *i.* Ger., *Ausstrahlung.* It., *irradiazione.* Sp., *irradiación.* 1. A passing outward in lines that spread in all directions, as in the case of rays of light, or fractures of a stellate form, etc. 2. In ophthalmology, a series of phenomena in which a limited field, much more brightly illuminated than the background on which it is projected, appears much larger than it really is ; and reciprocally a dark limited field, projected on a bright background, appears much smaller than it is in reality. [F.]

IRRE (Ger.), n. I^{2}r're^2. A lunatic. [A, 450 (α, 21).]—**I'nanstalt.** See *Lunatic* asylum.—**I'narzt.** An alienist.—**I'närztlich.** Pertaining to psychiatry or to psychiatrists.—**I'nhaus.** See *Lunatic* asylum.—**I'npflege.** The management of the insane.—**I'reden, I'sein.** See the major list.

IRREDUCIBLE, adj. I^{2}r-re-du^{2}s'i^2-b'l. From *in* neg., and *reducere,* to lead back. Fr., *irréductible.* Ger., *irreducibel, uneinrenkbar.* Incapable of being reduced. [L, 41, 44, 107 (α, 14 ; α, 41).]

IRREGULAR, adj. I^{2}r-re^{2}g'u^2-la^{3}r. Lat., *irregularis* (from *in* neg., and *regularis,* pertaining to a rule). Fr., *irrégulier.* Ger., *unregelmässig.* 1. Having characteristics differing from those ordinarily found. 2. Of the pulse, the breathing, etc., arrhythmical. 3. Of a flower, having differences in the size and shape of the parts of the whorl. [B, 1, 19, 77, 123, 279 (α, 35).] See also Unsymmetrical and Zygomorphous and Cf. Regular.

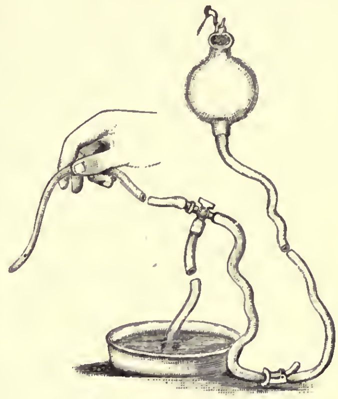
IRREINOCULABILITY, n. I^{2}r-re-i^{2}n-o^{2}k-u^{2}l-a^2-bi^{2}l'i^2-ti^2. Fr., *irréinoculabilité.* Of Diday, insusceptibility to the contagion of syphilis due to a previous inoculation with the disease. ["Arch. gén. de méd.," 1863 (α, 40).]

IRREND (Ger.), adj. I^{2}r're^{2}nd. Erratic. [L, 80.]

IRREPTION, n. I^{2}r-re^{2}p'shu^{3}n. Lat., *irreptio* (from *irrepere,* to creep in). See Eisbole.

IRREREDEN (Ger.), n. I^{2}r're^2-rad-e^{2}n. See *Mental* alienation.—**Actives I.** Active delirium. [L, 80.]—**I. der Säufer.** Delirium tremens. [L, 80.]—**Fieberhaftes I.** See *Febrile* delirium.—**I. mit Zittern.** Delirium tremens. [L, 80.]—**Immerwährendes I.** Continuous delirium. [L, 80.]—**Krampfhaftes I.** Spastic delirium. [L, 80.]—**Nervöses I.** Nervous delirium. [L, 80.]—**Periodisches I.** Periodical delirium. [L, 80.]—**Sanftes I.** Delirium mussitans. [L, 80.]—**Wildes I.** Furious delirium. [L, 80.]

IRRESEIN (Ger.), n. I^{2}r're^2-zin. See Insanity and *Mental* alienation.—**Circuläres I.** See *Circular* insanity.—**Epileptisches I.** See *Epileptic* insanity.—**Hypochondrisches I.** See Hypochondriasis.—**Hysterisches I.** Any mental disturbance of hysterical origin. [A, 528.]—**Inducirtes I.** See *Communicated* insanity.—**Moralisches I.** See *Moral* insanity.—**Periodisches I.** See *Periodical* insanity.—**Räsonnirendes I.** See *Reasoning* mania.—**Zirkuläres I.** See *Circular* insanity.



IRRESPIRABLE, adj. I^{2}r-re^{2}sp'i^{2}r-a^2-b'l. Lat., *irrespirabilis* (from *in* neg., and *respirare,* to breathe). Fr., *irrespirable, non respirable.* Ger., *irrespirable, uneinathmenbar.* Of a gas, incapable of supporting life when inspired.

IRRGANG (Ger.), n. Er'ga^{3}n^2. See Labyrinth.—**Gehöri'.** The labyrinth of the ear. [L, 80.]

IRRHYTHMIA (Lat.), n. f. I^{2}r-ri^{2}th(ru^{6}th)'mi^2-a^3. From *in* neg., and ῥυθμός, rhythm. See Arrhythmia.

IRRIGATION, n. I^{2}r-ri^2-ga'shu^{3}n. Lat., *irrigatio* (from *irrigare,* to conduct water or other liquids, to wet, moisten, supply with fluid). Fr., *i.* Ger., *I., Tropfbad.* 1. The act of watering or moistening. 2. The act of letting water or other fluids fall drop by drop on anything ; also of cleansing by means of a stream. [B, 48 (α, 45).]

IRRIGATOR (Lat.), n. m. I^{2}r-ri^2-ga(ga^3)'to^{2}r ; in Eng., i^{2}r'ri^2-gat-o^{2}r. Gen., *-or'is.* From *irrigare,* to conduct water, to wet, moisten, etc. Fr., *irrigateur.* Ger., *I.* An apparatus for irrigating wounds and the cavities of the body with gentle streams of water. [A, 326 (α, 21).]—**Bodenhamer's rectal i.** A plug of hard rubber with perforated sides and open end, arranged for a double stream. [E.]—**Équisier's i.** An instrument for irrigating the rectum or vagina, consisting of a metallic tube with a tight-fitting piston manipulated with a key ; at the base is a stop-cock connecting it with a flexible tube to which is fixed at a right angle a nozzle so that the patient can use it himself. [α, 40.]—**Esmarch's i.** A metallic reservoir arranged for hanging against the wall and connected by a long rubber tube with a vulcanite nozzle, having a stop-cock in it which is easily opened, and shut by a double lever which is manipulated by the thumb. [α, 40.]—**Keyes's bladder i.** A fountain syringe with a rubber tube, stopcocks, and urethral catheter, so arranged in combination as to comprise an apparatus for irrigation of the bladder. [α, 25.]—**Mundé's rectal i.** A number of parallel wires slightly bowed to form a frame for dilating the rectum and allowing an injected fluid to reach all parts of it. [E.]

KEYES'S BLADDER IRRIGATOR.

IRRITABILIS (Lat.), adj. I^{2}r-ri^2(re)-ta^{2}b(ta^{3}b)'-i^{2}l-i^{2}s. See Irritable.

IRRITABILITAS (Lat.), n. f. I^{2}r-ri^2-ta^3-bi^{2}l'i^2-ta^{2}s(ta^{3}s). Gen., *-tat'is.* See Irritability.—**I. halleriana.** See *Hallerian* irritability.—**I. morbosa.** The condition of being easily irritated which is produced by certain forms of disease. [α, 40.]—**I. vesicæ.** Irritability of the urinary bladder.

IRRITABILITY, n. I^{2}r-ri^2-ta^2-bi^{2}l'i^2-ti^2. Lat., *irritabilitas* (from *irritabilis,* easily excited). Fr., *irritabilité.* Ger., *Reizbarkeit, Muskelfasernthätigkeit* (4th def.), *Irritabilität, Erregbarkeit.* It., *irritabilità.* Sp., *irritabilidad.* Syn. : *excitability.* 1. Susceptibility to stimulation, a property inherent in animal bodies, and in some vegetables. 2. A condition of mind which manifests itself by fretfulness, fault-finding, complaining about trifles, or of things which are imaginary ; impatience. 3. Susceptibility of the whole or a part of the body to irritating influences. 4. Of Brown, the activity or excitability of the muscular system. 5. In pathology, a morbid state of a part characterized by irritation ; also the capability which tissue elements possess of undergoing nutritive and formative changes on the application of a physical or chemical stimulus. 6. In botany, the susceptibility of some plant organs to react against an irritation of external agents ; according to M. Foster, an attribute of all protoplasm by virtue of which a slight stimulus is capable of releasing a disproportionately large amount of energy. [B, 1, 229, 291 (α, 35) ; L, 25, 41, 50 (α, 14).]—**Faradaic i.** The property of a tissue (*e. g.,* muscle) by which it responds by a characteristic action to the stimulus of a faradaic current. [J.]—**Formative i.** Of Virchow, the capacity of a cell to produce new protoplasm when excited by a nutritive irritant. [α, 40.]—**Galvanic i.** The property of a tissue or part by which it responds by a characteristic action to the stimulus of a galvanic current. [J.]—**Hallerian i.** Lat., *irritabilitas halleriana.* Fr., *irritabilité Hallérienne.* The property of muscular substance by which it responds by a contraction to some stimulus applied directly to itself. and quite independent of the nervous system. This is most strikingly seen in parts where nerves have not been found or where the nerve-endings have been paralyzed by curare. [J, 55.]—**Muscular i.** Fr., *irritabilité musculaire.* Ger., *Muskelfasernreizbarkeit.* The property of muscular tissue by which it responds to some stimulus by a contraction. The stimulus may be the result of nervous action or a mechanical, thermal, or electrical action directly on the muscular substance itself. Sometimes, but incorrectly, this term is made synonymous with contractility. [J, 55.]—**Nervous i.** The property of the nervous system by which it wholly or in part responds by some nervous action to a stimulus. [J.]—**Nutritive i., Plastic i.** Fr., *irritabilité nutritive.* 1. The property of the tissues by which, under the influence of various stimuli, more or less nutritive material is taken up and transformed. There may result from this simple hypertrophy or inflammation. 2. A stimulation or irritation leading to a special assimilation of nutritive material. [Virchow (J).]

IRRITABLE, adj. I^{2}r'ri^{2}t-a^2-b'l. Lat., *irritabilis* (from *irritare,* to excite). Fr., *i.* Ger., *reizbar, erregbar.* It., *irritabile.* Sp., *i.* Manifesting or capable of irritation ; of an organ or part, in a morbid state characterized by pain, spasm, etc., without inflammation.

IRRITAMEN (Lat.), n. n. I^{2}r-ri^2(re)-ta(ta^3)'me^{2}n. Gen., *-am'inis.* From *irritare,* to excite. See Stimulus.

IRRITAMENTUM (Lat.), n. n. I^{2}r-ri^2(re)-ta^2(ta^3)-me^{2}nt'u^{3}m-(u^{4}m). From *irritare,* to excite. See Stimulus.

IRRITANT, adj. I^{2}r'ri^2-t'nt. Lat., *irritans* (from *irritare,* to excite). Ger., *irritirend, reizend.* Causing irritation ; as a n. (Ger., *Reizmittel*), an agent having that effect.—**Adequate i.** Of the old writers, an i. supposed to be capable of exciting every sensory nerve. [K, 35.]—**Chemical i.** A substance which irritates by virtue of its chemical reaction with the elements of the tissue to which it is applied. [α. 40.]—**Emeto-cathartic i.** Those remedies which produce emeto-catharsis by local irritation of the intestinal tract. [α, 40.]—**Mechanical i.** An i. which produces irritation through its mechanical action (*e. g.,* the seton, scarifier, or artificial leech). [α, 40.]—**Nervous i.** That which irritates through the medium of the nervous system. [α, 40.]—**Organized i.** An i. consisting of a living organism (*e. g.,* a parasite). [α, 40.]—**Sufficient i.** Ger., *genügende Reizmittel.* A stimulus strong enough to cause a strong reflex action in a sensory nerve. [K, 35.]

IRRITATED, adj. I^{2}r-ri^2-tat'e^{2}d. Lat., *irritatus* (from *irritare,* to excite). In a state of irritation. [A, 312 (α, 21).]

IRRITATIO (Lat.), n. f. I^{2}r-ri^2(re)-ta(ta^3)'shi^2(ti^2)-o. Gen., *-on'is.* See Irritation.—**I. cerebri.** See *Cerebral* irritation.

IRRITATION, n. I2r-ri2-ta'shu3n. Lat., *irritatio* (from *irritare*, to excite). Fr., *i.* Ger., *Reiz, I.* It., *irritazione.* Sp., *irritación.* 1. The act or process of irritating. 2. The state of being irritated.—**Atropine i. of the conjunctiva.** See *Atropine* CONJUNCTIVITIS.—**Cerebral i.** Lat., *irritatio cerebri.* Ger., *Gehirnreiz.* 1. Of Vogel, the assemblage of brain symptoms which occur in consequence of interrupted nutrition and atrophy. They are similar to those seen in hydrocephaloid. [D, 29.] 2. Neurasthenia. [B, 108.]—**Constitutional i.** See *Irritative* FEVER (2d def.).—**Functional i.** Ger., *fonctionelle Reizbarkeit.* I. of an organ due to excessive functional activity. [a, 40.]—**I. formatrice** (Fr.), **I. nutritive** (Fr.), **I. plastique** (Fr.). The power by which cells tend to reproduce themselves. [K.]—**Local i.** Fr., *i. locale.* Ger., *lokale Reizung.* I. of a particular part (often used to denote a local cause of general symptoms).—**Morbid i.** See *Irritative* FEVER (2d def.).—**Peripheral i.** I. of a peripheral part (especially as a cause of symptoms that might be referred to central disease).—**Spinal i.** Syn.: *rhachialgia.* Of Brown, an affection in which pain in the back and breast are the chief symptoms. It occurs principally among women, especially those of an hysterical temperament, between fifteen and thirty years of age. The pain, according to Brown, is immediately caused by spasm of one or more of the spinal muscles, by which means the position of the vertebræ is changed and the spinal nerves are compressed. The origin of the trouble may be local, *i. e.*, consisting of some fault in the muscles, or it may proceed from a disordered state of the vessels of the brain or spinal cord. Other views on this disease are maintained, Valleix holding that hysteria is at the bottom of it, Teale referring it to inflammation, etc. [D, 34.]—**Sympathetic i. of the uterus.** Ger.; *consensuelle Reizung des Uterus.* Indirect i. of the uterus by manipulation of or applications to the breasts.

IRRITATIVE, adj. I2r'ri2-tat-i2v. From *irritare*, to excite. Fr., *irritatif.* Ger., *irritativ.* Pertaining to or of the nature of irritation.

IRRITIREND (Ger.), adj. I2r-re-ter'e2nd. See IRRITANT.

IRRORATION, n. I2r-ro-ra'shu3n. Lat., *irroratio* (from *irrorare*, to besprinkle). Fr., *i.* Ger., *Beträufeln, Besprengen.* The act of moistening by drops or fine spray of a liquid. [L, 41, 50 (a, 14).]

IRRSINN (Ger.), n. Er'zi2n. Insanity.—**I. der Querulanten und Prozess-Krämer.** A monomania for litigation. [a, 45.]

IRRSINNIG (Ger.), adj. Er'zi2n-ni2g. Insane. [A, 521.]

IRRTHUM (Ger.), n. Er'tum. See ERROR.

IRRUNG (Ger.), n. Er'run2. See ABERRATION.—**I'sbildung.** See MALFORMATION.

IRRWAHN (Ger.). n. Er'va3n. See DELUSION.—**Acuter I.** Acute mania. [L, 80.]—**I. aus Eifersucht.** Jealous monomania. [L, 80.]—**Lustiger I.** Hilarious delirium. [L, 80.]—**Vorübergehender I.** Transitory delirium. [L, 80.]

IRUNGUS (Lat.), n. m. I2r-u3n2(u4n2)'gu3s(gu4s). An old term for the *Eryngium campestre.* [B, 121.]

IRVINGIA (Lat.), n. f. U6r-vi2n2'i2-a3. From *Irving*, a proper name. A genus of trees found in western tropical Africa, belonging to the *Simarubeæ*, tribe *Picramnieæ.* [B, 42 (a, 35).]—**I. Barteri, I. gabonensis.** A species of *I.* the edible fruits of which are known as wild mango. In the Gaboon country the natives prepare from the kernels a greasy food, called *dika* or *udika* bread, which keeps for a long time without becoming rancid. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 39); B. 19, 185 (a, 24).]—**I. harmandiana.** See DIOSPYROS *sebata.*—**I. Oliveri.** A species growing in the forests of Saryninh, Cochin-China, the seeds of which yield cay-cay wax, used by the natives in the manufacture of candles. ["Proc. of the Am. Pharm. Assoc.," xxxiv (a, 39).]

IS (Lat.), n. f. I2s(es). Gen., *in'os* (*in'is*). Gr., ἴς. See FIBRE.

ISABEL, adj. I2z'a3-be2l. Lat., *isabellinus.* Fr., *isabelle.* Ger., *isabellgelb.* Of a faint yellow mixed with gray and red. [B, 116, 123 (a, 35).]

ISABELLA-WOOD, n. I2z-a3-be2l'a3-wu4d. The *Persea carolinensis.* [B, 275 (a, 35).]

ISACIS (Lat.), n. f. I2s'a3-si2s(ki2s). From ἰσάκις, the same number of times. A genus of the *Anguillulidæ.* [L, 16.]

ISADELPHIA (Lat.), n. f. I2s-a2d(a3d)-e2l'fi2-a3. From ἴσος, equal, and ἀδελφός, a brother. Fr., *isadelphie.* The state of a double monster consisting of two bodies perfectly developed in all essential organic parts, and only united by soft, unimportant tissues. [L, 41, 44, 49 (a, 14).]

ISADELPHOUS, adj. I2s-a2d-e2l'fu3s. Lat., *isadelphus* (from ἴσος, equal, and ἀδελφός, a brother). Of equal brotherhood (said of flowers when the number of stamens in two phalanges is equal). [B, 36 (a, 35).]

ISÆTHIONIC ACID, n. I2s-e2th-i2-o2n'i2k. Fr., *acide iséthionique.* Ger., *Isäthionsäure.* See ISETHIONIC ACID.

ISAGURIC ACID, n. I2s-a2g-u2'ri2k. Ger., *Isagursäure.* An old name for igasuric acid. [B, 270.]

ISALIZARIN, n. I2s-a2l-i2z'a2r-i2n. Fr., *isalizarine.* Ger., *I.* A body, $C_{14}H_8O_4$, having the same composition as alizarin, but differing from it in color and properties. It is found in madder, predominating more in that part of the substance which is insoluble in acetic acid. Its color is intermediate between alizarine and purpurine. [B, 2; B, 46, 93 (a, 39).]

ISALLOXANIC ACID, n. I2s-a2l-lo2x-a2n'i2k. Fr., *acide isalloxanique.* An acid, $C_4H_4N_2O_5$, not yet isolated, formed by the union of a molecule of water with the isomer of alloxan, obtained by heating the latter to 260° C., the salts being colorless. [B, 46, 93 (a, 39).]

ISALLYLENE, n. I2s-a2l'li2l-en. Ger., *Isallylen.* A gas, $C_3H_4 = CH_2 : C : CH_2$, isomeric in constitution with allylene. [B, 4.]—**I'tetracarboxylic acid.** A tetrabasic acid, $CH_2(CO.OH) - C(CO.OH)_2 - CH(CO.OH)$. [B.]

ISAMAMIDE (Fr.), n. E-sa3-ma3-med. See IMASATINE.

ISAMATE, n. I2s'a2m-at. A salt of isamic acid. [L, 41.]

ISAMIC ACID, n. I2s-a2m'i2k. Fr., *acide isamique.* Ger., *Isamsäure.* See IMASATIC ACID.

ISAMIDE, n. I2s'a2m-i2d(id). A yellow, tasteless, odorless substance, $C_{16}H_{14}N_4O_3$, obtained by heating ammonium isamate. It is insoluble in water and in ether, slightly soluble in alcohol. [B, 2; B, 93 (a, 14).]

ISAMYL, n. I2s-a2m'i2l. See ISOAMYL.

ISANTHEROUS, adj. I2s-a2n'the2r-u3s. From ἴσος, equal, and ἄνθος, a flower. Having anthers equal or alike. [L, 107.]

ISAPGHOL, n. See ISPAGHUL.

ISAPIOL, n. I2s-a2p'i2-o2l. A substance, $C_{12}H_{14}O_4$, isomeric with apiol, obtained by boiling apiol with an alcoholic solution of potassa. I. melts at 55° to 56° C., and boils at 303° to 304° C. It possesses physiological properties which differ very little from those of apiol. ["Proc. of the Am. Pharm. Assoc.," xxxvi (a, 39).]

ISATAMIDE (Fr.), n. E-sa3-ta3-med. See ISAMIDE.

ISATATE, n I2s'a2t-at. Fr., *i.* A salt of isatic acid. [B, 38 (a, 14).]

ISÄTHIONSÄURE (Ger.), n. Es-a3-te-on'zoir-e2. Isethionic acid. [B.]

ISATIC ACID, n. I-sa2t'i2k. Fr., *acide isatique.* Ger., *Isatinsäure.* A monobasic acid, $C_6H_4(NH) - CO.CO.OH$, or *trioxindol*, a substance which readily decomposes into isatine and water. [B, 4.]

ISATINE, n. I2s'a2t-en. Fr., *i.* Ger., *Isatin.* A substance, $C_8H_5NO_2$, a product of oxidation of indigo heated with nitric acid of 1·35 density till the blue color disappears. It forms yellowish-red, brilliant prisms, soluble in water and in alcohol with a reddish-brown tint, and in potassium solution with violet tint. It is fusible and sublimable with partial alteration. [B, 38, 48, 93 (a, 14).]

ISATINIC ACID, n. I2s-a2t-i2n'i2k. See ISATIC ACID.

ISATIS (Lat.). n. f. I2s'a3-ti2s. Gen., *-at'idos* (*-idis*). Gr., ἰσάτις. Fr., *pastel.* Ger., *Waid.* It., *guado.* Sp., *pastel, glasto.* A genus of the *Isatideæ* (Fr., *isatidées*; Ger., *Isatideen*), which are a tribe of cruciferous plants. [B, 1, 34, 42, 64, 78, 115, 170, 173 (a, 35).]—**I. campestris.** A variety of *I. tinctoria.* [B, 64 (a, 35).]—**I. hirsuta.** Fr., *pastel bâtard* (ou *velu*). A variety of *I. tinctoria.*—**I. indigotica.** Ger., *chinesischer Indig.* The *teinching* of the Chinese, who employ a dark-blue coloring matter obtained from it for drying cotton cloth. [B, 19, 48 (a, 35).]—**I. præcox.** A variety of *I. tinctoria.* [B, 64 (a, 35).]—**I. sativa.** Fr., *pastel cultivé.* A cultivated variety of *I. tinctoria.* [B, 173 (a, 35).]—**I. silvestris.** Fr., *pastel des bois.* The wild variety of *I. tinctoria.* [B, 173 (a, 35).]—**I. tinctoria.** Fr., *pastel* (*des teinturiers*), *guède, guesde, herbe de Saint-Philippe, vouerde.* Ger., (*Färber-*) *Waid, deutscher Indigo.* Ash-of-Jerusalem, dyer's woad; once famous in Europe for the blue dye obtained from the leaves. The herb. *herba* (seu *folia*) *glasti* (seu *isatidis*, seu *i.*), was formerly employed in diseases of the spleen and as an external application to tumors, etc.; also in scurvy and in intermittent fevers. The seeds yield an oil similar to linseed-oil. [B, 19, 173, 180 (a, 35); B, 88 (a, 39).]—**I. vulgaris.** A variety of *I. tinctoria.* [B, 64 (a, 35).]

ISATODES (Lat.), adj. I2s-a2t(a3t)-od'ez(as). Gr., ἰσατώδης (from ἰσάτις, woad, and εἶδος, resemblance). Bluish. [A, 311 (a, 21).]

ISATOSULPHURIC ACID, n. I2s-a2t-o-su3l-fu2'ri2k. Fr., *acide isatosulfurique.* Ger., *Isatinschwefelsäure.* An acid containing the elements of isatine and sulphuric anhydride, occurring in two varieties, monobasic and dibasic, of which the latter has not yet been isolated; the monobasic acid, $C_8H_4(SO_2.OH)NO_2 + H_2O$, forms yellow, silky crystals, not variable when exposed to the air of ordinary temperature, but losing their crystallization water at 100° C. They are soluble in water, less soluble in alcohol, insoluble in ether and in benzene. [B, 38, 48 (a, 14).]

ISATROPIC ACID, n. I2s-a2t-ro2p'i2k. Fr., *acide iso-atropique.* Ger., *Isatropasäure.* See ATROPIC ACID.

ISATROPYLCOCAINE, n. I2s-a2t"ro2p-i2l-ko'ka3-en. Of Liebermann, an alkaloid associated with cocaine; so called because it has the structure of cocaine in which benzoyl acid is replaced by the radicle of isatropic acid. ["Proc. of the Am. Pharm. Assoc.," xxxviii (a, 39).]

ISCA (Lat.), n. f. I2s'ka3. Gr., ἴσκα. Of the ancients, the *Polyporus igniarius.* [B, 88 (a, 39).]

ISCHÆMIA (Lat.), n. f. I2s-ke'(ch2a3'e2)-mi2-a3. From ἴσχειν, to check, and αἷμα, blood. Fr., *ischémie.* Ger., *Ischämie.* See HÆMOSTASIS and *Local* ANÆMIA.—**Artificial i.** The condition produced by the application of Esmarch's bandage. [E.]—**Arterial i.** Ger., *arterielle Ischämie.* I. arising from contraction or occlusion of arteries. [D, 3.]—**Circumscribed i.** I. limited to a small area, like i. in the spinal cord caused by thrombosis or embolism of one or more of the spinal arteries. [D, 35.]—**Hysterical i.** I. occurring in hysteria. [D, 35.]—**Retinal i.** Fr., *ischémie de la rétine.* Ger., *Netzhautischämie.* A condition of stasis of the arteries of the retina, usually accompanied by hyperæmia of the veins, which may be caused by pressure on the vessels in the trunk of the optic nerve or in the orbit, or by embolism or thrombosis. [F.]—**Vaso-motor i.** I. caused by reflex irritation. [D.]

ISCHÆMIC, adj. I2s-ke2m'i2k. From ἴσχειν, to check, and αἷμα, blood. Fr., *ischémie.* Ger., *ischämisch.* Pertaining to or affected with ischæmia.

ISCHÆMON (Lat.), **ISCHÆMUM** (Lat.), n's n. I2s-ke'(ch2a3'e2)-mo2n, -mu3m(mu4m). Gr., ἴσχαιμον (from ἴσχειν, to

check, and αἷμα, blood). Fr., *ischème, ischémon.* 1. Of the ancients, a hæmostatic, especially the *Panicum sanguinole.* 2. A genus of grasses of the *Andropogoneæ.* [B, 19, 42 (*a*, 35).]

ISCHAR, n. In the East, the tuberous root of the *Leontice leontopetalum.* [B, 121 (*a*, 38).]

ISCHAS (Lat.), n. f. I2s'ka2s(ch2a3s). Gen., *isch'ados (-adis).* Gr., ἰσχάς. A fig, especially when dried. [B, 78 (*a*, 14).]

ISCHEL (Ger.), n. I2s'ch2e2l. See ISCHL.

ISCHEOCELE (Lat.), n. f. I2s-ke2(ch2e2)-o(o3)-se(ka)'le(la); in Eng., i2s'ke2-o-sel. Gen., *-ce'les.* See ISCHIOCELE.

ISCHESIS (Lat.), n. f. I2s'ke2s-i2s. Gen., *-ches'eos (-is'chesis).* A checking of a flow. [A, 322.]

ISCHIA (It.), n. I2s'ke-a3. An island near Naples, where there are several hot, gaseous, saline, alkaline springs. [L, 30, 49 (*a*, 14).]

ISCHIAC, adj. I2s'ki2-a2k. Gr., ἰσχιακός. Lat., *ischiacus.* See SCIATIC.

ISCHIADELPHIA (Lat.), n. f. I2s-ki2(ch2i2)-a2d(a3d)-e2lf'i2-a3. The state of being ischiadelphous.

ISCHIADELPHOUS, adj. I2s-ki2-a2d-e2l'fu3s. Lat., *ischiadelphus* (from ἰσχίον, the hip joint, and ἀδελφός, a brother). Fr., *ischiadelphe.* Of a double monster, having the bodies united by the pelvis. [L, 41, 44, 49 (*a*, 14).]

ISCHIADIC, adj. I2s-ki2-a2d'i2k. Gr., ἰσχιαδικός. Lat., *ischiadicus.* See SCIATIC.

ISCHIADOCELE (Lat.), n. f. I2s-ki2(ch2i2)-a2d(a3d)-o(o3)-se(ka)'le(la); in Eng., i2s-ki2-a2d'o-sel. Gen., *-cel'es.* See ISCHIOCELE.

ISCHIAGRA (Lat.), n. f. I2sk(i2sch2)-i(i2)'a2g(a3g)-ra3. From ἰσχίον, the hip joint, and ἄγρα, a seizure. Fr., *ischiagre.* Ger., *Hüftgicht.* Gout in the hip. [A, 322; D, 72.]

ISCHIAL, adj. I2s'ki2-a2l. Lat., *ischialis* (from ἰσχίον, the hip-joint). Pertaining to the ischium. [L, 41.]

ISCHIALGIA (Lat.), n. f. I2s-ki2(ch2i2)-a2l(a3l)'ji2(gi2)-a3. From ἰσχίον, the hip joint, and ἄλγος, pain. See SCIATICA.

ISCHIALGIC, adj. I2s-ki2-a2l'ji2k. Lat., *ischialgicus.* Pertaining to, affected with, or of the nature of, sciatica. [D.]

ISCHIAS (Lat.), n. f. I2s'ki2(ch2i2)-a2s(a3s). Gen., *-i'ados (-adis).* Gr., ἰσχιάς. 1. Sciatica. 2. Gout of the hip. [A, 322.]—**I. antica.** Anterior crural neuralgia. [A, 326 (*a*, 21).]—**I. a sparganosi.** Phlegmatia dolens. [*a*, 40.]—**I. infebricosum.** See COXALGIA.—**I. intermittens.** See FEBRIS *quotidiana ischiadica.*—**I. nervosa antica.** See *I. antica.*—**I. (nervosa) postica.** See SCIATICA.—**I. scoliotica.** See *Scoliotic* SCIATICA.—**I. nervosa Cotunnii.** Sciatica. [*a*, 40.]—**I. nervosa digitalis.** Neuralgia cubito-digitalis. [*a*, 40.]—**I. rheumatica.** Sciatica. [*a*, 40.]

ISCHIASIS (Lat.), n. f. I2s-ki2(ch2i2)-a(a3)'si2s. Gen., *-as'eos (-ias'is).* See SCIATICA.

ISCHIATIC, adj. I2s-ki2-a2t'i2k. Gr., ἰσχιαδικός (from ἰσχίον, the hip-joint). Lat., *ischiaticus.* See SCIATIC.

ISCHIATITIS (Lat.), n. f. I2s-ki2(ch2i2)-a2t(a3t)-i(e)'ti2s. Gen., *-it'idos (-idis).* From ἰσχίον, the hip joint (see also *-itis**). Ger., *Lendennerventzündung.* Inflammation of the sciatic nerve. [L, 50 (*a*, 14).]

ISCHIATOCELE (Lat.), n. f. I2s-ki2(ch2i2)-a2t(a2t)-o(o3)-se(ka)'le(la); in Eng., i2s-ki2-a2t'o-sel. Gen., *-cel'es.* See ISCHIOCELE.

ISCHIDROSIS (Lat.), n. f. I2s-ki2(ch2e)-dro'si2s. Gen., *-os'eos (-o'sis).* From ἰσχειν, to check, and ἱδρώς, perspiration. Fr., *ischidrose.* Ger., *Schweissunterdrückung.* Suppression of perspiration. [L, 41, 50, 107 (*a*, 14).]

ISCHIDROTICUS (Lat.), adj. I2s-ki2(ch2e)-dro2t(drot)'i2k-u3s(u4s). Pertaining to or causing ischidrosis. [L, 50, 107 (*a*, 14).]

ISCHIEN, adj. I2s'ki2-e2n. See ISCHIAL.

ISCHIGALACTIC, adj. I2s-ki2-ga2l-a2k'ti2k. From ἴσχειν, to check, and γάλα, milk. See ANTIGALACTIC.

ISCHIO-ANAL, adj. I2s-ki2-o-a'n'l. Lat., *ischio-analis* (from ἰσχίον, the hip joint, and *anus,* the fundament). Fr., *i.-a.* Pertaining to the ischium and to the anus.

ISCHIO-APONEUROTIC, adj. I2s-ki2-o-a2p-o-nu2-ro2t'i2k. From ἰσχίον, the hip joint, ἀπό, from, and νεῦρον, a nerve (see APONEUROSIS). Pertaining to the ischium and to the fascia lata of the thigh.

ISCHIOBLENNIA (Lat.), n. f. I2s-ki2(ch2i2)-o(o3)-ble2n'ni2-a3. See ISCHOBLENNIA.

ISCHIO-BULBOSUS (Lat.), adj. I2s-ki2(chi2)-o(o3)-bu3l(bu4l)-bos'u3s(u4s). From ἰσχίον, the hip joint, and *bulbus,* a bulb. Fr., *ischio-bulbaire.* Pertaining to the ischium and to the bulb of the urethra; as a n., a small muscular bundle, forming part of the superficial transverse muscle of the perinæum. [L, 55 (*a*, 29); L, 49 (*a*, 14).]

ISCHIO-CALCANEUS (Lat.), adj. I2s-ki2(ch2i2)-o(o3)-ka2l-(ka3l)-kan(ka3n)'e2-u3s(u4s). From ἰσχίον, the hip joint, and *calcaneum* (*q. v.*). Pertaining to the ischium and to the calcaneum. [*a*, 29.]

ISCHIO-CAPSULAR, adj. I2s-ki2-o-ka2p'su2l-a3r. From ἰσχίον, the hip joint, and *capsula,* a capsule. Pertaining to the ischium and to the capsule of the hip-joint. [*a*, 29.]

ISCHIO-CAUDALIS (Lat.), adj. I2s-ki2(ch2i2)-o(o3)-ka4(ka3-u4)-da(da3)'li2s. From ἰσχίον, the hip joint, and *cauda,* the tail. Pertaining to the ischium and to the tail. [*a*, 29.]

ISCHIO-CAVERNOSUS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-ka2-(ka3)-vu5rn(we2rn)-os'u3s(u4s). From ἰσχίον, the hip joint, and *caverna,* a cavity. Fr., *ischio-caverneux.* Ger., *Sitzbeinschwellkörpermuskel, Ruthensteifer.* A muscle arising from the inner portion of the tuber ischii and the adjacent parts of the crus penis, passing forward and inserted into the outer and lower surface of the crus. It compresses the crus and assists in the erection of the penis. [L.]—**I. clitoridis.** See ISCHIO-CLITORIANUS.—**I.-c. urethræ.** See BULBO-CAVERNOSUS.

ISCHIOCELE (Lat.), n. f. I2s-ki2(ch2i2)-o(o3)-se(ka)'le(la); in Eng., i2s'ki2-o-sel. Gen., *-cel'es.* From ἰσχίον, the hip joint, and κήλη, a tumor. Fr., *ischiocèle.* Ger., *Gesässbruch.* Hernia through the great sciatic notch. [E.]

ISCHIO-CLITORIANUS (Lat.), adj. I2s-ki2(ch2i2)-o(o3)-kli2t-(klet)-o2r-i2-an(a3n)'u3s(u4s). From ἰσχίον, the hip joint, and κλειτορίς, the clitoris. Pertaining to the ischium and to the clitoris; as a n., the analogue in the female of the ischio-cavernosus muscle of the male, assisting in the erection of the clitoris. [A, 528.]

ISCHIOCLITORIDIAN, adj. I2s-ki2-o-kli2t-o2r-i2d'i2-a2n. From ἰσχίον, the hip joint, and κλειτορίς, the clitoris. Fr., *ischio-clitoridien.* Pertaining to the ischium and to the clitoris.

ISCHIO-COCCYGEUS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-ko2k-si2j(ku6g)'e2-u3s(u4s). From ἰσχίον, the hip joint, and κόκκυξ, the coccyx. Fr., *ischio-coccygien.* Ger., *Gesässbeinmuskel.* 1. A muscle arising from the sacro-ischiadic ligament and the ischiadic crest and inserted into the side of the last sacral vertebra and the first two coccygeal vertebræ. 2. Of Henle, that portion of the levator ani which arises from the obturator fascia. [L, 13.]

ISCHIO-CRÉTI-TIBIAL (Fr.), n. Es-ke-o-kra-te-te-be-al. From ἰσχίον, the hip joint, *crista,* a crest, and *tibia* (*q. v.*). See SEMITENDINOSUS.

ISCHIODIDYMUS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-di2d'i2m-(u6m)-u3s(u4s). From ἰσχίον, the hip joint, and δίδυμος, double. Fr., *ischio-didyme.* A double monster with the individuals joined at the hips. [L, 41, 50 (*a*, 14).]

ISCHIO-FEMORAL, adj. I2s-ki2-o-fe2m'o-r'l. Lat., *ischio-femoralis* (from ἰσχίον, the hip joint, and *femur* [*q. v.*]). Fr., *ischio-fémoral.* Pertaining to the ischium and to the femur; as a n., of Chaussier, the adductor magnus of the thigh. [A, 385.]

ISCHIO-FEMORALIS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-fe2m-o2r-a(a3)'li2s. Fr., *ischio-fémoral.* See ADDUCTOR *femoris magnus.*—**I.-f. magnus** [Leyh]. See ISCHIO-TIBIALIS *internus.*—**I.-f. parvus** [Leyh]. See GRACILIS *internus.*

ISCHIOFEMOROPERONEUS (Lat.), n. m. I2s-ki2(ch2i2)-o-(o3)-fe2m-o2r-o(o3)-pe2r-o(o2)-ne(na)'u2s(u4s). From ἰσχίον, the hip joint, *femur* (*q. v.*), and περόνη, the fibula. Fr., *ischio-fémoro-péronien.* See *Biceps* FLEXOR *cruris.*

ISCHION (Lat.), n. n. I2sk(i2sch2)'i2-o2n. See ISCHIUM.

ISCHIONEURALGIA (Lat.), n. f. I2s-ki2(ch2i2)-o(o3)-nu2-ra2l-(ra3l)'ji2(gi2)-a3. From ἰσχίον, the hip joint, νεῦρον, a nerve, and ἄλγος, pain. See SCIATICA.

ISCHIOPAGUS (Lat.), n. m. I2s-ki2(ch2i2)-o2p'a2g(a3g)-u3s(u4s). From ἰσχίον, the hip joint, and πάγος, that which has become solid. Fr., *ischiopage.* A double monster in which the bodies are almost completely developed, the pelves merge together in front, and there is but one navel. [A, 326 (*a*, 21); A, 385.]—**I. parasiticus.** A double monster having two heads, a common trunk, and two, three, or four legs. [L, 57 (*a*, 40).]—**I. tetrapus.** An i. with four lower extremities. [*a*, 14.]—**I. tripus.** An i. with three lower extremities. [*a*, 40.]

ISCHIOPAGY, n. I2sk-i2-o2p'a2j-i2. Fr., *ischiopagie.* The monstrosity defined under ISCHIOPAGUS. [A, 385.]

ISCHIO-PARASITICUS (Lat.), adj. I2s-ki2(ch2i2)-o(o3)-pa2r-(pa3r)-a2s(a3s)-i2t(et)'i2k-u3s(u4s). From ἰσχίον, the hip joint, and παράσιτος, a parasite. Pertaining to a parasitic tumor of the ischial region. [*a*, 40.]

ISCHIO-PÉNIEN (Fr.), n. Es-ke-o-pa-ne-a3n2. From ἰσχίον, the hip joint, and *penis* (*q. v.*). Pertaining to the ischium and to the penis; as a n., see ISCHIO-CAVERNOSUS.

ISCHIOPENILE, adj. I2s-ki2-o-pe2n'i2l. See ISCHIO-PÉNIEN.

ISCHIO-PERINEAL, adj. I2s-ki2-o-pe2r-i2n-e'a2l. From ἰσχίον, the hip joint, and περίναιον, the perinæum. Fr., *ischio-périnéal.* Pertaining to the ischium and to the perinæum; as a n., see TRANSVERSUS *perinæi.* [L, 41 (*a*, 14).]

ISCHIOPHTHISIS (Lat.), n. f. I2s-ki2(ch2i2)-o2t(o2f)'i2s(thi2s)-i2s. Gen., *-ophthis'eos (-oph'thisis).* From ἰσχίον, the hip joint, and φθίσις, consumption. Ger., *Hüftschwindsucht.* Emaciation due to hip disease. [L, 50, 107 (*a*, 14).]

ISCHIOPODITE (Fr.), n. Es-ke-o-po-det. From ἰσχίον, the hip joint, and πούς, the foot. The third joint or second trochanter of the appendages of crustaceans. [L, 158 (*a*, 39).]

ISCHIOPOPLITITIBIALIS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-pop(po2p)-lit(li2t)-i(i2)-ti2b(teb)-i2-a(a3)'li2s. From ἰσχίον, the hip joint, *poples,* the ham, and *tibia* (*q. v.*). Fr., *ischio-popliti-tibial.* See SEMIMEMBRANOSUS.

ISCHIOPRÆTIBIALIS (Lat.), n. m. I2s-ki2(ch2i2)-o(o3)-pre-(pra3-e2)-ti2b(teb)-i2-a(a3)'li2s. From ἰσχίον, the hip joint, *præ,* before, and *tibia* (*q. v.*). Fr., *ischio-prétibial.* See SEMITENDINOSUS.

ISCHIO-PROSTATIC, adj. I2s-ki2-o-pro2s-ta2t'i2k. Lat., *ischioprostaticus* (from ἰσχίον, the hip joint, and *prostata,* the prostate. Fr., *ischio-prostatique.* Pertaining to the ischium and to the prostate; as a n., see TRANSVERSUS *perinæi.* [A, 385.]

ISCHIO-PUBIC, adj. I2s-ki2-o-pu2'bi2k. Lat., *ischiopubicus* (from ἰσχίον, the hip joint, and *pubes* [*q. v.*]). Fr., *ischio-pubien.* Pertaining to the ischium and to the pubic bone.

ISCHIOPUBICUS (Lat.), adj. I2s''ki2(ch2i2)-o(o3)-pu2(pu)'bi2k-u3s(u4s). See ISCHIOPUBIC; as a n., see *I. inferior.*—**I. inferior.** A muscle, not infrequently found, which arises from that portion of the great sacrosciatic ligament sometimes known as the falci-

form ligament and is inserted into the lower margin of the symphysis pubis. It is tendinous at each extremity and bridges over a vein connecting the pudendal plexus and the obturator veins. [L, 332 (*a*, 29).]—**I. superior.** A bundle of muscular fibres, about 1 mm. broad, sometimes found in the arcus tendineus of the pelvic fascia. [L, 332 (*a*, 29).]

ISCHIO-PUBI-FÉMORAL (Fr.), n. Es-ke-o-pu^6-be-fa-mo-ra^{3}l. From ἰσχίον, the hip joint, *pubes* (*q. v.*), and *femur* (*q. v.*). See ADDUCTOR *femoris magnus*.

ISCHIO-PUBIPROSTATICUS (Lat.), n. m. I^{2}s-ki^2(ch^{2}i^2)-o-(o^3)-pu^2(pu)-bi^2-pro^{2}s-ta^{2}t(ta^{3}t)'i^{2}k-u^{3}s(u^{4}s). From ἰσχίον, the hip joint, *pubes*, the genitals, and *prostare*, to stand out. Fr., *ischio-pubi-prostatique*. See TRANSVERSUS *perinæi*.

ISCHIO-RECTAL, adj. I^{2}s-ki^2-o-re^{2}k't'l. Fr., *i.-r.* Pertaining to the ischium and to the rectum. [L, 49 (*a*, 14).]

ISCHIO-ROTULEUS (Lat.), n. m. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-rot(ro^{2}t)-u^{2}l(u^{4}l)'e^2-u^{3}s(u^{4}s). From ἰσχίον, the hip joint, and *rotula*, the patella.—**I.-r. externus.** See ILIO-APONEUROTICUS.

ISCHIO-SACRAL, adj. I^{2}s-ki^2-o-sak'r'l. Pertaining to or constituted by the ischium or ischia and the sacrum (see *I.-s.* ARCH).

ISCHIOSCAMBOSIS (Lat.), n. f. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-ska^{2}m-(ska^{3}m)-bo'si^{2}s. Gen., *-os'eos* (*-is*). From ἰσχίον, the hip joint, and σκάμβωσις, a bending. Ger., *Hüftkrümmung*. Distortion of the hip. [L, 50 (*a*, 14).]

ISCHIO-SOUS-CLITORIDIEN (Fr.), **ISCHIO-SOUS-CLITORIEN** (Fr.), n's. Es-ke-o-su-kle-to-re-de-a^{3}n^2, -kle-to-re-a^{3}n^2. See ISCHIOCLITORIANUS.

ISCHIO-SOUS-PÉNIEN (Fr.), n. I^{2}s-ke-o-su-pa-ne-a^{3}n^2. See ISCHIOCAVERNOSUS.

ISCHIO-SOUS-TROCHANTÉRIEN (Fr.), n. Es-ke-o-su-tro-ka^{3}n^2-ta-re-a^{3}n^2. See QUADRATUS *femoris*.

ISCHIOSPINITROCHANTERICUS (Lat.), n. m. I^{2}s-ki^2-(ch^{2}i^2)-o(o^3)-spi(spe)-ni^2-tro(tro^2)-ka^{2}n(ch^{2}a^{3}n)-te^{2}r(tar)'i^{2}k-u^{3}s(u^{4}s). From ἰσχίον, the hip joint, *spina*, a thorn, and τροχαντήρ, a trochanter. Fr., *ischio-spini-trochantérien*. See GEMELLUS (2d def.).

ISCHIOSUBCLITORIDIAN, n. I^{2}s-ki^2-o-su^{3}b-kli^{2}t-o^{2}r-i^{2}d'i^2-a^{2}n. See ISCHIOCLITORIANUS.

ISCHIOSUBTROCHANTERICUS (Lat.). adj. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-su^{3}b(su^{4}b)-tro(tro^2)-ka^{2}n(ch^{2}a^{3}n)-te^{2}r(tar)'i^{2}k-u^{3}s(u^{4}s). From ἰσχίον, the hip joint, *sub*, under, and τροχαντήρ, a trochanter. See QUADRATUS *femoris*.

ISCHIOTHLASTES (Lat.), n. m. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-thla^{2}s-(thla^{3}s)'tez(tas). Gen., *-thlast'u* (*-æ*). From ἰσχίον, the hip joint, and θλάστης, a crusher. Ger., *Hüftpresser*. An old term for an embryothlastes intended for crushing the hips. [A, 88.]

ISCHIO-TIBIAL, adj. I^{2}s-ki^2-o-ti^{2}b'i^2-a^{2}l. Lat., *ischio-tibialis*. Pertaining to the ischium and to the tibia.

ISCHIOTIBIALIS (Lat.), adj. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-ti^{2}b(teb)-i^2-a(a^3)'li^{2}s. See ISCHIO-TIBIAL; as a n., a muscle connected with the ischium and the tibia.—**I. externus.** In the lower animals, the analogue of the biceps flexor cruris and of a portion of the glutæus maximus in man. [L.]—**I. internus.** In the lower animals, the analogue of the semimembranosus muscle in man. [L.]—**I. medius, I. posticus.** In the lower animals, the analogue of the semitendinosus muscle in man. [L.]

ISCHIOTROCHANTERIANUS (Lat.), **ISCHIOTROCHANTERIUS** (Lat.), n's m. I^{2}sk(i^{2}sch)-i^2-o(o^3)-tro(tro^2)-ka^{2}n-(ch^2-a^{3}n)-te^{2}r(tar)-i^2-an(a^{3}n)'u^{3}s(u^{4}s), -te(ta)'ri^2-u^{3}s(u^{4}s). From ἰσχίον, the hip, and τροχαντήρ, a trochanter. Fr., *ischio-trochantérien*. In the lower animals, the analogue of the gemelli muscles of man. [L, 13.]

ISCHIO-URETHRALIS (Lat.), n. m. I^{2}s-ki^2(ch^{2}i^2)-o(o^3)-u^2-(u)-reth(rath)-ra(ra^3)'li^{2}s. From ἰσχίον, the hip, and οὐρήθρα, the urethra. Fr., *ischio-uréthral*. See TRANSVERSUS *perinæi*.

ISCHIUM (Lat.), n. n. I^{2}s'ki^2(ch^{2}i^2)-u^{3}m(u^{4}m). Gr., ἰσχίον. Fr., *ischion*. Ger., *Sitzbein*. It., *ischio*. Sp., *isquion*. The posterior and inferior part of the os innominatum. Superiorly it forms about two fifths of the acetabulum; inferiorly it presents a large, rough eminence, the tuberosity, upon which the body rests in sitting; and extending forward from the tuberosity is the ramus. It bounds the outer portion of the obturator foramen. Between the acetabulum and the tuberosity the external surface presents a groove for the tendon of the obturator externus. The internal surface is smooth and concave, and forms the lateral boundary of the true pelvic cavity. The posterior surface is quadrilateral and rough for the attachment of muscles. On the posterior border, behind the acetabulum, is a sharp process, the spine of the i., which forms the lower limit of the great sacro-sciatic notch, and is separated from the tuberosity by the lesser sacro-sciatic notch. [L, 132, 142 (*a*, 29).]

ISCHL (Ger.), n. I^{2}shl. A town in Upper Austria, where there are alkaline and saline springs, a whey-cure establishment, and iron, sulphur, mud, and pine-needle baths. [L, 30, 37, 41, 49, 57 (*a*, 14).]

ISCHNOCHELOUS, adj. I^{2}sk-no-kel'u^{3}s. From ἰσχνός, thin, and χηλή, a claw. Fr., *ischnochèle*. Having long, thin chelæ. [L, 41 (*a*, 14).]

ISCHNOGYRIA (Lat.), n. f. I^{2}sk(i^{2}sch^2)-no(no^3)-ji^{2}r(gu^{6}r)'i^2-a^3. From ἰσχνός, feeble, and γῦρος, a circle. Ger., *Ischnogyrie*. A feeble development of the cerebral convolutions. [A, 319 (*a*, 21).]

ISCHNOPHONIA (Lat.), n. f. I^{2}sk(i^{2}sch^2)-no(no^3)-fo'ni^2-a^3. From ἰσχνός, feeble, and φωνή, the voice. Fr., *ischnophonie*. Ger., *Ischnophonie*. 1. Weakness or shrillness of the voice. 2. Stammering. [L, 41, 50, 85 (*a*, 14).]

ISCHNOTES (Lat.), **ISCHNOTIA** (Lat.), **ISCHNOTIS** (Lat.), n's m., f., and f. I^{2}sk(i^{2}sch^2)'no(no^2)-tez(tas), i^{2}sk(i^{2}sch^2)-no(no^2)'-shi^2(ti^2)-a^3, i^{2}sk(i^{2}sch^2)'no(no^2)-ti^{2}s. Gen., *-net'os* (*-is*), *-not'iæ*, *isch'notis*. Gr., ἰσχνότης (from ἰσχνός, lean). Ger., *Hagerkeit* (1st def.), *Schwindsucht* (2d def.). 1. Extreme thinness. 2. Consumption. [L, 44, 50 (*a*, 14).]

ISCHNOUS, adj. I^{2}sk'nu^{3}s. Gr., ἰσχνός. Lat., *ischnos*, *ischnus*. Very thin (said especially of hectic persons). [L, 50 (*a*, 14).]

ISCHOBLENNIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-ble^{2}n'ni^2-a^3. From ἴσχειν, to check, and βλέννος, mucus. Fr., *ischoblennie*. Ger., *Schleimverhaltung*, *Ischoblennie*. A suppression of a mucous discharge. [L, 30, 41, 50 (*a*, 14).]

ISCHOCENOSIS (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-se^{2}n(ke^{2}n)-o'si^{2}s. Gen., *-os'eos* (*-is*). From ἴσχειν, to check, and κένωσις, an emptying. A suppression of any normal evacuation. [L, 50 (*a*, 14).]

ISCHOCHOLIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-kol(ch^{2}o^{2}l)'i^2-a^3. From ἴσχειν, to check, and χολή, bile. A checking of the flow of bile.

ISCHOCŒLIA (Lat.), **ISCHOCOILIA** (Lat.), **ISCHOCOPRIA** (Lat.), n's f. I^{2}s-ko(ch^{2}o^3)-sel'(ko^2'e^{2}l)-i^2 a^3, -koil'i^2-a^3, -ko^{2}p'ri^2-a^3. From ἴσχειν, to check, and κοιλία, the hollow of the belly, or κόπρος, excrement. Fr., *ischocoilie*. Ger., *Unterleibsverstopfung*. Constipation. [L, 30, 50, 135 (*a*, 14, 39).]

ISCHOGALACTIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-ga^{2}l(ga^{3}l)-a^{2}kt-(a^{3}kt)'i^2-a^3. From ἴσχειν, to check, and γάλα, milk. Fr., *ischogalactie*. Ger., *Milchverhaltung*. Suppression of the milk. [L, 30, 41, 50 (*a*, 14).]

ISCHOLOCHIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-lok(lo^{2}ch^2)-i^2-a^3. From ἴσχειν, to check, and λόχιος, pertaining to childbirth. Fr., *i.* Ger., *Kindbettreinigungsverhaltung*. Suppression of the lochia. [L, 41, 50 (*a*, 14).]

ISCHOMENIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-men(man)'i^2-a^3. From ἴσχειν, to check, and μήν, a month. Fr., *ischoménie*. Ger., *Menstruationsverhaltung*. Suppression of the menses. [L, 30, 41, 44, 50 (*a*, 14).]

ISCHOPHONIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-fon'i^2-a^3. From ἴσχειν, to check, and φωνή, the voice. Fr., *ischophonie*. Ger., *Stottern*. An impediment in the voice, stammering. [L, 50 (*a*, 14).]

ISCHOPYOSIS (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-pi(pu^6)-o'si^{2}s. Gen., *-os'eos* (*-os'is*). From ἴσχειν, to check, and πύον, pus. Fr., *ischopyosie*. Ger., *Eiterverhaltung*. A suppression of a purulent flow. [L, 41, 50 (*a*, 14).]

ISCHOSPERMIA (Lat.), n. f. I^{2}s-ko(ch^{2}o^3)-spu^{6}rm(spe^{2}rm)'-i^2-a^3. From ἴσχειν, to check, and σπέρμα, seed. Suppression or retention of the seminal fluid. [*a*, 40.]

ISCHURETIC, adj. I^{2}sk-u^2-re^{2}t'i^{2}k. Lat., *ischureticus* (from ἴσχειν, to check, and οὖρον, urine). Fr., *ischurétique*. Ger., *ischuretisch*. Pertaining to ischuria; as a n., an agent that causes ischuria, also one that relieves it. [A, 301, 322, 385.]

ISCHURIA (Lat.), n. f. I^{2}s-ku^2(ch^{2}u)'ri^2-a^3. Gr., ἰσχουρία (from ἴσχειν, to check, and οὖρον, urine). Fr., *ischurie*. Ger., *Ischurie*, *Harnverhaltung*. Retention of urine.—**False i.** I. due to disease or obstruction in the kidneys or ureters, so that the secretion does not reach the bladder. [L, 290 (*a*, 40).]—**Hysterical i.** I. due to hysteria. [*a*, 40.]—**I. acuta.** Retention of urine due to a spasmodic stricture being affected by cold. [*a*, 40.]—**I. aspadialis.** I. due to atresia of the meatus urinarius. [L, 290 (*a*, 40).]—**I. atonica.** See *I. paralytica*.—**I. atretarum.** I. due to atresia of the vulva. [L, 290 (*a*, 40).]—**I. caruncuIosa.** I. due to the presence of a urethral caruncle. [L, 290 (*a*, 40).]—**I. cryptopeica.** I. due to a distended follicle pressing upon the urethra. [L, 290 (*a*, 40).]—**I. cystolithica.** I. due to stone in the bladder. [L, 290 (*a*, 40).]—**I. cystitica.** I. due to inflammation of the bladder. [L, 290 (*a*, 40).]—**I. cystoplegica.** I. due to paralysis of the bladder. [*a*, 40.]—**I. cystophlegmatica.** I. due to catarrh and consequent accumulation of mucus in the bladder. [L, 290 (*a*, 40).]—**I. cystoproctica.** I. due to inflammation and consequent swelling between the bladder and rectum. [*a*, 40.]—**I. cystopyrica.** I. due to accumulation of pus in the bladder. [L, 290 (*a*, 40).]—**I. cystospastica.** I. due to spasm of the bladder. [L, 290 (*a*, 40).]—**I. cystothromboides.** I. due to clots in the bladder. [L, 290 (*a*, 40).]—**I. dysuria.** See DYSURIA.—**I. ectopocystica.** I. due to displacement, hernia, or prolapsus of the bladder. [L, 290 (*a*, 40).]—**I. gravidarum, I. hysterocystica.** I. of the state of pregnancy. There are several forms (*e. g.*, *i. gravidarum* [Nordman], *i. of labor* [Boneti], and *i. of retroversion* [Hippocrates]). [L, 290 (*a*, 40).]—**I. incompleta.** I. due to a partial obstruction of the urethral canal by stricture. [A, 319 (*a*, 40).]—**I. inflammatoria.** Fr., *ischurie inflammatoire*. Ger., *entzündliche Harnverhaltung*. I. due to inflammation. [D.]—**I. lunatica.** I. sometimes observed in the insane wherein they may go several days without urinating. [L, 290 (*a*, 40).]—**I. nephrelminthica, I. nephritica, I. nephrolithica, I. nephrophlegmatica, I. nephroplegica, I. nephroplethorica, I. nephropyica, I. nephrospastica, I. nephrothromboides.** See *I. renalis*.—**I. notha.** See *False i.*—**I. organica.** I. caused by some organic trouble, such as stricture of the urethra. [D.]—**I. paradoxa, I. paradoxica.** Dribbling of urine from overdistention of the bladder.—**I. paralytica.** Ger., *Lähmung des Detrusor urinæ*, *paralytische Ischurie*. I. from paralysis of the bladder. [D.]—**I. peridesmica.** I. due to compression or stricture of the urethra. [L, 290 (*a*, 40).]—**I. perinealis.** I. due to obstruction of the urethra in the perineal region. [*a*, 40.]—**I. phimosica, I. phimotica.** I. due to phimosis.—**I. polyurica.** I. due to excessive accumulation of urine in the bladder. [Sauvages (*a*, 40).]—**I. renalis.** Suppression of urine. [D.]—**I. spasmodica.** See CYSTOSPASMUS.—**I. spastica.** I. which is a symptom or result of spastic dysuria. [A, 326 (*a*, 40).]—**I. spuria.** See *False i.*—**I. suppleta.** See *I.*

renalis.—**I. ureterica, I. ureteritica, I. ureterolithica, I. ureterophlegmatica, I. ureteropyica, I. ureterostomatica, I. ureterothromboides.** I. due to obstruction in the ureters. [L, 290.]—**I. urethralis a phimosi.** I. due to phimosis.—**I. urethrelminthica.** I. due to obstruction of the urethra by a worm or worms. [L, 290 (*a*, 40).]—**I. urethritica.** I. due to inflammation of the urethra. [L, 290 (*a*, 40).]—**I. urethrohymenodes.** I. due to obstruction of the urethra by a membrane resembling or continuous with the hymen or by coagulable lymph. [*a*, 40.]—**I. urethrolithica.** I. due to urethral calculus. [*a*, 40.]—**I. urethrophlegmatica.** I. due to accumulation of mucus in the urethra. [L, 290 (*a*, 40).]—**I. urethrothromboides.** I. due to blood-clot in the urethra. [L, 290 (*a*, 40).]—**I. vera, I. vesicalis.** Ger., *Harnsperre*, *Harnverstopfung*, *Harnblasenharnverhaltung.* Retention of urine in which the obstructing cause is to be found in the bladder. [D.]—**Mechanical i.** Lat., *i. mechanica.* Ger., *mechanische Harnverhaltung.* I. caused by mechanical obstruction, as by the presence of a stone in the bladder. [D.]—**Neurotic i.** Of Charcot, a form of i. dependent upon neurotic conditions, such as hysteria, epilepsy, and chorea, unassociated with local disease or deformity. [*a*, 40.]—**Renal i.** See *I. renalis.*—**True i.** See *I. vera.*

ISCHURIC, adj. I^{2}s-ku^2'ri^{2}k. See ISCHURETIC.

ISCHURIOPHTHALMIA (Lat.), n. f. I^{2}s-ku^2(ch^{2}u)-ri^2-o^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. From ἴσχειν, to check, οὖρον, urine, and ὀφθαλμία, ophthalmia. Ophthalmia supposed to result from renal ischuria. [L, 135 (*a*, 39).]

ISCHURY, n. I^{2}sk'u^2-ri^2. See ISCHURIA.

ISCHYOMYELITIS (Lat.), n. f. I^{2}s-ki^2(ch^{2}u^6)-o(o^3)-mi(mu^6)-e^{2}l-i(e)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἰσχύς, strength, and μυελός, marrow (see also *-itis*). Ger., *Kreuzrückenmarksentzündung.* See OSPHYOMYELITIS.

ISCHYROS (Lat.), **ISCHYRUS** (Lat.), adj's. I^{2}s-ki(ch^{2}u^6)'ro^{2}s, -ru^{3}s(ru^{4}s). Gr., ἰσχυρός. Ger., *stark*, *kräftig.* Strong, powerful. [L, 50 (*a*, 14).]

ISCHYS (Lat.), n. f. I^{2}s'ki^{2}s(ch^{2}u^{6}s). Gen., *isch'yos* (*isch'yis*). Gr., ἰσχύς. Strength. [A, 322.]

ISENKRAUT (Ger.), n. Ez'e^{2}n-kra^3-u^{4}t. The *Verbena officinalis.* [B, 180 (*a*, 24).]

ISERTIA (Lat.), n. f. E-se^{2}rt'i^2-a^3. From *Isert*, a Danish botanist. Fr., *i.*, *isertie.* A genus of South American rubiaceous shrubs or trees, by Bentham and Hooker referred to the tribe *Mussœndeæ.* The *Isertiæ* of A. Richard, or the *Isertidæ* of Lindley, or the *Isertieæ* of De Candolle, are: Of Richard and De Candolle, a tribe of the *Rubiaceæ*; of Lindley, a tribe of the *Cinchoneæ.* [B, 38, 42, 48, 170, 173 (*a*, 35).]—**I. coccinea.** Fr., *i. écarlate.* A species found in Guiana, having sweet, edible berries and a bitter wood. The leaves are used in decoction as an application to tumors; the bark is employed in the treatment of fevers and in liver affections. [B, 93, 173, 180 (*a*, 35).]

ISETHIONATE, n. I^{2}s-e^{2}th-i'o^{2}n-at. A salt of isethionic acid. [B.]

ISETHIONIC ACID, n. I^{2}s-e^{2}th-i^2-o^{2}n'i^{2}k. Fr., *acide éthylène-hydroxysulfonique.* Ger., *Isäthionsäure.* A dibasic acid, $C_2H_4.$-$SO_2.(OH)_2$, derived from ethionic acid by evaporation of the aqueous solution of the latter. It occurs under the form of deliquescent, acicular crystals. [B, 4.]

ISETHIONURIC ACID, n. I^{2}s-e^{2}th-i^2-o^{2}n-u^2'ri^{2}k. See TAUROCARBAMIC ACID.

ISETHIONYL, n. I^{2}s-e^{2}th-i'o^{2}n-i^{2}l. The bivalent radicle, $C_2H_4'.SO_2'$, of isethionic acid. [B.]

ISHARAMULA (Hind., Beng.), n. See ARISTOLOCHIA *indica.*

ISICIUM (Lat.), **ISICOS** (Lat.), **ISICUS** (Lat.), n's n., m., and m. I(i^2)-si^{2}k'i^2-u^{3}m(u^{4}m), i(i^2)'si^{2}k-o^{2}s, -u^{3}s(u^{4}s). Gr., ἰσίκιον, ἴσικος. A kind of ancient dish made of minced meat with or without spices, etc. [A, 325.]

ISIDIDÆ (Lat.), n. f. pl. I^{2}s(es)-i^{2}d'i^{2}d-e(a^3-e^2). From ἶσις, a plant, and εἶδος, resemblance. Fr., *isididés.* A family of the *Alcyonaria.* [B, 93.]

ISIDIOID, ISIDIOMORPHOUS, ISIDIOPHOROUS, adj's. I^{2}s-i^{2}d'i^2-oid, -i^{2}d-i^2-o-mo^{2}rf'u^{3}s, -i^{2}d-i^2-o^{2}f'o^{2}r-u^{3}s. Lat., *isioideus*, *isidiomorphus*, *isidiophorus* (from ἶσις, a plant, and εἶδος, resemblance, μορφή, form, or φορεῖν, to bear). Having isidia (said of the thallus of a lichen). [B, 77, 123 (*a*, 35).]

ISIDIUM (Lat.), n. n. I^{2}s(es) i^{2}d'i^2-u^{3}m(u^{4}m). From ἶσις, a plant. Fr., *isidion.* 1. An elevated, coralloid, stipitate excresence, sometimes branched, found in the thalli of some foliaceous and crustaceous lichens and serving as propagula. 2. A pseudo-genus of lichens made for some species of *Pertusaria.* The *Isidieæ* are: Of Reichenbach, a family of the *Cephalosporæ*; of Rabenhorst, a division of imperfect lichens (*Lichenes imperfecti*). [B, 19, 77, 170, 173 (*a*, 35).]

ISIKA (Lat.), n. f. I^{2}s(es)'i^{2}k-a^3. The genus *Lonicera.* [*a*, 35.]

ISINGLASS, n. I'zi^{2}n^2-gla^{3}s. Bomb., *áisinglása.* See ICHTHYOCOLLA.—**American i.** Ger., *amerikanische Hausenblase.* See *New York i.*, *New England i.*, and *Transparent i.*—**Artificial i.** Ger., *künstliche Hausenblase.* Commercial gelatin, especially the transparent preparations used as substitutes for i. in making jellies. [B, 5, 77 (*a*, 35).]—**Bengal i.** See AGAR-AGAR.—**Book i.** Ger., *Bücherhausenblase.* A commercial name for i. consisting of fishes' bladders folded and dried. [B, 5, 77 (*a*, 35).]—**Brazilian i.** Ger., *brasilianische Hausenblase.* The product of a large fish, *Silurus Parkerii*, and perhaps of other species. It is prepared by drying the air-bladders of the fish in their distended state; inferior to the Russian i. [B, 5, 77, 180 (*a*, 35).] See also *False i.*—**Cake i.** The gelatin prepared from fragments of the other forms of i. with various other parts of the fish. [B, 5 (*a*, 35).]—**China i., Chinese i., East Indian i.** India i., a variety of i. consisting of the dried bladders of two species of *Polynemus* and other fish in the Indian waters. In London it is used chiefly in clarifying beer. [B, 5 (*a*, 35).]—**False i.** Ger., *falsche Hausenblase.* A non-gelatinous article from Brazil, consisting of the dried ovary of a large fish. It is a poor substitute for i. [B, 5 (*a*, 35).]—**Indian i.** See *China i.*—**I. fish.** The *Acipenser huso* and other species. [A, 511 (*a*, 35).]—**I. jelly.** See *Gelatina* ICHTHYOCOLLÆ.—**I. plaster.** See *Emplastrum* ICHTHYOCOLLÆ.—**Japanese i.** See *Japanese* AGAR-AGAR.—**Leaf i.** Ger., *blättrige Hausenblase.* I. consisting of fishes' bladders dried in the flat state. [B, 5 (*a*, 35).]—**Long staple i.** See *Staple i.*—**Manilla i.** I. from Manilla, yielded by a species of fish not yet determined. [B, 77 (*a*, 35).]—**New England i.** Ribbon i., an inferior i., unfit for internal use, prepared from the air bladder of the common hake (*Gadus merluccius*). The bladders are macerated in water and then pressed into thin ribbons by passing them between rollers. [B, 5, 14, 77 (*a*, 35).]—**New York i.** Ger., *Neu-Yorker Hausenblase.* An i. of good quality, prepared from the sounds (dried whole or merely split open) of *Otolithus regalis.* [B, 5, 180 (*a*, 35).]—**Refined i.** Transparent i., an excellent glue occurring in commerce in thin translucent plates. It is prepared from New England i. by dissolving the latter in hot water and spreading on oiled muslin. It has a strong fishy smell. [B, 5 (*a*, 35).]—**Russian i.** The ichthyocolla of the U. S. Ph. [B, 5 (*a*, 35).]—**Samovey i.** In English commerce, an inferior i. from Russia; procured, according to Pereira, from the *Siluris glanis.* [B, 5 (*a*, 35).]—**Staple i.** Russian i. consisting of the membranes folded into compact and twisted forms, called staples, according to the size of which it is known as long or short staple. [B, 5 (*a*, 35).]—**Transparent i.** See *Refined i.*

ISIR (Lat.), n. n. Is(i^{2}s)'u^{6}r(i^{2}r). See ELIXIR.

ISIS (Lat.), n. f. I(e)'si^{2}s. Gen., *i'sidos* (*-idis*), *is'eos.* Gr., ἶσις (1st def.), Ἶσις (= Isis, the goddess of drugs [2d def.]). 1. A genus of corticose polyps of the tribe *Lithophyta*, of which the coral is a member. 2. An old term for a plaster, especially for wounds in the head. [L, 105 (*a*, 39); L, 50 (*a*, 14).]—**I. nobilis.** See *Red* CORAL.

ISKIMID, n. A town on the Gulf of Nicodemia, in Turkey in Asia, near which are the springs called *Yalora.* [L, 30, 37, 41 (*a*, 14).]

ISLAND, n. I'l'nd. Lat., *insula.* Fr., *île.* Ger., *Insel.* In anatomy, a structure more or less detached from a main mass and surrounded by structures of a different sort.—**Blood-i's.** See under BLOOD.—**Epithelial i's.** Ger., *Epithelinseln*, *Keimepithelinseln.* Patches of germinal cells between the endothelial cells of the ovary in the *Amphibia.* ["Quart. Jour. of Micr. Sci.," 1882, p. 260; "Arch. f. Mikr. Anat.," 1878, p. 397 (J).]—**I. of Reil.** See INSULA (1st def.).

ISLANDICUS (Lat.), adj. I^{2}s-la^{2}nd(la^{3}nd)'i^{2}k-u^{3}s(u^{4}s). Fr., *d'Islande.* Ger., *isländisch.* Indigenous to or procured from Iceland.

ISLET, n. I'le^{2}t. A small island.—**Hepatic i's.** See INSULA (2d def.).

ISLINGTON, n. I^{2}z'li^{2}n^2-tu^{3}n. Formerly a town of Middlesex, England, now a part of London, where there was a ferruginous spring. [L, 30, 41 (*a*, 14).]

ISMENE (Lat.), n. f. I^{2}s-me(ma)'ne(na). Gen., *-men'es.* From Ἰσμήνη, a daughter of Œdipus. Of Salisbury, a genus of the *Amaryllideæ*; by Bentham and Hooker, referred to the genus *Hymenocallis.* [B. 42 (*a*, 35).]—**I. amancaes.** Fr., *narcisse de Pérou.* The Peruvian daffodil. The bulbs are used in Peru for promoting suppuration. [B, 19, 180 (*a*, 35).]—**I. calathina.** See NARCISSUS *calathinus.*

ISMID, ISMINID, n's. See ISKIMID.

ISNARDIA (Lat.), n. f. Es-na^{3}rd'i^2-a^3. From *Isnard*, a French botanist. Fr., *isnardie.* Ger., *Isnardie.* The genus *Ludwigia.* The *Isnardieæ* of Reichenbach are a division of the *Onagreæ.* [B, 34, 42, 170 (*a*, 35).]—**I. alternifolia.** See LUDWIGIA *alternifolia.*—**I. palustris.** See LUDWIGIA *palustris.*

ISOACRYLIC ACID, n. I^{2}s-o-a^{2}k-ri^{2}l'i^{2}k. See ACRYLIC ACID (2d def.).

ISOALLOXAN, n. I^{2}s-o-a^{2}l-lo^{2}x'a^{2}n. An isomeric modification of alloxan, formed by heating the latter to 260°. With bases it forms salts. [B, 2.]

ISOALLOXANATE, n. I^{2}s-o-a^{2}l-lo^{2}x'a^{2}n-at. A salt of isoalloxanic acid, isomeric with a corresponding alloxanate. [B, 2.]

ISOALLOXANIC ACID, n. I^{2}s-o-a^{2}l-lo^{2}x-an'i^{2}k. See ISALLOXANIC ACID.

ISOALLYLENE, n. I^{2}s-o-a^{2}l'i^{2}l-en. Ger., *Isoallylen.* See ISALLYLENE.

ISOAMYL, n. I^{2}s-o-a^{2}m'i^{2}l. Fr., *isoamyle.* Ger., *Isamyl.* See AMYL.—**I. angelate.** Ger., *Angelicasäure-I'ester.* A body, $C_5H_7O_2 - (CH_2CH_2CH.<[CH_3]_2) = C_{10}H_{18}O_2$, forming one of the constituents of chamomile-oil, and distilling at 200° C. It is isomeric with i. tiglinate, and also contained in the same oil. [B, 5.]—**I'carbonic acid.** Isocaproic acid. [B.]—**I. hydride.** See PENTANE (2d def.).—**I. tiglinate.** Ger., *Tiglinsäure I'ester.* A body, $C_{10}H_{18}O_2 = C_5H_7O_2(CH_2.CH_2.CH.<[CH_3]_2)$, forming one of the constituents of chamomile-oil. It is isomeric with i. angelate, and distills at about 205° C. [B, 5.]

ISOAMYLENE, n. I^{2}s-o-a^{2}m'i^{2}l-en. Amylene into the constitution of which an isoalcohol radicle enters, or one in which the carbon atoms are not disposed in a single chain. [B.] See AMYLENE (2d and 5th var's.).

ISOAMYLIDENE, n. I^{2}s-o-a^{2}m-i^{2}l'i^{2}d-en. Ger., *Isoamyliden.* See AMYLIDENE.

ISOBAPHIA (Lat.), n. f. Is(I[2]s)-o(o[3])-ba[2]f(ba[3]f)'i[2]-a[3]. From ἴσος, equal, and βαφή, dyeing. Fr., *isobaphie*. In physics, the condition of a body which reflects only a single color. [L, 41 (*a*, 14).]

ISOBIURET, n. I[2]s-o-bi-u[2]'re[2]t. A crystalline substance, $C_2H_5N_3O_2 = N_3\begin{cases}CO\\CO(NH_2)'\\H_3\end{cases}$, formed by the action of ammonium on tribromacetylene. It occurs in long needles, taking up molecules of water of crystallization, dissolves easily in hot water, melts at 185° C., and has other properties of biuret. [B, 46, 93 (*a*, 39).]

ISOBRIATE, ISOBRIOUS, adj's. I[2]s-o'bri[2]-at, -u[3]s. Lat., *isobrius* (from ἴσος, equal, and βριάν, to be strong). Fr., *isobrié*. Isodynamous, growing with equal force (said of the cotyledons of a dicotyledonous embryo). [B, 19 (*a*, 35).]

ISOBUTANE, n. I[2]s-o-bu[2]t'an. See BUTANE.

ISOBUTYL, n. I[2]s-o-bu[2]t'i[2]l. See BUTYL.—**I. aceto-acetate.** A colorless liquid, $C_8H_{14}O_3 = CH_3 - CO - CH_2 - CO_2[CH_2 - CH - (CH_3)_2] = C_2H_3O.C_2H_2[C_4H_9].O$. having a faint odor of fennel, and boiling at 203° C. [B, 2.]—**I. acetone.** A substitution compound of isobutyl and acetone, $C_7H_{14}O = CH_3 - CO - CH_2(C_4H_9)$. [B, 2.]—**I. alcohol.** Ger., *I'alkohol*. See BUTYL *alcohol*.—**I. aldehyde.** See BUTYRIC *aldehyde*.—**I'amine.** Ger., *I'amin*. See BUTYLAMINE.—**I. angelate, I. angelicate.** Ger., *Angelicasäure-Isobutylester*. A body, $C_5H_7O_2.([CH_3]_2{<}CH.CH_2) = C_9H_{16}O_2$, forming one of the constituents of chamomile-oil, and distilling at 177°. [B, 5.]—**I'benzene.** Ger., *I'benzol*. A colorless oily liquid having the composition of benzene in which i. replaces hydrogen: $C(C_6H_5)H_2 - CH - {<}^{CH_3}_{CH_3} = C_{10}H_{14}$. It is isomeric with diethyl benzene, with cymene, and ethyldimethylbenzene. [B.]—**I'benzoic acid.** A monobasic acid, $(CH_3)_2C_2H_3.C_6H_4.CO.OH$. Two isomeric forms are known: (1) *Meta-i. a.*, crystallizing in long broad needles, which melt at 127° C. (2) *Para-i. a.*, needles or monosymmetric crystals like those of calc spar, and melting at 164° C. [B, 3 (*a*, 38).]—**I. carbinol.** See AMYL *alcohol*.—**I'carbonic acid.** Ger., *I'carbonsäure*. See VALERIC ACID.—**I'dimethylcarbinol.** See HEPTYL ALCOHOL.—**I'dimethylcarbinyl.** See HEPTYL.—**I. hydride.** See BUTANE.—**I. isobutyrate.** A liquid salt, $C_4H_7O_2(C_4H_9)$, contained in angelic acid, and boiling at about 148° C. [B, 3 (*a*, 38).]—**I. isosulphocyanate, I. isothiocyanate.** See BUTYL *isothiocyanate*.—**I. nitrate.** A liquid obtained by heating a mixture of amyl nitrate and isobutyl alcohol. It boils at 66° to 70° C. ["Proc. of the Am. Pharm. Assoc.," xxxiii (*a*, 39).]—**I. oxalate.** Fr., *oxalate d'isobutyle*. Ger., *Dii'oxalat*. Diisobutylic oxalate, a liquid, $[(CH_3)_2{>}CH.CH_2]_2C_2O_4 = C_{10}H_{18}O_4$. [B, 4.]—**I'phenol.** A crystalline substance, $C_6H_4(OH)C_2H_3(CH_3)_2$, occurring as needles of a faint odor, boiling at 99° C. [B. 3 (*a*, 38).]

ISOBUTYLENE, n. I[2]s-o-bu[2]t'i[2]l-en. Ger., *Isobutylen*. See BUTYLENE.

ISOBUTYLIC, adj. I[2]s-o-bu[2]t-i[2]l'i[2]k. Of or pertaining to isobutyl. [B, 2.]

ISOBUTYLIDENE, n. I[2]s-o-bu[2]t-i[2]l'i[2]d-en. Ger., *Isobutyliden*. An isomeric form of butylidene (tetrene), $C_4H_8 = (CH_3)_2 = CH.CH''$; a bivalent radicle. [B.]—**I. oxide.** Ger., *Isobutylidenoxyd*. See BUTYRIC *aldehyde* (2d def.).

ISOBUTYRAMIDE, n. I[2]s-o-bu[2]t-i[2]r'a[2]m-i[2]d(id). Ger., *Isobutyramid*. See under BUTYRAMIDE.

ISOBUTYRATE, n. I[2]s-o-bu[2]t'i[2]r-at. A salt of isobutyric acid. [B.]

ISOBUTYRIC, adj. I[2]s-o-bu[2]t-i[2]r'i[2]k. Isomeric with a butyric compound. [B.]—**I. acid.** Fr., *acide isopropylcarbonique*. Ger., *Isobuttersäure*. See BUTYRIC *acid*.—**I. aldehyde.** Fr., *aldéhyde isobutyrique*. Ger., *Isobutyraldehyd*. See BUTYRIC *aldehyde* (2d def.).—**I. chloride.** See under BUTYRIC *chloride*.—**I. ether.** See ETHYL *butyrate*.

ISOBUTYRONE, n. I[2]s-o-bu[2]t'i[2]r-on. Ger., *Isobutyron*. A liquid, $[(CH_3)_2.CH]_2CO$, obtained by the dry distillation of calcic isobutyrate or by careful oxidation of diisopropyl oxalic acid, boiling at about 125° C., and having a strong ethereal smell somewhat like that of camphor. [B, 3, 4 (*a*, 38).]

ISOBUTYRONITRILE, n. I[2]s-o-bu[2]t-i[2]r-o-nit'ri[2]l. Ger., *Isobutyronitril*. See PROPYL *cyanide*.

ISOCAJUPUTENE, n. I[2]s-o-ka[2]j'u[2]-pu[2]t-en. An oily liquid boiling at 177° C., obtained from oil of cajaput, isomeric with cajuputene. [B, 18.]

ISOCAPRIC, adj. I[2]s-o-ka[2]p'ri[2]k. Fr., *isocaprique*. Isomeric with a capric compound. [B.]—**I. acid.** An acid, $C_9H_{19}.CO.OH$, occurring as an oily liquid of slight odor and unpleasant, burning taste, and boiling at about 242° C. [B, 3 (*a*, 38).]—**I. alcohol.** Fr., *alcool isocaprique*. See DECATYL *alcohol*.—**I. aldehyde.** Fr., *aldéhyde isocaprique*. See under CAPRIC *aldehyde*.

ISOCAPROATE, n. I[2]s-o-ka[2]p'ro-at. Ger., *Isocapronat*. A salt of isocapric acid. [B, 4.]

ISOCAPROIC ACID, n. I[2]s-o-ka[2]p-ro'i[2]k. Fr., *acide isocaproïque* (ou *iso-hexoïque*). Ger., *Isocaproninsäure*. See CAPROIC *acid* (2d def.).

ISOCAPRYL ALCOHOL, n. I[2]s-o-ka[2]p'ri[2]l a[2]l'ko-ho[2]l. See DECATYL *alcohol*.

ISOCAPRYLIC ACID, n. I[2]s-o-ka[2]p-ri[2]l'i[2]k. Fr., *acide isoctoïque*. Ger., *Isoctylsäure*. A monobasic acid, $(CH_3)_3 \equiv C - CH_2 - CH(CH_3) - CO.OH = C_8H_{16}O_2$, isomeric with caprylic or octylic acid; an oily liquid boiling above 205° C. [B, 4.]

ISOCARPOUS, adj. I[2]s-o-ka[3]rp'u[3]s. Lat., *isocarpus, isocarpeus* (from ἴσος, equal, and καρπός, a fruit). Ger., *gleichfrüchtig*. 1. Having as many carpels as sepals and petals. The *Isocarpæ* (Fr., *isocarpées*); syn.: *Isocarpeæ*) of Eichler, Sachs, and others are a division of the *Gamopetalæ*, thus characterized. 2. Like-fruited; said of *Algæ* in which the fruits of the same species have the same form. The *Isocarpeæ* (Ger., *Gleichfrüchtige, Isocarpeen*) are, in the older systems of classification of the *Algæ*, a division of the latter, including the *Diatomeæ* and *Malacophyceæ* of Kützing. [B, 41, 104, 170, 291 (*a*, 35).]

ISOCERCAL [Cope], adj. I[2]s-o-su[3]r'k'l. From ἴσος, equal, and κέρκος, a tail, etc. See DIPHYCERCAL.

ISOCERYL ALCOHOL, n. I[2]s-o-se[2]r'i[2]l a[2]l'ko-ho[2]l. See under CERYL *alcohol*.

ISOCETIC ACID, n. I[2]s-o-set'i[2]k. See under CETIC *acid*.

ISOCHEIROUS, adj. I[2]s-o-kir'u[3]s. Lat., *isocheirus* (from ἴσος, equal, and χείρ, the hand). Having hands, or appendages in the form of arms, all resembling each other [L, 180 (*a*, 39).]

ISOCHINOLINE, n. I[2]s-o-ki[2]n'ol-en. See QUINOLINE.

ISOCHOLANIC ACID, n. I[2]s-o-kol-a[2]n'i[2]k. An acid, $C_{20}H_{25}O_8$, produced along with its isomer, cholanic acid, by the oxidation of cholic acid. [Latschinoff (B).]

ISOCHOLESTERIN, n. I[2]s-o-kol-e[2]s'te[2]r-i[2]n. Fr., *isocholestérine*. Ger., *I.* See under CHOLESTERIN.

ISOCHOMOUS, adj. I[2]s-o-kom'u[3]s. From ἴσος, equal, and χῶμα, a promontory. Forming equal angles of divergence; said of branches springing from the stem of a plant at the same angle. [*a*, 35.]

ISOCHROMATIC, adj. I[2]s-o-krom-a[2]t'i[2]k. From ἴσος, equal, and χρῶμα, color. Fr., *isochre, isochromatique*. Having the same color; of uniform tint. [L, 30, 41 (*a*, 14).]

ISOCHRON (Ger.), **ISOCHRONAL**, adj's. E-so-ch[2]ron', i[2]s-o[2]k'ro-n'l. See ISOCHRONOUS.

ISOCHRONISM, n. I[2]s-o[2]k'ro-ni[2]z'm. Lat., *isochronismus* (from ἴσος, equal, and χρόνος, time). The property of being isochronous. [*a*, 17.]

ISOCHRONOUS, adj. I[2]s-o[2]k'ro-nu[3]s. From ἴσος, equal, and χρόνος, time. Fr., *isochrone*. Ger., *isochron*. 1. Occupying equal periods of time. 2. Recurring at regular intervals. [L, 30, 41, 49, 50 (*a*, 14).]

ISOCHROUS (Lat.), adj. I[2]s-o[2]k(o[2]ch[2])'ro(re[2])-u[3]s(u[4]s). From ἴσος, equal, and χρώς, color. See ISOCHROMATIC.

ISOCHRYSON (Lat.), **ISOCHRYSUM** (Lat.), n's n. I[2]s-o-(o[3])-kriz(ch[2]ru[5]s)'o[2]n, -u[3]m(u[4]m). 1. Of Galen, a certain collyrium. 2. Of Libavius, a compound of iron, antimony, and mercury. [A, 325.]

ISOCITRIC ACID, n. I[2]s-o-si[2]t'ri[2]k. A crystalline acid formed by treating an aqueous solution of citric acid with sodium amalgam, the acid reaction being kept up by dilute sulphuric acid. [Rochleder, "Proc. of the Am. Pharm. Assoc.," xvii (*a*, 39).]

ISOCRATES (Lat.), n. m. I[2]s-o[2]k'ra[2]t(ra[3]t)-ez(as). Gr., ἰσοκρατής (from ἴσος, equal, and κεραννύναι, to mix). Wine mixed with its own volume of water. [L, 50 (*a*, 14).]

ISOCREATINE, n. I[2]s-o-kre'a[2]t-en. Fr., *isocréatine*. Ger., *Isokreatin*. See ALACREATINE.

ISOCROTONIC ACID, n. I[2]s-o-krot-o[2]n'i[2]k. Fr., *acide isocrotonique*. Ger., *Isocrotonsäure*. See CROTONIC *acid* (*b*).

ISOCROTYL, n. I[2]s-o-krot'i[2]l. A univalent radicle, $(C_4H_7)' = (CH_3)_2 : C : CH -$, isomeric with butenyl. [B, 4.]

ISOCTOIC ACID, n. I[2]s-o[2]k-to'i[2]k. Fr., *acide isoctoïque*. Ger., *Isoctylsäure*. See ISOCAPRYLIC ACID.

ISOCTYLALCOHOL, n. I[2]s-o[2]k''ti[2]l-a[2]l'ko-ho[2]l. See under OCTYL *alcohol*.

ISOCTYLAMINE, n. I[2]s-o[2]k-ti[2]l'a[2]m-en. See under OCTYL *amine*.

ISOCTYLIC ACID, n. I[2]s-o[2]k-ti[2]l'i[2]k. Ger., *Isoctylsäure*. See ISOCAPRYLIC ACID.

ISOCUMOL, n. I[2]s-o-ku[2]m'o[2]l. See PSEUDOCUMENE.

ISOCYAN (Ger.), n. E-so-tsu[6]-a[3]n'. See ISOCYANOGEN.—**I'-säure-Allylester.** Allyl pseudocyanate. [B.]

ISOCYANATE, n. I[2]s-o-si'a[2]n-at. Fr., *i.* Ger., *-isocyanat* (in compos.). A salt of isocyanic acid. [B.]

ISOCYANIC ACID, n. I[2]s-o-si'a[2]n-i[2]k. Pseudocyanic acid. [B.] See under CYANIC ACID.

ISOCYANIDE, n. I[2]s-o-si'a[2]n-i[2]d(id). Ger., *-isocyanür* (in compos.). See under CYANIDE.

ISOCYANOGEN, n. I[2]s-o-si-a[2]n'o-je[2]n. Ger., *Isocyan*. See CARBAMMONIUM and under CYANOGEN.

ISOCYANÜR (Ger.), n. E-so-tsu[6]-a[3]n-u[6]r'. See ISOCYANIDE.

ISOCYANURATE, n. I[2]s-o-si-a[2]n-u[2]'rat. Fr., *i.* A salt of isocyanuric acid. [*a*, 38.]

ISOCYANURIC ACID, n. I[2]s-o-si-a[2]n-u[2]'ri[2]k. Fr., *acide isocyanurique*. See FULMINURIC ACID.

ISODACTYLOUS, adj. I[2]so-da[2]k'ti[2]l-u[3]s. From ἴσος, equal, and δάκτυλος, digit. Fr., *isodactyle*. Having toes of the same size. [L, 41 (*a*, 14).]

ISODIC, adj. I[2]s-o[2]d'i[2]k. See EISODIC.

ISODIMORPHISM, n. I[2]s-o-di-mo[3]rf'i[2]z'm. From ἴσος, equal, and δίμορφος, two-formed. A peculiar form of dimorphism, in which a substance crystallizes in two forms that are incompatible, but still sufficiently similar to come within the limits of isomorphism. [L, 41 (*a*, 14).]

ISODIMORPHOUS, adj. I[2]s-o-di-mo[3]rf'u[3]s. Fr., *isodimorphe*. Having the property of isodimorphism. [L, 41 (*a*, 14).]

ISODONTOUS, adj. I^{2}s-o-do^{2}n'tu^{3}s. From ἴσος, equal, and ὀδούς, a tooth. Fr., *isodonte.* Having teeth either alike or very similar. [L, 41 (α, 14).]

ISODROMOUS, adj. I^{2}s-o^{2}d'ro-mu^{3}s. Lat., *isodromos, isodromus* (from ἴσος, equal, and δρόμος, a course). See Isochronous.

ISODULCITAN, n. I^{2}s-o-du^{3}l'si^{2}t-a^{2}n. Ger., *I.* An amorphous substance, $C_6H_{12}O_5$, isomeric with dulcitan. [B, 3.]

ISODULCITE, n. I^{2}s-o-du^{3}l'sit. Ger., *Isodulcit.* A body, $C_6H_{12}O_5 + H_2O = C_6H_{14}O_6$, isomeric with mannitan (dulcitan), forming large, monoclinic crystals, melting at 105° to 110° C., and easily soluble in water. [B, 4, 270 (α, 38).]

ISODULCITIC ACID, n. I^{2}s-o-du^{3}l-si^{2}t'i^{2}k. Fr., *acide isodulcitique.* A substance, $C_6H_{10}O_9$, prepared by oxidizing isodulcite with nitric acid, and occurring in granular, colorless, transparent crystals, freely soluble in water, sparingly soluble in alcohol. ["Proc. of the Am. Pharm. Assoc.," xvi (α, 39).]

ISODURYLIC ACID, n. I^{2}s-o-du^2-ri^{2}l'i^{2}k. Fr., *acide isodurilique.* An acid, $C_{10}H_{12}O_{21}$, having two isomeric forms: *α-isodurylic acid*, melting at 215° C., subliming at higher temperatures, and slightly soluble in hot water, more soluble in alcohol, very soluble in ether; *β-isodurylic acid*, occurring in long needles, fusible at 120° to 125° C., slightly soluble in cold water, freely soluble in hot water, alcohol, ether, and chloroform. [B, 46 (α, 39).]

ISODYNAMIA (Lat.), n. f. I^{2}s(es)-o(o^3)-di^{2}n(du^{6}n)-a^{2}m(a^{3}m)'-i^2-a^3. From ισος, equal, and δύναμις, power. Fr., *isodynamie.* Ger., *Gleickkräftigkeit.* The property of being isodynamic. [α, 14.]

ISODYNAMIC, adj. I^{2}s-o-di^{2}n-a^{2}m'i^{2}k. From ἴσος, equal, and δυναμικός, powerful. Exerting (of foods, giving rise to) an equal amount of force. [α, 17.]

ISODYNAMOUS, adj. I^{2}s-o-di^{2}n'a^{2}m-u^{3}s. Lat., *isodynamus* (from ἴσος, equal, and δυνάμις, force). Fr., *isodyname.* See Isobrious.

ISŒNANTHYLIC ACID, n. I^{2}s-o-na^{2}n-thi^{2}l-i^{2}k. See Œnanthylic acid.

ISOETES (Lat.), n. m. Is-o(o^2)'e^{2}t-ez(e^{2}s). Gen., *-o'etis.* From ἰσοετές, an evergreen plant. 1. Of Pliny, the *Sempervivum tectorum.* 2. Quillwort, a genus of aquatic club-mosses of the *Isoeteæ* (Fr., *isoétées*), which are a division of club-mosses of the *Ligulatæ*; of Reichenbach, a family of the *Limnobiæ*; of Endlicher, an order of the *Selagines*; of Meissner, a suborder of the *Rhizocarpeæ*; and of Brongniart, a division of the *Lycopodiaceæ.* [B, 19. 34, 104, 115, 170, 291 (α, 35).]—**I. lacustri.** Merlin's grass; a species found in water, at or near the margins of ponds and rivers, in New England and the Middle States, often entirely submerged. [B, 34 (α, 35).]

ISOGAMOUS, adj. I^{2}s-o^{2}g'a^{2}m-u^{3}s. From ἴσος, equal, and γάμος, marriage. Produced by the coalescence of gametes of equal size (said of reproduction in plants). [B, 291 (α, 35).]

ISOGAMY, n. I^{2}s-o^{2}g'a^{2}m-i^2. Lat., *isogamia.* The quality of being isogamous. [α, 35.]

ISOGNATHISM, n. I^{2}s-o^{2}g'na^{2}th-i^{2}z'm. From ἴσος, equal, and γνάθος, the jaw. A condition of the molar teeth in some animals in which the opposite teeth are alike and interlock when the jaws are closed. ["Nature," March 20, 1890, p. 467 (α, 39).]

ISOGYNOUS, adj. I^{2}s-o^{2}j'i^{2}n-u^{3}s. From ἴσος, equal, and γυνή, a woman. Fr., *isogyne.* In botany, having an equal number of carpels and petals. [B, 38 (α, 14).]

ISOGYRUS (Lat.), adj. I^{2}s-o(o^3)-jir(gu^{6}r)'u^{3}s(u^{4}s). From ἴσος, equal, and γῦρος, a circle. In botany, forming a complete spire. [B, 19 (α, 35).]

ISOHÆMATOPORPHYRIN, n. I^{2}s-o-he^{2}m-a^{2}t-o-po^{2}r'fi^{2}r-i^{2}n. Of C. A. Nobel, a reduction product of hæmatin, formed from hæmatoporphyroidin, and identical with the urohæmatin of MacMunn. ["Ctrlbl. f. d. med. Wssnschr.," April 23, 1887, p. 305 (B).]

ISOHARNSÄURE (Ger.), n. E-so-ha^{3}rn'zoir-e^2. Isouric acid. [B.]

ISOHEMIPINIC ACID, n. I^{2}s-o-he^{2}m-i^2-pin'i^{2}k. A dibasic acid, $C_6H_2(OCH_3)_2(CO.OH)_2$, crystallizing in white needles, almost insoluble in cold water, somewhat soluble in hot water, and melting at about 246° C. [B, 3 (α, 38).]

ISOHEPTANE, n. I^{2}s-o-hep'tan. See Heptane.

ISOHEPTYL, n. I^{2}s-o-he^{2}p'ti^{2}l. See Heptyl (2d def.).—**I. alcohol.** See under Heptyl alcohol.

ISOHEPTYLENE, n. I^{2}s-o-he^{2}p'ti^{2}l-en. See under Heptylene.

ISOHEPTYLIC ACID, n. I^{2}s-o-he^{2}p-ti^{2}l'i^{2}k. Fr., *acide isoheptylique.* Isœnanthylic acid. [B.] See Œnanthylic acid.

ISOHESPERIDIN, n. I^{2}s-o-he^{2}s-pe^{2}r'i^{2}d-i^{2}n. A crystalline glucoside, isomeric with hesperidin, obtained from the alcoholic extract of bitter orange-peel. ["Proc. of the Am. Pharm. Assoc.," xxxiv (α, 39).]

ISOHEXANE, n. I^{2}s-o-he^{2}x'an. Syn.: *dimethylpropylmethane, ethylbutyl.* A mobile liquid, $(CH_3)_2CH.CH_2.CH_2.CH_3$, boiling at 62° C. [B, 3 (α, 38).]

ISOHEXOIC ACID, n. I^{2}s-o-he^{2}x-o'i^{2}k. Isocaproic acid. [α, 38.]

ISOHEXYL ALCOHOL, n. I^{2}s-o-he^{2}x''i^{2}l a^{2}l'ko-ho^{2}l. See Hexyl alcohol.

ISO-INDOL, n. I^{2}s-o-i^{2}nd'o^{2}l. A substance, $C_{16}H_{14}N_2$, crystallizing from hot alcohol or glacial acetic acid in small plates, needles, or prisms, which are pleochroitic, showing all possible colors from deep red through green and yellow to indigo-blue, and melt at about 195° C. [B, 3 (α, 38).]

ISOLA, n. E'zo-la^3. A sea-bathing resort in Istria, Austria, where there are sulphurous springs. [L, 30 (α, 14).]

ISOLABLE, adj. I^{2}s'o-la^2-b'l. Capable of being isolated. [L, 41, 56.]

ISOLACTIC ACID, n. I^{2}s-o-la^{2}k'ti^{2}k. See Ethylidenelactic acid.

ISOLATE, v. tr. I^{2}s'o-lat. Fr., *isoler.* Ger., *isoliren, absondern, ausscheiden.* It., *isolare.* Sp., *aislar.* To separate from other substances, structures, or individuals; to place apart.

ISOLATION, n. I^{2}s-o-la'shu^{3}n. Fr., *i., isolement.* Ger., *I., Isolirung, Absonderung.* It., *isolamento.* Sp., *aislamiento.* The act or process of isolating.

ISOLATOR (Ger.), n. E-so-la^3-tor'. See Insulator.

ISOLEUCINE, n. I^{2}s-o-lu^2'sen. See under Leucine.

ISOLICHENIN, n. I^{2}s-o-li'ke^{2}n-e^{2}n. A substance found in Iceland moss along with lichenin: distinguished from the latter by being colored blue by iodine. [B, 3.]

ISOLINE, n. I^{2}s'o-len. Fr., *i.* Ger., *Isolin.* A base, $C_{14}H_{17}N$, occurring in raw quinoline: one of the homologous series of bases obtained by dry distillation of quinine and its isomers. [B, 270 (α, 38).]

ISOLOGOUS, adj. I^{2}s-o^{2}l'o-gu^{3}s. From ἴσος, equal, and λόγος, understanding. Fr., *isologue.* Having an identical chemical constitution. [B, 38 (α, 14).]

ISOLUSIN, n. I^{2}s-o^{2}l'u^2-si^{2}n. Fr., *isolusine.* Of Peschier, a bitter, acrid substance, found in the root of *Polygala virginiana*, so called because it is equally soluble in water and in alcohol. [B, 38, 78 (α, 14).]

ISOMALIC ACID, n. I^{2}s-o-ma'li^{2}k. Fr., *acide isomalique.* See Malic acid.

ISOMANNIDE, n. I^{2}s-o-ma^{2}n'i^{2}d(id). An isomeric derivative, $C_6H_{10}O_4$, of mannite. ["Bull. de la soc. chim. de Paris," Dec. 28, 1883; in "Jour. of the Am. Chem. Soc.," Jan., Feb., 1884, p. 38. (B).]

ISOMER, n. I^{2}s'o-mu^{5}r. See Isomeride.

ISOMÈRE (Fr.), adj. and n. E-so-me^{2}r. 1. (Adj.) see Isomerous. 2. (N.) see Isomeride.

ISOMERIA (Lat.), n. f. I^{2}s-o(o^3)-me(me^2)'ri^2-a^3. From ἴσος, equal, and μέρος, a part. 1. Of Presl, a section of the genus *Cyphia.* 2. Of Don, a section of the genus *Vernonia*; of Schreber the *Tephrodes* of De Candolle. [B, 48, 121 (α, 14).]—**I. chinensis.** The *Vernonia cinerea*, var. *undulata.* [B, 180 (α, 35).]—**I. cinerea.** The *Vernonia cinerea.* [B, 180 (α, 35).]

ISOMERIC, adj. I^{2}s-o-me^{2}r'i^{2}k. From ἴσος, equal, and μέρος, a part. Fr., *isomère, isomérique.* Ger., *isomerisch, gleichgetheilt.* It., *isomero, isomerico.* Sp., *isómero, isomérico.* Of chemical bodies, possessing the same percentage composition, but differing either as regards the number of atoms contained in the molecule, the manner in which the atoms are grouped in the molecule, or the chemical and physical properties which the substances themselves present. [B.] See also Isomerism.

ISOMERIDE, n. I^{2}s-o^{2}m'e^{2}r-i^{2}d(id). Fr., *isoméride.* Syn.: *isomer, allotrope.* A substance which bears to another the relation of isomerism. The expression includes the terms *polymeride* and *metameride*, and, like these related terms, is applied to the cognate substances which are of less typical or less simple construction than the substance assumed as the primitive type. [B.]

ISOMERISM, n. I^{2}s-o^{2}m'e^{2}r-i^{2}z'm. Fr., *isomérisme, isomérie.* Ger., *Isomerie.* Syn.: *allotropy.* The property of being isomeric. It includes (1) *polymerism*, when isomeric bodies, though possessing the same percentage composition, have molecular formulæ which are not identical, but are different simple multiples of one common formula. Polymerism itself may be of different kinds, thus when one polymeric body is formed directly from another by the union of two or more molecules of the latter into one multiple molecule, the polymerism is said to be *genetic.* (2) *Metamerism* when, the percentage composition and molecular formula of isomeric bodies being the same, they yield different products on decomposition, and hence have different rational formulæ, and contain very different radicles. The *reciprocal metamerism* of Tilden exists when the metameric bodies contain each a pair of radicles, united by the same bivalent group, so that the excess of any given element in one radicle of a pair must be made up for by a corresponding deficiency in the second radicle of the same pair. (3) *Allotropism*, when the different varieties of the same elementary body are isomeric (see also Dimorphism [1st def.]). Allotropism may be polymeric (oxygen and ozone), physical, and possibly structural. [B, 3, 4, 6.] See also the various subheads.—**Geometric i.** Ger., *geometrische Isomerie.* See *Physical i.*—**Nucleus i.** Ger., *Kernisomerie.* See under *Structural i.*—**Physical i.** Ger., *physikalische Isomerie.* I. in which the chemical formulæ of two bodies are in all respects identical, but the substances themselves differ in physical properties. It is imagined to be due to differences in the spatial arrangements of atoms, their relations to each other in the molecule being unaltered. It has hence been designated *geometric i.* [B, 4.]—**Place-i., Structural i.** Ger., *Ortsisomerie, Strukturisomerie.* I. in which the structural formulæ of two bodies differ only in the arrangement of the atoms attached to their nuclei (*place i.*), or in the mode of connection of the nuclei themselves (*nucleus i.*). [B, 4.]

ISOMEROMORPHISM, n. I^{2}s-o-me^{2}r-o-mo^{2}rf'i^{2}z'm. From ἴσος, equal, μέρος, a part, and μορφή, form. Isomorphism between substances that are alike in atomic proportions. [L, 56.]

ISOMEROUS, adj. I^{2}s-o^{2}m'e^{2}r-u^{3}s. Fr., *isomère.* Ger., *isomerisch, gleichgetheilt.* 1. Equal in number, isomeric. 2. Of a flower, having the same number of parts in each whorl. [B, 1, 19, 77 (α, 35).]

ISOMETRIC, adj. I^{2}s-o-me^{2}t'ri^{2}k. From ἴσος, equal, and μετρεῖν, to measure. Fr., *isométrique*. Ger., *isometrisch, gleichmessend*. Having the same dimensions (said of crystals). [L, 30, 41 (α, 14).]

ISOMETROPIA (Lat.), n. f. I^{2}s-o(o^3)-me^{2}t-rop(ro^{2}p)'i^2-a^3. From ἴσος, equal, μέτρον, a measure, and ὤψ, the eye. Fr., *isométropie*. Ger., *Isometropie*. That condition in which the refraction of both eyes is the same in kind and degree. [F.]

ISOMŒRIA (Lat.), n. f. I^{2}s-o(o^3)-me'(mo^2'e^2)-ri^2-a^3. Gr., ἰσομοιρία. See ISOMERISM.

ISOMŒROUS, adj. I^{2}s-o-mer'u^{3}s. Gr., ἰσόμοιρος. See ISOMEROUS.

ISOMORPHIA (Lat.), n. f. I^{2}s-o(o^3)-mo^{2}rf'i^2-a^3. See ISOMORPHISM.

ISOMORPHIC, adj. I^{2}s-o-mo^{2}rf'i^{2}k. See ISOMORPHOUS.

ISOMORPHISM, n. I^{2}s-o-mo^{2}rf'i^{2}z'm. Lat., *isomorphia* (from ἴσος, equal, and μορφή, form). Fr., *isomorphisme*. Ger., *Isomorphie*. It., Sp., *isomorfia, isomorfismo*. The state of being isomorphous. [B.]—**Polymeric i.** Polymerism (see under ISOMERISM). [α, 35.]

ISOMORPHOUS, adj. I^{2}s-o-mo^{2}rf'u^{3}s. Fr., *isomorphe*. Ger., *isomorph*. Of the same form (said of bodies which resemble one another in chemical composition and crystallize in forms either identical or similar). [B.]

ISONANDRA (Lat.), n. f. I^{2}s-o^{2}n-a^{2}n(na^{3}n)'dra^3. From ἴσος, equal, and ἀνήρ, a man. Fr., *isonandre*. A genus of the *Sapotaceæ*. [B, 19, 38, 42 (α, 35).]—**I. acuminata.** See DICHOPSIS *elliptica*.—**I. gutta.** See DICHOPSIS *gutta*.

ISONAPHTHALIC ACID, n. I^{2}s-o-na^{2}f-tha^{2}l'i^{2}k. Fr., *acide isonaphthalique*. An acid obtained by the action of chromic acid on isoxylene. [B, 93 (α, 38).]

ISONAPHTHOL, n. I^{2}s-o-na^{2}f'tho^{2}l. A naphthalene hydrate, $C_{10}H_7.OH$, isomeric with naphthol, occurring in colorless rhombic tables which melt at 122° C., boil at about 290° C., and are readily soluble in alcohol and in ether. [B, 4, 93 (α, 38).]

ISONICOTINIC ACID, n. I^{2}s-o-ni^{2}k-o-ti^{2}n'i^{2}k. Fr., *acide isonicotinique*. Ger., *Isonicotinsäure*. Pyridine carbonic acid. [B.]

ISONITRAMIDINE, n. I^{2}s-o-ni-tra^{2}m'i^{2}d-en. Isoxyloidin. [B, 2.] See XYLOIDIN.

ISONITRILE, n. I^{2}s-o-ni^{2}t'ri^{2}l. See NITRILE.

ISONONYLIC ACID, n. I^{2}s-o-no^{2}n-i^{2}l'i^{2}k. Fr., *acide isononylique*. See PELARGONIC ACID.

ISO-ORCIN, ISO-ORCINOL, n's. I^{2}s-o-o^{2}r'si^{2}n, -o^{2}l. A substance, $C_7H_8O_2$, isomeric with orcin, melting at 87° C., and boiling at 270° C. [B, 4.]

ISOP, n. I^{2}s'u^{3}p. The *Hyssopus officinalis*. [B, 88 (α, 39).]

ISOPALMITIC ACID, n. I^{2}s-o-pa^{2}l-mi^{2}t'i^{2}k. Fr., *acide isopalmitique*. Ger., *Isopalmitinsäure*. See DIHEPTYLACETIC ACID.

ISOPARAFFIN, n. I^{2}s-o-pa^{2}r'a^{2}f-i^{2}n. See PARAFFIN.

ISOPATHES (Lat.), adj. I^{2}s-op'a^{3}th(a^{3}th)-ez(as). From ἴσος, equal, and πάθος, disease. Suffering in the same manner, from the same cause. [L, 50 (α, 14).]

ISOPATHIA (Lat.), **ISOPATHICA** (Lat.), n's f. I^{2}s-o(o^3)-pa^{2}th(pa^{3}th)-i(e)'a^3, -pa^{2}th(pa^{3}th)'i^{2}k-a^3. From ἴσος, equal, and πάθος, a condition. Of Lux, isopathotherapy. [L, 50 (α, 14).]

ISOPATHIC, adj. I^{2}s-o^{2}p'a^{2}th-i^{2}k. Lat., *isopathicus*. Pertaining to isopathotherapy. [L, 50 (α, 14).]

ISOPATHOTHERAPY, n. I^{2}s-o-pa^{2}th-o-the^{2}r'a^3-pi^2. Lat., *isopathotherapia* (from ἴσος, equal, πάθος, a disease, and θεραπεύειν, medical treatment). The treatment of a disease by administering (1) some portion of the body of another individual either affected with the same disease or associated with its causation; or (2) a portion of the products of the same disease in another individual (*e. g.*, powdered worms as a vermifuge, the hair of a rabid dog in rabies, or the matter from a small-pox pustule in variola). [L, 50 (α, 14).]

ISOPATHY, n. I^{2}s-o^{2}p'a^{2}th-i^2. Lat., *isopathia* (from ἴσος, equal, and πάθος, a disease). Ger., *Isopathie*. See ISOPATHOTHERAPY.

ISOPELLETIERINE, n. I^{2}s-o-pe^{2}l-e^{2}t'i^2-e^{2}r-en. Fr., *isopelletiérine*. See PELLETIERINE.

ISOPENTANE, n. I^{2}s-o-pe^{2}nt'an. See PENTANE.

ISOPENTOIC ACID, n. I^{2}s-o-pe^{2}nt-o'i^{2}k. See PENTOIC ACID.

ISOPEPSIN, n. I^{2}s-o-pe^{2}p'si^{2}n. From ἴσος, equal, and πέψις, digestion. Fr., *isopepsine*. Ger., *I.* Of Finkler, parapeptone. [K.]

ISOPETALOUS, adj. I^{2}s-o-pe^{2}t'a^{2}l-u^{3}s. Lat., *isopetalus* (from ἴσος, equal, and πέταλον, a leaf). Fr., *isopétale*. Having equal-sized petals. [B, 38 (α, 14).]

ISOPHENYLETHYLAMINE, n. I^{2}s-o-fe^{2}n-i^{2}l-e^{2}th-i^{2}l'a^{2}m-en. Ger., *Isophenyläthylamin*. A substance, $C_6H_5-CH\langle^{CH_3}_{NH_2}$; probably expressive of the formula of the collidine found in putrefying gelatin. [Brieger, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cxv, p. 483 (B).]

ISOPHLORETIC ACID, n. I^{2}s-o-flor-e^{2}t'i^{2}k. See PHLORETIC ACID.

ISOPHLORRHETIN, n. I^{2}s-o-flo^{2}r-ret'i^{2}n. See PHLORETIN.

ISOPHLORRHETINIC ACID, n. I^{2}s-o-flo^{2}r-re^{2}t-i^{2}n'i^{2}k. See PHLORRHETINIC ACID.

ISOPHLORRHIDZIN, ISOPHLORRHIZIN, n's. I^{2}s-o-flor-ri^{2}d'zi^{2}n, -ri'zi^{2}n. See PHLORRHIZIN.

ISOPHLOROGLUCIN, n. I^{2}s-o-flo-ro-glu^2'si^{2}n. Fr., *isophloroglucine*. A saccharine principle, $C_6H_6O_3$, obtained as a side product in the manufacture of acetic acid from *Prunus cerasus*, or by melting the tannin of that fruit with potassium. [B, 46, 93 (α, 14, 39).]

ISOPHORIA (Lat.), n. f. I^{2}s-o(o^3)-fo(fo^2)'ri^2-a^3. A condition in which the tension of the vertical muscles of each eye is equal, so that the visual lines lie in the same horizontal plane. ["N. Y. Med. Jour.," Mar. 3, 1888, p. 229 (α, 29).]

ISOPHOROUS, adj. I^{2}s-o^{2}f'o^{2}r-u^{3}s. Lat., *isophorus* (from ἴσος, equal, and φορός, bearing). Fr., *isophore*. Changeable into another form (said of a plant transformable into another plant [*e. g.*, of *Paxtonia*, which is an i. form of *Spathoglottis*]). [B, 19 (α, 35).]

ISOPHTHALATE, n. I^{2}s-o^{2}f'tha^{2}l-at. A salt of isophthalic acid. [B.]

ISOPHTHALIC ACID, n. I^{2}s-o^{2}f-tha^{2}l'i^{2}k. Fr., *acide isophthalique*. Ger., *Isophthalsäure*. See PHTHALIC ACID.

ISOPHTHALYL, n. I^{2}s-o^{2}f-tha^{2}l'i^{2}l. Ger., *I.* A radicle (C_6H_4), isomeric with phthalyl, found in isophthalic acid. [B, 4 (α, 38).]

ISOPHYLLOUS, adj. I^{2}s-o-fi^{2}l'u^{3}s. From ἴσος, equal, and φύλλον, a leaf. Fr., *isophylle*. Having leaves of the same or of a very similar sort. [B, 38 (α, 14).]

ISOPIANIC ACID, n. I^{2}s-o-pi^2-a^{2}n'i^{2}k. See OPIANIC ACID.

ISOPIC ACID, n. I^{2}s-op'i^{2}k. Fr., *acide isopique*. See OPINIC ACID.

ISOPIMELIC ACID, n. I^{2}s-o-pi^{2}m-e^{2}l'i^{2}k. See PIMELIC ACID.

ISOPINIC ACID, n. I^{2}s-o-pin'i^{2}k. Fr., *acide isopinique*. See OPINIC ACID.

ISOPLEURA (Lat.), n. n. pl. I^{2}s-o(o^3)-plu^2'ra^3. From ἴσος, equal, and πλευρόν, a rib. One of the divisions of gastropod molluscs, including those which are bilaterally symmetrical. [L, 121 (α, 39).]

ISOPODIFORM, adj. I^{2}s-o-po^{2}d'i^2-fo^{2}rm. From ἴσος, equal, πούς, the foot, and *forma*, form. Resembling the *Isopoda*.

ISOPODOUS, adj. I^{2}s-o^{2}p'o^{2}d-u^{3}s. From ἴσος, equal, and πούς, the foot. Equal-footed; the *Isopoda* (Ger., *Gleichfüssler*) of Cuvier, Lamarck, Eichwald, and others are an order of *Crustacea* including those having feet all alike, adapted only for locomotion or prehension. [L, 180 (α, 39).]

ISOPOGONOUS, adj. I^{2}s-o-pog-on'u^{3}s. From ἴσος, equal, and πώγων, the beard. Equally bearded (applied to a feather, having the two sides equal). [L, 180 (α, 39).]

ISOPRENE, n. I^{2}s'o-pren. Of Williams, a hydrocarbon, C_5H_8, polymeric with caoutchin, found in caoutchoucin, boiling at 37° to 38° C. [B, 2, 46, 93.]

ISOPROPYL, n. I^{2}s-o-pro'pi^{2}l. Ger., *I.* See PROPYL.—**I'acetic acid.** Ger., *I'essigsäure*. Syn.: *valerianic acid*. An acid derived from acetic acid by the substitution of i. for hydrogen. [B.] See under VALERIC ACID.—**I'acetylene.** A liquid, C_5H_8 : $(CH_3)_2$: CH $-$ C $\equiv$ CH, of penetrating odor, and boiling at 28° C. It is isomeric with valerylene and isovalerylene. [B, 3.]—**I'acrylic acid.** Fr., *acide i'acrylique*. Ger., *I'acrylsäure*. A 1-molecule substitution compound of acrylic acid; α-i'acrylic acid, $C_6H_{10}.O = CH_3 > CH_2$.-CH $=$ CH.CO.OH, is pyroterebic acid. [B, 4.]—**I. alcohol.** Ger., *I'alkohol*. See PROPYL ALCOHOL.—**I'amine.** See PROPYL*amine*.—**I'benzene.** Fr., *i'benzine*. Ger., *I'benzol*. Cumene. [B.]—**I'benzoic acid.** Ortho-i. a. or orthocuminic acid. It separates from alcohol or ether as an indistinctly crystalline mass insoluble in cold water. [B, 3 (α, 38).]—**I'benzol.** See CUMENE.—**I'carballylic acid.** See CAMPHORONIC ACID.—**I'carbonic acid.** Isobutyric acid. [B.]—**I'essigsäure** (Ger.). See *I'acetic acid*.—**I'ethene.** See AMYLENE.—**I'ethyl.** See PENTANE.—**I'ethylene.** See AMYLENE.—**I'ethylene glycol.** Fr., *alcool isopropyl-éthylénique*. See AMYLENE *glycol*.—**I'ethylmethylcarbinyl.** See HEPTYL.—**I'eugenol.** See PROPYL*eugenol*.—**I'guanamine.** See PROPYL*guanamine*.—**I'malonic acid.** Fr., *acide isopropyl-malonique*. See PROPYL*malonic acid*.—**I'methylcarbinol.** Ger., *I.* See AMYL ALCOHOL (6th var.).—**I'phenyl.** Fr., *i.-phényl*. Ger., *I'phenyl*. A univalent radicle, $C_9H_{11} = C_6H_4.CH\langle^{CH_3}_{CH_3}$, a 1-molecule substitution compound of phenyl. Its compounds are isomeric with those of propyl-phenyl and phenyl-propyl. [B.]—**I'phenylacrylic acid.** Cumenylacrylic acid. [B.]—**I'phenylcarboxylic acid.** A monobasic acid, $[C(CH_3)_2 : CH]C_6H_3(OH)(CO.OH)$, one of the varieties of propylhydroxybenzoic acid. Two isomeric varieties are known, *ortho-i'phenylcarboxylic acid*, and *para-i'phenylcarboxylic acid*, both crystalline solids. [B, 3.]—**I'phosphine.** Ger., *I'phosphin*. See PROPYL*phosphine*.—**I'phosphinic acid.** Fr., *acide isopropyl-phospinique*. A solid, $C_3H_7PO.(OH)_2$, resembling paraffin and melting at between 60° and 70° C. [B.]—**I'pyridine.** Fr., *i'pyridine*. Ger., *I'pyridin*. A 1-molecule i. substitution compound, $C_8H_{11}N = C_5H_4(CH\langle^{CH_3}_{CH_3})N$, of pyridine. Two isomeric varieties are known: *α-i'pyridine* and *γ-i'pyridine*, colorless, oily liquids, boiling, respectively, at 167° and 158° C. [B, 79.] See also PROPYL *pyridine*.—**I'succinic acid.** A dibasic, crystalline acid, $(CH_3)_2$: CH.-CH(CO.OH)CH$_2$.CO.OH, probably identical with pimelic acid. [B, 3.]—**I. sulphocyanide.** A mustard-oil, $C_3H_7.CNS$, obtained by Gerlich from an allyl iodide made from glycerin and phosphorus iodide, and having a density of 0·974. [B, 81 (α, 38).]

ISOPUM (Lat.), n. n. I^{2}s-op'u^{3}m(u^{4}m). Of the old pharmacopœias, the fat contained in lamb's wool. [L, 105.] Cf. LANOLIN.

ISOPURPURATE, n. I^{2}s-o-pu^{6}r'pu^{2}r-at. A salt of isopurpuric acid. [α, 38.]

ISOPURPURIC ACID, n. I²s-o-pu⁵r-pu²r'i²k. Fr., *acide isopurpurique.* Ger., *Isopurpursäure.* Picrocyamic acid, an acid, $C_8H_5N_5O_6$, isomeric with purpuric acid, and whose potas ium salt is formed by the action of potassium cyanide on picric or on carbolic acid. It is not known in the free state, but forms salts called *isopurpurates.* [B, 4; "Proc. of the Am. Pharm. Assoc.," ix (α, 39).]

ISOPURPURIN, n. I²s-o-pu⁶r'pu²r-i²n. See ANTHRAPURPURIN.

ISOPUS (Lat.), n. f. I²s-op'u³s(u⁴s). See HYSSOPUS.—**Herba isopi.** The leaves and flowering tops of *Hyssopus officinalis.* [B, 180 (α, 35).]

ISOPYRINE, n. I²s-o²p'i²r-en. Fr., *i.* Ger., *Isopyrin.* A bitter alkaloid, extracted with water from the root of *Isopyrum thalictroides.* [B, 2.]

ISOPYROMUCIC ACID, n. I²s-o-pi-ro-mu²'si²k. Fr., *acide isopyromucique.* Ger., *Isobrenzschleimsäure.* An acid isomeric with pyromucic acid (*q. v.*). [B]

ISOPYRON (Lat.), n. n. I²s-o²p'i²r(u⁶r)-o²n. Gr., ἰσόπυρον. According to some, the *Corydalis claviculata;* according to others, the *Isopyrum aquilegioides.* 2. The *Aquilegia vulgaris.* [B, 88 (α, 39), 114, 115, 180 (α, 35).]

ISOPYRUM (Lat.), n. n. I²s-o²p'i²r(u⁶r)-u³m(u⁴m). Gr., ἰσόπυρον. Ger., *Muschelblümchen.* 1. False rue anemone; a genus of the *Ranunculaceæ*, tribe *Isopyreæ.* 2. A name for several species of *Helleborus*, so called on account of their sharp and pungent taste. The *Isopyreæ*, or *Isopyrineæ* [Spach], of Reichenbach are a subdivision of the *Ranunculaceæ*, tribe *Helleboreæ.* [B, 34, 38, 42, 64, 170 (α, 35).]—**I. thalictroides.** A white-flowered species found in central and southern Europe, and especially in the forests of the Pyrenees. The root yields isopyrine and pseudo-isopyrine. [B, 19, 64 (α, 35); "Proc. of the Am. Pharm. Assoc.," xxi (α, 39).]

ISORA (Lat.), n. f. I(e)-so'ra³. Of Schott, a genus of the *Sterculiaceæ;* of Bentham and Hooker, the genus *Helicteres.* [B, 42 (α, 35).]—**I. corylifolia.** See HELICTERES *i.*

ISORCIN, n. I²s-o²r'si²n. See ISO-ORCIN.

ISORCINOL, n. I²s-o²r'si²n-o²l. See CRESORCINOL.

ISORRHOPIA (Lat.), n. f. I²s-o²r-rop(ro²p)'i²-a³. From ἴσος, equal, and ῥοπή, an inclination downward. Ger., *Gleichgewicht.* Equilibrium. [L, 50 (α, 14).]

ISORRHOPOUS, adj. I²s-o²r'rop-u³s. Lat., *isorrhopos, isorrhopus.* Ger., *von gleichem Gewichte.* Of the same weight. [L, 50 (α, 14).]

ISOSCOPE, n. I²s'o-skop. From ἴσος, equal, and σκοπεῖν, to examine. An instrument devised by Helmholtz for determining the position of the vertical and horizontal lines of division in various movements of the eye. It consists of a firmly fixed frame provided with a vertical wire for one eye, and a movable frame provided with one or several wires, which are at first vertical, for the other eye. In using the instrument, the movable frame is to be so adjusted that the binocular projected wires seem parallel to one another. [F, 21.]

ISOSPONDYLOUS, adj. I²s-o-spo²n'di²l-u³s. From ἴσος, equal, and σπόνδυλος, a vertebra. Having the anterior vertebra separate and unmodified, and a precoracoid arch developed (said of a suborder of fishes, the physostomous *Teleacephali*). ["Nature," May, 1890, p. 419 (α, 39).]

ISOSPORE, n. I²s'o-spor. From ἴσος, equal, and σπόρος, seed. Fr., *i.* Of Rostafinski, a zygospore (of *Algæ*). [B, 121 (α, 35).]

ISOSPOROUS, adj. I-so²s'po-ru³s. Lat., *isosporus* (from ἴσος, equal, and σπόρος, seed). Fr., *isospore.* Producing but one kind of asexual spores. The *Isosporeæ* (Fr., *isosporées*) are a division of cryptogams so characterized. [B, 64, 291 (α, 35).]

ISOSTATHMON (Lat.), n. n. I²s-o(o²)-sta²th(sta³th)'mo²n. Gr., ἰσόσταθμον (from ἴσος, equal, and σταθμός, a certain weight). Of ancient writers, a medicine for pectoral complaints; probably so called on account of the equal weight of its different ingredients. [L, 50 (α, 14).]

ISOSTATHMOS (Lat.). **ISOSTATHMUS** (Lat.), adj's. I²s-o(o²)-sta²th(sta³th)'mo²s, -mu³s(mu⁴s). Gr., ἰσόσταθμος. See ISORRHOPOUS.

ISOSTEARIC ACID, n. I²s-o-ste-a²r'i²k. See STEARIC ACID.

ISOSTEMONOPETALUS (Lat.), adj. I²s-o(o³)-ste(sta)-mo²n-o(o³)-pe²t'a²l(a³l)-u³s(u⁴s). From ἴσος, equal, στήμων, a thread, and πέταλον, a leaf. Fr., *isostémonopétale.* See ISOSTEMONOUS.

ISOSTEMONOUS, adj. I²s-o-ste²m'o²n-u³s. Lat., *isostemonus* (from ἴσος, equal, and στήμων, a thread). Fr., *isostémoné.* Having the stamens equal in number to the petals and to the sepals, or, in apetalous flowers, to the sepals only. The *Isostemones* are a class of plants so characterized. [B, 1, 19, 279, 291 (α, 35).]

ISOSTEMONY, n. I²s-o-ste²m'o²n-i². Fr., *isostémonie.* The condition of being isostemonous. [α, 35.]

ISOSUBERIC ACID, n. I²s-o-su²-be²r'i²k. See SUBERIC ACID.

ISOSUCCINIC ACID, n. I²s-o-su³k-si²n'i²k. Fr., *acide isosuccinique.* Ger., *Isobernsteinsäure.* Syn.: *methyl malonic acid, ethylidenedicarboxylic acid.* A body, isomeric with succinic acid, forming colorless crystals of the structure $C_4H_6O_4 = CH_3.CH\langle^{CO.OH}_{CO.OH}$, which sublime at 100° C., fuse at 130° C., and are more soluble in water than succinic acid. [B, 4; B, 93 (α, 14).]

ISOSULPHOCYANATE, n. I²s-o-su³lf-o-si'a²n-at. See ISOTHIOCYANATE.

ISOSULPHOCYANIC ACID, n. I²s-o-su³lf-o-si-a²n'i²k. Ger., *Isoschwefelcyanwasserstoff, Isoschwefelcyansäure.* See ISOTHIOCYANIC ACID.

ISOTARTARIC ACID, n. I²s-o-ta³r-ta³r'i²k. Fr., *acide isotartrique.* Ger., *Isotartrinsäure.* See TARTRALIC ACID.

ISOTARTRATE, n. I²s-o-ta³rt'rat. A salt of isotartaric acid. [B, 38 (α, 38).]

ISOTEREBENTHENE, n. I²s-o-te²r-e²-be²n'then. Fr., *isotérébenthène.* Syn.: *dipentene, cajeputene, cynene, cinene.* A hydrocarbon, $C_{10}H_{16}$, found always with terebenthene and terebentilene in French oil of turpentine from the *Pinus maritima*, and also obtained in other ways. It is identical with the caoutchin obtained by dry distillation from caoutchouc and gutta-percha. It boils at 175° C. [B, 3, 93, 270 (α, 38).] See also CAJEPUTENE and CINENE.

ISOTHERMAL, adj. I²s-o-thu⁵r'm'l. From ἴσος, equal, and θέρμη, heat. Fr., *isotherme.* Ger., *gleichwarm.* Of an equal degree of heat (said of lines on the earth's surface). [L, 50 (α. 14).]

ISOTHERMOUS, adj. I²s-o-thu⁵rm'u³s. See ISOTHERMAL.

ISOTHIOCYANATE, n. I²s-o-thi-o-si'a²n-at. Ger., *-isothiocyanat* (in compos.), *Isoschwefelcyanat.* Syn.: *isosulphocyanate.* A salt of isothiocyanic acid. [B.]

ISOTHIOCYANIC ACID, n. I²s o-thi-o-si-a²n'i²k. Fr., *acide isothiocyanique.* Ger., *Isothiocyansäure.* Syn.: *isosulphocyanic acid.* A monobasic acid, S : C : N — H, known only through its salts, the isothiocyanates. The i's of the alcohol radicles constitute the so-called mustard-oils. [B, 4.]

ISOTOMA (Lat.), n. f. sing. and n. pl. I²s-o²t'o(o²)-ma³. From ἴσος, equal, and τομή, a cutting. 1. (Sing.) of Don and Lindley, a genus of lobeliaceous herbs, considered by some authors a section of the *Laurentia* of Necker. [B, 19, 48, 71 (α, 35).] 2. (Pl.) of C. G. Thomson, a division of the *Rhynchophora*, characterized by the second and third abdominal segments being nearly equal. ["Am. Nat.," viii, p. 389 (α, 32).]—**I. longiflora.** A poisonous species of *I.* (1st def.) found in the West Indies, producing dangerous catharsis. [B, 19 (α, 35).]

ISOTOME, n. I²s'o-tom. From ἴσος, equal, and τομή, a cutting. A line dividing anything into equal parts. [L, 221.]

ISOTONIC, adj. I²s-o-to²n'ik. From ἴσος, equal, and τόνος, a tone. Having the same tone or tension; of a muscle, in a condition where there is no change of initial tensions, and stimulation leads merely to the shortening of the muscle, as opposed to the *isometric* condition, where there can be no change in the length of the muscle, and stimulation produces only a change in tension. ["Nature," July, 1889, p. 288 (α, 39).]

ISOTROPIC, adj. I²s-o-tro²p'i²k. From ἴσος, equal, and τροπή, a turning. Fr., *isotrope.* Ger., *isotrop.* 1. Equally endowed with a certain quality (*e. g.*, elasticity, radiating power, conductivity of light and heat) in all parts or directions, especially of muscular tissue refracting equally in all directions, and hence singly refractive. See also ANISOTROPIC. 2. Of Pflüger, such that any organ might develop from any part of it (said of an ovum). [B; J, 8, 55.]

ISOTROPINE, n. I²s-o²t'ro-pen. A base produced by the decomposition of ecgonine. It resembles tropine. ["Proc. of the Am. Pharm. Assoc.," xxxiii (α, 39).]

ISOTROPOUS, adj. I²s-o²t'rop-u³s. See ISOTROPIC.

ISOTROPY, n. I²s-o²t'ro-pi². The state or quality of being isotropic. [J, 55.]—**I. of the ovum.** Fr., *isotropie de l'œuf.* A supposed fusion of the nuclei of the two sexual elements in the process of fecundation. [O. Hertwig, "Jena. Ztschr. f. Naturwiss.," xviii, 1884; "Gaz. hebdom. de méd. et de chir.," Sept. 25, 1885, p. 639.]

ISOUREA, n. I²s-o-u²-re'a³. Fr., *isurée.* A substance, CH_4N_2O, obtained by adding prussic acid to an alcoholic solution of hydroxylamine and heating for 48 hours to 40° C. It forms large rhombic crystals or small prisms similar to those of urea. They melt at 105° C. with partial decomposition, and are soluble in hot water and in boiling alcohol. [B, 93 (α, 14).]

ISOURIC ACID, n. I²s-o-u²'ri²k. Fr., *acide iso-urique.* Ger., *Isoharnsäure.* An acid, $C_5H_4N_4O_3$, isomeric with uric acid, and consisting of a heavy powder insoluble in water. [B, 3.]

ISOUVITIC ACID, n. I²s-o-u²-vi²t'i²k. Fr., *acide isouvitique* (ou *isouvitinique*, ou *isuvitique*). Ger., *Isuvitinsäure.* Syn.: *phenyl acetorthocarboxylic acid, homo-orthophthalic acid.* An acid, $C_9H_8O_4$, isomeric with xylidic acid and crystallizing from water in short rhombic prisms, melting at about 175° C. [B, 3, 4, 93 (α, 38).]

ISOVALERATE, n. I²s-o-va²l'e²r-at. See VALERIANATE.

ISOVALERIC ACID, n. I²s-o-va²l-e²r'i²k. Fr., *acide isovalérique.* See VALERIC ACID.

ISOVALERIC ALDEHYDE, n. I²s-o-va²l-e²r'i²k a²l'de²-hid. Fr., *aldéhyde isovalérique.* Ger., *Isovaleraldehyd.* Syn.: *valeral.* See VALERIC ALDEHYDE.

ISOVALERONITRILE, n. I²s-o-va²l-e²r-o-nit'ri²l. Ger., *Isovaleronitril.* See BUTYL *cyanide.*

ISOVANILLIC ACID, n. I²s-o-va²n-i²l'i²k. Fr., *acide isovanillique.* A substance, $C_8H_8O_4 = C_6(H.H.O.CH_3.OH.H.CO.OH.)$, one of the isomeric varieties of methylprotocatechuic acid. [B, 4.]

ISOXYLAMIDE, n. I²s-o-zil'a²m-i²d(id). See XYLAMIDE.

ISOXYLIC ACID, n. I²s-o-zi²l'i²k. See XYLIC ACID.

ISOXYLIDIC ACID, n. I²s-o-zil-i²d'i²k. Ger., *Isoxylidinsäure.* See XYLIDIC ACID.

ISOXYLOL, n. I²s-o-zi²l'ol. A liquid neutral hydrocarbon, C_8H_{10}, isomeric with xylol and methyltoluol. [B, 5 (α, 38).] See XYLENE.

ISOXYLOIDIN, n. I²s-o-zi²l-oid'i²n. See XYLOIDIN.

ISPAGHUL (Pers.), n. Written also *ispagool* and *isapghol.* Sponge-seeds, the seed of *Plantago decumbens* (*ispaghula*). An infusion of the seeds is employed in Turkestan and China in diarrhœa and chronic dysentery. [C. Shah, "Indian Med. Gaz.," Nov., 1885, p. 344 ; B, 18, 172 (*a*, 35) ; "Proc. of the Am. Pharm. Assoc.," xxi (*a*, 39).]

ISPAGHULA (Lat.), n. f. I^{2}s-pa^3-gu'la^3. From *Ispaghul*, sponge-seeds. The *Plantago i.* [*a*, 35.]

ISPRUK, n. In the East Indies, a powder made from a species of *Delphinium.* [B, 19 (*a*, 35).]

ISRALON (Fr.), n. Es-ra^3-lo^{2}n^2. The *Boletus edulis.* [B, 173 (*a*, 35).]

ISSUE, n. I^{2}sh'shu^2. Fr., *i.* 1. A coming forth. 2. The mode of termination, the result, of a process. 3. A chronic discharging ulcer, especially one purposely kept open to act as a counter-irritant.—**I. pea.** See *I.* PEA.

ISTHME (Fr.), n. Est-m'. See ISTHMUS.—**I. du bassin.** The superior strait of the pelvis.—**I. du gosier.** See FAUCES.

ISTHMIAC, adj. I^{2}sth'mi^2-a^{2}k. Lat., *isthmiacus* (from ἰσθμός, a narrow passage). Referring or pertaining to an isthmus. [L, 50 (*a*, 14).]

ISTHMIC, adj. I^{2}sth'mi^{2}k. Lat., *isthmicus* (from ἰσθμός, a narrow passage). See ISTHMIAC.

ISTHMION (Lat.). n. n. I^{2}sth'mi^2-o^{2}n. Gr., ἴσθμιον (from ἰσθμός, a neck or any narrow passage or connection). In the pl., *isthmia* (Gr., τὰ ἰσθμια), the parts about the neck. [Hippocrates (A, 311 [*a*, 21]).]

ISTHMITIS (Lat.), n. f. I^{2}sth-mi(me)'ti^{2}s. Gen., *-it'idos* (*-idis*). From ἰσθμός, a neck (see also *-itis**). Ger., *Entzündung des Rachens, Rachenbräune.* Inflammation of the fauces. [L, 50, 135 (*a*, 39).]

ISTHMIUM (Lat.), n. n. I^{2}sth'mi^2-u^{3}m(u^{4}m). See ISTHMION.

ISTHMOCARPUS (Lat.), adj. I^{2}sth-mo(mo^3)-ka^{3}rp'u^{3}s(u^{4}s). From ἰσθμός, a narrow passage, and καρπός, a fruit. Fr., *isthmocarpe.* In botany, having the fruit constricted at the centre. [B, 38 (*a*, 14).]

ISTHMOCATARRHUS (Lat.), n. m. I^{2}sth-mo(mo^3)-ka^{2}t(ka^{3}t)-a^{3}r'ru^{3}s(ru^{4}s). From ἰσθμός, a neck, and κατάῤῥοος, a flowing down. Ger., *Rachenkatarrh.* Catarrh of the fauces. [L, 50 (*a*, 14).]

ISTHMOCHOLOSIS (Lat.), n. f. I^{2}sth-mo(mo^3)-kol(ch^{2}o^{2}l)-os'i^{2}s. Gen., *-os'eos* (*-is*). From ἰσθμός, a neck, and χόλος, bile. Of Eisenmann, see ANGINA *biliosa.*

ISTHMODES (Lat.), adj. I^{2}sth-mod'ez(as). See ISTHMOID.

ISTHMODYNIA (Lat.), n. f. I^{2}sth-mo(mo^3)-di^{2}n(du^{6}n)'i^2-a^3. From ἰσθμός, a neck, and ὀδύνη, pain. Ger., *Rachenschmerz.* Pain in the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOID, adj. I^{2}sth'moid. Lat., *isthmodes* (from ἰσθμός, a neck, and εἶδος, resemblance). Ger., *rachenähnlich, zum Rachen gehörig.* Resembling or pertaining to the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOPATHIA (Lat.), n. f. I^{2}sth-mo(mo^3)-pa^{2}th(pa^{3}th)-i(e)'a^3. From ἰσθμός, a neck, and πάθος, a disease. Ger., *Rachenleiden.* Any disease of the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOPLEGIA (Lat.), n. f. I^{2}sth-mo(mo^3)-ple(pla)'ji^2(gi^2)-a^3. From ἰσθμός. a neck, and πληγή, a blow. Ger., *Rachenlähmung.* Paralysis of the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOPOLYPUS (Lat.), n. m. I^{2}sth-mo(mo^3)-po^{2}l'i^2(u^6)-pu^{3}s(pus). From ἰσθμός, a neck, and πολύπους, a polyp. Ger., *Rachenpolyp.* A polypus growing from the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOPYRA (Lat.), n. f. I^{2}sth-mo^{2}p'i^{2}r(u^{6}r)-a^3. From ἰσθμός. a neck, and πῦρ. fire. Of Eisenmann, inflammation of the mucous membrane of the fauces. [L, 50, 107 (*a*, 14).] Cf. PYRANGONE.

ISTHMORRHAGIA (Lat.), n. f. I^{2}sth-mo^{2}r-ra(ra^3)'ji^2(gi^2)-a^3. From ἰσθμός, a neck, and ῥηγνύναι, to burst forth. Fr., *isthmorrhagie.* Ger., *Blutfluss im Rachen.* Hæmorrhage from the fauces. [L, 50 (*a*, 14).]

ISTHMOSPASM, n. I^{2}sth'mo-spa^{2}z'm. Lat., *isthmospasmus* (from ἰσθμός, a neck. and σπασμός, spasm). Fr., *isthmospasme.* Ger., *Krampf in der Rachenhöhle.* Spasm of the isthmus faucium. [L, 50 (*a*, 14).]

ISTHMOTYPHUS (Lat.), n. m. I^{2}sth-mo(mo^3)-ti(tu^6)'fu^{3}s(fu^{4}s). From ἰσθμός, a neck, and τῦφος, typhus. See *Gangrenous* ANGINA.

ISTHMUS (Lat.), n. m. I^{2}sth'mu^{3}s(mu^{4}s). Gr., ἰσθμός. Fr., *isthme.* Ger., *Hirnstamm* (2d def.), *Rachenhöhle* (1st def.), *I., Verengerung* (1st def.). 1. Any narrow passage, like that of the fauces. 2. The narrow portion of the brain between the cerebrum and the cerebellum and medulla oblongata. [I, 4 (K).] 3. In botany, one of the depressed or narrowed places separating the joints in articulated fruits. [B, 1, 123 (*a*, 35).]—**Anterior i. of the fauces.** Of Tourtual, the anterior part of the i. of the fauces, situated between the velum, the anterior pillars of the fauces, and the back of the tongue. [L, 31, 332 (*a*, 29).]—**Encephalic i.** See *I.* (2d def.).—**Gyral i.** Lat., *i. gyralis.* The union between the precentral and postcentral gyri occasioned in some brains by the complete interruption of the central fissure on each side. [Wilder (*a*, 39).]—**I. cerebri.** Ger., *Hirnstamm.* See *I.* (2d def.).—**I. cervicis uteri.** See *I. of the uterus.*—**I. encephali.** Fr., *isthme de l'encéphale.* See *I.* (2d def.).—**I. faucium.** Fr., *isthme du gosier.* Ger., *Rachenenge, Racheneingang.* The constriction separating the cavity of the mouth from that of the pharynx ; formed by the velum palati, the pillars of the palate, the tonsils, and the base of the tongue. [A, 385.]—**I. glandulæ thyreoideæ.** The i. of the thyreoid gland. [L, 35 (*a*, 39).]—**I. gyralis.** See *Gyral i.*—**I. gyri fornicati.** A small constriction at the posterior extremity of the gyrus fornicatus, continuous posteriorly with both the gyrus cunei and the lingual lobule. [I, 17 (K).]—**I. hepatis.** See PONS *hepatis.*—**I. naso-oralis.** See *Posterior i. of the fauces.*—**I. of Guyon.** See *I. of the uterus.*—**I. of the brain.** See I. (2d def.).—**I. of the encephalon.** See *I.* (2d def.).—**I. of the Eustachian tube.** See *I. tubæ Eustachii.*—**I. of the Fallopplan tube.** See *I. of the oviduct.*—**I. of the fauces.** See *I. faucium.*—**I. of the fossa ovalis.** See ANNULUS *ovalis.*—**I. of the meatus auditorius.** The narrowest portion of the meatus auditorius, at the margin of the inner third of the osseous portion. [F, 51 (*a*, 29).]—**I. of the oviduct.** Ger., *Verengerung der falloppischen Röhre.* The comparatively narrow and straight mesal half of the oviduct.—**I. of the thyreoid body** (or **gland**). Fr., *isthme de la thyréoïde.* Ger., *Verengerung des schildförmigen Körpers.* A transverse portion of the gland which connects the two lateral lobes near the bottom. [C.]—**I. of the uterus.** Lat., *i. cervicis uteri.* Fr., *isthme utérin* (ou *de l'utérus*). That moderately constricted part which marks the junction of the body with the neck of the organ.—**I. ossis coxæ.** The constriction about the junction of the ilium and pubo-ischiatic bone. [L, 31, 115 (*a*, 29).]—**I. pharyngo-nasalis.** Of Luschka, see *I. faucium posterior.*—**I. pharyngo-oralis.** See *I. faucium anterior.*—**I. prostatæ.** Of Huschke, the median lobe of the prostate. [L, 31 (*a*, 29).]—**I. tubæ Eustachii.** Fr., *isthme du tube d'Eustache.* Ger., *I. der eustachischen Röhre.* The narrowest part of the tube, situated in the cartilaginous portion in front of its point of union with the osseous portion. [F.]—**I. tubæ Falloppii** (seu **uterinæ**). See *I. of the oviduct.*—**I. urethræ.** 1. The membranous portion of the male urethra. 2. In the female, the least dilatable portion of the urethra, situated somewhat above the middle of its course. [L, 7, 115, 332 (*a*, 29).]—**I. uteri.** See *I. of the uterus.*—**I. Vieussenii.** See ANNULUS *ovalis.*—**Müller's i.** Fr., *isthme de Müller.* Of Müller, the os uteri internum. Cf. *Müller's* RING.—**Posterior i. of the fauces.** Of Tourtual, the posterior part of the i. faucium, elliptical in shape, its long diameter vertical, bounded by the velum, the posterior pillars of the fauces, and the epiglottis. [L, 31, 332 (*a*, 29).]

ISURÉE (Fr.), n. E-su^6-ra. See ISOUREA.

ISURET, n. I^{2}s-u^{2}r'e^{2}t. Formylimide hydroxylamide. CH.-NH.N(OH).H = CON_2H_4, formyldiamine or formylimide amide in which a molecule of hydroxyl (OH) replaces an atom of hydrogen. It is thus isomeric with urea, hence its name. It occurs as prismatic crystals melting at about 105° C., and is a strongly alkalin base. [B, 2, 4.]

ISURETINE, n. I^{2}s-u^{2}r'e^{2}t-i^{2}n. Fr., *isurétine.* Ger., *I.* See ISURET.

ISUVITIC ACID, ISUVITINIC ACID, n's. I^{2}s-u^2-vi^{2}t'i^{2}k, -vi^{2}t-i^{2}n'i^{2}k. See ISOUVITIC ACID.

ITACONATE, n. I^{2}t-a^{2}k'o^{2}n-at. Fr., *i.* Ger., *Itaconat.* A salt of itaconic acid. [*a*, 38.]

ITACONIC ACID, n. I^{2}t-a^{2}k-o^{2}n'i^{2}k. Fr., *acide citricique, acide itaconique.* Ger., *Itaconsäure.* A crystalline body, $C_5H_6O_4 = CH_2 : C\left\langle\begin{matrix}CO.OH\\CH_2.CO.OH\end{matrix}\right.$, acting as a dibasic acid, and derived, along with aconitic acid, from the dry distillation of citric acid. [B, 3, 4.]

ITAMO REAL [Mex. Ph.] (Sp.), n. E'ta^3-mo ra-a^{3}l'. The *Passiflora dictamnus.* [A, 447 (*a*, 21).]

ITCH, n. I^{2}ch. A.-S., *gictha* (1st def.), *gicenes* (2d def.). Gr., κνησμός (2d def.). Fr., *gale* (1st def.), *démangeaison* (2d def.). Ger., *Krätze* (1st def.), *Jucken* (2d def.). 1. Scabies. 2. Pruritus. [G.]—**Animal i.** The mange. [*a*, 40.]—**Army i.** A form of scabies thought at one time to be peculiar to camp and army life, but now conceded to differ in no respect from ordinary scabies save in extent. [Duhring (*a*, 40).]—**Bakers' i.** Fr., *gale des boulangers.* Ger., *Bäckerkrätze.* An eczema of the hands in bakers, due to their occupation. [G.]—**Barbers' i.** Sycosis, especially sycosis parasitaria. [G.]—**Bedouin i.** A form of lichen tropicus in which the papules proceed to vesiculation. [*a*, 40.]—**Bricklayers' i.** Fr., *gale des maçons.* Ger., *Maurerkrätze.* An eczema of the hands, especially of the impetiginous form, in bricklayers, due to exposure of the hands to lime. [G.]—**Cat-i., Cattle-i.** Fr., *gale du chat* (ou *du bœuf*). See SCABIES *ferina.*—**Cow-pox i.** Of Gölis, a cutaneous eruption consisting of isolated vesicles filled with sero-purulent fluid and appearing after the fourteenth day from vaccination. [*a*, 40.]—**Drunkards' i.** An intense itching, attended with a slight papular eruption, seen in old people addicted to the excessive use of alcohol. [*a*, 40.]—**Frost i.** See PRURITUS *hiemalis.*—**Grocers' i.** Fr., *gale des épiciers.* Ger., *Gewürzkrämerkrätze.* An eczema of the hands to which grocers are exposed from handling flour, sugar, and the like. [G.]—**I.-bulb.** The *Drimia ciliaris.* [B, 18 (*a*, 35).]—**I.-tree.** See the major list.—**I.-weed.** The *Veratrum viride.* [B, 175 (*a*, 35).]—**Mangy i.** A desquamative, contagious disease supposed to be produced by contact with animal mange. [*a*, 40.]—**Lumbermen's i.** See *Prairie i.*—**Mad i.** A disease, the pathology of which is unknown, said to occur only in female cattle, and consisting at first of severe itching of the nates and hind feet, which precedes choreic twitching, opisthotonus, paralysis, and death. Elevated temperature, rapid respiration, and feeble pulse accompany the disease. ["Jour. of Comp. Med. and Vet. Arch.," July, 1890, p. 386 (*a*, 40).]—**Norwegian i.** See RADZYGE.—**Prairie i.** Fr., *gale des prairies.* Syn. : *lumbermen's i., Texas mange, Ohio scratches, swamp i.* Pruritis hiemalis occurring in the autumn and spring, and due to coarse, cheaply died woolen garments such as are worn by farmers, miners, and lumbermen. [Hyde, Payne (*a*, 40).]—**Rabbit i.** Fr., *gale du lapin.* See SCABIES *ferina.*—**Rank i.** Scabies papuliformis. [Copeland (*a*, 40).]—**Rocky i.** Scabies purulenta. [Copeland (*a*, 40).]—**Scorbutic i.** Scabies cachectica. [*a*, 40.]—**Sheep-i.** Fr., *gale du mouton.* See SCABIES *pecorina.*—**Sugar-bakers' i.** An eczema of the hands, especially of the impetiginous form, occurring in sugar-bakers from the action of sugar on the skin. [G.]—**Swamp i.** See

Prairie i.—**Swine-i.** Fr., *gale du porc.* See SCABIES *ferina.*—**Warehousemen's i.** See *Grocers' i.*—**Washerwoman's i.** See ECZEMA *lolricum.*—**Watery i.** See SCABIES *lymphatica.*

ITCHING, adj. and n. I^{2}ch'i^{2}n^2. 1. (Adj.) attended with pruritus. 2. (N.) pruritus.

ITCH-TREE, n. I^{2}ch'tre. The *Oncocarpus vitiensis.* [B, 185 (*a*, 35).]—**Queensland i.-t.** The *Davidsonia pruriens.* [B, 275 (*a*, 35).]

ITEA (Lat.), n. f. I^{2}t(et)'e^2-a^3. From ἰτέα, a willow. Fr., *itéa, ité, itée.* A genus of saxifragaceous trees and shrubs of the tribe *Escalloniecæ,* growing in North America, Japan, China, Java, and the Himalayas. The *Ileoideæ* are an order of the *Monochlamydeæ,* consisting of the families *Salicinæ* and *Balsamifluæ.* [B, 19, 34, 42, 170 (*a*, 24, 35).]—**I. rosmarinifolia, I. rosmarinus.** See CEDRELA *rosmarinus.*

ITER (Lat.), n. n. I(i^2)'tu^{5}r(te^{2}r). Gen., *itin'eris.* From *ire,* to go. A road, way, passage. [L, 50 (*a*, 14).]—**I. ad infundibulum.** A small opening in the floor of the third ventricle of the brain, communicating with the infundibulum. [I, 3 (K).]—**I. ad quartum ventriculum.** See AQUEDUCT *of Sylvius.*—**I. ad tertium ventriculum.** See *I. ad infundibulum.*—**I. a tertio ad quartum ventriculum.** See AQUEDUCT *of Sylvius.*—**I. a palato ad aurem.** See *Eustachian* TUBE.—**I. chordæ anterius.** The anterior canal in the outer wall of the tympanic cavity for the exit of the chorda tympani; the canal of Huguier. [F.]—**I. chordæ posterius.** The posterior canal in the outer wall of the tympanic cavity, which gives entrance to the chorda tympani. [F.]—**I. dentis.** See GUBERNACULUM *dentis.*—**I. femineum.** The perinæum in the female. [L, 50 (*a*, 14).]—**I. seminarium.** See VAS *deferens.*—**I. urinæ, I. urinarium.** The urinary passages. [L, 50 (*a*, 14).]

ITERUM (Lat.), n. n. I^{2}t(et)'e^{2}r-u^{3}m(u^{4}m). See ABDOMEN.

ITHAGENES (Lat.), adj. I^{2}th(eth)-a^{2}j(a^{3}g)'e^{2}n-ez(as). Gr., ἰθαγενής (from ἰθύς, straight, and γένος, a race). 1. Of Hippocrates, genuine (said of a product of conception, as distinguished from a mole or other false conception). [A, 325.] 2. Autochthonous. [L, 50 (*a*, 14).]

ITHYCYPHES (Lat.), **ITHYCYPHOS** (Lat.), adj's. I^{2}th(eth)-i^2(u^6)-si(ku^6)'fez(fas), -fo^{2}s. Gr., ἰθυκυφής, ἰθύκυφος (from ἰθύς, straight, and κυφός, humpbacked). Having a backward angular curvature of the spinal column. [A, 325.]

ITHYLORDOS (Lat.), **ITHYLORDUS** (Lat.), adj's. I^{2}th(eth)-i^2(u^6)-lo^{2}rd'o^{2}s, -u^{3}s(u^{4}s). Gr., ἰθύλορδος (from ἰθύς, straight, and λορδός, bent backward). Of Hippocrates, having a forward angular curvature of the spinal column. [A, 325.]

ITHYPHALLICUS (Lat.), adj. I^{2}th(eth)-i^2(u^6)-fa^{2}l(fa^{3}l)'li^{2}k-u^{3}s(u^{4}s). Gr., ἰθυφαλλικός (from ἰθύς, straight, and φαλλός, the penis). Fr., *ithyphalle.* Pertaining to or having an erection of the penis. [A, 322.]

ITHYPHYLLOUS, adj. I^{2}th-i^2-fi^{2}l'u^{3}s. From ἰθύς, straight, and φύλλον, a leaf. Fr., *ithyphylle.* Having straight leaves. [B, 38 (*a*, 14).]

ITHYSCOLIOS (Lat.), **ITHYSCOLIUS** (Lat.), adj's. I^{2}th(eth)-i^2(u^6)-skol(sko^{2}l)'i^2-o^{2}s, -u^{3}s(u^{4}s). Gr., ἰθυσκόλιος (from ἰθύς, straight, and σκολιός, crooked). Of Hippocrates, curved antero-posteriorly (said of the spinal column). [A, 325.]

ITIANDENDROS (Lat.), n. m. I^{2}t-i^2-a^{2}n(a^{3}n)-de^{2}n'dro^{2}s. An old name for the *Equisetum arvense.* [B, 121.]

ITINERARIUM (Lat.), n. n. I(i^2)-ti^{2}n-e^{2}r-a(a^3)'ri^2-u^{3}m(u^{4}m). From *iter,* a way. See CONDUCTOR and DIRECTOR.

ITIO IN PARTES (Lat.), n. f. I^{2}sh(i^{2}t)'i^2-o i^{2}n pa^{3}rt'ez(as). The movement of the majority of the white and red blood-corpuscles in different parts of the blood stream in the smallest vessels, the red corpuscles being mostly in the centre and the white ones along the walls of the vessel. [J, 19, 57.]

ITMOITMOAN, n. A plant found in the Philippine Islands, referred to the *Apocynaceæ,* used in leprosy. [B, 121 (*a*, 35).]

ITSHONGWE, n. A plant growing in South Africa, which is used by the Kafir tribes for various diseases, but especially for the fevers of the country. ["Am. Jour. of Pharm.," Sept., 1886 (*a*, 39).]

ITTRIUM (Lat.), n. n. I^{2}t'tri^2-u^{3}m(u^{4}m). See YTTRIUM.

IULACÉ (Fr.), adj. E-u^6-la^3-sa. From *julus,* a catkin. See JULACEOUS.

IULIFLORE (Fr.), adj. E-u^6-le-flor. From *julus,* a catkin, and *flos,* a flower. See JULIFLOROUS.

IULOPHOROUS, adj. I^2-u^2-lo^{2}f'o^{2}r-u^{3}s. From ἴουλος, an ament, and φορεῖν, to bear. Bearing juli; amentaceous. [*a*, 35.]

IVA (Lat.), n. f. I(e)'va^3(wa^3). Fr., *i., ive.* 1. The *Achillea moschata.* 2. Marsh elder, highwater shrub, a genus of composite herbs or shrubs, by Bentham and Hooker referred to the tribe *Helianthoideæ.* The *Ivaceæ* of Reichenbach are a subdivision of the *Ambrosiaceæ,* consisting of this single genus. The *Iveæ* of Cassini are a division of the *Ambrosieæ,* containing *Clibadium* (subsequently excluded) and *Iva*; or, of De Candolle, a division of the *Melampodineæ,* consisting of *Iva, Euphrosyne,* and several other genera; or, of Reichenbach, a subdivision of the *Dispositæ*; or, of Lindley, a subtribe of the *Senecionideæ,* consisting of the genera of De Candolle and, in addition, *Gymnogyne.* [B, 5, 19, 34, 42, 170, 173 (*a*, 35).]—**Esprit d'i.** (Fr.). See under ACHILLEA *moschata.*—**Herba ivæ.** The flowering plant of *Ajuga chamæpitys.* [A, 319 (*a*, 21).]—**I. arbrisseau** (Fr.). See *I. frutescens.*—**I. artetica** (It.), **I. arthritica** (Lat.), **I. commune** (It.). See AJUGA *chamæpitys.*—**I. frutescens.** Fr., *i. arbrisseau, quinquina du Mexique.* A shrubby species found in North America on the borders of salt marshes. In Mexico it is considered a febrifuge, and is known as *acapatli* or *quinquina del país.* [B, 34, 173 (*a*, 24); B, 88 (*a*, 39).]—**I. moschata.** The *Ajuga iva.* [B, 180 (*a*, 24).]—**I. pecanga.** Sarsaparilla. [L, 84.]—**I. oil.** See IVAOL.—**Liqueur d'i.** (Fr.). See under ACHILLEA *moschata.*

IVAIN, n. I'va^3-i^{2}n. Fr., *i., ivaine.* A bitter substance obtained from the alcoholic extract of *Achillea moschata.* Its empirical formula is $C_8H_{14}O$, and its rational formula perhaps $C_{24}H_{42}O_3$. It is a yellow mass, insoluble in water, soluble in alcohol. [B, 2, 93; "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 39).]

IVÁNDA (Hung.), n. I^2'va^{3}n-da^4. A place in Hungary where there is a feebly thermal alkaline spring. [L, 30, 49, 87 (*a*, 14).]

IVAOL, n. I'va^3-o^{2}l. Ger., *I.* A liquid, $C_{12}H_{20}O$, or $C_{24}H_{40}O_2$, or $C_{20}H_{40}O_2$, obtained from the distillation of iva-oil derived from the *Achillea moschata*; a thick, oily fluid, of agreeable odor and pungent taste, boiling at 170° to 210° C. [B, 93 (*a*, 14).]

IVE (Fr.), n. Ev. See IVA.

IVETTE (Fr.), n. E-ve^{2}t. Of the Fr. Cod., see AJUGA *chamæpitys.*—**I. musquée** [Fr. Cod.] (Fr.). See AJUGA *iva.*—**Petite i.** See *I.*

IVOIRE (Fr.), n. E-vwa^{3}r. See IVORY, DENTIN, and CORNU CERVI.—**Esprit d'i.** See *Spiritus* CORNU CERVI.

IVORY, n. I'vo-ri^2. Gr., ἐλέφας. Lat., *ebur.* Fr., *ivoire.* Ger., *Elfenbein.* 1. The dense, white, elastic substance of the tusks of the elephant, etc. 2. See DENTIN.—**Decalcified i.** I. which has been deprived of its inorganic constituents by the action of an acid. It shrinks when dried and expands when wet. Used to dilate the cervix. [L, 20 (*a*, 39).]—**I.-nuts.** The nuts of the *Phytelephas macrocarpa* and of *Sagus amicarum.* [B, 19, 185 (*a*, 24).]—**Vegetable i.** The nuts of *Phytelephas macrocarpa* and of *Sagus amicarum.* [B, 19, 185, 275 (*a*, 35).]

IVRAIE (Fr.), n. E-vre^2. The *Lolium temulentum.* [B, 19, 173, 275 (*a*, 33).]

IVRESSE (Fr.), n. E-vre^{2}s. Lat., *ebrietas.* See DRUNKENNESS (1st def.).—**I. apoplectique.** Alcoholic insensibility coming on rapidly with frequent, stertorous respiration, and feeble, dilated, or unequal pulse; only to be distinguished from cerebral hæmorrhage by the odor of alcohol. [L, 87 (*a*, 40).]—**I. bromique.** Bromism. [*a*, 40.]—**I. convulsive.** Drunkenness associated with general convulsions and maniacal delirium. [L, 20, 87 (*a*, 40).]—**I. iodique.** Iodism. [*a*, 40.]—**I. quinique.** Intoxication from an overdose of quinine. [D, 74.]

IVROGNE (Fr.), n. E-vron-y'. 1. See DRUNKARD. 2. The *Lychnis dioica.* [B, 121.]

IVROGNERIE (Fr.), n. E-vron-ye^2-re. See DRUNKENNESS (2d def.).

IVY, n. I'vi^2. Gr., κισσός. Lat., *hedera.* Fr., *lierre.* Ger., *Epheu.* The genus *Hedera,* especially *Hedera helix.* [B, 19, 34, 185, 275 (*a*, 36).]—**American i.** The *Ampelopsis quinquefolia.* [B, 19, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," vii.]—**American poison i.** The *Rhus toxicodendron.* [B, 34.]—**Barren i.** The small-leaved variety of *Hedera helix.* [A, 505 (*a*, 21).]—**Big i.** 1. See KALMIA *latifolia.* 2. A species of the genus *Hedera* (*Hedera helix colchica*) growing in Asia. [A, 35.]—**Black i.** The *Hedera helix.* [A, 505 (*a*, 21).]—**Cape i.** The *Senecio macroglossus.* [B, 275 (*a*, 35).]—**Chinese i.** The *Parechites Thunbergii.* [B, 185, 275 (*a*, 35).]—**Climbing i.** The *Rhus radicans*; particularly the low variety common in the eastern United States, the high shrubby variety being poisonous oak. [B; "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 39).]—**Coliseum i.** See *Kenilworth i.*—**Common i.** The *Hedera helix.* [*a*, 35.]—**Conserve of ground-i.** A preparation consisting of 1 part of the flowering herb of ground-i. and 2 parts of white sugar triturated together and heated over the water-bath till the sugar is melted; or of 1 lb. of ground-i. leaves and 2 or 3 lbs. of white sugar triturated together. [B, 97 (*a*, 38).]—**Creeping i.** The *Hedera helix.* [A, 505 (*a*, 21).]—**Crimean i.** The *Hedera helix taurica.* [B, 275 (*a*, 35).]—**East Indian I.** See *Indian i.*—**English i.** The *Hedera helix.* [*a*, 35.]—**Essence of ground-i.** A preparation made by digesting ground-i. and spirit of juniper, expressing, and filtering. [B, 97 (*a*, 38).]—**European i.** The genus *Hedera.* [B, 34 (*a*, 35).]—**Five-leaved i.** See AMPELOPSIS *quinquefolia.*—**German i.** The *Senecio mikanoides.* [B, 19, 275 (*a*, 35).]—**German yellow i.** The *Senecio scandens.* [B, 275 (*a*, 35).]—**Giant i.** The *Hedera helix colchica.* [B, 275 (*a*, 35).]—**Gold-blotched i.** The *Hedera helix aureo-maculatum.* [B, 275 (*a*, 35).]—**Gout i.** The *Ajuga chamæpitys.* [A, 505 (*a*, 21); B, 275 (*a*, 24).]—**Grass-i. of Australia.** The *Pericampylos incanus.* [B, 275 (*a*, 35).]—**Ground-i.** 1. The *Nepeta glechoma.* 2. The *Hedera helix.* 3. The *Convolvulus sepium.* 4. The *Ajuga chamæpitys.* 5. The *Vinca minor.* [A, 505 (*a*, 21).]—**Indian i.** The *Scindapsus pertusus* and other species. [B, 275 (*a*, 35).]—**Irish i.** The *Hedera helix canariensis.* [B, 275 (*a*, 35).]—**I. berries.** The fruits of *Hedera helix.* [B, 180 (*a*, 24).]—**I. family.** The *Araliaceæ.* [B, 185 (*a*, 35).]—**I.-gum.** Lat., *gummi (-resina) hederæ, resina hederæ.* Fr., *hédérie.* Ger., *Epheugummi, Epheuharz.* A gum obtained in southern Europe and in Turkey by incising the bark of old i. plants (*Hedera helix*); formerly used as a stimulant and emmenagogue, and said to be antodontalgic. [B, 5, 19, 173, 180 (*a*, 24).]—**I.-tod.** An i.-plant having a large, bushy head. [A, 511 (*a*, 35).]—**I.-tree.** See *New Zealand i.*—**I'wort.** The *Linaria cymbalaria*; in the pl., the *Araliaceæ.* [B, 19, 185, 275 (*a*, 35).]—**Kenilworth i.** The *Linaria cymbalaria.* [B, 275 (*a*, 35).]—**Mexican i.** The *Cobœa scandens.* [B, 275 (*a*, 35).]—**Native i. of Australia.** The *Muhlenbeckia adpressa.* [B, 275 (*a*, 35).]—**New Zealand i., Otago i.-tree.** The *Panax Colensoi.* [B, 275 (*a*, 35).]—**Palmate-leaved i.** The *Hedera helix palmata.* [B, 275 (*a*, 35).]—**Parlor i.** The *Mikania scandens.* [B, 275 (*a*, 35).]—**Poets' i.** The *Hedera helix poetica.* [B, 275 (*a*, 35).]—**Poison i.** See *American poison i.*—**Prickly i.** The *Smilax aspera.* [B, 275 (*a*, 35).]—**Queensland i.** The *Hedera* (*Irvingia*) *australiana.* [B, 275 (*a*, 35).]—**Small i.** The *Hedera helix.* [A, 505 (*a*, 21).]—**Variegated Japan i.** The *Hedera helix rhombea variegata.*

[B, 275 (a, 35).]—**Virginian I.** The *Menispermum virginicum.* [A, 5, 11 (a, 35).]—**Water-I.** The *Ranunculus hederaceus.* [B, 275 (a, 35).]—**West Indian I.** The *Marcgravia umbellata.* [B, 185, 275 (a, 35).]—**Yellow-leaved Roman I.** The *Hedera helix chrysocarpa.* [B, 275 (a, 35).]—**Yellow German I.** The *Senecio scandens.* [B, 275 (a, 35).]

IWARANCUSA (Lat.), n. f. I(e)-wa[3]r-a[3]n(a[3]n[3])-ku[3](ku)'sa[3]. Hind., *iwarankoosa.* Ger., *Iwarankusa.* The *Andropogon I.* and the *Anatherum muricatum.* [B, 180 (a, 35).]—**Rhizoma iwarancusæ.** The rhizome of *I.*; employed in India as an antispasmodic, diuretic, and diaphoretic in cholera. [A, 319 (a, 21).]

IWARANKOSA (Hind.), n. The *Andropogon iwarancusa.* [B, 172 (a, 24).]—**I.-Bartgras** (Ger.). See *I.*

IWONICZ, n. A place in the province of Galicia, near Krosno, Austria, where there are several saline, chalybeate, and gaseous springs. [L, 30, 40, 87 (a, 30).]

IXIA (Lat.), n. f. I[2]x'i[2]-a[3]. Gr., ἰξία. Fr., *ixie.* 1. The genus *Viscum.* 2. Bird-lime. 3. A sticky slime. 4. See Varix. 5. African corn lily; a genus of iridaceous bulb-tuberous plants, indigenous to South Africa. The *Ixiaceæ* of Elkton are an order of the *Ensatæ*, comprising *I.*, *Hesperantha*, *Sparaxis*, and other genera. The *Ixieæ* (Fr., *ixiées*) of Dumortier and others are a tribe of the *Irideæ.* [B, 19, 42, 170, 275 (a, 35); L, 50 (a, 14).]

IXINE (Lat.), n. f. I[2]x-i(e)'ne(na). Gen., *-in'es.* Gr., ἰξίνη. 1. Of Hill, the genus *Cirsium.* 2. Of Theophrastus, the *Carlina acaulis.* [B, 121 (a, 35).]

IXIOMYELITIS (Lat.), n. f. I[2]x-i[2]-o(o[2])-mi(mu[4])-e[2]l-i(e)'ti[2]s. Gen., *-it'idos* (*-idis*). See Osphyomyelitis.

IXODES (Lat.), adj. I[2]x-od'es(as). Gr., ἰξώδης (from ἰξός, the mistletoe, and εἶδος, resemblance). Parasitic; as a n., a genus of the *Acaridæ* including the ticks. [G.]—**I. ægyptius.** An African species parasitic on cattle. [L, 87 (a, 30).]—**I. algeriensis.** A species found on cattle in France, and coming from Algeria. [L, 87 (a, 30).]—**I. americanus, I. nigrus.** A species found in South America, attacking man and beasts. [L, 87 (a, 30).]—**I. reticulatus.** The *Acarus reduvius* of Schrank; an ash-colored, spotted species parasitic on oxen. [L, 28 (a, 30).—**I. bovis.** The cattle-tick; found in the Western States and in Central America; said to be allied to the *I. ricinus.* [G.]—**I. reduvius.** A form which resembles *I. ricinus* and occasionally attacks man. [G.]—**I. ricinus.** Fr., *tique.* Ger., *Hundszecke, Holzbock, Zecke.* The wood-tick; a minute oval or egg shaped creature of a yellowish-red color which attaches itself to the human skin by means of a sucking apparatus and becomes distended with blood till it reaches the size of a bean. In this condition it remains hanging to the skin often for several days. If torn away, the head is left sticking in the skin, giving rise to inflammation. [G.] See Acarus *ricinus.*—**I. unipunctatus.** A species of tick found in the United States which attaches itself to the human skin. [Packard (G).]

IXORA (Lat.), n. f. I[2]x-o'ra[3]. Fr., *I.*, *ixore.* A genus of rubiaceous plants of the *Ixoreæ* (Fr., *ixorées*), which are a tribe of the *Rubiaceæ.* [B, 19, 42, 104, 180 (a, 35).]—**I. à grandes fleurs** (Fr.). See *I. coccinea.*—**I. bandacca, I. bandhuca.** An East Indian species the root of which has long been used in intermittent fevers and hemoptysis, and externally in various skin diseases, and has been recommended for diarrhœa and dysentery. ["Am. Jour. of Pharm.," June, 1882, p. 302; B, 180 (a, 35).]—**I. coccinea.** Fr., *bois de pintade, i. à grandes fleurs.* A species found in the East Indies, China, and Ceylon, having the same properties as *I. bandhuca*, with which it is by some identified. ["Am. Jour. of Pharm.," June, 1882, p. 302; B, 19, 173, 180 (a, 35).]—**I. congesta.** A species used like *I. lanceolata.* [B, 180 (a, 35).]—**I. fulgens.** See *I. lanceolata.*—**I. grandiflora.** See *I. coccinea.*—**I. lanceolata.** The *I. fulgens* of Roxburgh, a species found in the Moluccas, where the root, which has an acrid, unpleasant taste, is used in toothache. [B, 180 (a, 35).]—**I. tenuiflora.** A species used like *I. lanceolata.* [B, 180 (a, 35).]

IXOS (Lat.), n. m. I[2]x'o[2]s. Gr., ἰξός. Bird-lime prepared from the mistletoe berry. [L, 50 (a, 21, 45).]

IXTLE, n. In Mexico, many species of *Agave* which furnish an alcoholic beverage. [B, 121 (a, 35).]

IXUS (Lat.), **IXYA** (Lat.), n's m. and f. I[2]x'u[3]s(u[4]s), -i[2](u[4])-a[3]. The lumbar portion of the body. [L, 50 (a, 14).]

IXYOMYELITIS (Lat.), n. f. I[2]x-i[2](u[4])-o(o[2])-mi(mu[4])-e[2]l-i(e)'ti[2]s. Gen., *-it'idos* (*-idis*). From ἰξύς, the waist, and μυελός, marrow (see also *-itis*). See Ischiomyelitis.

IXYS (Lat.), n. m. I[2]x'i[2]s(u[4]s). Gen., *ix'yos* (*-is*). Gr., ἰξύς. The waist, the loins, the small of the back. [A, 322.]

IZAKHARA (Ar.), n. See Andropogon *laniger.*

IZTAC-COANENE-PILLI, n. In Mexico, a menispermaceous plant thought to be the *Cissampelos pareira.* [B, 121 (a, 35).]

IZTAUHYATL [Mex. Ph.] (Mex.), n. See Artemisia *mexicana.*

J

JABA (Sanscr.), n. The *Hibiscus rosa chinensis.* [B, 406 (a, 35).]

JABALCUZ (Sp.), n. Ha[3]-ba[3]l-kuth[3]'. See Jaen.

JABES (Ar.), n. An old name for the *Hyssopus officinalis.* [B, 121 (a, 35).]

JABONERA (Sp.), n. Ha[3]-bo-na'ra[3]. The *Saponaria officinalis.* [B, 88, 92 (a, 30).]

JABORA (Ar.), n. Fr., *j.* The *Mandragora officinalis.* [B, 88, 92 (a, 30).]

JABORANDI, n. Ja[3]b-o-ra[3]n'di. Lat., *j.* Fr., Ger., It., Sp., *j.* 1. A name for numerous plants possessing sialagogue and sudorific properties. Originally, of Piso, the *Monniera trifolia*, and in Brazil and elsewhere, the *Serronia j.*, *Piper reticulatum*, *Piper citrifolium*, *Piper nodulosum*, *Artanthe mollicoma*, *Herpestis monniera*, and *Xanthoxylum elegans.* More recently, the *Pilocarpus pinnatifolius.* 2. The leaves of several species of *Pilocarpus* (q. v. [1st def.]). Of the Fr. Cod., see Pilocarpus (2d def.). [A, 447, 487 (a, 21); B, 5, 18, 77 (a, 35); B, 88 (a, 30); B, 245; "N. Y. Med. Jour.," May 4, 1889, p. 491.]—**Elixir de j.** [Mex. Ph.] (Sp.). See *Elixir de* pilocarpo *pinnato.*—**Extracto alcohólico de j.** [Mex. Ph.] (Sp.). A preparation made by extracting 1 part of j. in medium fine powder with 6 parts of 60-per-cent. alcohol. [A, 447 (a, 21).]—**Extract of j., Extractum j.** Fr., *extrait de j.* [Fr. Cod.]. A preparation made by exhausting j.-leaves with somewhat diluted alcohol and bringing to the consistence of a soft [Fr. Cod.], thick [Br. Ph., Belg. Ph.] extract. [B, 95 (a, 38).]—**Extrait liquide de j.** (Fr.). See *Extractum* pilocarpi *fluidum.*—**Fluid extract of j.** Fr., *extrait liquide de j.* Ger., *flüssiges J'extrakt.* See *Extractum* pilocarpi *fluidum.*—**Folia j.** See Pilocarpus (2d def.).—**Infusion of j., Infusum j.** [Br. Ph.]. Fr., *tisane de j.* [Fr. Cod.]. Sp., *infusion de j.* A preparation made by infusing 1 part of j.-leaves with 20 parts [Br. Ph.], 60 [Sp. Ph.], or 100 [Fr. Cod.] of boiling water for half an hour and straining. [B, 95 (a, 38).]—**J'blätter** (Ger.). See Pilocarpus (2d def.).—**J. bravo.** The *Piper j.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J. do mato** (Port.). The *Serronia j.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J. do Rio** (Port.). In Brazil, the *Artanthe mollicoma.* [B, 121 (a, 35).]—**J. euckia glaucescens.** The *Piper nodulosum.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J. euckia reticulata.** The *Piper reticulatum.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J.-leaves.** Lat., *folia j.* Ger., *J'blätter.* See Pilocarpus (2d def.).—**J. mano** (Port.). In Brazil, the *Artanthe mollicoma.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J. of Brazil.** See *J.* (1st def.).—**J. of Piso.** See *J.* (1st def.).—**J. of Riedel.** The leaves and bark of *Xanthoxylum elegans.* ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 30).]—**J. plant.** See *J.* (1st def.).—**Jarabe de j.** [Mex. Ph.] (Sp.). See *Syrupus de* pilocarpo *pinnato.*—**Paraguay j.** The *Piper j.* ["Proc. of the Am. Pharm. Assoc.," xxiii (a, 30).]—**Pernambuco j.** Probably the *Pilocarpus pinnatus.* ["Proc. of the Am. Pharm. Assoc.," xxiii (a, 30).]—**Poudre de j. (feuille)** [Fr. Cod.]. A preparation made by drying j.-leaves at a temperature of 25° C., pounding in an iron mortar, and sifting through a 120 silk sieve. [B, 95 (a, 38).]—**Syrupus j.** See *Syrupus de* pilocarpo *pinnato.*—**Tinctura j.** [Br. Ph., Belg. Ph., Russ. Ph.], **Tincture of j.** Fr., *teinture de j.* [Fr. Cod.]. Sp., *tintura alcohólica de j.* [Sp. Ph.]. A preparation made by treating 5 oz. of j.-leaves, in No. 40 powder, in a percolator, after two days' maceration, with alcohol enough to make 20 fl. oz. of tincture [Br. Ph.]; or by macerating 1 part of j.-leaves with 5 parts of dilute alcohol (60 per cent. [Fr. Cod., Belg. Ph., Sp. Ph.], or 70 per cent. [Russ. Ph.]) for 3 days [Belg. Ph.], 5 days [Russ. Ph.], or 10 days [Fr. Cod., Sp. Ph.]. [B, 95 (a, 38).]—**Tisane de j.** See *Infusum j.*

JABORANDINE, n. Ja[3]b-o-ra[2]nd'en. Lat., *jaborandina.* Ger., *Jaborandin.* See Pilocarpine.

JABORIC ACID, n. Ja[3]b-o[2]r'i[2]k. A curdy mass, $C_{19}H_{24}N_{2}O_{5}Ag.AgNO_{3}$, resembling jaborine in appearance, but very soluble in water; prepared from pilocarpidine by precipitating with an excess of silver nitrate. ["Proc. of the Am. Pharm. Assoc.," xxxv (a, 30).]

JABORIDINE, n. Ja[3]b-o[2]r'i[2]d-en. Ger., *Jaboridin.* An amorphous base, probably $C_{10}H_{12}N_{2}O_{3} = C_{10}H_{14}N_{2}O_{2} - H_{2} + O$, an oxidation product of pilocarpidine; said to be identical with the pilocarpine of Parodi, and with the base obtained by Chastaing by the oxidation of pilocarpine. [E. Harnack, "Ctrlbl. f. d. med. Wssnsch.," June 13, 1885, p. 418 (B); Harnack's "Gaz. méd. de Paris," 1885, No. 42; "Thérap. gaz., Feb., 1886, p. 142; "Lancet," Oct. 31, 1885, p. 821.]

JABORINE, n. Ja[3]b'o[2]r-en. A colorless, amorphous alkaloid, $C_{11}H_{16}N_{2}O_{3}$, prepared by heating a concentrated acid solution of pilocarpine; having properties much like those of atropine. "Proc. of the Am. Pharm. Assoc.," xxix (a, 30).]

JABOROSA (Lat.), n. f. Ja(ya[3])-bo-ro'sa[3]. Fr., *jaborose.* Of Jussieu, a genus of the *Solaneæ*, typical of the *Jaboroseæ*, which are a tribe of the *Solanaceæ.* [B, 38, 48 (a, 14); B, 170 (a, 24).]—**J. runcinata.** The *Himeranthus runcinatus.* [B, 107 (a, 35).]

JABOT (Fr.), n. Zha[3]-bo. 1. See Isolavres. 2. The dilatation produced by a foreign body engaged in the œsophagus. 3. Of the veterinarians, a congenital dilatation of the œsophagus just above the diaphragm. [L, 30, 41 (a, 14).]

JABROL (Ar.), n. Of Avicenna, the root of *Mandragora silvestris*, from its resemblance to the human form.

JABUTICABA, n. In Brazil, the *Eugenia cauliflora.* [B, 121 (a, 35).]

JACA (Lat.), n. f. Ja(ya^3)'ka^3. 1. In Brazil, the seed of *Thevetia neriifolia.* 2. In the East Indies, the *Artocarpus integrifolia.* 3. Of Endlicher, a section of the genus *Artocarpus.* [B, 19, 121, 275 (α, 35); "Proc. of the Am. Pharm. Assoc.," xxxiii (α, 39).]

JACAPE, n. A kind of grass growing in Brazil and Santo Domingo. The root-fibres are bound round the members of those bitten by serpents, to prevent the absorption of the venom. [B, 88 (α, 39).]

JACARANDA (Lat.), n. f. Ja^{2}k(ya^{3}k)-a^{2}r(a^{3}r)-a^{2}nd(a^{3}nd)'a^3. Ger., *Jakaranda.* Of Jussieu, a genus of the *Jacarandeæ* (Fr., *jacarandées*), which are a tribe of the *Bignoniaceæ.* [B, 19, 42, 77, 180, 185 (α, 35).]—**J. bahamensis.** A Brazilian species the leaves of which are mildly astringent. [B, 215; B, 173 (α, 35).]—**J. brasiliana.** A species found in Brazil. The wood (Fr., *bois néphrétique* [*noir*]) is used as a sudorific; the fruit in pectoral complaints, and in decoction as a digestive tonic; and the pulp of the unripe fruit as a soap. [B, 173, 180 (α, 35).]—**J. cabunna.** In Brazil, the *Myrospermum erythroxylum.* [B, 121 (α, 35).]—**J. cærulea.** See *J. bahamensis.*—**J. copaia.** See *J. procera.*—**J. echinata.** A species found in the West Indies and South America, yielding a spurious (or yellow) sarsaparilla. [B, 180 (α, 35).]—**J. lancifoliata.** A species growing in Colombia, by Maisch believed to be identical with *J. procera.* The leaves have been used in gonorrhœa and syphilis, and in cystitis attended with a purulent discharge. ["Proc. of the Am. Pharm. Assoc.," xxxiv (α, 39); "N. Y. Med. Jour.," Mar. 7, 1885, p. 258.]—**J. oxyphylla.** See Cybistax *antisyphilitica.*—**J. procera.** A Brazilian species the leaves of which are used, in the form of a fluid extract, as a diaphoretic and diuretic. [A, 319 (α, 21).]—**J. subrhombea.** The *Spathodea obovata.* [α, 39.]

JACEA (Lat.), n. f. Ja(ya^3)'se^2(ke^2)-a^3. Fr., *pensée* (1st def.). 1. A section of the genus *Viola*, especially the *Viola tricolor.* 2. Of Jussieu, a section of the genus *Centaurea.* The *Jaceineæ* of Cassini are a subdivision of the *Centaurieæ.* [B, 42, 121, 170 (α, 35).]—**J. lutea capite spinosa minori.** See Centaurea *calcitrapa.*—**J. major.** The *Viola tricolor.* [B, 180 (α, 35).]—**J. nemorensis.** See under Anemone *nemorosa.*—**J. nigra.** The *Centaurea nigra.* [B, 173 (α, 35).]—**J. orientalis patula.** See *White* behen.—**J. pratensis.** The *Centaurea j.* [B, 173 (α, 35).]—**J. ramosissima, J. rupina.** See Calcitrapa.—**J. segetum.** The *Centaurea cyanus.* [B, 214 (α, 35).]—**J. stellata.** See Centaurea *calcitrapa.*—**J. tricolor.** The *Viola tricolor.* [B, 180 (α, 35).]

JACÉE (Fr.), n. Zha^3-sa. 1. The *Centaurea j.* 2. The *Viola tricolor* (*arvensis*). [B, 88 (α, 14); B, 173 (α, 35).]—**J. de montagne.** See *J.* (1st def.).—**J. de printemps.** The *Viola odorata.* [B, 173 (α, 35).]—**J. des prés.** See *J.* (1st def.).—**Petite j.** The *Viola arvensis.* [B, 173 (α, 35).]—**J. tricolore.** The *Viola tricolor.* [B, 173 (α, 35).]

JACHANDALBEEREN (Ger.), n. pl. Ya^{3}ch^2'a^{3}nd-a^{3}l-bare^{2}n. The strobiles of *Juniperus communis.* [B, 180 (α, 35).]

JACINTH, n. Ja^{2}s'i^{2}nth. Lat., *jacinthus.* Fr., *jacinthe.* See Hyacinth and Hyacinthus.

JACINTHE (Fr.), n. Zha^3-sa^{2}n^{2}t. See Hyacinthus.—**J. des bois.** The *Scilla non scripta.* [B, 121 (α, 35).]—**J. de Sienne.** The *Muscari monstrosum.* [B, 19 (α, 35).]—**J. des Indes.** The *Polianthes tuberosa.* [B, 173 (α, 35).]—**J. des jardiniers.** The *Scilla italica.* [B, 19 (α, 35).]—**J. des Pyrénées.** The *Scilla lilio-hyacinthus.* [B, 121, 173 (α, 35).]—**J. du Pérou.** The *Scilla peruviana.* [B, 19 (α, 35).]—**J. étoilée.** The *Scilla amœna.* [B, 19 (α, 35).]—**J. monstrueuse.** The *Muscari monstrosum.* [B, 19 (α, 35).]—**J. musquée.** The *Muscari comosum* (et *ambrosiacum*). [B, 173 (α, 35).]—**J. paniculée.** The *Muscari monstrosum.* [B, 19 (α, 35).]—**Petite j.** The *Scilla nutans.* [B, 19 (α, 35).]

JACINTOS (Sp.), n. Ha^3-then'tos. A place near Toledo, Spain, where there are mineral springs. [L, 105 (α, 39).]

JACK, n. Ja^{2}k. 1. The *Artocarpus integrifolia.* 2. A garden variety of the genus *Polyanthus.* [A, 505 (α, 21); B, 121, 275 (α, 35).] 3. See Dianthus *caryophyllus.*—**J.-behind-the-garden-gate.** The *Viola tricolor.* [A, 505 (α, 21).]—**J.-by-the-hedge.** 1. The *Sisymbrium alliaria.* 2. The *Lychnis diurna.* 3. The *Tragopogon pratensis.* 4. The *Linaria minor.* [A, 505 (α, 21).]—**Creeping J.** The *Sedum acre.* [B, 275 (α, 35).]—**J.-durnils.** The tubers of *Bunium flexuosum.* [A, 505 (α, 21).]—**J.-fruit.** See *J.* (1st def.).—**J.-go-to-bed-at-noon.** The *Ornithogalum umbellatum.* [B, 275 (α, 35).]—**J.-in-a (or -the) -box.** 1. The *Hernandia sonora* and *Hernandia ovigera.* 2. The *Arum maculatum.* 3. See *J.* (2d def.).—**J.-in-prison.** The *Nigella damascena.* [B, 275 (α, 35).]—**J.-in-the-bush.** 1. See Sisymbrium *alliaria.* 2. See Cotyledon *umbilicus.* [B, 282 (α, 35).]—**J.-in-the-green.** A variety of *Primula vulgaris.* [B, 275 (α, 35).]—**J.-in-the-hedge.** See *J.-by-the-hedge.*—**J.-in-the-pulpit.** The *Arisæma atrorubens.*—**J.-jennett.** See *J.-durnils.*—**J.-jump-about.** 1. See Angelica *silvestris.* 2. See Ægopodium *podagraria.* 3. The *Lotus corniculatus.* [A, 505 (α, 21).]—**J.-jurnals.** See *J.-durnils.*—**J.-of-the-buttery.** The *Sedum acre.* [B, 275 (α, 35).]—**J.-of-the-hedge, J.-run-along-the-hedge.** See *J.-by-the-hedge.*—**J.-straws.** The *Plantago lanceolata.* [B, 275 (α, 35).]—**J.-tree.** See *J.* (1st def.).—**J.-weed.** The *Ranunculus arvensis.* [A, 505 (α, 21).]—**J'wood.** The wood of *Artocarpus integrifolia.* [B, 19 (α, 35).]—**J.-wood-tree.** See *J.* (1st def.).

JACKE (Ger.), n. Ya^{3}k'e^2. See Jacket.—**Gypsj'.** See *Plaster-of-Paris* jacket.

JACKET, n. Ja^{2}k'e^{2}t. Fr., *jaque, jaquette.* Ger., *Jacke.* It., *corsetto.* Sp., *chaqueta.* A short, close garment extending down to the waist; a corset or cuirass.—**Bark j.** A waistcoat with powdered cinchona quilted between its layers. Used for malaria in children. [Wood (α, 40).]—**Plaster j., Plaster-of-Paris j.** Fr., *corset plâtré.* Ger., *Gypscorset, Gypsjacke, Gypsmieder.* A j. of plaster of Paris applied in spinal diseases to take the weight of the head and shoulders from off the diseased vertebræ. [E.]—**Strait j.** See Camisole.

JACKSON, n. Ja^{2}k's'n. A place in Clark County, Alabama, where there is a sulphurous spring. [α, 14.]

JACKSONIAN, adj. Ja^{2}k-son'i^2-a^{2}n. Described by J. Hughlings Jackson (see *J.* epilepsy).

JACKSON SPRINGS, n. Ja^{2}k's'n spri^{2}n^{2}z. A place in Moore County, North Carolina, where there is a chalybeate spring. [α, 14.]

JACOBÆA (Lat.), n. f. pl. Ja(ya^3)-ko-be'(ba^3'e^2)-a^3. From *Jacob*, a proper name. Fr., *j., jacobée.* A genus of the *Compositæ*, by Bentham and Hooker included in *Senecio.* The *Jacobaceæ* of Dumortier are a group of the *Compositæ* (a tribe of the *Trichostigmæ*), consisting of the *Senecioneæ, Astereæ, Inuleæ, Anthemideæ*, and *Gnaphalieæ.* The *Jacobeæ* (Fr., *jacobées*) are: Of Adanson, a section of the *Compositæ*, consisting of *Doronicum, Tussilago, Aster, Arnica*, etc., and of Humboldt, Bonpland, and Kunth, a section of the *Compositæ*, comprising *Perdicium, Senecio, Cineraria, Tagetes*, etc. [B, 19, 42, 121, 170 (α, 35).]—**Herba jacobææ.** The herb of *Senecio j.* [B, 180 (α, 24).]—**J. tomentosa.** See Cineraria *maritima.*—**J. vulgaris.** The *Senecio vulgaris.* [B, 173 (α, 35).]—**Purple j.** The *Senecio elegans.* [B, 31, 275 (α, 35).]

JACOBFALVA, n. A place in the district of Czik, Transylvania, where there is a gaseous, saline, alkaline, and ferruginous spring. [L, 135 (α, 39).]

JACOBSBAD (Ger.), n. Ya^3'kobs-ba^{3}d. See Gontenbad.

JACOB'S-CHARIOT, n. Ja''ku^{2}bz-cha^{2}r'i^2-u^{3}t. See Aconitum *napellus.*

JACOBSKRAUT (Ger.), **JACOBSKREUZKRAUT** (Ger.), n's. Ya^3'kobs-kra^3-u^{4}t, -kroits-kra^3-u^{4}t. The *Senecio jacobæa.* [B, 88 (α, 39).]

JACOB'S-LADDER, n. Ja''ku^{4}bz-la^{2}d'u^{3}r. Ger., *Jacobsleiter.* 1. The *Polemonium cæruleum.* 2. The *Polygonatum multiflorum.* 3. A garden species of *Gladiolus.* [A, 505 (α, 21).] 4. See Atropa *belladonna.* 5. See Chelidonium *majus.*—**Dense-clustered-flowered j.-l.** The *Polemonium confertum.* [B, 275 (α, 35).]—**Dwarf j.-l.** The *Polemonium humile.* [B, 275 (α, 35).]—**Richardson's j.-l.** A variety of the *Polemonium cæruleum.* [B, 275 (α, 35).]

JACOB'S-ROD, n. Ja-ku^{3}bz-ro^{2}d'. The *Asphodeline lutea.* [B, 275 (α, 35).]

JACOB'S-STAFF, n. Ja-ku^{3}bz-sta^{3}f'. The *Verbascum thapsus.* [B, 275 (α, 35).]

JACOB'S-SWORD, n. Ja-ku^{3}bz-sord'. The *Iris pseudoacorus.* [B, 275 (α, 35).]

JACQUIER (Fr.), n. Zha^{3}k-e-a. 1. The genus *Artocarpus.* 2. The *Artocarpus integrifolia.* [B, 121, 173 (α, 35).]—**J. à feuilles entières.** See *J.* (2d def.).—**J. hétérophylle.** The *Artocarpus heterophylla.* [B, 173 (α, 35).]—**J. du Brésil.** The *Artocarpus brasiliensis.* [B, 173 (α, 35).]—**J. incisé.** The *Artocarpus incisa.* [B, 173 (α, 35).]—**J. velu.** The *Artocarpus hirsuta.* [B, 173 (α, 35).]

JACQUINIA (Lat.), n. f. Zha^{3}k-i^{2}n'i^2-a^3. From *Jacquin*, the botanist. Fr., *jacquinie, jacquinier.* 1. A genus of the *Myrsinaceæ*, tribe *Theophrasteæ.* The *Jacquinieæ* (Fr., *jacquiniées*) are: Of Reichenbach, a division of the *Primulaceæ*, and of De Candolle, a tribe of the *Theophrasteæ.* 2. Of Mutis, the genus *Trilix.* [B, 38, 42, 48, 121, 170, 173 (α, 35).]—**J. armillaris.** Fr., *jacquinier* (*ou bois*) *à bracelets.* West Indian currant, bracelet-wood; a species used as a fish-poison and in caries of the teeth. According to Hamilton, a tincture made from it is an active sudorific. [B, 19, 173, 180, 275 (α, 35).]—**J. ruscifolia.** The crosswood of Santo Domingo, where the natives regard it as having great vulnerary properties, which Schomburgk found to be wholly imaginary. [B, 185, 275 (α, 35).]

JACQUINIE (Fr.), **JACQUINIER** (Fr.), n's. Zha^3-ke-ne, -ne-a. See Jacquinia.—**J. à bracelets.** See Jacquinia *armillaris.*

JACTATIO (Lat.), n. f. Ja^{2}k(ya^{3}k)-ta(ta^3)'shi^2(ti^2)-o. Gen., *-on'is.* From *jactare*, to throw. See Jactation.—**J. circulatoria.** See Charlatanry.

JACTATION, n. Ja^{2}k-ta'shu^{3}n. Lat., *jactatio* (from *jactare*, to throw). Fr., *j.* Ger., *Jaktation.* Tossing about from restlessness.

JACTATOR [Bauhinus] (Lat.), n. m. Ja^{2}k(ya^{3}k)-ta(ta^3)'to^{2}r. Gen., *-or'is.* From *jactare*, to throw. See Vas *deferens.*

JACTITATION, n. Ja^{2}k-ti^2-ta'shu^{3}n. See Jactation.

JACTURA (Lat.), n. f. Ja^{2}k(ya^{3}k)-tu^2(tu)'ra^3. From *jactare*, to throw. 1. A throwing. 2. Detriment. [A, 312 (α, 21).]—**J. substantiæ.** A discoloration of the skin or of a tissue resulting from a wound in which the tissues may or may not be destroyed. [L, 105 (α, 39).]

JADAVÁRA (Ar.), **JADAVARI KHATAI** (Bomb.), n's. The *Delphinium denudatum.* [A, 79; "Proc. of the Am. Pharm Assoc.," xxxiii (α, 39).]

JADE, n. Jad. A firm, amorphous, semi-transparent, scintillating, unctuous, mineral substance of a variable green color, of which there are several varieties often worn as amulets. [B, 88 (α, 39).]

JADVAR (Ar.), n. A name for three kinds of innocuous aconite-roots sold in the East Indian bazaars; referred to undetermined species of *Aconitum.* [B, 18 (α, 35).]

JAEN (Sp.), n. Ha^3-e^{2}n'. A place in the province of Jaen, Spain, where there is a warm gaseous spring containing magnesium and calcium sulphates. [L, 41, 49 (α, 14).]

JAEPHAL (Hind.), n. The *Myristica moschata.* [B, 496 (α, 35).]

JAGERY, n. Ja^{2}g'e^{2}r-i^2. See Jaggery.

JAGETEUFELKRAUT (Ger.), n. Ya^{3}g'e^2-toif-e^{2}l-kra^3-u^{4}t. The herb of *Hypericum perforatum.* [B, 180 (α, 35).]

JAGGED, adj. Ja^{2}g'e^{2}d. Incised, having the margin (of a leaf or other organ) irregularly cut. [B, 291 (*a*, 35).]

JAGGERY, n. Ja^{2}g'e^{2}r-i^2. Fr., *jagre.* Hind., *jagra.* Crude palm sugar. [B, 5, 18, 19, 92, 121 (*a*, 35).]

JAQUA, n. The *Genipa americana.* [B, 121 (*a*, 35).] See also under PALM.

JAHODNIK, n. Ya^4'ho^{3}d-ni^{2}k. A place in Thurocz County, Hungary, where there is a mineral spring. [L, 30 (*a*, 14).]

JAHUGUÈRE (Fr.), n. Zha^3-u^6-ge^{2}r. The *Agaricus albo-rufus.* [B, 173 (*a*, 35).]

JAIDÁ RUMI (Hind.), n. See CALAMUS *draco.*

JAILLISSANT (Fr.), adj. Zha^3-el-yes-sa^{3}n^2. Of springs, spouting. [L, 41, 180 (*a*, 14).]

JAIS (Fr.), n. Zhe^2. A variety of black or blackish-brown lignite; sometimes used in antispasmodic fumigations. [L, 41, 49 (*a*, 14).]

JAISTOMADHU (Beng.), n. See GLYCYRRHIZA *glabra.*

JÁJIPATRI (Sanscr.), n. The *Myristica officinalis.* [A, 479 (*a*, 21).]

JAKABFALVA, n. See JACOBFALVA.

JAKOBENY (Hung.), n. Ya^{4}k'o^{3}b-e^{2}n-i^2. A place in the Bukowina, Austria-Hungary, where there are ferruginous springs. [L, 30, 37 (*a*, 14).]

JAKOBSBAD (Ger.), n. Ya^3'kobs-ba^{3}d. An alkaline spring near Horb, in the Black Forest district, Würtemberg, Germany. [L, 30 (*a*, 14).]

JAKOBSKRAUT (Ger.), n. Ya^3'kobs-kra^3-u^{4}t. The *Senecio jacobœa.* [B, 180 (*a*, 35).]

JAKOBSLEITER (Ger.), n. Ya^3'kobs-lit-e^{2}r. See JACOB'S-LADDER.

JAKOBSZWIEBEL (Ger.), n. Ya^3'kobs-tsweb-e^{2}l. The *Allium fistulosum.* [B, 48 (*a*, 14).]

JAL, n. In the East Indies, the *Salvadora indica.* [B, 121 (*a*, 35).]

JALA, n. In India, the *Shorea robusta.* [B, 121 (*a*, 35).]—**J.-jamani** (Hind.). See COCCULUS *villosus.*—**J.-nima** (Hind.). The *Herpestis monniera.* [A, 479 (*a*, 21).]

JALAP, n. Ja^{2}l'a^{2}p. Lat., *jalapa.* Fr., *j.* Ger., *Jalape, Jalappe.* It., *gialappa.* Sp., *jalapa.* The purgative root of several species of the *Convolvulaceœ*, especially of *Ipomœa purga* (see JALAPA [1st def.]). [*a*, 35.]—**Abstract of j.** See *Abstractum* JALAPÆ.—**Alcool (ou alcoolé) de j. composé (ou et de turbith)** (Fr.). See *Tinctura jalapœ composita.*—**Black j.** Ger., *schwarze Jalappe.* True j. (see JALAPA [1st def.]) as distinguished from mechoacan (see CONVOLVULUS *mechoacanha*). [B, 18, 180 (*a*, 35).]—**Brazilian j.** The root of *Ipomœa operculata.* ["Proc. of the Am. Pharm. Assoc.," x (*a*, 39).]—**Cocum j.** The *Phytolacca decandra.* [Griffith (*a*, 35).]—**Compound powder of j.** See *Pulvis* JALAPÆ *compositus.*—**Compound tincture of j.** See *Tinctura* JALAPÆ *composita.*—**Digitate j.** Fr., *j. digité.* A false j. imported into France, having its component tubers arranged digitately. It does not closely resemble j. in physical properties. [B, 5 (*a*, 35).]—**East Indian j.** The *Ipomœa turpethum.* [B, 275 (*a*, 35).]—**Émulsion purgative avec la résine de j.** [Fr. Cod., 1832; Russ. Ph., 1803] (Fr.). A preparation made by triturating 6 parts each of sugar and egg-yolk with 1 part of j. resin and 12 parts of water. [L, 49, 85 (*a*, 14).]—**Extract of Indian j.** See *Extractum* TURPETHI.—**Extract of j., Extrait de j.** (Fr.). See *Extractum* JALAPÆ.—**False j.** Fr., *faux j.* Ger., *falsche Jalappe.* 1. The roots of *Mirabilis jalapa* and other species of *Mirabilis.* 2. A name for male j., digitate j., and other spurious j's. [B, 5, 121 (*a*, 34).]—**False j. of New Orleans.** A tuberous root with but little resemblance in physical properties to true j.; so called because it is imported into France from New Orleans. [B, 5 (*a*, 35).]—**Faux j.** (Fr.). See *False j.*—**Faux j. rayonné** (Fr.). See *Radiated false j.*—**Fluid extract of j.** A preparation made by macerating 16 oz. of coarsely powdered j. twenty-four hours in a mixture of 2 parts of alcohol and 1 part of water, treating with dilute alcohol in a percolator till ¾ gal. is obtained, filtering, evaporating one half, adding 8 oz. of sugar and ½ oz. of potassium carbonate, evaporating to 12 fl. oz., and adding 4 fl. oz. of alcohol. A fluid drachm of extract represents a drachm of j. [B, 5 (*a*, 38).]—**Fusiform j.** Fr., *j. fusiforme.* See *Male j.*—**Indian j.** The *Ipomœa turpethum.* [B, 88 (*a*, 39).]—**J. blanc** (Fr.). See CONVOLVULUS *mechoacanha.*—**J. digité** (Fr.). See *Digitate j.*—**J. digité majeur** (Fr.). See *Tampico j.*—**J. ligneux** (Fr.), **J. mâle** (Fr.). See *Male j.*—**J. officinal** [Fr. Cod.]. See JALAPA (1st def.).—**J. resin.** See CONVOLVULIN.—**J.-root.** See JALAPA (1st def.).—**J. stalks, J. tops.** See *Male j.*—**J. tubéreux** [Fr. Cod.] (Fr.), **J. vrai** (Fr.). See JALAPA (1st def.).—**Light j., Male j.** Lat., *radix jalapœ fibrosœ.* Fr., *j. mâle, j. fusiforme, j. ligneux.* It., *gialappa maschio* (o *leggiera*). Sp., *jalapa macho* (ó *ligera*). Fusiform, or woody j., j.-tops or stalks, Orizaba-root, the *purgo macho* of the Mexicans; the root of *Ipomœa turpethum* (*orizabensis*); distinguished from true j. by its lighter color, deeper longitudinal wrinkles, and radiated transverse section. It contains jalapin. [B, 5, 18, 180 (*a*, 35).]—**Overgrown j.** A false j., consisting of light tubers, perhaps of some species of *Convolvulus* or *Ipomœa*, having a dull, rough fracture, a slight sweet odor, and a taste somewhat like that of j.: distinguishable from male j. by its lack of fibrous structure. It is not purgative. [B, 5 (*a*, 35).]—**Poudre de j. (racine).** See *Tubera* JALAPÆ *pulverata.*—**Radiated false j.** Fr., *faux j. rayonné.* A spurious j. having little likeness in properties to true j.; so called because of the stellate appearance of the cut surface. [B, 5 (*a*, 35).]—**Resin of j.** Lat., *resina jalapœ.* Fr., *résine de j.* See *Resina* JALAPÆ.—**Rose-scented j.** See *Overgrown j.*—**Tampico j.** Fr., *j. digité majeur.* Sp., *jalapa de Tampico* [Mex. Ph.]. The *purga de Sierra Gordo* of the Mexicans, the root of *Ipomœa simulans.* It closely resembles true j. in odor, taste, and appearance, except that it is more shriveled and corky-looking, and the pieces are usually smaller. It contains tampicin. [B, 5, 18 (*a*, 35).]—**Teinture de j.** [Fr. Cod.]. See *Tinctura* JALAPÆ.—**Teinture de j. composée** [Fr. Cod.]. See *Tinctura* JALAPÆ *composita.*—**Teinture de résine de j.** A preparation made by dissolving 1 part of j. resin in 4 or 7 parts of alcohol. [B, 119 (*a*, 38).]—**Tincture of j.** See *Tinctura* JALAPÆ.—**True j.** See JALAPA (1st def.).—**Vera Cruz j.** See JALAPA (1st def.).—**White j.** Lat., *jalapa* (seu *jalappa*) *alba, radix jalappœ albœ.* Fr., *j. blanc.* Ger., *weisse Jalape* (oder *J'enwurzel*). The root of *Convolvulus mechoacanha.* [B, 18, 180 (*a*, 35).]—**Wild j.** See IPOMŒA *pandurata.*—**Woody j.** Fr., *j. ligneux.* See *Male j.*

JALAPA [U. S. Ph., Br. Ph.] (Lat.), n. f. Ja^{2}l(ya^{3}l)-a(a^3)'pa^3. Fr., *jalap* (*tubéreux* [ou *officinale*] [Fr. Cod.]). Ger., *J., Jalape, Jalappe, Jalapenknollen, Jalapenwurzel.* It., *gialappa.* Sp., *j.* (*oficinal* [Mex. Ph.]), *raíz de purga* [Mex. Ph.]. Syn.: *tubera jalapœ* [Ger. Ph.], *radix jalapœ* (seu *jalapii*). 1. True jalap, the tuberous roots of *Ipomœa purga*, varying in appearance from spindle-shaped to globular, the latter form being usually much smaller than the fist, deeply wrinkled, externally dark-brown, and marked with small pale scars, tough, breaking with a resinous fracture, of faint coffee-like odor, and mawkish and somewhat acrid taste; used as an active cathartic, especially, combined with other drugs, in dropsy. 2. Of Tournefort, the genus *Mirabilis.* The *Jalapœ* of B. Jussieu are an order of plants comprising *Pisonia, Boerhaavia, Mirabilis, Plumbago*, etc. [B, 5, 18, 19, 121, 170, 173, 180 (*a*, 35); "Am. Jour. of Pharm.," July, 1887, p. 321.]—**Abstractum jalapæ** [U. S. Ph.]. A preparation made by moistening 200 parts of jalap in No. 40 powder with 100 parts of alcohol, treating with more alcohol in a percolator till exhausted, reserving 170 parts, distilling off the alcohol from the remainder, mixing with the reserved part, adding 50 parts of milk-sugar, drying in a temperature not above 50° C., adding enough milk-sugar to make 100 parts, and reducing to a fine powder. [B, 5, 95 (*a*, 38).]—**Elixir jalapæ compositum.** See *Tinctura* JALAPÆ *composita.*—**Extractum jalapæ** [Br. Ph.]. Fr., *extrait de jalap.* Ger., *Jalapen-Extrakt.* A preparation made by macerating 16 oz. of coarsely powdered jalap seven days with 4 pints (80 fl. oz.) of alcohol, pressing out, filtering, and distilling off the spirit so as to leave a soft extract; macerating the residual jalap four hours in 1 gal. (160 fl. oz.) of water, straining, evaporating to a soft extract, mixing with the other extract, and evaporating to a pilular consistence. [B, 5, 95 (*a*, 38).]—**Extractum jalapæ aquosum.** A substance prepared by treating finely powdered jalap with water after it has been exhausted with alcohol, and carefully evaporating the infusion. ["Proc. of the Am. Pharm. Assoc.," xii (*a*, 39).]—**Indianische J.** (Ger.). The *Ipomœa turpethum.* [B, 88 (*a*, 39).]—**J. alba, J. blanca** (Sp.), **J. de Mechoacan** (Sp.). See CONVOLVULUS *mechoacanha.*—**J. de Querétaro** [Mex. Ph.] (Sp.). See IPOMŒA *triflora.*—**J. de Tampico** [Mex. Ph.] (Sp.). See *Tampico* JALAP.—**Jalapæ radix.** See *J.* (1st def.).—**J. hembra** [Mex. Ph.] (Sp.). The *Ipomœa purga.*—**J. ligera** [Mex. Ph.] (Sp.), **J. macho** [Mex. Ph.] (Sp.). See *Male* JALAP.—**J. officinarum, J. oficinal** [Mex. Ph.] (Sp.). See *J.* (1st def.).—**Pilulæ jalapæ** [Ger. Ph.]. Ger., *Jalapenpillen* [Ger. Ph.]. Sp., *píldoras de resina de j.* [Sp. Ph.]. A preparation made by triturating 3 parts of jalap soap and 1 part of powdered jalap into a mass, and converting this into $\frac{1}{10}$-gramme pills, sprinkling them with lycopodium, and drying well [Ger. Ph.]; or by triturating together 2 grammes each of jalap resin and either medicated or almond-oil soap, dissolving in 4 grammes of warmed alcohol, evaporating to 5 grammes, and making of the product 50 pills [Sp. Ph.]. [B, 95 (*a*, 38).]—**Pulvis jalapæ compositus** [U. S. Ph., Br. Ph., Dan. Ph., Russ. Ph.]. Sp., *polvo de j. compuesto* [Sp. Ph.]. A preparation consisting of 35 parts of j. in No. 60 powder and 65 parts of cream of tartar [U. S. Ph.]; or 5 parts of finely powdered j. mixed extempore with 10 of cream of tartar [Russ. Ph.]; or 5 parts each of j., cream of tartar, and magnesia [Sp. Ph.]; or 10 of j. and 5 of potassium sulphate [Dan. Ph.]; or 5 of j., 9 of cream of tartar, and 1 part of rhizome of ginger [Br. Ph.]. [B, 95 (*a*, 38).]—**Pulvis jalapæ hydrargyratus** [Finn. Ph.]. A mixture of 1 part of calomel with 3 parts of powdered jalap. [B, 95 (*a*, 38).]—**Radix jalapæ.** See *J.* (1st def.).—**Resina jalapæ** [U. S. Ph., Br. Ph., Ger. Ph., Fr. Cod., Austr. Ph.]. A resin obtained by exhausting jalap with alcohol, forming yellowish-brown, brittle masses with sweetish odor and somewhat acrid taste, readily soluble in alcohol, only partially soluble in ether, the insoluble portion being *convolvulin* (*q. v.*). [B.]—**Tinctura jalapæ** [Br. Ph., Netherl. Ph.]. Fr., *teinture de jalap* [Fr. Cod.]. A preparation made by macerating 2½ oz. of jalap in No. 40 powder 2 days in alcohol enough to make 20 fl. oz. after percolation, filtering, etc. [Br. Ph.]; or by macerating 1 part of jalap (powdered [Netherl. Ph., Fr. Cod.]) with 5 parts [Belg. Ph.], or 8 parts [Netherl. Ph.] of alcohol, or 5 parts of dilute alcohol (60 per cent.) [Fr. Cod.] for 6 days [Belg. Ph.], 10 days [Fr. Cod.], or 7 days [Netherl. Ph.]. [B, 95 (*a*, 38).]—**Tinctura jalapæ composita** [Belg. Ph.]. Fr., *teinture de jalap composée.* Syn.: *elixir jalapœ compositum.* A preparation made by macerating for 10 days [Fr. Cod.], 6 days [Belg. Ph.], 80 parts [Fr. Cod.], 83 [Belg. Ph.], of jalap, 10 [Fr. Cod.], 11 [Belg. Ph.], of turpeth-root, 20 [Fr. Cod.], 21 [Belg. Ph.], of scammony, and 960 of dilute alcohol [Fr. Cod.], 100 of stronger alcohol [Belg. Ph.]. [B, 95 (*a*, 38).]—**Tinctura jalapæ composita purgans.** A preparation made by macerating and straining 120 grammes of jalap, 15 of scammony, 7 of gamboge, and either 720 of brandy or 60 of safflower seeds with 720 of alcohol or with 900 of spirit of lemon distilled down ¾; or 270 grammes of jalap, 7 each of scammony and gamboge, 180 of safflower, and 1,440 of spirit of lemon. [B, 119 (*a*, 38).]—**Tuber jalapæ** [Swiss Ph.], **Tubera jalapæ** [Ger. Ph., Russ. Ph., Norw. Ph., Swed. Ph., Dan. Ph.]. See *J.* (1st def.).—**Tubera jalapæ pulverata** [Russ. Ph., Swed. Ph.]. Fr., *poudre de jalap* (*racine*) [Fr. Cod.]. A preparation made by crushing, drying at 40° C., and powdering j. in a covered mortar, and sifting through a 120 silk sieve [Fr. Cod.]; or by cleaning, crushing, drying in the oven, powdering fine on an iron mortar with $\frac{1}{10}$ residue [Sp. Ph.]. The Russ. Ph. uses a 1,000-mesh sieve. The Fr. powder contains 16 to 18 per cent. of resin. [B, 95 (*a*, 38).]

JALAPE (Ger.), n. Ya^3-la^{3}p'e^2. See Jalap and Jalapa.—**J'n-Extrakt.** See *Extractum* jalapæ.—**J'nknollen.** See Jalapa (1st def.).—**J'npillen.** See *Pilulæ* jalapæ.—**J'nseife.** See Sapo *jalapinus.*—**J'nwurzel.** See Jalapa (1st def.).—**Weisse J.** See *White* jalap.

JALAPIC ACID, n. Ja^{2}l-a^{2}p'i^{2}k. Fr., *acide jalapique.* Ger., *Jalappinsäure.* It., *acido gialappinico.* A dibasic acid, $C_{62}H_{106}O_{36}$, produced by the action of baryta on jalapin. It melts at 120° C., decomposes above 130° C., and is very soluble in water, less soluble in ether. Its salts are amorphous. [B, 46, 93 (α, 39); "Ann. di chim. medico-farm. e di farmacol.," Apr., May, 1885, p. 311 (B).]

JALAPIN, n. Ja^{2}l'a^{2}p-i^{2}n. Lat., *jalapina, jalapium.* Fr., *jalapine.* Ger., *Jalappin.* It., *gialappina.* A resinous glucoside, $C_{34}H_{56}O_{16}$ (or $2C_{17}H_{30}O_9 - 2H_2O = C_{34}H_{56}O_{16}$, being by some regarded as the anhydride of jalapic acid), derived from male jalap (root of *Ipomœa orizabensis*); a homologue of convolvulin, from which it is distinguished by its great solubility in ether; a colorless, amorphous, tasteless, and translucent substance, melting at 150° C., decomposing if the temperature is elevated, and burning with a sooty flame. It is soluble in alcohol and in ether, and is decomposed by dilute acids into glucose and jalapinol. It acts as a drastic purgative. [Meyer, "Ann. d. Chem. u Ph.," xcv (B); Samuelson, "Chem. Ztg.," 1884, in "Ann. di chim. medico-farm. e di farmacol.," Apr., May, 1885, p. 311 (B).]

JALAPINÆ (Lat.), n. f. pl. Ja^{2}l(ya^{3}l)-a^{2}p(a^{3}p)-in(en)'e(a^3-e^2). Of Batsch, a family of the *Marcidæ*, including *Mirabilis, Pisonia, Plumbago*, etc. [B, 170 (α, 35).]

JALAPINOL, n. Ja^{2}l-a^{2}p'i^{2}n-o^{2}l. Fr., *j.* Ger., *Jalappinol.* A crystalline substance, $C_{13}H_{24}O_3$, produced by the decomposition of jalapin. It melts at 62° C., is without odor, has an irritating taste, and a faint acid reaction. It is slightly, soluble in boiling water, easily soluble in alcohol and in ether. [B, 46, 93 (α, 39); "Ann. di chim. medico-farm. e di farmacol.," Apr., May, 1885, p. 311; "Proc. of the Am. Pharm. Assoc.," xxxiii(α, 39).]

JALAPINOLATE, n. Ja^{2}l-a^{2}p-i^{2}n'o-lat. A salt of jalapinolic acid. [B, 38 (α, 14).]

JALAPINOLIC ACID, n. Ja^{2}l-a^{2}p-i^{2}n-o^{2}l'i^{2}k. Fr., *acide jalapinolique.* Ger., *Jalapinolsäure.* It., *acido gialappinolico.* An acid, $C_{16}H_{30}O_4$, said to be obtained along with isobutyl alcohol and other substances by the decomposition of jalapinol with alcoholic potash. It occurs in small white needles, odorless, of irritating taste, melting at 64° C., and very soluble in alcohol and in ether. [B. 6, 93 (α, 39); Samuelson, "Chem. Ztg.," 1884, in "Ann. di chim. medico-farm. e di. farmacol.," Apr., May, 1885, p. 311 (B).]

JALAPIUM (Lat.), n. n. Ja^{2}l(ya^{3}l)-ap(a^{3}p)'i^2-u^{3}m(u^{4}m). 1. See Ipomœa *purga.* 2. See Jalapin.—**Radix jalapii.** See Jalapa (1st def.).

JALAPPA (Lat.), n. f. Ja^{2}l(ya^{3}l)-a^{2}p(a^{3}p)'pa^3. Ger., *J.* See Jalapa.

JALAPPE (Ger.), n. Ya^3-la^{3}p'pe^2. See Jalap and Jalapa.—**J'nharz.** See Convolvulin.—**J'npillen.** See *Pilulæ* jalapæ.—**J'nseife.** See Sapo *jalapinus.*

JALAPPINOL (Ger.), n. Ya^3-la^{3}p-pen'ol. See Jalapinol.

JALAPPINSÄURE (Ger.), n. Ya^3-la^{3}p-pen'zoir-e^2. See Jalapic acid.

JALAP-PLANT, n. Ja^{2}l'a^{2}p-pla^{3}nt. See under Jalapa.—**East-Indian j.-p.** The *Ipomœa turpethum.* [B, 275 (α, 35).]—**False j.-p., Garden j.-p.** The *Mirabilis jalapa.* [B, 275 (α, 35).]—**Male j.-p.** The *Ipomœa turpethum.* [B, 275 (α, 35).]—**Mechoacan j.-p.** The *Ipomœa jalapa*, and perhaps other species of *Ipomœa.* [B, 18, 275 (α, 35).]—**True j.-p.** The *Ipomœa purga.* [B, 5, 18, 275 (α, 35).]—**Wild j.-p.** The *Ipomœa pandurata.* [B, 5, 275 (α, 35).]

JALAPS, n. pl. Ja^{2}l'a^{2}ps. The *Convolvulaceæ.* [B, 121 (α, 35).]

JALLEYRAC (Fr.), n. Zha^{3}l-le^2-ra^{3}k. A place in the department of Cantal, France, where there is an alkaline, gaseous, and ferruginous spring. [L, 49, 87 (α, 14).]

JALLOWA, n. A place near Broussa, Turkey, where there are thermal springs not yet analyzed. [L, 49 (α, 14).]

JALTOMATE [Mex. Ph.] (Sp.), n. Ha^{3}l-to-ma^3'ta. See Saracha *jaltomata.*

JAMAICA (Sp.), n. Ha^3-ma^3'e-ka^3; in Eng., ja^{2}m-ak'a^3. 1. Of the Mex. Ph., see Hibiscus *sabdariffa.* 2. One of the Antilles, where there are numerous sulphurous and chalybeate springs, the principal one, situated near the village of Bath, being warm and sulphurous. [L, 30, 41, 49, 105 (α, 14).]

JAMAICINE, n. Ja^{2}m-as'en. A crystalline alkaloid discovered by Hütenschmid in Jamaica cabbage-tree bark, and proved by Gastell to be identical with berberine (*q. v.*). It has a very bitter taste. [B, 5, 81 (α, 38).]

JAMÁLAGOTÁ (Hind., Bomb.), n. The seeds of *Croton tiglium.* [A, 479 (α, 21).]

JAMBARANDY, n. See Jaborandi.

JAMBE (Fr.), n. Zha^{3}mb. See Crus and Leg.—**J. de polichinelle.** A leg completely paralyzed, with wasted muscles and loose, distorted joints, incapable of bearing the weight and being abnormally flexible in all directions; found sometimes in tabes and in infantile paralysis. [A, 520 (α, 29); α, 18.]—**J. du cervelet.** See *Cerebellar* peduncle.—**J's du diaphragme.** See Pillars *of the diaphragm.*

JAMBON (Fr.), n. Zha^{3}n^2-bo^{2}n^2. 1. See Ham (2d def.). 2. The *Œnothera biennis.* [B, 121, 173 (α, 35).]—**J. de Saint-Antoine, J. des jardiniers.** See *J.* (2d def.).

JAMBORANDI, n. See Jaborandi.

JAMBOSA (Lat.), n. f. Ja^{2}m(ya^{3}m)-bo'sa^3. Fr., *jambosier.* Ger., *Jambuse.* A genus of the *Myrtaceæ*, separated from *Eugenia.* [B, 19, 173, 180 (α, 35).]—**J. aquea.** A species found in the East Indies and the Moluccas. The insipid watery fruits are eaten to quench thirst. The bark is used like that of *J. vulgaris.* [B, 180 (α, 35).]—**J. densiflora.** A species the fruit of which is edible. [B, 123 (α, 35).]—**J. domestica.** Fr., *jambosier domestique.* In the East Indies and Molucca Islands, a species with fruits of a rosaceous odor and pleasant taste. The bark is used like that of *J. vulgaris.* [B, 180 (α, 35).]—**J. malaccensis.** See Eugenia *malaccensis.*—**J. vulgaris.** Fr., *jambosier domestique, jamerose, jambose, jamerosier, jamrosade, jamberosade, jamrose.* Ger., *gemeine Jambuse, Rosenapfel-Jambuse.* The rose-apple, or *gulab-jamun*, of the East Indies, widely cultivated for its fruit, which, though somewhat smaller, has the flavor of a ripe apricot. A very fine rose-water is distilled from it. The leaves and bark are astringent, the fruit and withered flowers are used as a febrifuge, and the seeds, which are aromatic, are used in diarrhœa and dysentery. [B, 19, 172, 173, 180 (α, 35).]

JAMBOSIN, n. Ja^{2}m-bos'i^{2}n. A crystalline principle, $C_{10}H_{15}NO_3$, contained in jambosa-root. [A. W. Gerrard, "Pharm. Jour. Trans.," 1884, in "Annal. di chim. med.-farm. e di farm.," Mar., 1885, p. 216 (B).]

JÁMBÚL (Hind.), n. See Syzygium *jambolanum.*

JAMBUSE (Ger.), n. Ya^{3}m-buz'e^2. See Jambosa.

JAMEROSE (Fr.), **JAMEROSIER** (Fr.), n's. Zha^3-m'-roz, -e-a. See Jambosa *vulgaris.*

JAMMER (Ger.), n. Ya^{3}m'me^{2}r. Distress, misery. [α, 45.]—**J. der Kinder.** See Eclampsia *infantum.*—**Katzenj'.** See the major list.

JAMNICZA, n. A place in the province of Croatia, Austria, where there is a gaseous, alkaline, and saline spring. [L, 30, 105 (α, 14).]

JAMROSADE (Fr.), n. Zha^{3}n^2-ro-sa^{3}d. See Jambosa *vulgaris.*

JAMROSE (Fr.), n. Zha^{3}n^2-roz. The *Jambosa vulgaris*, or its fruit. [B, 121, 173 (α, 35).]—**J. de Malacca.** See under Eugenia *malaccensis.*

JAN (Fr.), n. Zha^{3}n^2. The *Ulex europæus.* [B, 19, 173 (α, 35).]

JANCOMAS, n. In India, an undetermined tree with an astringent wood. [B, 121 (α, 35).]

JANGALI, n. An Eastern name for various plants. [α, 41.]—**J. akharota** (Hind.). See Aleurites *triloba.*—**J. angura** (Duk.). The *Vitis carnosa* and *Vitis setosa.* [A, 479 (α, 21).]—**J. chaubeli** (Hind., Beng.). See Hemidesmus *indicus.*—**J.-chichoñdá.** The *Trichosanthes cucumerina.* [A. 479 (α, 21).]—**J. erañdi** (Bomb.), n. The *Jatropha gossipifolia* or the *Jatropha glandulifera.* [A, 479 (α, 21).]—**J. haladi** (Hind., Beng.). See Curcuma *aromatica.*—**J. kadu** (Hind.). The bitter fruit of *Lagenaria vulgaris*, var. *amara.* [A, 479 (α, 21).]—**J. kándá** (Bomb.). The *Urginea indica.* [A, 479 (α, 21).]—**J. kásani** (Duk.). The *Blumea aurita.* [A, 479 (α, 21).]—**J. kulthi** (Duk.). The *Tephrosia purpurea.* [A, 479 (α, 21).]—**J. mátha** (Mah.). The *Phaseolus trilobus.* [A, 479 (α, 21).]—**J. mudrika** (Bomb.). The *Papaver rhœas.* [A, 479 (α, 21).]—**J. muli** (Bomb.). The *Blumea aurita.* [A, 479 (α, 21).]—**J. palavala.** The *Trichosanthes cucumerina.* [A, 479 (α, 21).]—**J. parula** (Guz.). The *Trichosanthes cucumerina.* [A, 479 (α, 21).]—**J. pikavána** (Hind.). The *Tylophora asthmatica.* [A, 479 (α, 21).]—**J. piyája** (Hind., Beng.). The *Urginea indica.* [A, 479 (α, 21).]—**J. surana** (Bomb.). See Amorphophallus *silvaticus.*—**J. ushabah** (Hind.). The *Smilax ovalifolia.* [A, 479 (α, 21).]

JANIA (Lat.), n. f. Ja(ya^3)'ni^2-a^3. 1. Of Schultes, the genus *Bœometra.* 2. Of Lamouroux, a genus of floridian *Algæ*, of the *Corallineæ.* [B, 42, 121, 170 (α, 35).]—**J. rubens.** A species growing along the shores of Europe and South Africa, parasitical on smaller *Algæ.* It is said to be a constituent of helminthocorton. [α, 35.]

JANICEPS (Lat.), n. m. Ja^{2}n(ja^{3}n)'i^2-se^{2}ps(ke^{2}ps). From *Janus*, the double-faced god, and *caput*, the head. Fr., *j.* Ger., *Januskopf.* Of I. Geoffroy St.-Hilaire, a double monster with the individuals united above a common umbilicus and facing in opposite directions. [A, 385.]

JANIPHA (Lat.), n. f. Ja^2(ya^3)-ni(ne)'fa^3. The genus *Manihot.* [B, 42 (α, 35).]—**J. manihot.** The *Manihot utilissima.* [B, 180 (α, 35).]

JANITOR (Lat.), n. m. Ja^{2}n(ya^{3}n)'i^{2}t-o^{2}r. Gen., *-or'is.* From *janua*, a door. Lit., a door-keeper; see Pylorus.—**J'es marsupii** [Tyson]. See *Marsupial* bones.

JANITRIX (Lat.), n. f. Ja^{2}n(ya^{3}n)'i^{2}t-ri^{2}x. Gen., *-tri'cis.* Lit., a female door-keeper; an old name for the portal vein. [A, 325.]

JANNELET (Fr.), n. Zha^{3}n-n'-la. The *Cantharellus cibarius.* [B, 121 (α, 35).]

JANNETROLE (Fr.), n. Zha^{3}n-n'-trol. The *Equisetum arvense.* [B, 173 (*a*, 35).]

JANO (It.), n. A place in Modena, Italy, where there is a gaseous and sulphurous spring containing calcium, sodium, and magnesium chlorides and magnesium and calcium sulphates. [L, 105.]

JANOUERAT (Fr.), **JANOUÈRE** (Fr.), n's. Zha^{3}-nu-e^{2}-ra^{3}, -e^{2}r. The *Juniperus communis.* [B, 121 (*a*, 35).]

JANUS (Lat.), n. m. Jan(ya^{3}n)'u^{3}s(u^{4}s). See JANICEPS.

JAPACONINE, n. Ja^{2}p-a^{2}k'o^{2}n-en. An alkaloid, $C_{26}H_{41}N_{2}O_{2}$, closely resembling aconine. ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 39).]

JAPANESE, adj. Ja^{2}p-a^{2}n-es'. Fr., *japonais.* Pertaining to or obtained from Japan.

JAPONIC ACID, n. Ja^{2}p-o^{2}n'i^{2}k. Fr., *acide japonique.* Ger., *Japonsäure.* A body, $C_{12}H_{4}O_{4}HO$, formed with rubinic acid by exposing to the air an alkaline or ammoniacal solution of catechin. It is a black substance, soluble in boiling water, insoluble in alcohol. [B, 38, 46, 48, 93 (*a*, 14 ; *a*, 39).]

JAR, n. Ja^{3}r. Fr., *jarre.* Ger., *Krug.* A vessel with a wide mouth.—**Decanting j.** A glass j. fitted with a movable siphon tube entering near the bottom ; used for decanting the liquid over precipitates that are very easily disturbed. ["Proc. of the Am. Pharm. Assoc.," xxiii (*a*, 39).]—**Leyden j.** Ger., *Leydener Flasche.* A glass j. coated on the inside and outside with tin-foil, the inner coating having in contact with it a metallic rod which projects from the mouth of the j. and terminates in a knob. The j. is charged by placing the knob in contact with a static machine and putting the outside coating in communication with the ground by a metallic knob brought near the j. Sparks are thus drawn from the machine to the inner coating and are lodged upon the surface of the glass. The j. is discharged by placing one knob of the discharging-rod in contact with the outer coat and turning the other knob close to the inner coating, from which a spark is immediately elicited. [B.]

JARABA (Sp.). n. Ha^{2}-ra^{2}'ba^{2}. A place in the province of Saragossa, Spain, where there is a warm sulphurous spring. [L, 49 (*a*, 14).]

JARAK, n. In India, the *Ricinus communis.* [B, 121 (*a*, 35).]

JARDE (Fr.), **JARDON** (Fr.), n's. Zha^{3}rd, zha^{3}rd-o^{2}n^{2}. See *Bone* SPAVIN.

JARGONIUM (Lat.), n. n. Ja^{3}r(ya^{3}r)-go'ni^{2}-u^{3}m(u^{4}m). An element discovered in 1869 by Church in the zircone earth from Ceylon. [B, 38 (*a*, 14).]

JARRAH, n. In New South Wales, the *Eucalyptus marginata* and *Eucalyptus rostrata.* [B, 19, 121, 185, 275 (*a*, 35).]

JARRE (Fr.), n. Zha^{3}r. 1. See JAR. 2. The coarse hair of mammals. [A, 385.]

JARRET (Fr.), n. Zha^{3}r-ra. See HAM (1st def.).

JARRETIER (Fr.), adj. Zha^{3}r-re^{2}-te-a. See POPLITEAL.

JARRETIÈRE (Fr.), n. Zha^{3}r-re^{2}-te-e^{2}r. A kind of dry eczema developing generally in the region where the garters are worn. [L, 41 (*a*, 14).]

JARRINHA (Port.), n. Ja^{3}r-ren'ya^{3}. 1. In Brazil, the *Aristolochia macroura.* 2. The *Aristolochia cymbifera.* ["Proc. of the Am. Pharm. Assoc.," xxiii (*a*, 39) ; B, 121 (*a*, 35).]

JARROUSET (Fr.), n. Zha^{3}r-ru-sa. A place in the department of the Cantal, France, where there is a cold ferruginous spring. [Labarthe (*a*, 39).]

JARVILLE (Fr.). n. Zha^{3}r-vel. A place in the department of the Meurthe, France, near Nancy, where there are mineral springs. [L, 30 (*a*, 14).]

JASIONE (Lat.), n. f. Ja(ya^{3})-si^{2}-on'e(a). Gen., *-on'es* (-*œ*). Gr., *ἰασιώνη.* Fr., *j.* A genus of campanulaceous herbs. The *Jasioneæ* of Dumortier and Don are a tribe of the *Campanulaceæ.* The *Jasionideæ* of Dumortier are a family of the *Campanarieæ.* The *Jasionidiæ* of the same author are a family of the *Calcitubic.* The *Jasionieæ* of Schultz are a section of the *Pulicarieæ*, consisting of the subsections *Eujasioneæ* and *Pegolettieæ.* [B, 19, 42, 121, 170 (*a*, 35).]—**J. montana, J. undulata.** Fr., *j. de montagne, herbe à midi, scabieuse fausse.* Hairy sheep's scabious, scabious rampion, common sheep's bit scabious of Europe. It is astringent, and has been used as a vulnerary. [A, 511; B, 19, 121, 173, 275 (*a*, 35).]

JASMIN (Fr., Ger.), n's. Zha^{3}s-ma^{2}n^{2}, ya^{3}s-men'. See JASMINUM.—**Arabischer J.** (Ger.). See JASMINUM *sambac.*—**Baumartiger J.** (Ger.). The *Cestrum vespertinum.* [B, 48 (*a*, 14).]—**Blauer J.** (Ger.). The *Syringa persica.* [B, 48 (*a*, 14).]—**Deutsche J'blumen** (Ger.). The flowers of *Philadelphus coronarius.* [B, 180 (*a*, 35).]—**Dorniger J.** (Ger.). The *Lycium europæum.* [B, 48 (*a*, 14).]—**Falscher J.** (Ger.). See *False* JASMINE.—**Giftj'** (Ger.). See *Poisonous* JASMINE.—**Gartenj'** (Ger.). The *Philadelphus coronarius.* [B, 180 (*a*, 24).]—**Gebräuchlicher J.** (Ger.). See JASMINUM *officinale.*—**Gelber J.** (Ger.). JASMINOIDES (Lat.), adj. and n. n. Ja^{2}s(ya^{3}s)-mi^{2}n(men)-o-(o^{2})-id(ed)'ez(as). From *jasminum*, jasmine, and *εἶδος*, resemblance. 1. (Adj.) resembling the jasmine (a botanical species name). 2. (N.) the genus *Lycium.* [B, 121 (*a*, 35).]—**J. flaccidum.** The *Lycium barbarum.* [B, 173 (*a*, 35).]—**J. folio Pishanimis.** The *Cestrum nocturnum* of Murray. [B, 214.]—**J. linearifolium.** The *Lycium afrum.* [B, 173 (*a*, 35).]—**J. rhomboifolium.** The *Lycium europæum.* [B, 173 (*a*, 35).]

JASMINUM (Lat.), n. n. Ja^{2}s(ya^{3}s)-min(men)'u^{3}m(u^{4}m). Pers., *yásmin.* Fr., *jasmin.* Ger., *Jasmin.* It., *gelsomino.* Sp., *jazmín.* Jasmine or jessamine ; an extensive group of plants constituting the principal genus of the jasminworts. The *Jasmina* of B. Jussieu, or the *Jasminaceæ* of Lindley, are the jasminworts, an order of dicotyledons belonging to Lindley's *Echiales*, and by many authors made a tribe (*Jasmineæ*) of the *Oleaceæ.* The *Jasminarieæ* of Dumortier are an order of the *Torocoronæ*, comprising the *Jasminideæ*, *Strychnideæ*, *Ebenaceæ*, *Sapotaceæ*, etc. The *Jasmineaceæ* of G. Don are the *Jasmineæ* of R. Brown. The *Jasmineæ* (Fr., *jasminées ;* Ger., *Jasmineen*) are : 1. Of Necker and others, an order of plants including, according to De Candolle, *Lilac*, *Fraxinus*, *Olea*, *Phillyrea*, and *Ligustrum.* 2. Of R. Brown, an order restricted to the genera *J.* and *Nyctanthes*, to which others add *Menodora* and make the group a tribe of the *Oleaceæ* (see *Jasminaceæ*). The *Jasminideæ* of Dumortier are a family of the *Jasminarieæ*, consisting of the tribes *Lilacineæ*, *Oleineæ*, and *Jasmineæ.* [B, 1, 19, 34, 42, 64, 77, 170, 173, 180 (*a*, 35).]—**Flores jasmini.** The flowers of *J. officinale.* [B, 180 (*a*, 35).]—**J. album.** The *Philadelphus coronarius.* [B, 180 (*a*, 35).]—**J. angustifolium.** Fr., *jasmin à feuilles étroites.* Narrow-leaved jasmine. The bitter root, ground small and combined with lime-juice and the root of

Acorus calamus, is employed in India as a remedy for ringworm and herpes. [B, 19, 77, 172, 173, 180, 275 (α, 35).]—**J. arabicum.** See Coffea *arabica*.—**J. aureum.** A variety of the *J. officinale.* [B, 77, 275 (α, 35).]—**J. auriculatum.** Auriculated jasmine or the *juhi* of the Bengalese; a small fragrant-flowered species much cultivated at Ajmeer. [B. 496 (α, 35).]—**J. azoricum.** White Azorean jasmine, native of Madeira; allied to *J. officinale.* [B, 185, 275 (α, 35).]—**J. capense.** Fr., *jasmin du Cap.* The *Gardenia florida.* [B, 173 (α, 35).]—**J. chrysanthemum.** The *J. revolutum.* [B, 496 (α, 35).]—**J. floribundum.** The *habb-ez-zelim* of Abyssinia, where the bitter leaves, mixed with kousso, are employed as an anthelminthic, especially for tape-worm. [B, 19, 77 (α, 35).]—**J. fragrans.** See *J. sambac.*—**J. fruticans.** Yellow jasmine, common yellow-flowered jasmine, make-bate, a European species naturalized in the United States. [B, 34, 77, 275 (α, 35).]—**J. grandiflorum.** Fr., *jasmin à grandes fleurs* (ou *de Catalogne*, ou *d'Espagne*). Ger., *grossblühender J.* Hind., Bomb., *chambeli.* Beng., *jate.* Catalonian or Spanish jasmine, large-flowered jasmine; a species growing wild on the island of Tobago, and extensively cultivated in the south of France by grafting on *J. officinale*, which it very much resembles. It yields a part of the essential oil of jasmine of commerce. [B, 19, 77, 173, 180, 275 (α, 35).]—**J. hirsutum.** 1. Of Linnæus, see *J. pubescens.* 2. Of Willdenow, see Guettarda *speciosa.*—**J. humile.** The low or Italian yellow jasmine, an erect shrub, 3 or 4 feet high, cultivated as an ornament. [B, 77, 275 (α, 35).]—**J. laurinis foliis.** The *Cestrum nocturnum* of Murray. [B, 214.]—**J. nervosum.** A species found in Cochin-China, where the leaves and branches are used in decoction to purify the blood. [B, 77 (α, 35).]—**J. noctiflorum.** A species found in Sierre Leone, where the leaves are used as a poultice for ulcers. [B, 77 (α, 35).]—**J. nudiflorum.** Winter-flowering jasmine, a native of China, the yellow flowers of which appear before the leaves expand. [B, 77, 185, 275 (α, 35).]—**J. odoratissimum.** Fr., *jasmine très odorant, jasmin jonquille.* Yellow Azorean jasmine, jonquil-scented jasmine. The flowers, which have a perfume suggestive of a mixture of jasmine, jonquille, and orange-flowers, yield oil of jasmine. They retain their natural perfume when dry. [B, 77, 173, 275 (α, 35).]—**J. officinale.** Fr., *jasmin officinal* (ou *blanc*, ou *commun*). Ger., *gebräuchlicher Jasmin.* The common white or white-flowered jasmine; a native of India, but acclimatized in central and southern Europe. The flowers, once used in European medicine, under the name of *flores jasmini* (seu *jasmini officinalis*), as a neurotic and emollient remedy, are now valued only for the jasmine oil which they yield. A case of narcotic poisoning from eating the fruit of a jasmine, probably this species, is on record. [B, 5, 19, 77, 173, 180, 275 (α, 35).]—**J. paniculatum.** The *sieuhing-hwa* of the Chinese, who cultivate it for the sake of its flowers, which they use, with those of *J. sambac*, in scenting teas. [B, 77 (α, 35).]—**J. pubescens, J. pubigerum.** The Nepal downy jasmine. The leaves, boiled in oil, are used in India and China in ophthalmia, and the root is said to be a good antidote to the venom of snakes. [B, 77, 180, 275 (α, 35).]—**J. revolutum.** Yellow Nepal jasmine, an East Indian species the flowers of which yield an aromatic oil used as a perfume. The root is considered useful in ringworm. [B, 172, 275 (α, 35).]—**J. sambac.** Ar., *sumana, samana, yásamana, varde abyaza.* Pers., *gule supeda.* Guz., *mogaránu-phula.* Hind., Duk., *mogará, mogareká phula.* Beng., *mogará, mogará phula.* Mah., *mogaráchá phula.* Sanscr., *varashiki.* Bom., *mogari.* Fr., *jasmin d'Arabie.* Ger., *arabischer Jasmin.* The Zambak or Arabian jasmine, white-flowered Indian jasmine. The leaves, boiled in oil, yield a balsam used in the East Indies to anoint the head in complaints of the eye, and the root and flowers are valued as a lactifuge. In China, the flowers, under the name of *mo-le-hwa*, are used for scenting tea. [B, 77, 173, 180, 275 (α, 35).]—**J. sambac trifoliatum.** A variety of the *J. sambac.* [B, 173 (α, 35).]—**J. sambac, var. plenum.** The *bela* of the Bengalese, a double-flowered variety of the Arabian jasmine. [B, 172, 496 (α, 35).]—**J. syringafolium.** Wild jasmine; a wild climber common throughout the Tenasserim provinces. [A, 496 (α, 35).]—**J. triflorum.** See *J. angustifolium.*—**J. undulatum.** Fr., *jasmin ondulé.* A bitter-leaved species found in Malabar, where the flowers are used as a perfume; by some identified with the *J. sambac.* [B, 173, 496 (α, 35).]—**J. viminale, J. vimineum.** See *J. angustifolium.*—**J. vulgare.** See *J. officinale.*—**Oleum jasmini.** See *Oil of* jasmine.

Jasminum officinale. [A, 327.]

JASMINWORTS, n. Ja^{2}s'mi^{2}n-wu^{6}rts. The *Jasminaceæ* (see under Jasminum). [α, 24.]

JASPACHATES (Lat.), n. m. Ja^{2}s(ya^{3}s)-pa^3-ka(ch^{2}a^3)'tez(tas). Gen., *-at'u* (*-æ*). Gr., ἰασπαχάτης (from ἴασπις, jasper, and ἀχάτης, agate). The jasper agate, at one time used in dropsy and hepatic diseases. [L, 30 (α, 14).]

JASPER, n. Ja^{2}s'pu^{5}r. Gr., ἴασπις. Lat., *jaspis, iaspis.* Ger., *Jaspis.* A close-grained variety of quartz, anciently esteemed as a cardiac and stomachic stimulant and as a remedy in epilepsy, and worn as an amulet to arrest hæmorrhage and expel stone from the bladder. [B, 77, 180 (α, 35).]

JASPIDEAN, JASPIDEOUS, adj's. Ja^{2}s-pi^{2}d'e^2-a^{2}n, -u^{3}s. Lat., *iaspideus.* Fr., *jaspé.* Jaspery, like jasper; in botany, said of surfaces having numerous differently colored stains blending somewhat. [B, 1, 116 (α, 35).]

JASPIS (Lat.), n. Ja^{2}s(ya^{3}s)'pi^{2}s. Gen., *jasp'idos* (*-idis*). See Jasper.—**J. cærulea.** Armenian stone, a variety of azurite to which tonic virtues were once ascribed. [B, 180 (α, 35).]

JASTRZEMB, n. A hydrotherapeutic resort in Upper Silesia, Germany, where there are mineral springs, principally sulphurous, and a whey cure. [α, 45.]

JÁSUÑDI (Mar.), **JÁSUSA** (Guz.), n's. The *Hibiscus rosa sinensis.* [A, 479 (α, 21).]

JASZENA, n. A place in Zolyom, Hungary, where there are ferruginous springs. [L, 30 (α, 14).]

JASZTRABA, n. A place in Bars, Hungary, where there is an acidulous alkaline spring. [L, 30 (α, 14).]

JATAHY, JATAI, n's. Written also *jatchy, jatoba, jataica,* and *jetahy.* In Brazil, the *Hymenæa courbaril* or its resin. [B, 19, 121, 180 (α, 35).]

JATÁMÁNASI (Sanscr.), **JATÁMÁNSI** (Sanscr.), **JATAMASI** (Hind.), n's. The *Nardostachys jatamansi.* [A, 479 (α, 21).]

JATE (Beng., Hind.), n. See Jasminum *grandiflorum.*

JATEORRHIZA (Lat.), n. f. Ja(ya^3)-te^2-o^{2}r-ri(re)'za^3. See Jatrorrhiza.—**J. palmata.** See Jatrorrhiza *calumba.*

JATIPHALA (Sanscr.), **JATIPHALI** (Sanscr.), n's. The *Myristica fragrans.* [B, 19, 121 (α, 35).]

JATIPULUM (Cing.), n. The *Myristica aromatica.* [B, 88 (α, 39).]

JATOBA, n. See Jatahy.

JATROPHA (Lat.), n. f. Ja^{2}t(ya^{3}t)'ro(ro^2)-fa^3. From ἰατρός, a surgeon, and τρέφειν, to nourish. Fr., *médicinier.* Ger., *Brechnuss, Purgirnuss.* A genus of euphorbiaceous plants of the tribe *Crotoneæ.* The *Jatropheæ* (Fr., *jatrophées*) are: 1. Of Baillon, a series of the *Eupharbiaceæ.* 2. Of Meissner and others, the *Jatrophideæ* (Fr., *jatrophidées*) of Baillon, which are a group of one-ovuled *Euphorbiaceæ* (*Euphorbiaceæ uniovulatæ*). [B, 19, 42, 121, 170, 173, 180 (α, 35).]—**J. camanioc.** Fr., *camaniac, manioc doux, pain des nègres.* A variety of *J. manihot.* [B, 173 (α, 35).]—**J. candida.** Fr., *médicinier blanc.* A variety of *J. manihot.* [B. 173 (α, 35).]—**J. carthaginensis.** The *Manihot janipha.* [B. 180 (α, 35).]—**J. curcas.** Hind., *bagabherañdá.* Sanscr., *kánana erañda.* Beng., *bana-bherañda, ratanajota.* Bom., *meghalierañdi.* Ar., *dañde-nahri.* Fr., *grand médicinier, grand haricot du Pérou, huile de gros pignons d'Inde, gros ricin, ricin d'Amérique.* Ger., *schwarze Brechnuss, grosse Purgirnuss.* The angular-leaved physic-nut; a native of tropical America and domesticated in the East Indies. The seed, the so-called Barbadoes-nuts, are emetic and cathartic, though it is said they may be safely eaten, if deprived of their outer coverings. They were once largely used in European medicine under the name of *semina ricini majoris*, seu *nuces catharticæ americanæ* (seu *barbadenses*). They contain an oil, *oleum cicinum* (seu *infernale*), which is a drastic purgative, and is also applied externally in chronic rheumatism and various skin diseases. It differs from croton-oil in its slight solubility in alcohol. The leaves are discutient and rubefacient. The milky juice of the plant is said to have remarkable hæmostatic properties, and, when dried, is used by the country people, like collodion, to close cuts or wounds. ["Proc. of the Am. Pharm. Assoc.," xxiv, xxxv (α, 39); E. J. Waring, "Indian Med. Gaz.," Aug., 1880, p. 260; B, 5, 19, 121, 172, 173, 180, 275 (α, 35).]—**J. dulcis.** See *J. mitis.*—**J. divaricata.** A West Indian species said to have properties like those of *J. curcas.* [B, 214, 311 (α, 35).]—**J. elastica.** The *Siphonia elastica* (*Hevea guianensis*). [B, 173, 180 (α, 35).]—**J. Forskolei.** An Arabian species used like *J. glauca.* [B, 180 (α, 35).]—**J. glandulifera.** Fr., *médicinier glauque.* The *jungli erendi*, a small shrub found in India. In Bombay the juice of the plant is used as a counter-irritant to remove opacities of the cornea or thickening of the conjunctiva, and the oil of the seeds as a stimulant embrocation in chronic rheumatism. ["Proc. of the Am. Pharm. Assoc.," xxv (α, 39).]—**J. glandulosa.** Fr., *médicinier glanduleux.* An Arabian species probably identical with *J. Forskolei.* [B, 173, 180 (α, 25).]—**J. glauca.** See *J. glandulifera.*—**J. globosa.** The *Toxicodendron capense.* [B. 173 (α, 35).]—**J. gossypiifolia.** Fr., *médicinier à feuilles de cotonnier, herbe au mal de ventre* (1st def.), *médicinier sauvage.* 1. *Adenoropium gossypifolium*, the belly-ache bush or *baracayaiau-nambi* of the Guaranis. The leaves are used in decoction, the oily seeds are used in South America and the West Indies as a purgative, and the root, which is covered with a resinous exudation, of sharp aromatic taste, for the same purpose as cascarilla. 2. Of Jacquin, the *Adenoropium Jacquini*, a native of the same regions as the preceding, and having similar uses. [B, 121, 173, 180 (α, 35).]—**J. hernandifolia.** A species growing in the West Indies and South America. [B, 214, 311 (α, 35).]—**J. Heudelotii.** The *Ricinodendron africanum.* [B, 42 (α, 35).]—**J. Noerlda.** See *J. stimulans.*—**J. janipha.** See Manihot *janipha.*—**J. manihot.** See Manihot *utilissima.*—**J. mitis.** The *J. manihot*, or a variety of it. [B, 214, 311 (α, 35).]—**J. montana.** The *Baliospermum montanum.*—**J. multifida.** Fr., *médicinier bâtard* (ou *d'Espagne*, ou *multifide*), *grand ben purgatif, petit médicinier, plante-corail.* Coral plant, tyleberry; a species found in Brazil and the West Indies, having properties similar to those of *J. curcas.* The seeds yield an oil, sometimes mixed with castor-oil to increase its purgative properties. The latex, obtained by incision from the plant, is employed as a vul-

nerary. ["Proc. of the Am. Pharm. Assoc.," xxxv; B, 5, 121, 173, 180 (a, 35).]—**J. nana.** A species resembling *J. glandulifera.* ["Proc. of the Am. Pharm. Assoc.," xxv (a, 39).]—**J. officinalis.** See *J. opiifera.*—**J. oil.** Lat., *oleum cicinum, oleum infernale.* Ger., *Curcasöl, Höllenöl, Purgirnussöl.* A fixed oil, odorless and colorless when fresh, obtained from the seed of *J. curcas.* It is analogous in its action to croton-oil, and owes its purgative qualities to the ricinoleic acid which it contains. [B, 5, 180 (a, 35).]—**J. opiifera.** Fr., *médicinier utile.* A species found in Brazil, where the root, known as *raiz de tihu,* is used as an emetic and purgative in tertian fevers, dropsy, syphilis, and snake-bites. [B, 173, 180 (a, 35).]—**J. purgans.** The *J. curcas.* [B, 197 (a, 35).]—**J. rubra.** Fr., *médicinier rouge.* A variety of *J. manihot.* [B, 173 (a, 35).]—**J. staphysagriæfolia.** See *J. gossypifolia* (1st def.).—**J. stimulans, J. stimulosa.** Fr., *médicinier à aiguillons.* A species belonging to the section *Cnidoscolus.* [B, 34, 121, 173, 185 (a, 35).] See Cnidoscolus *stimulans.*—**J. triloba.** The *Aleurites triloba.* [B, 180 (a, 35).]—**J. umbellata.** Fr., *médicinier à ombelles.* A species found in Surinam, where it is employed as a tonic and emollient. [B, 73 (a, 35).]—**J. urens.** Fr., *médicinier brûlant* (1st def.). 1. Of Linnæus, see Cnidoscolus *quinquelobus.* 2. Of Waters, see *J. stimulans.* [B, 121, 173, 180 (a, 35).]—**J. vitifolia.** See *J. urens* (1st def.).—**Oleum jatrophæ curcadis.** An oil obtained from the seeds of *J. curcas.* [A, 319 (a, 21).]

JATTE (Fr.), n. Zha³t. A sort of plate or saucer used in laboratories. [L, 41.]

JAUCHE (Ger.), n. Ya³'u⁴ch²-e². See Ichor and Slough.

JAUCHICHT (Ger.), **JAUCHIG** (Ger.), adj's. Ya³'u⁴ch²-i²ch²t, -i²g. See Ichorous.

JAUCHSUCHT (Ger.), n. Ya³'u⁴ch²-zuch²t. A disease characterized by a foul discharge. [L, 80.]

JAUJAC (Fr.), **JAULNAC** (Fr.), n's. Zho-zha³k, zhol-na³k. A place in the department of Ardèche, France, where there is a mineral spring. [L, 41, 105 (a, 14).]

JAUMICZA, n. A place in Croatia, Hungary, where there is a cold ferruginous, gaseous, alkaline spring. [L, 49 (a, 14).]

JAUNÂTRE (Fr.), adj. Zho-na³-tr'. See Alboflavescens and Flavescent.

JAUNDICE, n. Ja³n'di²s. O. E., *jaunes, jaunis, jawnes.* O. Fr., *jalne.* Gr., ἴκτερος. Lat., *icterus, galbanus, galbinus,* from *galbus,* yellow. Fr., *jaunisse, bile répandue.* Ger., *Gelbsucht, gelbe Sucht, Gallendyschymose, Königskrankheit.* It., *itterizia, ittero.* Sp., *ictericia.* Syn.: *the yellows* (*q. v.*), *cachexia icterica, cholihæmia, cholæmia, cholhæmia, choloplania, cholosis, dermatocholosis, fellis obstructio* (seu *suffusio,* seu *superfusio*) *icteritia, icteritia flava, icterus flavus* (seu *verus*), *ileus flavus* (seu *icteroides*), *leseoli morbus, morbus arquatus* (seu *arcuatus,* seu *lateolus,* seu *regius*), *suffusio auriginosa* (seu *bilis,* seu *fellis*). A morbid condition characterized by a yellow hue of the skin, the conjunctiva, and the tissues and fluids of the body; due to an obstruction to the excretion of bile, or to faulty metamorphosis of the biliary pigment absorbed from the intestine. [D, 1; a, 17.]—**Autumnal j.** See Icterus *vernalis.*—**Black j.** See *Black* icterus (1st def.).—**Blue j.** See Cyanosis.—**Cardiac j.** Fr., *ictère cardiaque.* J. due to insufficiency of the tricuspid valves and feebleness in the action of the heart, thus causing venous congestion of the liver and consequent j. [a, 40.]—**Catarrhal j.** See *Catarrhal* icterus.—**Chronic j.** A protracted j. due to persistent mechanical obstruction of the bile ducts. [L, 20 (a, 40).]—**Contagious j.** See *Yellow* fever.—**Epidemic j.** A disease closely allied to acute yellow atrophy of the liver, if not identical with it, occurring as an epidemic, and chiefly affecting pregnant women. [L, 20 (a, 40).]—**False j.** See *Hæmatogenous j.*—**Febrile j.** See *Weil's* disease.—**Gall-stone j.** J. due to the obstruction of the bile ducts by gall-stone. [a, 40.]—**Grave j.** See Icterus *gravis.*—**Green j.** Lat., *icterus viridis.* I. in which the skin is of a green or olive hue.—**Hæmatogenous j.** J. due to a disorganization of the blood in which the coloring matter is set free. [a, 40.]—**Hepatogenous j.** J. produced by the absorption of bile into the blood after it has been formed in the liver, owing to some obstacle to its escape through the proper channels. [Pepper (a, 40).]—**Intermittent j.** See *Malarial j.*—**J.-berry.** The *Berberis vulgaris.* [B, 19, 275 (a, 35).]—**J. by suppression.** A form of j. the existence of which is no longer credited. It was supposed to be due to the accumulation in the circulation of the biliary constituents which had undergone the necessary chemical or mechanical changes to form bile. [D, 8.]—**J. of the new-born.** See Icterus *neonatorum.*—**J.-tree.** The *Berberis vulgaris.* [B, 19, 275 (a, 35).]—**Lead j.** Lat., *icterus saturninus.* The yellowish discoloration of the skin observed in the saturnine cachexia.—**Malarial j.** J. dependent upon hepatic congestion or cirrhosis produced by malarial infection. [L, 20 (a, 40).]—**Malignant j.** See Icterus *gravis.*—**Mechanical j.** J. dependent upon mechanical obstruction of the bile ducts by calculus or inflammatory deposits within, or by pressure of tumors, etc., from without. [a, 40.]—**Menstrual j.** [Senator]. See Icterus *menstrualis.*—**Obstructive j.** J. dependent upon an obstruction of the hepatic or common bile duct. [a, 40.]—**Paradoxical j.** Addison's disease. [a, 40.]—**Red j.** 1. An abnormal redness of the skin. 2. "A cutaneous affection consisting of redness diffused over the skin, without fever." [G, 16.]—**Retention j.** J. due to obstruction of the bile ducts. [a, 40.]—**Saturnine j.** See *Lead j.*—**Simple j.** See *Catarrhal* icterus.—**Spasmodic j.** Fr., *ictère spasmodique.* Spasmodic icterus. [a, 40.]—**Spring j.** See Icterus *vernalis.* [a, 40.]—**True j.** J. due to the resorption of bile after it has been secreted by the liver. [a, 40.]—**Urobilin-j.** A mild form of ordinary j. in which the bilirubin is reabsorbed and deposited in the skin after having been converted into urobilin. ["Med. Chron.," Feb., 1890, p. 368; "Ctrlbl. f. klin. Med.," 1889, p. 838 (a, 40).]—**White j.** See Chlorosis.—**Yellow j.** See *J.*

JAUNDICED, adj. Ja³n'di²sd. Affected with jaundice. [B.]

JAUNE (Fr.), adj. and n. Zhon. 1. (Adj.) yellow. 2. (N.) a yellow pigment. [B.] 3. (N.) see Vitellus.—**J. Aladin.** See Chrome *yellow.*—**J. amer.** Picric acid. [B.]—**J. brilliant.** Naples yellow. [B.]—**J. citron.** See Chrome *yellow.*—**J. d'aniline.** See Aniline *yellow.*—**J. d'eau.** The *Nuphar lutea.* [B, 121 (a, 35).]—**J. de Campo-Bello.** A derivative of phenol, furnishing a stable pigment. [B, 46 (a, 39).]—**J. de Cassel.** Lead oxychloride. [B, 38 (a, 14).]—**J. de chrome.** See Chrome *yellow.*—**J. de Cologne.** Lead chromate in troches, instead of cubes. [B, 38, 46 (a, 39).]—**J. de Fol.** A yellow pigment obtained by the action of arsenic acid on phenol, with the addition of acetic acid. [B, 46 (a, 39).]—**J. de Ganahl.** See *J. de Martius.*—**J. de l'œuf.** See Vitellus.—**J. de Manchester.** See *J. de Martius.*—**J. de Mars.** See Iron *yellow.*—**J. de Martius.** An intensely yellow pigment obtained by treating an acid solution of naphthylamine hydrochloride with a solution of potassium nitrate. [B, 46 (a, 39).]—**J. de montagne.** Argil colored yellow by iron oxide. [B, 38 (a, 14).]—**J. de Morinda.** A yellow pigment obtained from the root of *Morinda citrifolia.* [B, 46 (a, 39).]—**J. de murexide.** A yellow coloring matter derived from uric acid. Material that is to be colored by it is put in a solution of a zinc salt, and then passed into a bath of ammonium purpurate. [B, 46 (a, 39).]—**J. de Paris.** Lead oxychloride. [B, 38 (a, 14).]—**J. d'épine-vinette.** A yellow pigment obtained from the root of *Berberis vulgaris.* [B, 46 (a, 39).]—**J. de plomb.** Various yellow pigments containing lead. [B.]—**J. de Turner, J. de Vérone.** Lead oxychloride. [B, 38 (a, 14).]—**J. d'œuf.** 1. See Vitellus. 2. The *Agaricus cæsareus,* the *Achras mammosa* or its fruit, and the *Chrysophyllum macrophyllum.* [B, 88 (a, 39); B, 121, 173 (a, 35).]—**J. d'œuf-en-arbre.** The *Achras mammosa.* [B, 121 (a, 35).]—**J. d'Orléans.** Bixin. [B, 38 (a, 14).]—**J. d'outre-mer.** Baryta yellow. [B.]—**J. Hoang-Pe.** A yellow pigment furnished by the bark and wood of *Pterocarpus flavus.* [B, 46 (a, 39).]—**J. honquille.** See Chrome *yellow.*—**J. indien.** See *Indian* yellow.—**J. minéral.** See *J. de plomb.*—**J. minéral fin.** Antimony yellow. [B.]—**J. orange.** See Chrome *yellow.*—**J. royal.** See Arsenic *trisulphide.*—**J. soufre.** See Chrome *yellow.*—**J. végétal.** Rutinic acid. [B, 38 (a, 14).

JAUNEAU (Fr.), n. Zho-no. The *Ranunculus acris* and *Ranunculus ficaria.* [B, 121, 173 (a, 35).]

JAUNELET (Fr.), n. Zho-n'la. The *Cantharellus cibarius.* [B, 173 (a, 35).]

JAUNET (Fr.), n. Zho-na. The *Agaricus sinuatus.* [B, 121 (a, 35).]—**J. d'eau.** The *Nuphar luteum.* [B, 121, 173 (a, 35).]

JAUNETROLE (Fr.), n. Zho-n'trol. The *Equisetum arvense.* [B, 121, 173 (a, 35).]

JAUNETTE (Fr.), **JAUNIRE** (Fr.), n's. Zho-ne²t, -ner. The *Cantharellus cibarius.* [B, 121 (a, 35).]

JAUNISSE (Fr.), n. Zho-nes. See Jaundice.

JAUNOTTE (Fr.), n. Zho-no²t. 1. The *Cantharellus cibarius.* 2. Of Paullet, the *Russula fellea.* [B, 121, 173 (a, 35).]

JAUS (Ar.), n. The *Amygdalus communis* and other species of *Amygdalus.* [B, 88 (a, 39), 121 (a, 35).]

JAUZ (Ar.), n. 1. The *Randia dumetorum.* [Egasse, "Nouv. rem.," Aug. 24, 1888, p. 362.] 2. The *Juglans regia.*

JAVA, n. In India, the *Hordeum hexastichon.* [A, 479 (a, 21).]—**J. harade.** A variety of *Terminalia chebula.* [A, 479 (a, 21).]

JAVA, n. Ja³'va³. An island in the Pacific Ocean where there are warm springs called by the Malayans *tchipannas.* [L, 105 (a, 39).]

JAVANINE, n. Ja³v'a³-nen. Lat., *javanina.* Fr., *j.* Ger., *Javanin.* It., *giavanina.* A substance obtained from the amorphous bases of Java calisaya-bark. It occurs in rhombic scales, very soluble in ether (without crystallization on evaporation), soluble in dilute sulphuric acid, with an intense yellow color, and yielding with oxalic acid a neutral salt crystallizing in scales. ["Proc. of the Am. Pharm. Assoc.," xxvi (a, 39).]

JÁVAÑTRI (Guz.), n. Mace. [A, 479 (a, 21).]

JÁVAÑTRI-KA-TELA (Hind.), n. The oil of *Myristica officinalis.* [A, 479 (a, 21).]

JAVART (Fr.), n. Zha³-va³r. See Grease (2d def.).

JAVÁSHIRA (Bomb.), n. See Ferula *galbanifera.*

JAVATRIE (Hind.), n. Mace. [B, 92 (a, 14).]

JAVE, n. In the East Indies, the *Jatropha elastica.* [B, 88 (a, 39).]

JÁVITRI (Hind.), n. See Jávañtri.

JAW, n. Ja⁴. Gr., γνάθος Lat., *maxilla.* Fr., *mâchoire.* Ger., *Kiefer, Kinnbacken.* It., *mascella, ganascia.* Sp., *quijada.* A bone or a bony structure forming a portion, fixed or movable, of the apparatus by which the teeth are brought together; also, in the lower animals, any structure serving a similar purpose; of an instrument, either one of the opposing parts by which it is made to grasp an object.—**Big-j.** A common term in Montana for actinomycosis. [J. Law, "Med. News," Dec. 22, 1883, p. 695.]—**Locked j., Lock-j.** See Trismus.—**Lumpy j.** A popular term for actinomycosis.—**Wolf's-j.** See *Complicated* hare-lip.

JAWA (Hind.), n. The *Hibiscus rosa sinensis.* [B, 172 (a, 35).]—**J.-wut.** In Java, the *Panicum italicum.* [B, 121 (a, 35).]

JAWARI (Hind.), n. The *Sorghum vulgare.* [B, 172 (a, 35).]

JAWASA (Hind.), n. The *Alhagi Maurorum.* Its fresh juice is used as a diuretic, generally in combinations with laxatives and aromatics. ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 39).]

JAWATRI, n. See Jávañtri. [B, 19 (a, 35).]

JAWI (Hind.), n. The *Azadirachta indica.* [B, 172 (a, 35).]

JAXTFELD (Ger.), n. Ya^{3}xt′fe^{2}ld. A place in the Neckar district, Würtemberg, Germany, where there are a saline spring and a bathing establishment. [L, 30, 37 (*a*, 14).]

JAYAPALA (Beng.), n. See CROTON *tiglium*.

JAYAPHALA (Beng.), n. The genus *Myristica*. [B, 121 (*a*, 35).] Cf. JATIPHALI.

JAYET (Fr.), n. Zha-ya. Jet. [B.] See AMBRA *nigra*.

JEANNETTE (Fr.), n. Zha^2-ne^{2}t. 1. The *Narcissus poeticus*. 2. The *Narcissus pseudonarcissus*. [B, 88 (*a*, 39); B, 19, 121, 173 (*a*, 35).]

JEBBEL-INDE, n. In Egypt, a fine seed, yellow and bitter, used as an emetic. [L, 87.]

JEBET (Ar.), n. 1. The *Fœniculum vulgare*. 2. The *Peucedanum graveolens*. [B, 88 (*a*, 39), 121 (*a*, 35).]

JECINEROSUS (Lat.), adj. Je(ye^2)-si^{2}n(ki^{2}n)-e^{2}r-os′u^{3}s(u^{4}s). See JECOROSE.

JECORAL, adj. Je^{2}k′o^2-r′l. From *jecur*, the liver. Fr., *jécoral*. See HEPATIC.

JECORARIA (Lat.), n. f. Je^{2}k(ye^{2}k)-o^{2}r-a(a^3)′ri^2-a^3. From *jecur*, the liver. The *Marchantia polymorpha*. The *Jecorariæ* are a subtribe of the *Marchantieæ*, consisting of *Marchantia*, *Fegatella*, *Fimbriaria*, etc. [B, 121, 170 (*a*, 35).]

JECORARIOUS, adj. Je^{2}k-o^{2}r-a′ri^2-u^{3}s. From *jecur*, the liver. Fr., *jécoraire*. See HEPATIC.

JECORIN, n. Je^{2}k′o^{2}r-i^{2}n. From *jecur*, the liver. A solid substance obtained by Drechsel from horses' liver, the sodium salt of which has the composition $C_{405}H_{185}N_5SP_3Na_2O_{46}$. It is so hygroscopic as to become syrupy on exposure to the air, and, on contact with water, swells up to a mucilaginous mass, dissolving only in an excess of water. Like glucose, it reduces cupric oxide. It is not certainly known whether it is a true chemical compound or a mixture. ["Ber. d. sächs. Gsllsch. d. Wssnsch.," 1886, p. 44; "Ctrlbl. f. d. med. Wssnsch.," Nov. 6, 1886, p. 803 (B).]

JECOROSE, adj. Je^{2}k′o^{2}r-os. Lat., *jecorosus*, *jecinerosus*, *jecoriticus* (from *jecur*, the liver). Fr., *jécoraire*. See HEPATIC.

JECTIGATIO (Lat.), n. f. Je^{2}k(ye^{2}k)-ti^2-ga(ga^3)′shi^2(ti^2)-o. Gen., *-on′is*. From *jacere*, to throw. Fr., *jectigation*. 1. A sort of epilepsy. 2. A spasmodic action of the pulse or heart, or of any part (or of the whole) of the body. [L, 41 (*a*, 14).]

JECUR (Lat.), n. n. Je(ye^2)′ku^{5}r(ku^{4}r). Gen., *jec′oris*, *jecin′oris*. The liver. [A, 312 (*a*, 21).]—**J. cum felle anguillæ exsiccatum** [Ed. Ph., 1699]. Eel's liver dried in its gall. [A, 69.]—**J. marinum.** See HEPATUS.—**J. uterinum.** The placenta. [*a*, 40.]

JEDWAR, n. The *Curcuma zedoaria*. [B, 19 (*a*, 35).]

JEFFERSONIA (Lat.), n. f. Je^{2}f-fu^{5}r-son′i^2-a^3. From *Jefferson*, a president of the United States. Twin-leaf; of Barton, a genus of the *Berberidaceæ*, tribe *Berbereæ*. [B, 19, 34, 42 (*a*, 35).]—**J. Bartonis, J. binata, J. diphylla.** Ground-squirrel pea, twin-leaf rheumatism-root; a North American species with a thick, knotty root, sometimes substituted for senega. It is emetic in large doses, tonic and expectorant in smaller doses, and has been used in rheumatism and syphilis. It contains an acrid principle like polygalic acid. [B, 5, 19, 34, 173, 275 (*a*, 35).]

JEFFERSONIA DIPHYLLA. [A, 327.]

JEISSOKU (Jap.), n. The *Papaver somniferum*. [B, 88 (*a*, 39).]

JEJUNAL, adj. Je-ju^2′n′l. From *jejunus*, fasting. Of or pertaining to the jejunum. [L.]

JEJUNIOSUS (Lat.), adj. Je^2(ya)-ju^2(jy)-ni^2-os′u^{3}s(u^{4}s). From *jejunus*, fasting. Fr., *à jeun*. See FASTING (adj.).

JEJUNITAS (Lat.), n. f. Je^2(ya)-ju^2(yu)′ni^{2}t-a^{2}s(a^{3}s). Gen., *-tat′is*. From *jejunus*, fasting. 1. Fasting. 2. Meagreness, thinness. [A, 312 (*a*, 21).]

JEJUNITIS (Lat.), n. f. Je(ya)-ju^2(yu)-ni(ne)′tis. Gen., *-it′idos* (*-idis*). For deriv., see JEJUNUM and *-itis**. Inflammation of the jejunum. [A, 326 (*a*, 21).]

JEJUNIUM (Lat.), n. n. Je(ya)-ju^2(yu)′ni^2-u^{3}m(u^{4}m). See FAST (n.).

JEJUNO-ILEOSTOMY, n. Je-ju^2″no-i^{2}l-e-o^{2}s′to-mi^2. From *jejunum* (*q. v.*), *ileum* (*q. v.*), and *στόμα*, an aperture. Fr., *jéjuno-iléostomie*. The formation of an artificial communication between the jejunum and the ileum. [Jesset; "Sem. méd.," Mar. 20, 1889, p. 94 (*a*, 18).]

JEJUNO-ILEUM (Lat.), n. n. Je(ya)-ju^2(yu)″no(no^3)-i^{2}l(el)′-e^2-u^{3}m(u^{4}m). Of Cruveilhier, the small intestine from the duodenum to the colon. [L, 115 (*a*, 29).]

JEJUNOSTOMY, n. Je-ju^2-no^{2}s′to-mi^2. From *jejunum* (*q. v.*) and *στόμα*, an aperture. Fr., *jéjunostomie*. The operation of making a more or less permanent opening into the jejunum. ["Rev. des sci. méd.," Oct. 15, 1888, p. 602 (*a*, 18); "N. Y. Med. Jour.," Feb. 11, 1888, p. 152; C. H. Golding Bird, "Brit. Med. Jour.," Dec. 5, 1885.]

JEJUNUM (Lat.), n. n. Je^2(ya)-ju^2(yu)′nu^{3}m(nu^{4}m). From *jejunus*, fasting. Fr., *jéjunum*. Ger., *Leerdarm*. The upper two fifths of that part of the small intestine below the duodenum; so called because it was formerly supposed to be empty after death. Its convolutions chiefly occupy the umbilical and left iliac regions. [C.]

JELLY, n. Je^{2}l′i^2. Lat., *gelatina* (from *gelare*, to freeze or stiffen). Fr., *gélée*. Ger., *Gallerte*. See GELATINA (2d def.).—**Calf's-foot j.** A j. made by boiling calves' feet in water in the proportion of 3 pints of water to each foot, boiling down to one half, straining, clearing, sweetening, and flavoring with lemon spices and wine. [*a*, 42.]—**J. of the umbilical cord.** See GELATIN *of Wharton*.—**J.-plant.** In Australia, the *Eucheuma speciosum*. [B, 19, 275 (*a*, 35).]—**Pectoral j.** [Danbitz]. A preparation consisting of 12 parts of gelatin, 60 of sugar, and 120 of herbal infusion (of anise, Iceland moss, etc.). [L, 120.]—**Purgative j.** See DIACYDONION *jalappinum*.—**Water j.** The *Hydropeltis purpurea*. [*a*, 35.]—**Whartonian j., Wharton's j.** See GELATIN *of Wharton*.

JENATZ, n. A place in Prættigau, canton of Grisons, Switzerland, where there are gaseous, sulphurous, and alkaline springs. [L, 30, 105, 135 (*a*, 14, 39).]

JENEPYRE, n. Je^{2}n′e^2-pir. The *Juniperus communis*. [A, 505 (*a*, 21).]

JENKINSONIA (Lat.), n. f. Je^{2}n^2-ki^{2}n-son′i^2-a^3. From *Jenkins*, a proper name. Of Sweet, a section of the genus *Pelargonium*. [B, 121 (*a*, 35).]—**J. antidysenterica.** The *Pelargonium antidysentericum*. [B, 180 (*a*, 35).]

JENNERIAN, adj. Je^{2}n-ne′ri^2-a^{2}n. Fr., *jennérien*. Ger., *Jennerisch*. Described by Edward Jenner.

JENZAT (Fr.), n. Zha^{3}n^2-za^3. A place in the department of Allier, France, where there are warm gaseous springs. [L, 49, 87 (*a*, 14).]

JÉQUIRITI (Fr.), n. Zha-ke-re-te. See ABRUS *precatorius*.—**Graine de j.** See under ABRUS *precatorius*.

JEQUIRITIC, adj. Je^{2}k-i^{2}r-i^{2}t′i^{2}k. Of, pertaining to, or produced by jequirity. [B.]

JEQUIRITIN, n. Je^{2}k-i^{2}r′i^{2}t-i^{2}n. A soluble immediate principle, obtained by Bruylants and Venneman from germinating jequirity-seeds, to which (and not to a micro-organism) they attribute the irritant properties of the drug. ["Proc. of the Am. Pharm. Assoc.," xxxiv (*a*, 39).]

JEQUIRITY, n. Je^{2}k-i^{2}r′i^{2}t-i^2. Fr., *jéquiriti*. Ger., *J.* The *Abrus precatorius*. ["Am. Jour. of Pharm.," July, 1890, p. 350.]—**Infusion of j.** An infusion made by macerating 150 grains of the decorticated j.-seeds in 16 fl. oz. of cold water; long used, in Brazil, in trachoma and pannus (see also under ABRUS *precatorius*), and introduced to the notice of European surgeons by De Wecker. Three times a day for three days the lids are everted, and the infusion thoroughly applied to the conjunctiva. The result is a purulent inflammation with croupous tendency, which in the course of 8 or 10 days days subsides, leaving in some instances the cornea clear and the granulations destroyed. [F.]—**J'pilz** (Ger.). See BACILLUS *of j. ophthalmia*.—**J.-seeds.** The seeds of *Abrus precatorius*. [B, 81 (*a*, 38).]—**J.-zymase.** A substance separated from a decoction of j.-seeds, and possessing the characteristic physiological property of the drug. It is a slightly yellowish material, entirely soluble in water, and liquefying starch. ["Proc. of the Am. Pharm. Assoc.," xxxiv (*a*, 39).]

JERK, n. Ju^{5}rk. A sudden muscular movement.—**Jaw-j.** A phenomenon consisting in a contraction of the muscles of mastication upon an extensile impulse similar to that in patellar tendon reflex. It is produced by a stroke downward on the lower teeth or chin when the mouth is well opened. [De Watteville; "Lancet," Jan. 30, 1886, p. 220 (*a*, 40).]—**Knee-j.** Ger., *Kniestoss*. A phenomenon described by Erb as "patellar-tendon reflex." It consists in the spasmodic contraction of the quadriceps femoris produced by a quick stroke upon the patellar tendon when the leg is slightly flexed. Normally it is rarely absent. It is of great diagnostic importance in diseases of the spinal cord. [Gowers, "Lancet," 1885; Wood (*a*, 40).]

JERKING, adj. Ju^{5}rk′i^{2}n^2. Jerk-like.

JERKS, n. Ju^{5}rks. Epidemic chorea. [*a*, 40.]

JEROFFLERIS, n. Je^{2}r-o^{2}f′le^{2}r-i^{2}s. Fr., *giroflée*. Ger., *Lack*, *Levkoje*, *Goldlack*. See CHEIRANTHUS *cheiri*.

JERSEY, n. Ju^{5}r′zi^2. One of the channel islands near the coast of France, where there is sea-bathing. [L, 87.]

JERUBEBA, n. In Brazil, the *Solanum paniculatum*. [B, 5 (*a*, 35).]

JERVATE, n. Ju^{5}r′vat. A salt of jervic acid. [B.]

JERVIA (Lat.), n. f. Ju^{5}r(ye^{2}r)′vi^2(wi^2)-a^3. See JERVINE.

JERVIC ACID, n. Ju^{5}r′vi^{2}k. Fr., *acide jervique*. A tetrabasic, crystalline acid, $C_{14}H_{10}O_{12}$, obtained from the root of *Veratrum album*. [B, 2.]

JERVINE, n. Ju^{5}r′ven. Lat., *jervina*, *jervinum*, *jervia*. Fr., *j.* Ger., *Jervin*. It., *jervina*. An alkaloid, $C_{30}H_{46}N_2O_3 + 2H_2O$ (or $C_{27}H_{47}N_2O_8$), obtained from the root of *Veratrum album* and other species of *Veratrum*. It is a white powder, crystallizing from an alcoholic solution, tasteless, of a slight alkaline reaction, and very sparingly soluble in water, freely soluble in alcohol and in chloroform. The symbol Je is sometimes applied to it. [B, 46, 93 (*a*, 39); B, 118; "Proc. of the Am. Pharm. Assoc.," xxii, xxiv, xxvi (*a*, 39).]

JESSAMINE, n. Je^{2}s'a^{2}m-i^{2}n. See JASMINE.—**Wild j.** See ANEMONE *nemorosa.*—**Yellow j.** The *Gelsemium sempervirens.* ["Proc. of the Am. Pharm. Assoc.," vii (*a*, 39).]

JESSE, n. Je^{2}s. 1. The *Jasminum officinale.* 2. The *Cyprinus jeses.* [A, 505 (*a*, 21); B, 88 (*a*, 39).]

JETAGE (Fr.), n. Zhe^2-ta^{3}zh. Of the veterinarians, a mucopurulent discharge from the nostrils of horses suffering from glanders or distemper. [Nysten (*a*, 40).]

JETAIBA (Port.), n. Je^{2}t-a^3'e-ba^3. Of Pison, the *Hymenæa courbaril.* [B, 121 (*a*, 35).]

JETHE MADHA, n. In India, the *Glycyrrhiza glabra.* [A, 479 (*a*, 21).]

JETICUCU, n. In Brazil, the *Ipomœa mechoacanha* and, according to Gomez, the *Ipomœa operculata.* [B, 121 (*a*, 35).]

JETIMADH (Hind.), n. See JETTIMUD.

JETOLINE, n. Je^{2}t'o-li^{2}n. A black pigment, $C_{12}H_{10}N_2$, one of the varieties of aniline black. [B, 81.]

JETTIMUD, n. In the East Indies, the *Glycyrrhiza glabra* and other species of *Glycyrrhiza* or their roots (licorice). [B, 19, 121 (*a*, 35).]

JEUKBOL (Dutch), n. Lit., itch-bulb; in South Africa, the *Drimia ciliaris.* ["Jour. of the Soc. of Arts"; "Brit. and Colon. Drug.," June 11, 1887, p. 586; B, 18 (*a*, 35).]

JEUNE (Fr.), adj. Zhu^{5}n. See ADOLESCENT.

JEÛNE (Fr.), n. Zhu^{5}n. See FAST (n.).

JEUNESSE (Fr.), n. Zhu^5-ne^{2}s. See ADOLESCENCE.

JEÛNEUR (Fr.), n. Zhu^5-nu^{5}r. A fasting man. ["Prov. méd.," Nov. 17, 1888, p. 652.]

JEW-BUSH, n. Ju^3'bu^{4}sh. The *Pedilanthus tithymaloides.* [B, 19, 275 (*a*, 35).]

JEWEL-WEED, n. Ju^3'e^{2}l-wed. The genus *Impatiens;* in the pl., the *Balsaminaceæ.* [B, 19, 34 (*a*, 35).]—**Spotted j.-w.** The *Impatiens fulva.* [B, 275 (*a*, 35).]

JEW'S-EAR, JEW'S-EARS, n's. Ju^{3}z'er, -erz. Ger., *Judasohr, Judasöhrchen.* 1. See EXIDIA *auricula Judæ.* 2. The *Peziza coccinea.* 3. The *Peziza cochleata.* 4. The *Peziza venosa.* [A, 505 (*a*, 21).]

JEWUL, n. In the East Indies, the resin of *Odina wodier.* [B, 19, 121 (*a*, 35).]—**J'latu** (Cing.). Gum arabic. [B, 92 (*a*, 14).]

JHÁHU (Hind.) n. The *Tamarix orientalis.* [A, 479 (*a*, 21).]

JHÁLA (Hind.), n. The *Salvadora persica* and *Salvadora oleoides.* [A, 479 (*a*, 21).]

JHARBERI (Hind.), n. The *Zizyphus jujuba.* [B, 172 (*a*, 35).]

JECAMA [Mex. Ph.] (Sp.), n. He'ka^3-ma^3. See DOLICHOS *tuberosus.*

JIGGER, n. Ji^{2}g'u^{5}r. See PULEX *penetrans.*

JIMSON WEED, n. Ji^{2}m's'n wed. See DATURA *stramonium.*

JIN-CHEN (Chin.), n. Ginseng. [B, 88 (*a*, 39).]

JINKED, adj. Ji^{2}n^{2}kd. Of the veterinarians, wrenched or sprained in the back (said of horses). [*a*, 40.]

JIQUILITE, n. In Central America, the indigo plant. [B, 19 (*a*, 35).]

JIRA-NO-PAKHA, n. In India, a preparation made by soaking cumin in vinegar, drying, baking, and mixing with peppermint and other ingredients; used in constipation, deranged digestion, headache, etc. [A, 479 (*a*, 21).]

JIRUN (Hind.), n. The *Cuminum cyminum.* [A, 479 (*a*, 21).]

JITO, n. In Brazil, (1) a species of *Guarea*, probably the *Guarea purgans* or *Guarea spiciflora;* and (2) the *Trichilia elastica.* [B, 19, 121 (*a*, 35).]

JOANIN (Fr.), n. Zho-a^3-nan^2. See SAUBUSE.

JOANNESIA (Lat.), n. f. Jo(yo)-a^{2}n(a^{3}n)-ne(na)'si^2-a^3. From *Johannes*, a proper name. Fr., *joannée, joannésie.* A genus of euphorbiaceous trees of the tribe *Crotoneæ.* [B, 5, 38, 42 (*a*, 35).]—**J. princeps.** A Brazilian species the bark of which yields a poisonous juice used to stupefy fish. The seeds, called in Brazil *purga dos palistas*, are purgative and contain a medicinal oil (see *Oil of* ANDA). [B, 5, 42, 121, 173, 180 (*a*, 35).]

JOANNETTE (Fr.), n. Zho-a^{3}n-ne^{2}t. The *Œnanthe pimpinelloides.* [B, 121, 173 (*a*, 35).] See MARTIGNÉ-BRIANT.

JOB (Fr.), n. Zhob. A place in the department of Puy-de-Dôme, France, where there are numerous gaseous aperient springs. [L, 49, 87, 105 (*a*, 14).]

JOB'S-DROPS, JOB'S-TEARS, n's. Johz'dro^{2}ps, -terz. Ger., *Hiobsthränen.* The *Coix lacrima.* [B, 180, 185, 275 (*a*, 35).]

JOBSBAD (Ger.), n. Yobs'ba^{3}d. See ANNABERG.

JOCH (Ger.), n. Yoch^2. A yoke. [*a*, 14.]—**J'sporige.** The *Zygosporeæ.* [B.]

JOCHMUSKEL (Ger.), n. Yoch^2'musk-e^{2}l. A zygomatic muscle. [*a*, 29.]—**Grosser J.** See ZYGOMATICUS *major.*—**Kleiner J.** See ZYGOMATICUS *minor.*

JOD (Ger.), n. Yod. See IODINE, and for compounds not here given, see the corresponding words in *Iod-.*—**J'cigarren.** See CIGARÆ *jodatæ.*—**J'elupinselung.** Painting with iodine.—**J'haltig.** Containing iodine. [*a*, 21.]—**J'hämatin.** Hæmin formed by the union of iodine with hæmatin. ["Ctrlbl. f. d. med. Wssnsch.," April 24, 1886, p. 289 (B).]—**J'salbe.** See *Unguentum* IODI.—**J'sauer.** Iodic; with the name of a base, the iodate of the base. [B.]—**J'säure.** Iodic acid. [A, 324.]—**J'tinktur.** Tincture of iodine.—**J'zinkstärkelösung.** See *Liquor* AMYLI *volumetricus.*

JODATUS (Lat.), adj. Jod(yod)-at(a^{3}t)'u^{3}s(u^{4}s). From *iodum*, iodine. A German form of *iodatus* (*q. v.*).

JODETUM (Lat.), n. n. Jod(yod)-et(at)'u^{3}m(u^{4}m). From *iodum*, iodine. An iodide. [B.]—**J. ferrosum** [Dan. Ph., Finn. Ph.]. 1. See IRON *iodide.* 2. An aqueous solution of ferrous iodide, made by mixing 5 parts of iron powder, 41 parts of iodine, and 50 parts of water and filtering. It contains about 50 parts of ferrous iodide. [B, 95.]—**J. ferrosum saccharatum** [Finn. Ph.]. See FERRI *iodidum saccharatum.*—**J. hydrargyricum** [Finn. Ph.] (**rubrum** [Dan. Ph.]). See MERCURY *biniodide.*—**J. hydrargyricum rubrum.** See MERCURY *biniodide.*—**J. hydrargyrosum** (**flavum**). See MERCURY *protiodide.*—**J. kalicum** [Netherl. Ph., Norw. Ph., Swed. Ph., Dan. Ph., Finn. Ph.]. Potassium iodide. [B, 95.]—**Pilulæ jodeti ferrosi** [Dan. Ph.]. See *Pilulæ* FERRI *iodidi.*—**Syrupus jodeti ferrosi** [Dan. Ph., Finn. Ph.]. See *Syrupus* FERRI *iodidi.*—**Unguentum jodeti kalici** [Dan. Ph., Finn. Ph.]. See *Unguentum* POTASSII *iodidi.*

JODID (Ger.), n. Yod-ed'. An iodide. The term is generally used in composition, and denotes that one of two similar iodides which contains the greater relative amount of iodine. [B.]

JODINA [Gr. Ph.] (Lat.), n. f. Jod(yod)-i(e)'na^3. Iodine. [B, 95 (*a*, 38).]

JODISMUS (Lat.), n. m. Jod(yod)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From *iodum*, iodine. See IODISM.

JODIUM (Lat.), n. n. Jod'(yod')i^2-u^{3}m(u^{4}m). Of the Gr. Ph., see IODINE.—**Tinctura jodii** [Gr. Ph.]. See *Tinctura* IODI.

JODOFORMIUM (Lat.), n. n. Jod(yod)-o(o^3)-fo^{2}rm'i^2-u^{3}m-(u^{4}m). See IODOFORM.—**J. bituminatum.** See IODOFORMIUM *bituminatum.*

JODOL (Ger.), n. Yod'o^{2}l. See IODOL.

JODQUECKSILBER (Ger.), n. Yod'kwe^{2}k-zi^{2}lb-e^{2}r. Mercury iodide. [B.]—**Gelbes J.** Yellow mercury iodide; mercurous iodide. [B.]—**J'arseniklösung.** Donovan's solution. See *Liquor* ARSENII *et hydrargyri iodidi.*—**Rothes J.** Red mercury iodide; mercuric iodide. [B.]

JODUM (Lat.), n. Jod(yod)'u^{3}m(u^{4}m). See IODINE.—**Injectio jodi jodurata.** See *Injectio* IODI *jodurata.*—**Liquor jodi cum kalio jodato** [Russ. Ph.]. See *Liquor* IODI *compositus.*—**Liquor jodi volumetricus** [Ger. Ph.], **Solutio jodi** [Ger. Ph.]. A solution of 12·7 grammes of iodine and 20 of potassium iodide in water enough to make 1 litre of solution. [B. 205 (*a*, 38).]—**Solutio jodi spirituosa** [Dan. Ph.]. See *Tinctura* IODI.—**Tinctura jodi decolorata** [Ger. Ph. (1st ed.), Swiss Ph., Russ. Ph.]. A preparation made by dissolving 10 parts each of iodine and sodium hyposulphite in 10 of water, and adding 16 parts of alcoholic solution of caustic ammonia (15 [Swiss Ph.]), and, after a few minutes, 75 parts of alcohol, allowing to stand 3 days (6 [Russ. Ph.]), and filtering. [B, 95 (*a*, 38).]—**Unguentum jodi Rademacheri** [Swiss Ph.]. An ointment made by moistening 1 part of iodine with a little absolute alcohol, reducing to a very finely triturated condition, and mixing with 20 parts of hog's lard. It contains nearly 5 per cent. of iodine. [B, 95 (*a*, 38).]

JODÜR (Ger.), n. Yod-u^{5}r'. An iodide. The term is used generally as an affix in composition, and denotes of two similar iodides that one which contains the smaller relative amount of iodine. [B.]

JODURETUM (Lat.), n. n. Jod(yod)-u^2(u)-re(ra)'tu^{3}m(tu^{4}m). From *iodum*, iodine. See IODIDE.—**J. ferrosum.** Ferrous iodide. [B.] See IRON *iodide.*

JODWASSERSTOFF (Ger.), n. Yod'va^{3}s-e^{2}r-stof. See HYDRIODATE.—**J'säure.** Hydriodic acid.

JOHANNESBAD (Ger.), n. Yo-ha^{3}n'ne^{2}s-ba^{3}d. 1. A place in the district of Gitschin, Bohemia, where there is a hot alkaline spring and a ferruginous spring. [L, 30, 37, 49, 105 (*a*, 14).] 2. See NÖRDLINGEN.

JOHANNESIA (Lat.), n. f. Jo(yo)-ha^{2}n(ha^{3}n)-ne(na)'si^2-a^3. From *Johannes*, a proper name. See JOANNESIA. The *Johannesieæ* (Fr., *johannesiées*) of Baillon are a division of euphorbiaceous plants belonging to the series *Jatropheæ.* [B, 5, 121 (*a*, 35).]

JOHANNESINE, n. Jo-ha^{2}n'ne^{2}s-en. Ger., *Johannisin.* An alkaloid found by Mello Oliveira in oil of anda, but said by Conty to be inert. [B, 5 (*a*, 38).]

JOHANNISBAD (Ger.), n. Yo-ha^{3}n'ni^{2}s-ba^{3}d. See JOHANNESBAD.

JOHANNISBEERE (Ger.), n. Yo-ha^{3}n'ni^{2}s-bar-e^2. The genus *Ribes.* [B, 180 (*a*, 35).]—**Eingekochter J'nsaft.** See *Rob* RIBIUM *rubrorum.*—**Gemeine J., Rothe J.** The *Ribes rubrum.* [B, 180 (*a*, 35).]—**Schwarze J.** The *Ribes nigrum.* [B, 180 (*a*, 35).]—**Schwarzer J'nsaft.** See *Rob* RIBIUM *nigrorum.*

JOHANNISBERG (Ger.), n. Yo-ha^{3}n'ni^{2}s-be^{2}rg. A place in the province of Hessen, Prussia, where there is a gaseous, saline and alkaline spring. [L, 30, 135 (*a*, 39).]

JOHANNISBLUME (Ger.), n. Yo-ha^{3}n'ni^{2}s-blum-e^2. 1. The *Chrysanthemum leucanthemum.* 2. The *Hypericum perforatum.* 3. The *Arnica montana.* 4. The *Galium verum.* [B, 48 (*a*, 14); B, 180 (*a*, 35).]

JOHANNISBLUT (Ger.), n. Yo-ha^{3}n'ni^{2}s-blut. The *Hypericum perforatum* and the *Scleranthus perennis.* [B, 180 (*a*, 35).]

JOHANNISBROD (Ger.), **JOHANNISBROT** (Ger.), n's. Yo-ha^{3}n'ni^{2}s-brod, -brot. St. John's bread; carob beans. [B, 180 (*a*, 35).] See under CERATONIA *siliqua.*—**J'baum.** See CERATONIA.

JOHANNISBRUNNEN (Ger.), n. Yo-ha^{3}n'ni^{2}s-brun-ne^{2}n. A place in the district of Troppau, Austrian Silesia, where there

are a gaseous and ferruginous spring and a bathing establishment. [L, 30 (*a*, 14).]

JOHANNISFACKEL (Ger.), n. Yo-ha^{3}n'ni^{2}s-fa^{3}k-e^{2}l. The *Verbascum thapsus*. [B, 48 (*a*, 14).]

JOHANNISGÜRTEL (Ger.), n. Yo-ha^{3}n'ni^{2}s gu^{5}rt-e^{2}l. The *Lycopodium clavatum* and the *Artemisia vulgaris*. [B, 48 (*a*, 14).]

JOHANNISHARTHEU (Ger.), n. Yo-ha^{3}n'ni^{2}s-ha^{3}rt-hoi. The flowering herb of *Hypericum perforatum*. [B, 180 (*a*, 35).]

JOHANNISKRAUT (Ger.), n. Yo-ha^{3}n'ni^{2}s-kra^3-u^{4}t. The genus *Hypericum*, especially *Hypericum perforatum* and its flowering herb. [B, 180 (*a*, 35).]—**J'blumen.** The *Hypericum androsæmum*. [B, 92 (*a*, 14).]

JOHANNISOHR (Ger.), n. Yo-ha^{3}n'ni^{2}s-or. See JEW'S-EAR.

JOHANNISTRAUBEN (Ger.), n. Yo-ha^{3}n'ni^{2}s-tra^3-u^{4}b-e^{2}n. Currants. [*a*, 35.]

JOHANNISWEDEL (Ger.), n. Yo-ha^{3}n'ni^{2}s-vad-e^{2}l. The *Spiræa ulmaria* and the genus *Tragopogon*. [B, 48 (*a*, 14).]

JOHANNISWURZEL (Ger.), n. Yo-ha^{3}n'ni^{2}s-vurts-e^{2}l. 1. The *Aspidium filix mas*. 2. The *Anthemis pyrethrum*. [B, 48 (*a*, 14); B, 180 (*a*, 35).]

JOHNNY-JUMP-UP, n. Jo^{2}n-i^2-ju^{3}mp-u^{3}p'. The *Viola tricolor*. [B.]

JOHNSWOOD, n. Jo^{2}nz'wu^{4}d. A term applied to various species of *Hypericum*. [A, 505 (*a*, 21).]

JOHNSWORT, n. Jo^{2}nz'wu^{5}rt. The *Hypericum perforatum*. [B, 88 (*a*, 39).]

JOINT, n. Joint. Gr., ἄρθρον. Lat., *junctura* (from *jungere*, to join). Fr., *j*. Ger., *Gelenk*. It., *giuntura*. Sp., *coyuntura*. See ARTICULATION and ARTHROSIS.—**Ball-and-socket j.** See ENARTHROSIS.—**Condyloid j.** A j. allowing of all varieties of angular movements and circumduction (*e. g.*, the wrist and metacarpo-phalangeal articulations). [C.]—**Double j.** See DOPPELGELENK.—**Dovetail j.** See SUTURE.—**False j.** See PSEUDARTHROSIS.—**Flail-j.** An extremely relaxed j., the distal part of the limb being practically beyond the control of the will. [L. M. Yale. "N. Y. Med. Jour.," Nov. 28, 1885, p. 593.]—**Ginglymoid j.** See GINGLYMUS.—**Gliding j.** See ARTHRODIA.—**Hinge j.** See GINGLYMUS.—**Hysterical j.** Pseudarthritis. [*a*, 40.]—**Irritable j.** Of Agnew, a form of j. trouble generally occurring at the knee. It consists in the sudden and unexpected giving way of the joint with rapid effusion, pain, and tenderness occurring usually weeks or months after an injury to the j. [*a*, 40.]—**J.-weed.** The *Polygonum articulatum*. [B, 19, 275 (*a*, 35).]—**Medio-tarsal j.** 1. Of most writers, a transverse arthrodial j. extending across the foot formed by the calcaneo-cuboid j. with the anterior portion of the astragalo-calcaneo scaphoid. 2. Of other writers, an enarthrodial j., not transverse and not passing across the foot, between the head of the astragalus and the rest of the tarsus taken as a whole. ["Med. Chron.," Oct., 1888, p. 1 (*a*, 29).]—**Pivot j.** See *Trochoid* ARTICULATION.—**Primary j's.** J's that may be considered to be of primary importance from an orthopædic point of view. ["Med. Chron.," Oct., 1888, p. 1 (*a*, 29).]—**Screw-hinged j.** Ger., *Schraubengelenk*. A form of ginglymus in which the movement takes place in a slightly spiral direction, as at the humero-ulnar articulation. [L, 332 (*a*, 29).]—**Secondary j's.** J's that may be considered to be of secondary importance from an orthopædic point of view. ["Med. Chron.," Oct., 1888, p. 1 (*a*, 29).]—**Spiral j.** See *Screw-hinged j.*—**Stiff j.** See ANKYLOSIS.—**Synovial j.** A j. where there is motion and the interior of the j. is lubricated with synovia. [C.]—**Syphilitic j.** See *Pulpy* DISEASE.—**Transverse tarsal j.** See *Mediotarsal j.*—**Wheel-and-axle j.** See *Trochoid* ARTICULATION.

JOINTED, adj. Joint'e^{2}d. See ARTICULATED.

JOINTURE (Fr.), n. Zhwa^{3}n^2-tu^{6}r. See JOINT.

JOLIBOIS (Fr.), n. Zho-le-bwa^3. The *Daphne mezereum*. [B, 121, 173 (*a*, 35).]

JOLIFFIA (Lat.), n. f. Jo(yo)-li^{2}f'fi^2-a^3. Fr., *j*. The genus *Telfairia*. The *Jolifficæ* are a tribe of the *Cucurbitaceæ*. [B, 42, 121, 170 (*a*, 35).]—**J. africana.** Fr., *j. d'Afrique, liane de joliff*. The *Telfairia pedata*. [B, 173 (*a*, 35).]

JONC (Fr.), n. Zho^{2}n^{2}k. See JUNCUS.—**J. à balais.** The *Phragmites communis*. [B, 19 (*a*, 35).]—**J. aggloméré.** See JUNCUS *communis*.—**J. à grandes fleurs.** See JUNCUS *grandiflorus*.—**J. aigu.** See JUNCUS *acutus*.—**J. à lier.** See JUNCUS *effusus* (2d def.).—**J. à marotte.** The *Typha latifolia*. [B, 121 (*a*, 35).]—**J. à mouches.** The *Jacobæa vulgaris*. [B, 121, 173 (*a*, 35).]—**J. d'eau.** The *Scirpus lacustris*. [B, 121, 173 (*a*, 35).]—**J. de la passion.** The *Typha latifolia*. [B, 121, 173 (*a*, 35).]—**J. de rivière.** The *Butomus umbellatus*. [B, 121, 173 (*a*, 35).]—**J. des chaisiers.** The *Scirpus lacustris* and *Scirpus palustris*. [B, 121, 173 (*a*, 35).]—**J. des crapauds.** See JUNCUS *bufonius*.—**J. des jardiniers.** See JUNCUS *effusus* (2d def.).—**J. d'Espagne.** The *Spartium junceum*. [B, 121, 173 (*a*, 35).]—**J. des tonneliers.** The *Scirpus lacustris*. [B, 19 (*a*, 35).]—**J. d'étang.** The *Scirpus lacustris* and *Scirpus palustris*. [B, 121, 173 (*a*, 35).]—**J. du Nil.** The *Cyperus papyrus*. [B, 121, 173 (*a*, 35).]—**J. épineux.** The *Ulex europæus*. [B, 173 (*a*, 35).]—**J. étalé.** See JUNCUS *effusus* (1st def.).—**J. faux.** The *Triglochin palustre*. [B, 121, 173 (*a*, 35).]—**J. fleuri.** The *Butomus umbellatus*. [B, 121, 173 (*a*, 35).]—**J. glauque.** See JUNCUS *glaucus*.—**J. marin.** The *Triglochin palustre* and the *Ulex europæus*. [B, 121, 173 (*a*, 35).]—**J. odorant.** See JUNCUS *odoratus*.—**Petit j. creux.** See JUNCUS *effusus* (1st def.).

JONCAIRE (Fr.), n. Zho^{2}n^2-ka^{2}r. A sort of madder which is used as a vulnerary, aperient, and detersive. [L, 41 (*a*, 14).]

JONCICOLE (Fr.), adj. Zho^{2}n^2-se-kol. From *juncus*, a rush, and *colere*, to inhabit. Growing among or on rushes. [B, 38 (*a*, 14).]

JONCIFORME (Fr.), adj. Zho^{2}n^2-se-fo^{2}rm. From *juncus*, a rush, and *forma*, form. Rush-shaped. [B, 38 (*a*, 14).]

JONCTION (Fr.), n. Zho^{2}n^{2}k-se-o^{2}n^2. From *jungere*, to join. Of Schultz, a suture by simple superposition. [C.]

JONDLA, n. In India, the *Sorghum vulgare*. [B, 121 (*a*, 35).]

JONQUIL, n. Jo^{2}n^2'kwi^{2}l. From *juncus*, a rush. Fr., *jonquille*. The *Narcissus jonquilla*. [B, 19, 173 (*a*, 35).]—**Common j.** See *J.*—**Large j.** The *Narcissus odorus*. [B, 275 (*a*, 35).]—**Queen Anne's j.** The *Narcissus pusillus plenus*. [B, 19, 275 (*a*, 35).]—**Small j.** The *Narcissus pusillus*. [B, 275 (*a*, 35).]

JONQUILLE (Fr.), n. Zho^{2}n^2-kel-y'. 1. See JONQUIL. 2. Of Paulet, a species of *Pleurotus*, closely allied to *Agaricus mollis*. [B, 19, 121, 173 (*a*, 35).]

JOOD, n. A place in Hungary where there is a laxative, slightly sulphurous, saline spring. [L, 49 (*a*, 14).]

JOPPA, n. Jo^{2}p'a^3. A place near Porto Bello, Scotland, where there is a feebly chalybeate spring. [B, 277 (*a*, 39).]

JORDAN ALUM SPRINGS, n. Jo^{2}rd'n a^{2}l'u^{3}m spri^{2}n^{2}z. A place in Rockbridge County, Virginia, where there are two springs, one gaseous and containing a large amount of aluminium and ferrous sulphates, the other feebly chalybeate. [Anderson (*a*, 14).]

JORDANSBAD (Ger.), n. Yor'da^{3}ns-ba^{3}d. A place near the village of Bergerhausen, in the Danube district, Würtemberg, Germany, where there are a ferruginous spring and a bathing establishment. [L, 30 (*a*, 14).]

JORDAN'S WHITE SULPHUR SPRINGS, n. Jo^{2}rd'nz hwit su^{3}l'fu^{5}r spri^{2}n^{2}z. A place in Frederick County, Virginia, where there is a spring containing potassium and magnesium carbonates, potassium and calcium sulphates, and sulphureted hydrogen. [Anderson (*a*, 14).]

JOSE (Fr.), n. Zhoz. A place in the department of Puy-de-Dôme, France, near Thiers, where there are alkaline and saline springs. [L, 49, 87 (*a*, 14).]

JOSEPHSBAD (Ger.), n. Yo'ze^{2}fs-ba^{3}d. A bathing resort with a sulphurous spring, in Austria, near Tetschen. [L, 30 (*a*, 14).]

JOSEPHSBLUME (Ger.), n. Yo'ze^{2}fs-blum-e^2. See JOSEPH'S-FLOWER.

JOSEPH'S-COAT, n. Jo'ze^{2}fs-kot. The *Amarantus tricolor*. [B, 19, 275 (*a*, 35).]

JOSEPH'S-FLOWER, n. Jo'ze^{2}fs-flu^5-u^4-u^{5}r. Ger., *Josephsblume*. The genus *Tragopogon*, especially the *Tragopogon pratensis*. [A, 511; B, 180, 275 (*a*, 35).]

JOSEPHSWEIZEN (Ger.), n. Yo'se^{2}fs-vitz-e^{2}n. A variety of *Triticum turgidum*, so called because grown from grain found in the pyramids. [B, 49 (*a*, 14).]—**Vieläliriger J.** The *Triticum compositum*. [B, 180 (*a*, 35).]

JOSERAND (Fr.), n. Zho-z'ra^{3}n^2. A place in the department of Puy-de-Dôme, France, near Piorry, where there are alkaline, saline, and ferruginous springs. [L, 87.]

JOTRI (Beng.), n. The *Myristica fragrans*. [A, 479 (*a*, 21).]

JOTTES (Fr.), n. Zho^{2}t. The *Sinapis arvensis*. [B, 121, 173 (*a*, 35).]

JOTZE-DOFAN, n. A Hebrew expression in the Talmud, supposed to mean the Cæsarean operation. [A, 24.]

JOUBARBE (Fr.), n. Zhu-ba^{3}rb. The name of many crassulaceous plants, especially of the genus *Sempervivum*; in the pl., *j's*, the *Sempervivæ* (*Bryophyllum*, *Cotyledon*, *Crassula*, *Sedum*, etc.). [B, 19, 121, 173 (*a*, 35).]—**Grande j.** The *Sempervivum tectorum*. [B, 121 (*a*, 35).]—**J. âcre.** The *Sedum acre*. [B, 173 (*a*, 35).]—**J. blanche.** The *Sedum album*. [B, 121, 173 (*a*, 35).]—**J. de montagne.** The *Sempervivum montanum*. [B, 173 (*a*, 35).]—**J. des toits.** The *Sempervivum tectorum*. [B, 173 (*a*, 35).]—**J. des vignes.** The *Sedum telephium*. [B, 121 (*a*, 35).]—**J. très élevée.** The *Sempervivum sediforme*. [B, 173 (*a*, 35).]—**Petite j.** The *Sedum acre* and *Sedum album*. [B, 88 (*a*, 39); B, 121, 173 (*a*, 35).]

JOUE (Fr.), n. Zhu. See CHEEK and GNATHOS (2d def.).

JOUHE (Fr.), n. Zhu. A place in the department of the Jura, France, where there is a saline spring. [L, 41, 49, 87, 105 (*a*, 14).]

JOUI, n. A black aphrodisiac liquor prepared in Japan with the juice of roast beef and other ingredients. [L, 41, 103 (*a*, 14).]

JOUZA-BOVAH (Ar.), n. The *Myristica fragrans*. [A, 479 (*a*, 21).]

JOVE'S-BEARD, n. Jovz'berd. 1. The genus *Anthyllis* and the *Anthyllis barba-Jovis* (seu *vulneraria*). 2. The *Hydnum barba-Jovis*. 3. The *Sempervivum tectorum*. [B, 275 (*a*, 35).] Cf. JOVIS BARBA.

JOVE'S-FRUIT, n. Jovz'fru^{2}t. The *Lindera melissæfolia*. [B, 19, 275 (*a*, 35).]

JOVIALIS (Lat.), adj. Jo(yo)-vi^2(wi^2)-a(a^3)'li^{2}s. From *Jupiter*, the chief god among the Romans. Containing tin. [B.]

JOVIS BARBA (Lat.), n. f. Jo(yo)-vi^{2}s(wi^{2}s) ba^{2}rb'a^3. From *Jupiter*, the chief god among the Romans, and *barba*, a beard. The genus *Sempervivum* and other crassulaceous plants. [B, 121 (*a*, 35).] See JOUBARBE.

JOY, n. Joi. The *Ranunculus arvensis*. [A, 505 (*a*, 21).]

JOYEUSE (Fr.), n. Zhwa^3-yu^{5}z. A small town of the department of Ardèche, France, where there is an aluminous and ferruginous spring. [J, 41, 105 (*a*, 14).]

JOYOTE (Mex.), **JOYOTLI** (Aztec), n's. The *Thevetia yccotli*. ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 39).]

JOY-WEED, n. Joi'wed. The genus *Alternanthera*. [B, 275 (*a*, 35).]

O, no; O^2, not; O^3, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

JUBA (Lat.), n. f. Ju^2(yu^4)'ba^3. Fr., *panicule lâche.* Ger., *Mähne*, as applied to a horse, etc., *Rispe, Blüthenstand* (bot.). A loose panicle (*e. g.*, that of many grasses). [B, 19, 121, 123 (*a*, 35).]

JUBA (Beng., Hind.), n. The *Hibiscus rosa sinensis.* [B, 172 (*a*, 35).]

JUBÆA (Lat.), n. f. pl. Ju^2(yu)-be'(ba^3'e^2)-a^3. Fr., *j.* A genus of palms of the tribe *Cocoineæ.* [B, 42 (*a*, 35).]—**J. spectabilis.**

JUBÆA SPECTABILIS. [A, 327.]

Fr., *j. remarquable.* Coquito palm; its sap furnishes a sweet syrup called *miel de palma*, much used in Chile as a substitute for sugar. The nuts, which have a pleasant taste, are used in the preparation of sweetmeats. [B, 19, 173, 185 (*a*, 35).]

JUBEBA (Mex.), n. The *Solanum paniculatum.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

JUCA, n. 1. The genus *Manihot.* [*a*, 14.] 2. In Brazil, the *Cæsalpinia ferra.* [B, 121 (*a*, 35).]

JUCHEUR (Fr.), adj. Zhu^6-shu^{5}r. Of Illiger, of or pertaining to the feet of birds whose legs are covered with feathers and their anterior digits united at the base. [L, 180 (*a*, 39).]

JUCKBLÄTTERCHEN (Ger.), **JUCKBLATTERN** (Ger.), n's. Yuk'blat-te^{2}r-ch^{2}e^{2}n, -bla^{3}t-te^{2}rn. Prurigo. [G.]

JUCKBOHNE (Ger.), n. Yuk'bon-e^2. The genus *Mucuna.* [B, 180 (*a*, 35).]—**Aechte J.** The *Mucuna pruriens.*—**Brennende J.** The *Mucuna urens.* [B, 180 (*a*, 35).]

JUCKBORSTEN (Ger.), n. Yuk'borst-e^{2}n. See COWITCH.

JUCKEN (Ger.), n. Yuk'e^{2}n. Itching. [L, 135 (*a*, 39).]—**Afterj'.** See PRURITUS *ani.*

JUCKEND (Ger.), adj. Yuk'e^{2}nd. Itching. [G.]

JUDÆUS (Lat.), adj. Ju^2(yu)-de'(da^3'e^2)-u^{3}s(u^{4}s). Jewish.

JUDAICUS (Lat.), adj. Ju^2(yu)-da(da^3)'i^{2}k-u^{3}s(u^{4}s). Jewish; as a n., in the f., *Judaica*, the *Sideritis scordioides.* [B, 180 (*a*, 24).]

JUDAM (Ar.), n. See LEPROSY.

JUDASBAUM (Ger.), n. Yud'a^{3}s-ba^3-u^{4}m. The genus *Cercis.* [L, 80.]—**Europäischer J.** The *Cercis siliquastrum.* [B, 48, 76 (*a*, 14).]

JUDAS'S-EAR, n. Ju^2-d's'z-er'. Ger., *Judasohr, Judasöhrchen.* See JEW'S-EAR.

JUDAS-TREE, n. Ju^2'd's-tre. In Europe, the *Cercis siliquastrum;* in America, the *Cercis canadensis.* [B, 19, 34, 185, 275 (*a*, 35).]

JUDÉE (Fr.), n. Zhu^6-da. The *Styrax benzoin.* [B, 121 (*a*, 35).]

JUDENDORN (Ger.), n. Yud'e^{2}n-do^{2}rn. The genus *Zizyphus.* [B, 180 (*a*, 35).]—**Aechter J.** The *Zizyphus jujuba.* [B, 180 (*a*, 35).]—**Bacle's J.** The *Zizyphus Baclei.* [B, 180 (*a*, 35).]—**Chinesischer J.** The *Zizyphus sinensis.* [B, 180 (*a*, 35).]—**Gemeiner J.** The *Zizyphus vulgaris.* [B, 180 (*a*, 35).]—**Glatter J.** The *Zizyphus napeca.* [B, 180 (*a*, 35).]—**J'beere.** The fruit of *Zizyphus sativa.* [B, 92 (*a*, 14).]—**Palästin'scher J.** The *Zizyphus spina Christi.* [B, 180 (*a*, 35).]—**Schiefblättriger J.** The *Zizyphus œnoplia.* [B, 180 (*a*, 35).]—**Stumpfblättriger J.** The *Zizyphus jujuba.* [B, 180 (*a*, 35).]

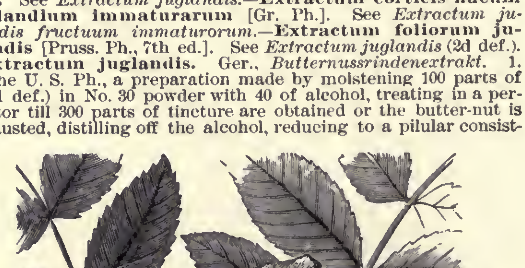
JUGAL, adj. Ju^2'g'l. Lat., *jugalis* (from *jugum*, a yoke). See ZYGOMATIC; as a n., the malar bone. [C.]

JUGATE, adj. Ju^2'gat. Lat., *jugatus* (from *jugare*, to join). Ger., *riefig, gerieft.* 1. Having ridges (*juga*), as in the fruit of umbelliferous plants. 2. Having the leaflets in pairs; coupled. [B, 123 (*a*, 35).] See UNJUGATE, BIJUGATE, TRIJUGATE, etc.

JUGEND (Ger.), n. Yu'ge^{2}nd. See ADOLESCENCE.

JUGENDFRISCHE (Ger.), n. Yu'ge^{2}nd-fri^{2}sh-e^2. See ANTHEROTES.

JUGENDLICH (Ger.), adj. Yu^6'ge^{2}nd-li^{2}ch^2. See INFANTILE.



JUGENHEIM (Ger.), n. Yu'ge^{2}n-him. A climatic health resort in the Odenwald, Germany. [A, 319 (*a*, 21).]

JUGEOLINE (Fr.), **JUGIOLINE** (Fr.), n's. Zhu^6-zhe^2-o-len, -zhe-o-len. The *Sesamum orientale.* [B, 121, 173 (*a*, 35).]—**Huile de j.** Oil of *Sesamum.* [B, 180 (*a*, 24).]

JUGLANDIC ACID, n. Ju^2-gla^{2}nd'i^{2}k. Fr., *acide juglandique.* An acid forming orange-colored acicular crystals, derived from the bark of *Juglans cinerea.* [B, 2.]

JUGLANDICOLOUS, adj. Ju^2-gla^{2}n-di^{2}k'o^{2}l-u^{3}s. From *juglans*, a walnut, and *colere*, to inhabit. Fr., *juglandicole.* Parasitic on walnut-trees. [L, 41, 180.]

JUGLANS (Lat.), n. f. Ju^2(yu)'gla^{2}nz(gla^{3}ns). A contraction of *Jovis glans, i. e.*, nut of Jupiter. Gen., *-gland'is.* Gr., Διὸς βάλανος. Fr., *noyer* (1st def.), *écorce de noyer gris* (2d def.). Ger., *Wallnussbaum* (1st def.), *Nussbaum* (1st def.), *graue Wallnussrinde* (2d def.). 1. The walnut; of Linnæus, a genus of the *Juglandaceæ.* 2. The butter-nut root-bark; of the U. S. Ph., the inner bark of the root of *J. cinerea.* The *Juglandaceæ* (Fr., *juglandacées*) are an order of the *Quernales*, characterized as trees with pinnate, exstipulate leaves, and monœcious flowers. the sterile flowers amentaceous, with the perianth irregular, and the fertile flowers solitary or clustered, ovary one-celled at the apex, two to four-celled at the base, with the ovule solitary. The fruit is a tryma with a shuck (a fibrous epicarp), and a shell (a bony endocarp) containing a large, exalbuminous seed with lobed oily cotyledons. The *Juglandarieæ* of Dumortier are an order of the *Julosepalæ*, consisting of the *Juglandineæ.* The *Juglandeæ* (Fr., *juglandées;* Ger., *Juglandeen*) of De Candolle and others, and the *Juglandineæ* of Dumortier, agree essentially with the *Juglandaceæ.* [B, 5, 19, 34, 42, 121, 170, 173, 180 (*a*, 35).]—**Cortex fructus juglandis.** See under *J. regia.*—**Cortex juglandis interior.** The inner bark of the root of *J. regia.* [B, 180 (*a*, 35).]—**Cortex nucum juglandis.** The green shell of the ripe fruit of *J. regia.* [B, 180 (*a*, 35).]—**Decoctum drupæ juglandis regiæ, Decoctum corticis viridis nucum juglandium.** A preparation consisting of 1 oz. of green walnut-rinds and 10 oz. of boiling water, boiled for a quarter of an hour and strained; or of 3 oz. of walnuts, gathered when not quite ripe and dried, and 4 of water, boiled down one half, strained, and mixed with 2 oz. of honey. [B, 97 (*a*, 38).]—**Decoctum juglandis.** A preparation consisting of 55 grammes of dry walnut-rinds, 14 each of sarsaparilla, root of *Smilax china*, crude antimony, and pumice-stone, and 6,640 of water boiled together until reduced one half and strained. [B, 119 (*a*, 38).]—**Epidermis nuclei (seu nucum) juglandis.** See under *J. regia.*—**Extract of j.** See *Extractum juglandis.*—**Extractum corticis nucum juglandium immaturarum** [Gr. Ph.]. See *Extractum juglandis fructuum immaturorum.*—**Extractum foliorum juglandis** [Pruss. Ph., 7th ed.]. See *Extractum juglandis* (2d def.).—**Extractum juglandis.** Ger., *Butternussrindenextrakt.* 1. Of the U. S. Ph., a preparation made by moistening 100 parts of j. (2d def.) in No. 30 powder with 40 of alcohol, treating in a percolator till 300 parts of tincture are obtained or the butter-nut is exhausted, distilling off the alcohol, reducing to a pilular consist-

Leaves, flower, fruit, and cross section of nut.

ence, and adding an amount of glycerin equal to 5 per cent. of the extract's weight. 2. A preparation made by extracting walnut-leaves with cold water [Belg. Ph., Sp. Ph.], hot water [Netherl. Ph.], alcohol [Swiss Ph., Pruss. Ph.], and bringing to the consistence of a

thick extract. [B, 95 (α, 38).]—**Extractum juglandis foliorum.** See *Extractum juglandis* (2d def.).—**Extractum juglandis fructuum immaturorum** [Netherl. Ph.]. Syns.: *extractum corticis nucum juglandium immaturarum* [Gr. Ph.], *extractum juglandis corticis* [Russ. Ph.]. A preparation made by triturating walnut-rinds with a little water to a pulp, pressing out, straining, and bringing to the consistence of a thick extract [Netherl. Ph.] to a pilular consistence [Gr. Ph.]. The Russ. Ph. digests 1 part of walnut-rinds 24 hours with 4 parts of boiling water, presses out, treats again with 3 parts of water, strains, and evaporates to dryness. [B, 95 (α, 38).]—**Folia juglandis** [Ger. Ph., Belg. Ph., Russ. Ph.]. Fr., *feuilles de noyer commun* [Fr. Cod.]. Sp., *hojas de nogal* [Sp. Ph.]. Roum., *nucu* [Roum. Ph.]. Syn.: *j.* [Netherl. Ph.]. The leaves of *J. regia.* [B, 95 (α, 38).]—**Fructus juglandis viridis.** Unripe walnuts. [B, 180 (α, 24).]—**Juglandis fructus.** Walnuts. [α, 35.] —**J. alba.** Fr., *noyer blanc.* See CARYA *alba.*—**J. amara.** Fr., *noyer amer.* See CARYA *amara.*—**J. augustifolia.** See CARYA *olivæformis.*—**J. aquatica.** Fr., *noyer aquatique.* See CARYA *aquatica.*—**J. camirium.** Fr., *noyer camirium.* The *Aleurites moluccana.* [B, 121, 173, 180 (α, 35).]—**J. catappa.** Fr., *noyer catappa.* A Cochin-China species. The wood and leaves yield a black dye. [B. 173 (α, 35).]—**J. cathartica, J. cinerea.** Fr., *noyer cendré.* Ger., *weisser Wallnussbaum.* Butternut, oil-nut, white walnut, a species found in North America. The inner root-bark (*j.* [U. S. Ph.]) is a mild cathartic, used in chronic constipation.

JUGLANS REGIA. [A, 327.]
Nut (1) and seed (2, 3) of European Walnut. Staminate and pistillate flowers (4).

The juice of the tree, when obtained before the unfolding of the leaves, yields a good sugar. The kernels of the seed are rich in oil. [B, 5, 173, 180 (α, 35).]—**J. (cortex fructuum).** See under *J. regia.*—**J. cylindrica.** See CARYA *olivæformis.*—**J. fraxinifolia.** A species found in the southern United States and the West Indies. The bark is used in the West Indies as a sudorific, especially in syphilis; the bitter leaves in scrofula, the green husk of the fruit as a laxative, vermifuge, and emetic, and the unripe fruits to prepare a tincture which is used as a stomachic tonic. The seeds are edible and yield a fatty oil. [B, 180 (α, 35).]—**J. glabra.** Fr., *noyer écailleux.* See CARYA *porcina.*—**J. laciniosa.** Fr., *noyer lacinié.* See CARYA *sulcata.*—**J. latifolia.** See CARYA *alba.*—**J. mucronata.** See CARYA *sulcata.*—**J. nigra.** Fr., *noyer noir.* Black walnut; a species found in the United States, having properties like those of *J. regia.* [B. 5, 173, 180 (α, 35).]—**J. oblonga.** Of Miller, the *J. cinerea.* [B, 309 (α, 35).]—**J. olivæformis, J. pekan.** See CARYA *olivæformis.*—**J. porcina.** Fr., *noyer à cochon.* See CARYA *porcina.*—**J. pterococca.** The *Engelhardtia roxburghiana.* [B, 180 (α, 35).]—**J. regia.** Fr., *noyer cultivé, gognier.* Ger., *gemeiner Wallnussbaum* (oder *Nussbaum*), *wälsche Nuss.* The common European walnut-tree, bannut-tree, French (or Welsh) nut, a species indigenous to the regions about the Caspian and eastward through the Himalayas to China and westward through Persia. The unripe fruits (*fructus juglandis viridis* [seu *immaturi*], *nuces juglandis immaturæ, juglandes immaturæ, nuces regiæ* [seu *ponticæ*]), and the external layers of the nut (Lat., *cortex fructus juglandis* [Ger. Ph. (1st ed.)], *cortex juglandis fructus* [Russ. Ph.], *juglandis fructuum cortex* [Gr. Ph.], *juglans* (*cortex fructuum*) [Netherl. Ph.], *putamina nucum juglandis* [Finn. Ph.]; Fr., *noyer commun* (*péricarpe*) [Fr. Cod.]; Sp., *nogal* (*pericarpio verde*) [Sp. Ph.]), have been used as a vermifuge, and in syphilis, gout, chronic skin diseases, and old ulcers. The leaves, *folia juglandis,* which act as an aromatic bitter and astringent, are recommended in scrofula, and as an application in malignant pustule. The thin, yellowish membrane (episperm) embracing the cotyledons (Lat., *epidermis nuclei* [seu *nucum*] *juglandis*) has been used in colic, and contains, according to Phipson, a new variety of tannic acid named nucitannic acid. The seeds contain a yellow pungent oil (*oleum juglandis*; Ger., *Wallnussöl*) equal to olive-oil, used internally as a tænicide and as a laxative injection, and externally in caligation. All parts of the plant contain juglone (*q. v.*). [B, 5, 19, 173, 180, 185, 275 (α, 35).]—**J. regia fructu angulato.** Fr., *noyer à coque dure et anguleuse, noix bocage.* A variety of *J. regia.* [B, 173 (α, 35).]—**J. regia fructu coniforme.** Fr., *noix de Saint-Gilles, noyer de Saint-Cyrille.* A variety of *J. regia*, having the same properties. [B, 173 (α, 35).]—**J. regia fructu tenero.** Fr., *noix* (ou *noyer*) *mésange.* The titmouse walnut, a variety of *J. regia* with a shell so thin that small birds like the titmouse can break it and eat the kernel. [B, 19, 173 (α, 35).]—**J. rubra.** See CARYA *olivæformis.*—**J. squarrosa, J. tomentosa.** See CARYA *alba.*—**Juli juglandis.** The male catkins of *J. regia*; formerly used medicinally. [B, 180 (α, 35).]—**Mistura (seu Mixtura) nucum juglandium** [Hamb. Ph., 1804]. Fr., *gouttes anthelminthiques.* Anthelminthic drops; a mixture of 1 part of extractum juglandis and 4 parts of cinnamon-water. [L, 162 (α, 14).]—**Nuces juglandis immaturæ.** The unripe nuts of *J. regia.* [B, 180 (α, 35).]—**Oleum juglandis, Putamina nucum juglandis.** See under *J. regia.*—**Radix juglandis.** The root of *J. regia.* [B, 180 (α, 35).]

JUGLONE, n. Ju^2'glon. Hydroxynapthoquinone. $C_{10}H_6O_3 = C_{10}H_5O_2.OH$, the active principle of *Juglans regia*; a crystalline body having the odor of walnut-hulls, and, like them, an active sternutatory. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 39).]

JUGLONIC ACID, n. Ju^2-glon-i^{2}k. Syn.: *dinitroorthohydroxyphthalic acid.* A dibasic acid, $C_6H(NO_2)_2(OH)(CO.OH)_2$, very soluble in water, ether, and alcohol, and separating from petroleum ether in small crystals. It was first obtained by the action of nitric acid on juglone. [B, 3 (α, 38).]

JUGO-CONCHIEN (Fr.), adj. Zhu^6-go-ko^{2}n^2'she-a^{2}n^2. Pertaining to or connected with the jugular vein and the *concha auris.* [L, 41 (α, 14).]

JUGOLINE (Fr.), n. Zhu^6-go-len. The *Sesamum orientale.* [B, 38 (α, 14).]

JUGO-MAXILLARY, adj. Ju^2''go-ma^{2}x'i^{2}l-a-ri^2. From *jugum*, a yoke, and *maxilla*, the jaw bone. Fr., *jugo-maxillaire.* Adjacent to the jugular vein and connected with the maxilla (said of the masseter muscle); pertaining to the jugular vein and the maxilla. [L, 41 (α, 14).]

JUGULAR, adj. Ju^2'gu^2-la^{3}r. Lat., *jugularis* (from *jugulum*, the throat). Fr., *jugulaire.* Ger., *j.* Pertaining to, connected with, or situated in or on the neck or throat. [B, 28 (α, 27).]

JUGULARIS (Lat.), adj. Ju^2(yu)-gu^{2}l(gu^{4}l)-a(a^3)'ri^{2}s. Jugular; as a n., the jugular vein. [α, 41.]

JUGULATE, v. tr. Ju^2'gu^2-lat. Lat., *jugulare.* Lit., to cut the throat; to put a sudden stop to a process.

JUGULIBRANCHIUS (Lat.), adj. Ju^2(yu^4)-gu^{2}l(gu^{4}l)-i^2-bra^{2}n^2-(bra^{3}n^2)'ki^2(chi^2)-u^{3}s(u^{4}s). From *jugulum*, the throat, and βράγχιον, a fin. Fr., *jugulibranche.* Having branchia opening below the throat. [L, 41 (α, 14).]

JUGULO-CAROTIDIEN (Fr.), adj. Zhu^6-gu^6-lo-ka^3-ro-te-de-a^{3}n^2. From *jugulum*, the throat, and καρωτίδες, the carotids. Involving the jugular vein and the carotid artery.

JUGULO-CEPHALIC, adj. Ju^2''gu^2-lo-se^{2}f-a^{2}l'i^{2}k. From *jugulum*, the throat, and κεφαλή, the head. Pertaining to the throat and the head (said of veins). [α, 29.]

JUGULUM (Lat.), n. n. Ju^2(yu^4)'gu^{2}l(gu^{4}l)-u^{3}m(u^{4}m). From *jungere*, to join. 1. The collar bone. 2. The throat; of a bird, the anterior aspect of the neck. [L, 107.]

JUGUM (Lat.), n. n. Ju^2(yu^4)'gu^{3}m(gu^{4}m). From *jungere*, to join. Fr., *paire* (1st def.). Ger., *Joch* (1st def.), *Fiederpaar* (2d def.), *Blättchenpaar* (2d def.), *Riefe* (3d def.). 1. A connecting structure like a yoke. 2. A pair of leaflets or stipules. 3. A ridge on the fruit of an umbelliferous plant. [B, 1, 19, 123 (α, 35).]—**Juga alveolaria (mandibulæ).** Ger., *Zahnfächer.* The alveolar eminences. [L, 135 (α, 39).]—**J. carinale.** On a mericarp having five prominent ridges, the middle one. [B, 123 (α, 35).]—**Juga cerebralia.** The elevations on the inner surface of the skull which separate the impressiones digitatæ. [L, 175 (α, 29).]—**Juga cervicis uteri.** See ARBOR VITÆ *uterina.*—**Juga crurum medullarium.** An old term for the optic thalami. [I, 3 (K).]—**Juga intermedia.** Ger., *Mittelriefen.* The two prominent ridges lying next to the j. carinale. [B, 123 (α, 35).]—**Juga lateralia.** Ger., *Seitenriefen.* The ridges lying at the edges of the mericarp. [B, 123 (α, 35).]—**Juga penis.** A padded forceps, controlled by a spring or screw, for holding the walls of the urethra together to prevent the dribbling in incontinence of urine. [α, 40.]—**J. petrosum.** See EMINENTIA *arcuata.*—**Juga primaria.** Ger., *Hauptriefen.* The five prominent ridges on a mericarp, including the j. carinale, juga intermedia, and juga lateralia. [B, 123 (α, 35).] —**Juga secundaria.** Ger., *Nebenriefen.* The secondary or less prominent ridges lying between the juga primaria. [B, 123 (α, 35).]

JUICE, n. Ju^{2}s. Gr., ζυμός. Lat., *jus, succus.* Fr., *suc, jus.* Ger., *Saft.* The liquid that exudes or may be expressed from any portion of an organism.—**Alimentary j's.** See *Digestive j's.*—**Artificial gastric j.** Fr., *suc gastrique artificiel.* Ger., *künstlicher Magensaft.* A digestive fluid prepared by adding pepsin or an extract of the gastric mucous membrane to water containing a small amount of hydrochloric acid. To approximate natural gastric j., about 3 parts of pepsin and 2 to 3 parts of hydrochloric acid are added to 1,000 parts of water. The action is most energetic at about 40° C. [J, 17, 28, 55, 203 (J).]—**Digestive j's.** Fr., *fluides digestifs.* Ger., *Verdauungssäfte.* Fluids secreted by specialized glands and poured into the digestive apparatus of animals or onto the surfaces of the leaves of insectivorous plants. These j's contain digestive ferments, and have weak alkaline or acid reactions. They change the chemical composition of foods, and render them soluble. [J, 11.] See SALIVA, BILE, *Gastric j.*, *Intestinal j.*, *Pancreatic j.*, and DIGESTION *by insectivorous plants.*—**Enteric j.** See *Intestinal j.*—**Gastric j.** Lat., *jus gastricum.* Fr., *suc gastrique.* Ger., *Magensaft.* A fluid poured into the stomach by the gastric glands during the process of digestion. It consists of water, pepsin, and a little free hydrochloric acid. Its principal action is

the dissolution of proteids, which it changes into the diffusible peptones. [K.]—**Intestinal j.** Lat., *succus entericus.* Fr., *suc intestinal.* Ger., *Darmsaft.* A clear, yellowish, viscid fluid, having a sp. gr. of 1·010 and a strongly alkaline reaction. It is the mixed secretion of Brunner's and Lieberkühn's crypts, and the total amount obtained from the intestine after one meal was estimated by Bidder and Schmidt at 10¼ fl. oz. It converts starch into sugar, exerts a weak digestive action on proteids, and has a slight emulsifying power. [K, 8.]—**Italian j.** Licorice extract made in Calabria. [B, 7.]—**Joint j.** See Synovia.—**Muscle j.** See *Muscle* plasma.—**Nervous j.** Lat., *succus nerveus.* See *Nervous* fluid.—**Nuclear j.** See Nucleochyma and Paraplasma.—**Nutrient j.** Lat., *jus nutricus.* Fr., *suc nourricier.* Ger., *Nahrungssaft.* The blood plasma, from its conveying nourishment to the tissues. [K.]—**Pancreatic j.** Lat., *lympha pancreatis.* Fr., *suc pancréatique.* Ger., *Pancreassaft*, *Bauchspeichel.* The clear, viscid, alkaline digestive j. produced by the pancreas. It contains albumin, a peculiar proteid, like myosin, which gives rise to clotting, a small amount of fats and soaps, and a large amount of sodium carbonate, apparently closely associated with the proteids. Pancreatic j. is a universal digester for all forms of food, starch, proteid, and fat. [J, 19, 55, 203.]—**Prepared pectoral j.** A tea made of an infusion of red poppy petals boiled with sugar to a syrup. [L, 120.]—**Preserved vegetable j's.** A name sometimes applied in England to tinctures made by adding alcohol to the expressed j's of plants. [B, 5 (*a*, 38).]—**Solazzi j.** Licorice extract made in Calabria on the estates of Solazzi; regarded as a superior variety. [B, 7.]—**Spanish j.** Licorice extract made in Catalonia. [B, 7.]

JUJUBA (Lat.), n. f. Ju^{2}(yu)′ju^{2}(yu^{4})-ba^{3}. 1. The genus *Zizyphus.* [B, 121, 180, 185 (*a*, 35).] 2. See Jujube.—**Baccæ jujubæ.** See under Jujube (1st def.).—**Decoctum jujubarum pectorale.** Sp., *cocimiento de azufaifas pectoral* [Sp. Ph.]. A preparation made by boiling together 8 parts of pearl barley, 16 of fig, 4 each of jujubæ, peeled licorice, large raisins, and *Adiantum capillus Veneris*, and water enough to make 192 parts of colature. [B, 95 (*a*, 38).]—**Fructus jujubæ, Jujubæ gallicæ** (et **italicæ**). See under Jujube (1st def.).—**Jujubæ italicæ.** See *Italian* jujubes.—**Jujubæ nigræ.** Ger., *schwarze Brustbeeren.* The fruits of *Cordia myxa.* [B, 180 (*a*, 35).]—**Massa de jujubis.** See *Pâte de* jujubes.

JUJUBE, n. Ju^{2}′ju^{2}b. Lat., *jujuba*, *zizyphum.* Fr., *j.* [Fr. Cod.]. Ger., *J.*, *Brustbeere.* It., *giuggiola.* 1. The fruit of several species of *Zizyphus*, especially *Zizyphus vulgaris.* J's (Lat., *jujubæ* [*rubræ*], *baccæ* [seu *fructus*] *jujubæ*) have been used in the form of decoction in pectoral complaints, and a paste—*j. paste*—made with gum arabic and sugar dissolved in a decoction of the fruit, is used as a demulcent. Two varieties have been sold. The French or Spanish j's (Lat., *jujubæ gallicæ*; Ger., *grosse Jujuben*), derived from *Zizyphus vulgaris*, are of about the size of a plum, somewhat flattened at the ends, have a sweet, date-like taste, and are very juicy. The Italian j's (Lat., *jujubæ italicæ*; Ger., *kleine Jujuben*) are said to be the fruit of *Zizyphus lotus*, and are smaller and less sweet and juicy than the French j's, and rather oblong in shape. 2. A name for various species of *Zizyphus.* [B, 5, 19, 121, 173, 180, 185 (*a*, 35).]—**J. paste, Pâte de j's** [Fr. Cod.]. Lat., *massa de jujubis.* A preparation made by softening on the water-bath and then rubbing together 5 parts of the pulp of j's, 30 of gum arabic, 20 of sugar, 35 of distilled water, and 20 of orange-flower water. [A, 319 (*a*, 21).]—**Pulpe de j.** [Fr. Cod.]. The pulp of the fruit of *Rhamnus zizyphus.* [A, 319 (*a*, 21).]—**Spanish j's.** See under *J.* (1st def.).

JUJUBENBAUM (Ger.), n. Yu-yub′e^{2}n-ba^{3}-u^{4}m. See *Jujube*-tree.—**Aechter J.** The *Zizyphus jujuba.* [B, 180 (*a*, 35).]

JUJUBE-TREE, n. Ju^{2}′ju^{2}b-tre. Ger., *Jujubenbaum.* The *Zizyphus jujuba*, *Zizyphus vulgaris*, and other species of *Zizyphus.* [B, 19, 185, 275 (*a*, 35).]—**Incurved-spined j.-t.** The *Zizyphus incurva.* [B, 275 (*a*, 35).]—**Zig-zag j.-t.** The *Zizyphus flexuosa.* [B, 275 (*a*, 35).]

JUJUBIER (Fr.), n. Zhu^{6}-zhu^{6}-be-a. The genus *Zizyphus.* In the pl., *j's*, the *Rhamnaceæ.* [B, 19, 121, 173 (*a*, 35).]—**J. à fruit long.** The *Zizyphus vulgaris*, var. *oblonga.* [B, 173 (*a*, 35).]—**J. agreste.** The *Zizyphus agrestis.* [B, 173 (*a*, 35).]—**J. à gros fruit.** The *Zizyphus vulgaris*, var. *macrocarpa.* [B, 173 (*a*, 35).]—**J. précoce.** The *Zizyphus vulgaris*, var. *præcox.* [B, 173 (*a*, 35).]—**J. à trois nervures.** The *Zizyphus trinervius.* [B, 173 (*a*, 35).]—**J. cotonneux.** The *Zizyphus jujuba.* [B, 173 (*a*, 35).]—**J. cultivé.** The *Zizyphus vulgaris.* [B, 173 (*a*, 35).]—**J. de Barcley.** The *Zizyphus Barclei.* [B, 173 (*a*, 35).]—**J. de lotophages.** The *Zizyphus lotus.* [B, 173 (*a*, 35).]—**J. napéca.** The *Zizyphus napeca.* [B, 173 (*a*, 35).]—**J. sedoum.** The *Zizyphus ortacantha.* [B, 173 (*a*, 35).]

JUKA (Ger.), n. Yu′ka^{3}. The genus *Manihot.* [*a*, 35.]—**Bittere J.** The *Manihot utilissima.* [B, 180 (*a*, 35).]—**Süsse J.** The *Manihot aipi.* [B, 180 (*a*, 35).]

JULACEOUS, adj. Ju^{2}-la′shu^{3}s. Lat., *julaceus* (from ἴουλος, a catkin). Fr., *julacé.* Amentaceous, resembling the *Amentaceæ.* [B, 1 (*a*, 35).]

JULAPIUM (Lat.), n. n. Ju^{2}(yu)-la(la^{3})′pi^{2}-u^{3}m(u^{4}m). See Julep.—**J. camphoratum.** See *Mixtura* camphoræ.—**J. camphoratum acidulatum.** See *Mixtura e* camphora *cum aceto.*—**J. salinum** [Dan. Ph.]. A preparation made by mixing 5 parts of solution of potassium carbonate, 32 of water of peppermint, and 2 of syrup, and slowly adding 1 part of citric-acid crystals. [B, 95 (*a*, 38).]

JULEB, n. Ju^{2}′le^{2}b. Lat., *julebus.* See Julep.

JULEP, n. Ju^{2}′le^{2}p. Ar., *julap.* Lat., *julepum*, *julapium.* Fr., *j.* Ger., *Julap.* A medicated compound liquid demulcent, usually made with distilled water, syrup, tinctures, etc., to which is added opium or some other anodyne substance. [B, 88 (*a*, 39).]—**Antiphthisical j.** Fr., *j. antiphthisique.* See Remedium *antiphthisicum Adairi.*—**J. astringent** (Fr.). See *Aqua* aluminis *vitriolata.*—**J. béchique** [Fr. Cod.] (Fr.). Lat., *potio bechica.* A mixture of an infusion of *species bechicæ* with syrup of gum arabic. [A, 319 (*a*, 21).]—**J. calmant** [Fr. Cod.] (Fr.). Lat., *potio anodyna.* A mixture of syrup of poppies, syrup of orange-flowers, and linden-water. [A, 319 (*a*, 21).]—**J. camphré** (Fr.). See *Mixtura* camphoræ.—**J. camphré acidulé** (Fr.). See *Mixtura e* camphora *cum aceto.*—**J. gommeux** [Fr. Cod.] (Fr.). See Potion *gommeuse.*—**J. simple** (Fr.). See Potion *simple.*—**J. sudorifique** (Fr.). See *Mistura* ammonii *acetici.*

JULEPUM (Lat.), n. n. Ju^{2}(yu)′le^{2}p-u^{3}m(u^{4}m). See Julep.

JULIANA (Lat.), n. f. Ju^{2}(yu)-li^{2}-a(a^{3})′na^{3}. 1. Of Schlechtendal, a genus of the *Anacardiaceæ*, tribe *Spondieæ.* 2. Of Llave, a genus of the *Rutaceæ.* [B, 19, 42, 121 (*a*, 35).]—**J. caryophyllata.** Sp., *flor* (*ó yerba*) *del clavo* [Mex. Ph.]. A species of *J.* (2d def.) found in Mexico. An infusion of the leaves and tops is antispasmodic. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

JULIENBAD (Ger.), n. Yul′i^{2}-e^{2}n-ba^{3}d. A sea-side resort in the province of Schleswig-Holstein, Germany. [A, 319 (*a*, 21).]

JULIENNE (Fr.), n. Zhu^{6}-le-e^{2}n. 1. The genus *Hesperis*, especially the *Hesperis matronalis.* 2. The *Faba vesca.* [B, 88 (*a*, 39).]—**J.-alliaire.** The *Sisymbrium alliaria.* [B, 121, 173 (*a*, 35).]—**J. blanche.** The *Hesperis matronalis*, var. *alba.* [B, 173 (*a*, 35).]—**J. cultivée.** The *Hesperis matronalis.* [B, 173 (*a*, 35).]—**J. des bois.** The *Hesperis inodora.* [B, 173 (*a*, 35).]—**J. des jardins.** The *Hesperis matronalis*, var. *hortensis.* [B, 173 (*a*, 35).]—**J. jaune.** The *Barbarea vulgaris.* [B, 121, 173 (*a*, 35).]

JULIFEROUS, JULIFLOROUS, adj's. Ju^{2}-li^{2}f′e^{2}r-u^{3}s, -li-flo′ru^{3}s. From ἴουλος, a catkin, and *ferre*, to bear, or *flos*, a flower. Lat., *juliferus*, *juliflorus.* Fr., *juléfére*, *juliflore.* Amentaceous, bearing *juli.* The *Juliferæ* of Haller are an order of plants so characterized. The *Julifloræ* (Fr., *juliflores*; Ger., *Kätzchenblüthler*) of Endlicher are a class of the *Apetalæ*, represented by the *Amentaceæ* (birches, oaks, walnuts, etc.), the *Piperineæ* (peppers, lizard-tails, etc.), and the *Urticineæ* (nettles, elms, figs, mulberries, hemps, etc.). [B, 121, 170, 291 (*a*, 35).]

JULIUSHALL (Ger.), n. Yu′li^{2}-us-ha^{3}l. A place in the duchy of Brunswick, Germany, where there are a saline spring and a bathing establishment. [L, 31, 37, 49 (*a*, 14).]

JULOCROTON (Lat.), n. m. Ju^{2}(yu)-lo^{2}k′ro(ro^{2})-to^{2}n(ton). Gen., *-on′os* (*-is*). From ἴουλος, a catkin, and κροτών, a tick. Fr., *j.* Of Martius, a genus of the *Euphorbiaceæ*, tribe *Acalypheæ.* [B, 38, 48 (*a*, 14).]—**J. montevidensis.** A species found in the Argentine Republic, called *vellamen*; a somewhat rare herb, used in syphilis and syphilitic rheumatism. [B, 246; "Proc. of the Am. Pharm. Assoc.," xxxviii (*a*, 39).]

JULOSPERMOUS, adj. Ju^{2}-lo-spu^{5}rm′u^{3}s. Lat., *julospermus* (from ἴουλος, a catkin, and σπέρμα, a seed). Having the fructification somewhat like an ament. The *Julospermæ* of Wiggers are an order of cryptogams including the horse-tails (*Equisetum*), so characterized. [B (*a*, 35).]

JULSTER (Ger.), n. Yul′ste^{2}r. The *Salix pentandra.* [B, 180 (*a*, 35).]

JULUS (Lat.), n. m. Ju^{2}l(yul)′u^{3}s(u^{4}s). Gr., ἴουλος. In botany, an ament. [B, 121, 180 (*a*, 35).]

JULY-FLOWER, n. Ju^{2}-li′flu^{5}-u^{4}-u^{5}r. See Gillyflower.—**Clove j.-f.** The *Dianthus caryophyllus.* [B, 19, 185 (*a*, 35).]—**Jamaica j.-f.** The *Prosopis juliflora.* [B, 275 (*a*, 35).]

JUMALGOTA (Beng., Hind.), n. The *Croton tiglium.* [B, 172 (*a*, 35).]

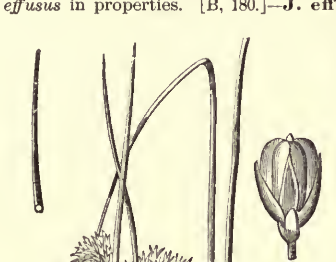
JUMEAU (Fr.), n. Zhu^{6}-mo. 1. See Gemellus and Twin. 2. In the pl., *j'x*, the *Agaricus geminus.* [B, 121 (*a*, 35).]—**J'x-canelle.** See *J.* (2d def.).—**J'x de la jambe.** The gastrocnemius muscle. [L, 32 (*a*, 29).]—**J. externe.** The external head of the gastrocnemius. [L, 32 (*a*, 29).]—**J. interne.** The internal head of the gastrocnemius. [L, 32 (*a*, 29).]—**J'x pelviens.** See Gemelli *femoris.*

JUMENTOUS, adj. Ju^{2}-me^{2}nt′u^{3}s. Lat., *jumentosus* (from *jumentum*, a beast of burden). Fr., *jumenteux.* Horse-like (said of the odor of urine). [L, 41, 49, 107 (*a*, 14).]

JUMNISUM, n. Yeast. [Ruland, Johnson (A, 325).]

JUMPERS, JUMPING FRENCHMEN, n's pl. Ju^{3}mp′u^{6}rz, ju^{3}mp′i^{2}n^{2} fre^{2}n^{2}ch′m′n. Fr., *sauteurs français.* Ger., *französische Springer.* A name for certain French Canadians, observed by Beard in Maine and northern New Hampshire, afflicted with a nervous disease which was manifested by their doing or attempting to do, apparently without volition, whatever was commanded, the act being preceded by jumping upward from half a foot to a foot. By Hammond the disease is considered analogous to miryachit (*q. v.*). [Hammond, "N. Y. Med. Jour.," Feb. 16, 1884, p. 192; Beard, "Jour. of Nerv. and Ment. Dis.," vii, 1880, p. 487 (D).]

JUNCICOLUS (Lat.), adj. Ju^{3}n(yu^{4}n^{2})-si^{2}k(ki^{2}k)′ol(o^{2}l)-u^{3}s(u^{4}s). From *juncus*, a reed, and *colere*, to inhabit. Fr., *joncicole.* Parasitic upon rushes. [L, 116.]



JUNCIFORM, adj. Ju^{3}n′si^{2}-fo^{2}rm. Lat., *junciformis* (from *juncus*, a reed, and *forma*, form). Rush-shaped. [L, 107.]

JUNCTIONAL, adj. Ju^{3}n^{2}k′shu^{3}-n′l. From *jungere*, to join. Conjunctive, connective.

JUNCTURA (Lat.), n. f. Ju^{3}n^{2}k(yu^{4}n^{2}k)-tu^{2}(tu)′ra^{3}. From *jungere*, to join. 1. A joint. See Articulation (1st and 4th def's). 2. A commissure of the brain. [K.]—**J. serratilis.** A union of bones by suture. [L, 349.]

JUNCTURE, n. Ju^{3}n^{2}k′tu^{2}r. Lat., *junctura* (from *jungere*, to join). 1. The line at which two things are joined together. See Articulation (1st def.). 2. A critical point of time.

JUNCUS (Lat.), n. m. Ju^{3}n^2(yu^{4}n^2)'ku^{3}s(ku^{4}s). Fr., *jonc.* Ger., *Binse, Simse.* It., *giunco.* Sp., *junco.* The rush, a genus of the *Juncaceæ* (Fr., *joncacées;* Ger., *Juncaceen*), which are, of Ventenat, an order of herbaceous, generally grass-like monocotyledonous plants. The *Junceæ* (Fr., *joncées;* Ger., *Binsen*) of Batsch and the *Junci* of Jussieu are the same. The *Juncarieæ* of Dumortier are an order of the *Torochlamydæ*, consisting of the *Xanthorhœaceæ*, *Juncineæ*, etc. The *Juncinæ* of Link are a class of the *Monocotyledones*, containing the *Restiaceæ*, *Juncaceæ*, *Xyridteæ*, and *Commelinaceæ*. The *Juncineæ* of Jaume, or the *Juncoideæ* of Link, agree in essential characters with the *Juncaceæ*. [B, 19, 34, 42, 121, 170, 173, 180 (α, 35).]—**J. acutus.** Fr., *jonc aigu.* 1. Of Linnæus, the great sharp sea-side rush, probably the ἐχοῖνος ὀξύσχοινος of Dioscorides, the fruit of which was used as a hæmostatic and diuretic. 2. Of Ellsworth, the *J. maritimus.* [B, 34, 64, 173, 180, 275 (α, 35).]—**J. aromaticus.** The *Andropogon schœnanthus.* [B, 180 (α, 24).]—**J. bottnicus.** See *J. bulbosus* (1st def.).—**J. bufonius.** Fr., *jonc des crapauds.* Frog-grass, toad-grass, toad-rush, a species found in damp, waste places, in all countries, and a grateful food to herbivora. [B, 34, 173, 275 (α, 35).]—**J. bulbosus.** 1. Of Linnæus, black-grass, a species common in salt marshes, used as hay. 2. Of Loureiro, the *J. Loureiri.* [B, 34, 180 (α, 35).]—**J. communis, J. conglomeratus.** Fr., *jonc aggloméré.* Ger., *geknäuelte Simse, Kopfbinse.* Candle-rush, common soft rush, a species the root-stock of which is diuretic and is used in calculous and renal diseases. [B, 173, 180, 275 (α, 35).]—**J. diffusus.** A German species resembling *J. effusus* in properties. [B, 180.]—**J. effusus.** Fr., *jonc étalé* (1st def.), *petit jonc creux* (1st def.), *jonc glauque* (ou *à lier*, ou *des jardiniers*) (2d def.). Ger., *Flattersimse* (1st def.), *Flatterbinse* (1st def.). 1. Of Linnæus, soft (or bull-) rush, a species common in ditches and moist lands. The root-stock has properties like those of *J. communis.* 2. Of Hudson, a species used for making small baskets, etc. [B, 34, 173, 180 (α, 35).]—**J. filiformis.** 1. Of Batsch, the *J. effusus* (2d def.). 2. Of Linnæus, the thread-rush, a species found on the borders of lakes in North America. [B, 34, 64, 173, 275 (α, 35).]—**J. floridus.** The *Butomus umbellatus.* [B, 121 (α, 35).]—**J. Gerardi.** See *J. bulbosus* (1st def.).—**J. glaucus.** Fr., *jonc glauque* (2d def.). Ger., *seegrüne* (oder *blaugraue*) *Simse* (3d def.). 1. Of Wahlenberg, see *J. effusus* (1st def.). 2. Of Willdenow, see *J. effusus* (2d def.). 3. Of Ehrhardt, the common hard rush; used like the *J. communis.* [B, 173, 180, 275 (α, 35).]—**J. inflexus.** See *J. glaucus* (3d def.).—**J. Loureiri.** A Cochin-China species. The thick root-stock is used in decoction as a cooling and diuretic remedy. [B, 180 (α, 35).]—**J. maritimus.** Black-rush, sea-side rush, a species found in brackish marshes in Europe and America, by some erroneously identified with the *J. acutus* of Linnæus. [B, 34, 64, 173, 275 (α, 35).]—**J. maximus.** The *Scirpus lacustris.* [B, 180 (α, 35).]—**J. mutabilis.** A variety of the *J. bufonius.* [B, 64 (α, 35).]—**J. odoratus.** Fr., *jonc odorant.* The *Andropogon schœnanthus* and the *Œnanthe fistulosa.* [B, 121 (α, 35).]—**J. pilosus.** The *Luzula pilosa.* [B, 180 (α, 35).]—**J. squarrosus.** Goose-corn (heath- or moss-) rush; a species growing in dry meadows in northern and central Europe, having a naked, somewhat angular stock. [B, 64, 275 (α, 35).]—**J. tenax.** See *J. effusus* (2d def.).—**J. vernalis.** The *Luzula pilosa.* [B, 180 (α, 35).]

JUNCUS EFFUSUS. [A, 327.]

JUNE-BERRY, n. Ju^{2}n'be^{2}r-i^2. The genus *Amelanchier.* [B, 19, 121 (α, 35).]

JUNGBRUNNEN (Ger.), n. Yun^2'brun-ne^{2}n. A place in the district of the Black Forest, Würtemberg, Germany, where there are a mineral spring and a bathing establishment. [L, 30 (α, 14).]

JUNGERMANNIA (Lat.), n. f. Yun^2-e^{2}r-ma^{3}n'i^2-a^3. From *Jungermann*, a proper name. A genus of liverworts formerly containing almost all the *Jungermanniaceæ*. The *Jungermannarieæ* of Dumortier are an order of the *Mitrogynæ*, containing the *Jungermanniaceæ*, *Anthocereæ*, etc. The *Jungermanneæ* of Lindley are a suborder of the *Jungermanniaceæ*. The *Jungermanniacea* are: Of Dumortier, a tribe of the *Jungermannideæ*, and of Reichenbach his *Jungermannieæ*. The *Jungermanniaceæ* are, of most authors, the largest order of the liverworts (*Hepaticæ*), distinguished by having the capsules solitary and terminal on the primary shoots, or on short lateral ones, and splitting ordinarily into four valves. The *Jungermannidæ* of Lindley are a tribe of the *Jungermanneæ*. The *Jungermannideæ* of Gray and others are the *Jungermanniaceæ*. The *Jungermannieæ* are: Of Reichenbach, a family of the *Sporangibrya*, consisting of the *Hypophyllina*, *Epiphyltina*, etc.; of Dumortier and others, a tribe of the *Jungermanniaceæ;* of Mathieu, a tribe of the *Hepaticæ*, consisting of *J. Marchantia*, etc.; and of many other authors the *Marchantiaceæ*. The *Jungermannoidei* of Bridel are the only family of the *Hypophyllocarpi*. The *Jungermanniotypæ* of Dumortier are a series of the *Jungermanniaceæ*. [B, 19, 77, 121, 170, 291 (α, 35).]

JUNGFER (Ger.), n. Yun^2'fe^{2}r. A virgin. [α, 14.]—**J'nbaum.** The *Ribes nigra.* [B, 48 (α, 14).]—**J'ngras.** The *Stellaria holostea.* [B, 180 (α, 35).]—**J'nhaar.** The *Polytrichum commune* and the *Hordeum murinum.* [B, 48 (α, 14); B, 180 (α, 35).]—**J'nkronen.** The *Vinca minor.* [B, 180 (α, 35).]—**J'nöl.** See *Virgin* OIL.—**J'nschaft.** Virginity.—**J'nschatz.** The hymen.—**J'nsucht.** Chlorosis. [A, 521.]—**J'nwein.** The *Ampelopsis quinquefolia.* [B, 48 (α, 14).]—**J'nwurzel.** The *Tamus communis.* [B, 48 (α, 14).]—**J'schloss.** The hymen. [L, 80.]

JUNGFRAU (Ger.), n. Yun^2'fra^3-u^4. A virgin.—**Mannbar werdende J.** See EPHEBA.—**J'schaft.** See VIRGINITY.

JUNGFRÄULICH (Ger.), adj. Yun^2'froi-li^{2}ch^2. See VIRGINAL.

JUNGGESELLENKNOPF (Ger.), n. Yun^2'ge^2-ze^{2}l-le^{2}n-kno^{2}pf. The *Silene behen.* [B, 88 (α, 39).]

JUNGLAI-PIAZ (Hind.), n. The *Scilla indica.* [B, 172 (α, 35).]

JÜNGLINGSALTER (Ger.), n. Yu^{6}n^2'li^{2}n^{2}z-a^{3}lt-e^{2}r. See ADOLESCENCE.

JUNIPÈNE (Fr.), n. Zhu^6-ne-pe^{2}n. Essential oils of juniper and sabine mixed; according to some, merely juniper-oil. [L, 41, 49 (α, 14).]

JUNIPER, n. Ju^2'ni^2-pu^{5}r. 1. See JUNIPERUS. 2. In Nova Scotia, the *Abies pendula;* at St. Croix, the *Bourreria succulenta.* 3. Of the Scriptures, the *Spartium monospermum.* [B, 19, 121, 185, 275 (α, 35).]—**Abyssinian j.** The *Juniperus procera.* [B, 275 (α, 35).]—**Azores j.** The *Juniperus cedrus*, var. *brevifolia.* [B, 275 (α, 35).]—**Brown-berried j.** The *Juniperus oxycedrus.* [B, 275 (α, 35).]—**Californian J.** The *Juniperus californica* and the *Juniperus occidentalis.* [B, 275 (α, 35).]—**Chinese j.** See JUNIPERUS *chinensis.*—**Common j.** See JUNIPERUS *communis.*—**Compound spirit of j.** See *Spiritus* JUNIPERI *compositus.*—**Conserve of j.** See *Conserva* JUNIPERI.—**Decoction of j. wood.** A preparation made by boiling 15 grammes of j. wood in 480 of water till reduced one half, and evaporating. [B, 119 (α, 38).]—**Dwarf-j.** See JUNIPERUS *nana.*—**Empyreumatic oil of j.** See *oil of* CADE.—**Gray-carpet j.** The *Juniperus sabinoides.* [B, 275 (α, 35).]—**Green-carpet j.** Dwarf savin, a variety of *Juniperus sabina.* [B, 275 (α, 35).]—**Infusion of j.** See *Infusum* JUNIPERI.—**Irish j.** The *Juniperus stricta.* [B, 275 (α, 35).]—**J. berries, J. fruit.** See JUNIPERUS (2d def.).—**J.-roots.** Of the Scriptures, probably the *Cynomorium coccineum*, a fungus found on the *Spartium monospermum.* [B, 185 (α, 35).]—**Large purple-fruited j.** The *Juniperus macrocarpa.* [B, 275 (α, 35).]—**Mexican j.** The *Juniperus tetragona.* [B, 275 (α, 35).]—**Oil of j.** Lat., *oleum juniperi* (*baccarum æthereum*), *ætheroleum juniperi.* Fr., *huile essentielle de genièvre.* A volatile oil distilled from the berries of *J. communis.* [B, 119.]—**Oil of j. wood.** Lat., *oleum ligni juniperini æthereum, ætheroleum juniperini ligni.* Fr., *huile essentielle de bois de genévrier.* A volatile oil distilled from the wood of the *J. communis.* [B, 119.] Cf. *Oil of* CADE.—**Plum-fruited j.** The *Juniperus drupacea.* [B, 275 (α, 35).]—**Spanish j.** The *Juniperus thurifera.* [B, 275 (α, 35).]—**Spirit of j.** See *Spiritus* JUNIPERI.—**Swedish j.** The *Juniperus communis*, var. *suecica.* [B, 175 (α, 35).]—**Sweet-fruited j.** The *Juniperus pachyphlœa.* [B, 275 (α, 35).]—**Tamarisk-leaved j.** The *Juniperus tamariscifolia.* [B, 275 (α, 35).]—**Virginian j.** See JUNIPERUS *virginiana.*—**White variegated Japan j.** A variety (*alba*) of *Juniperus japonica.* [B, 275 (α, 35).]

JUNIPERIN, n. Ju^2-ni^{2}p-u^{6}r'i^{2}n. A resin-like substance obtained by Franz Steers, of Kasshau, from juniper-berries, insoluble in water and ether, soluble in alcohol, tasteless, brittle, easily pulverizable, and of a black color, but in thin layers showing a yellow tint by transmitted light. [B, 5 (α, 38).]

JUNIPÉRILÈNE (Fr.), n. Zhu^6-ne-pa-re-le^{2}n. See JUNIPÈNE.

JUNIPERINUS (Lat.), adj. Ju^2(yu)-ni^{2}p-e^{2}r-in(en)'u^{3}s(u^{4}s). Of or pertaining to juniper. [B, 119.]

JUNIPEROIDES (Lat.), adj. Ju^2(yu)-ni^{2}p-e^{2}r-o(o^2)-i(e)'dez-(das). From *juniperus*, juniper, and εἶδος, resemblance. Resembling juniper.

JUNIPERUS (Lat.), n. f. Ju^2(yu)-ni^{2}p'e^{2}r-u^{3}s(u^{4}s). Fr., *genévrier* (1st def.), *baies de genièvre* [Fr. Cod.] (2d def.). Ger., *Wachholder* (1st def.), *Wachholder-Beeren* (2d def.), *Kaddigbeeren* (2d def.). It., *ginepro, bacche di ginepro* (2d def.). Sp., *enebro* (1st def.), *bayas de enebro* (2d def.). Syn.: *fructus juniperi* [Ger. Ph.] (2d def.), *baccæ juniperi* (2d def.). 1. The junipers; of Linnæus, a genus of the *Cupressineæ*, including [Endlicher] the sections *Sabina*, *Oxycedrus*, and *Caryocedrus*. 2. Of the U. S. Ph., juniper or juniper-berries (fruit of *J. communis*). They have when crushed an aromatic odor and a spicy, sweetish, terebinthinous taste. They are mildly stimulant and diuretic, and are chiefly used as an adjuvant. The *Juniperæ* of Sprengel are a division of conifers, consisting of *J.*, *Cupressus*, etc. [B, 19, 34, 42, 77, 121, 170, 173, 180 (α, 35).]—**Ætheroleum baccarum juniperi.** See *Oil of* JUNIPER.—**Alcohol juniperi compositum.** See *Spiritus juniperi compositus.*—**Aqua juniperi.** A preparation made by mixing 1 part of juniper and 4 parts of water, and distilling 2 parts; or by dissolving 4 grammes of elæosaccharum juniperi in 240 of water. [B, 119 (α, 38).]—**Baccæ juniperi.** See *J.* (2d def.).—**Ceratum juniperi virginianæ** [U. S. Ph., 1820]. Fr., *cérat de genévrier.* A cerate made of 1 part of the leaves of *J. communis* and 6 parts of resin cerate. [B, 97 (α, 21).]—**Conserva juniperi** [Belg. Ph.]. A preparation made by thickening 9 parts of extract of juniper until it contains but 15 per cent. of water, adding 1 part of powdered sugar, and stirring over the steam bath until the sugar is dissolved. [B, 95 (α, 38).]—**Decoctum fructuum juniperi carminativum** [Sp. Ph., 1798]. A preparation made by mixing 1 part each of juniper berries, aniseed, and ammonium chloride, 2 parts of chamomile flowers, and 48 parts of water, boiling slightly, and adding to the strained decoction 12 parts of diluted alcohol. [B, 97 (α, 14).]—

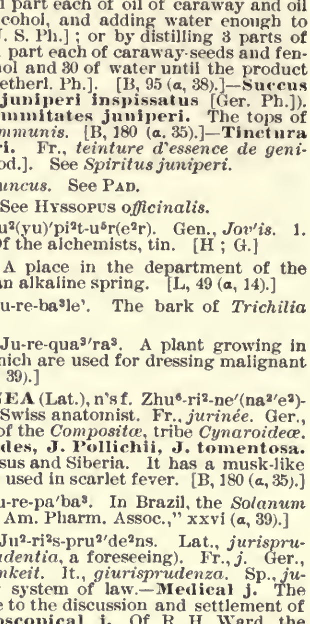
Decoctum juniperi compositum. Sp., *cocimiento de bayas de enebro compuesto* [Sp. Ph.]. A preparation made by mixing 8 parts each of juniper-berries and ammonium chloride and 384 of water, boiling, adding 8 parts of aniseed and 16 of Roman chamomile flowers, cooling, straining, and adding 96 parts of alcohol. [B, 95 (*a*, 38).]—**Elæosaccharum juniperi.** Fr., *oléosucre de genièvre.* A preparation made by triturating together 2 or 3 drops of essential oil of juniper and 4 grammes of sugar. [B, 119 (*a*, 38).]—**Electuarium de junipero** [Sard. Ph., 1773]. A preparation made by melting together with gentle heat 24 parts each of despumated honey and juniper-berry rob, and adding 8 parts of juniper herb and 1 part each of cinnamon and dried orange-peel, all well powdered. [B, 97 (*a*, 14).]—**Extractum juniperi.** Fr., *extrait de genièvre.* A preparation made by macerating 1 part of juniper in 4 parts of cold water for 12 hours, straining, clarifying with white of egg, and evaporating; or by infusing 1 part of juniper 24 hours in 4 parts of warm water, renewing the water, and evaporating; or by lightly boiling juniper in water and evaporating. Sometimes sugar is added or the extract brought to the consistence of honey, and it is then known as *succus juniperi inspissatus*, or *rob juniperi.* [B, 119 (*a*, 38).]—**Fructus juniperi** [Ger. Ph.]. See *J.* (2d def.).—**Fructus juniperi pulveratus** [Russ. Ph.]. J. (2d def.) powdered and passed through a 300-mesh sieve. [B, 95 (*a*, 38).]—**Galbuli juniperi.** See *J.* (2d def.).—**Herba juniperi.** The herb of *Juniperus communis.* [A, 319 (*a*, 21).]—**Infusum juniperi.** Fr., *infusion de genièvre.* A preparation made by infusing 15 grammes of juniper in 1,000 of boiling water, and straining when cold. [B, 119 (*a*, 38).]—**J. arborescens.** See *J. virginiana.*—**J. capensis.** See CALLITRIS *juniperoides.*—**J. caroliniana.** See *J. virginiana.*—**J. communis.** Fr., *genévrier commun, cad, cade, cadé, genèvre, genièvre, pétron, pétrot.* Ger., *gemeiner Wachholder.* The common juniper, a very widely distributed species of the section *Oxycedrus.* The wood is aromatic and was formerly used for fumigation. The fruits (see *J* [2d def.]) are used for flavoring gin, and in France a sort of beer is prepared from them called *genévrette.* A powerful diuretic oil is distilled from the unripe fruits. The tops of the young branches, *summitates* (seu *turiones*) *juniperi*, have a bitter, resinous taste and a balsamic odor, and possess virtues like those of the berries. A terebinthinate juice exudes from the tree, and has been erroneously identified with *sandarach.* [B, 5, 18, 19, 77, 173, 180 (*a*, 35).] See also *Oil of* CADE.—**J. depressa.** An American plant common in New England. The berries form part of the juniper of the shops, but are said to be inferior in strength to the European sort. By some authors it is regarded as a distinct species. [B, 5 (*a*, 35).]—**J. drupacea.** Fr., *genévrier à gros fruit.* A large-fruited species, of the section *Caryocedrus*, found in Syria, where the berries, called *habhel*, are eaten. [B, 77, 173 (*a*, 35).]—**J. echiniformis, J. hemisphærica.** The hedge-hog juniper, growing in Sicily. According to De Candolle, a variety of *J. communis.* [B, 214, 275, 311 (*a*, 35).]—**J. hispanica.** Fr., *cèdre d'Espagne.* See *J. thurifera.*—**J. japonica.** The Japan juniper. [B, 275 (*a*, 35).]—**J. lycia.** Fr., *genévrier lycia.* A species by some identified with the *J. phœnicea* (2d def.). It is probably a variety of the latter. The bark yields a resin burned as an incense. [B, 5, 77, 173, 180 (*a*, 35).]—**J. macrocarpa.** Large purple-fruited juniper, a species like *J. oxycedrus*, growing in southern and central Europe; probably the ἄρκευθος μεγάλη of Dioscorides, which was used like *J. oxycedrus.* [B, 180, 275 (*a*, 35).]—**J. major.** See *J. oxycedrus.*—**J. nana.** Dwarf juniper, a variety of *J. communis* found in the mountainous regions of temperate Europe and in Arctic countries and having the properties of *J. communis.* [B, 18, 180, 275 (*a*, 35).]—**J. oxycedrus.** Fr., *cade, oxycèdre, petit cèdre.* Ger., *Cedern-Wachholder, spanische Ceder.* Brown-berried juniper, cade-oil plant, prickly cedar; a small shrub or tree indigenous to the Mediterranean regions. The fruits are used in southern Europe in leucorrhœa, amenorrhœa, and hysteria, and the ethereal oil of the fruits is used as an anthelminthic. Its wood is one of the principal sources of oil of cade. [B, 5, 18, 77, 173, 180, 275 (*a*, 35).]—**J. phœnicea.** Fr., *genévrier de Phénicie* (2d def.). Ger., *phönicischer Wachholder.* 1. Of De Candolle, the *J. lycia.* 2. Of Linnæus, a Mediterranean species having properties like those of *J. communis* and yielding an incense-resin. To this species is referred the ἄρκευθος of Hippocrates, or the κέδρος μικρὰ of Dioscorides, used in uterine complaints. Its foliage is said to be sometimes substituted for savin, but it lacks the peculiar odor of the latter. [B, 5, 18, 77, 173, 180 (*a*, 35).]—**J. sabina.** Ger., *Sade-Wachholder, stinkender Wachholder, Sadebaum, Sevenbaum.* Sabin, covershame, a widely distributed species, usually of small size and low-growing, emitting an unpleasant odor when bruised. Savin, its young and tender green shoots, is official. It is highly irritant, and is a powerful uterine stimulant, and hence has been employed, especially by the laity, as an abortifacient. An ointment made with it is used as a stimulating dressing for blisters. [B, 5, 18, 77, 180, 275 (*a*, 35).]—**J. sabina fœmina.** Fr., *sabine femelle* (ou *stérile*). A variety of *J. sabina.* [*a*, 35.]—**J. sabina mas.** Fr., *sabine mâle, savinier.* A variety of *J. sabina*, having the same properties. [B, 173 (*a*, 35).]—**J. sibirica.** See *J. nana.*—**J. stricta.** Irish juniper, a variety of *J. communis.* [B, 275 (*a*, 35).]—**J. suecica.** The *J. communis.* [B, 311 (*a*, 35).]—**J. tetragona.** 1. Mexican juniper. [B, 173, 275 (*a*, 35).] 2. See *J. phœnicea* (2d def.).—**J. thurifera.** Fr., *cèdre thurifère, genévrier à l'encens.* Ger., *Weihrauch-Wachholder.* Spanish juniper, the incense juniper found in Spain and Portugal. It yields a fragrant resin, for a long time erroneously supposed to be olibanum. [B, 77, 173, 180, 275 (*a*, 35).]—**J. virginiana.** Fr., *genévrier* (ou *cèdre*) *de Virginie, cèdre rouge.* Ger., *virginischer Wachholder, rothe* (oder *virginische*) *Ceder.* Virginia red cedar, savin of North America, a species very similar to, and by some identified with, *J. sabina.* Its wood yields cedar-camphor and oil of cedar-wood. Its volatile oil acts like oil of savin, though it yields less oil than the latter. Small excrescences (*fungus juniperi virginianæ*) found on the branches, and known as cedar-apples, are used as an anthelminthic. The tops of this species were formerly included in the secondary list of the U. S. Ph., and are sometimes substituted for true savin. [B, 5, 18, 173, 180, 275 (*a*, 35).]—**Lignum juniperi** [Swiss Ph., Swed. Ph.]. The wood of *J. communis*, especially of the root. [B, 95, 180 (*a*, 35).]—**Oleum juniperi (baccarum æthereum).** See *Oil of* JUNIPER.—**Oleum juniperi empyreumaticum.** See *Oil of* CADE.—**Resina juniperi.** The resin of *Callitris quadrivalvis* and of *J. communis.* [B, 180 (*a*, 35).]—**Rob juniperi.** See *Extractum juniperi.*—**Semen juniperi.** See *J.* (2d def.).—**Spiritus juniperi** [Ger. Ph., 2d ed.]. Fr., *alcoolat de genièvre.* A preparation made by macerating 5 parts of j. with 15 parts each of alcohol and water and distilling off 20 parts. Used externally as an irritant. [A, 319 (*a*, 21).]—**Spiritus juniperi compositus** [U. S. Ph., Netherl. Ph.]. Fr., *alcoolat de genièvre composé.* A preparation made by dissolving 10 parts of oil of juniper and 1 part each of oil of caraway and oil of fennel in 3,000 parts of alcohol, and adding water enough to make 5,000 parts of liquid [U. S. Ph.]; or by distilling 3 parts of crushed juniper-berries, with 1 part each of caraway-seeds and fennel-seeds, in 14 parts of alcohol and 30 of water until the product has a sp. gr. of about 0·935 [Netherl. Ph.]. [B, 95 (*a*, 38).]—**Succus inspissatus juniperi** (seu **juniperi inspissatus** [Ger. Ph.]). See *Extractum juniperi.*—**Summitates juniperi.** The tops of the young branches of *J. communis.* [B, 180 (*a*, 35).]—**Tinctura cum oleo volatile juniperi.** Fr., *teinture d'essence de genièvre, esprit de genièvre* [Fr. Cod.]. See *Spiritus juniperi.*

JUNK, n. Ju^{3}n^{2}k. Lat., *juncus.* See PAD.

JUPHÁ (Hind., Bom.), n. See HYSSOPUS *officinalis.*

JUPITER (Lat.), n. m. Ju^2(yu)'pi^{2}t-u^{5}r(e^{2}r). Gen., *Jov'is.* 1. Of Paracelsus, the scalp. 2. Of the alchemists, tin. [H; G.]

JURÉ (Fr.), n. Zhu^6-ra. A place in the department of the Loire, France, where there is an alkaline spring. [L, 49 (*a*, 14).]



JURIBALI (Port.), n. Ju-re-ba^{3}le'. The bark of *Trichilia moschata.* [B, 93 (*a*, 14).]

JURICUARA (Port.), n. Ju-re-qua^3'ra^3. A plant growing in Brazil the crushed leaves of which are used for dressing malignant and venereal ulcers. [B, 88 (*a*, 39).]

JURINÆA (Lat.), **JURINEA** (Lat.), n's f. Zhu^6-ri^2-ne'(na^3'e^2)-a^3, -ne(na)'a^3. From *Jurin*, a Swiss anatomist. Fr., *jurinée.* Ger., *Jurinie.* Of Cassini, a genus of the *Compositæ*, tribe *Cynaroideæ.* [B, 38, 42 (*a*, 35).]—**J. cyanoides, J. Pollichii, J. tomentosa.** A species found in the Caucasus and Siberia. It has a musk-like odor, and the leaves have been used in scarlet fever. [B, 180 (*a*, 35).]

JURIPEBA (Port.), n. Ju-re-pa'ba^3. In Brazil, the *Solanum paniculatum.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

JURISPRUDENCE, n. Ju^2-ri^{2}s-pru^2'de^{2}ns. Lat., *jurisprudentia* (from *jus*, law, and *prudentia*, a foreseeing). Fr., *j.* Ger., *Jurisprudenz, Rechtsgelehrsamkeit.* It., *giurisprudenza.* Sp., *jurisprudencia.* The science or system of law.—**Medical j.** The application of medical science to the discussion and settlement of legal questions. [D.]—**Microscopical j.** Of R. H. Ward, the use of the microscope in j. ["Proc. of the Am. Soc. of Micr.," 1889 (J).]—**Pharmaceutical j.** It., *giurisprudenza farmaceútica.* That branch of j. which has to do with the legal responsibilities connected with the commercial handling of drugs. [*a*, 38.]

JURY-MAST. (AFTER SAYRE.)

JURUBEBA (Port.), n. Ju-ru-ba'ba^3. In Brazil, the *Solanum paniculatum.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

JURUBEBINE, n. Ju^2-ru^2-be'bi^{2}n. Lat., *jurubebia.* A bitter alkaloid, distinct from solanine, obtained from the berries of *Solanum paniculatum.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

JURUMBEBA, n. Ju-ru^{4}m-ba'ba^3. In Brazil, the leaves and unripe fruit of *Solanum insidiosum.* ["Proc. of the Am. Pharm. Assoc.," xxxii (*a*, 39).]

JURUMU, n. Ju-ru-mu'. In Brazil, the *Cucurbita pepo.* [Martius; B, 121 (*a*, 35).]

JURY-MAST, n. Ju^2'ri-ma^{3}st. An apparatus used in the treatment of Pott's disease of the spine above the third dorsal vertebra. It consists of a rigid bar of malleable iron or steel molded to the curve of the spine and occipital protuberance and ending over the centre of the head. It is fastened to the trunk by straps or a plaster jacket, and to the summit of the bar is fixed a sling which supports the head and keeps the spine extended and at rest. [*a*, 40.]

JUS (Lat.), n. n. Ju^{2}s(yus). Gen., *jur'is.* Fr., *j.* See BROTH and JUICE.—**J. album.** A broth made by boiling several kinds of fish with oil, anise, and leeks. [L, 84.]—**J. bovinum.** See BEEF *tea.*—**J. gastricum.** See *Gastric* JUICE.—**J. nutriens.** See *Nutrient* JUICE.

JUSCULUM (Lat.), n. n. Ju^{2}s(yus)'ku^{2}l(ku^{4}l)-u^{3}m(u^{4}m). From *jus*, broth. See BROTH.—**J. helicinum.** An old preparation made

by boiling 125 grammes of snails for 2 hours in 1 kilogramme of water, adding 8 grammes of Canadian maidenhair, allowing to stand 1 hour, and straining; or by boiling together 30 snails, 1½ Borsdorf apple, 9 prunes, and 750 grammes of water, and clarifying with white of egg. [B, 119 (a, 38).]—**J. viperinum.** An old preparation made by boiling for 2 hours in 360 grammes of water the flesh of a viper deprived of head, tail, skin, and intestines and chopped into pieces; or by boiling a viper with 48 centigrammes of salt, 277 grammes of water, and 166 of either chicken or round of veal; or with 1·8 gramme of red saunders and 172 grammes of water. [B, 119 (a, 38).]

JUSQUIAME (Fr.). n. Zhu^{6}s-ke-a^{3}m. See HYOSCYAMUS.—**Alcoolature de j.** [Fr. Cod.]. Lat., *tinctura hyosciami ex herba recente* [Belg. Ph.]. A preparation made by crushing and macerating for three days [Belg. Ph.], or by macerating for 10 days [Fr. Cod.], 1 part of fresh hyoscyamus-leaves with 1 of alcohol (90° [Fr. Cod.], 92° [Belg. Ph.]), expressing, and filtering. [B, 95 (a, 38).]—**Cérat d'extrait de j.** A preparation made of ceratum Galeni mixed with one tenth of its weight of extract of hyoscyamus. [B, 92 (a, 21).]—**Cigarettes de j.** [Fr. Cod.]. Cigarettes each containing 1 gramme of dried hyoscyamus-leaves. [B.]—**Collyre sédatif à la j.** A collyrium containing 1 part each of extract of hyoscyamus and Rousseau's laudanum, and 100 parts of rose-water. [L, 87 (a, 21).]—**Décoction de j.** A preparation made by boiling lightly 2 grammes of hyoscyamus-leaves in 1 litre of water, and straining. For application to cancerous ulcers. [B, 119 (a, 38).]—**Électuaire de j. opiacé.** See *Electuarium* HYOSCYAMI *opiatum*.—**Emplâtre de j.** See *Emplastrum* HYOSCYAMI.—**Emplâtre de j. opiacé d'Hufeland.** A plaster consisting of 10 grammes of hyoscyamus plaster and 1 gramme of powdered opium. [B, 38 (a, 38).]—**Éthérolé de j.** See *Tinctura* HYOSCYAMI *ætherea*.—**Extrait alcoolique de feuilles de j.** See *Extractum* HYOSCYAMI *alcoholicum*.—**Extrait de j.** [Fr. Cod.]. See *Extractum* HYOSCYAMI (1st def.).—**Extrait de j. alcoolique.** See *Extractum* HYOSCYAMI *alcoholicum*.—**Extrait de j. (feuille)** [Fr. Cod.]. See *Extractum* HYOSCYAMI *alcoholicum*.—**Extrait de j. (semences)** [Fr. Cod.]. See *Extractum* HYOSCIAMI *seminum*.—**Extrait (de feuilles) de j.** [Fr. Cod.]. See *Extractum* HYOSCYAMI *alcoholicum*.—**Extrait de j.** [Fr. Cod.]. See *Extractum* HYOSCYAMI *alcoholicum*.—**Extrait de semence de j.** [Fr. Cod.]. See *Extractum* HYOSCAIMI *seminum*.—**Extrait de suc de j.** A preparation made by expressing the juice of hyoscyamus-leaves, boiling to coagulate the albumen and chlorophyll, filtering and evaporating over a water-bath to a third of the volume, setting aside for 12 hours, separating the deposit formed, and evaporating to a soft mass over the water-bath. [B, 46 (a, 39).]—**Extrait liquide de j.** See *Extractum* HYOSCYAMI *fluidum*.—**Feuilles de j. noire** [Fr. Cod.]. See HYOSCYAMUS (2d def.).—**Glycéré d'extrait de j.** [Fr. Cod.]. Lat., *glyceritum cum extracto hyoscyami* [Fr. Cod.] (seu *extracti hyoscyami*). A preparation made by softening 1 part of extractum hyoscyami with a little glycerin, and mixing it thoroughly with 9 parts of glyceritum amyli. [B, 113 (a, 14).]—**Huile de j.** [Fr. Cod.]. See *Infusum* HYOSCYAMI *oleosum*.—**J. à feuilles de bette.** See HYOSCYAMUS *betæfolius*.—**J. blanche** [Fr. Cod.]. See HYOSCYAMUS *albus*.—**J. commune.** See HYOSCYAMUS *niger*.—**J. dorée.** See HYOSCYAMUS *aureus*.—**J. du Pérou.** The *Nicotiana tabacum*. [B, 121, 173 (a, 35).]—**J. du Sahara.** See BETHINA.—**J. jaune.** See HYOSCYAMUS *aureus*.—**J. noire** [Fr. Cod.]. See HYOSCYAMUS *niger*.—**J. noire pygmée.** The *Hyoscyamus niger*, var. *pygmæus*. [B, 173 (a, 35).]—**J. noire (semence)** [Fr. Cod.]. See *Semen* HYOSCYAMI.—**J. physaloïde.** The *Hyoscyamus physaloides*. [B, 173 (a, 35).]—**J. pygmée.** See HYOSCYAMUS *pusillus*.—**Pilules de j. et de valériane composées** [Fr. Cod.]. See PILULÆ *Meglin*.—**Poudre de j. (feuille)** [Fr. Cod.]. A powder prepared by exposing hyoscyamus-leaves a short time to a warmth of 40° C., pounding in an iron mortar, and sifting through a 120 silk sieve. [B, 95 (a, 38).]—**Poudre de j. (semence)** [Fr. Cod.]. A preparation made by drying hyoscyamus-seeds at 40° C., powdering in a covered mortar, and sifting through a 100 silk sieve. [B, 95 (a, 38).]—**Semences de j. blanche** [Fr. Cod.]. The seeds of *Hyoscyamus albus*.—**Semences de j. noire** [Fr. Cod.]. See *Semen* HYOSCYAMI.—**Sirop d'extrait de j.** See *Syrupus* HYOSCYAMI.—**Sirop de j.** [Fr. Cod.]. A mixture of 75 parts of tincture of hyoscyamus with 925 of syrup. [B, 95 (a, 38).]—**Teinture de j.** [Fr. Cod.]. See *Tinctura* HYOSCYAMI.—**Teinture éthérée de j.** [Fr. Cod.]. See *Tinctura* HYOSCYAMI *ætherea*.

JUSQUIAMINE (Fr.), n. Zhu^{6}s-ke-a^3-men. See HYOSCYAMINE.

JUSQUIAMUS (Lat.), n. m. Ju^{2}s(yus)-kwi(kwi^2)'a^{2}m(a^{3}m)-u^{3}s(u^{4}s). See HYOSCYAMUS.

JUSSA, n. An old name for gypsum. [Ruland, Johnson (A, 325).]

JUSSIÆA (Lat.), n. f. Jus(yus)-si^2-e'(a^3'e^2)-a^3. Written, also, *jussia*, *jussieua*, *jussieuia*, *jussieva*, *jussievia*. Fr., *j.*, *jussié*. 1. Of Forskål, the genus *Corchorus*. 2. Of Linnæus, a genus of the *Onagrarieæ* (of others a section of the genus *Ludwigia*). The *Jussiæeæ* of Lindley (the *Jussieæ* [Fr., *jussiées*] of De Candolle, the *Jussidiæ* of Dumortier, the *Jussieueæ* of Reichenbach, or the *Jussieveæ* of Spach) are a division (or tribe) of the *Onagraceæ*, including *J.* and several allied genera having the seed naked, not winged. [B, 1, 19, 34, 42, 121, 170 (a, 35).]—**J. adscendens.** Fr., *j. grimpant*. A variety of *J. repens* (2d def.). [B, 173 (a, 35).]—**J. angustifolia.** 1. Of Blume, the *J. blumeana*. 2. Of Linnæus, a species found in Java, having properties like those of *J. swartziana*. [B, 180 (a, 35).]—**J. blumeana.** An astringent species found in Java, where it is used like *J. swartziana*. [B, 180 (a, 35).]—**J. caparossa.** A Brazilian species used as an astringent. [B, 19 (a, 35).]—**J. caryophyllacea.** See LUDWIGIA *diffusa*.—**J. caryophylloides.** Fr., *j. sous-arbrisseau*. The *carambu* of the Malays; a species found in the East Indies, where, ground small and steeped in buttermilk, it is used in dysentery and, in decoction, as a purgative and vermifuge. [B, 88, 121, 172, 173 (a, 35).] Cf. LUDWIGIA *diffusa*.—**J. du Pérou** (Fr.). See *J. peruviana*.—**J. edulis.** Of Forskål, the *Corchorus antichorus*. [B, 173 (a, 35).]—**J. exaltata.** See *J. caryophylloides*.—**J. grimpant** (Fr.). See *J. adscendens*.—**J. hirta.** A West Indian species, used like *J. swartziana*. [B, 180 (a, 35).]—**J. octofila, J. octonervia, J. octovalvis.** Species (the first and last the same) found in the West Indies, where they are used like *J. swartziana*. [B, 180 (a, 35).]—**J. peruviana.** Fr., *J. du Pérou*. A species found in Peru, where the leaves are used in emollient and resolutive cataplasms. [B, 173 (a, 35).]—**J. repens.** Fr., *j. rampant*. 1. Of Swartz, the *J. swartziana*. 2. Of Linnæus, clove-strip, an astringent species sometimes used in diarrhœa, in North America. In southern Asia, the leaves, made into an ointment with castor-oil, are considered remedial in porrigo. [B, 34, 104, 173, 180, 275 (a, 35).]—**J. scabra.** An astringent species found in Brazil. [B, 19 (a, 35).]—**J. sous-arbrisseau** (Fr.), **J. suffruticosa.** See *J. caryophylloides*.—**J. swartziana.** A species found in the West Indies, where it is used as a mild astringent and vulnerary, and especially as an application to inflamed eyes. [B, 180 (a, 35).]—**J. villosa.** See *J. caryophylloides*.

JUSTICIA (Lat.), n. f. Ju^{3}s(yus)-ti^2'si^2(ki^2)-a^3. From *Justice*, a Scotch botanist. Fr., *justicie*, *carmantine* (2d def.). Ger., *J.* (2d def.). Of Linnæus, a genus of acanthaceous herbs, rarely shrubs, of the *Justicieæ*; by some authors divided into numerous genera (*Gendarussa*, *Rostellaria*, *Betonica*, and *Leptostachya*) regarded by Bentham and Hooker and others as sections of *J.* The *Justiciadæ* of Lindley (the *Justicieæ* [Fr., *justiciées*] of Dumortier) are a tribe of the *Acanthaceæ*, in which the seeds are subtended by hooked processes. The *Justicieæ* of Bentham and Hooker are a tribe of the *Acanthaceæ*, distinguished by having the limb of the corolla nearly equal or bilabiate with the lobes variously imbricated, and the seed flatly compressed, rarely ovoid, with a marginal hilum, and the funicule hardened into a hooked process (*retinaculum*), and comprising the *Barlerieæ*, *Asystasieæ*, *Eranthemeæ*, *Andrographideæ*, *Eujusticieæ*, and *Dicliptereæ*. [B, 19, 34, 42, 121, 173, 180, 185 (a, 35).]—**J. adhatoda.** Fr., *carmantine adhatoda*, *noyer de Ceylan* (ou *des Indes*). The Malabar-nut tree (or shrub); an East Indian species having bitterish, slightly aromatic leaves, used by the natives, in conjunction with other remedies, as an anthelminthic, and their juice, combined with that of fresh ginger, in coughs, asthma, and ague. The flowers, leaves, and roots, but especially the flowers, are employed as an antispasmodic in asthma, especially in chronic pulmonary and catarrhal affections unattended with fever. The fresh flowers are applied in ophthalmia. [B, 172, 173, 180, 275 (a, 35).] See also ADHATODA.—**J. aldina.** See *J. gendarussa*.—**J. appressa.** See BARLERIA *prionitis*.—**J. betonica.** An East Indian shrub: the root and the leaves are used in fevers, chest complaints, and phthisis, and the leaves as an external application to abscesses. [B, 180 (a, 35).]—**J. bicalyculata.** Fr., *carmantine bicaliculée*. The *Dianthera bicalyculata*. [B, 173 (a, 35).]—**J. biflora.** Fr., *carmantine à deux fleurs*. An African species; the leaves are used in Egypt in emollient cataplasms. [B, 173 (a, 35).]—**J. bivalvis.** A bitter species (probably *J. adhatoda*) found in Malabar, where it is used in gout, asthma, catarrhs, and phthisis. [A, 334, 337, 344.]—**J. comata.** The balsam-herb of Jamaica; an aromatic species used as a vulnerary. [B, 42, 180 (a, 35).]—**J. ecbolium.** Fr., *carmantine ecbolium*. Ger., *langährige J.* The *canin-corini* of the Malays; a species found in the East Indies, where the root is used in gout and (together with the leaves) as a diuretic. The leaves are also used in coughs and, in Cochin-China, as a poultice to hang-nails. The root is employed in jaundice and menorrhagia. [B, 171, 172, 180 (a, 35); "Proc. of the Am. Pharm. Assoc.," xxviii (a, 39).]—**J. echioides.** Fr., *carmantine à feuilles d'échium*. See ANDROGRAPHIS *echioides*.—**J. foliosa, J. furcata.** See *J. peruviana*.—**J. gendarussa.** Fr., *carmantine gendarussa*. The *caroo-noochie* or *teo* of the Tamils. The root, boiled in milk, is used in China in rheumatism and fevers, and in the East Indies in chronic indigestion and dysentery. The tender stalks and leaves are employed in rheumatism; the leaves (in infusion and in baths) in fevers; their juice in coughs and, mixed with oil, as an application to glandular swellings. In Java the leaves are used as an emetic. The whole plant has a disagreeable odor and taste. [B, 42, 172, 173, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxiv, xxvi (a, 14; a, 39).]—**J. hyssopifolia.** The *Adhatoda hyssopi foliis* (*q. v.*); probably a variety of *J. adhatoda*. [B, 173, 275 (a, 35).]—**J. ligulata, J. malabarica.** See DIANTHERA *bifida*.—**J. nasuta.** Fr., *carmantine nasuta*. See RHINACANTHUS *communis*.—**J. nitida.** A Jamaica species used like *J. comata*. [B, 42, 180 (a, 35).]—**J. paniculata.** Ar., *unzar*. Fr., *carmantine paniculée*. See ANDROGRAPHIS *paniculata*.—**J. parvifolia.** Written erroneously by some *J. parviflora* (Fr., *carmantine à petites fleurs*). Fr., *carmantine à petites feuilles*. The *Adhatoda tranquebariensis*. [B, 172, 173 (a, 35).]—**J. pectoralis.** Fr., *carmantine pectorale*, *herbe aux charpentiers*. An aromatic plant with a taste like that of senega-root; the garden balsam of the West Indies, where a bechic syrup is prepared from it, and the leaves are applied to wounds and abscesses. [B, 42, 173, 180, 275 (a, 35).]—**J. peruviana.** Fr., *carmantine du Pérou*. A species the leaves of which are used in Peru in emollient cataplasms. [B, 173 (a, 35).]—**J. picta.** The *Graptophyllum hortense*. [B, 42, 180 (a, 35).]—**J. procumbens.** Fr., *carmantine couchée*. Of Linnæus, a species with linear-lanceolate leaves, common on pasture-grounds on the Coromandel coast, India; and of Vahl, a round-leaved species found in India. Both species are considered a remedy for ophthalmia, the juice of the leaves being squeezed into the eye. [B, 172, 173, 180 (a, 35).]—**J. pubescens.** See *J. peruviana*.—**J. repens.** The *Rungia repens*. [B, 172 (a, 35).]—**J. reptans.** A West Indian species used in Jamaica in hæmoptysis and diarrhœa, and externally as a vulnerary. [B, 180 (a, 35).]—**J. rotundifolia.** An East Indian species having the same uses as *J. ecbolium*. [B, 180 (a, 35).]—**J. scandens.** Of Vahl, the *Rhinacanthus communis*. [B, 214 (a, 35).]—**J. sericea.** A species growing in the Andes about Quito, where it is used in pleurisy. [B, 18 (a, 35).]—**J. stricta.** The *Andrographis paniculata*. [B, 173 (a, 35).]—**J. tranquebariensis.** See ADHATODA *tranquebariensis*.—**J. triflora.** Ar., *khôdzieh*. Fr.,

carmantine à trois fleurs. An Arabian species, used in pectoral complaints. [B, 174 ; B, 173 (*a*, 35).]—**J. trisulca.** See *J. biflora.*—**J. tunicata.** A species found in the interior of Africa, where it is applied to inflammatory swellings. [B, 180 (*a*, 35).]—**J. variabilis.** See *J. peruviana.*—**J. viridis.** Fr., *carmantine verte.* A variety of *J. ecbolium.* [B, 173 (*a*, 35).]

JUSTO-MAJOR (Lat.), adj. Ju^{3}s(yus)-to-ma(ma^3)′jo^{2}r(yor). Abnormally large in all dimensions (see Pelvis *æquabiliter j.-m.*).

JUSTO-MINOR (Lat.), adj. Ju^{3}s(yus)-to-mi(me)′no^{2}r(nor). Abnormally small in all dimensions (see Pelvis *æquabiliter j.-m.*).

JUTE, n. Ju^{2}t. Fr., *j.*, *chanvre indien.* The fibre of *Corchorus capsularis*, *Corchorus olitorius*, and other species of *Corchorus ;* used as a substitute for both lint and sponges in surgical dressings. [B, 19, 121, 185 (*a*, 35).]—**Carbolized j.** See *Dry carbolized j.* and *Moist carbolized j.*—**Dry carbolized j.** A surgical dressing prepared by pouring a solution of 50 parts of carbolic acid and 200 of resin in 250 parts of glycerin and 550 of alcohol, over 1 pound of j., working the whole well together, and, as soon as the fibres begin to agglutinate, picking loose and drying. It is then wrapped in parchment-paper and preserved in a cool place. [Münnich, "Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 39).]—**J. de Mantchourie** (Fr.). The *Abutilon Avicennæ.* [B, 121 (*a*, 35).]—**Moist carbolized j.** A surgical dressing prepared by forming the j. into discs about 15 ctm. in diameter, a number of which, separated by parchment-paper, are packed in a jar and impregnated with a 5-per-cent. solution of carbolic acid, followed by a 2-per-cent. solution. [Köhler, "Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 39).]

JUVANS (Lat.), adj. Ju^2(yu^4)′va^{2}nz(wa^{3}ns). From *juvare*, to help. See Adjuvant.

JUVENTA (Lat.), **JUVENTAS** (Lat.), **JUVENTUS** (Lat.), n's f. Ju^2(yu^4)-ve^{2}n(we^{2}n)′ta^3, -ta^{2}s(ta^{3}s), -tu^{3}s(tu^{4}s). Gen., *-ent′æ*, *-at′is*, *-ut′is.* From *juvenis*, young. See Adolescence.

JUVIA, n. In the Amazon region of South America, the *Bertholletia excelsa.* [B, 185 (*a*, 35).]—**J.-nuts.** See Brazil-nuts.

JUXTA-ÉPIPHYSAIRE (Fr.), adj. Zhu^{6}x-ta^3-a-pe-fe-sa^{2}r. From *juxta*, near, ἐπί, upon, and φύσις, a growth. Situated near an epiphysis. [L, 88 (*a*, 29).]

JUXTANGINA (Lat.), n. f. Ju^{3}xt(yuxt)-a^{2}n(a^{3}n^2)′ji^{2}n(gi^{2}n)-a^3. From *juxta*, near, and *angina* (*q. v.*). See Angina and Laryngitis.

JUXTAPOSITION, n. Ju^{3}x-ta^3-po-zi^{2}sh′u^{3}n. From *juxta*, near, and *ponere*, to place. The state of being placed near by.

JUXTAPOSITUS (Lat.), adj. Ju^{3}x(yux)-ta^3-po^{2}z(po^{2}s)′i^{2}t-u^{3}s-(u^{4}s). Placed or situated near ; as a n., anything so placed. See Dehiscentia *juxtapositarum.*

JUZAM (Ar.), n. See Leprosy.

JYPAL (Beng.), n. The *Croton tiglium.* [B, 172 (*a*, 35).]

K

K. For words in K not here given, see the corresponding words in C.

KAAD (Ar.), n. According to Forskål, the juice of *Cacalia procumbens.* [B, 121 (*a*, 35).]

KAALAKUSTURI (Hind.), n. The *Hibiscus abelmoschus.* [B, 92 (*a*, 14).]

KAATE, n. In India, the *Acacia catechu.* [B, 121 (*a*, 35).]

KAATH, n. Catechu. [L, 84.]

KAAWY, n. A drink prepared from maize. [A, 325 ; B, 88 (*a*, 39) ; *a*, 14.]

KABÁBA CHINI (Hind., Bomb., Beng.), n. The *Piper cubeba.* [A, 479 (*a*, 21).]

KABALA (Ar.), **KABBALA**, n's. See Cabal.

KABBALIST, n. Ka^{2}b′a^{2}l-i^{2}st. See Cabalist.

KABEBEH (Ar.), n. The *Piper cubeba.* [B, 88 (*a*. 39).]

KABEL (Ger.), n. Ka^{3}b′e^{2}l. A place in the province of Brandenburg, Prussia, where there is a gaseous and ferruginous spring. [L, 135 (*a*, 39).]

KABELJAU (Ger.), n. Ka^{3}b′e^{2}l-ya^3-u^4. The cod (*Gadus morrhua*). [B, 180 (*a*, 35).]

KABOLAPOLYÁNA (Hung.), n. A place in Marmaros County, Hungary, where there are a mineral spring and a bathing establishment. [L, 30 (*a*, 14).]

KÁBULI HARADE (Guz.), n. The unripe fruit of *Terminalia chebula.* [A, 479 (*a*, 21).]

KABUTER-KEJAR (Hind.), n. The *Rhinacanthus communis.* [B, 172 (*a*, 35).]

KACHAKURI (Duk.), n. The *Mucuna pruriens.* [A, 479 (*a*, 21).]

KACHANÁRA (Hind.), n. See Bauhinia *variegata.*

KACHEXIE (Ger.), n. Ka^{3}ch^2-e^{3}x-e′. See Cachexia.

KACHIKÁ (Guz.), n. The seeds of *Tamarindus indica.* [A, 479 (*a*, 21).]

KÁCHI-LÁKHA (Guz.), n. See Coccus *lacca.*

KACHNÁR (Hind.), n. The bark of *Bauhinia variegata.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

KACHOLÁH (Pers.), n. The *Strychnos nux vomica.* [A, 479 (*a*, 21).]

KACIR, n. See Acazdir.

KACKERLACKEN (Ger.), n. Ka^{3}k′e^{2}r-la^{3}k-e^{2}n. 1. See Albino. 2. See Cockroach.

KACS (Hung.), n. Ka^{4}ch. A place in the county of Borsod, Hungary. where there is a sulphurous spring. [L, 30 (*a*, 14).]

KADALI (Beng.), n. The *Musa paradisiaca.* [B. 172 (*a*, 35).]

KADANACU (Malay), **KADANAKU** (Malay), n's. The *Aloe barbadensis.* [B, 121, 172 (*a*, 35).]

KADAVA INDRAJAVA (Hind., Bomb.), n. The seeds of *Holarrhena antidysenterica.* [A, 479 (*a*, 21).]

KADDIG (Ger.), n. Ka^{3}d′di^{2}g. The *Juniperus communis.* [B, 48, 92 (*a*, 14).]—**K'beeren.** See Juniperus (2d def.).—**K'beerenstrauch.** The *Juniperus communis.* [L, 80.]

KADE (Ger.), n. Ka^{3}d′e^2. See Cade.—**K'öl.** See *Oil of* cade.—**K.-Wachholder.** The *Juniperus oxycedrus.* [*a*, 35.]

KADHENDI (Ar., Turk.), n. Catechu. [B, 92 (*a*, 14).]

KADIC PAN (Hind.), **KADIC PANDIN** (Hind.), n's. The *Polypodium quercifolium.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

KADLOCK, n. Ka^{2}d′lo^{2}k. The *Sinapis arvensis.* [A, 505 (*a*, 21).]

KADSURA (Lat.), n. f. Ka^{2}d(ka^{3}d)-su^2(su)′ra^3. Fr., *k.* Of Jussieu, a genus of magnoliaceous climbing shrubs of the tribe *Schizandreæ.* [B, 38, 42, 48 (*a*, 35).]—**K. chinensis.** A species found in China. The seed is used as a tonic and stomachic. ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 39).]—**K. japonica.** Fr., *k. du Japon.* A Japanese species. The branches yield a mucilaginous juice used as a hair-dressing and as a substitute for mucilage of rice. [B, 173 (*a*, 35).]

KADU BIJA (Hind.), n. The seeds of *Lagenaria vulgaris*, var. *dulcis.* [A, 479 (*a*, 21).]

KADUN (Ar.), n. The *Centaurea cyanus.* [B, 92 (*a*, 14).]

KAEMPFERIA (Lat.), n. f. Kamp-fe^{2}r′i^2-a^3. From *Kaempfer*, a proper name. Fr., *k.*, *kaempférie.* Ger., *Kämpferie.* A genus found in tropical Asiatic and African *Scitamineæ*, of the tribe *Zingibereæ.* [B. 42 (*a*, 35).]—**K. angustifolia.** See *K. roxburghiana.*—**K. galanga.** Fr., *k. galanga.* Ger., *Galgant-Kämpferie.* East Indian galingale, the *kumula* of the Bengalese, who use it in their betel. The aromatic root is used in pectoral complaints, and, boiled in oil, as an external application in obstructions of the nasal passages. [B, 172, 173, 180 (*a*, 35).]—**K. longa.** See *K. rotunda.*—**K. pandurata.** Ger., *geigenförmige Kämpferie.* A species found in the East Indies and the islands of the Indian Ocean. The root is aromatic and has been used in European practice under the name of *radix curcumæ rotundæ.* [B, 180 (*a*, 35).]—**K. rotunda.** Fr., *k. rond*, *herbe à Kaempfer*, *herbe au mal d'estomac.* Ger., *runde Kämpferie.* The *melankua* of the Malays. The root, which has a ginger-like taste, is said to be useful in anasarcous swellings, and is supposed by some, though probably erroneously, to be the round zedoary of the shops. [B, 5, 19, 172, 173, 180 (*a*, 35).] Cf. Curcuma *aromatica.*—**K. roxburghiana.** Of Römer and Schultes, a species the tuberous root of which is used as an aromatic in southern Asia. [B, 180 (*a*, 35).]

KÁEPATRI (Guz.), **KÁEPHALA** (Mah.), n's. The arillus of *Myristica malabarica.* [A, 479 (*a*. 21).]

KAEPHUL (Hind.), n. The bark of *Myrica sapida.* [B, 172 (*a*, 35).]

KAFEH (Ar.), n. See Coffee.

KÄFER (Ger.), n. Kaf′e^{2}r. A beetle. [*a*, 21.]—**Blasenziehender Goldk'.** See Lytta *vesicatoria.*—**Blattk'.** See Chrysomela (1st def.) and Chrysomelinæ.—**Goldk'.** See Cantharis *vesicatoria* and Chrysomela (1st def.).—**Goldlaufk'.** The *Carabus auratus.* [L, 80.]—**Grask'.** See Cantharis *vesicatoria.*—**Hautk'.** The genus *Dermestes.* [L, 43.]—**Herkulesk'.** The *Scarabæus Herculis.* [L, 80.]—**Hirschk'.** See Lucanus *cervus.*—**K'artig.** See Coleopterous.—**Laubk'.** See Cantharis *vesicatoria.*—**Laufk'.** See Carabus.

KAFFE (Ger.), n. Ka^{3}f′fe^3. See Coffee.—**K. von Soudan.** The seed of *Parkia africana.* [B, 180 (*a*, 35).]—**Schwedischer K.** The seed of *Astragalus bœticus.* [B, 180 (*a*, 35).]—**Wilder K.** The fruit of *Phœnix reclinata.* [B, 180 (*a*, 35).]

KAFFEE (Ar.), n. The *Coffea arabica.* [L, 116.]

KAFFEE (Ger.), n. Ka^{3}f′fa. See Coffea and Coffee.—**Aechter K., Arabischer K.** See Coffea *arabica.*—**Chinak'.** See *Coffea cum* china.—**K'blitter.** See Caffeine.—**K'gerbsäure.** See Caffeotannic acid.—**K'gewächse.** See Coffeæ.—**K'säure.** See Caffeic acid.—**K'stoff.** See Caffeine.—**K. von Bourbon.** See Coffea *mauritiana.*—**Traubenförmiger K.** See Coffea *racemosa.*

KAFFEEBAUM (Ger.), n. Ka^{3}f′fa-ba^3-u^{4}m. See Coffea.—**Kentucky'scher K.** The *Gymnocladus canadensis.* [B, 180 (*a*, 35).]

KAFFEEBOHNE (Ger.), n. Ka^{3}f'fa-bon-e^2. The coffee-berry. [L, 80.]—**Deutsche K., Französische K.** The *Cicer arietinum.* [L, 80.]

KAFFEESTRAGEL (Ger.), n. Ka^{3}f'fe^2-stra^{3}g-e^{2}l. The seed of *Astragalus bœticus.* [B, 180 (*a*, 35).]

KAFUR-KACHRI (Hind.), n. The *Hedychium spicatum* or its root. [B, 121 (*a*, 35); "Proc. of the Am. Pharm. Assoc.," xxxiii (*a*, 39).]

KÁGADI (Hind.), n. Thin-shelled sweet almonds. [A, 479 (*a*, 21).]

KAGENECKIA (Lat.), n. f. Ka^{3}g-e^{2}n-e^{2}k'i^2-a^3. From *Count von Kageneck,* a German savant. Fr., *kageneckie.* A genus of rosaceous trees found in South America. [B, 19, 121 (*a*, 35).]—**K. oblonga.** The *lyday* or *lyday-wood* of Chile, where the bitter leaves are used in intermittent fever. [B, 19, 275 (*a*, 35).]

KAHINCA (Lat.), n. f. Ka(ka^3)-hi^{2}n^2'ka^3. See CAINCA.

KAHKARI, KAHKKARI, n's. In India, the *Solanum Jacquini.* [B, 121 (*a*, 35).]

KAHL (Ger.), adj. Ka^{3}l. See GLABROUS.—**K'heit, K'kopf.** See ALOPECIA and CALVITIES.—**K'köpfig.** See CALVOUS.—**K'köpfigkeit, K'sein.** See ALOPECIA.—**K'werdend.** See GLABRESCENT.

KAHLEH (Ar.), n. The *Calendula arvensis.* [B, 121 (*a*, 35).]

KAHN (Ger.), n. Ka^{3}n. 1. See SCAPHA. 2. See APHTHÆ. 3. See PHLYCTÆNULA.—**K'blättrig.** See CYMBIFOLIUS.—**K'förmig.** See SCAPHOID.—**K. früchtig.** See CYMB.CARPUS.—**K'schädelig.** See CYMBOCEPHALIC.

KAHU (Hind.), n. The *Lactuca sativa capitata.* [A, 479 (*a*, 21).]

KAHWEH, n. See COFFEE.

KAI (Ar.), n. The *Randia dumetorum.* [Égasse, "Nouv. rem.," Aug. 24, 1888, p. 362.]

KAIB (Ar.), n. Sour milk. [Ruland, Johnson (A, 325).]

KAIEPUT, n. See CAJUPUT.

KAIL, n. See KALE.

KAÏ-MEU-HOW, KAÏ-MEUOU, n's. In Cochin-China, the *Calophyllum inophyllum.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]

KAINCA (Ger.), **KAINKA** (Ger.), **KAINZA** (Ger.), n's. Ka^2'i^{2}n^2'ka^3, -i^{2}n^2'ka^3, -i^{2}n'tsa^3. See CAINCA.—**K'wurzel.** See *Radix* CAINCÆ *brasiliensis.*

KAIRINE, n. Ka^3'i^2-ren. Let., *kairina.* Ger., *Kairin.* It., *kairina, chairina, cairina.* Sp., *cairina.* An artificial alkaloid derived from quinoline. It is formed from the latter by treating with sulphuric acid, decomposing the product with caustic potassa, thus producing oxyquinoline; treating once more with tin and hydrochloric acid, thus forming the tetrahydride of oxyquinoline; and finally decomposing the last product with iodide of methyl or of ethyl, thus producing the hydride of methylic oxyquinoline, $C_{10}H_{13}NO{=}C_6[OH,H,H,H,N(CH_3).CH_2.CH_2.CH_2,—,]$, or the hydride of ethylic oxyquinoline, $C_{11}H_{15}NO = C_6[OH,H,H,H,N(C_2H_5).CH_2.CH_2.CH_2,—,]$. The former was called k. M., the latter k. A. These terms are, however, now usually given to the hydrochlorides of these radicles, so that k. M. is $C_{10}H_{13}NO.HCl$; and k. A., $C_{11}H_{15}NO.HCl$. The latter is the salt now generally employed in medicine, and is usually denominated simply k. [B.]—**K'sulphuric acid.** Ger., *Kairinschwefelsäure.* An acid, $C_{11}H_{14}NO.SO_3.OH$, derived from k. A. Its potassium salt appears in the urine after the ingestion of k. [V. Mering, "Ztsch. f. klin. Med.," vii, suppl. Heft, p. 149 (B).]

KAIROCOLL, n. Ka^3'i^{2}r-o^2-ko^{2}l. An artificial alkaloid, $C_{11}H_{11}NO_2$, obtained from quinoline. [B, 81 (*a*, 38).]

KAIROLINE, n. Ka^3'i^{2}r-o^{2}l-en. Ger., *Kairolin.* Methylquinoline hydride, $C_{10}H_{13}N{=}C_6[H,H,H,H,N(CH_3).CH_2.CH_2.CH_2,—,]$, or kairine (kairine M.) less an atom of oxygen. [W. Filehne, "Berl. klin. Wchnschr.," No. 45, 1882 (B).]

KAISERBAD (Ger.), n. Kiz'e^{2}r-ba^{3}d. One of the bathing establishments at Aachen.

KAISERBRUNNEN VON HOMBURG (Ger.), n. Kiz'e^{2}r-brun-ne^{2}n fo^{2}n ho^{2}m'burg. See HOMBURG.

KAISER-FRANZENSBAD (Ger.), n. Kiz'e^{2}r-fra^{3}ntz-e^{2}nz-bad. See FRANZENSBAD.

KAISERLICH (Ger.), adj. Ka^3'i^2-ze^{2}r-li^{2}ch^2. See CÆSAREAN.

KAISERLING (Ger.), n. Ka^3'i^2-ze^{2}r-li^{2}n^2. The *Agaricus cæsareus.* [B, 180 (*a*, 35).]

KAISERQUELLE (Ger.), n. Kiz'e^{2}r-kwe^{2}l-le^2. One of the hot springs at Aachen.

KAISERSCHNITT (Ger.), n. Kiz'e^{2}r-schni^{2}t. See *Cæsarean* OPERATION.—**Normaler K.** The Cæsarean operation by the old method, as distinguished from recent modifications. [A, 32.]

KAISERWURZ (Ger.), **KAISERWURZEL** (Ger.), n's. Ka^3'i^2-ze^{2}r-vurts, -vurts-e^{2}l. The *Imperatoria ostruthium.* [B, 48, 88, 180 (*a*, 35).]

KAJALA (Hind.), n. A mixture of soot with butter or ghee and a small quantity of Chinese camphor. [A, 479 (*a*, 21).]

KAJALEE (Hind.), **KÁJALI GOKARANA** (Bomb.), n's. The seeds of *Clitorea spectabilis.* [A, 479 (*a*, 21); "Proc. of the Am. Pharm. Assoc.," xxv (*a*, 39).]

KAJAPUT (Ger.), n. Ka^3-ya^3-put'. See CAJUPUT.—**K'öl.** See *Oil of* CAJUPUT.

KÁJARÁ (Guz.), n. The *Strychnos nux vomica.* [A, 479 (*a*, 21).]

KAJEPUT (Ger.), n. Ka^3-ye^2-put'. See CAJUPUT.—**K'baum.** See CAJUPUT-*tree.*—**K'öl.** See *Oil of* CAJUPUT.—**K'samen.** See *Fructus* CAJEPUTI.

KAJIRA (Hind.), n. The *Strychnos nux vomica.* ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 39).]

KAJU (Hind.), n. The *Anacardium occidentale.* [B, 172 (*a*, 35).]

KAKA-CHINCHI (Hind.), **KÁKA CHIÑCHI BÁJAMA** (Sanscr.), n. See ABRUS *precatorius.*

KAKA-COLLIE (Tamil), **KAKA-COOLLIE** (Tamil), n's. The *Anamirta cocculus.* [B, 172 (*a*, 35).]—**K. verei.** See *R.*

KAKA-KODI, n. In Malabar, a species of *Apocynum* employed in gout. [B, 88 (*a*, 39).]

KAKAMÁCHI (Sanscr.), n. The *Solanum nigrum.* [A, 479 (*a*, 21).]

KÁKAMÁRI (Hind.), n. See COCCULUS *indicus* and ANAMIRTA *cocculus.*

KAKA MOULOU (Ar.), **KAKA MULU** (Ar.), n's. A decoction of the bark of a species of *Apocynum* in milk, used in diabetes and gonorrhœa. [B, 88 (*a*, 39).]

KAKAOBAUM (Ger.), n. Ka^3-ka^3'o-ba^3-u^{4}m. The genus *Theobroma.* [B, 180 (*a*, 35).]—**Aechter K.** The *Theobroma cacao.* [B, 180 (*a*, 35).]—**Gujanischer K.** The *Theobroma guianense.* [B, 180 (*a*, 35).]—**Zweifarbiger K.** The *Theobroma bicolor.* [B, 180 (*a*, 35).]

KÁKAPHALA (Bomb.), n. See COCCULUS *indicus* and ANAMIRTA *cocculus.*

KAKERLAGISME (Fr.), n. Ka^3-ke^{2}r-la^3-zhezh-m'. See ALBINISM.

KAKERLAK, n. Fr., *kakerlaque.* A Polynesian word for an albino. In Java, where it also means a cockroach, it is said to have been applied to albinos because of their aversion to light on account of photophobia. [G, 15.]

KAKERLAKISM, n. Ka^{2}k'e^{2}r-la^{2}k-i^{2}z'm. Fr., *kakerlaquisme, kakerlagisme.* See ALBINISM.

KAKI (Jap.). The *Diospyros k.* [A, 496 (*a*, 35).]

KAKMARI (Hind.), n. The *Anamirta cocculus.* [B, 172 (*a*, 35).]

KAKOMETER (Ger.), n. Ka^3-ko-mat'e^{2}r. From κακός, evil, and μέτρον, a measure. See EUDIOMETER (1st def.).

KAKRASINGHEE (Hind.), n. The galls of *Rhus succedanea.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 39).]

KAKRIE (Hind.), n. The *Cucumis utilissimus.* [B, 172 (*a*, 35).]

KALA (Ar.), n. The genus *Euphorbia.* [B, 92, 121 (*a*, 35).]—**K. adusá.** A common garden plant used instead of *Justicia adhatoda.* [A, 479 (*a*, 21).]—**K. akolá** (Hind., Duk.). See ALANGIUM *hexapetalum.*—**K. azār.** An East Indian term for the "black death" of the Garo Hills, supposed by some to be a fever of malarial origin, but by others thought to be *sui generis,* perhaps allied to beri-beri. ["Indian Med. Gaz.," Mar., 1885, p. 83.]—**K. biehavá** (Mah.). Perhaps the *Polypodium.* [A, 479 (*a*, 21).]—**K.-buchnak** (Hind.). The *Hymenodictyon excelsum.* [B, 172 (*a*, 35).]—**K. dhootura** [Beng., Hind.). The *Datura fastuosa.* [B, 172 (*a*, 35).]—**K. kangni.** The *Setaria italica* (*Panicum italicum*). [B, 197; A, 496 (*a*, 35).]—**K. kapásanán jidaván** (Guz.). The fruit of *Gossypium herbaceum.* [A, 479 (*a*, 21).]—**K. kasunda** (Beng.). See CASSIA *occidentalis.*—**K. khajur** (Hind.). The dried fruit of *Melia superba.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]—**K'khápari** (Hind.). See CALAMINE (1st def.).—**K.-koora** (Hind.). The *Wrightia tinctoria.* ["Proc. of the Am. Pharm. Assoc.," xxv (*a*, 39).]—**K.-kuchoo** (Beng.). The *Colocasia antiquorum.* [B, 172 (*a*, 35).]—**K. kuda** (Hind.). The *Wrightia tinctoria.* [A, 479 (*a*, 21).]—**K.-kustooree** (Hind.). The *Abelmoschus moschatus.* [B, 172 (*a*, 35).]—**K'makkian.** In India, the *Croton tiglium.* [B, 121 (*a*, 35).]—**K. malama** (Hind.). A black ointment, having red oxide of lead as a basis, used by the Hindu women for painting the forehead. [A, 479 (*a*, 21).]—**K'mega** (Beng.), **K.-megh** (Beng., Hind.). See ANDROGRAPHIS *paniculata.*—**K'mirch** (Beng.). The *Piper nigrum.* [B, 172 (*a*, 35).]—**K. nágakesara** (Hind.). The flower-buds or immature fruits of *Cinnamomum cassia.* [L, 479 (*a*, 21).]—**K. nagkesur** (Hind.). The *Cinnamomum Loureiri.* ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 39).]—**K.-nimak.** Lit., black salt, a mineral substance much used in India as a medicine. [E. J. Waring, "Brit. Med. Jour.," June 6, 1886, p. 1145 (B).]—**K. pána-ki-jara** (Hind., Beng., Bomb.). See ALPINIA *galanga* and ALPINIA *officinarum.*—**K.-til** (Hind.). The seed of *Sesamum indicum.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 39).]

KALADANA, n. In the East Indies, the seed of *Pharbitis* (*Ipomœa*) *nil;* also, the purgative resin obtained from the plant. [B, 18, 19, 93, 121 (*a*, 35).]

KALAF, n. A medicinal water obtained from the male catkins of *Salix ægyptiaca.* [B, 19 (*a*, 35).]

KALAJIRA (Hind.), n. The seeds of *Nigella sativa.* [B, 48 (*a*, 14).]

KALAKA (Hind.), n. The *Carissa corundas.* ["Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 39).]

KALAMBA KACHARI (Bomb.), n. The *Jatrorrhiza palmata.* [A, 479 (*a*, 21).]

KALAMBAK (Ger.), n. Ka^{3}l'a^{3}m-ba^{3}k. See ALOES-WOOD.

KALANCHOE (Lat.), n. f. Ka^{2}l(ka^{3}l)-a^{2}n^2(a^{3}n^2)'ko(ch^{2}o^2)-e(a). Gen., *-anch'oes.* Fr., *kalanchoé.* Of Adanson, a genus of the *Crassulaceæ.* [B, 19, 38, 121 (*a*, 35).]—**K. brasiliensis.** A Brazilian species having properties like those of *K. laciniata.* [B, 121 (*a*, 35).]—**K. glandulosa.** The *endaholla* of the Abyssinians, who use

the fruits, mixed with honey, to expedite labor. [B, 121 (*a*, 35).]—**K. laciniata.** Hind., *zakhm-e-hayata.* Bomb., *airávana mairavana.* Sanscr., *hemasagara.* An East Indian species, used in sanious ulcers. In the Molucca Islands its juice is employed as an antipyretic. [B, 121, 180 (*a*, 35).]—**K. pinnata.** An East Indian species. The leaves are used as a poultice for boils, wounds, and insect bites. [Dymock, "Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14).]

KÁLÁN̄ MARI (Bomb.), n. The *Piper nigrum.* [A, 479 (*a*, 21).]

KALB (Ger.), n. Ka^{3}lb. See CALF (1st def.).—**K'fleisch.** Veal. [L, 80.]—**K'fleischbrühe.** Veal broth or the juice of the meat. [L, 80.]—**K'sfuss.** The *Arum maculatum.* [B, 48 (*a*, 14).]—**K'snase.** See ANTIRRHINUM *majus.*—**Kälberkern.** The *Chærophyllum bulbosum.* [B, 48 (*a*, 14).]—**Kälberlähme.** See ARTHROCACE *agniculorum.*

KÄLBERKROPF (Ger.), n. Kalb'er-kropf. Hog-weed. 1. See CHÆROPHYLLUM. 2. The *Heracleum spondylium.* [B, 48 (*a*, 14).]—**Berauschender K.** See CHÆROPHYLLUM *temulum.*—**Gelbfrüchtiger K.** See CHÆROPHYLLUM *aureum.*—**Knolliger K.** See CHÆROPHYLLUM *bulbosum.*—**Rauhaariger K.** See CHÆROPHYLLUM *hirsutum.*

KALD, n. Of the alchemists, vinegar. [Ruland, Johnson (A, 325).]

KALE, n. Kal. Lat., *caulis.* 1. The open-leaved cabbage (*Brassica oleracea acephala*). 2. The *Sinapis arvensis.* [A, 505 (*a*, 21); B, 19, 185, 275 (*a*, 35).]—**Bow k.** See CABBAGE.—**Corn k., Field k.** The *Sinapis arvensis.* [A, 505 (*a*, 21).]—**India-k.** See *West Indian k.*—**Indian k.** The *Typhonium divaricatum* and *Typhonium cuspidatum*, the *Caladium nymphæifolium*, and other species of *Caladium.* [B, 19, 185, 275 (*a*, 35).]—**Pencuir k.** The *Polygonum bistorta.* [A, 505 (*a*, 21).]—**Scotch k.** The *Brassica oleracea*, var. *sabellica.* [B, 275 (*a*, 35).]—**Sea k.** The *Crambe maritima.* [A, 511; B, 19 (*a*, 35).]—**Slake k.** 1. The *Porphyra laciniata.* 2. The *Ulva lactuca.* [A, 505 (*a*, 21).]—**West Indian k.** The genus *Colocasia.* [B, 275 (*a*, 35).]—**Wild k.** The *Sinapis arvensis.* [B, 275 (*a*, 35).]

KÁLE (Hind.), n. The fruit of *Terminalia chebula.* [A, 479 (*a*, 21).]

KALENDER (Ger.), n. Ka^{3}l-e^{2}nd'e^{2}r. See CALENDAR.—**Blumenk'.** See *Floral* CALENDAR.—**Schwangerschaftsk'.** See *Obstetric* CALENDAR.

KALENGI-KANSJAVA (Malay), n. The *Cannabis sativa.* [B, 172 (*a*, 35).]

KALESJAM (Malay), n. In Malabar, a tree with an astringent bark used in sore throat, aphthæ, and convulsions. [Rheede (B, 121 [*a*, 35]).]

KALETCHI-CHEDDY, n. A species of *Guilandina* found in Malabar, used in snake-bites. [L. 105.]

KALHAO, n. See MÆSA *picta.*
